## Preface to the seventh edition

It has become customary for Richard Whish to begin the preface to successive editions of this book by remarking upon how much has changed since the previous edition. For this edition there is a significant change of a different kind, which is the addition of David Bailey as a co-author of the book. David worked as a research assistant on the fifth edition, contributed significantly to the sixth, and now shares responsibility, and credit(!), for the seventh. Richard is delighted that David has become party to what is now a joint venture.

Of course, it is also true to say that there has been an enormous amount of change to the law, even in the three years between the last edition and this one.

The most important development, though not involving any change of the law as such, is probably the publication of the *Guidance on the Commission's enforcement priorities in applying Article [102 TFEU] to abusive exclusionary conduct by dominant undertakings*. The preface to the sixth edition predicted that the Commission would not publish guidelines setting out the law: that proved to be a correct prediction. It speculated that instead the Commission might make a statement as to the 'principles' it would apply when deciding which types of abuse, or which economic sectors, to investigate: that was almost correct, except that the document in question explains the Commission's 'enforcement priorities', not quite the same as 'principles'. The publication of these *Enforcement priorities* has provoked a huge amount of debate, not always supportive of the Commission's approach. We are supportive. The *Enforcement priorities* do not state the law: it is for the EU Courts to decide what the law is. But they do shed light on what a 'more economic approach' to the application of Article 102 TFEU might look like in practice, and it is not unreasonable to suppose that they will have a subtle influence on the future orientation of the law. This is all work-in-progress: it will be for the ninth edition of this book (probably not the eighth) to reflect on what influence the *Enforcement priorities* will have had in practice. We have tried very hard to weave the *Enforcement priorities* into the text, but without in any sense treating them as a statement of the law: we repeatedly tell our students at King's not to fall into error by treating the *Enforcement priorities* as guidelines setting out the law; the two should not be elided.

There have been many other developments. The regime in the EU for vertical agreements under Article 101 TFEU has been refreshed, with the adoption of Regulation 330/2010 and the publication of new Guidelines. The same is true for horizontal cooperation agreements: chapter 15 has been rewritten. The European Commission has introduced a system of settlements in cartel cases, and three decisions have so far been adopted under this procedure. There has been an enormous amount of case law from the Courts in Luxembourg, often dealing with procedural issues and the level of fines, in particular in cartel cases; but also exploring some of the most basic issues under Articles 101 and 102 TFEU such as the meaning of 'object' restrictions under Article 101(1) (*Beef Industry Development Society v Competition Authority*, *GlaxoSmithKline v Commission*, *T-Mobile v NMA*) and the nature of 'abuse' under Article 102 (see in particular *AstraZeneca v Commission*). *Deutsche Telekom v Commission* and *TeliaSonera v Konkurrensverket* are notable not only for their recognition of margin squeeze as an independent type of abuse under Article 102 but also for their emphasis on the 'as efficient' competitor approach to that provision. The Court of Justice would appear to want to contradict the common accusation that Article 102 is used to protect competitors rather than the process of competition: it actually protects competition between *efficient* firms.

Much has been happening in UK competition law and policy as well. The OFT has imposed significant fines in a number of cases in recent years, for example in *Construction bid rigging*, *Recruitment agencies*, *Royal Bank of Scotland*, *Tobacco* and *Reckitt Benckiser*. The fines in the first two of these were reduced on appeal, but there is no doubt that the law is being enforced more vigorously now than previously. There have been many new guidelines on matters such as leniency, OFT investigation procedures and merger control: a welcome development has been the adoption of joint guidelines on substantive merger assessment by the OFT and Competition Commission.

At the time of writing, a consultation on the reform of UK competition law, initiated by the Department for Business, Innovation and Skills, has just closed: this is likely to lead to the OFT and Competition Commission being merged into a new Competition and Markets Authority. In writing this book we are constrained by a word limit (this edition is the same length as the sixth). We have chosen to say little about the possibilities for reform in the text of this edition, as it is likely that anything we write now will soon be overtaken by events. We intend, therefore, to keep readers informed of the position by updating the Online Resource Centre that accompanies this book. The cut-off date for this text is 20 June 2011, although a few minor updates have been included at the stage of correcting proofs.

We have made many changes to the text to reflect the entry into force of the Lisbon Treaty. In particular we have used the terms ‘General Court’ and ‘Court of Justice’ throughout, and have deleted all references to the ‘CFI’ and ‘ECJ’. We have usually changed Articles 81 and 82 to Articles 101 and 102, except that we have not altered the titles of books and articles, in deference to their authors.

The book contains numerous tables of cases and decisions, for example of commitment decisions of the European Commission under Article 9 of Regulation 1/2003 (chapter 7), decisions of the competition authorities in the UK under the Chapter I and II prohibitions in the Competition Act 1998 and Articles 101 and 102 (chapter 9) and Phase II merger investigations under the EU Merger Regulation (chapter 21). In some cases fuller tables containing details of older decisions will be found on the Online Resource Centre: for example we have posted there tables of all Phase II merger cases under the EU Merger Regulation and the UK Enterprise Act 2002 since they entered into force.

Many people have been very helpful to us with their comments, and we thank them hugely. In particular we would like to mention Carole Begent, Margaret Bloom, Leo Flynn, Jackie Holland, Deborah Jones, Adrian Majumdar, Sheldon Mills, David Rawlings, Chris Townley and Wouter Wils. If we have forgotten anyone, we apologise profusely! A very special ‘thank you’ goes to Dimitris Mourkas, who was also Richard’s research assistant for the sixth edition: his contribution was terrific, and he is also a very good friend. We are very grateful to the Centre of European Law at King’s College London, which provided the funding for Dimitris’ research assistance. We also thank OUP for their support throughout, including their understanding of our difficulties in complying with what would have been their ideal deadlines.

The development of competition law today is ceaseless, and updating a book that attempts to explain the EU rules as well as the UK ones (which in several ways are quite different) within a broader international context inevitably takes its toll on social and family life. For this edition Anil Sinanan was unable to provide any Bollywood blockbusters to provide respite (sadly a lean period musically), but at least there was always some Pinot Grigio to encourage original thinking.

Richard Whish

## Competition policy and economics

1. Introduction	1	3. The Theory of Competition	3
2. Overview of the Practices Controlled by Competition Law	2	4. The Function of Competition Law	19
		5. Market Definition and Market Power	25

### 1. Introduction

As a general proposition competition law consists of rules that are intended to protect the process of competition in order to maximise consumer welfare. Competition law has grown at a phenomenal rate in recent years in response to the enormous changes in political thinking and economic behaviour that have taken place around the world. There are now more than 120 systems of competition law in the world<sup>1</sup>. In recent years competition laws have entered into force in both China and in India, potentially bringing the benefits of competitive markets to an additional two and a half billion citizens of the world; a competition law will come into effect in Malaysia in 2012. There are several other new competition laws in contemplation, for example in Hong Kong and the Philippines. Competition laws will be found in all continents and in all types of economies – large, small, continental, island, advanced, developing, industrial, trading, agricultural, liberal and post-communist. Quite apart from its geographical growth, competition law is now applied to many economic activities that once were regarded as natural monopolies or the preserve of the state: telecommunications, energy, transport, broadcasting and postal services, to name a few obvious examples, have become the subject of competition law scrutiny. Other sectors, such as the liberal professions, sport and the media, are also within the scope of the subject.

The global reach of competition laws is reflected in the creation of the International Competition Network, a virtual organisation which brings together more than 100 of the world's competition authorities. It has enormous influence in building consensus and convergence towards sound competition policy principles. Its work is considered in chapter 12<sup>2</sup>.

A central concern of competition policy is that a firm or firms with market power are able, in various ways, to harm consumer welfare, for example by reducing output, raising prices, degrading the quality of products on the market, suppressing innovation and

<sup>1</sup> A helpful way of accessing the competition laws of the world is through the website of the International Bar Association's Global Competition Forum, at [www.globalcompetitionforum.org](http://www.globalcompetitionforum.org); other useful sources are the websites of the International Competition Network, [www.internationalcompetitionnetwork.org](http://www.internationalcompetitionnetwork.org); the OECD, [www.oecd.org](http://www.oecd.org); and UNCTAD, [www.unctad.org](http://www.unctad.org).

<sup>2</sup> See ch 12, 'International competition network', p 508.

depriving consumers of choice. These concerns cannot be expressed in a codified table of rules capable of precise application in the way, for example, that laws on taxation or the relationship of landlord and tenant can. The analysis of competition issues invariably requires an assessment of market power, and such an assessment cannot be conducted without an understanding of the economic concepts involved. The same is true of the types of behaviour – for example cartelisation, predatory pricing, discrimination, mergers – with which competition law is concerned. Competition lawyers must understand economic concepts, and competition economists must understand legal processes. It is common practice today – and much to be welcomed – that competition lawyers attend courses on economics and vice versa. Complex cases require both legal and economic input. A (possibly apocryphal) story is that a competition lawyer once remarked at a competition law conference that, in his view, in any competition law case the lawyer should be in the driving seat; and that a competition economist readily agreed, since he always preferred to have a chauffeur. To the extent that this suggests that there is inevitably a conflict between lawyers and economists is, hopefully, outdated: it is better to think of the two as co-pilots of an aeroplane, each understanding the contribution to be made by the other<sup>3</sup>.

In the early days of competition law in the European Union the role of economics was not particularly strongly emphasised; the same was true in the US in the early years of antitrust law there. Competition law developed in a fairly formalistic manner, and there were many more ‘rules’ of a legalistic nature than is the case today. The position – from the middle of the 1990s onwards – has changed dramatically, not least as a result of eminent economists being appointed to some of the most influential positions in institutions entrusted with the application of competition law<sup>4</sup>. An attempt will be made throughout this book to place the competition law of the EU and the UK in its economic context.

This chapter will begin with a brief description of the types of behaviour that competition law is concerned with. It will then attempt to explain why competition policy is considered to be so important to modern economies based on the market mechanism: first it will explore the theory of competition itself and then the various functions that a system of competition law might be expected to fulfil. The chapter will then introduce two key economic concepts – market definition and, more importantly, market power – that are of fundamental importance to understanding competition policy, and that are central to all competition analysis in practice. The chapter will conclude with a table of market share figures that have significance in the application of EU and UK competition law, while reminding the reader that market shares are only ever a proxy for market power and can never be determinative of market power in themselves.

## 2. Overview of the Practices Controlled by Competition Law

Systems of competition law are concerned with practices that are harmful to the competitive process. In particular competition law is concerned with:

- **anti-competitive agreements:** agreements that have as their object or effect the restriction of competition are unlawful, unless they have some redeeming virtue

<sup>3</sup> For discussion see Kovacic and Shapiro ‘Antitrust Policy: A Century of Economic and Legal Thinking’ (2000) 14(1) *Journal of Economic Perspectives* 43.

<sup>4</sup> Obvious examples are the appointment of Mario Monti as European Commissioner for Competition, Sir Derek Morris as Chairman of the UK Competition Commission and Sir John Vickers as Chairman and Chief Executive of the UK Office of Fair Trading.

such as the enhancement of economic efficiency. In particular agreements between competitors, for example to fix prices, to share markets or to restrict output – often referred to as horizontal agreements – are severely punished, and in some systems of law can even lead to the imprisonment of the individuals responsible for them. Agreements between firms at different levels of the market – known as vertical agreements – may also be struck down when they could be harmful to competition: an example would be where a supplier of goods instructs its retailers not to resell them at less than a certain price, a practice often referred to as resale price maintenance. As a general proposition, vertical agreements are much less likely to harm competition than horizontal ones

- **abusive behaviour:** abusive behaviour by a monopolist, or by a dominant firm with substantial market power which enables it to behave as if it were a monopolist, can also be condemned by competition law. An example would be where a dominant firm reduces its prices to less than cost in order to drive a competitor out of the market or to deter a competitor from entering the market so that it can subsequently charge higher prices, a phenomenon known as predatory pricing
- **mergers:** many systems of competition law enable a competition authority to investigate mergers between firms that could be harmful to the competitive process: clearly if one competitor were to acquire its main competitor the possibility exists that consumers would be deprived of choice and may have to pay higher prices as a result. Many systems of competition law provide that certain mergers cannot be completed until the approval of the relevant competition authority has been obtained
- **public restrictions of competition:** the State is often responsible for restrictions and distortions of competition, for example as a result of legislative measures, regulations, licensing rules or the provision of subsidies. Some systems of competition law give a role to competition authorities to scrutinise ‘public’ restrictions of competition and to play a ‘competition advocacy’ role by commenting on, and even recommending the removal of, such restrictions.

### 3. The Theory of Competition

Competition means a struggle or contention for superiority, and in the commercial world this means a striving for the custom and business of people in the market place: competition has been described as ‘a process of rivalry between firms . . . seeking to win customers’ business over time’<sup>5</sup>. The ideological struggle between capitalism and communism was a dominant feature of the twentieth century. Many countries had the greatest suspicion of competitive markets and saw, instead, benefits in state planning and management of the economy. However enormous changes took place as the millennium approached, leading to widespread demonopolisation, liberalisation and privatisation. These phenomena, coupled with rapid technological changes and the opening up of international trade, unleashed unprecedentedly powerful economic forces. These changes impact upon individuals and societies in different ways, and sometimes the effects can be uncomfortable. Underlying them, however, is a growing consensus that, on the whole, markets deliver

<sup>5</sup> See para 4.1.2 of the *Merger Assessment Guidelines* of the UK Office of Fair Trading and Competition Commission, CC2 revised and OFT 1254, September 2010, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

better outcomes than state planning; and central to the idea of a market is the process of competition.

The important issue therefore is to determine the effect which competition can have on economic performance. To understand this one must first turn to economic theory and consider what would happen in conditions of perfect competition and compare the outcome with what happens under monopoly, recognising as one does so that a theoretical analysis of perfect competition does not adequately explain business behaviour in the 'real' world.

### (A) The benefits of perfect competition

At its simplest – and it is sensible in considering competition law and policy not to lose sight of the simple propositions – the benefits of competition are lower prices, better products, wider choice and greater efficiency than would be obtained under conditions of monopoly. According to neo-classical economic theory, social welfare is maximised in conditions of perfect competition<sup>6</sup>. For this purpose 'social welfare' is not a vague generalised concept, but instead has a more specific meaning: that allocative and productive efficiency will be achieved; the combined effect of allocative and productive efficiency is that society's wealth overall is maximised. Consumer welfare, which is specifically concerned with gains to consumers as opposed to society at large, is also maximised in perfect competition<sup>7</sup>. A related benefit of competition is that it may have the dynamic effect of stimulating innovation as competitors strive to produce new and better products for consumers: this is a particularly important feature of high technology markets.

#### (i) Allocative efficiency

Under perfect competition economic resources are allocated between different goods and services in such a way that it is not possible to make anyone better off without making someone else worse off; consumer surplus – the net gain to a consumer when buying a product – is at its largest. Goods and services are allocated between consumers according

<sup>6</sup> See Asch *Industrial Organization and Antitrust Policy* (Wiley, revised ed, 1983), ch 1; Scherer and Ross *Industrial Market Structure and Economic Performance* (Houghton Mifflin, 3rd ed, 1990), chs 1 and 2; Lipsey and Chrystal *Economics* (Oxford University Press, 12th ed, 2011), ch 7; on industrial economics and competition generally see Tirole *The Theory of Industrial Organization* (MIT Press, 1988); Hay and Morris *Industrial Economics: Theory and Evidence* (Oxford University Press, 1991); Peeperkorn and Mehta 'The Economics of Competition', ch 1 in Faull and Nikpay *The EC Law of Competition* (Oxford University Press, 2nd ed, 2007); Sullivan and Harrison *Understanding Antitrust and Its Economic Implications* (LexisNexis, 4th ed, 2003); Hylton *Antitrust Law: Economic Theory and Common Law Evolution* (Cambridge University Press, 2003); Motta *Competition Policy: Theory and Practice* (Cambridge University Press, 2004); Carlton and Perloff *Modern Industrial Organisation* (Addison Wesley, 4th ed, 2005); Van den Bergh and Camesasca *European Competition Law and Economics: A Comparative Perspective* (Sweet & Maxwell, 2nd ed, 2006); Bishop and Walker *The Economics of EC Competition Law* (Sweet & Maxwell, 3rd ed, 2010), ch 2; Niels, Jenkins and Kavanagh *Economics for Competition Lawyers* (Oxford University Press, 2011); on the psychology of competition from the business manager's perspective, see Porter *Competitive Strategy: Techniques for Analyzing Industries and Competitors* (Macmillan, 1998). Readers may find helpful, in coping with the terminology of the economics of competition law, the *Glossary of Industrial Organisation, Economics and Competition Law* (OECD, 1993); Black *Oxford Dictionary of Economics* (Oxford University Press, 3rd ed, 2003); and the European Commission's *Glossary of Terms used in Competition related matters*, available at [www.ec.europa.eu/competition/publications/glossary\\_en.pdf](http://www.ec.europa.eu/competition/publications/glossary_en.pdf).

<sup>7</sup> See Bishop and Walker, paras 2.17–2.19; Van den Bergh and Camesasca, pp 62–69; Cseres 'The Controversies of the Consumer Welfare Standard' (2007) 3(2) *Competition Law Review* 121; Orbach 'The Antitrust Consumer Welfare Paradox' (2011) 7(1) *Journal of Competition Law and Economics* 133.

to the price they are prepared to pay, and, in the long run, price equals the marginal cost<sup>8</sup> of production (cost for this purpose including a sufficient profit margin to have encouraged the producer to invest his capital in the industry in the first place, but no more).

The achievement of allocative efficiency, as this phenomenon is known<sup>9</sup>, can be shown analytically on the economist's model<sup>10</sup>. Allocative efficiency is achieved under perfect competition because the producer, assuming he is acting rationally and has a desire to maximise his profits, will expand his production for as long as it is privately profitable to do so. As long as he can earn more by producing one extra unit of whatever he produces than it costs to make it, he will presumably do so. Only when the cost of producing a further unit (the 'marginal cost') exceeds the price he would obtain for it (the 'marginal revenue') will he cease to expand production. Where competition is perfect, a reduction in a producer's own output cannot affect the market price and so there is no reason to limit it; the producer will therefore increase output to the point at which marginal cost and marginal revenue (the net addition to revenue of selling the last unit) coincide. This means that allocative efficiency is achieved, as consumers can obtain the amounts of goods or services they require at the price they are prepared to pay: resources are allocated precisely according to their wishes. A monopolist however can restrict output and increase his own marginal revenue as a consequence of doing so<sup>11</sup>.

### (ii) Productive efficiency

Apart from allocative efficiency many economists consider that under perfect competition goods and services will be produced at the lowest cost possible, which means that as little of society's wealth is expended in the production process as necessary. Monopolists, free from the constraints of competition, may be high cost producers. Thus competition is said to be conducive to productive efficiency<sup>12</sup>. Productive efficiency is achieved because a producer is unable to sell above cost (if he did his customers would immediately desert him) and he will not of course sell below it (because then he would make no profit). In particular, if a producer were to charge above cost, other competitors would move into the market in the hope of profitable activity<sup>13</sup>. They would attempt to produce on a more efficient basis so that they could earn a greater profit. In the long run the tendency will be to force producers to incur the lowest cost possible in order to be able to earn any profit at all: an equilibrium will be reached where price and the average cost of producing goods necessarily coincide. This in turn means that price will never rise above cost. If on the other hand price were to fall below cost, there would be an exit of capital from the industry and, as output would therefore decrease, price would be restored to the competitive level.

### (iii) Dynamic efficiency

A further benefit of competition, albeit one that cannot be proved scientifically and is not captured by the theory of perfect competition, is that producers will be more likely to innovate and develop new products as part of the continual battle of striving for consumers' business. Thus competition may have the desirable dynamic effect of stimulating important technological research and development. This assumption has been

<sup>8</sup> That is to say, the cost of producing an additional unit of output.

<sup>9</sup> Allocative efficiency is also sometimes referred to as 'Pareto efficiency'.

<sup>10</sup> *Scherer and Ross*, pp 19ff; *Lipsey and Chrystal*, pp 153–155.

<sup>11</sup> See 'The harmful effects of monopoly', pp 6–7 below.

<sup>12</sup> For discussion see Vickers 'Concepts of Competition' (1995) 47 *Oxford Economic Papers* 1.

<sup>13</sup> As will be seen, determining what is meant by 'cost' is, in itself, often a complex matter in competition law: see ch 18, 'Cost concepts', pp 716–718.

questioned. Some argue that only monopolists enjoy the wealth to innovate and carry out expensive research<sup>14</sup>. Schumpeter was a champion of the notion that the motivation to innovate was the prospect of monopoly profits and that, even if existing monopolists earned such profits in the short term, outsiders would in due course enter the market and displace them<sup>15</sup>. A ‘perennial gale of creative destruction’ would be sufficient to protect the public interest, so that short-term monopoly power need not cause concern. Empirical research tends to suggest that neither monopolists nor fierce competitors have a superior track record in this respect, but it would seem clear that the assertion that only monopolists can innovate is incorrect<sup>16</sup>.

It is important to acknowledge that in certain industries, particularly where technology is sophisticated and expensive, one firm may, for a period of time, enjoy very high market shares; however, in due course, a competitor may be able to enter that market with superior technology and replace the incumbent firm. In cases such as this, high market shares over a period of time may exaggerate the market power of the firm that is currently the market leader, but vulnerable to dynamic entry.

### (B) The harmful effects of monopoly

The theoretical model just outlined suggests that in perfect competition any producer will be able to sell his product only at the market price. The producer is a price-taker, with no capacity to affect the price by his own unilateral action. The consumer is sovereign. The reason why the producer cannot affect the price is that any change in his own individual output will have only a negligible effect on the aggregate output of the market as a whole, and it is aggregate output that determines price through the ‘law’ of supply and demand.

Under conditions of monopoly the position is very different<sup>17</sup>. The monopolist is in a position to affect the market price. Since he is responsible for all the output, and since it is aggregate output that determines price through the relationship of supply to demand, he will be able either to increase price by reducing the volume of his own production or to reduce sales by increasing price: the latter occurs in the case of highly branded products which are sold at a high price, such as luxury perfumes. Furthermore, again assuming a motive to maximise profits, the monopolist will see that he will be able to earn the largest profit if he refrains from expanding his production to the level that would be attained under perfect competition. The result will be that output is lower than would be the case under perfect competition and that therefore consumers will be deprived of goods and services that they would have been prepared to pay for at the competitive market price. There is therefore allocative inefficiency in this situation: society’s resources are not distributed in the most efficient way possible. The inefficiency is accentuated by the fact that consumers, deprived of the monopolised product they would have bought, will spend their money on products which they wanted less. The economy to this extent is performing below its potential. The extent of this allocative inefficiency is sometimes referred to as the ‘deadweight loss’ attributable to monopoly.

The objection to monopoly does not stop there. There is also the problem that productive efficiency may be lower because the monopolist is not constrained by competitive forces to reduce costs to the lowest possible level. Instead the firm becomes ‘X-inefficient’. This term, first used by Liebenstein<sup>18</sup>, refers to a situation in which resources are used to

<sup>14</sup> Galbraith *American Capitalism: The Concept of Countervailing Power* (Houghton Mifflin, 1952).

<sup>15</sup> *Capitalism, Socialism and Democracy* (Taylor & Francis Books, 1976).

<sup>16</sup> Scherer and Ross, ch 17.

<sup>17</sup> See Scherer and Ross, ch 2; Lipsey and Chrystal, ch 8.

<sup>18</sup> ‘Allocative Efficiency vs X-Efficiency’ (1966) 56 Am Ec Rev 392–415.

make the right product, but less productively than they might be: management spends too much time on the golf course, outdated industrial processes are maintained and a general slackness pervades the organisation of the firm. Furthermore the monopolist may not feel the need to innovate, because he does not experience the constant pressure to go on attracting custom by offering better, more advanced, products. Thus it has been said that the greatest benefit of being a monopolist is the quiet life he is able to enjoy. However it is important to bear in mind that inefficient managers of a business may be affected by pressures other than those of competition. In particular their position may be undermined by uninvited takeover bids on stock exchanges from investors who consider that more efficient use could be made of the firm's assets<sup>19</sup>. Competition may be felt in capital as well as product markets: this is sometimes referred to as 'the market for corporate control'.

A final objection to the monopolist is that, since he can charge a higher price than in conditions of competition (he is a price-maker), wealth is transferred from the hapless consumer to him. This may be particularly true where he is able to discriminate between customers, charging some more than others: however it is important to recognise that price discrimination in some circumstances may be welfare-enhancing, or at least neutral in terms of social welfare, in particular where it allows firms to recover fixed expenditure that would otherwise not have been recovered<sup>20</sup>. While it is not the function of competition authorities themselves to determine how society's wealth should be distributed, it is manifestly a legitimate matter for Governments to take an interest in economic equity, and it may be that one of the ways in which policy is expressed on this issue is through competition law<sup>21</sup>.

Thus runs the theory of perfect competition and monopoly. It indicates that there is much to be said for the 'invisible hand' of competition which magically and surreptitiously orders society's resources in an optimal way, as opposed to the lumbering inefficiency of monopoly. However, we must now turn from the models used in the economist's laboratory to the more haphazard ways of commercial life before rendering a final verdict on the desirability of competition.

## (C) Questioning the theory of perfect competition

### (i) The model of perfect competition is based on assumptions unlikely to be observed in practice

The first point which must be made about the theory of perfect competition is that it is only a theory; the conditions necessary for perfect competition are extremely unlikely to be observed in practice. Perfect competition requires that on any particular market there is an infinite number of buyers and sellers, all producing identical (or 'homogeneous') products; consumers have perfect information about market conditions; resources can flow freely from one area of economic activity to another: there are no 'barriers to entry' which might prevent the emergence of new competition, and there are no 'barriers to exit' which might hinder firms wishing to leave the industry<sup>22</sup>. Of course a market structure

<sup>19</sup> See eg Hall 'Control Type and the Market for Corporate Control in Large US Corporations' (1977) 25 J Ind Ec 259–273; this issue is discussed further in ch 20, 'Management efficiency and the market for corporate control', pp 814–815.

<sup>20</sup> See *Lipsey and Chrystal*, pp 289–291; on abusive pricing by dominant firms generally see ch 18.

<sup>21</sup> See 'Goals of competition law', pp 19–24 below on the various functions of competition law.

<sup>22</sup> See 'Potential competitors', pp 44–45 below for further discussion of barriers to entry and exit.

satisfying all these conditions is unlikely, if not impossible: we are simply at this stage considering theory, and the theory is based upon a number of assumptions.

Between the polar market structures, of perfect competition on the one hand and monopoly on the other, there are many intermediate positions. Many firms sell products which are slightly differentiated from those of their rivals or command some degree of consumer loyalty, so that there will not be the homogeneity required for perfect competition. This means that an increase in price will not necessarily result in a substantial loss of business. It is unlikely that a customer will have such complete information of the market that he will immediately know that a lower price is available elsewhere for the product he requires, yet the theory of perfect competition depends on perfect information being available to consumers. This is why legislation sometimes requires that adequate information must be made available to consumers about prices, terms and conditions<sup>23</sup>. There are often barriers to entry and exit to and from markets; this is particularly so where a firm that enters a market incurs 'sunk costs', that is to say costs that cannot be recovered when it ceases to operate in the future.

Just as perfect competition is unlikely to be experienced in practice, monopoly in its purest form is also rare. There are few products where one firm is responsible for the entire output: normally this happens only where a state confers a monopoly, for example to deliver letters. Most economic operators have some competitors; and even a true monopolist may hoist prices so high that customers cease to buy: demand is not infinitely inelastic<sup>24</sup>. In practice, most cases involve not a monopolist, in the etymological sense of one firm selling all the products on a particular market. Rather, competition law concerns itself with firms that have a dominant position, which in competition law terms is equated with significant market power. The economic concept of market power is key to understanding and applying competition law. When assessing whether a firm or firms have market power it is normal to begin by defining the relevant product and geographical markets; then the competitive constraints upon firms both from within and from outside those markets are considered, as well as countervailing buyer power. These issues are considered further in section 5 of this chapter.

## (ii) Other problems with the theory of perfect competition

Apart from the fact that perfect competition and pure monopoly are inherently unlikely, there are other problems with the theory itself. It depends on the notion that all businessmen are rational and that they always attempt to maximise profits, but this is not necessarily the case. Directors of a company may not think that earning large profits for their shareholders is the most important consideration they face: they may be more interested to see the size of their business empire grow or to indulge themselves in the quiet life that monopolists may enjoy<sup>25</sup>.

A further problem with the theory of perfect competition is that its assertion that costs are kept to an absolute minimum is not necessarily correct. It is true that the private costs of the producer will be kept low, but that says nothing about the social costs or 'externalities' which arise for society at large from, for example, the air pollution that a factory

<sup>23</sup> This is a possible remedy under UK law following a market or merger investigation: see Enterprise Act 2002, Sch 8, paras 15–19; the CC has imposed remedies requiring the provision of clearer information to consumers on a number of occasions: see ch 11, 'The Market Investigations Provisions in Practice', pp 479–485.

<sup>24</sup> Demand is inelastic when a 1 per cent change in price leads to a fall in quantity of less than 1 per cent; it is elastic when a 1 per cent change in price leads to a reduction in quantity of a greater percentage.

<sup>25</sup> *Scherer and Ross*, pp 44–46; see also *Bishop and Walker*, p 21, n 17.

causes, or the severed limbs that must be paid for because cheap machinery is used which does not include satisfactory safeguards against injury. It has been argued that competition law should not concern itself with these social costs<sup>26</sup>, and perhaps it is true that this is a matter best left to specific legislation on issues such as conservation, the environment and health and safety at work; also it would be wrong to suppose that monopolists do not themselves produce social costs. However it is reasonable to be at least sceptical of the argument that in perfect competition the costs of society overall will inevitably be kept at a minimal level. Lastly, there is the difficulty with the theory of perfect competition that it is based on a static model of economic behaviour which may fail to account for the dynamic nature of markets and the way in which they operate over a period of time<sup>27</sup>. Firms such as Xerox and IBM, that may have dominated their industries at a particular time in history, nevertheless have found themselves to be engulfed subsequently by competitive forces in the market; it is possible that the same fate might befall Microsoft as cloud technology diminishes the importance of personal computers as a place to store data. Schumpeter's gale of perennial destruction may affect even the most powerful economic operators.

Given these doubts it might be wondered whether pursuit of an unattainable ideal of perfect competition is worthwhile at all. Indeed some theoreticians have asserted that it might be positively harmful to aspire to a 'second-best solution' in which something similar to, but falling short of, perfect competition is achieved<sup>28</sup>. A second-best solution may actually compound allocative inefficiency and harm consumer welfare, as one distortion in the market inevitably affects performance in other parts of the economy. Where competition is imperfect and monopoly exists, attacking individual vulnerable monopolies while leaving other ones intact might simply exacerbate the pre-existing allocative inefficiency. One should guard against the assumption that tinkering with individual sectors of the economy will necessarily improve performance in the economy as a whole.

Apart from the issue of 'second-best', there is the further problem that if perfect competition cannot be attained, some alternative model is needed to explain how imperfect markets work or should work. In particular it will be necessary to decide how monopolists or dominant firms should be treated, and an adequate theory will be needed to deal with oligopoly, a common industrial phenomenon which exists where a few firms between them supply most of the products within the relevant market without any of them having a clear ascendancy over the others. Some economists would argue that, as the most common market form is oligopoly, competition policy ought to be designed around an analytical model of this phenomenon rather than the theory of perfect competition<sup>29</sup>.

#### (D) Questioning competition itself

The comments just made question various aspects of the theory of perfect competition. A second line of inquiry considers whether competition is so obviously beneficial anyway. There are some arguments that suggest that competition may not yield the best outcome for society.

<sup>26</sup> Bork *The Antitrust Paradox* (The Free Press, 1993), pp 114–115.

<sup>27</sup> See eg Evans and Hylton 'The Lawful Acquisition and Exercise of Monopoly Power and Its Implications for the Objectives of Antitrust' (2008) 4(2) *Competition Policy International* 203.

<sup>28</sup> Lipsev and Lancaster 'The General Theory of Second Best' (1956–57) 24 *Rev Ec Stud* 11–32; see also Scherer and Ross, pp 33–38 and Asch, pp 97–100.

<sup>29</sup> On tacit collusion, oligopoly and parallel behaviour see ch 14.

### (i) Economies of scale and scope and natural monopolies

The first relates to economies of scale, scope and the phenomenon of ‘natural monopoly’<sup>30</sup>. In some markets there may be significant economies of scale, meaning that the average cost per unit of output decreases with the increase in the scale of the outputs produced; economies of scope occur where it is cheaper to produce two products together than to produce them separately. In some markets a profit can be made only by a firm supplying at least one quarter or one third of total output; it may even be that the ‘minimum efficient scale’ of operation is achieved only by a firm with a market share exceeding 50 per cent, so that monopoly may be seen to be a natural market condition<sup>31</sup>. Similarly, economies of scope may be essential to profitable behaviour. Natural monopoly means a situation in which scale economies are so great that having two or more competing producers would not be viable and so efficiency dictates that a single firm serves the entire market. Natural monopoly is an economic phenomenon, to be contrasted with statutory monopoly, where the right to exclude rivals from the market is derived from law. Where natural monopoly exists, it is inappropriate to attempt to achieve a level of competition which would destroy the efficiency that this entails. This problem may be exacerbated where the ‘natural monopolist’ is also required to perform a ‘universal service obligation’, such as the daily delivery of letters to all postal addresses at a uniform price; performance of such an obligation may not be profitable in normal market conditions, so that the state may confer a statutory monopoly on the undertaking entrusted with the task in question. The lawfulness under EU and UK competition law of ‘special or exclusive rights’ conferred by the state is one of the more complex issues to be considered in this book<sup>32</sup>.

Where the minimum efficient scale is very large in relation to total output, a separate question arises as to how that industry can be made to operate in a way that is beneficial to society as a whole. It may be that public ownership is a solution, or that a system of regulation should be introduced while leaving the producer or producers in the private sector<sup>33</sup>. A further possibility is that firms should be allowed to bid for a franchise to run the industry in question for a set period of time, at the end of which there will be a further round of bidding. In other words there will be periodic competition to run the industry, although no actual competition within it during the period of the franchise<sup>34</sup>: this happens in the UK, for example, when companies bid for television or rail franchises or to run the national lottery. The 100 per cent share of the market that a firm might have after it has won the bid does not accurately reflect its market power if it was subject to effective competition when making its bid<sup>35</sup>.

<sup>30</sup> *Lipsey and Chrystal*, pp 291–293; *Scherer and Ross*, pp 97–141.

<sup>31</sup> See Schmalensee *The Control of Natural Monopolies* (Lexington, 1979); Sharkey *The Theory of Natural Monopoly* (Cambridge University Press, 1982).

<sup>32</sup> See ch 6, ‘Article 106’, pp 222–224 and ch 9, ‘Services of general economic interest’, pp 352–353.

<sup>33</sup> See ch 23, ‘Regulated Industries’, pp 977–980.

<sup>34</sup> See Demsetz ‘Why Regulate Utilities?’ (1968) 11 *J L Ec* 55–66; for criticism of the idea of franchise bidding see Williamson ‘Franchise Bidding for Natural Monopolies in General and with respect to CATV’ (1976) 7 *Bell J Ec* 73–104.

<sup>35</sup> For further discussion of so-called ‘bidding markets’ see ‘Market shares’, p 43 below.

**(ii) Network effects and two-sided markets<sup>36</sup>****(A) Network effects**

Certain markets are characterised by ‘network effects’. A direct network effect arises where the value of a product increases with the number of other customers consuming the same product. A simple example of a direct network effect is a telecommunications network. Suppose that Telcom has 100 subscribers to its network; suppose further that it is impossible for the users of Telcom’s network to communicate with subscribers to competing networks. If a new consumer subscribes to the Telcom system the 100 original subscribers can now make contact with an additional person, without having incurred any additional cost themselves: for this reason the benefit to those subscribers is sometimes described as a network externality. In the same way users of a particular computer software system will benefit as more people use the same system, since it becomes possible to share documents, images and music with more people. Where this occurs computer programmers will increasingly write new software that is compatible with the system, so that the system becomes even more valuable to the consumers that use it (an indirect network effect).

**(B) Two-sided markets<sup>37</sup>**

In the simple example given above of subscribers joining a telecommunications network, the value of the network increased because of the number of consumers joining it. However there are some markets, often referred to as ‘two-sided markets’, where two or more groups of customers are catered for, and where a network effect arises as more consumers join one or the other side of the market. A simple example is a newspaper. A newspaper publisher sells advertising space; it also supplies newspapers to citizens, sometimes at a cover price and sometimes free of charge. The publisher’s ability to sell advertising space increases according to the number of citizens expected to read the newspaper. Exactly the same is true of commercial television stations: advertising slots during the football World Cup final will be hugely expensive because of the opportunity that exists to advertise products to a large number of people. The same phenomenon can be seen at play in the case of credit cards: the more merchants that accept a particular card, the more consumers will use that card; and the more consumers that use that card, the more merchants will accept it.

**(C) Network effects and competition policy**

Network effects may have positive effects on competition, since consumers become better off as a product becomes more popular. The increased utility of a telecommunications network is of value both to the operator and to the subscribers. In the case of a successful credit card system, merchants, the card issuer and consumers benefit. However network

<sup>36</sup> See OFT Economic Discussion Paper 3 (OFT 377) *Innovation and Competition Policy* (Charles River Associates, March 2002), paras 1.6–1.8; *Merger Assessment Guidelines* of the UK Office of Fair Trading and Competition Commission (CC2 revised and OFT 1254, September 2010), paras 5.2.20, 5.7.16 and 5.8.6; see further Salop and Romaine ‘Preserving Monopoly: Economic Analysis, Legal Standards, and Microsoft’ (1999) 7 *George Mason Law Review* 617; Cass and Hylton ‘Preserving Competition: Economic Analysis, Legal Standards and Microsoft’ (1999) 8 *George Mason Law Review* 1; Posner ‘Antitrust in the New Economy’ (2001) 68 *Antitrust Law Journal* 925.

<sup>37</sup> For discussion of two-sided markets see the contributions at a symposium on two-sided markets, specifically concerned with payment cards, at (2006) 73 *Antitrust Law Journal* 571ff and the series of essays in (2007) 3(1) *Competition Policy International* 147ff; see also *Bishop and Walker*, paras 3.042–3.045; and the OECD Roundtable on *Two-sided markets* of December 2009, available at [www.oecd.org](http://www.oecd.org).

effects also give rise to the possibility of one firm dominating a market, in particular because there may be ‘tipping effects’ where all the customers in a particular market decide to opt for the product of one firm or for one particular technology. Many years ago, when video cassettes and video recorders were first introduced to the market, there were two competing technologies, Betamax and VHS; many people considered that the Betamax technology was superior, and yet the market tipped in favour of VHS. In the same way the market can be seen to have tipped in favour of Microsoft’s Windows operating system<sup>38</sup>. If tipping does take place, or if it is a likely consequence of a merger, a question for competition policy is to determine how the issue should be addressed. Various possibilities exist, including remedies in merger cases<sup>39</sup> and the possibility that third parties should be allowed to have access to the product of the successful firm in whose favour the tipping has occurred: however, mandatory access to the successful products of innovative firms risks chilling the investment that created the product in the first place<sup>40</sup>.

A specific point about two-sided markets is that pricing practices that, at first sight, appear to be anti-competitive might have an objective justification in their specific context. For example in the case of free-to-air television the broadcaster, in one sense, could be seen to be acting in a predatory manner by supplying a service at below the cost of production, which would be abusive if it was in a dominant position; but in a two-sided market this analysis may be wrong if the free-to-air broadcasting is paid for by the sale of advertising; the same is true of the ‘free’ newspapers that are now so prevalent, for example, in London and other major cities.

### (iii) Particular sectors

As well as the complexity of introducing competition into markets that might be regarded as natural monopolies, it is possible that social or political value-judgments may lead to the conclusion that competition is inappropriate in particular economic sectors. Agriculture is an obvious example. Legislatures have tended to the view that agriculture possesses special features entitling it to protection from the potentially ruthless effects of the competitive system. An obvious illustration of this is the Common Agricultural Policy of the EU<sup>41</sup>. Similarly it might be thought inappropriate (or politically impossible) to expose the labour market to the full discipline of the competitive process; this point is demonstrated by the judgment of the European Court of Justice in *Albany International BV v Stichting Begrijfspensioenfonds Textielindustrie*<sup>42</sup> which concluded that collective bargaining between organisations representing employers and employees is outside Article 101 TFEU. Defence industries may be excluded from competition law scrutiny<sup>43</sup>. Systems of competition law have often shown a tendency to refrain from insisting that the liberal professions should have to sully their hands with anything as offensive as price competition or advertising, although the European Commission has taken a stricter line

<sup>38</sup> The Commission discussed tipping effects in *Microsoft*, Commission decision of 24 March 2004, paras 448–472.

<sup>39</sup> See eg Case M 1069 *WorldCom/MCI*, decision of 8 July 1998; the Commission subsequently prohibited the merger in Case M 1741 *MCIWorldCom/Sprint*, decision of 28 June 2000 where it had network concerns, but this decision was annulled on appeal for procedural reasons, Case T-310/00 *MCI Inc v Commission* [2004] ECR II-3253, [2004] 5 CMLR 1274.

<sup>40</sup> See in particular ch 17, ‘Refusal to Supply’, pp 697–711 on the law of refusal to supply and the so-called ‘essential facilities’ doctrine.

<sup>41</sup> On the (non-)application of EU competition law to the agricultural sector see ch 23, ‘Agriculture’, pp 963–967; leading texts on the common agricultural policy are cited at ch 23 n 7, p 963.

<sup>42</sup> Case C-67/96 [1999] ECR I-5751, [2000] 4 CMLR 446; see ch 3, ‘Employees and trades unions’, pp 90–91.

<sup>43</sup> See ch 23, ‘Military Equipment’, p 963 for the position in EU law.

in recent years<sup>44</sup>; however the Court of Justice has held that restrictive professional rules that are proportionate and ancillary to a regulatory system that protects a legitimate public interest fall outside Article 101(1) TFEU<sup>45</sup>. The Court of Justice in 2006 established that the competition rules are capable of application to sport<sup>46</sup>, overturning a judgment of the General Court to the contrary<sup>47</sup>.

#### (iv) Beneficial restrictions of competition

Another line of argument is that in some circumstances restrictions of competition can have beneficial results. This may manifest itself in various ways. One example is the suggestion that firms which are forced to pare costs to the minimum because of the pressures of competition will skimp on safety checks. This argument is particularly pertinent in the transport sector, where fears are sometimes expressed that safety considerations may be subordinated to the profit motive: an example would be where airlines compete fiercely on price. It may be that specific safety legislation can be used to overcome this anxiety; and monopolists seeking to enlarge their profits may show the same disregard for safety considerations as competing firms, a charge levelled against Railtrack (since replaced by Network Rail) in the UK following a series of serious rail accidents in the late 1990s and 2000. Safety was an important issue in the debate in the UK as to whether National Traffic Control Services (now known as National Air Traffic Services), responsible for the control of air navigation, should be privatised, provision for which was made in sections 41 to 65 of the Transport Act 2000. A related argument is that higher alcohol prices – and a restriction of price competition between suppliers of alcohol – might save drinkers, and the rest of society, from the harmful effects of excess drinking; the same argument can be applied to smoking.

Another possibly beneficial restriction of competition could arise where two or more firms, by acting in concert and restricting competition between themselves, are able to develop new products or to produce goods or services on a more efficient scale: the benefit to the public at large may be considerable; both Article 101(3) TFEU and section 9 of the UK Competition Act 1998 recognise that, in some cases, agreements may be tolerated which, though restrictive of competition, produce beneficial effects<sup>48</sup>. A further example of the same point is that a producer might impose restrictions on his distributors in order to ensure that they promote his products in the most effective way possible; although this might diminish competition in his own goods (intra-brand competition), the net effect may be to enhance the competitive edge of them as against those produced by his competitors (inter-brand competition)<sup>49</sup>. These examples suggest that a blanket prohibition of agreements that restrict competition would deprive the public of substantial advantages.

#### (v) Ethical and other objections

A more fundamental objection to competition might be that it is considered in some sense to be inherently objectionable. The very notion of a process of rivalry whereby firms strive for superiority may be considered ethically unsound. One argument (now largely

<sup>44</sup> See ch 13, 'Advertising Restrictions', pp 547–550.

<sup>45</sup> Case C-309/99 *Wouters v Algemene Raad van de Nederlandse Orde van Advocaten* [2002] ECR I-1577, [2002] 4 CMLR 913; see ch 3, 'Regulatory ancillarity: the judgment of the Court of Justice in *Wouters*', pp 130–133.

<sup>46</sup> Case C-519/04 P *David Meca-Medina v Commission* [2006] ECR I-6991, [2006] 5 CMLR 1023; see ch 3, 'The application of Article 101(1) to sporting rules', pp 133–134.

<sup>47</sup> Case T-313/02 *David Meca-Medina v Commission* [2004] ECR II-3291, [2004] 3 CMLR 1314.

<sup>48</sup> On horizontal cooperation agreements generally see ch 15.

<sup>49</sup> On vertical agreements generally see ch 16.

discredited) is that ‘cut-throat’ competition means that firms are forced to charge ever lower prices until in the end the vicious cycle leads them to charge below marginal cost in order to keep custom at all; the inevitable effect of this will be insolvency. The prevailing attitude in much of UK industry during the first half of the twentieth century was that competition was ‘harmful’ and even destructive and it was this entrenched feeling that led to the adoption of a pragmatic and non-doctrinaire system of control in 1948<sup>50</sup>. It was not until the Competition Act 1998 – 50 years later – that the UK finally adopted legislation that gave the Office of Fair Trading (‘the OFT’) effective powers to unearth and penalise pernicious cartels<sup>51</sup>. Economically the argument that competition is a cut-throat business that leads to insolvency is implausible, but industrialists do use it.

Another argument is that competition should be arrested where industries enter cyclical recessions – or even long-term decline – in order that they do not disappear altogether<sup>52</sup>. Again competition might be thought undesirable because of its wasteful effects. The consumer may be incapable of purchasing a tin of baked beans in one supermarket because of the agonising fear that at the other end of town a competitor is offering them more cheaply. He will waste his time (a social cost) and money ‘shopping around’: such an argument once commended itself to the (now abolished) Restrictive Practices Court in the UK<sup>53</sup>. Meanwhile competitors will be wasting their own money by paying advertising agencies to think up more expensive and elaborate campaigns to promote their products<sup>54</sup>.

#### (vi) Industrial policy

One practical objection to promoting competition is that it may be considered to be inimical to the general thrust of industrial policy. Admittedly the suggestion has been made that, in conditions of perfect competition, firms will innovate in order to keep or attract new custom. However Governments often encourage firms to collaborate where this would lead to economies of scale or to more effective research and development; and they may adopt a policy of promoting ‘national champions’ which will be effective as competitors in international markets<sup>55</sup>. There are certainly circumstances in which the innovator, the entrepreneur and the risk-taker may require some immunity from competition if they are to indulge in expensive technological projects. This is recognised in the law of intellectual property rights which provides an incentive to firms to innovate by preventing the appropriation of commercial ideas which they have developed<sup>56</sup>. A patentee in the UK is given the exclusive right for 20 years to exploit the subject-matter of his patent<sup>57</sup>. A similar incentive and/or reward is given to the owners of copyright, registered designs and analogous rights<sup>58</sup>. This is a recognition of the fact that in some circumstances competition suppresses innovation and an indication of the vacuity of relentlessly pursuing the ideal of perfect competition. The relationship between competition law and the law of intellectual property is a fascinating one, in particular the

apparent tension between on the one hand the desire to keep markets open and free from monopoly and on the other the need to encourage innovation precisely by granting monopoly rights; in fact, however, this tension is more apparent than real<sup>59</sup>. These issues will be considered in chapter 19.

### (vii) **The economic crisis and competition policy**

The global economic crisis that commenced in the late 2000s led to loud calls in some quarters for a relaxation, or even the abandonment, of competition law in order to provide relief to firms facing an uncertain financial future. Competition authorities globally resisted such calls, arguing that competition remained as important in harsh economic times as in benign ones<sup>60</sup>.

### (viii) **Competitions are there to be won**

The last point that should be made in this brief survey of objections to competition is that the competitive process contains an inevitable paradox. Some competitors win. By being the most innovative, the most responsive to customers' wishes, and by producing goods or services in the most efficient way possible, one firm may succeed in seeing off its rivals. It would be strange, and indeed harmful, if that firm could then be condemned for being a monopolist. As Judge Learned Hand opined in *US v Aluminum Co of America*<sup>61</sup>:

[A] single producer may be the survivor out of a group of active companies, merely by virtue of his superior skill, foresight and industry... The successful competitor, having been urged to compete, must not be turned upon when he wins.

## (E) **Empirical evidence**

A separate issue is whether there is any empirical evidence to support, or indeed to contradict, the case for competition and, if so, what the evidence can tell us. It is notoriously difficult to measure such things as allocative efficiency or the extent to which innovation is attributable to the pressure of competition upon individual firms. Economists have often suggested that there is some direct causal relationship between industrial structure, the conduct of firms on the market and the quality of their economic performance<sup>62</sup>: this is often referred to as the 'structure-conduct-performance paradigm'. A monopolistic structure can be expected to lead to a restriction of output and a loss of economic efficiency: a natural consequence of this view would be that competition law should be watchful for any acts or omissions that could be harmful to the structure of the market, and in particular for conduct that could foreclose access to it and mergers that lead to fewer players. Others argue that this schematic presentation is too simplistic. In particular it is said to be unsound because it is uni-directional and fails to indicate the extent to

<sup>59</sup> See ch 19, 'Is there an inevitable tension between intellectual property rights and competition law?', pp 769–770.

<sup>60</sup> Innumerable speeches to this effect can be found: as examples see Kroes 'Competition Policy, growth and consumer purchasing power' 13 October 2008, available at [www.ec.europa.eu/competition/speeches/index\\_2008.html](http://www.ec.europa.eu/competition/speeches/index_2008.html); Fingleton 'Competition Policy in Troubled Times' 20 January 2009, available at [www.oft.gov.uk](http://www.oft.gov.uk).

<sup>61</sup> 148 F 2d 416 (2nd Cir 1945).

<sup>62</sup> This schematic model of industrial behaviour was first suggested by Mason 'Price and Production Policies of Large-Scale Enterprise' (1939) 29 Am Ec Rev Supplement 61–74; see *Scherer and Ross*, chs 3 and 4.

which performance itself can influence structure and conduct<sup>63</sup>. Good performance, for example, may in itself affect structure by attracting new entrants into an industry.

Other economists have attempted to measure the extent to which monopoly results in allocative inefficiency and leads to a deadweight loss to society<sup>64</sup>. There are of course formidable difficulties associated with this type of exercise, and many of the studies that have been published have been criticised for their methodology. Scherer and Ross devote a chapter of their book to this problem<sup>65</sup> and point out that there has been a dramatic expansion in the range and intensity of empirical research into industrial organisation in recent years. Their conclusion is that, despite the theoretical problems of such research, important relationships do exist between market structure and performance, and that the research should continue<sup>66</sup>. These issues are considered further in an Economic Discussion Paper, published by the OFT in June 2002, which contains literature reviews looking in turn at the deadweight welfare loss attributable to monopoly, at competition and efficiency and at price fixing and cartels<sup>67</sup>. More prosaically it might be added that, even if there are difficulties in measuring scientifically the harmful effects of monopoly in liberalised market economies, the economic performance of the Soviet Union and its neighbours in the second half of the twentieth century suggests that the effects of state planning and monopoly can be pernicious.

## (F) Workable competition

The discussion so far has presented a model of perfect competition, but has acknowledged that it is based upon a set of assumptions that are unlikely to be observed in practice; it has also been pointed out that there are some arguments that can be made against competition, although some of them are less convincing than others. If perfect competition is unattainable, the question arises whether there is an alternative economic model to which it would be reasonable to aspire. Some economists have been prepared to settle for a more prosaic theory of ‘workable competition’<sup>68</sup>. They recognise the limitations of the theory of perfect competition, but nonetheless consider that it is worthwhile seeking the best competitive arrangement that is practically attainable. Quite what workable competition should consist of has caused theoretical difficulties<sup>69</sup>; however a workably competitive structure might be expected to have a beneficial effect on conduct and performance, and therefore be worth striving for and maintaining.

<sup>69</sup> See Asch *Industrial Organization and Antitrust Policy* (Wiley, revised ed, 1983), pp 100–104.

### (G) Contestable markets

Some economists have advanced a theory of ‘contestable markets’ upon which competition law might be based<sup>70</sup>. According to this theory, firms will be forced to ensure an optimal allocation of resources provided that the market on which they operate is ‘contestable’, that is to say provided that it is possible for firms easily to enter the market without incurring sunk costs<sup>71</sup> and to leave it without loss. While this theory aims to have general applicability, it has been particularly significant in discussion of the deregulation of industries in the US. In a perfectly contestable market, entry into an industry is free and exit is costless. The emphasis on exit is important as firms should be able to leave an industry without incurring a loss if and when opportunities to profit within it disappear. A perfectly *contestable* market need not be perfectly *competitive*: perfect competition requires an infinite number of sellers on a market; in a perfectly contestable market an economically efficient outcome can be achieved even where there are only a few competitors, since there is always the possibility of ‘hit and run’ entry into the market. Even an industry in which only one or two firms are operating may be perfectly contestable where there are no impediments to entry or exit, so that intervention by the competition authorities is unnecessary. The theory shifts the focus of competition policy, as it is more sanguine about markets on which few firms operate than the ‘traditional’ model of perfect competition; having said this, it is questionable whether the theory of contestability really adds a great deal to traditional thinking on industrial economics or whether it simply involves a difference of emphasis.

As far as the specific issue of deregulation is concerned, the theory of contestability suggests, for example, that the existence within the air transport sector of only a few airlines need not have adverse economic effects provided that the conditions for entry and exit to and from the market are not disadvantageous. It is not clear how significant the theory of contestable markets is likely to be in the formulation of EU and UK competition policy, other than in the particular area of deregulation. In the UK Competition Commission’s investigation of *CHC Helicopter Corpn/Helicopter Services Group ASA*<sup>72</sup> the Commission cleared a merger that would create a duopoly in helicopter services where the market was found to be contestable. The European Commission was less impressed by contestable market theory in *Far East Trade Tariff Charges and Surcharges Agreement (FETTCSA)*<sup>73</sup>.

### (H) Effective competition

On some occasions, legal provisions and regulators use the expression ‘effective competition’. For example it is found in Article 2(3) of the European Union Merger Regulation (‘the EUMR’), as part of the test for determining when a merger is incompatible with the common market: ‘effective competition’ must not be significantly impeded. In the UK the Office of Telecommunications (now the Office of Communications) published a strategy statement in January 2000, one of the objectives of which would be to achieve ‘effective

<sup>70</sup> See Baumol, Panzar and Willig *Contestable Markets and the Theory of Industry Structure* (Harcourt Brace Jovanovich, revised ed, 1988); Bailey ‘Contestability and the Design of Regulatory and Antitrust Policy’ (1981) 71 *Am Ec Rev* 178–183.

<sup>71</sup> See ‘The model of perfect competition is based on assumptions unlikely to be observed in practice’, pp 7–8 above.

<sup>72</sup> Cm 4556 (2000); for comment see Oldale ‘Contestability: The Competition Commission Decision on North Sea Helicopter Services’ (2000) 21 *ECLR* 345.

<sup>73</sup> OJ [2000] L 268/1, [2000] 5 *CMLR* 1011, para 119.

competition in all main UK telecoms markets<sup>74</sup>, and the same expression can be found in recital 27 of the EU Framework Directive on electronic communications<sup>75</sup>. The UK Utilities Act 2000 provides that the Gas and Electricity Markets Authority should have, as one of its tasks, the promotion of effective competition in the gas and electricity sectors<sup>76</sup>. Case law of the EU Courts and Commission communications also use the term<sup>77</sup>. The idea of effective competition does not appear to be the product of any particular theory or model of competition – perfect, workable, contestable or any other. Indeed, given the number of theories and assumptions already discussed in this chapter, and the many others not discussed, the idea of effective competition, free from theoretical baggage, may have much to commend it. Effective competition does connote the idea, however, that firms should be subject to a reasonable degree of competitive constraint, from actual and potential competitors and from customers, and that the role of a competition authority is to see that such constraints are present on the market<sup>78</sup>.

### (I) Conclusion

What can perhaps be concluded at the end of this discussion is that, despite the range of different theories and the difficulties associated with them, competition does possess sufficient properties to lead to a strong policy choice in its favour. Competitive markets seem, on the whole, to deliver better outcomes than monopolistic ones, and there are demonstrable benefits for consumers<sup>79</sup>. The UK Government, in its White Paper *Productivity and Enterprise: A World Class Competition Regime*<sup>80</sup>, stated that:

Vigorous competition between firms is the lifeblood of strong and effective markets. Competition helps consumers get a good deal. It encourages firms to innovate by reducing slack, putting downward pressure on costs and providing incentives for the efficient organisation of production<sup>81</sup>.

This is why competition policy has been so widely embraced in recent years; there is probably a greater global consensus on the desirability of competition and free markets today than at any time in the history of human economic behaviour. In particular monopoly does seem to lead to a restriction in output and higher prices; there is a greater incentive to achieve productive efficiency in a competitive market; the suggestion that only monopolists can innovate is unsound; and competition provides the consumer with a greater degree of choice. Furthermore, in markets such as electronic communications, energy and transport competition has been introduced where once there was little, if any, and this seems to have produced significant benefits for consumers.

<sup>80</sup> Cm 5233 (2001).

<sup>81</sup> *Ibid*, para 1.1.

It may be helpful to summarise the benefits that are expected to be derived from effective competition:

- competition promotes allocative and productive efficiency
- competition leads to lower prices for consumers
- competition means that firms will be innovative in order to win business: innovation and dynamic efficiency mean that there will be better products available on the market
- where there is effective competition, consumers have a choice as to the products that they buy.

## 4. The Function of Competition Law

### (A) Goals of competition law<sup>82</sup>

In recent years many competition authorities have stressed the central importance of consumer welfare when applying competition law<sup>83</sup>. A very clear statement to this effect can be found in a speech of the former European Commissioner for competition policy, Neelie Kroes, given in London in October 2005:

Consumer welfare is now well established as the standard the Commission applies when assessing mergers and infringements of the Treaty rules on cartels and monopolies. Our aim is simple: to protect competition in the market as a means of enhancing consumer welfare and ensuring an efficient allocation of resources<sup>84</sup>.

This does not mean that EU competition law is applicable only where a specific increase in prices to end consumers can be demonstrated. EU law has recognised from the early days that consumers can be indirectly harmed by action that harms the competitive structure of the market<sup>85</sup>, and it continues to do so today<sup>86</sup>: there is no inconsistency between these statements and the proposition that EU competition law is oriented around the promotion of consumer welfare<sup>87</sup>.

However it would be reasonable to point out that, although the consumer welfare standard is currently in the ascendancy, many different policy objectives have been pursued in the name of competition law over the years; some of these were not rooted in notions of consumer welfare in the technical sense at all, and some were plainly inimical to the pursuit of allocative and productive efficiency. The result has sometimes been inconsistency and contradiction, but it is as well for the reader to be aware of this before coming to the law itself. Historically there has not been one single, unifying, policy that bound the

<sup>84</sup> SPEECH/05/512 of 15 September 2005, available at [www.ec.europa.eu/competition](http://www.ec.europa.eu/competition).

<sup>85</sup> See eg Case 6/72 *Europemballage and Continental Can v Commission* [1973] ECR 215, [1973] CMLR 199, paras 20–26.

<sup>86</sup> See eg Cases C-501/06 P etc *GlaxoSmithKline Services Unlimited v Commission* [2009] ECR I-9291, [2010] 4 CMLR 50, para 63; Case C-8/08 *T-Mobile Netherlands BV and others v Raad van bestuur van de Nederlandse Mededingingsautoriteit* [2009] ECR I-4529, [2009] 5 CMLR 1701, para 38.

<sup>87</sup> For arguments to the contrary see Andriychuk 'Rediscovering the Spirit of Competition: On the Normative Value of the Competition Process' (2010) 6(3) European Competition Journal 575.

development of EU and UK law together. In particular competition policy does not exist in a vacuum: it is an expression of the current values and aims of society and is as susceptible to change as political thinking generally. Because views and insights shift over a period of time, competition law is infused with tension. Different systems of competition law reflect different concerns, an important point when comparing the laws of the US, the EU and the UK<sup>88</sup>. As already noted, competition law has now been adopted in more than 100 countries, whose economies and economic development may be very different from one another. It is impossible to suppose that each system will have identical concerns<sup>89</sup>. The debate at the time of the negotiation of the Lisbon Treaty of 2007 demonstrated that some Member States are less enthusiastic about the process of competition than others<sup>90</sup>.

### (i) Consumer protection

Several different objectives other than the maximisation of consumer welfare in the technical sense can be ascribed to competition law. The first is that its essential purpose should be to protect the interests of consumers, not by protecting the competitive process itself, but by taking direct action against offending undertakings, for example by requiring dominant firms to reduce their prices. It is of course correct in principle that competition law should be regarded as having a ‘consumer protection’ function: ultimately the process of competition itself is intended to deliver benefits to consumers. However the possibility exists that competition law might be invoked in a more ‘populist’ manner; this appeared to happen in the UK in 1998 and 1999, at a time when the Government wished to be seen to be doing something about so-called ‘rip-off Britain’, where Ministers suggested that excessive prices were being charged by both monopolists and non-monopolists<sup>91</sup>. A problem with using competition law to assume direct control over prices, however, is that competition authorities are ill-placed to determine what price a competitive market would set for particular goods or services, and indeed by fixing a price they may further distort the competitive fabric of the market. The UK Competition Commission declined to recommend price control following its report in 2000 on *Supermarkets*<sup>92</sup> where it found that, in general, the market was working well for consumers and that such intervention would be disproportionate and unduly regulatory. Populist measures taken to have electoral appeal may ultimately be more harmful than the high prices themselves.

Similarly the consumer may be harmed – or at least consider himself to be harmed – where a producer insists that all his goods should be sold by dealers at maintained prices, or that dealers should provide a combined package of goods plus after-sales service. Here the consumer’s choice is restricted by the producer’s decision. Competition law may proscribe resale price maintenance or tie-in sales for this reason, although there are those who argue that this intervention is undesirable: the producer is restricting intra-brand competition, but inter-brand competition may be enhanced as a result<sup>93</sup>. The obsession with protecting the consumer can also be considered short-sighted since, in the longer run, the producer

<sup>88</sup> On the differences between the policies of competition law in the US and the EU see eg Jebsen and Stevens ‘Assumptions, Goals and Dominant Undertakings; the Regulation of Competition under Article 86 of the European Union’ (1996) 64 *Antitrust Law Journal* 443.

<sup>89</sup> See Fox ‘The Kaleidoscope of Antitrust and its Significance in the World Economy: Respecting Differences’ [2001] *Fordham Corporate Law Institute* (ed Hawk), 597.

<sup>90</sup> See ch 2, ‘The competition chapter in the TFEU’, pp 50–51.

<sup>91</sup> See ch 18, pp 725–728 on the control of exploitative pricing practices under UK law.

<sup>92</sup> Cm 4842 (2000); see similarly paras 2.11–2.18 of the CC’s Report on *Groceries*, 30 April 2008, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>93</sup> See in particular ch 16 on vertical agreements.

might choose to abandon the market altogether rather than comply with an unreasonable competition law; short-term benefits will then be outweighed by long-term harm to consumer welfare<sup>94</sup>.

### (ii) Redistribution

A second possible objective of competition law might be the dispersal of economic power and the redistribution of wealth: the promotion of economic equity rather than economic efficiency<sup>95</sup>. Aggregations of resources in the hands of monopolists, multinational corporations or conglomerates could be considered a threat to the very notion of democracy, individual freedom of choice and economic opportunity. This argument was influential in the US for many years at a time when there was a fundamental mistrust of big business. President Roosevelt warned Congress in 1938 that:

The liberty of a democracy is not safe if the people tolerate the growth of a private power to a point where it becomes stronger than the democratic state itself... Among us today a concentration of private power without equal in history is growing<sup>96</sup>.

It was under the US antitrust laws that the world's largest corporation at the time, AT&T, was dismembered. Some critics of the action brought by the Department of Justice against Microsoft were concerned that it amounted to an attack on a spectacularly successful business<sup>97</sup>, while others welcomed the attempt to restrain its undoubted economic muscle<sup>98</sup>.

### (iii) Protecting competitors

Linked to the argument that competition law should be concerned with redistribution is the view that competition law should be applied in such a way as to protect small firms against more powerful rivals: the competition authorities should hold the ring and ensure that the 'small guy' is given a fair chance to succeed. To put the point another way, there are some who consider that competition law should be concerned with competitors as well as the process of competition. This idea has at times had a strong appeal in the US, in particular during the period when Chief Justice Warren led the Supreme Court. However it has to be appreciated that the arrest of the Darwinian struggle, in which the most efficient succeed and the weak disappear, for the purpose of protecting small business can run directly counter to the idea of consumer welfare in the technical economic sense. It may be that competition law is used to preserve the inefficient and to stunt the performance of the efficient. In the US the 'Chicago School' of economists has been particularly scathing of the 'uncritical sentimentality' in favour of the small competitor, and in the 1980s, in particular, US law developed in a noticeably less sentimental way<sup>99</sup>. To the Chicago School, the essential question in an antitrust case should be whether the conduct

<sup>94</sup> This is one of Bork's most pressing arguments in *The Antitrust Paradox* (The Free Press, 1993).

<sup>95</sup> See Odudu 'The Distributional Consequences of Antitrust' in Marsden (ed) *Handbook of Research in Trans-Atlantic Antitrust* (Edward Elgar, 2007) ch 23.

<sup>96</sup> 83 Cong Rec 5992 (1938).

<sup>97</sup> For a highly critical view of the Microsoft case generally see McKenzie *Antitrust on Trial: How the Microsoft Case Is Reframing the Rules of Competition* (Perseus Publishing, 2nd ed, 2001).

<sup>98</sup> See 'Now Bust Microsoft's Trust' *The Economist* 13 November 1999; 'Bill Rockefeller?' *The Economist* 29 April 2000.

<sup>99</sup> See Fox 'The New American Competition Policy – from Anti-Trust to Pro-Efficiency' (1981) 2 ECLR 439 where the author traces the change in the policy of the Supreme Court from judgments such as *Brown Shoe Co v US* 370 US 294 (1962) to the position in *Continental TV Inc v GTE Sylvania Inc* 433 US 36 (1977); Fox 'What's Harm to Competition? Exclusionary Practices and Anticompetitive Effect' (2002) 70 Antitrust

under investigation could lead to consumers paying higher prices, and whether those prices could be sustained against the forces of competition; antitrust intervention to protect competitors from their more efficient rivals is harmful to social and consumer welfare. Even firms with high market shares are subject to competitive constraints provided that barriers to entry and exit are low, so that intervention on the part of the competition authority is usually uncalled for.

There seems little doubt that EU competition law has, in some cases, been applied with competitors in mind: this is particularly noticeable in some decisions under Article 102, and some commentators have traced this phenomenon back to the influence of the so-called 'Freiburg School' of ordoliberalism<sup>100</sup>. Scholars of the Freiburg School, which originated in Germany in the 1930s, saw the free market as a necessary ingredient in a liberal economy, but not as sufficient in itself. The problems of Weimar and Nazi Germany were attributable in part to the inability of the legal system to control and, if necessary, to disperse private economic power. An economic constitution was necessary to constrain the economic power of firms, but without giving Government unrestrained control over their behaviour: public power could be just as pernicious as private. Legal rules could be put in place which would achieve both of these aims. It is not surprising that the beneficiaries of such thinking would be small and medium-sized firms, the very opposite of the monopolists and cartels feared by the members of the Freiburg School. There is no doubt that ordoliberal thinking had a direct influence on the leading figures involved in the establishment of the three European Communities in the 1950s<sup>101</sup>. This may have led to decisions and judgments in which the law was applied to protect competitors rather than the process of competition, although it may be that the role of ordoliberalism in competition law cases has been exaggerated: some commentators assert that economic efficiency was a key goal of competition policy from the outset<sup>102</sup>. However, without questioning the appropriateness of decisions taken in the early years of the EU, it can be questioned whether it is appropriate in the new millennium to maintain this approach: there is much to be said for applying competition rules to achieve economic efficiency rather than economic equity. The two ideas sit awkwardly together: indeed they may flatly contradict one another, since an efficient undertaking will inevitably be able to defeat less efficient competitors, whose position in the market ought not to be underwritten by a competition authority on the basis of political preference or, as Bork might say, sentimentality. This is an issue that will be considered further in later chapters, and in particular in chapters 5, 17, and 18 on abusive practices on the part of dominant firms where, in particular, we will see that the European Commission is clear that Article 102 is an instrument for the protection of competition and not of competitors as such.

#### (iv) Other issues

In some cases, particularly involving mergers, the relevant authorities might find that other issues require attention: whether they can be taken into account will depend on the applicable law<sup>103</sup>. For example, unemployment and regional policy are issues which arise in the analysis of mergers and cooperation agreements; the ability of competition to dampen price-inflation may be considered to be important; merger controls may be used to prevent foreign takeovers of domestic companies; the UK Government permitted a merger between LloydsTSB and HBOS which might otherwise have been prohibited or subject to modification because of the economic crisis in the banking sector in the late 2000s<sup>104</sup>; and South African law specifically provides that in certain circumstances the position of historically disadvantaged people – that is to say the victims of apartheid – should be taken into account<sup>105</sup>.

#### (v) The single market imperative

Lastly it is important to understand that competition policy in the context of the EU fulfils an additional but quite different function from those just described (although EU law may be applied with them in mind as well). This is that competition law plays a hugely important part in the overriding goal of achieving single market integration<sup>106</sup>. The very idea of the single market is that internal barriers to trade within the EU should be dismantled and that goods, services, workers and capital should have complete freedom of movement. Firms should be able to outgrow their national markets and operate on a more efficient, transnational, scale throughout the EU. This remains as important in 2011 as it ever was<sup>107</sup>. Competition law has both a negative and a positive role to play in the integration of the single market. The negative one is that it can prevent measures which attempt to maintain the isolation of one domestic market from another: for example national cartels, export bans and market-sharing will be seriously punished<sup>108</sup>. For example a fine of €149 million was imposed on Nintendo for taking action to prevent exports of game consoles and related products from the UK to the Netherlands and Germany<sup>109</sup>.

The positive role is that competition law can be moulded in such a way as to encourage trade between Member States, partly by ‘levelling the playing fields of Europe’ as one contemporary catchphrase puts it, and partly by facilitating cross-border transactions and integration. Horizontal collaboration between firms in different Member States may be permitted in some circumstances<sup>110</sup>; and a producer in one Member State can be permitted to appoint an exclusive distributor in another and so penetrate a market which

<sup>108</sup> See ch 7, ‘Chapter VI: penalties’, pp 275–282 on the powers of the European Commission to impose fines for infringements of Articles 101 and 102.

<sup>109</sup> OJ [2003] L 255/33, [2004] 4 CMLR 421; on appeal to the General Court the fine imposed on Nintendo was reduced to €119 million: Case T-13/03 *Nintendo v Commission* [2009] ECR II-975, [2009] 5 CMLR 1421; for further discussion of the single market imperative see ch 2, ‘Single market imperative’, p 51.

<sup>110</sup> See generally ch 15.

individually he could not have done<sup>111</sup>. Unification of the single market is an obsession of the EU authorities; this has meant that decisions have sometimes been taken prohibiting behaviour which a competition authority elsewhere, unconcerned with single market considerations, would not have reached. Faced with a conflict between the narrow interests of a particular firm and the broader problem of integrating the market, the tendency has been to subordinate the former to the latter.

### (B) Who decides?

A further issue that should be mentioned is that competition law may not be so much about any particular policy – for example the promotion of consumer welfare or protection of the weak – but about who actually should make decisions about the way in which business should be conducted. The great ideological debate of the twentieth century was between capitalism and communism: whether to have a market or not. For the most part that debate has been concluded in favour of the market mechanism. But competition law and policy by their very nature envisage that there may be situations in which some control of economic behaviour in the marketplace may be necessary in order to achieve a desirable outcome. To some the market, and the vast rewards it brings to successful operators, remains an object of suspicion; to others, the spectre of the state as regulator is more alarming. These matters have been eloquently discussed by Amato<sup>112</sup>:

It is a fact that within liberal society itself one of the key divisions of political identity (and hence identification) is between these two sides: the side that fears private power more, and in order to fight it is ready to give more room to the power of government; and the side that fears the expansion of government more, and is therefore more prepared to tolerate private power.

In Europe there seems little doubt that, notwithstanding the demonopolisation and liberalisation of economic behaviour and the promotion of free enterprise that occurred in the late twentieth century, there remains a scepticism about the market, and that this results in ‘active’ enforcement of the competition rules by the European Commission and by the national competition authorities<sup>113</sup>.

This in turn raises an additional, complex, issue: if there are to be competition authorities to decide on what is and what is not acceptable business behaviour, what type of institution should be asked to make these decisions (a court, a commission, an individual?); how should individuals be appointed to those institutions (by ministerial appointment, by election, by open competition?); and how should those institutions themselves be controlled (by judicial review, or by an appellate court?). Here we leave law and economics and move into the world of political science which, though fascinating, is beyond the scope of this book<sup>114</sup>.

### (C) Competition advocacy and public restrictions of competition

A final point about the function of competition law is that competition authorities can usefully be given a different task, which is to scrutinise legislation that will bring about, or is responsible for, a distortion of competition in the economy. The reality is that states and international regulatory authorities are capable of harming the competitive process at least as seriously as private economic operators on the market itself, for example by granting legal monopolies to undertakings, by limiting in other ways the number of competitors in the market, or by establishing unduly restrictive rules and regulations. Some competition authorities are specifically mandated to scrutinise legislation that will distort competition<sup>115</sup>. Some developing countries might more usefully deploy their resources on this issue rather than adopting their own competition rules<sup>116</sup>. In the UK the OFT, acting under section 7 of the Enterprise Act 2002, can bring to the attention of Ministers laws or proposed laws that could be harmful to competition<sup>117</sup>. The International Competition Network (an association of various national competition authorities), through the work originally of its competition advocacy working group and now of its competition policy implementation group, is seeking to develop best practices in promoting competition law and policy<sup>118</sup>.

## 5. Market Definition and Market Power

This section will discuss the issues of market definition and market power. As has been noted above competition law is concerned, above all, with the problems that occur where one or more firms possess, or will possess after a merger, market power. Market power presents undertakings with the possibility of profitably raising prices over a period of time; the expression ‘raising price’ here includes, and is a shorthand for, other ways in which competition can be restricted, for example by limiting output, suppressing innovation, reducing the variety or quality of goods or services or by depriving consumers of choice, all of which are clearly inimical to consumer welfare<sup>119</sup>. In a perfectly competitive market no firm has market power; in a pure monopoly one firm has absolute control over it. There is a continuum between these two extremes, and many degrees of market power lie along it. Competition law attaches particular significance to ‘substantial market power’, often equated with ‘a dominant position’, since the prohibition of certain unilateral practices, for example in Article 102 TFEU and the Chapter II prohibition of the Competition Act 1998 in the UK, applies only where an undertaking or undertakings have this amount of market power. The International Competition Network Working

<sup>115</sup> See e.g. s 21(1)(k) of the South African Competition Act 1998, which requires the Competition Commission to ‘review legislation and public regulations and report to the Minister concerning any provision that permits uncompetitive behaviour’; and s 49(1) of the Indian Competition Act 2002 which provides that the Competition Commission of India can review legislation, but only if a reference is made to it by either the Central or the State governments.

<sup>117</sup> See ch 2, ‘Functions of the OFT’, pp 65–66.

<sup>118</sup> See [www.internationalcompetitionnetwork.org/working-groups/current/advocacy.aspx](http://www.internationalcompetitionnetwork.org/working-groups/current/advocacy.aspx); see also Emberger ‘How to strengthen competition advocacy through competition screening’ (2006) (Spring) *Competition Policy Newsletter* 28.

<sup>119</sup> See Landes and Posner ‘Market power in antitrust cases’ (1981) 94 *Harvard Law Review* 937; Vickers ‘Market power in competition cases’ (2006) 2 *European Competition Journal* 3.

Group on Unilateral Behaviour has produced ‘Recommended Practices’ for the assessment of dominance/substantial market power in the context of unilateral conduct laws. They contain ten recommendations for competition authorities when applying their domestic law in this difficult area<sup>120</sup>. In particular they stress that determinations of substantial market power should not be based on market shares alone; rather a comprehensive analysis should be undertaken of all factors affecting competitive conditions in the market under investigation.

There are numerous ways in which this key concern – the exercise of market power – is manifested, by implication if not expressly, in EU and UK competition law. A variety of legal tests and expressions will be found, but in essence they all express a concern about the misuse of market power:

- there are rules that firms should not enter into agreements to restrict competition (Article 101 TFEU; Chapter I prohibition, Competition Act 1998): however any such restriction must be appreciable, and there are various ‘*de minimis*’ exceptions where the parties lack market power<sup>121</sup>
- block exemption is not available to parties to agreements where the parties’ market share exceeds a certain threshold<sup>122</sup>
- firms should not abuse a dominant position (Article 102 TFEU; Chapter II prohibition, Competition Act 1998)
- concentrations can be prohibited under the EUMR that would significantly impede effective competition, in particular by creating or strengthening a dominant position
- mergers can be prohibited under UK law that would substantially lessen competition (Part 3 of the Enterprise Act 2002)
- ‘market investigations’ can be conducted by the Competition Commission where features of a market could have an adverse effect on competition (Part 4 of the Enterprise Act)
- other variants can be found: for example in the electronic communications sector regulatory obligations can be imposed upon firms that have ‘significant market power’, which has the same meaning for this purpose as ‘dominance’ under Article 102 TFEU<sup>123</sup>.

Each of these provisions reflects a concern about the abuse or potential abuse of market power. Throughout this book and throughout competition law and practice generally, therefore, two key issues recur: first, the definition of the relevant product and geographic (and sometimes the temporal) markets in relation to which market power may be found to exist; secondly, and more importantly, the identification of market power itself.

## (A) Market definition

Pure monopoly is rare, but a firm or firms collectively may have sufficient power over the market to enjoy some of the benefits available to the true monopolist. If the notion of ‘power over the market’ is key to analysing competition issues, it becomes immediately obvious that it is necessary to understand what is meant by ‘the market’ or, as will be explained below, the ‘relevant market’ for this purpose. The concept is an economic one, and in many cases it may be necessary for lawyers to engage the services of economists to assist in the proper delineation of the market, as highly sophisticated economic and econometric analysis is sometimes called for.

In the last 20 years the ‘science’ of market definition has evolved considerably. There are numerous sources of information on how to define markets. A useful document is the International Competition Network’s *Recommended Practices for Merger Analysis*, Part II of which contains useful discussion of market definition issues<sup>124</sup>. One particular comment in the *Recommended Practices* is worth stressing: that the boundaries of relevant markets may not be precise. Some products may be ‘in the market’ while others may be ‘out of the market’; however products that lie outside the market can still provide a competitive constraint, and should not be excluded from competition analysis simply because of the market definition.

Of particular importance in the EU is the European Commission’s *Notice on the Definition of the Relevant Market for the Purposes of [EU] Competition Law*<sup>125</sup> which adopts the so-called ‘hypothetical monopolist’ test (also known as the ‘SSNIP test’) for defining markets. This *Notice* provides a conceptual framework within which to think of market definition, and then explains some of the techniques that may be deployed when defining markets. The Commission’s *Notice* adopts the approach taken by the antitrust authorities in the US in the analysis of horizontal mergers<sup>126</sup>; the OFT in the UK has adopted a guideline which adopts a similar approach to that of the Commission<sup>127</sup>. Other competition authorities also apply the hypothetical monopolist test<sup>128</sup>.

Paragraph 2 of the Commission’s *Notice* explains why market definition is important:

Market definition is a tool to identify and define the boundaries of competition between firms. It serves to establish the framework within which competition policy is applied by the Commission. The main purpose of market definition is to identify in a systematic way the competitive constraints that the undertakings involved face. The objective of defining a market in both its product and geographic dimension is to identify those actual competitors of the undertakings involved that are capable of constraining those undertakings’ behaviour and of preventing them from behaving independently of effective competitive pressure.

<sup>124</sup> Available at [www.internationalcompetitionnetwork.org](http://www.internationalcompetitionnetwork.org).

<sup>125</sup> OJ [1997] C 372/5; more specific guidance on market definition can be found in the Commission’s *Guidelines on the application of Article [101 TFEU] to technology transfer agreements* OJ [2004] C 101/2, paras 19–25; *Guidelines on Vertical Restraints* OJ [2010] C 130/1, paras 86–95 and *Guidelines on the applicability of Article 101 of the Treaty on the Functioning of the European Union to horizontal co-operation agreements* OJ [2011] C 11/1, paras 112–126, 155–156, 197–199, 229 and 261–262.

<sup>126</sup> See ‘Demand-side substitutability’, pp 31–32 below.

<sup>127</sup> *Market Definition*, OFT 403, December 2004, available at [www.oft.gov.uk](http://www.oft.gov.uk).

<sup>128</sup> See eg the *Merger Guidelines* of the Australian Competition and Consumer Commission, available at [www.accc.gov.au](http://www.accc.gov.au); the *Mergers and Acquisitions Guidelines* of the New Zealand Commerce Commission, available at [www.comcom.govt.nz](http://www.comcom.govt.nz); and the *Merger Enforcement Guidelines* of the Canadian Competition Bureau, available at [www.competitionbureau.gc.ca](http://www.competitionbureau.gc.ca).

This paragraph contains a number of important points. First, market definition is not an end in itself<sup>129</sup>. Rather it is an analytical tool that assists in determining the competitive constraints upon undertakings: market definition provides a framework within which to assess the critical question of whether a firm or firms possess market power. Secondly, both the product and geographic dimensions of markets must be analysed. Thirdly, market definition enables the competitive constraints only from *actual* competitors to be identified: it tells us nothing about *potential* competitors. However, as paragraph 13 of the *Notice* points out, there are three main sources of competitive constraint upon undertakings: demand substitutability, supply substitutability and potential competition. As will be explained below, demand substitutability is the essence of market definition. In some, albeit fairly narrow, circumstances supply substitutability may also be part of the market definition; however normally supply substitutability lies outside market definition and is an issue of potential competition. It is also necessary, when assessing a supplier's market power, to take into account any countervailing power on the buyer's side of the market. It is very important to understand that factors such as potential entry and buyer power are relevant, since this means that a particular share of a market cannot, in itself, indicate that a firm has market power; an undertaking with 100 per cent of the widget market would not have market power if there are numerous potential competitors and no barriers to entry into the market. Lawyers must not be seduced by numbers when determining whether a firm has market power; market shares, of course, are helpful; indeed there are circumstances in which they are very important: a share of 50 per cent or more of a market creates a rebuttable presumption of dominance in a case under Article 102<sup>130</sup>, and a market share of 30 per cent or more will prevent the application of the block exemption in Regulation 330/2010 on vertical agreements<sup>131</sup>. However, calculating an undertaking's market share is only one step in determining whether it has market power.

## (B) Circumstances in which it is necessary to define the relevant market

The foregoing discussion may be rendered less abstract by considering the circumstances in EU and UK competition law in which it may be necessary to define the relevant market.

### (i) EU competition law

- under Article 101(1), when considering whether an agreement has the effect of restricting competition<sup>132</sup>
- under Article 101(1), when considering whether an agreement *appreciably* restricts competition. In particular there are market share tests in the *Notice on Agreements of Minor Importance*: a horizontal agreement, that is one between competitors, will usually be *de minimis* where the parties' market share is 10 per cent or less; and an agreement between non-competitors that operate at different levels of the market will usually be *de minimis* where their market share is 15 per cent or less<sup>133</sup>

<sup>129</sup> For an interesting discussion of the limits of market definition see Carlton 'Market Definition: Use and Abuse' (2007) 3(1) Competition Policy International 3.

<sup>130</sup> See ch 5, 'The AKZO presumption of dominance where an undertaking has a market share of 50 per cent or more', pp 182–183.

<sup>131</sup> See ch 16, 'Article 3: the market share cap', pp 660–662.

<sup>132</sup> See eg Case C-234/89 *Delimitis v Henninger Bräu* [1991] ECR I-935, [1992] 5 CMLR 210; para 27 of the Commission's *Guidelines on the application of Article [101(3)]* OJ [2004] C 101/97.

<sup>133</sup> OJ [2001] C 368/13, para 7.

- under the Commission's guidelines on the application of Article 101(1) to horizontal cooperation agreements, where various market share thresholds will be found<sup>134</sup>
- under Article 101(1), when considering whether an agreement has an *appreciable* effect on trade between Member States<sup>135</sup>
- under Article 101(3)(b), when considering whether an agreement would substantially eliminate competition<sup>136</sup>
- under numerous block exemptions containing market share tests, for example Regulation 330/2010 on vertical agreements<sup>137</sup>, Regulation 1217/2010 on research and development agreements<sup>138</sup> and Regulation 1218/2010 on specialisation agreements<sup>139</sup>
- under Article 102, when considering whether an undertaking has a dominant position<sup>140</sup>
- under the EUMR when determining whether a merger would significantly impede effective competition, in particular by creating or strengthening a dominant position<sup>141</sup>.

## (ii) UK law

- when applying the Chapter I and Chapter II prohibitions of the Competition Act 1998, which are based on the provisions in Articles 101 and 102<sup>142</sup>
- when determining the level of a penalty under the Competition Act 1998<sup>143</sup>
- when scrutinising mergers under Part 3 of the Enterprise Act 2002<sup>144</sup>
- when conducting 'market investigations' under Part 4 of the Enterprise Act 2002<sup>145</sup>.

Market definition, therefore, plays an important part in much competition law analysis. The table at the end of this chapter captures some of the important market share thresholds that may be relevant in competition law cases.

## (C) The relevant product market

The Court of Justice, when it heard its first appeal on the application of Article 102 in *Europemballage Corp'n and Continental Can Co Inc v Commission*<sup>146</sup>, held that when identifying a dominant position the delimitation of the relevant product market was of crucial importance. This has been repeated by the Court of Justice on numerous occasions<sup>147</sup>. In *Continental Can Co Inc*<sup>148</sup> it was the Commission's failure to define the relevant product market that caused the Court of Justice to quash its decision. The Commission had held that Continental Can and its subsidiary SLW had a dominant position in three different product markets – cans for meat, cans for fish and metal tops – without giving a

<sup>134</sup> See ch 15, 'Purchasing Agreements', p 604.

<sup>135</sup> OJ [2004] C 101/97, para 55.

<sup>136</sup> See ch 4, 'Fourth condition of Article 101(3): no elimination of competition in a substantial part of the market', pp 164–165.

<sup>137</sup> See ch 16, 'Article 3: the market share cap', pp 660–662.

<sup>138</sup> See ch 15, 'Article 4: duration of exemption and the market share threshold and duration of exemption', p 597.

<sup>139</sup> See ch 15, 'Article 3: the market share threshold', p 602.

<sup>140</sup> See ch 5, 'Dominant position', pp 179–189.

<sup>142</sup> See ch 9, generally.

<sup>141</sup> See ch 21, 'Market definition', pp 862–863.

<sup>143</sup> *Guidance as to the Appropriate Amount of a Penalty*, OFT 423, para 2.3.

<sup>144</sup> See ch 22, 'Market definition', p 934.

<sup>145</sup> See ch 11, 'The Market Investigation Provisions on Practice', p 479.

<sup>146</sup> Case 6/72 [1973] ECR 215, [1973] CMLR 199, para 32.

<sup>147</sup> See eg Case 27/76 *United Brands v Commission* [1978] ECR 207, [1978] 1 CMLR 429, para 10.

<sup>148</sup> JO [1972] L 7/25, [1972] CMLR D11.

satisfactory explanation of why these markets were separate from one another or from the market for cans and containers generally. The Court of Justice in effect insisted that the Commission should define the relevant product market and support its definition in a reasoned decision.

### (i) The legal test

The judgments of the Court of Justice show that the definition of the market is essentially a matter of interchangeability. Where goods or services can be regarded as interchangeable, they are within the same product market. In *Continental Can* the Court of Justice enjoined the Commission, for the purpose of delimiting the market, to investigate:

[those] characteristics of the products in question by virtue of which they are particularly apt to satisfy an inelastic need and are only to a limited extent interchangeable with other products<sup>149</sup>.

Similarly in *United Brands v Commission*, where the applicant was arguing that bananas were in the same market as other fresh fruit, the Court of Justice said that this depended on whether the banana could be:

singled out by such special features distinguishing it from other fruits that it is only to a limited extent interchangeable with them and is only exposed to their competition in a way that is hardly perceptible<sup>150</sup>.

### (ii) Measuring interchangeability

Conceptually, the idea that a relevant market consists of goods or services that are interchangeable with one another is simple enough. In practice, however, the measurement of interchangeability can give rise to considerable problems for a variety of reasons: for example there may be no data available on the issue, or the data that exist may be unreliable, incomplete or deficient in some other way. A further problem is that, in many cases, the data will be open to (at least) two interpretations. It is often the case therefore that market definition is extremely difficult; this is why the EU Courts have conducted a fairly 'light touch' review of the Commission's conclusions on market definition, recognising that this involves a 'complex economic assessment'<sup>151</sup>.

### (iii) Commission Notice on the Definition of the Relevant Market for the Purposes of [EU] Competition Law<sup>152</sup>

Useful guidance on market definition is provided by the Commission's *Notice*; the *Notice* has received the approval of the EU Courts<sup>153</sup>. The introduction of the EUMR in 1990 had, as an inevitable consequence, that the Commission was called upon to define markets in a far larger number of situations than previously. Whereas it may have had to deal with complaints under Article 102, say, 20 times a year in the 1980s, by the 1990s it was having to deal with 100 or more notifications under the EUMR each year, and it now receives at

<sup>149</sup> Case 6/72 [1973] ECR 215, [1973] CMLR 199, para 32; for a definition of inelastic demand see ch 1, n 24 above.

<sup>150</sup> Case 27/76 [1978] ECR 207, [1978] 1 CMLR 429, para 22.

<sup>151</sup> See eg Case T-201/04 *Microsoft Corp v Commission* [2007] ECR II-3601, [2006] 4 CMLR 311, para 482.

<sup>152</sup> OJ [1997] C 372/5.

<sup>153</sup> See eg Case T-321/05 *AstraZeneca v Commission* [2010] ECR II-000, [2010] 5 CMLR 1585, para 86; Case T-427/08 *Confédération européenne des associations d'horlogers-réparateurs (CEAHR) v Commission* [2010] ECR II-000, [2010] 5 CMLR 1585, paras 68–70.

least 250 notifications a year: indeed in 2007 the number reached 402<sup>154</sup>. Furthermore, an Article 102 case would normally require the definition of just one market – the one in which the dominant firm was alleged to have abused its position; or perhaps two, for example where the abuse produces effects in a neighbouring market<sup>155</sup>. However – a case under the EUMR might be quite different, since the merging parties might conduct business in a number of different markets giving rise to competition considerations<sup>156</sup>. This necessarily meant that the Commission was called upon to develop more systematic methods for defining the market.

#### (iv) Demand-side substitutability

As mentioned above, the Commission explains at paragraph 13 of the *Notice* that firms are subject to three main competitive constraints: demand substitutability, supply substitutability and potential competition. It continues that, for the purpose of market definition, it is demand substitutability that is of the greatest significance; supply substitutability may be relevant to market definition in certain special circumstances, but normally this is a matter to be examined when determining whether there is market power; potential competition in the market is always a matter of market power rather than market definition.

Paragraph 14 of the *Notice* states that the assessment of demand substitution entails a determination of the range of products which are viewed as substitutes by the consumer. It proposes a test whereby it becomes possible to determine whether particular products are within the same market. The SSNIP test, first deployed by the Department of Justice and the Federal Trade Commission under US competition law when analysing horizontal mergers<sup>157</sup>, works as follows: suppose that a producer of a product – for example a widget – were to introduce a Small but Significant Non-transitory Increase in Price. In those circumstances, would enough customers be inclined to switch their purchases to other makes of widgets, or indeed even to blodgets, to make the price rise unprofitable? If the answer is yes, this would suggest that the market is at least as wide as widgets generally and includes blodgets as well<sup>158</sup>. The same test can be applied to the delineation of the geographic market: if the price of widgets were to be raised in France by a small but significant amount, would customers switch to suppliers in Germany? If a firm could raise its price by a significant amount and retain its customers, this would mean that the market would be worth monopolising: prices could be raised profitably, since there would be no competitive constraint. For this reason, the SSNIP test is also – and more catchily – referred to sometimes as the ‘hypothetical monopolist test’. The hypothetical monopolist test is given formal expression in paragraph 17 of the Commission’s *Notice*, where it states that:

The question to be asked is whether the parties’ customers would switch to readily available substitutes or to suppliers located elsewhere in response to a hypothetical small (in the

<sup>156</sup> Case COMP/M 2547 *Bayer Crop Science/Aventis* concerned a merger in which there were no fewer than 130 affected markets.

<sup>157</sup> *Horizontal Merger Guidelines* (issued in 1992); the current Guidelines were issued in 2010, available at [www.justice.gov/atr/public/guidelines/hmg-2010.html](http://www.justice.gov/atr/public/guidelines/hmg-2010.html); see Shapiro ‘The Horizontal Merger Guidelines: From Hedgehog to Fox in Forty Years’ (2010) 77 *Antitrust LJ* 701.

<sup>158</sup> It should be noted in passing that the possibility exists that consumers might switch from widgets to blodgets, but not the other way: in other words a phenomenon exists of ‘one-way substitutability’: see Case T-340/03 *France Télécom v Commission* [2007] ECR II-107, [2007] 4 CMLR 919, paras 88–90.

range 5 per cent to 10 per cent) but permanent relative price increase in the products and areas being considered. If substitution were enough to make the price increase unprofitable because of the resulting loss of sales, additional substitutes and areas are included in the relevant market.

This formulation of the test takes the ‘range’ of 5 per cent to 10 per cent to indicate ‘significance’ within the SSNIP test<sup>159</sup>.

(v) **The ‘Cellophane Fallacy’**<sup>160</sup>

It is necessary to enter a word of caution on the hypothetical monopolist test when applied to abuse of dominance cases. A monopolist may already be charging a monopoly price: if it were to raise its price further, its customers may cease to buy from it at all. In this situation the monopolist’s ‘own-price elasticity’ – the extent to which consumers switch from its products in response to a price rise – is high. If a SSNIP test is applied in these circumstances between the monopolised product and another one, this might suggest a high degree of substitutability, since consumers are already at the point where they will cease to buy from the monopolist; the test therefore would exaggerate the breadth of the market by the inclusion of false substitutes. This error was committed by the US Supreme Court in *United States v EI du Pont de Nemour and Co*<sup>161</sup> in a case concerning packaging materials, including cellophane, since when it has been known as the ‘Cellophane Fallacy’.

In the US the SSNIP test was devised in the context of merger cases, and is usually applied only in relation to them. In the European Commission’s *Notice*, it states in the first paragraph that the test is to be used for cases under Articles 101, 102 and the EUMR; the Cellophane Fallacy is briefly acknowledged at paragraph 19 of the *Notice*, where it says that in cases under Article 102 ‘the fact that the prevailing price might already have been substantially increased will be taken into account’<sup>162</sup>. In DG COMP’s *Discussion Paper on the application of [Article 102 TFEU] to exclusionary abuses*<sup>163</sup> it acknowledged that the SSNIP test needs to be particularly carefully considered in Article 102 cases, and that it is necessary in such cases to rely on a variety of methods for checking the robustness of alternative market definitions<sup>164</sup>. The Commission’s *Guidance on the Commission’s Enforcement Priorities in Applying Article [102 TFEU] to Abusive Exclusionary Conduct by Dominant Undertakings*<sup>165</sup> is silent on the issue of the Cellophane Fallacy.

In the UK the OFT’s *Guideline on Market Definition* notes the problem of the Cellophane Fallacy, and states that the possibility that market conditions are distorted by the presence of market power will be accounted for ‘when all the evidence on market

<sup>159</sup> In the UK the Competition Commission and the OFT have said that they will usually postulate a price rise of 5 per cent when applying the hypothetical monopolist test in merger cases: see *Merger Assessment Guidelines* CC2 (Revised), OFT 1254, September 2010, para 5.2.12, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>160</sup> For discussion see Glick, Cameron and Mangum ‘Importing the Merger Guidelines Market Test in Section 2 Cases: Potential Benefits and Limitations’ (1997) 42 *Antitrust Bulletin* 121.

<sup>161</sup> 351 US 377 (1956).

<sup>162</sup> It is worth pointing out that the Cellophane Fallacy can also occur where a SSNIP is applied to an unreasonably low (for example a predatory) price: the SSNIP test requires the hypothetical price rise to be applied to the *competitive* price.

<sup>163</sup> December 2005, available at [www.ec.europa.eu/competition/antitrust/art82/discpaper2005.pdf](http://www.ec.europa.eu/competition/antitrust/art82/discpaper2005.pdf).

<sup>164</sup> *Ibid*, paras 13–19. <sup>165</sup> OJ [2009] C 45/7.

definition is weighed in the round<sup>166</sup>. The OFT's decisions in *Aberdeen Journals II*<sup>167</sup> and *BSkyB*<sup>168</sup> both acknowledged the problem of the Cellophane Fallacy in defining the relevant markets in circumstances where competition may already have been distorted: in each case the OFT concluded that it was necessary to find alternative ways of determining whether the firms under consideration had market power and/or were guilty of abuse. In *BSkyB* the OFT looked at the physical characteristics of premium sports pay-TV channels and consumers' underlying preferences and in *Aberdeen Journals II* it looked at the conduct and statements of the allegedly dominant firm. In the appeal against the latter decision the Competition Appeal Tribunal ('the CAT') specifically stated that, in a case concerning an alleged abuse of a dominant position, the market to be taken into consideration means the market that would exist in normal competitive conditions, disregarding any distortive effects that the conduct of the dominant firm has itself created<sup>169</sup>. The CAT rejected arguments that the Cellophane Fallacy had been perpetrated in both *National Grid plc v Gas and Electricity Markets Authority*<sup>170</sup> and *Barclays Bank v Competition Commission*<sup>171</sup>.

#### (vi) Supply-side substitutability

In most cases interchangeability will be determined by examining the market from the customer's perspective. However it is helpful in some situations to consider the degree of substitutability on the supply side of the market. Suppose that A is a producer of widgets and that B is a producer of blodgets: if it is a very simple matter for B to change its production process and to produce widgets, this might suggest that widgets and blodgets are part of the same market, even though consumers on the demand side of the market might not regard widgets and blodgets as substitutable. Dicta of the Court of Justice in *Continental Can v Commission*<sup>172</sup> indicate that the supply side of the market should be considered for the purpose of defining the market. Among its criticisms of the decision the Court of Justice said that the Commission should have made clear why it considered that producers of other types of containers would not be able to adapt their production to compete with Continental Can. The Commission has specifically addressed the issue of supply-side substitutability in subsequent decisions<sup>173</sup>. A good example is *Tetra Pak 1 (BTG Licence)*<sup>174</sup>, where it took into account the fact that producers of milk-packaging machines could not readily adapt their production to make aseptic packaging machines and cartons in arriving at its market definition.

In paragraphs 20 to 23 of the *Notice on Market Definition* the Commission explains the circumstances in which it considers that supply-side substitutability is relevant to market definition. At paragraph 20 the Commission says that where suppliers are able

<sup>171</sup> Case No 1109/6/8/09 [2009] CAT 27, [2009] CompAR 381, paras 53–55.

<sup>172</sup> Case 6/72 [1973] ECR 215, [1973] CMLR 199, paras 32ff.

<sup>173</sup> See eg *Eurofix-Bauco v Hilti* OJ [1988] L 65/19, [1989] 4 CMLR 677, para 55, upheld on appeal to the General Court Case T-30/89 *Hilti AG v Commission* [1991] ECR II-1439, [1992] 4 CMLR 16 and on appeal to the Court of Justice Case C-53/92 P [1994] ECR I-667, [1994] 4 CMLR 614.

<sup>174</sup> OJ [1988] L 272/27, [1988] 4 CMLR 47, upheld on appeal to the General Court Case T-51/89 *Tetra Pak Rausing SA v Commission* [1990] ECR II-309, [1991] 4 CMLR 334.

to switch production to other products and to market them ‘in the short term’ without incurring significant additional costs or risks in response to small and permanent changes in relative prices, then the market may be broadened to include the products that those suppliers are already producing. A footnote to paragraph 20 suggests that the short term means ‘such a period that does not entail a significant adjustment of existing tangible and intangible assets’. A practical example is given in paragraph 22 of an undertaking producing a particular grade of paper: if it could change easily to producing other grades of paper, they should all be included in the market definition. However, where supply substitution is more complex than this, it should be regarded as a matter of determining market power rather than establishing the market<sup>175</sup>.

While it may seem unimportant whether the issue of supply-side substitution is dealt with at the stage of market definition or of market power, where competition law deploys a market share test, as for example in Article 3 of Regulation 330/2010<sup>176</sup>, the possibility of broadening the market definition through the inclusion of supply-side substitutes may have a decisive effect on the outcome of a particular case.

#### (vii) Evidence relied on to define relevant markets

The SSNIP test establishes a conceptual framework within which markets should be defined. In practice, however, the critical issue is to know what evidence can be adduced to determine the scope of the relevant market. If the world were composed of an infinite number of market research organisations devoted to asking SSNIP-like questions of customers and consumers, market definition would be truly scientific. But of course the world is not so composed, and a variety of techniques, some of considerable sophistication, are deployed by economists and econometrists in order to seek solutions. The Commission’s *Notice*, from paragraph 25 onwards<sup>177</sup>, considers some of the evidence that may be available, but it quite correctly says that tests that may be suitable in one industry may be wholly inappropriate in another. A moment’s reflection shows that this must be so: for example, the demand-substitutability of one alcoholic beverage for another in the ordinary citizen’s mind is likely to be tested by different criteria than an airline choosing whether to purchase aeroplanes from Boeing or Airbus. In *Aberdeen Journals Ltd v OFT*<sup>178</sup> the CAT has said that there is no ‘hierarchy’ of evidence on issues such as market definition that would require, for example, objective economic evidence to be given greater weight than subjective evidence such as the statements or conduct of the parties<sup>179</sup>.

<sup>175</sup> Recommended Practice F of the ICN’s *Recommended Practices for Merger Analysis* recommends that supply-side substitution should be taken into account when firms could produce or sell in the relevant market ‘within a short time frame and without incurring significant sunk costs’; the *Recommended Practices* are available at [www.internationalcompetitionnetwork.org](http://www.internationalcompetitionnetwork.org).

<sup>176</sup> OJ [2010] L 102/1; on market definition under this block exemption see the Commission’s *Guidelines on Vertical Restraints* OJ [2010] C 130/1, Section V, paras 86–92.

<sup>177</sup> See also *Bishop and Walker*, chs 9–14 and 16, which considers techniques that may be relevant to market definition; also OFT Research Paper 17 (OFT 266) *Quantitative techniques in competition analysis* (LECG Ltd, October 1999): this can be obtained from the OFT’s website at [www.of.gov.uk](http://www.of.gov.uk).

<sup>178</sup> Case No 1009/1/1/02 [2003] CAT 11, [2003] CompAR 67.

<sup>179</sup> *Ibid*, para 127.

Both DG COMP<sup>180</sup> and the UK Competition Commission<sup>181</sup> have issued best practices on how economic evidence should be submitted.

**(viii) Examples of evidence that may be used in defining the relevant product market**

As far as definition of the product market is concerned the *Notice* suggests that the following evidence may be available.

**(A) Evidence of substitution in the recent past**

There may recently have been an event – such as a price increase or a ‘shock’, perhaps a failure of the Brazilian coffee crop due to a late frost – giving rise to direct evidence of the consequences that this had for consumers’ consumption (perhaps a large increase in the drinking of tea).

**(B) Quantitative tests**

Various econometric and statistical tests have been devised which attempt to estimate own-price elasticities and cross-price elasticities for the demand of a product, based on the similarity of price movements over time, the causality between price series and the similarity of price levels and/or their convergence. Own-price elasticities measure the extent to which demand for a product changes in response to a change in its price. Cross-price elasticities measure the extent to which demand for a product changes in response to a change in the price of some other product. Own-price elasticities provide more information about the market power that an undertaking possesses than cross-price elasticities; however cross-price elasticities help more with market definition, since they provide evidence on substitutability.

**(C) Views of customers and competitors**

The Commission will contact customers and competitors in a case that involves market definition and will, where appropriate, specifically ask them to answer the SSNIP question. This happens routinely, for example, when it seeks to delineate markets under the EUMR.

**(D) Marketing studies and consumer surveys**

The Commission will look at marketing studies as a useful provider of information about the market, although it specifically states in paragraph 41 of the *Notice* that it will scrutinise ‘with utmost care’ the methodology followed in consumer surveys carried out *ad hoc* by the undertakings involved in merger cases or cases under Articles 101 and 102. Its concern is that the selection of questions in the survey may be deliberately made in order to achieve a favourable outcome<sup>182</sup>.

<sup>180</sup> *Best Practices for the Submission of Economic Evidence and Data Collection in Cases Concerning the Application of Articles 101 and 102 TFEU and in Merger Cases* (2010), available at [www.ec.europa.eu/competition/antitrust/legislation/legislation.html](http://www.ec.europa.eu/competition/antitrust/legislation/legislation.html).

<sup>181</sup> *Suggested Best Practice for the Submission of Technical Economic Analysis from Parties to the Competition Commission*, available at [www.competition-commission.org.uk/rep\\_pub/corporate\\_documents/other\\_guidance\\_documents.htm](http://www.competition-commission.org.uk/rep_pub/corporate_documents/other_guidance_documents.htm).

<sup>182</sup> Note that in the UK the Competition Commission and OFT have jointly published guidance on *Good Practice in the Design and Presentation of Consumer Survey Evidence in Merger Inquiries* OFT 1230 and CC2com1, March 2011, available at [www.of.gov.uk](http://www.of.gov.uk).

**(E) Barriers and costs associated with switching demand to potential substitutes**

There may be a number of barriers and/or costs that result in two apparent demand substitutes not belonging to one single product market. The Commission deals with these in paragraph 42 of the *Notice*, and gives as examples regulatory barriers, other forms of state intervention, constraints occurring in downstream markets, the need to incur capital investment and other factors. The OFT has published an Economic Discussion Paper that specifically considers the issue of switching costs<sup>183</sup>.

**(F) Different categories of customers and price discrimination**

At paragraph 43 the Commission states that the extent of the product market might be narrowed where there exist distinct groups of customers for a particular product: the market for one group may be narrower than for the other, if it is possible to identify which group an individual belongs to at the moment of selling the relevant products and there is no possibility of trade between the two categories of customer<sup>184</sup>.

**(ix) A word of caution on the Notice**

It is important to point out a few words of caution about the *Notice on Market Definition*. The problem of the Cellophane Fallacy has already been mentioned<sup>185</sup>. There are three other points about the *Notice*.

First, it is 'only' a Commission Notice: it does not have the force of law, and ought not to be treated as a legislative instrument. However the EU Courts have referred to it on various occasions with apparent approval<sup>186</sup>.

A second point about the *Notice* is that, no matter how well it explains the SSNIP test and the evidence that may be used when applying it, the fact remains that in some sectors actual price data about substitutability may not be available: the information that can be captured varies hugely from one sector to another, and in some cases one will be thrown back on fairly subjective assessments of the market for want of hard, scientific evidence. In this situation it may be necessary to predict the likely effect of a SSNIP on customers by looking at various factors such as the physical characteristics of the products concerned or their intended use. In some cases it may not be possible to apply the SSNIP test at all. An example is the Commission's decision in *British Interactive Broadcasting*<sup>187</sup>: there the Commission stated that it could not delineate the markets for interactive broadcasting services by applying a SSNIP test since no data were available in relation to a product that had yet to be launched. In several broadcasting cases the fact that public-sector broadcasting is available 'free-to-air' to end users meant that a SSNIP test was inapplicable<sup>188</sup>. Clearly this is always likely to be a problem in relation to products introduced into the 'new' economy<sup>189</sup>.

A third point about the *Notice* is that there are by now very many cases – in particular under the EUMR – in which the Commission has been called upon to define the

<sup>183</sup> OFT Economic Discussion Paper 5 (OFT 655) *Switching Costs* (National Economic Research Associates, April 2003).

<sup>185</sup> See 'The "Cellophane Fallacy"', pp 32–31 above.

<sup>186</sup> See ch 1 n 153 above.

<sup>187</sup> OJ [1999] L 312/1, [2000] 4 CMLR 901.

<sup>188</sup> See eg Case M 553 *RTL/Veronica/Endemol* OJ [1996] L 134/32, upheld on appeal Case T-221/95 *Endemol Entertainment Holding BV v Commission* [1999] ECR II-1299, [1999] 5 CMLR 611.

<sup>189</sup> On the issue of market definition in cases involving e-commerce see OFT Economic Discussion Paper 1 (OFT 308) *E-commerce and its implications for competition policy* (Frontier Economics Group, August 2000), ch 4.

market. With more than 4,000 mergers having been notified to the Commission under the EUMR by the end of 2010, there are few sectors in which it has not been called upon to analyse relevant markets. As a consequence of this there is a very considerable ‘decisional practice’ of the Commission in which it has opined – from cars, buses and trucks to pharmaceuticals and agrochemicals, from banking and insurance services to international aviation and deep-sea drilling<sup>190</sup>. Not unnaturally, an undertaking in need of guidance on the Commission’s likely response to a matter of market definition will wish to find out what it has had to say in the past in actual decisions; however the caveat should be entered that the General Court has established that the market must always be defined in any particular case by reference to the facts prevailing at the time and not by reference to precedents<sup>191</sup>.

#### (x) Spare parts and the aftermarket<sup>192</sup>

There are numerous sectors in which a consumer of one product – for example a car – will need to purchase at a later date complementary products such as spare parts. The same can be true where a customer has to buy ‘consumables’, such as cartridges to be used in a laser printer, or maintenance services. In such cases one issue is to determine how the relevant product market should be defined. If there is a separate market for the complementary product, it may be that an undertaking that has no power over the ‘primary’ market may nevertheless be dominant in the ‘secondary’ one. An illustration is *Hugin v Commission*<sup>193</sup>, where the Court of Justice upheld the Commission’s finding that Hugin was dominant in the market for spare parts for its own cash machines. Liptons, a firm which serviced Hugin’s machines, could not use spare parts produced by anyone else for this purpose because Hugin would have been able to prevent this by relying on its rights under the UK Design Copyright Act 1968. Therefore, although for other purposes it might be true to say that there is a market for spare parts generally, in this case, given the use to which Liptons intended to put them, the market had to be more narrowly defined. Liptons was ‘locked in’, as it was dependent on Hugin, and this justified a narrow market definition. This case, and the judgments of the Court of Justice in *AB Volvo v Erik Veng*<sup>194</sup> and *CICRA v Régie Nationale des Usines Renault*<sup>195</sup>, establish that spare parts can form a market separate from the products for which they are needed.

<sup>190</sup> See ch 21, ‘Access to the Commission’s decisions’, pp 832–833 on how to access the Commission’s decisions under the EUMR.

<sup>191</sup> In Joined Cases T-125/97 etc *Coca-Cola v Commission* [2000] ECR II-1733, [2000] 5 CMLR 467, para 82, the General Court stated that in the course of any decision applying Article 102, ‘the Commission must define the relevant market again and make a fresh analysis of the conditions of competition which will not necessarily be based on the same considerations as those underlying the previous finding of a dominant position’: see similarly, in the UK, the CAT in Case No 1109/6/8/09 *Barclays Bank plc v Competition Commission* [2009] CAT 27, [2009] CompAR 381, para 36; examples of how market definitions can change over a period of time are afforded by cross-channel ferry services between the UK and continental Europe, where the Channel Tunnel has altered the market: see *The Peninsular and Oriental Steam Navigation Corpn and Stena Line AB* Cm 4030 (1998); and the market for betting shops in the UK: see *Ladbroke Group plc and The Coral Betting Business* Cm 4030 (1998); in the UK the OFT, pursuant to the *Coca-Cola* judgment, conducted a fresh market analysis in its *BSkyB* decision, 17 December 2002, paras 29ff, available at [www.of.gov.uk](http://www.of.gov.uk); see also *Market Definition*, OFT 403, December 2004, paras 5.7–5.9.

<sup>192</sup> See *Bishop and Walker*, paras 4.045–4.046 and 6.020–6.046; this issue often arises in cases concerning alleged ‘tie-in transactions’, as to which see ch 17, ‘Tying’, pp 688–696.

<sup>193</sup> Case 22/78 [1979] ECR 1869, [1979] 3 CMLR 345; the Commission’s decision was quashed in this case as it had failed to establish the necessary effect on inter-state trade.

<sup>194</sup> Case 238/87 [1988] ECR 6211, [1989] 4 CMLR 122.

<sup>195</sup> Case 53/87 [1988] ECR 6039, [1990] 4 CMLR 265.

Likewise consumables, such as nails for use with nail-guns<sup>196</sup> and cartons for use with filling-machines<sup>197</sup>, have been held to be a separate market from the product with which they are used.

However, as a matter of economics, it would be wrong to conclude that the primary and secondary markets are necessarily always discrete. It may be that a consumer, when deciding to purchase the primary product, will also take into account the price of the secondary products that will be needed in the future: this is sometimes referred to as ‘whole life costing’. Where this occurs high prices in the secondary market may act as a competitive constraint when the purchaser is making his initial decision as to which primary product to purchase. It is an empirical question whether there is a separate aftermarket. The Commission has stated that it regards the issue as one that needs to be examined on a case-by-case basis<sup>198</sup>, and that it will look at all important factors such as the price and life-time of the primary product, the transparency of the prices for the secondary product and the proportion of the price of the secondary product to the value of the primary one. In its investigation of *Kyocera/Pelikan*<sup>199</sup> the Commission concluded that Kyocera was not dominant in the market for toner cartridges for printers, since consumers took the price of cartridges into account when deciding which printer to buy. In the UK both the Office of Telecommunication (OFTEL, now the Office of Communications (OFCOM)) and the OFT have reached similar conclusions<sup>200</sup>, and the OFT’s guideline on *Market Definition* adopts the same approach<sup>201</sup>. However in *Confédération européenne des associations d’horlogers-réparateurs (CEAHR) v Commission*<sup>202</sup> the General Court disagreed with the Commission’s view that the repairing and maintenance of Swiss watches was part of the market generally for prestige and luxury watches<sup>203</sup>.

#### (xi) Procurement markets

In some cases the business behaviour under scrutiny is that of buyers rather than sellers. For example where supermarkets merge<sup>204</sup>, or where their procurement policies are under investigation<sup>205</sup>, the market must be defined from the demand rather than the supply side of the market. In the case of vertical agreements Article 3 of Regulation 330/2010, which contains a market share threshold of 30 per cent for the application of that block exemption, requires that the market be defined from the demand as well as the supply side of the market<sup>206</sup>.

<sup>196</sup> Case T-30/89 *Hilti AG v Commission* [1990] ECR II-163, [1992] 4 CMLR 16, upheld on appeal Case C-53/92 P *Hilti AG v Commission* [1994] ECR I-667, [1994] 4 CMLR 614.

<sup>206</sup> See ch 16, ‘The Vertical guidelines’, p 662.

**(xii) Innovation markets<sup>207</sup>**

In the US a ‘market for innovation’, separate from products already on the market, has been found in some cases involving high technology industries<sup>208</sup>. The Commission’s decision in *Shell/Montecatini*<sup>209</sup> suggested that it would be prepared to define a market for innovation, although in other cases it has made use of the more conventional idea of ‘potential competition’ to deal with the situation<sup>210</sup>. The Commission’s *Guidelines on Horizontal Cooperation Agreements*<sup>211</sup> provide some guidance on this issue.

**(D) The relevant geographic market**

It is also necessary, when determining whether a firm or firms have market power, that the relevant geographic market should be defined. The definition of the geographic market may have a decisive impact on the outcome of a case, as in the *Volvo/Scania* decision<sup>212</sup> under the EUMR: the Commission’s conclusion that there were national, rather than pan-European, markets for trucks and buses led to an outright prohibition of that merger<sup>213</sup>. Some products can be supplied without difficulty throughout the Union or even the world. In other cases there may be technical, legal or practical reasons why a product can be supplied only within a narrower area. The delineation of the geographic market helps to indicate which other firms impose a competitive constraint on the one(s) under investigation. The cost of transporting products is an important factor: some goods are so expensive to transport in relation to their value that it would not be economic to attempt to sell them on distant markets. Another factor might be legal controls which make it impossible for an undertaking in one Member State to export goods or services to another. This problem may be dealt with by the Commission bringing proceedings against the Member State to prevent restrictions on the free movement of goods (under Articles 34 to 36 TFEU) or of services (under Articles 56 to 62 TFEU). With the completion of the internal market, there should be fewer claims that fiscal, technical and legal barriers to inter-state trade exist.

**(i) The legal test**

That the geographic market should be identified is clear from the Court of Justice’s judgment in *United Brands v Commission*<sup>214</sup>. The Court said that the opportunities for competition under Article 102 must be considered:

with reference to a clearly defined geographic area in which [the product] is marketed and where the conditions are sufficiently homogeneous for the effect of the economic power of the undertaking concerned to be able to be evaluated.

<sup>207</sup> See Rapp ‘The Misapplication of the Innovative Market Approach to Merger Analysis’ (1995) 64 Antitrust LJ 19; Glader *Innovation Markets and Competition Analysis: EU Competition Law and US Antitrust Law* (Edward Elgar, 2006).

<sup>211</sup> OJ [2011] C 11/1, paras 119–126.

<sup>212</sup> Case M 1672, OJ [2001] L 143/74, [2001] 5 CMLR 11.

<sup>213</sup> See ch 21, ‘Outright prohibitions’, pp 902–904.

<sup>214</sup> Case 27/76 [1978] ECR 207, [1978] 1 CMLR 429, paras 10–11.

In that case the Commission had excluded the UK, France and Italy from the geographic market since in those countries special arrangements existed as to the importing and marketing of bananas. United Brands argued that, even so, the Commission had drawn the geographic market too widely, since competitive conditions varied between the remaining six Member States<sup>215</sup>; the Court of Justice however concluded that the Commission had drawn it correctly. The significance of the geographic market in determining dominance was emphasised by the Court of Justice in *Alsattel v Novasam SA*<sup>216</sup>. There the Court of Justice held that the facts before it failed to establish that a particular region in France rather than France generally constituted the geographic market, so that the claim that Novasam had a dominant position failed in the absence of evidence of power over the wider, national, market.

## (ii) The Commission's Notice on Market Definition

The Commission provides helpful guidance on the definition of the geographic market in its *Notice on Market Definition*<sup>217</sup>. At paragraph 28 it says that its approach can be summarised as follows:

it will take a preliminary view of the scope of the geographic market on the basis of broad indications as to the distribution of market shares between the parties and their competitors, as well as a preliminary analysis of pricing and price differences at national and [EU] or EEA level. This initial view is used basically as a working hypothesis to focus the Commission's enquiries for the purposes of arriving at a precise geographic market definition.

In the following paragraph the Commission says that it will then explore any particular configuration of prices or market shares in order to test whether they really do say something about the possibility of demand substitution between one market and another: for example it will consider the importance of national or local preferences, current patterns of purchases of customers and product differentiation. This survey is to be conducted within the context of the SSNIP test outlined above, the difference being that, in the case of geographic market definition, the question is whether, faced with an increase in price, consumers located in a particular area would switch their purchases to suppliers further away. Further relevant factors are set out in paragraphs 30 and 31 of the *Notice*, and at paragraph 32 the Commission points out that it will take into account the continuing process of market integration in defining the market, the assumption here being that, over time, the single market should become more of a reality, with the result that the geographic market should have a tendency to get wider. There is no reason in principle why the relevant geographic market should not extend to the entire world, and there have been decisions in which this has been so<sup>218</sup>.

<sup>215</sup> This decision was reached before the accession of Greece, Spain and Portugal etc.

<sup>216</sup> Case 247/86 [1988] ECR 5987, [1990] 4 CMLR 434; other cases in which the General Court has upheld the Commission's definition of the geographic market include Case T-151/05 *Nederlandse Vakbond Varkenshouders v Commission* [2009] ECR II-1219, [2009] 5 CMLR 1613 paras 69–78 and Case T-57/01 *Solvay v Commission* [2009] ECR II-4621, paras 239–260, on appeal to the Court of Justice Case C-109/10 P *Solvay SA v Commission*, not yet decided.

<sup>217</sup> See p 29, ch 1, n 152 above.

<sup>218</sup> For example the Commission found global markets for top-level internet connectivity in Case M 1069 *WorldCom/MCI* OJ [1999] L 116/1, [1999] 5 CMLR 876, para 82 and Case M 1741 *MCI WorldCom/Sprint*, decision of 28 June 2000, para 97, available at [www.europa.eu.int/comm/competition/mergers/cases](http://www.europa.eu.int/comm/competition/mergers/cases).

**(iii) Examples of evidence that may be used in defining the relevant geographic market**

As far as definition of the geographic market is concerned, the Commission suggests that the following evidence may be available.

**(A) Past evidence of diversion of orders to other areas**

It may be that direct evidence is available of changes in prices between areas and consequent reactions by customers. The Commission points out that care may be needed in comparing prices where there have been exchange rate movements, where taxation levels are different and where there is significant product differentiation between one area and another.

**(B) Basic demand characteristics**

The scope of the geographic market may be determined by matters such as national preferences or preferences for national brands, language, culture and life style, and the need for a local presence.

**(C) Views of customers and competitors**

As in the case of defining the product market, the Commission will take the views of customers and competitors into account when determining the scope of the geographic market.

**(D) Current geographic pattern of purchases**

The Commission will examine where customers currently purchase goods or supplies. If they already purchase across the European Union, this would indicate an EU-wide market.

**(E) Trade flows/patterns of shipments**

Information on trade flows may be helpful in determining the geographic market, provided that the trade statistics are sufficiently detailed for the products in question.

**(F) Barriers and switching costs associated with the diversion of orders to companies located in other areas**

Barriers that isolate national markets, transport costs and transport restrictions may all contribute to the isolation of national markets.

**(E) The temporal market**

It may also be necessary to consider the temporal quality of the market<sup>219</sup>. Competitive conditions may vary from season to season, for example because of variations of weather or of consumer habits. A firm may find itself exposed to competition at one point in a year but effectively free from it at another. In this situation it may be that it has market power during one part of the year but not others.

The issue arose in *United Brands v Commission*<sup>220</sup>. There was evidence in that case which suggested that the cross-elasticity of demand for bananas fluctuated from season to season. When other fruit was plentiful in summer, demand for bananas dropped:

<sup>219</sup> The temporal market is discussed briefly in the OFT Guideline on *Market Definition*, OFT 403, December 2004, paras 5.1–5.3.

<sup>220</sup> Case 27/76 [1978] ECR 207, [1978] 1 CMLR 429.

this suggests that the Commission might have considered that there were two seasonal markets, and that United Brands had no market power over the summer months. The Commission however identified just the one temporal market and held that UBC was dominant within it. On appeal the Court of Justice declined to deal with this issue. In *ABG*<sup>221</sup> on the other hand the Commission did define the temporal market for oil more narrowly by limiting it to the period of crisis which followed the decision of OPEC to increase dramatically the price of oil in the early 1970s. The Commission held that during the crisis companies had a special responsibility to supply existing customers on a fair and equitable basis; the Court of Justice quashed the Commission's decision on the issue of abuse, but not on the definition of the market<sup>222</sup>.

The fact that electricity as a product is not capable of being stored means that there may be different temporal markets in this sector<sup>223</sup>.

## (F) Market power

As has been stressed, market definition is not an end in itself. The really important question in competition law cases is whether a firm or firms have, or will have after a merger, market power. It will be recalled that market power exists where a firm has the ability profitably to raise prices over a period of time, or to behave analogously for example by restricting output or limiting consumer choice<sup>224</sup>. Three issues are relevant to an assessment of market power: these are usefully summarised in paragraph 12 of the Commission's *Guidance on the Commission's Enforcement Priorities in Applying Article [102 TFEU] to Abusive Exclusionary Conduct by Dominant Undertakings* ('*Guidance on Article 102 Enforcement Priorities*')<sup>225</sup>:

- constraints imposed by the existing supplies from, and the position on the market of, *actual competitors* (the market position of the dominant undertaking and its competitors),
- constraints imposed by the credible threat of future expansion by actual competitors or entry by *potential competitors* (expansion and entry),
- constraints imposed by the bargaining strength of the undertaking's customers (*countervailing buyer power*) (emphasis added).

It will require only a moment's reflection to appreciate that market share figures cannot provide any insights into the influence of potential competitors on the market power of existing ones, since a figure cannot be ascribed to someone not already in the market; nor, for the same reason, can market shares provide information about the extent of any countervailing buyer power. This is why market share figures are, at best, simply a proxy for market power, and cannot be determinative in themselves.

<sup>221</sup> OJ [1977] L 117/1, [1977] 2 CMLR D1.

<sup>222</sup> Case 77/77 *BP v Commission* [1978] ECR 1513, [1978] 3 CMLR 174.

<sup>223</sup> See eg *Application in the Energy Sector* OFT 428, January 2005, para 3.13; DG COMP's *Report on Energy sector Inquiry* SEC(2006)1724, para 398.

<sup>224</sup> See ch 1 n 119 above.

<sup>225</sup> OJ [2009] C 45/7; although this document is specifically concerned with market power of sufficient scale to earn the adjective 'substantial' for the purposes of Article 102 TFEU, the three criteria set out in para 12 of the *Guidance* are relevant to any assessment of market power; for further guidance on the assessment of market power see *Assessment of market power* OFT 415, December 2004.

## (i) Actual competitors

### (A) Market shares<sup>226</sup>

As paragraph 13 of the Commission's *Guidance on Article 102 Enforcement Priorities* says, market shares provide a useful first indication of the structure of any particular market and of the relative importance of the various undertakings active on it. However the Commission adds that it will interpret market shares in the light of the relevant market conditions, and in particular of the dynamics of the market and of the extent to which products are differentiated. It will also look at the development of market shares over time in the case of volatile markets or bidding markets, where firms bid *for* the market, often in auctions<sup>227</sup>.

As noted earlier in this chapter, there are varying degrees of market power – from none, to ‘non-appreciable’, to ‘substantial’, to pure monopoly. Clearly market share figures tell us something about where an undertaking is along this continuum. The Table of Market Share Thresholds at the end of this chapter lists a (large) number of thresholds that have some significance in the application of EU and UK competition law, for example by providing a ‘safe harbour’ for firms below a certain threshold, or by indicating a fairly stormy sea for firms above a different one. Specific market share rules – such as the presumption of dominance where an undertaking has a market share of 50 per cent or more or the application of the block exemption for vertical agreements provided that the parties’ market shares are below 30 per cent – are examined in later chapters of this book.

### (B) Market concentration and the Herfindahl-Hirschman Index

In some cases market share figures may be used in order to determine how concentrated a market is, or how concentrated it will be following a merger or the entry into force, for example, of a cooperation agreement. Competition concerns may be greater as the market becomes more concentrated. One way of determining the level of concentration in the market is to use the so-called ‘Herfindahl-Hirschman Index’ (‘the HHI’). This sums up the squares of the individual market shares of all the competitors in a market: the higher the total, the more concentrated the market. According to paragraph 16 of the European Commission's *Guidelines on the assessment of horizontal mergers*<sup>228</sup> the concentration level will be low where the total is below 1,000; moderate if between 1,000 and 1,800; and high where it is above 1,800. This is a relatively simple way of calculating market concentration, and its effectiveness is demonstrated by the following three examples:

#### *Example 1*

In the widget industry there are 15 competitors: 5 of them each has a market share in the region of 10 per cent, and 10 of them each has a market share in the region of 5 per cent

$$\text{HHI} = 5 \times 10^2 + 10 \times 5^2 = 500 + 250 = 750$$

The market concentration is low

<sup>226</sup> For a critical discussion of the use of market shares in competition analysis see Kaplow ‘Market Share Thresholds: On the Conflation of Empirical Assessments and Legal Policy Judgments’ (2011) 7 *Journal of Competition Law and Economics* 243.

<sup>227</sup> A helpful discussion of the types of auction that may be held and the decisional practice in the EU and the UK can be found in Szilágyi Pál ‘Bidding Markets and Competition Law in the European Union and the United Kingdom’ (2008) 29 *ECLR* 16 and (2008) 29 *ECLR* 89.

<sup>228</sup> [2004] OJ C 31/5; see also the Commission's *Guidelines on the assessment of non-horizontal mergers* OJ [2008] C 265/6, para 25.

*Example 2*

In the blodget industry there are 8 competitors: 2 of them each has a market share in the region of 20 per cent, and 6 of them each has a market share in the region of 10 per cent

$$\text{HHI} = 2 \times 20^2 + 6 \times 10^2 = 800 + 600 = 1400$$

The market concentration is moderate

*Example 3*

In the sprocket industry there are 4 competitors: 2 of them each has a market share in the region of 30 per cent and the other 2 each has a market share in the region of 20 per cent

$$\text{HHI} = 2 \times 30^2 + 2 \times 20^2 = 1800 + 800 = 2600$$

The market concentration is high

The same approach can be used to work out the consequences for the concentration of the market of any of the competitors merging or entering into an agreement with one another. For example if, in Example 2, the two firms with 20 per cent were to merge, the HHI after the agreement would be:

$$40^2 + 6 \times 10^2 = 1600 + 600 = 2200$$

The market concentration will have moved from moderate to high. The difference in the pre- and post-merger concentration levels – that is to say the increase of 800 from 1400 to 2200, is referred to as the ‘Delta’, represented by the symbol  $\Delta$ .

If however, in Example 2, two of the firms with 10 per cent had entered into an agreement with one another, the HHI after the agreement would be:

$$2 \times 20^2 + 1 \times 20^2 + 4 \times 10^2 = 800 + 400 + 400 = 1600$$

The market concentration will remain moderate, and the Delta would be merely 200.

The HHI provides some insights into the competitive condition of markets; however it is fairly unsophisticated, not least since it adopts a static view of markets based on market share figures, and is unable to reflect dynamism and innovation. Its role, therefore, is fairly limited: it is at its most useful when screening out mergers that do not give rise to competitive concerns<sup>229</sup>; however little if any reliance would be placed on HHIs at the stage of deciding to prohibit an agreement, conduct or a merger, where much more sophisticated analysis would be undertaken.

**(ii) Potential competitors<sup>230</sup>**

Recommendation 7 of the International Competition Network’s Working Group on *Unilateral Conduct Laws* is that ‘The Assessment of durability of market power, with a focus on barriers to entry or expansion, should be an integral part of the analysis of dominance/substantial market power’. As paragraph 16 of the Commission’s *Guidance on Article 102 Enforcement Priorities* points out, competition is a dynamic process and an assessment of competitive constraints cannot be based solely on the existing market situation: potential entry by new firms and expansion by existing ones must also be taken into account. This is why it is necessary to take barriers to entry and barriers to expansion into account. In the Commission’s view, an

<sup>229</sup> See ch 21, ‘Market shares and concentration levels’, p 868 and ch 22, ‘Measures of concentration’, p 934.

<sup>230</sup> See further the OECD’s *Best Practices Roundtable on Barriers to Entry*, 2005, available at [www.oecd.org](http://www.oecd.org).

undertaking would be deterred from raising its prices if expansion is ‘likely, timely and sufficient’; in particular paragraph 16 says that to be ‘sufficient’, entry cannot be simply on a small-scale basis, for example into a market niche, but must be of such a magnitude as to be able to deter any attempt by an undertaking already in the market to increase prices.

Paragraph 17 of the *Guidance* provides examples of such barriers:

- legal barriers, such as tariffs or quotas
- advantages specifically enjoyed by dominant undertakings such as economies of scale and scope; privileged access to essential inputs or natural resources; important technologies; or an established distribution and sales network
- costs and other impediments, for example resulting from network effects, faced by customers in switching to a new supplier
- the conduct of a dominant undertaking, such as long-term exclusive contracts that have appreciably foreclosing effects.

Barriers to entry and expansion will be considered further in specific chapters of this book<sup>231</sup>.

### (iii) Countervailing buyer power

Paragraph 18 of the Commission's *Guidance on Article 102 Enforcement Priorities* explains that competitive constraints may be exerted not only by actual or potential competitors, but also by customers if they have sufficient bargaining strength; such power may result from a customer's size or its commercial significance for a dominant firm. However buyer power may not amount to an effective competitive constraint where it ensures only that a particular or limited segment of customers is shielded from the market power of the supplier.

Buyer power will be considered further in specific chapters of this book<sup>232</sup>.

### (iv) Summary

The discussion above has explained the key features involved in the determination of whether a firm or firms have market power. In particular it was explained that:

- **market definition** is an important part of the analysis of market power, but it is not an end in itself and is simply one stage in the overall process
- **market shares** provide us with important information about the state of existing competition within the market, but they cannot, in themselves, be determinative, since they tell us nothing about barriers to expansion and entry, nor about buyer power
- **barriers to expansion and entry** are important, since they provide us with information about the existence of potential competition, something which cannot be captured by a market share figure, precisely because the competition is potential only
- **buyer power** is also an important part of the analysis of market power.

<sup>231</sup> See eg ch 5, ‘Potential competitors’, pp 184–187 on Article 102 TFEU and ch 21, ‘Entry’, p 874 on the EUMR.

<sup>232</sup> See eg ch 21, ‘Countervailing buyer power’, p 874 and ch 22, ‘Countervailing buyer power’, p 940.

## (G) A final reflection on market shares

It has been said several times in this chapter that market share does not, in itself, determine whether an undertaking possesses market power; assessing market power is not and cannot be reduced simply to numbers. This having been said, however, it is interesting to consider the large range of situations in which EU and UK competition law require competition lawyers and their clients to consider market share figures for the purpose of deciding how to handle a particular case. This arises partly from numerous pieces of legislation and guidelines which contain a market share threshold; and partly from case law which has attributed significance to particular market share figures. The following table sets out a series of market share thresholds that should be embedded in the mind of in-house counsel to *DoItAll*, a diversified conglomerate company conducting business in the EU. The list is not exhaustive, and was compiled in a more light-hearted mood than the rest of this chapter: it does nevertheless reveal how influential market share figures can be in analysing competition law cases in the EU and the UK.

### 1.1 Table of market share thresholds

---

0%	With a market share of 0% even the most zealous of competition authorities is unlikely to take action against you With a market share of less than 5% your agreements are unlikely to have an appreciable effect on trade between Member States provided that certain other criteria are satisfied <sup>1</sup>
5%	At 5% or more your agreements with undertakings that are not actual or potential competitors may significantly contribute to any ‘cumulative’ foreclosure effect of parallel networks of similar agreements <sup>2</sup> Agreements with undertakings that concern imports and exports have been found to have an effect on trade between Member States where your market share is around the 5% level <sup>3</sup> When notifying mergers under the EU Merger Regulation you will be required to provide information about competitors that have more than 5% of the relevant geographic market <sup>4</sup>
10%	At 10% or more your agreements with actual or potential competitors are no longer <i>de minimis</i> under the European Commission’s <i>Notice on Agreements of Minor Importance</i> <sup>5</sup>
15%	It is unlikely that your joint purchasing agreements <sup>6</sup> or your commercialisation <sup>7</sup> agreements infringe Article 101(1) where your market share is below 15% At 15% or more your agreements with undertakings that are not actual or potential competitors are no longer <i>de minimis</i> under the <i>Notice on Agreements of Minor Importance</i> <sup>8</sup> Under the EU Merger Regulation, in the case of horizontal mergers, markets in which your market share exceeds 15% are ‘affected markets’, necessitating the provision of substantial information on Form CO to DG COMP <sup>9</sup> With more than 15% of the market you are no longer eligible to take advantage of the ‘simplified procedure’ for certain horizontal mergers under the EU Merger Regulation <sup>10</sup>
20%	At 20% or more block exemption for certain co-insurance agreements ceases to be available <sup>11</sup> ; some marginal relief is provided up to a market share cap of 25% <sup>12</sup> and even, exceptionally, beyond 25% <sup>13</sup> Block exemption ceases to be provided for specialisation agreements under Regulation 1218/2010 where the parties’ market share exceeds 20% <sup>14</sup> ; some marginal relief is available up to a market share cap of 25% <sup>15</sup> Block exemption ceases to be available for technology transfer agreements between competing undertakings where their combined market share exceeds 20% <sup>16</sup>
25%	At 25% or more block exemption ceases to be available for research and development agreements under Regulation 1217/2010 <sup>17</sup> ; some marginal relief is provided up to a market share cap of 30% <sup>18</sup> and even, exceptionally, beyond 30% <sup>19</sup> At 25% or more block exemption for certain co-reinsurance, as opposed to co-insurance, agreements ceases to be available <sup>20</sup> ; some marginal relief is provided up to a threshold of 30% <sup>21</sup> and even, for a limited period, beyond 30% <sup>22</sup>

---

- Under the EU Merger Regulation at 25% you cease to benefit from a presumption that your merger will not significantly impede effective competition<sup>23</sup>
- Under the EU Merger Regulation you do not benefit from the simplified procedure in the case of vertical mergers where your market share exceeds 25%<sup>24</sup>
- Under the EU Merger Regulation, in the case of vertical mergers, markets in which your market share exceeds 25% are affected markets<sup>25</sup>
- Under UK law you could be referred to the Competition Commission under the merger provisions of the Enterprise Act 2002<sup>26</sup> where you supply or are supplied with 25% or more of the goods or services of a certain description<sup>27</sup>
- 30% At 30% your agreements with undertakings that are not actual or potential competitors cease to benefit from the EU block exemption for vertical agreements<sup>28</sup>, although there is some marginal relief up to 35%<sup>29</sup>
- Your liner consortia agreements run into problems under Commission Regulation 906/2009 if your market share exceeds 30%, with some marginal relief of up to 10% (that is to say up to a market share of 33%)<sup>30</sup>
- Block exemption ceases to be available for technology transfer agreements between non-competing undertakings where their combined market share exceeds 30%
- At less than 30% your non-horizontal mergers are unlikely to give rise to any problems under the EU Merger Regulation; and there is no presumption against them where your market share is more than 30%<sup>31</sup>
- 40% You may be dominant under Article 102 with a market share of 40% or more (there has been only one finding by the European Commission of dominance under Article 102 below 40%)<sup>32</sup>; if you are dominant, you have a special responsibility not to harm competition<sup>33</sup>
- If your market share is below 40% the OFT considers it 'unlikely' that you are dominant<sup>34</sup>; the same point is made in the European Commission's *Guidance on the Commission's Enforcement Priorities in Applying Article [102 TFEU] to Abusive Exclusionary Conduct by Dominant Undertakings*<sup>35</sup>
- There is unlikely to be a cumulative foreclosure effect arising from your exclusive purchasing agreements where all the companies at the retail level have market shares below 30% and the total tied market share is less than 40%<sup>36</sup>
- 45%
- 50% There is a rebuttable presumption that, with 50% or more of the market, you have a dominant position<sup>37</sup>; this presumption applies in the case of collective dominance as well as single-firm dominance<sup>38</sup>
- Where the market share of the 5 largest suppliers in a market is below 50%, and the market share of the largest supplier is below 30%, there is unlikely to be a single or cumulative anti-competitive effect arising from their agreements<sup>39</sup>
- There is unlikely to be such an effect where the share of the market covered by selective distribution systems is less than 50%<sup>40</sup>
- 55%
- 60%
- 65%
- 70%
- 75%
- 80% At 80% you may now be approaching a position of 'super-dominance', where you have a particularly special responsibility not to indulge in abusive behaviour<sup>41</sup>
- 85%
- 90% At 90% you are approaching 'quasi-monopoly'<sup>42</sup>
- In the European Commission's view it is unlikely that conduct that maintains, creates or strengthens a market position 'approaching that of monopoly' can normally be justified on the ground that it also creates efficiency gains<sup>43</sup>
- 95%
- 100% At 100% you are a monopolist.

## Overview of EU and UK competition law

1. Introduction	49	5. The Institutional Structure of EU and UK Competition Law	79
2. EU Law	49		
3. UK Law	58		
4. The Relationship Between EU Competition Law and National Competition Laws	75		

### 1. Introduction

This chapter will provide a brief overview of EU and UK competition law and the relevant institutions; it will also explain the relationship between EU competition law and the domestic competition laws of the Member States, in particular in the light of Article 3 of Regulation 1/2003<sup>1</sup>. The rules of the European Economic Area are briefly referred to, and the trend on the part of Member States to adopt domestic competition rules modelled on those in the EU is noted. Three diagrams at the end of the chapter explain the institutional structure of EU and UK competition law.

### 2. EU Law

#### (A) The Treaty on the Functioning of the European Union

The Rome Treaty of 1957<sup>2</sup> established what is now known as the European Union<sup>3</sup>. There are currently 27 Member States<sup>4</sup>. The Rome Treaty was renamed the Treaty on the Functioning

<sup>1</sup> Council Regulation 1/2003 on the implementation of the rules on competition laid down in Articles [101 and 102 TFEU] OJ [2003] L 1/1, available at [www.ec.europa.eu](http://www.ec.europa.eu).

<sup>2</sup> The Treaty of Paris of 1951 had earlier established a special regime for coal and steel which contained provisions dealing specifically with competition; this Treaty expired on 23 July 2002: it is discussed briefly in ch 23, 'Coal and Steel', p 967.

<sup>3</sup> The original name 'European Economic Community' was replaced by the 'European Community' by the Maastricht Treaty of 1992, which, in turn, was subsumed into the European Union by the Lisbon Treaty of 2009; it follows that references are now to EU, not to EC, competition law.

<sup>4</sup> As to the position of territories such as the Isle of Man and Gibraltar under EU Law see Murray *EU & Member State Territories – The Special Relationship under Community Law* (Palladian Law Publishing, 2004).

of the European Union (“TFEU”) by the Lisbon Treaty<sup>5</sup> with effect from 1 December 2009. The Lisbon Treaty also renumbered the Treaty Articles and renamed various institutions; for example the Court of First Instance is now known as the General Court; as with the rest of this book, this chapter will use the post-Lisbon terminology.

The TFEU consists of 358 Articles. It is a complex document, the predecessors of which have generated a considerable body of jurisprudence<sup>6</sup>. Much of EU law is concerned with the elimination of obstacles to the free movement of goods, services, persons and capital; the removal of these obstacles in itself promotes competition within the Union. Initiatives such as the establishment of a public procurement regime<sup>7</sup>, the creation of the Euro<sup>8</sup> and the ‘EU 2020 Strategy’<sup>9</sup> with its emphasis on ‘smart, sustainable and inclusive growth’ also contribute substantially to greater competition within the European economy. However, quite apart from this ‘macro’ effect on competition, the TFEU also contains specific competition rules that apply to undertakings and to the Member States themselves.

### (i) The competition chapter in the TFEU

EU competition law is contained in Chapter 1 of Title VII of Part Three of the TFEU, which consists of Articles 101 to 109. It is necessary to read these provisions in conjunction with the objectives and principles laid down in the TFEU and also the Treaty on European Union (“TEU”). Article 3(3) TEU provides that one of the EU’s objectives is a highly competitive social market economy. Article 3(3) TEU also states that the EU is to establish an internal market, which, in accordance with Protocol 27 on the internal market and competition, annexed to the TEU and the TFEU, is to include a system ensuring that competition is not distorted. The Protocol has the same force as a Treaty provision<sup>10</sup>. The Lisbon Treaty repealed Article 3(1)(g) of the EC Treaty that established as one of the activities of the European Community the achievement of a system of undistorted competition. In *Konkurrensverket v TeliaSonera Sverige AB*<sup>11</sup> the Court of Justice referred to Article 3(3) TEU and Protocol 27 as though there was no difference from Article 3(1)(g) EC<sup>12</sup>.

Article 3(1)(b) TFEU provides that the EU shall have exclusive competence in establishing the competition rules necessary for the functioning of the internal market. Article 119(1) TFEU provides that the activities of the Member States and the EU shall be conducted in accordance with the principle of an open market economy with free competition.

These references to competition in the TEU and the TFEU have a significant effect on the decisions of the European Commission (‘the Commission’), and judgments of the General

<sup>6</sup> For comprehensive analysis of EU law in general see Wyatt and Dashwood’s *European Union Law* (Hart Publishing, 6th ed, 2011, eds Dashwood, Dougan, Rodger, Spaventa and Wyatt); Chalmers, Hadjiemmanuil, Monti and Tomkins *European Union Law* (Cambridge University Press, 2006); Craig and de Búrca *EU Law: Texts, Cases, and Materials* (Oxford University Press, 4th ed, 2007).

<sup>7</sup> On public procurement see Bovis *EC Public Procurement: Case Law and Regulation* (Oxford University Press, 2005); Arrowsmith *The Law of Public and Utilities Procurement* (Sweet & Maxwell, 2nd ed, 2005); Trepte *Public Procurement in the EU* (Oxford University Press, 2nd ed, 2007); Graells *Public Procurement and the EU Competition Rules* (Hart Publishing, 2011).

<sup>8</sup> On the Euro see Herdegen ‘Price Stability and Budgetary Restraints in Economic and Monetary Union: the Law as Guardian of Economic Wisdom’ (1998) 35 *CML Rev* 9; Louis ‘A Legal and Institutional Approach for Building a Monetary Union’ (1998) 35 *CML Rev* 33; Swann *The Economics of Europe* (Penguin Books, 9th ed, 2000), ch 7; see further ‘Economic and monetary union’, p 52 below.

<sup>9</sup> See *Europe 2020* COM(2010) 2020 final; see also *A Pro-active Competition Policy for a Competitive Europe* COM(2004)293 final, both available at [www.ec.europa.eu](http://www.ec.europa.eu).

<sup>10</sup> See Article 51 TEU.

<sup>11</sup> Case C-52/09 [2011] ECR I-000.

<sup>12</sup> *Ibid*, paras 20–22.

Court and the Court of Justice (together, ‘the EU Courts’), which have often interpreted the specific competition rules teleologically from the starting point of what are now Articles 3(3) TEU and Protocol 27<sup>13</sup>. Within Chapter 1 of Title VII of Part Three of the TFEU, Article 101(1) prohibits agreements, decisions by associations of undertakings and concerted practices that have as their object or effect the restriction of competition<sup>14</sup>, although this prohibition may be declared inapplicable where the conditions in Article 101(3) are satisfied<sup>15</sup>. Article 102 prohibits the abuse by an undertaking or undertakings of a dominant position<sup>16</sup>. Article 106(1) imposes obligations on Member States in relation to the Treaty generally and the competition rules specifically, while Article 106(2) concerns the application of the competition rules to public undertakings and private undertakings to which a Member State entrusts particular responsibilities<sup>17</sup>. Articles 107 to 109 prohibit state aid to undertakings by Member States which might distort competition in the internal market<sup>18</sup>. An important additional instrument of EU competition law is the EU Merger Regulation (‘the EUMR’) which applies to concentrations between undertakings that have a Community dimension<sup>19</sup>.

### (ii) The single market imperative

As mentioned in chapter 1<sup>20</sup>, it is important to stress that EU competition law is applied by the Commission and the EU Courts very much with the issue of single market integration in mind. The single market has been described by the Commission as one of the ‘EU’s biggest assets’<sup>21</sup> which it is determined to protect<sup>22</sup>. Agreements and conduct which might have the effect of dividing the territory of one Member State from another will be closely scrutinised and may be severely punished. The existence of ‘single market’ competition rules as well as ‘conventional’ competition rules is a unique feature of EU competition law. The fact that ten further countries acceded to the European Union on 1 May 2004 and two more on 1 January 2007, together with the possibility of future accessions, for example by some of the Balkan states and Turkey, means that single market integration is likely to remain a key feature of competition policy<sup>23</sup>. The arrival of the economic crisis in 2008 reinforced the Commission’s determination to act as guardian of the single market; or, to put the point another way, to prevent a retreat into economic nationalism<sup>24</sup>. The Court of Justice reaffirmed the importance of the single market imperative in *GlaxoSmithKline Services Unlimited v Commission*<sup>25</sup>.

<sup>13</sup> For examples of teleological interpretation of the competition rules see Cases C-68/94 and 30/95 *France v Commission* [1998] ECR I-1375, [1998] 4 CMLR 829, paras 169–178; Case T-102/96 *Gencor v Commission* [1999] ECR II-753, [1999] 4 CMLR 971, paras 148–158; Case T-99/04 *AC-Treuhand AG v Commission* [2008] ECR II-1501, [2008] 5 CMLR 962, paras 124–150.

<sup>14</sup> On Article 101(1) see ch 3.

<sup>15</sup> On Article 101(3) see ch 4.

<sup>16</sup> On Article 102 see chs 5, 17 and 18.

<sup>17</sup> On Article 106 see ch 6, ‘Article 106’, pp 222–244.

<sup>18</sup> Articles 107–109 are briefly discussed in ch 6, ‘Articles 107 to 109 TFEU – State Aids’, pp 246–247.

<sup>19</sup> Council Regulation 139/2004 on the control of concentrations between undertakings, OJ [2004] L 24/1; on the EUMR see ch 21.

<sup>25</sup> Cases C-501/06 P etc [2009] ECR I-9291, [2010] 4 CMLR 50, paras 59–61.

### (iii) Economic and monetary union

The creation of the Euro has an important influence on competition within the EU<sup>26</sup>. As explained in chapter 1 the competitive process depends, amongst other things, on consumers having adequate information to enable them to make rational choices<sup>27</sup>. Price comparisons are difficult when the same goods and services are sold in different, variable currencies; the problem is compounded by the cost of exchanging money. The Euro brings a transparency to price information that fundamentally transforms the position, and has a considerable impact on the way in which business is conducted. There are also moves towards the establishment of a 'Single Euro Payments Area' which would improve the efficiency of Euro payments<sup>28</sup>.

### (iv) The modernisation of EU competition law

During the course of the 1990s it became apparent that many aspects of EU competition law were in need of modernisation; in particular the law on vertical agreements, on horizontal cooperation agreements and on the obtaining of 'individual exemptions' under Article 101(3) TFEU were perceived by many people, including Commission officials, to be in need of radical reform. Proposals for reform were set out in 1998<sup>29</sup>, and the modernisation programme gathered pace in 1999 and 2000<sup>30</sup>. There followed the reform of the vertical agreements regime<sup>31</sup>, which involved a major repositioning of the law and economics of the subject and which has worked well in practice. Numerous other policy initiatives followed: a transformation of the Commission's approach to horizontal cooperation agreements<sup>32</sup>, a new regime for technology transfer agreements<sup>33</sup>, and considerable reform of the EUMR<sup>34</sup>. Even more radically, with effect from 1 May 2004 the way in which Articles 101 and 102 are applied in practice was fundamentally changed as a result of the entry into force of Regulation 1/2003<sup>35</sup>; in particular this Regulation abolished the system of notifying agreements to the Commission for individual exemption under Article 101(3), and removed the Commission's monopoly over the application of that provision to individual agreements<sup>36</sup>. This was followed, in 2009, by the publication of *Guidance on the Commission's Enforcement Priorities in Applying Article [102 TFEU] to Abusive Exclusionary Conduct by Dominant Undertakings*<sup>37</sup>, an important contribution to an understanding of that difficult subject. There is no question that these are major changes in the direction of competition law and policy in the EU.

<sup>26</sup> See eg the Commission's XXVIIth *Report on Competition Policy* (1997), pp 7–8 and XXVIIIth *Report on Competition Policy* (1998), pp 24–25.

<sup>27</sup> See ch 1, 'The model of perfect competition is based on assumptions unlikely to be observed in practice', p 7.

<sup>28</sup> See Directive 2007/64/EC of the European Parliament and of the Council on payment services in the internal market, OJ [2007] L 319/1, available at [www.ec.europa.eu/internal\\_market](http://www.ec.europa.eu/internal_market); see also the Staff Working Paper accompanying the Commission's *Report on Competition Policy* (2009), paras 229–233.

<sup>33</sup> See ch 19, 'Technology Transfer Agreements: Regulation 772/2004', pp 781–791.

<sup>34</sup> See ch 21 generally.

<sup>35</sup> See ch 2, n 1 above; Regulation 1/2003 is discussed at 'Regulation 1/2003', pp 76–79 below, and further in ch 4, 'Regulation 1/2003', pp 166–168 and in ch 7 generally.

<sup>36</sup> The system of block exemptions continues: see ch 4, 'Block Exemptions', pp 168–172.

<sup>37</sup> OJ [2009] C 45/7; see ch 5, 'The Commission's *Guidance on Article 102 Enforcement Priorities*', pp 174–177.

## (B) Institutions<sup>38</sup>

### (i) Council of the European Union

The supreme legislative body of the European Union is the Council of the European Union, often referred to as the Council of Ministers<sup>39</sup>. The Council is not involved in competition policy on a regular basis. However, acting under powers conferred by Articles 103 and 352 TFEU, the Council has adopted several major pieces of legislation, including the EUMR; it has delegated important powers to the Commission through regulations to enforce the competition rules in the TFEU, in particular Regulation 1/2003<sup>40</sup>; and it has given the Commission power to grant block exemptions in respect of certain agreements caught by Article 101(1) but which satisfy the criteria of Article 101(3)<sup>41</sup>.

### (ii) European Commission

The European Commission in Brussels is at the core of EU competition policy<sup>42</sup> and is responsible for fact-finding, taking action against infringements of the law, imposing penalties, adopting block exemption regulations, conducting sectoral inquiries, investigating mergers and state aids, and for developing policy and legislative initiatives. The Commission is also involved in the international aspects of competition policy, including cooperation with competition authorities around the world<sup>43</sup>. One of the Commissioners takes special responsibility for competition matters; this is regarded as one of the most important portfolios within the Commission, and confers upon the incumbent a high public profile. Certain decisions can be taken by the Commissioner for Competition rather than by the College of Commissioners. There are two Hearing Officers<sup>44</sup>, directly responsible to the Commissioner, who are responsible for ensuring that the rights of the defence are respected in proceedings under Articles 101 and 102 and the EUMR and that draft decisions of the Commission take due account of the relevant facts<sup>45</sup>.

DG COMP is the Directorate of the Commission specifically responsible for competition policy. DG COMP's website is an invaluable source of material. From the index page it is possible to navigate to a series of policy areas, including antitrust (that is to say Articles 101 and 102, though there is a specific area for cartels), mergers, state aid, liberalisation, and international matters<sup>46</sup>. Within each policy area there is a 'What's new' section as well as relevant legislation, draft legislation and details of current and decided cases; there is also useful statistical information. The website also leads to information about specific sectors such as agriculture and food, consumer goods, energy and financial services. The website also has a page dedicated to providing consumers with information about competition policy<sup>47</sup>. There is information about the Commissioner for Competition Policy, the composition of DG COMP and the European Competition Network ('the ECN'), which consists of the Commission and the 27 national competition authorities of the Member

<sup>38</sup> The institutional structure of EU and UK law is set out in diagrammatic form at the end of this chapter: see Figs 2.1, 2.2 and 2.3, pp 79–81 below.

<sup>39</sup> See Article 16 TEU and Articles 237–243 TFEU.

<sup>40</sup> On the Commission's powers of enforcement see ch 7.

<sup>41</sup> See ch 4, 'Vires and block exemptions currently in force', pp 169–171.

<sup>42</sup> See Article 17(1) TEU; see also Case C-344/98 *Masterfoods Ltd v HB Ice Cream Ltd* [2001] ECR I-11369, [2001] 4 CMLR 449, para 46.

<sup>43</sup> On the international dimension of competition policy see ch 12.

<sup>44</sup> See [www.ec.europa.eu/competition/hearing\\_officers/index\\_en.html](http://www.ec.europa.eu/competition/hearing_officers/index_en.html).

<sup>45</sup> On the role of the Hearing Officers see ch 7, 'The conduct of proceedings', pp 284–285.

<sup>46</sup> See [www.ec.europa.eu/comm/competition/index\\_en.html](http://www.ec.europa.eu/comm/competition/index_en.html).

<sup>47</sup> See [www.ec.europa.eu/competition/consumers/index\\_en.html](http://www.ec.europa.eu/competition/consumers/index_en.html).

States who are jointly responsible for the enforcement of Articles 101 and 102<sup>48</sup>. The ECN publishes an *ECN Brief*, which is published five times a year, summarising its work and that of its members<sup>49</sup>. Press Releases about competition policy matters can be accessed through the website, as can speeches of the Commissioner and officials of DG COMP, policy documents and the *Competition Policy Newsletter*, which is published three times a year. It is easy to follow the progress of public consultations through the website, and forthcoming Commission events of relevance to competition policy are announced there.

DG COMP publishes an *Annual Management Plan* in which it sets out its key objectives for the year ahead<sup>50</sup>. The Commission's *Annual Report on Competition Policy* provides essential information on matters of both policy and enforcement, as well as a statistical review of DG COMP's activities<sup>51</sup>. DG COMP's website also has links to other important sites, including those of the EU Courts and the national competition authorities.

DG COMP has a Director General and three Deputy Directors General. There is also a Chief Competition Economist who reports directly to the Director General. DG COMP is divided into nine administrative units. Directorate A is responsible for policy and strategy, including the ECN, for international relations and for consumer liaison. Directorates B to F are the operational units, each with responsibility for particular sectors, which conduct cases under Articles 101 and 102 and the EUMR, other than cartel cases, from start to finish; they also deal with state aid cases. Directorate G is exclusively concerned with cartels, the detection and eradication of which is a major priority of the Commission<sup>52</sup>. Directorate H is responsible for cohesion and enforcement issues arising in relation to state aid. Directorate R is responsible for the registry and for resources. Formal decisions of the Commission must be vetted by the Legal Service of the Commission, with which DG COMP works closely. The Legal Service represents the Commission in proceedings before the EU Courts<sup>53</sup>. An organigramme showing the composition of DG COMP can be accessed on its website<sup>54</sup>.

### (iii) General Court<sup>55</sup>

Actions for annulment of Commission decisions in competition cases (including cases on state aid) are brought in the first instance before the General Court<sup>56</sup>. The General Court must assess the legality of decisions according to the provisions of the TFEU<sup>57</sup>. Member States' actions used to be taken to the Court of Justice as happened, for example, in the case of *France v Commission*<sup>58</sup>, an important judgment which established, amongst other things, that the EUMR was capable of application to collective dominance<sup>59</sup>; however since the Nice Treaty all actions for annulment of Commission decisions, including those

<sup>50</sup> See [www.ec.europa.eu/dgs/competition/index\\_en.htm](http://www.ec.europa.eu/dgs/competition/index_en.htm).

<sup>51</sup> This can be found at [www.ec.europa.eu/comm/competition/annual\\_reports](http://www.ec.europa.eu/comm/competition/annual_reports).

<sup>52</sup> On cartels see ch 13 generally.

<sup>53</sup> For details of the Legal Service see [www.ec.europa.eu/dgs/legal\\_service/index\\_en.htm](http://www.ec.europa.eu/dgs/legal_service/index_en.htm).

<sup>54</sup> See [www.ec.europa.eu/dgs/competition/directory/organi\\_en.pdf](http://www.ec.europa.eu/dgs/competition/directory/organi_en.pdf).

<sup>55</sup> See the *Codified version of the Rules of Procedure of the General Court* OJ [2010] C 177/37; on the General Court see Kerse and Khan *EC Antitrust Procedure* (Sweet & Maxwell, 5th ed, 2005), paras 1.58–1.60

<sup>56</sup> On the types of action that can be brought see ch 7, 'Judicial Review', pp 290–294.

<sup>57</sup> See Article 261 (penalties); Article 263 (actions for annulment); Article 265 (failures to act) for a general account see Vesterdorf 'Judicial Review in EC Competition Law: Reflections on the Role of the Community Courts in the EC System of Competition Law Enforcement' (2005) 1 *Competition Policy International* 3.

<sup>58</sup> Cases C-68/94 and 30/95 [1998] ECR I-1375, [1998] 4 CMLR 829; on collective dominance see ch 14, 'Article 102 and Collective Dominance', pp 571–582 and ch 21, 'The dominance/SLC debate', p 864.

<sup>59</sup> See further ch 21, 'The dominance/SLC debate', p 864.

brought by Member States, are taken to the General Court. It can happen that substantially similar matters are before both the General Court and the Court of Justice simultaneously, in which case it is likely that the General Court will suspend its proceedings pending the judgment of the Court of Justice: this happened, for example, in the case of the ‘Irish ice-cream war’, where the General Court stayed the appeal of Van den Bergh Foods Ltd against the Commission’s decision finding infringements of Articles 101 and 102<sup>60</sup> pending the outcome of the Article 267 reference from the Irish Supreme Court in the case of *Masterfoods Ltd v HB Ice Cream Ltd*<sup>61</sup>.

The website of the General Court (and of the Court of Justice) is an invaluable source of material where, for example, recent judgments of the Courts, opinions of the Advocates General of the Court of Justice and information about pending cases can be found; statistics on judicial activity; and there is also an Annual Report and a bibliography listing literature on the case law of the EU Courts<sup>62</sup>. The rules of the General Court were amended in December 2000 to provide for the possibility of a ‘fast-track’ or ‘expedited’ procedure for appeals in certain cases<sup>63</sup>; the expedited procedure has been used in several cases under the EUMR<sup>64</sup> and in an appeal against a commitment decision adopted by the Commission under Article 9 of Regulation 1/2003<sup>65</sup>.

#### (iv) Court of Justice<sup>66</sup>

The Court of Justice hears appeals from the General Court on points of law only. The Court of Justice has been strict about what is meant by an appeal on a point of law, and it will not get drawn into factual disputes<sup>67</sup>. The Court also deals with points of law referred to it by national courts under Article 267 TFEU<sup>68</sup>. As mentioned above, the Court’s website contains much useful material. The Court of Justice is assisted by an Advocate General, drawn from a panel of eight, who delivers an opinion on each case that comes before it. Although not binding, this opinion is frequently followed by the Court of Justice, and is often more cogent than the judgment of the Court of Justice itself which may be delphic, particularly where it represents a compromise between the judges (no dissenting judgments are given by the EU Courts). Anyone interested in competition law is strongly recommended to read the opinions of the Advocates General in competition cases, which are frequently of very high quality and contain a large amount of invaluable research material.

<sup>60</sup> *Van den Bergh Foods Ltd* OJ [1998] L 246/1, [1998] 5 CMLR 530, on appeal Case T-65/98 *Van den Bergh Foods v Commission* [2003] ECR II-4653, [2004] 4 CMLR 14; the final Order disposing of this issue was made by the Court of Justice in 2006: Case C-552/03 P, [2006] ECR I-9091, [2006] 5 CMLR 1494.

<sup>61</sup> Case C-344/98 [2000] ECR I-11369, [2001] 4 CMLR 449.

<sup>62</sup> See [www.curia.europa.eu](http://www.curia.europa.eu).

<sup>63</sup> OJ [2000] L 322/4, Article 76(a); the expedited procedure came into force on 1 February 2001.

<sup>64</sup> See ch 21, ‘Appeals against the Commission’s refusal to take jurisdiction’, p 895.

<sup>65</sup> See ch 7, ‘Article 9: practical considerations’, p 258.

<sup>66</sup> See the *Codified version of the Rules of Procedure of the Court of Justice* OJ [2010] C 177/1; on the Court of Justice see *Kerse and Khan* (ch 2, n 55 above), paras 1.55–1.57; Arnulf *The European Union and its Court of Justice* (Oxford EC Law Library, 2nd ed, 2006); Neville Brown and Kennedy *The Court of Justice of the European Communities* (Sweet & Maxwell, 5th ed, 2000); Lasok *The European Court of Justice: Practice and Procedure* (Butterworths, 3rd ed, 2003); Barents ‘The Court of Justice after the Treaty of Lisbon’ (2010) 47 CML Rev 709.

<sup>67</sup> See eg Case C-7/95 P *John Deere v Commission* [1998] ECR I-3111, [1998] 5 CMLR 311, paras 17–22; Case C-551/03 P *General Motors BV v Commission* [2006] ECR I-3173, [2006] 5 CMLR 1, paras 50–51.

<sup>68</sup> On the Article 267 reference procedure see Anderson *References to the European Court* (Sweet & Maxwell, 2nd ed, 2002); *Kerse and Khan* (ch 2, n 55 above) para 1.57; Collins *European Community Law in the United Kingdom* (Butterworths, 5th ed, 2003); Hartley *The Foundations of European Community Law* (Oxford University Press, 7th ed, 2010), ch 9.

The EU Courts are sometimes over-stretched, and there can be considerable delays in some cases<sup>69</sup>. The Court of Justice published a document in May 1999 setting out proposals to deal with some of the problems it experiences<sup>70</sup>. Article 257 TFEU provides that the European Parliament and the Council may establish specialised courts attached to the General Court to deal with specific types of cases. However, in March 2011, the Court of Justice concluded that an increase in the number of judges of the General Court was ‘clearly preferable’ to the establishment of a specialised court<sup>71</sup>. This conclusion chimes with that of the House of Lords European Union Committee<sup>72</sup>.

#### (v) Advisory Committee on Restrictive Practices and Dominant Positions

The Advisory Committee on Restrictive Practices and Dominant Positions consists of officials from the national competition authorities of the Member States<sup>73</sup>. They attend oral hearings, consider draft decisions of the Commission and comment on them<sup>74</sup>; they also discuss draft legislation and the development of policy generally. This Committee also deals with certain matters in the maritime and air transport sectors and in relation to the insurance sector<sup>75</sup>.

#### (vi) Advisory Committee on Concentrations

The Advisory Committee on Concentrations consists of officials from the national competition authorities of the Member States; they attend oral hearings and must be consulted on draft decisions of the Commission under the EUMR<sup>76</sup>.

#### (vii) National courts

National courts are increasingly asked to apply the EU competition rules, which are directly applicable and may be invoked by natural and legal persons (both as defendant and as claimant)<sup>77</sup>. The Commission maintains on its website a database of some of the judgments given by the courts of the Member States on the application of Articles 101 and 102 TFEU in the original language arranged in a chronological order<sup>78</sup>. An Association

<sup>69</sup> See Case C-385/07 *P Duales System Deutschland v Commission* [2009] ECR I-6155, [2009] 5 CMLR 2215, paras 180–195 (competition proceedings before the General Court did not satisfy the principle that cases should be dealt with within a reasonable time).

<sup>70</sup> Press Release 36/99, 28 May 1999; see also the discussion paper of the President of the Court of Justice ‘The Future of the Judicial System of the European Union’ and ‘The EC Court of Justice and the Institutional Reform of the European Union’ (April 2000), both of which can be found at [www.curia.europa.eu](http://www.curia.europa.eu); see Vesterdorf ‘The Community Court System Ten Years from Now and Beyond: Challenges and Possibilities’ (2003) 28 EL Rev 303.

<sup>71</sup> See draft *Amendments to the Statute of the Court of Justice of the European Union and to Annex I thereto* (proposing to increase the number of General Court judges from 27 to 39), available at [www.curia.europa.eu](http://www.curia.europa.eu).

<sup>72</sup> See 14th Report of Session 2010–11 *The Workload of the Court of Justice of the European Union*, HL Paper 128, paras 135–136; see also 15th Report of Session 2006–2007, *An EU Competition Court*, HL Paper 75, recommending against the creation of a specialist competition court, a recommendation with which the UK Government agreed, available at [www.parliament.uk](http://www.parliament.uk).

<sup>73</sup> Provision is made for this Committee by Article 14 of Regulation 1/2003; on this Committee see ch 7, ‘Article 14: Advisory Committee’, p 264.

<sup>74</sup> On consulting the Advisory Committee see Case T-66/01 *Imperial Chemical Industries v Commission* [2010] ECR II-000, paras 163–171.

<sup>75</sup> See Regulation 1/2003, Articles 38, 41 and 42.

<sup>76</sup> See Council Regulation 139/2004, Article 19(3)–(7); on this Committee see ch 21, ‘Close and constant liaison with Member States’, pp 885–886.

<sup>77</sup> On the position of national courts see ch 8 generally.

<sup>78</sup> See [www.ec.europa.eu/competition/elojade/antitrust/nationalcourts/](http://www.ec.europa.eu/competition/elojade/antitrust/nationalcourts/).

of European Competition Law Judges has been established aimed at bringing together members of the judiciary of the Member States<sup>79</sup>.

#### (viii) Parliament and ECOSOC

The European Parliament – in particular its Standing Committee on Economic and Monetary Matters – and the Economic and Social Committee ('ECOSOC'), are consulted on matters of competition policy and may be influential, for example, in the legislative process or in persuading the Commission to take action in relation to a particular issue.

### (C) European Economic Area

On 21 October 1991 what is now the EU and its Member States and the Member States of the European Free Trade Association ('EFTA') signed an Agreement to establish the European Economic Area ('the EEA')<sup>80</sup>; it consists of the Member States of the EU, Norway, Iceland and Liechtenstein. The referendum in Switzerland on joining the EEA led to a 'no' vote, so that that signatory country remains outside. The EEA Agreement entered into force in 1994. It includes rules on competition which follow closely the TFEU and the EUMR. Article 101 on anti-competitive agreements appears as Article 53 of the EEA Agreement; Article 102 on the abuse of a dominant position is mirrored in Article 54; the EUMR is reflected in Article 57; and Article 106 on public undertakings and Article 107 on state aids appear as Articles 59 and 61 of the Agreement respectively.

The EEA Agreement and its associated texts establish a 'twin pillar' approach to jurisdiction: there are two authorities responsible for competition policy, the European Commission and the EFTA Surveillance Authority ('the ESA')<sup>81</sup>, but any particular case will be investigated by only one of them. Article 108 of the EEA Agreement established the ESA; it mirrors the European Commission and is vested with similar powers. The ESA is subject to review by the EFTA Court of Justice<sup>82</sup>, which sits in Luxembourg. Article 55 of the Agreement provides that the European Commission or the ESA shall ensure the application of Articles 53 and 54; Article 56 of the Agreement deals with the attribution of jurisdiction between these two bodies in cases caught by these Articles<sup>83</sup>; Article 57 provides for the division of competence in respect of mergers.

An important principle of the EEA Agreement is that there should be cooperation between the European Commission and the ESA, in order to develop and maintain uniform surveillance throughout the EEA and in order to promote a homogeneous implementation, application and interpretation of the provisions of the Agreement. Article 58

<sup>79</sup> The website of the AECLJ is [www.aeclj.com](http://www.aeclj.com).

<sup>80</sup> OJ [1994] L 1/1; the agreement entered into force on 1 January 1994; see Stragier 'The Competition Rules of the EEA Agreement and Their Implementation' (1993) 14 ECLR 30; Diem 'EEA Competition Law' (1994) 15 ECLR 263; see also Blanchet, Piiponen and Wetman-Clément *The Agreement on the European Economic Area (EEA)* (Clarendon Press, 1999); Forman 'The EEA Agreement Five Years On: Dynamic Homogeneity in Practice and Its Implementation by the Two EEA Courts' (1999) 36 CML Rev 751; Blanco *EC Competition Procedure* (Oxford University Press, 2nd ed, 2006), ch 28; Broberg *The European Commission's Jurisdiction to Scrutinise Mergers* (Kluwer International, 3rd ed, 2006), ch 7.

<sup>81</sup> The website of the ESA is [www.eftasurv.int](http://www.eftasurv.int).

<sup>82</sup> The EFTA States signed an *Agreement on the Establishment of a Surveillance Authority and a Court of Justice* on 2 May 1992: it is reproduced in (1992) 15 Commercial Laws of Europe, Part 10; the Court of Justice delivered two Advisory Opinions on these arrangements: Opinion 1/91 [1991] ECR I-6079, [1992] 1 CMLR 245; and Opinion 1/92 [1992] ECR I-2821, [1992] 2 CMLR 217; the website of the EFTA Court is [www.eftacourt.int](http://www.eftacourt.int).

<sup>83</sup> The division of competences between the European Commission and the ESA was considered in Cases T-67/00 etc *JFE Engineering Corp v Commission* [2004] ECR II-2501, [2005] 4 CMLR 27, paras 482–493.

requires the authorities to cooperate, in accordance with specific provisions contained in Protocol 23 (dealing with restrictive practices and the abuse of market power) and Protocol 24 (dealing with mergers). Similarly Article 106 of the Agreement establishes a system for the exchange of information between the two courts with a view to achieving a uniform interpretation of its terms.

### (D) Modelling of domestic competition law on Articles 101 and 102<sup>84</sup>

The Member States of the EU and the EEA now have systems of competition law modelled to a greater or lesser extent upon Articles 101 and 102<sup>85</sup>. An easy way of accessing the websites, and the national laws, of the national competition authorities is through a hyperlink provided by DG COMP<sup>86</sup>. Another simple way of doing so is through the website of the Global Competition Forum<sup>87</sup>.

The so-called ‘Europe Agreements’ between the EU and the countries of central and eastern Europe were part of the framework for implementation of the accession process towards full membership of the EU. Since the accessions of many of those countries in 2004 and 2006 there are no remaining Europe Agreements<sup>88</sup>. The establishment of the ‘Union for the Mediterranean’ means that countries on the Mediterranean coast from Algeria to Turkey are parties to Euro-Mediterranean Association Agreements containing provisions based on the EU competition rules<sup>89</sup>.

## 3. UK Law

The Competition Act 1998 and the Enterprise Act 2002 fundamentally changed both the substantive provisions and the institutional architecture of the domestic competition law

<sup>84</sup> See generally Gerber *Law and Competition in Twentieth Century Europe: Protecting Prometheus* (Clarendon Press, 1998), ch X; Maher ‘Alignment of Competition Laws in the European Community’ (1996) 16 Oxford Yearbook of European Law 223; *European Competition Laws: A Guide to the EC and its Member States* (Matthew Bender, 2002, ed Fine); Geradin and Henry ‘Competition Law in the new Member States: Where do we come from? Where do we go?’ in *Modernisation and Enlargement: Two Major Challenges for EC Competition Law* (Intersentia, 2005); *A Practical Guide to National Competition Rules Across Europe* (Kluwer, 2nd ed, 2007, eds Holmes and Davey).

<sup>85</sup> For some sceptical comments on the alignment of the domestic competition laws of the Member States see Ullrich ‘Harmonisation within the European Union’ (1996) 17 ECLR 178.

<sup>86</sup> [www.ec.europa.eu/comm/competition/nca/index\\_en.html](http://www.ec.europa.eu/comm/competition/nca/index_en.html).

<sup>87</sup> [www.globalcompetitionforum.org/europe.htm](http://www.globalcompetitionforum.org/europe.htm).

<sup>88</sup> See [www.ec.europa.eu/enlargement/glossary/terms/europe-agreement\\_en.htm](http://www.ec.europa.eu/enlargement/glossary/terms/europe-agreement_en.htm); it is possible in principle for agreements between the EU and third countries to have direct effect: see Case 104/81 *Hauptzollamt Mainz v Kupferberg* [1982] ECR 3641, [1983] 1 CMLR 1; Case C-192/89 *Sevince v Staatssecretaris van Justitie* [1990] ECRI-3461, [1992] 2 CMLR 57 and Wyatt and Dashwood’s *European Union Law*, pp 953–955; however there has yet to be a judgment on whether the competition rules in the Europe Agreements themselves have direct effect; on one occasion the Commission required amendments to Chanel’s distribution agreements to remove restrictions on exports to countries with which the EU had negotiated ‘Free Trade Agreements’, but this was done by agreement and without a reasoned decision on the part of the Commission: *Chanel* OJ [1994] C 334/11, [1995] 4 CMLR 108.

<sup>89</sup> See Communication from the Commission to the European Parliament and the Council *Barcelona Process: Union for the Mediterranean* COM(2008) 319 final, 20 May 2008, available at [www.ec.europa.eu/euromed/index\\_en.htm](http://www.ec.europa.eu/euromed/index_en.htm); Hakura ‘The Extension of EC Competition Law to the Mediterranean Region’ (1998) 19 ECLR 204; Geradin and Petit ‘Competition Policy and the Euro-Mediterranean Partnership’ (2003) 8 European Foreign Affairs Review 153; Geradin *Competition Law and Regional Integration: An Analysis of the Southern Mediterranean Countries* (The World Bank, 2004).

of the UK; in the course of this reform a raft of old legislation<sup>90</sup> was swept away. A further key piece of legislation is the Competition Act 1998 and Other Enactments (Amendment) Regulations 2004<sup>91</sup> which brought UK law into conformity with the principles of Regulation 1/2003. In March 2011 the Government began a consultation exercise considering the case for introducing further changes to various aspects of domestic law and in particular the institutional architecture: it is possible that the Office of Fair Trading ('the OFT') and the Competition Commission ('the CC') will be merged to create a new Competition and Markets Authority<sup>92</sup>. Developments following this consultation will be explained on the Online Resource Centre<sup>93</sup>.

### (A) Competition Act 1998

The Competition Act 1998 received the Royal Assent on 9 November 1998; the main provisions entered into force on 1 March 2000. The Act contains two prohibitions. The so-called 'Chapter I prohibition' is modelled on Article 101 TFEU, and forbids agreements, decisions by associations of undertakings and concerted practices that have as their object or effect the restriction of competition<sup>94</sup>. The Chapter II prohibition in the Competition Act is modelled on Article 102 TFEU and forbids the abuse of a dominant position<sup>95</sup>. The Act gives to the OFT wide powers to obtain information, to carry out on-the-spot investigations, to adopt decisions and to impose penalties on undertakings<sup>96</sup>. In relation to certain sectors such as electronic communications and energy the powers of the OFT are shared concurrently with the relevant regulator, such as the Office of Communications<sup>97</sup>. As 'public authorities' the bodies invested with powers to enforce the Competition Act are obliged under section 6 of the Human Rights Act 1998 (which received the Royal Assent on the same day as the Competition Act) to apply the legislation in a manner that is compatible with the European Convention for the Protection of Human Rights and Fundamental Freedoms of 1950. In competition law the right to a fair trial (Article 6(1) of the Convention), the presumption of innocence (Article 6(2)), the right to respect for private life (Article 8) and the right to peaceful enjoyment of possessions (Article 1 of the First Protocol) are of particular significance<sup>98</sup>. Section 60 of the Competition Act contains provisions designed to maintain consistency between the application of EU and domestic competition law; however this is subject to limitations, in particular with the result that judgments of the EU Courts motivated by single market considerations will not necessarily be followed in the UK<sup>99</sup>.

<sup>90</sup> In particular the competition provisions in the Fair Trading Act 1973, the Restrictive Trade Practices Act 1976, the Resale Prices Act 1976 and the Competition Act 1980; note that section 11 of the Competition Act 1980, which provides for 'efficiency audits' of public-sector bodies, remains in force but has not been used for many years.

<sup>91</sup> SI 2004/1261.

<sup>95</sup> See ch 9, 'The Chapter II Prohibition', pp 353–362.

<sup>96</sup> On the enforcement powers under the 1998 Act see ch 10.

<sup>97</sup> On concurrency see ch 10, 'Concurrency', pp 424–426.

<sup>98</sup> See further ch 10, 'Human Rights Act 1998 and Police and Criminal Evidence Act 1984', pp 400–401.

<sup>99</sup> See ch 9, '“Governing Principles Clause”: Section 60 of the Competition Act 1998', pp 362–367.

## (B) Enterprise Act 2002

The Enterprise Act 2002 received the Royal Assent on 7 November 2002; the main provisions entered into force on 20 June 2003. The Enterprise Act is a major piece of legislation that amends domestic competition law in a number of ways<sup>100</sup>.

First, the Act effected a number of reforms to the institutional architecture of the domestic system. It abolished the office of Director General of Fair Trading<sup>101</sup> and created a new corporate body, the OFT<sup>102</sup>; the OFT has a variety of functions under the Competition Act and the Enterprise Act, including those formerly exercised by the Director General of Fair Trading<sup>103</sup>. The Act conferred on the CC the final decision-making role in relation to merger and market investigations<sup>104</sup>. The Act created the Competition Appeal Tribunal ('the CAT'), that has appellate and judicial review functions<sup>105</sup>. The Act also diminished substantially the powers of the Secretary of State to make decisions in competition law cases<sup>106</sup>.

Secondly, the Act contained new provisions for the investigation of mergers and markets<sup>107</sup>. Thirdly, the Enterprise Act supplemented and reinforced the Competition Act 1998 in various ways, in particular by introducing a new and separate criminal 'cartel offence' which, on indictment, can lead to the imprisonment of individuals for up to five years and/or a fine of an unlimited amount<sup>108</sup>; by providing for company director disqualification for directors who knew or ought to have known of competition law infringements committed by their companies<sup>109</sup>; and by facilitating private competition law actions<sup>110</sup>.

## (C) Changes to domestic law as a result of Regulation 1/2003

The adoption of Regulation 1/2003 required or made desirable a number of changes to the Competition Act 1998. Section 209 of the Enterprise Act 2002, in conjunction with section 2(2) of the European Communities Act 1972, gave the Secretary of State power, by statutory instrument, to make such modifications as may be appropriate for the purpose of eliminating or reducing any differences between the Competition Act and EU competition law. The Competition Act 1998 and Other Enactments (Amendment) Regulations 2004<sup>111</sup> effected a number of changes to the Competition Act and to various other enactments pursuant to Regulation 1/2003; in particular they repealed the provisions in the Competition Act on the notification to the OFT of agreements and/or conduct for guidance and/or a decision. In December 2004 the OFT reissued most of the Competition Act

<sup>100</sup> A summary of the main provisions in the Enterprise Act can be found in an OFT publication *Overview of the Enterprise Act: the competition and consumer provisions* OFT 518, June 2003; it is available on the OFT's website, [www.of.gov.uk](http://www.of.gov.uk); see also Graham 'The Enterprise Act 2002 and Competition Law' (2004) 67 MLR 273.

<sup>101</sup> Enterprise Act 2002, s 2(2). <sup>102</sup> *Ibid*, s 1(1).

<sup>103</sup> *Ibid*, s 2(1); see 'Functions of the OFT', pp 65–66 below.

<sup>104</sup> See further 'Competition Commission', pp 69–72 below and ch 22 (merger investigations) and ch 11 (market investigations).

<sup>105</sup> See further 'Competition Appeal Tribunal', pp 72–74 below; note that, prior to the Enterprise Act, the Competition Act 1998 had created a Competition Commission Appeals Tribunal within the CC: its functions were transferred by the 2002 Act to the CAT.

<sup>106</sup> See further ch 22, 'Public Interest Cases', 'Other Special Cases' and Mergers in the Water Industry', pp 956–961.

<sup>107</sup> See further ch 22 (merger investigations) and ch 11 (market investigations); these provisions replaced the merger and monopoly provisions formerly contained in the Fair Trading Act 1973.

<sup>108</sup> See ch 10, 'Penalties', pp 410–424.

<sup>109</sup> See ch 10, 'Grounds for disqualification', p 435.

<sup>110</sup> See ch 8, 'Damages Actions in the UK Courts', pp 306–319.

<sup>111</sup> SI 2004/1261.

guidelines that had originally been published in 2000 in order to reflect the changes in law and practice flowing from Regulation 1/2003<sup>112</sup>. The OFT's Rules were also amended in 2004<sup>113</sup>; and the exclusion of vertical agreements from the Chapter I prohibition of the Competition Act was repealed in order to bring domestic law into line with EU law<sup>114</sup>.

## (D) Institutions<sup>115</sup>

Competition law in the UK assigns roles to the Secretary of State for Business, Innovation and Skills, the Lord Chancellor, the OFT, the Serious Fraud Office (or, in Scotland, the Lord Advocate), the sectoral regulators, the CC, the CAT and to the civil and criminal courts. The competition authorities are also subject to scrutiny by the National Audit Office and by parliamentary bodies, including the Treasury Committee, the Business Innovations and Skills Committee and the Public Accounts Committee of the House of Commons and the European Union Committee of the House of Lords.

### (i) Secretary of State and the Department for Business, Innovation and Skills

The Secretary of State for Business, Innovation and Skills has various functions under the Competition Act 1998 and the Enterprise Act 2002. In the exercise of these functions he is assisted by a Parliamentary Under-Secretary of State for Employment Relations, Consumer and Postal Affairs whose portfolio includes competition issues. Within the Department for Business, Innovation and Skills there is a Consumer and Competition Policy Directorate. The Department's website provides information and guidance on aspects of competition law and policy, including public consultations<sup>116</sup>.

### (A) Appointments

The Secretary of State for Business, Innovation and Skills makes most of the senior appointments in competition law, for example of the chairman and other members of the Board of the OFT<sup>117</sup>; the members of the CAT<sup>118</sup>; the Registrar of the CAT<sup>119</sup>; the 'appointed members' of the Competition Service within the CAT<sup>120</sup>; the Chairman, Deputy Chairmen and members of the CC<sup>121</sup>; and members of the CC Council<sup>122</sup>. The Secretary of State can also designate bodies which represent consumers to make 'super-complaints' under section 11 of the Enterprise Act 2002<sup>123</sup>.

### (B) Amendment of legislation, the adoption of delegated legislation and the making or approval of guidance

The Secretary of State is given various powers to amend primary legislation, to adopt delegated legislation and to make or approve rules under the Competition Act 1998 and

<sup>112</sup> On the implications of Regulation 1/2003 for UK law see the OFT's guidance *Modernisation* OFT 442, December 2004.

<sup>113</sup> Competition Act 1998 (Office of Fair Trading's Rules) Order 2004, SI 2004/2751.

<sup>114</sup> Competition Act 1998 (Land Agreements Exclusion and Revocation) Order 2004, SI 2004/1260, art 2.

<sup>115</sup> The institutional structure of EU and UK competition law is set out in diagrammatic form at the end of this chapter: see Figs 2.1, 2.2 and 2.3, pp 79–81 below.

<sup>116</sup> The website will be found at [www.bis.gov.uk](http://www.bis.gov.uk).

<sup>117</sup> Enterprise Act 2002, s 1 and Sch 1, para 1.

<sup>118</sup> *Ibid*, s 12(2)(c); note that the President of the Tribunal and the members of the panel of chairmen are appointed by the Lord Chancellor upon the recommendation of the Judicial Appointments Commission: *ibid*, s 12(2)(a) and (b).

<sup>119</sup> *Ibid*, s 12(3). <sup>120</sup> *Ibid*, Sch 3, para 1(2).

<sup>121</sup> *Ibid*, Sch 7, para 3 (Chairman) and para 2 (members). <sup>122</sup> *Ibid*, Sch 7, para 5(2).

<sup>123</sup> *Ibid*, s 11(5); see further ch 11, 'Super-Complaints', pp 454–455.

the Enterprise Act 2002. For example under the Competition Act the Secretary of State has power to amend (and has amended) Schedules 1 and 3<sup>124</sup>; to adopt block exemptions from the Chapter I prohibition<sup>125</sup>; to make provision for the determination of turnover for the purpose of setting the level of penalties<sup>126</sup>; to approve the guidance of the OFT as to the appropriate amount of penalties under the Chapter I and Chapter II prohibitions and Articles 101 and 102 TFEU<sup>127</sup>; to determine the criteria for conferring limited immunity on ‘small agreements’ and ‘conduct of minor significance’<sup>128</sup>; to vary the application of the Competition Act to vertical and land agreements<sup>129</sup>; to approve the procedural rules of the OFT<sup>130</sup>; to make regulations on the concurrent application of the Competition Act by the OFT and the sectoral regulators<sup>131</sup>; and to amend the list of appealable decisions in section 46 of the Act<sup>132</sup>. The Secretary of State also has power under paragraph 7 of Schedule 3 to the Competition Act to order that the Chapter I and Chapter II prohibitions do not apply to particular agreements or conduct where there are exceptional and compelling reasons of public policy for doing so<sup>133</sup>.

Under the Enterprise Act the Secretary of State has power to make rules or to amend primary legislation in relation to a variety of matters: these include the procedural rules of the CAT<sup>134</sup>; the determination of turnover for the purpose of domestic merger control<sup>135</sup>; the maximum penalties that the CC can impose for procedural infringements<sup>136</sup>; the payment of fees for merger investigations<sup>137</sup>; for the alteration of the ‘share of supply’ test applicable to merger cases<sup>138</sup>; and for shortening the period within which merger inquiries should be completed<sup>139</sup>. The Act also enables the Secretary of State to extend the ‘super-complaint’ system to include sectoral regulators<sup>140</sup> and to designate consumer bodies for the purposes of bringing claims under section 47B of the Competition Act<sup>141</sup>; to modify Schedule 8 to the Act, which sets out the provisions that can be contained in enforcement orders<sup>142</sup>; and to make such modifications to the Competition Act 1998 as

<sup>124</sup> Competition Act 1998, s 3(2), s 19(2) (Sch 1, dealing with mergers and concentrations) and s 3(3), s 19(3) (Sch 3, dealing with general exclusions): see ch 9, ‘The Chapter I prohibition: excluded agreements’, pp 348–356 and ‘Exclusions’, p 369 respectively.

<sup>125</sup> Competition Act 1998, ss 6–8: see ch 9, ‘Block Exemptions’, p 359.

<sup>126</sup> *Ibid*, s 36(8): see ch 10, ‘Maximum amount of a penalty’, p 410.

<sup>127</sup> *Ibid*, s 38(4): see ch 10, ‘The OFT’s *Guidance as to the appropriate amount of a penalty*’, p 411.

<sup>128</sup> *Ibid*, s 39 (small agreements) and s 40 (conduct of minor significance): see ch 10, ‘Immunity for small agreements and conduct of minor significance’, pp 413–414.

<sup>129</sup> *Ibid*, s 50: see ch 9, ‘Section 50: land agreements’, p 356 and ch 16, ‘Repeal of the exclusion for vertical agreements’, p 678.

are appropriate for the purpose of eliminating or reducing any differences between that Act and EU law as a result of Regulation 1/2003<sup>143</sup>.

### (C) *Receipt of reports*

The Secretary of State receives Annual Reports from the OFT<sup>144</sup> and from the CC<sup>145</sup>.

### (D) *Involvement in individual cases*

The Secretary of State has little involvement in individual competition cases. Prior to the Enterprise Act 2002 the Secretary of State had an important role in merger and monopoly investigations. However the provisions of the Enterprise Act confer upon the CC the final decision-making role in relation to merger and market investigations<sup>146</sup>. The Secretary of State retains powers in relation to such investigations only in strictly limited circumstances<sup>147</sup>; one such case was *BSkyB/News Corp*<sup>148</sup>.

### (ii) *The Lord Chancellor*

The Lord Chancellor is responsible for appointing the President of the CAT and the panel of chairmen, pursuant to a recommendation from the Judicial Appointments Commission<sup>149</sup>. He is also given power to make provision for civil courts in England and Wales to transfer to the CAT cases based on an infringement decision of the European Commission or of the OFT or sectoral regulators under Articles 101 and/or 102 TFEU or the Chapter I and II prohibitions<sup>150</sup>. There is also provision to make rules for the receipt of cases by the civil courts that are transferred to them by the CAT<sup>151</sup>. As of 20 June 2011 these powers had not been exercised.

### (iii) *The OFT*

#### (A) *Establishment of the OFT*

The OFT is established by section 1 of the Enterprise Act 2002. Section 1 of the Fair Trading Act 1973 had established the office of Director General of Fair Trading, and many of the most important functions in competition law were carried out in the name of the individual appointed by the Secretary of State to this position. Similarly in the regulated sectors individuals, such as the Director General of Telecommunications, were given a wide variety of responsibilities<sup>152</sup>. However there was a growing acceptance that it was not appropriate that such significant powers should be invested in an individual office-holder as opposed to a group of people. The Enterprise Act therefore created the OFT<sup>153</sup>, and abolished the office of Director General of Fair Trading<sup>154</sup>; his functions were transferred to the OFT<sup>155</sup>. The Board of the OFT consists of a (non-executive) Chairman and no fewer than

<sup>143</sup> *Ibid*, s 209; see further ‘Changes to domestic law as a result of Regulation 1/2003’, pp 60–61 above.

<sup>144</sup> *Ibid*, s 4; see ‘Annual plan and annual report’, pp 64–65 below.

<sup>145</sup> Competition Act 1998, Sch 7, para 12A, inserted by Enterprise Act 2002, s 186; see ‘Corporate plan and annual report’, p 70 below.

<sup>146</sup> See ch 22, ‘Determination of references by the CC’, pp 929–931 (merger investigations) and ch 11, ‘Market Investigation References’, pp 466–477 (market investigations).

<sup>147</sup> *Ibid*, explaining ss 42–68, s 132, ss 139–153 and Sch 7 Enterprise Act 2002.

<sup>148</sup> See ch 22, ‘Public interest cases’, pp 956–958.

<sup>149</sup> Enterprise Act 2002, s 12(2)(a) and (b) and Sch 2, para 1; the Judicial Appointments Commission was established by the Constitutional Reform Act 2005; its website is [www.jac.judiciary.gov.uk](http://www.jac.judiciary.gov.uk).

<sup>150</sup> *Ibid*, s 16(1)–(4).

<sup>151</sup> *Ibid*, s 16(5); on s 16 see further ch 8, ‘Which court to see in: the jurisdiction of the High Court and the Competition Appeal Tribunal’, p 307.

<sup>152</sup> See further ‘Sectoral regulators’, pp 68–69 below.

<sup>153</sup> Enterprise Act 2002, s 1(1).

<sup>154</sup> *Ibid*, s 2(2). <sup>155</sup> *Ibid*, s 2(1); the transfer took place on 1 April 2003.

four other members, appointed by the Secretary of State<sup>156</sup>. The Secretary of State must also appoint a Chief Executive of the OFT, who may or may not be a member of the OFT Board<sup>157</sup>; since 2005 the Chief Executive may not be the same person as the Chairman<sup>158</sup>. On 20 June 2011 there were ten members of the Board, of whom four (the Chief Executive and three executive directors) were executive members and six non-executive<sup>159</sup>. The Rules of Procedure of the Board of the OFT are available on its website, and minutes of its meetings will also be found there<sup>160</sup>. The Board is responsible for the strategic direction, priorities, plans and performance of the OFT, including the adoption of the Annual Plan<sup>161</sup>. It also makes the decision whether to make market investigation references to the CC; other operational decisions are delegated by the Board to the executive of the OFT<sup>162</sup>.

Many of the decisions of the OFT under the Competition Act can be appealed on the merits to the CAT<sup>163</sup>. In cases where the OFT's behaviour is not subject to the scrutiny of the CAT it may, nevertheless, be subject to judicial review by the Administrative Court of the Queen's Bench Division of the High Court. Decisions under the Enterprise Act 2002 in relation to mergers and market investigations are subject to review by the CAT<sup>164</sup>.

### **(B) The staff of the OFT**

The Chief Executive of the OFT is responsible for the day-to-day running of the organisation. There are three further Executive Directors who sit on the Board of the OFT, one responsible for Corporate Services and two for Markets and Projects. The General Counsel's office, the office of the Chief Economist and Competition Policy and the Procedural Adjudicator report directly to the Chief Executive. Operational matters such as the investigation of mergers and cases under the Competition Act are handled by staff who work in the Markets and Projects area of the OFT; its project and enforcement work is conducted in two market groupings, one covering goods and consumer and the other services, infrastructure and public markets. There are also specific enforcement teams for mergers and for cartel and criminal investigations<sup>165</sup>. The total number of permanent staff of the OFT in the year 2009–2010 was 597<sup>166</sup>.

### **(C) Annual plan and annual report**

The OFT is required, following a public consultation, to publish an annual plan containing a statement of its main objectives and priorities for the year; both the annual plan and the consultation document must be laid before Parliament<sup>167</sup>. The most recent annual plan was published in March 2011 explaining that the OFT's work will have two overarching themes, the first of which is high-impact enforcement and the second is to make markets work well by changing the behaviour of businesses, consumers and Government<sup>168</sup>. The OFT must also make an annual report to the Secretary of State containing an assessment of the extent to which the objectives and priorities set out in the annual plan have been met and a summary of significant decisions, investigations and other activities in the

<sup>156</sup> Ibid, Sch 1(1).

year<sup>169</sup>. The report must be laid before Parliament and must be published<sup>170</sup>. The report for 2009-10 was published in July 2010<sup>171</sup>.

#### (D) *Functions of the OFT*

The OFT has stated that its mission is to make markets work well for consumers<sup>172</sup>. In order to achieve this end the OFT's activities are to enforce the competition and consumer protection rules, to investigate how well markets are working and to explain and improve public awareness and understanding. The *OFT Prioritisation Principles*<sup>173</sup> are used to decide which projects and cases the OFT will take on across its areas of responsibility. The general functions, as opposed to the enforcement functions, of the OFT include obtaining, compiling and keeping under review information relating to the exercise of its functions; making the public aware of ways in which competition may benefit consumers and the economy; providing information and advice to Ministers<sup>174</sup>; and promoting good consumer practice<sup>175</sup>.

It is important to understand (but often overlooked by competition lawyers) that the OFT is not only a competition authority, but also has numerous consumer protection responsibilities under a variety of legal provisions, including:

- the Consumer Credit Act 1974
- the Estate Agents Act 1979
- the Consumer Protection (Cancellation of Contracts concluded away from Business Premises) Regulations 1987<sup>176</sup>
- the Control of Misleading Advertisements Regulations 1988<sup>177</sup>
- the Consumer Credit (Advertisements) Regulations 1989<sup>178</sup>
- the Package Travel, Package Holidays and Package Tours Regulations 1992<sup>179</sup>
- the Timeshare Regulations 1997<sup>180</sup>
- the Unfair Terms in Consumer Contracts Regulations 1999<sup>181</sup>
- the Consumer Protection (Distance Selling) Regulations 2000<sup>182</sup>
- the Stop Now Orders (EC Directive) Regulations 2001<sup>183</sup>
- the Enterprise Act 2002
- the Consumer Protection Cooperation Regulation<sup>184</sup>
- the Consumer Credit Act 2006
- the Consumers, Estate Agents and Redress Act 2007
- Consumer Protection from Unfair Trading Regulations 2008<sup>185</sup>.

<sup>169</sup> Enterprise Act 2002, s 4(1) and (2). <sup>170</sup> *Ibid*, s 4(3).

<sup>185</sup> SI 2008/1277.

The OFT manages Consumer Direct, a national telephone and online consumer advice scheme<sup>186</sup>; and it also provides a national voice for, and strategic leadership to, local Trading Standards Services. The OFT also has functions under the Money Laundering Regulations 2007<sup>187</sup>. The Regulatory Enforcement and Sanctions Act 2008 provides for the reduction and removal of regulatory burdens and requires the OFT to keep its regulatory functions under review<sup>188</sup>.

The competition and consumer protection functions of the OFT are legally distinct. However in practice they are closely related since they are used collectively by the OFT with the aim of ensuring that markets work well for consumers<sup>189</sup>. As far as competition law is concerned the OFT has considerable powers under the Competition Act 1998: it plays the principal role in enforcing the Chapter I and Chapter II prohibitions, and has significant powers to obtain information, enter premises to conduct investigations, make interim and final decisions and impose financial penalties; it also has the power to enforce Articles 101 and 102 TFEU<sup>190</sup>. The OFT has an important role in relation to merger and market investigations under the Enterprise Act 2002<sup>191</sup>, and works with the Serious Fraud Office in the case of a prosecution for commission of the 'cartel offence' under that Act<sup>192</sup>. The OFT has specific responsibilities in relation to competition as a result of provisions in the Courts and Legal Services Act 1990, the Law Reform (Miscellaneous Provisions) (Scotland) Act 1990, the Water Industry Act 1991, the Financial Services and Markets Act 2000<sup>193</sup>, the Transport Act 2000, the Transport (Scotland) Act 2001, the Legal Services Act 2007 and the Payment Services Regulations 2009<sup>194</sup>. The OFT also has a duty to keep under review undertakings given as a result of investigations conducted under the monopoly and merger provisions of the now-repealed Fair Trading Act 1973<sup>195</sup>. The OFT liaises on competition matters with the European Commission in Brussels and is a member of the European Competition Network that brings together the Commission and the national competition authorities of the Member States pursuant to Regulation 1/2003<sup>196</sup>. The OFT attends meetings on competition policy on behalf of the UK at the Organisation for Economic Co-Operation and Development and the United Nations Conference on Trade and Development, and is an active participant in the International Competition Network<sup>197</sup>.

The OFT has published details of arrangements that have been put in place for cooperation and constructive communication between it and the Co-operation and Competition Panel, established by the Secretary of State for Health, where cases arise involving the provision of healthcare services in England<sup>198</sup>.

<sup>186</sup> The website of Consumer Direct is [www.consumerdirect.gov.uk](http://www.consumerdirect.gov.uk).

<sup>187</sup> SI 2007/2157.

<sup>188</sup> The OFT's regulatory functions consist of its powers to enforce consumer law, to license consumer credit businesses and to supervise anti-money laundering.

<sup>189</sup> See *Joining up Competition and Consumer Policy: The OFT's approach to building an integrated agency* OFT 1151, December 2009, available at [www.offt.gov.uk](http://www.offt.gov.uk); note however that in June the Department for Business, Innovation and Skills began a consultation on institutional changes in relation to the enforcement of consumer law: see [www.bis.gov.uk](http://www.bis.gov.uk) for further information.

<sup>190</sup> See ch 10 generally.

<sup>191</sup> See ch 22, 'The OFT's duty to make references', pp 912–929 (merger investigations) and ch 11, 'Market Investigation References', pp 466–473 (market investigations).

<sup>192</sup> On the cartel offence see ch 10, 'The cartel offence', pp 425–434.

<sup>193</sup> See ch 9, 'Financial Services and Markets Act 2000', pp 351–352.

<sup>194</sup> SI 2009/209, Part 8.

<sup>195</sup> See further ch 11, 'Orders and undertakings under the Fair Trading Act 1973', pp 485–486 and ch 22, 'Enforcement functions of the OFT', pp 948–949.

<sup>196</sup> See ch 7, 'Regulation 1/2003 in Practice', pp 288–290.

<sup>197</sup> On the work of these bodies see ch 12, 'The Internationalisation of Competition Law', pp 506–511.

<sup>198</sup> Details of these arrangements can be found at [www.offt.gov.uk/oft\\_at\\_work/partnership\\_working/CCP/](http://www.offt.gov.uk/oft_at_work/partnership_working/CCP/); see also [www.copanel.org.uk](http://www.copanel.org.uk).

**(E) Rules**

Section 51 of and Schedule 9 to the Competition Act 1998 make provision for the adoption of procedural rules by the OFT, which require the approval of the Secretary of State<sup>199</sup>; the *Competition Act 1998 (Office of Fair Trading's Rules)* were adopted under this provision in 2004<sup>200</sup>.

**(F) Publications, information, guidance etc**

The OFT is required by sections 6 and 7 of the Enterprise Act 2002 to provide information to the public and to Ministers. The OFT has published a statement setting out its approach to improving the transparency of its work<sup>201</sup>. The OFT's website is a vital source of information on UK competition law and policy and includes, among other things, a Public Register of its decisions and the decisions of the sectoral regulators under the Competition Act and the OFT's decisions under the Enterprise Act, the numerous guidelines on these Acts, Press Releases, the Annual Plan and the Annual Report of the OFT, consultations, speeches and articles<sup>202</sup>.

The OFT has published a number of research papers on important issues in competition policy, for example on market definition, barriers to entry and exit and predatory behaviour, which are available on its website. Since the sixth edition of this book was published in 2008 the OFT has published the following 'economic discussion papers' by 20 June 2011:

- *An evaluation of the impact upon productivity of ending resale price maintenance on books*<sup>203</sup>
- *Interactions between competition and consumer policy*<sup>204</sup>
- *The economics of self-regulation in solving consumer quality issues*<sup>205</sup>
- *Road testing of consumer remedies*<sup>206</sup>
- *An assessment of discretionary penalties regimes*<sup>207</sup>
- *Behavioural Economics as Applied to Firms: A Primer*<sup>208</sup>
- *Minority interests in competitors*<sup>209</sup>
- *What does Behavioural Economics mean for Competition Policy?*<sup>210</sup>
- *The impact of price frames on consumer decision making*<sup>211</sup>

The OFT's Economic Discussion Paper Series is available on the OFT website<sup>212</sup>.

The OFT has increasingly sought to carry out an evaluation of its work, both as a matter of external accountability, so that it can attempt to demonstrate that it provides value for money to the taxpayers that pay for it, and as a matter of internal management, in order to test whether it is prioritising its work effectively. The OFT has agreed to a performance target of delivering benefits to consumers worth more than five times the organisation's spending on competition enforcement<sup>213</sup>. In July 2010 the OFT published guidance on the way in which it calculates the direct customer benefits of its work<sup>214</sup>. The OFT has estimated that it saved consumers on average £359 million per year in the years from 2007

<sup>199</sup> Competition Act 1998, s 51(5).

<sup>200</sup> SI 2004/2751, replacing the earlier rules in SI 2000/293.

to 2010 as a result of its work in enforcing the Competition Act, reviewing mergers and taking action under its consumer powers against scams<sup>215</sup>.

The OFT has published guidance explaining how it deals with requests for information under the Freedom of Information Act 2000<sup>216</sup>.

#### (iv) Serious Fraud Office

Section 188 of the Enterprise Act 2002 introduced a criminal cartel offence for individuals responsible for ‘hard-core’ cartels<sup>217</sup>. Serious penalties – of up to five years in prison – can be imposed upon those found guilty of this offence. Prosecutions may be brought by or with the consent of the OFT<sup>218</sup>, or by the Serious Fraud Office<sup>219</sup>, working in close liaison with the OFT<sup>220</sup>. In Scotland the prosecution of the criminal offence is the responsibility of the Lord Advocate. Quite apart from the cartel offence, there are some rare circumstances in which some cartel agreements might be illegal under the common law criminal offence of conspiracy to defraud; the Serious Fraud Office is the prosecutor for this offence as well<sup>221</sup>.

#### (v) Sectoral regulators

Various industries in the UK are subject to specific regulatory control, in particular utilities such as telecommunications and water. Originally the regulatory powers were vested in individuals such as the Director General of Telecommunications. Just as the position of Director General of Fair Trading has been superseded by the creation of an OFT Board, so too the individual regulators have been replaced by corporate boards, each supported by an office: these are the Gas and Electricity Markets Authority (supported by the Office of Gas and Electricity Markets (OFGEM))<sup>222</sup>, the Office of Communications (Ofcom)<sup>223</sup>, the Water Services Regulation Authority (Ofwat)<sup>224</sup>, the Office of Rail Regulation (ORR)<sup>225</sup> and the Northern Ireland Authority for Energy Regulation (NIAER)<sup>226</sup>. These sectoral regulators, together with the Civil Aviation Authority<sup>227</sup>, have concurrent power to enforce the Competition Act 1998, and Articles 101 and 102 TFEU, with the OFT. The Government intends to give Monitor, the regulator for health and social care, competition law functions<sup>228</sup>. Arrangements are in place for coordination of the performance of the concurrent functions under the Act<sup>229</sup>. Appeals against ‘appealable decisions’ of the sectoral regulators under the Competition

<sup>219</sup> The website of the SFO is [www.sfo.gov.uk](http://www.sfo.gov.uk).

<sup>220</sup> Enterprise Act 2002, s 190(1); see ch 10, ‘Prosecution and penalty’, pp 430–431.

<sup>221</sup> See ch 10, ‘Conspiracy to defraud at common law’, pp 436–437.

<sup>222</sup> Utilities Act 2000, s 1.

<sup>223</sup> Office of Communications Act 2002, s 1.

<sup>224</sup> Water Act 2003, s 34.

<sup>225</sup> Railway and Transport Safety Act 2003, s 15.

<sup>226</sup> See the Energy Order 2003, SI 2003/419, art 3.

<sup>227</sup> See Airports Act 1986, s 41, which deals with anti-competitive practices at regulated airports, and Chapter V of the Transport Act 2000, which gives the Civil Aviation Authority (‘the CAA’) concurrent powers to enforce the Chapter I and II prohibitions in relation to air traffic services; the Government proposes to give the CAA concurrent powers to enforce the Chapter I and II prohibitions in relation to airport operator services; further details of these powers can be found at [www.dft.gov.uk](http://www.dft.gov.uk).

<sup>228</sup> See Chapter 2 of Part 3 of the Health and Social Care Bill introduced into Parliament on 19 January 2011.

<sup>229</sup> On concurrency see ch 10, ‘Concurrency’, pp 437–439.

Act lie to the CAT<sup>230</sup>; references in relation to the licensing functions of the sectoral regulators<sup>231</sup> and market investigations may be made to the CC<sup>232</sup>. Super-complaints may be made to the sectoral regulators under the provisions set out in section 11 of the Enterprise Act 2002<sup>233</sup>. The Government published, in March 2011, its proposals to make the sectoral regulators' exercise of their Competition Act powers less burdensome and to improve the practice of concurrency<sup>234</sup>.

The OFT also works closely with the Financial Services Authority ('the FSA') across a range of matters; the OFT and the FSA have published a *Memorandum of Understanding* establishing a framework for cooperation between them<sup>235</sup>.

As a separate matter, all economic regulators should consider whether their decisions might be called into question under Article 106 TFEU on the basis that they might result in infringements of Articles 101 and/or 102<sup>236</sup>.

## (vi) Competition Commission

### (A) *Establishment of the Competition Commission*

The CC is an independent public body which was established by section 45(1) of the Competition Act 1998 and came into existence on 1 April 1999. Section 45(3) of the Act dissolved the Monopolies and Mergers Commission, which had been in existence under various names since 1948, and transferred its functions to the new CC<sup>237</sup>. Schedule 7 to the Competition Act, as amended by Schedule 11 to the Enterprise Act 2002, makes detailed provision in relation to the CC. It has a Chairman and some Deputy Chairmen. The Chairman is appointed on a full-time basis, as may be the Deputy Chairmen.

On 20 June 2011 there were 33 'reporting panel' members of the CC<sup>238</sup>. Members are appointed by the Secretary of State, following an open competition, for a single period of eight years; all members (other than the Chairman and some of the Deputy Chairmen) are part time. They are appointed for their diversity of background, individual experience and ability, not as representatives of particular organisations, interests or political parties. In each case referred to the CC a group will be appointed to conduct the investigation<sup>239</sup>. The Chairman appoints between three to six members to serve on an inquiry group<sup>240</sup>. In 2009/10 most of the investigations completed were conducted by groups of four<sup>241</sup>.

<sup>230</sup> On the meaning of appealable decisions see ch 10, 'Appealable decisions', pp 440–443.

<sup>231</sup> On licence modification references see ch 23, 'Regulatory systems in the UK for utilities', pp 978–979.

<sup>232</sup> Enterprise Act 2002, Sch 9, Part 2.

<sup>233</sup> The Enterprise Act 2002 (Super-complaints to Regulators) Order 2003, SI 2003/1368; on super-complaints, see ch 11, 'Super-Complaints', pp 454–455.

<sup>234</sup> *A Competition Regime for Growth: A Consultation on Options for Reform*, March 2011, ch 7, available at [www.bis.gov.uk](http://www.bis.gov.uk); see also National Audit Office Report, *Review of the UK's Competition Landscape*, March 2010, available at [www.nao.org.uk](http://www.nao.org.uk).

<sup>235</sup> December 2009; see also the OFT's *Financial Services Plan* OFT 1106, July 2009, both available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>236</sup> See ch 6 generally, and in particular the reference at 'Introduction', p 215 to a decision of the UK National Lottery Commission not to authorise Camelot, the operator of the National Lottery, to provide 'ancillary services', available at [www.natlotcomm.gov.uk](http://www.natlotcomm.gov.uk).

<sup>237</sup> For an account of the work of the Monopolies and Mergers Commission in the 50 years from 1948 to 1998 see Wilks *In the Public Interest: Competition Policy and the Monopolies and Mergers Commission* (Manchester University Press, 1999).

<sup>238</sup> See the CC's *Annual Report and Accounts 2009/2010*, p 49.

<sup>239</sup> Provision is made for this by the Competition Act 1998, Sch 7, Part II, as amended by the Enterprise Act 2002, Sch 11, paras 10–12.

<sup>240</sup> Competition Act 1998, Sch 7, para 15(2).

<sup>241</sup> Details of the groups will be found in the short discussions of each investigation in the CC's *Annual Report and Accounts*.

There is a utilities panel from which the Chairman must appoint at least one member when conducting an investigation concerned with the regulation of the water, electricity or gas sectors or an energy code modification appeal. There is also a newspaper panel and a Communications Act panel. The Chairman of the CC has published *Guidance to Groups* on the procedures to be adopted when conducting inquiries<sup>242</sup>: the *Guidance* must be read in conjunction with the *Competition Commission Rules of Procedure*<sup>243</sup>.

The CC has a Council through which some of its functions, such as the appointment of staff and the keeping of accounts, must be performed; the Council consists of the Chairman, the Deputy Chairmen, such other members as the Secretary of State may appoint<sup>244</sup> and the Chief Executive (referred to in the legislation as the Secretary) of the CC<sup>245</sup>. Management of the CC and its policy development are taken forward through five key groups: the Senior Management Team, an Analysis Group, a Procedures and Practices Group, a Remedies Standing Group and a Finance and Regulation Group; each of the groups reports to the Council.

The CC is subject to review by the CAT under provisions contained in the Enterprise Act 2002<sup>246</sup>; it is also subject to judicial review by the Administrative Court of the Queen's Bench Division of the High Court.

### **(B) The staff of the CC**

The most senior member of staff of the CC is the chief executive, referred to in the legislation as the Secretary, who is a member of the CC Council. At the end of March 2010 the CC had a permanent staff of 122 officials, including administrators and specialists such as accountants, economists, business advisers and lawyers<sup>247</sup>.

### **(C) Business plan and annual report**

The CC publishes its Business Plan on its website; it is required to make an Annual Report to the Secretary of State<sup>248</sup>.

### **(D) Functions of the CC**

The CC has no power to conduct investigations on its own initiative. Rather it conducts market investigations under the Enterprise Act 2002 referred to it by either the OFT, one of the sectoral regulators or the Secretary of State and merger inquiries referred to it by the OFT or the Secretary of State. The CC can be asked to conduct 'efficiency audits' of public sector bodies under the Competition Act 1980: this provision has not been used for many years<sup>249</sup>.

The CC has various regulatory functions in relation to privatised utilities as a result of provisions in:

- the Airports Act 1986 and the Airports (Northern Ireland) Order 1994
- the Gas Act 1986 and the Gas (Northern Ireland) Order 1996
- the Electricity Act 1989 and the Electricity (Northern Ireland) Order 1992

<sup>242</sup> CC6, March 2006, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>243</sup> CCI, March 2006.

<sup>244</sup> At 20 June 2011 the Council had three non-executive members.

<sup>245</sup> Competition Act 1998, Sch 7, para 5(3), as amended by Enterprise Act 2002, Sch 11, para 4 and Sch 26.

<sup>246</sup> See further 'Functions of the CAT', pp 72–73 below and ch 11, 'Review of decisions under Part 4 of the Enterprise Act', pp 478–479 (market investigations) and ch 22, 'Review of decisions under Part 3 of the Enterprise Act', pp 950–951 (merger investigations) respectively.

<sup>247</sup> See the *CC's Annual Report and Accounts 2009–10*, p 52.

<sup>248</sup> Competition Act 1998, Sch 7, para 12A, inserted by the Enterprise Act 2002, s 186.

<sup>249</sup> On efficiency audits see *Halsbury's Laws of England*, Vol 47, (4th ed reissue, 2001), paras 143–145.

- the Water Industry Act 1991 and the Water Services (Scotland) Act 2005 (Consequential Provisions and Modifications) Order 2005 and the Water and Sewerage Services (Northern Ireland) Order 2006
- the Railways Act 1993
- the Postal Services Act 2000
- the Transport Act 2000.

The CC has seldom been called upon to exercise these regulatory functions<sup>250</sup>. The CC has a role under the Financial Services and Markets Act 2000 to ensure that the rules and practices of the FSA do not impede competition. It also has a role under the Legal Services Act 2007 in relation to possible distortions on competition arising from regulatory rules applicable to the legal profession. The CC has an appellate function in relation to price control matters under the Communications Act 2003<sup>251</sup>. The CC also hears appeals in respect of modifications to the codes covering the energy industry by virtue of sections 173 to 177 of the Energy Act 2004<sup>252</sup>.

The CC is not a designated competition authority for the purposes of Article 35 of Regulation 1/2003, with the result that it does not have the power to enforce Articles 101 and 102 TFEU<sup>253</sup>. The CC participates in the activities of the OECD, the United Nations Conference on Trade and Development ('UNCTAD') and the International Competition Network ('ICN').

### (E) Rules

Schedule 7A to the Competition Act, inserted by Schedule 12 to the Enterprise Act 2002, makes provision for the adoption of procedural rules for the conduct of merger and market references by the CC. The current *Competition Commission Rules of Procedure* were adopted in March 2006 and are available on its website<sup>254</sup>. The CC has also published a series of guidance documents describing its approach to, and procedures for, merger and market investigations<sup>255</sup> and on several other matters, including *General Advice and Information*<sup>256</sup>, a *Statement of Policy on Penalties*<sup>257</sup> and *Guidance on Disclosure of Information in Merger and Market Inquiries*<sup>258</sup>.

### (F) Publications, information, guidance etc

The CC has a website that contains a wide variety of information, for example on current inquiries, completed inquiries, press releases, evaluation reports and occasional papers, speeches, texts from the CC's lectures series, the *Annual Report and Accounts*,

<sup>250</sup> In 2007 the CC carried out the mandatory quinquennial review of airport charges; in August 2009 it rejected an appeal by Sutton and East Surrey Water plc against the price limits imposed on it by OFWAT, but an appeal by Bristol Water was partially successful in 2010. The CC's determinations are available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

See the *Annual Report and Accounts 2006–2007*, p 6.

<sup>251</sup> See *Price control appeals under section 193 of the Communications Act 2003*, CC13, April 2011, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>252</sup> As amended by the Electricity and Gas Appeals (Designation and Exclusion) Order 2009 SI 2009/648; see further the *Energy Modification Rules*, CC10, July 2005, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>253</sup> See reg 3 of the Competition Act 1998 and Other Enactments (Amendment) Regulations 2004, SI 2004/1261 which designates the OFT and the sectoral regulators for this purpose.

<sup>254</sup> CC1, March 2006, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>255</sup> *Merger Assessment Guidelines* CC2 (Revised), September 2010 (jointly with the OFT) and *Market Investigation References* CC3, June 2003.

<sup>256</sup> CC4, March 2004.

<sup>257</sup> CC5, June 2003.

<sup>258</sup> CC7, July 2003.

the Business Plan and the way in which the CC is organised<sup>259</sup>. The CC has estimated that customers would have paid an extra £424 million for goods and services but for the decisions it took during the period from 1 April 2009 to 31 March 2010<sup>260</sup>.

## (vii) Competition Appeal Tribunal

### (A) *Establishment of the CAT*

The CAT is established by section 12(1) of the Enterprise Act 2002<sup>261</sup>. It consists of a President<sup>262</sup>, a panel of Chairmen appointed by the Lord Chancellor following a recommendation from the Judicial Appointments Commission<sup>263</sup> (the judges of the Chancery Division of the High Court have been appointed to this panel) and a panel of ordinary members appointed by the Secretary of State<sup>264</sup>. Cases are heard by a Tribunal of three persons, chaired by the President or one person from the panel of Chairmen. Procedural matters can be dealt with either by the President or by one of the Chairmen sitting alone. The CAT has a Registrar, also appointed by the Secretary of State<sup>265</sup>. Schedule 2 to the Enterprise Act contains provisions on such matters as eligibility for appointment as President or chairman of the Tribunal. Section 14 of the Act and Part I of Schedule 4 deal with the constitution of the Tribunal. Section 13 and Schedule 3 establish the Competition Service, the purpose of which is to fund and provide support services to the Tribunal<sup>266</sup>. The CAT's website provides details of decided and pending cases, and all of its judgments will be found there<sup>267</sup>. The CAT may sit outside London<sup>268</sup>. The CAT publishes an Annual Review and Accounts<sup>269</sup>. On 20 June 2011 the CAT had a staff of 13, including the Registrar and three referendaires. The CAT has established a User Group, which meets twice a year, to discuss its practical operation<sup>270</sup>.

### (B) *Functions of the CAT*

The CAT, which is an independent judicial body, has four functions under the Enterprise Act<sup>271</sup>; it also has some functions in relation to regulatory matters (see below). The first function under the Enterprise Act is to hear appeals from 'appealable decisions' of the OFT and the sectoral regulators under the Competition Act 1998 and Articles 101 and 102 TFEU<sup>272</sup>. Appeals on a point of law or as to the amount of a penalty lie from decisions of the

<sup>259</sup> The website of the CC is [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>260</sup> See *Estimated benefits to consumers from the CC's actions in mergers and market investigations between April 2009 and March 2010*, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>261</sup> The Competition Act 1998 had established, within the CC, appeal tribunals which could hear appeals under that Act; these tribunals have been abolished, and the Competition Appeal Tribunal inherited their functions on 1 April 2003; s 21 of and Sch 5 to the Enterprise Act amend various provisions of the Competition Act 1998 in relation to proceedings of the Tribunal.

<sup>262</sup> Enterprise Act 2002, s 12(2)(a).

<sup>263</sup> *Ibid*, s 12(2)(b).

<sup>264</sup> *Ibid*, s 12(2)(c).

<sup>265</sup> *Ibid*, s 12(3).

<sup>266</sup> *Ibid*, s 13(2).

<sup>267</sup> The website of the CAT is [www.catribunal.org.uk](http://www.catribunal.org.uk).

<sup>268</sup> See the Competition Appeal Tribunal Rules 2003, SI 2003/1372, rule 18; the CAT has sat in Belfast, in the *BetterCare* case and in Edinburgh in the *Aberdeen Journals* and *Claymore* cases: for details of these cases see the CAT's website.

<sup>269</sup> Available at [www.catribunal.org.uk](http://www.catribunal.org.uk).

<sup>270</sup> The most recent minutes of the User Group meetings are available at [www.catribunal.org.uk](http://www.catribunal.org.uk).

<sup>271</sup> See Bailey 'The early case law of the Competition Appeal Tribunal' in Rodger (ed) *Ten Years of UK Competition Law Reform* (Dundee University Press, 2010), ch 2.

<sup>272</sup> On appealable decisions see ch 10, 'Appealable decisions', pp 440–443; it is also possible that an application for judicial review of the OFT and sectoral regulators may be brought before the Administrative Court: ch 10, 'Appealable decisions', p 440.

CAT with permission to the Court of Appeal in England and Wales, to the Court of Session in Scotland and to the Court of Appeal of Northern Ireland in Northern Ireland<sup>273</sup>. From the Court of Appeal a further appeal may be taken, with permission, to the Supreme Court (formerly the House of Lords). It is also possible for the CAT to refer a matter of EU law to the Court of Justice<sup>274</sup>. The second function of the CAT is to hear monetary claims arising from infringement decisions made by the UK competition authorities or the European Commission under the Competition Act or the TFEU<sup>275</sup>. The third function is to deal with applications for review of decisions of the OFT, the Secretary of State or other Minister or the CC in relation to mergers<sup>276</sup> and market investigations<sup>277</sup>. The fourth function of the CAT under the Enterprise Act is to hear appeals against penalties imposed by the CC for failure to comply with notices requiring the attendance of witnesses or the production of documents in the course of a market or merger investigation<sup>278</sup>.

The Communications Act 2003 provides that the CAT will hear appeals on the merits against certain decisions taken by OFCOM or the Secretary of State (as the case may be) under its provisions; the CAT must refer price control matters to the CC and decide the appeal on those matters in accordance with the CC's determination, unless it decides that the determination would be set aside on an application for judicial review<sup>279</sup>. The CAT has also been given certain functions under the Electricity (Single Wholesale Market)(Northern Ireland) Order 2007<sup>280</sup>, the Mobile Roaming (European Communities) Regulations 2007<sup>281</sup>, Schedule 2A to the Electricity Act 1989 in relation to determinations by OFGEM in respect of property schemes, and the Payment Services Regulations 2009<sup>282</sup>.

Provision is made by section 16 of the Enterprise Act 2002 for the Lord Chancellor to adopt regulations enabling the transfer of cases between the civil courts and the CAT for it to determine whether there has been an infringement of Articles 101 and/or 102 TFEU or of the Chapter I and II prohibitions in the Competition Act. These provisions had not been activated as at 20 June 2011.

### (C) Rules

Section 15 of the Enterprise Act 2002 and Part 2 of Schedule 4 provide for the Secretary of State to make rules with respect to proceedings before the CAT. The Competition Appeal Tribunal Rules 2003<sup>283</sup> entered into force in June 2003. The 2003 rules have been amended by the Competition Appeal Tribunal (Amendment and Communications Act Appeals) Rules 2004<sup>284</sup>. Following an Introduction in Part I, Part II of the 2003 Rules deals with appeals to the CAT respectively under the Competition Act and Communications Act<sup>285</sup>;

<sup>273</sup> Competition Act 1998, s 49: see the Competition Appeal Tribunal Rules 2003, SI 2003/1372, rules 58 and 59 and ch 10, 'Appeals from the CAT to the Court of Appeal', p 449.

<sup>274</sup> See The Competition Appeal Tribunal Rules 2003, SI 2003/1372, rule 60 and ch 10, 'Which courts or tribunals in the UK can make an Article 267 reference in a case under the Competition Act 1998?', p 450; the CAT was asked to make a reference but declined to do so in Case No 1100/3/3/08 *The Number (UK) Ltd v OFCOM* [2008] CAT 33, paras 159–173; the Court of Appeal subsequently made a reference for a preliminary ruling, [2009] EWCA Civ 1360 which the Court of Justice gave on 17 February 2011 in Case C-16/10 *The Number (UK) and Conduit Enterprises* [2011] ECR I-000.

<sup>275</sup> See ch 8, 'Follow-on actions in the CAT and the High Court', pp 317–319.

<sup>276</sup> Enterprise Act 2002, s 120: see ch 22, 'Review of decisions under Part 3 of the Enterprise Act', pp 950–951.

<sup>277</sup> Enterprise Act 2002, s 179: see ch 11, 'Review of decisions under Part 4 of the Enterprise Act', pp 478–479.

<sup>278</sup> See further ch 11, 'Powers of investigation', p 477 and ch 22, 'Investigation powers and penalties', p 949.

<sup>279</sup> Communications Act 2003, s 193 and rule 3 of the Competition Appeal Tribunal (Amendment and Communications Act Appeals) Rules 2004, SI 2004/2068; see Case No 1146/3/3/09 *British Telecommunications Plc v OFCOM* [2010] CAT 15, paras 9–53.

<sup>280</sup> SI 2007/913.

<sup>281</sup> SI 2007/1933.

<sup>282</sup> SI 209/2009.

<sup>283</sup> SI 2003/1372.

<sup>284</sup> SI 2004/2068.

<sup>285</sup> On appeals under the Competition Act see ch 10, 'Appeals', pp 439–449.

Part III is concerned with proceedings under the Enterprise Act, that is appeals against penalties in merger and market investigations<sup>286</sup> and reviews of merger and market investigation references<sup>287</sup>. Part IV of the Rules deals with claims for damages under section 47A and 47B of the Competition Act<sup>288</sup>, and Part V contains provisions on matters such as hearings, confidentiality, decisions of the CAT, appeals to the Court of Appeal and Article 267 references to the Court of Justice<sup>289</sup>. The CAT published a *Guide to Proceedings* in October 2005 which provides guidance for parties and their legal representatives as to its procedures in relation to all cases which it is competent to entertain and which has the status of a Practice Direction under Rule 68(2) of the 2003 Rules. Dissenting judgments are possible: this had happened on three occasions by 20 June 2011<sup>290</sup>.

### (viii) Civil courts

Where a warrant is required to enter premises under section 28, section 28A or section 62A of the Competition Act 1998, this must be obtained from a judge of the High Court<sup>291</sup>. The High Court may also issue warrants to enter premises in relation to investigations under the EU competition rules<sup>292</sup>.

Actions may be brought in the High Court where there are infringements of Articles 101 and 102 TFEU or the Chapter I and II prohibitions<sup>293</sup>; such actions are usually brought in the Chancery Division, but sometimes may be dealt with by the Commercial Court<sup>294</sup>. Where the OFT or the CAT has already found such an infringement its decisions are binding in proceedings before the ordinary courts<sup>295</sup>. As noted above, the Enterprise Act makes provision for the Lord Chancellor to adopt regulations for the transfer of cases to and from the CAT<sup>296</sup>.

### (ix) Criminal courts

The Competition Act 1998 and the Enterprise Act 2002 create a number of criminal offences. Most notably, the Enterprise Act establishes the ‘cartel offence’, the commission of which could attract a prison sentence of up to five years as well as a fine<sup>297</sup>. The cartel offence is described in detail in chapter 10<sup>298</sup>, as is the possibility that some cartel behaviour may, in exceptional circumstances, be criminal at common law as a conspiracy to defraud<sup>299</sup>. Under the Competition Act various criminal offences may also be committed

<sup>286</sup> See ch 11, ‘Powers of investigation’, p 477 and ch 22, ‘Investigation powers and penalties’, p 949.

<sup>287</sup> See ch 22, ‘Review of decisions under Part 3 of the Enterprise Act’, pp 937–938 (mergers) and ch 11, ‘Review of decisions under Part 4 of the Enterprise Act’, pp 478–479 (market investigations).

<sup>288</sup> See ch 8, ‘Follow-on actions in the CAT and the High Court’, pp 317–319.

<sup>289</sup> On Article 267 references see ch 10, ‘Article 267 References’, pp 449–450.

<sup>291</sup> Competition Act 1998, s 28(1) and s 59; in Scotland the relevant court is the Court of Session: *ibid*.

<sup>292</sup> *Ibid*, ss 62 and 63.

<sup>293</sup> On the enforcement of Articles 101 and 102 TFEU and the Competition Act in the civil courts see ch 8 generally.

<sup>294</sup> *Practice Direction – Competition Law – Claims Relating to the Application of Articles [101 and 102 TFEU] and Chapters I and II of Part I of the Competition Act 1998*, available at [www.justice.gov.uk](http://www.justice.gov.uk).

<sup>295</sup> Competition Act 1998, s 58A; the ordinary courts are also bound by findings of fact made by the OFT in the course of its investigation, unless the court directs otherwise: *ibid*, s 58.

<sup>296</sup> Claims which may be made under sections 47A and 47B of the Competition Act may be transferred between the civil courts and the CAT: see rules 48 and 49 of the Competition Appeal Tribunal Rules 2003, SI 2003/1372, and CPR Part 30 Practice Direction, 30PD.8, available at [www.justice.gov.uk](http://www.justice.gov.uk).

<sup>297</sup> Enterprise Act 2002, s 190.

<sup>298</sup> See ch 10, ‘The cartel offence’, pp 425–434.

<sup>299</sup> See ch 10, ‘Conspiracy to defraud at common law’, p 436.

where investigations are obstructed, documents are destroyed or falsified or where false or misleading information is provided<sup>300</sup>. It is also a criminal offence to obstruct investigations conducted under the EU competition rules<sup>301</sup>.

## 4. The Relationship Between EU Competition Law and National Competition Laws

### (A) Introduction

All the Member States of the EU have systems of competition law, in large part modelled upon Articles 101 and 102. Some Member States require that domestic law should be interpreted consistently with the EU rules, thereby reinforcing the alignment of EU and domestic law<sup>302</sup>. It follows that many cases will have the same outcome whether they are investigated under EU or under domestic law: for example, a horizontal price-fixing agreement would infringe Article 101(1), and would normally also be caught by any domestic system of competition law in the EU unless, for example, it occurred in a sector which was not subject to the domestic rules. Even though there is a high degree of convergence between EU and domestic competition law, nevertheless the possibility remains that there could be different outcomes depending on which system of law is applied. In some cases domestic law may be more generous than EU law; in other cases the possibility exists that domestic law could have a stricter effect than EU law.

Much thought has gone into the issue of conflicts between EU and domestic competition law over the years<sup>303</sup>. The starting point is that EU law takes precedence over national law, so that where a clash occurs it is the former which must be applied<sup>304</sup>: in *Walt Wilhelm v Bundeskartellamt*<sup>305</sup> the Court of Justice held that conflicts between the rules of the EU and national rules on cartels must be resolved by applying the principle that EU law takes precedence. However the *Walt Wilhelm* judgment did not provide answers to all the situations that could arise: for example, could a Member State prohibit an agreement which benefited from an EU block exemption<sup>306</sup>? These matters are now dealt with by Article 3 of Regulation 1/2003.

<sup>300</sup> Competition Act 1998, ss 42–44, ss 65L–65N and s 72: see ch 10, ‘Offences’, pp 401–402.

<sup>301</sup> Competition Act 1998, s 65.

<sup>302</sup> Section 60 of the Competition Act 1998 is an example of this in the UK: see ch 9, ‘Governing Principles Clause’: Section 60 of the Competition Act 1998’, pp 362–367.

<sup>304</sup> See Case 6/64 *Costa v ENEL* [1964] ECR 585, [1964] CMLR 425; Case 106/77 *Amministrazione delle Finanze dello Stato v Simmenthal* [1978] ECR 629, [1978] 3 CMLR 263; Case C-213/89 *R v Secretary of State for Transport, ex p Factortame Ltd (No 2)* [1991] 1 AC 603, [1990] 3 CMLR 1; Case C-221/89 *R v Secretary of State for Transport, ex p Factortame Ltd (No 3)* [1991] ECR I-3905, [1991] 3 CMLR 589; note also that NCAs have an obligation to disapply national law that involves an infringement of EU competition law: Case C-198/01 *Conorzio Industrie Fiammiferi* [2003] ECR I-8055, [2003] 5 CMLR 829.

<sup>305</sup> Case 14/68 [1969] ECR 1, [1969] CMLR 100.

<sup>306</sup> The Court of Justice declined to give an answer to this question in Case C-70/93 *Bayerische Motoren Werke AG v ALD Auto-Leasing* [1995] ECR I-3439, [1996] 4 CMLR 478 and Case C-266/93 *Bundeskartellamt v Volkswagen ACT and VAG Leasing GmbH* [1995] ECR I-3477, [1996] 4 CMLR 478, since it concluded that

**(B) Regulation 1/2003**<sup>307</sup>

Under the regime introduced by Regulation 1/2003<sup>308</sup> the Commission shares the competence to apply Articles 101 and 102 with national competition authorities ('NCAs') and national courts; of course NCAs and national courts can also apply domestic law. Member States are required by Article 35 of the Regulation to designate the authorities responsible for the application of Articles 101 and 102<sup>309</sup>; in the UK the OFT and the sectoral regulators have been designated as NCAs<sup>310</sup>. Recitals 8 and 9 and Article 3 of the Regulation deal with the relationship between Articles 101 and 102 and national competition laws.

**(i) Obligation to apply Articles 101 and 102**

Recital 8 states that, in order to ensure the effective enforcement of EU competition law, it is necessary to oblige NCAs and national courts, where they apply national competition law to agreements or practices, to also apply Article 101 or 102 where those provisions are applicable. Article 3(1) therefore provides that, where NCAs or national courts apply national competition law to agreements, decisions by associations of undertakings or concerted practices that may affect trade between Member States, they shall also apply Article 101; similarly they must apply Article 102 to any behaviour prohibited by that provision<sup>311</sup>. In its *Report on the functioning of Regulation 1/2003*<sup>312</sup> the Commission reported that Article 3(1) had led to a very significant increase in the application of Articles 101 and 102, 'making a single legal standard a reality on a very large scale'<sup>313</sup>.

It is the concept of 'trade between Member States' that triggers the obligation to apply Articles 101 and 102, which is why the Commission published guidance on it in 2004<sup>314</sup>. The OFT's view is that the prosecution of *individuals* for commission of the cartel offence contained in section 188 of the Enterprise Act 2002 does *not* trigger the obligation to apply Article 101, since Article 101 is aimed at the anti-competitive agreements of *undertakings* rather than individuals<sup>315</sup>. The Court of Appeal concurred with this view, albeit on different grounds. In *IB v The Queen* the Court held that the cartel offence is not a 'national competition law' in the sense of Article 3 of Regulation 1/2003 and rejected the argument that the Crown Court, which is not a designated competition authority for the purposes of

the agreements under consideration in those cases were not covered by the block exemption for motor car distribution in force at that time.

that Regulation, did not have jurisdiction to try an indictment alleging the cartel offence<sup>316</sup>. The Court added that, even if the cartel offence were part of national competition law, it is a part of it which is not concerned with directly applying Article 101<sup>317</sup>. The position is not free from doubt, however<sup>318</sup>. In practice the reality is that the OFT, when proceeding against individuals under the Enterprise Act, would probably also conduct an investigation against the undertakings involved in the cartel under domestic and/or EU law<sup>319</sup>; whether it would be doing so as a result of an obligation arising from Article 3(1) may be a merely academic question.

In certain circumstances the use by sectoral regulators of their sector-specific regulatory powers might amount to the application of national competition law, with the consequence that the obligation to apply Articles 101 and 102 TFEU would arise in the event that the agreement or behaviour in question had an effect on trade between Member States<sup>320</sup>.

### (ii) Conflicts: Article 101

Recital 8 of Regulation 1/2003 states that it is necessary to create a 'level playing field' for agreements within the internal market. What this means is that, if an agreement is not prohibited under EU competition law, it should not be possible for an NCA or national court to apply stricter national competition law to it; this may be termed a 'convergence rule'<sup>321</sup>. Article 3(2) therefore provides that the application of national competition law may not lead to the prohibition of agreements, decisions by associations of undertakings or concerted practices which may affect trade between Member States but which do not restrict competition within the meaning of Article 101(1) or which fulfil the conditions of Article 101(3) or which are covered by a block exemption. There appear to have been no major difficulties with the application of the convergence rule between 2004 and 2009<sup>322</sup>. In terms of UK law it follows that, in so far as agreements affect trade between Member States but do not infringe Article 101(1) or do satisfy the criteria set out in Article 101(3), it would not be possible to take action against them under the market investigation provisions of the Enterprise Act 2002<sup>323</sup>.

### (iii) Conflicts: Article 102

The position in relation to Article 102 is different, since Regulation 1/2003 does not demand convergence in relation to unilateral behaviour. Recital 8 of the Regulation states that Member States should not be precluded from adopting and applying on their territory stricter national competition laws which prohibit or impose sanctions on unilateral conduct. Article 3(2) therefore makes provision to this effect. An example of a stricter national law on unilateral behaviour would be one that is intended to protect economically

<sup>320</sup> *Ibid*, paras 4.28–4.30.

<sup>321</sup> See the European Commission's *Guidelines on the application of Article [101(3) TFEU]* OJ [2004] C 101/8, para 14; *Faull and Nikpay*, para 2.30.

<sup>322</sup> See Commission Staff Working Paper accompanying the Report on the functioning of Regulation 1/2003, COM(2009) 206 final, para 159.

<sup>323</sup> See further ch 11, 'Relationship with Regulation 1/2003', pp 469–470.

dependent undertakings: several Member States have laws to this effect<sup>324</sup>. In terms of UK law it follows from Article 3(2) that it would be possible to take action under the market investigation provisions of the Enterprise Act 2002 against unilateral behaviour, such as refusal to supply or the imposition of unfair prices or other trading conditions, to stricter effect than the position under Article 102<sup>325</sup>. In so far as legislation such as the UK Gas Act 1986, the Electricity Act 1989 or the Communications Act 2003 provides for the imposition of *ex ante* regulatory controls on the unilateral behaviour of regulated undertakings, and in so far as those controls could be regarded as provisions of competition law, Article 3(2) would allow them to be applied to achieve a stricter outcome than under Article 102. In the event that they were intended to protect some other legitimate interest than the protection of competition they could be applied by virtue of Article 3(3) (below).

In its *Report on the functioning of Regulation 1/2003*<sup>326</sup> the Commission noted that the business and legal communities had criticised the divergence of legal standards on unilateral conduct across the Member States. The Commission considers that the exclusion of unilateral conduct from the scope of the convergence rule is a matter which warrants further reflection.

#### (iv) Protection of 'other legitimate interests'

Recital 9 of Regulation 1/2003 states that its provisions should not preclude Member States from applying national legislation that protects legitimate interests other than the protection of competition on the market, provided that such legislation is compatible with the general principles and other provisions of EU law<sup>327</sup>. Article 3(3) therefore provides that the Regulation does not preclude the application of provisions of national law that 'predominantly pursue an objective different from that pursued by Articles [101 and 102 TFEU]'. Recital 9 of the Regulation says that Articles 101 and 102 have as their objective 'the protection of competition on the market', which provides a benchmark against which to measure whether a particular national provision pursues an objective different from the EU competition rules. The recital specifically says that a Member State could apply legislation intended to combat unfair trading practices, for example a law that prevents the imposition on customers of terms and conditions that are unjustified, disproportionate or without consideration.

There may be situations in which it will be unclear whether a particular national provision is predominantly concerned with matters other than the protection of competition. Certain regulatory rules – for example requiring the provision of a universal service or the protection of vulnerable consumers – clearly pursue objectives other than the protection of competition and so could be applied by virtue of Article 3(3)<sup>328</sup>. Consumer laws which provide protection against, for example, unfair contract terms, misleading advertising or sharp selling practices would also seem to pursue a predominantly different objective from

<sup>324</sup> The Commission Staff Working Paper accompanying the Report on the functioning of Regulation 1/2003 SEC(2009) 574 final, paras 162–169 provides examples of national rules concerning economic dependence and similar situations, available at [www.ec.europa.eu](http://www.ec.europa.eu).

<sup>325</sup> See further ch 11, 'Relationship with Regulation 1/2003', p 469–470.

<sup>326</sup> SEC(2009) 574, para 27; see also Commission Staff Working Paper accompanying the Report on the functioning of Regulation 1/2003, COM(2009) 206 final, paras 160–179.

<sup>327</sup> See, to similar effect, Article 21(4) of the EUMR, discussed in ch 21, 'Article 21(4): legitimate interest clause', pp 851–852.

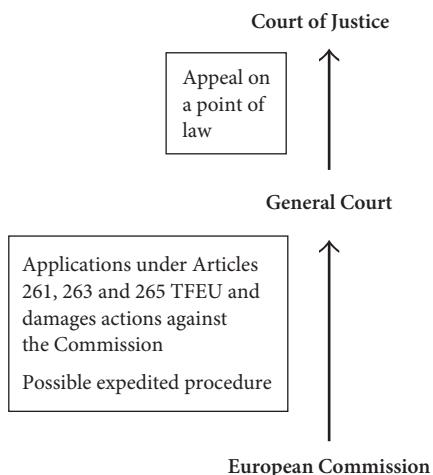

<sup>328</sup> See further *Concurrent application to regulated industries* OFT 405, December 2004, para 4.7.

Articles 101 and 102 TFEU<sup>329</sup>. However a national rule that was dependent, for example, on a prior finding of significant market power would look more like a rule whose concern was the protection of competition<sup>330</sup>. In that case the derogation provided by Article 3(3) would not be applicable, so that the position would be governed by Article 3(2): a stricter national rule in relation to agreements could not be applied, but a stricter rule on unilateral behaviour could be.

In *Days Medical Aids Ltd v Pihsiang*<sup>331</sup> the High Court suggested that the common law doctrine of restraint of trade could not be said predominantly to pursue an objective different from Articles 101 and 102 TFEU, with the result that it could not be applied to invalidate an agreement that did not infringe Article 101.

## 5. The Institutional Structure of EU and UK Competition Law

The following diagrams set out the institutional architecture of EU and UK competition law.

## Article 101(1)<sup>1</sup>

1. Introduction	82	Restricting or Distorting Competition	115
2. Undertakings and Associations of Undertakings	83	5. The <i>De Minimis</i> Doctrine	140
3. Agreements, Decisions and Concerted Practices	99	6. The Effect on Trade Between Member States	144
4. The Object or Effect of Preventing,		7. Checklist of Agreements That Fall Outside Article 101(1)	149

### 1. Introduction

This chapter is concerned with Article 101(1) TFEU which prohibits agreements, decisions by associations of undertakings and concerted practices that are restrictive of competition. Article 101(1) may be declared inapplicable where the criteria set out in Article 101(3) are satisfied: the provisions of Article 101(3) are considered in chapter 4. An agreement which is prohibited by Article 101(1) and which does not satisfy Article 101(3) is stated to be automatically void by virtue of Article 101(2)<sup>2</sup>. The full text of Article 101 is as follows:

1. The following shall be prohibited as incompatible with the internal market: all agreements between undertakings, decisions by associations of undertakings and concerted practices which may affect trade between Member States and which have as their object or effect the prevention, restriction or distortion of competition within the internal market, and in particular those which:
  - (a) directly or indirectly fix purchase or selling prices or any other trading conditions;
  - (b) limit or control production, markets, technical development, or investment;
  - (c) share markets or sources of supply;
  - (d) apply dissimilar conditions to equivalent transactions with other trading parties, thereby placing them at a competitive disadvantage;
  - (e) make the conclusion of contracts subject to the acceptance by other parties of supplementary obligations which, by their nature or according to commercial usage, have no connection with the subject of such contracts.

<sup>1</sup> For further reading on Article 101(1) readers are referred to Faull and Nikpay *The EC Law of Competition* (Oxford University Press, 2nd ed, 2007), ch 3, paras 3.01–3.392; Bellamy & Child *European Community Law of Competition* (Oxford University Press, 6th ed, 2008, eds Roth and Rose), ch 3.

<sup>2</sup> See ch 8, ‘The sanction of voidness’, pp 319–325 on the implications of the sanction of voidness in Article 101(2).

2. Any agreements or decisions prohibited pursuant to this Article shall be automatically void.
3. The provisions of paragraph 1 may, however, be declared inapplicable in the case of:
  - any agreement or category of agreements between undertakings;
  - any decision or category of decisions by associations of undertakings;
  - any concerted practice or category of concerted practices;
 which contributes to improving the production or distribution of goods or to promoting technical or economic progress, while allowing consumers a fair share of the resulting benefit, and which does not:
  - (a) impose on the undertakings concerned restrictions which are not indispensable to the attainment of these objectives;
  - (b) afford such undertakings the possibility of eliminating competition in respect of a substantial part of the products in question.

Many aspects of the basic prohibition in Article 101(1) require elaboration. First, the meaning of ‘undertakings’ and ‘associations of undertakings’ and then the terms ‘agreements’, ‘decisions’ and ‘concerted practices’ will be explained. The fourth section of this chapter will consider what is meant by agreements that ‘have as their object or effect the prevention, restriction or distortion of competition’. The fifth section deals with the *de minimis* doctrine. Section six explains the requirement of an effect on trade between Member States. The chapter concludes with a checklist of agreements that, for a variety of reasons, normally fall outside Article 101(1).

## 2. Undertakings and Associations of Undertakings<sup>3</sup>

Five issues must be considered in respect of this term: first, its basic definition for the purpose of Articles 101 and 102<sup>4</sup>; second, the meaning of ‘associations of undertakings’; third, whether two or more legal persons form a single economic entity – and therefore comprise one undertaking – and the significance of such a finding; fourth, whether two or more entities may be treated as one undertaking where there is a corporate reorganisation; and fifth which undertaking is liable for an infringement of competition law when one business is sold to another.

The Treaty does not define an ‘undertaking’<sup>5</sup>: it has been a task for the EU Courts to clarify its meaning<sup>6</sup>. However it is a critically important term, since only agreements and concerted practices *between undertakings* are caught by Article 101; similarly, Article 102 applies only to abuses committed by dominant *undertakings*. There is no doubt that organs of the Member States (for example public authorities, municipalities, communes, the health service) and entities entrusted by the Member States with regulatory or other

<sup>3</sup> For a particularly interesting discussion of this expression see Odudu ‘The meaning of undertaking within Article 81 EC’ in *The Boundaries of EC Competition Law: The Scope of Article 81* (Oxford University Press, 2006), ch 3.

<sup>4</sup> The term undertaking has the same meaning under Article 102, and this section discusses cases decided under both Article 101 and Article 102.

<sup>5</sup> Article 80 of the former ECSC Treaty and Article 80 of the Euratom Treaty do contain definitions of an undertaking for their respective purposes, as does Article 1 of Protocol 22 of the EEA Agreement.

<sup>6</sup> See Case T-99/04 *AC-Treuhand v Commission* [2008] ECR II-1501, [2008] 5 CMLR 962, para 144: ‘the gradual clarification of the notions of “agreement” and “undertaking” by the Community judicature is of decisive importance in assessing whether their application in practice is definite and foreseeable’.

functions are capable of distorting competition. The competition law question is whether the distortion of competition is the responsibility of an *undertaking*: if it is, the behaviour in question may infringe Articles 101 and/or 102, subject to the availability of various defences such as state compulsion<sup>7</sup> or Article 106(2)<sup>8</sup>. However where the behaviour that distorts competition is not that of an undertaking, it will not be subject to competition law scrutiny at all. As will be seen, there have been many cases in which the EU Courts have been asked whether a particular entity, accused of anti-competitive behaviour, qualified as an undertaking for the purpose of the competition rules. The question often arises in the case of so-called ‘mixed markets’, where the state and private firms are both present on a market and where, typically, the latter complain of anti-competitive conduct on the part of the former. In so far as it is thought that there should be ‘competitive neutrality’ – more colloquially a level playing field – there would seem to be an attraction in treating all the operators on such markets as undertakings, with the responsibilities that that entails<sup>9</sup>; however this is not the inevitable outcome, as will be seen in the case law discussed below.

A separate question, considered in chapter 6, is whether Member States themselves may be liable for the anti-competitive behaviour of public undertakings and undertakings that have ‘special or exclusive rights’.

### (A) Basic definition

The Court of Justice held in *Höfner and Elser v Macrotron GmbH*<sup>10</sup> that:

the concept of an undertaking encompasses every entity engaged in an economic activity regardless of the legal status of the entity and the way in which it is financed.

In *Pavlov*<sup>11</sup> the Court added that:

It has also been consistently held that any activity consisting in offering goods or services on a given market is an economic activity.

In *Wouters v Algemene Raad van de Nederlandsche Orde van Advocaten*<sup>12</sup> the Court said that the competition rules in the Treaty:

do not apply to activity which, by its nature, its aim and the rules to which it is subject does not belong to the sphere of economic activity... or which is connected with the exercise of the powers of a public authority.

These statements are a helpful starting point in understanding the meaning of the term undertaking and will be considered in the text that follows.

#### (i) Need to adopt a functional approach

It is important to understand at the outset that the same legal entity may be acting as an undertaking when it carries on one activity but not when it is carrying on another. A ‘functional approach’ must be adopted when determining whether an entity, when

<sup>7</sup> See ‘State compulsion and highly regulated markets’, pp 137–138 below.

<sup>8</sup> See ch 6, ‘Article 106(2)’, pp 235–242.

<sup>9</sup> For discussion see *Competition in mixed markets: ensuring competitive neutrality* OFT 1242, July 2010, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>10</sup> Case C-41/90 [1991] ECR I-1979, [1993] 4 CMLR 306, para 21.

<sup>11</sup> Cases C-180/98 etc [2000] ECR I-6451, [2001] 4 CMLR 30, para 75.

<sup>12</sup> Case C-309/99 [2002] ECR I-1577, [2002] 4 CMLR 913, para 57.

engaged in a particular activity, is doing so as an undertaking for the purpose of the competition rules<sup>13</sup>. As the Court of Justice said in *MOTOE*<sup>14</sup>:

The classification as an activity falling within the exercise of public powers or as an economic activity must be carried out separately for each activity exercised by a given entity<sup>15</sup>.

Thus, for example, a local authority in the UK may (a) have powers to adopt bye-laws specifying where cars can and cannot be parked and (b) own land which it operates commercially as a car park. When performing function (a) the authority would, in the language of *Wouters*, be exercising the powers of a public authority and therefore would not be acting as an undertaking; the behaviour in (b), however, would be economic, and therefore that of an undertaking<sup>16</sup>. In *SELEX Sistemi Integrati SpA v Commission*<sup>17</sup> the General Court had to decide whether Eurocontrol, an entity created by Member States of the EU for the purpose of establishing navigational safety in the airspace of Europe, was acting as an undertaking for the purpose of the EU competition rules. The Court concluded that some of Eurocontrol's activities – for example setting technical standards, procuring prototypes and managing intellectual property rights – were not economic; however it also concluded that some other activities – for example the provision of technical assistance to national administrations – could be separated from its other functions<sup>18</sup> and be characterised as economic<sup>19</sup>. An appeal by SELEX to the Court of Justice against the former ruling was dismissed; and in the course of its judgment the Court held that the General Court had erred in concluding that the latter activities were economic<sup>20</sup>.

## (ii) 'Engaged in an economic activity'

The sentence quoted from the *Höfner and Elser* judgment states that every entity engaged in economic activity does so as an undertaking: it is the idea of economic activity, therefore, that needs to be explored.

### (A) Offering goods or services on a given market is an economic activity

As noted above the Court of Justice stated in *Pavlov* that activity consisting in offering goods or services on a market is an economic activity. The Commission held in *Spanish Courier Services*<sup>21</sup> that the Spanish Post Office, in so far as it was providing services on the market, was acting as an undertaking; in *Höfner and Elser* the Court of Justice reached the same conclusion in respect of the German Federal Employment Office. In *Ambulanz Glöckner v Landkreis Südwestpfalz*<sup>22</sup> the Court of Justice held that medical aid organisations providing ambulance services for remuneration were acting as undertakings for the purpose of the competition rules<sup>23</sup>. A legal entity that acts as a 'facilitator' to a cartel can be an undertaking, even though it does not itself produce the goods or services that are

<sup>13</sup> On this point see the Opinion of Advocate General Jacobs in Cases C-67/96 etc *Albany International BV v SBT* [1999] ECR I-5751, [2000] 4 CMLR 446, para 207; this Opinion contains an invaluable discussion of the meaning of undertakings in Article 101(1).

<sup>14</sup> Case C-49/07 [2008] ECR I-4863, [2008] 5 CMLR 790.

<sup>15</sup> *Ibid*, para 25.

<sup>16</sup> See eg *Eco-Emballages* OJ [2001] L 233/37, [2001] 5 CMLR 1096, para 70: French local authorities were acting as undertakings when entering into contracts in relation to the collection of household waste.

<sup>17</sup> Case T-155/04 [2006] ECR II-4797, [2007] 4 CMLR 372.

<sup>18</sup> *Ibid*, para 86.

<sup>19</sup> *Ibid*, para 92.

<sup>20</sup> Case C-113/07 P *SELEX Sistemi Integrati SpA v Commission* [2009] ECR-I 2207, [2009] 4 CMLR 1083, paras 77–79.

<sup>21</sup> OJ [1990] L 233/19, [1991] 4 CMLR 560.

<sup>22</sup> Case C-475/99 [2001] ECR I-8089, [2002] 4 CMLR 726.

<sup>23</sup> *Ibid*, paras 19–22.

cartelised<sup>24</sup>. The mere holding of shares in an undertaking does not, in itself, mean that the owner of the shares is itself an undertaking engaged in economic activity; however the position would be different where the shareholder actually exercises control by involving itself in the management of the undertaking<sup>25</sup>.

**(B) No need for a profit-motive or economic purpose**

The fact that an organisation lacks a profit-motive<sup>26</sup> or does not have an economic purpose<sup>27</sup> does not, in itself, mean that an activity is not economic. On this basis the Commission held in *Distribution of Package Tours During the 1990 World Cup*<sup>28</sup> that FIFA, the body responsible for the 1990 Football World Cup in Italy, as well as the Italian football association and the local organising committee, were undertakings subject to Article 101<sup>29</sup>. In *Piau*<sup>30</sup> the General Court held that the practice of football by football clubs is an economic activity<sup>31</sup>, and that national associations that group the clubs together are associations of undertakings; the position does not alter because the national associations group amateur clubs alongside professional ones<sup>32</sup>. The General Court also held in this case that FIFA was an association of undertakings<sup>33</sup>.

**(C) 'Regardless of the legal status of the entity and the way in which it is financed'**

The Court of Justice in *Höfner and Elser* held that an assessment of whether an entity was acting as an undertaking was to be determined 'regardless of the legal status of the entity and the way in which it is financed'. An entity can be found to be acting as an undertaking only as a result of the activity it is engaged in; its legal form is irrelevant. Companies and partnerships of course can qualify as undertakings, but so too can other entities such as agricultural cooperatives<sup>34</sup>, P and I clubs<sup>35</sup> and trade associations: it follows that agreements between trade associations may themselves be caught by Article 101(1)<sup>36</sup>. Natural persons have often been held to qualify as undertakings<sup>37</sup>, although an individual acting

<sup>35</sup> *P & I Clubs* OJ [1985] L 376/2, [1989] 4 CMLR 178; *P & I Clubs* OJ [1999] L 125/12, [1999] 5 CMLR 646, paras 50–51.

<sup>36</sup> See eg Case 71/74 *FRUBO v Commission* [1975] ECR 563, [1975] 2 CMLR 123; Case 96/82 *IAZ International Belgium NV v Commission* [1983] ECR 3369, [1984] 3 CMLR 276; *Algemene Schippersvereniging v ANTIB* OJ [1985] L 219/35, [1988] 4 CMLR 698, upheld on appeal Case 272/85 *ANTIB v Commission* [1987] ECR 2201, [1988] 4 CMLR 677.

<sup>37</sup> See eg *AOIP v Beyrard* OJ [1976] L 6/8, [1976] 1 CMLR D14 where a patent licence between an individual and a company was held to fall within Article 101(1); *Reuter/BASF* OJ [1976] L 254/40, [1976] 2 CMLR D44;

as an employee would not be<sup>38</sup>; nor would an individual purchasing goods or services as an end user/consumer, since that behaviour is not economic<sup>39</sup>.

Public authorities, such as the Federal Employment Office in *Höfner and Elser* or the Autonomous Administration of State Monopolies in *Banchemo*<sup>40</sup>, have been held to be engaged in activities of an economic nature with regard to employment procurement and the offering of goods and services on the market for manufactured tobacco respectively. State-owned corporations may act as undertakings<sup>41</sup>, as may bodies entrusted by the state with particular tasks<sup>42</sup> and quasi-governmental bodies which carry on economic activities<sup>43</sup>. *Aéroports de Paris*, responsible for the planning, administration and development of civil air transport installations in Paris, the Portuguese Airports Authority, ANA and the Finnish Civil Aviation Administration were all found by the Commission to constitute undertakings<sup>44</sup>. In *Aluminum Products*<sup>45</sup> foreign trade organisations in east European countries were regarded as undertakings, even though they had no existence separate from the state under their domestic law: claims of sovereign immunity should be confined to acts which are those of government and not of trade. The same point was made by the Commission in its decision in *Amministrazione Autonoma dei Monopoli di Stato*<sup>46</sup>.

### (iii) Activities that are not economic

Activities provided on the basis of ‘solidarity’ are not economic; nor is the exercise of public power. Procurement pursuant to a non-economic activity is not economic.

#### (A) *Solidarity*<sup>47</sup>

There have been several cases in which the question has arisen whether entities providing social protection, for example social security, pensions, health insurance or health care, did so as undertakings. The case law makes a distinction between situations in which

*RAI v UNITEL* OJ [1978] L 157/39, [1978] 3 CMLR 306 where opera singers were undertakings; *Vaessen BV v Moris* OJ [1979] L 19/32, [1979] 1 CMLR 511; Case 35/83 *BAT v Commission* [1985] ECR 363, [1985] 2 CMLR 470; Case 42/84 *Remia BV and Verenigde Bedrijven Nutricia NV v Commission* [1985] ECR 2545, [1987] 1 CMLR 1; *Breeders’ Rights: Roses* OJ [1985] L 369/9, [1988] 4 CMLR 193; *French Beef* OJ [2003] L 209/12, paras 104–108, upheld on appeal to the General Court Cases T-217/03 and T-245/03 *FNCBV v Commission* [2006] ECR II-4987, [2008] 5 CMLR 406 and again on appeal to the Court of Justice Cases C-101/07 P and C-110/07 P *FNCBV v Commission* [2008] ECR I-10193, [2009] 4 CMLR 743; see also Case C-172/03 *Wolfgang Heiser v Finanzamt Innsbruck* [2005] ECR I-1627, [2005] 2 CMLR 402, a case on state aid in which a self-employed dentist was held to be acting as an undertaking.

<sup>38</sup> See ‘Employees and trades unions’, pp 90–91 below.

<sup>39</sup> On this point see Cases C-180/98 etc *Pavel Pavlov v Stichting Pensioenfonds Medische Specialisten* [2000] ECR I-6451, [2001] 4 CMLR 30, paras 78–81.

<sup>40</sup> Case C-387/93 [1995] ECR I-4663, [1996] 1 CMLR 829, para 50.

<sup>41</sup> See eg Case 155/73 *Sacchi* [1974] ECR 409, [1974] 2 CMLR 177; Case 41/83 *Italy v Commission* [1985] ECR 873, [1985] 2 CMLR 368.

<sup>42</sup> Such bodies have a limited dispensation from the competition rules by virtue of Article 106(2) TFEU: see ch 6, ‘Article 106(2)’, pp 235–242.

<sup>43</sup> Case 258/78 *Nungesser KG v Commission* [1982] ECR 2015, [1983] 1 CMLR 278.

<sup>44</sup> See respectively *Alpha Flight Services/Aéroports de Paris* OJ [1998] L 230/10, [1998] 5 CMLR 611, paras 49–55, upheld on appeal Case T-128/98 [2000] ECR II-3929, [2001] 4 CMLR 1376, paras 120–126 and by the Court of Justice in Case C-82/01 P [2002] ECR I-9297, [2003] 4 CMLR 609, paras 78–82; *Portuguese Airports* OJ [1999] L 69/31, [1999] 5 CMLR 103, para 12, upheld on appeal Case C-163/99 *Portugal v Commission* [2001] ECR I-2613, [2002] 4 CMLR 1319; *Ilmailulaitos/Luftfartsverket* OJ [1999] L 69/24, [1999] 5 CMLR 90, paras 21–23.

<sup>46</sup> OJ [1998] L 252/47, [1998] 5 CMLR 786, para 21.

<sup>47</sup> See Winterstein ‘Nailing the Jellyfish: Social Security and Competition Law’ (1999) 20 ECLR 324.

such protection is provided in a market context on the one hand, or on the basis of ‘solidarity’ on the other. Solidarity was defined by Advocate General Fennelly in *Sodemare v Regione Lombardia*<sup>48</sup> as ‘the inherently uncommercial act of involuntary subsidisation of one social group by another’<sup>49</sup>. Where social protection is provided on the basis of solidarity, it is not provided by an undertaking. The cases in which this issue has had to be examined are very fact-specific. As Advocate General Jacob said in his Opinion in *AOK Bundesverband*<sup>50</sup>:

Schemes come in a wide variety of forms, ranging from State social security schemes at one end of the spectrum to private individual schemes operated by commercial insurers at the other. Classification is thus necessarily a question of degree<sup>51</sup>.

In *Poucet v Assurances Générales de France*<sup>52</sup> the Court of Justice concluded that French regional social security offices administering sickness and maternity insurance schemes to self-employed persons were not acting as undertakings, but it reached the opposite conclusion in relation to a differently-constituted scheme in *Fédération Française des Sociétés d’Assurance*<sup>53</sup>. The difference was that in *Poucet* the benefits payable were identical for all recipients, contributions were proportionate to income, the pension rights were not proportionate to the contributions made and schemes that were in surplus helped to finance those which had financial difficulties; the schemes were based on the principle of solidarity. In *Fédération Française*, on the other hand, the benefits payable depended on the amount of the contributions paid by recipients and the financial results of the investments made by the managing organisation; the manager of the scheme was carrying on an economic activity in competition with life assurance companies. In *Albany International BV v Stichting Bedrijfspensioenfonds Textielindustrie*<sup>54</sup> the Court of Justice held that the pension fund in that case was acting as an undertaking, since it was carrying on an economic activity: its function was to make investments, the result of which determined the amount of benefits that the fund could pay to its members<sup>55</sup>; as such, this fund was different from the one in *Poucet*.

In *Cisal di Battistello Venanzio & C Sas v INAIL*<sup>56</sup> the Court of Justice held that INAIL, entrusted by law with management of a scheme providing insurance against accidents at work, was not acting as an undertaking for the purposes of the competition rules because it fulfilled an exclusively social function based on the principle of solidarity. Similarly in *AOK Bundesverband*<sup>57</sup> the Court of Justice held that German sickness funds were involved in the management of the social security system, fulfilling an exclusively social function founded on the principle of solidarity; it followed that they were not acting as undertakings. The same conclusion was reached in *Kattner Stahlbau GmbH v Maschinenbau- und Metal-Berufsgenossenschaft*<sup>58</sup> where MMB fulfilled an exclusively social function in providing insurance against accidents at work and occupational diseases, proceeded on the basis of solidarity and was subject to state supervision. In *AG2R Prévoyance v Beaudort*

<sup>55</sup> *Ibid*, paras 71–87.

<sup>56</sup> Case C-218/00 [2002] ECR I-691, [2002] 4 CMLR 833.

<sup>57</sup> Cases C-264/01 etc [2004] ECR I-2493, [2004] 4 CMLR 1261; see also, under Article 107 TFEU on state aid, Cases C-266/04 *Casino France* [2005] ECR I-9481, paras 45–55.

<sup>58</sup> Case C-350/07 [2009] ECR I-1513, [2009] CMLR 1339, paras 33–68.

*Père et Fils SARL*<sup>59</sup> the Court of Justice suggested that AG2R, which operated a scheme for supplementary reimbursement of healthcare costs that was ‘characterised by a high degree of solidarity’<sup>60</sup>, might nevertheless be acting as an undertaking where it enjoyed a degree of autonomy, that is to say was relatively free from state control<sup>61</sup>.

**(B) Activities connected with the exercise of the powers of a public authority are not economic**

Although it is clear that state-owned corporations or public authorities may qualify as undertakings when engaged in economic activity, the *Wouters* judgment says they would not do so when their behaviour ‘is connected with the exercise of the powers of a public authority’<sup>62</sup>. In *Corinne Bodson v Pompes Funèbres des Régions Libérées SA*<sup>63</sup> a French law entrusted the performance of funeral services to local communes; many of the communes in turn awarded concessions to provide those services to private undertakings. The Court of Justice held that Article 101 did not apply to ‘contracts for concessions concluded between communes acting in their capacity as public authorities and undertakings entrusted with the provision of a public service’ (emphasis added)<sup>64</sup>. An entity acts in the exercise of official authority where the activity in question is ‘a task in the public interest which forms part of the essential functions of the State’ and where that activity ‘is connected by its nature, its aim and the rules to which it is subject with the exercise of powers... which are typically those of a public authority’<sup>65</sup>. For the same reason, in *SAT Fluggesellschaft v Eurocontrol*<sup>66</sup> the Court of Justice concluded that Eurocontrol was not acting as an undertaking when it created and collected route charges from users of air navigation services on behalf of the States that had created it<sup>67</sup>. In *Cali e Figli*<sup>68</sup> the Court of Justice held that a private company engaged in anti-pollution surveillance in Genoa harbour would not be acting as an undertaking when discharging that particular responsibility, since this was a task in the public interest, forming part of one of the essential functions of the state in protecting the maritime environment: this judgment is of particular interest as the public duty was being carried out by a private body.

**(C) Procurement that is ancillary to a non-economic activity is not economic**

In *FENIN v Commission*<sup>69</sup> a complaint was made to the Commission that 26 public bodies in Spain responsible for the operation of the Spanish national health system were abusing their dominant buyer power by delaying unreasonably the payment of invoices. The Commission rejected the complaint on the basis that the public bodies were not acting as undertakings. FENIN, an association representing most undertakings marketing medi-

<sup>59</sup> Case C-437/09 [2011] ECR I-000, [2011] 4 CMLR 1029; see also the judgment of the EFTA Court in Case E-5/07 *Private Barnehagers Landsforbund v EFTA Surveillance Authority* [2008] 2 CMLR 818, paras 82–83: Norwegian State not acting as an undertaking when funding municipal kindergartens.

<sup>60</sup> Case C-437/09 [2011] ECR I-000, [2011] 4 CMLR 1029, para 52.

<sup>61</sup> *Ibid*, paras 53–65.

<sup>62</sup> See to the same effect Case C-343/95 *Cali e Figli* [1997] ECR I-1547, [1997] 5 CMLR 484, paras 16–17.

<sup>63</sup> Case 30/87 [1988] ECR 2479, [1989] 4 CMLR 984.

<sup>64</sup> *Ibid*, para 18.

<sup>65</sup> Case C-343/95 *Cali e Figli* [1997] ECR I-1547, [1997] 5 CMLR 484, para 23.

<sup>66</sup> Case C-364/92 [1994] ECR I-43, [1994] 5 CMLR 208, para 30; different activities of Eurocontrol were held not to be economic in the *SELEX* case, ch 3 n 20 above.

<sup>67</sup> A similar conclusion had earlier been reached by the Commercial Court in London in *Irish Aerospace (Belgium) NV v European Organisation for the Safety of Air Navigation* [1992] 1 Lloyd’s Rep 383.

<sup>68</sup> Case C-343/95 [1997] ECR I-1547, [1997] 5 CMLR 484.

<sup>69</sup> Case T-319/99 [2003] ECR II-357, [2003] 5 CMLR 34; it is interesting to compare this judgment with that of the UK Competition Appeal Tribunal in Case No 1006/2/1/01 *BetterCare Group Ltd v Director General of Fair Trading* [2002] CAT 7, [2002] Comp AR 299, a judgment which preceded that in *FENIN* and which came to a different view in relation to the procurement activities of the Health Trust in that case: see ch 9, ‘The *BetterCare* case’, pp 336–337.

cal goods and equipment used in Spanish hospitals, appealed to the General Court. The General Court dismissed the appeal. Its reasoning was that, when providing health care to citizens, the public bodies did so on the basis of solidarity: that behaviour therefore was not economic. The General Court then held that the activity of purchasing goods should not be dissociated from the purpose to which they would be put. Since the provision of health care was not economic, the ancillary behaviour of procurement for that purpose was not economic either<sup>70</sup>. This judgment was upheld on appeal to the Court of Justice<sup>71</sup>. The General Court's judgment did not say what the position would be where a health organisation purchasing goods uses them partly for the provision of state-sponsored health care on the basis of solidarity, but also charges certain patients, for example tourists from overseas, according to market principles: as the point had not been raised in the original complaint to the Commission, the General Court held that it did not need to adjudicate upon it<sup>72</sup>. The reasoning in *FENIN* was subsequently applied in *SELEX Sistemi Integrati SpA v Commission*<sup>73</sup>.

#### (iv) The professions

Abundant case law has established that members of the professions can be undertakings for the purposes of the competition rules. In *Commission v Italy*<sup>74</sup> the Court of Justice held that customs agents in Italy, who offered for payment services consisting of the carrying out of customs formalities in relation to the import, export and transit of goods, were undertakings; it rejected the Italian Government's argument that the fact that the activity of customs agents is intellectual and requires authorisation and compliance with conditions meant that they were not undertakings. Self-employed medical specialists have been held to be undertakings<sup>75</sup>, including when they are making contributions to their own supplementary pension scheme<sup>76</sup>.

#### (v) Employees and trades unions

In *Jean Claude Becu*<sup>77</sup> the Court of Justice held that workers are, for the duration of their employment relationship, incorporated into the undertakings that employ them and thus form part of an economic unit with them; as such they do not constitute undertakings within the meaning of EU competition law<sup>78</sup>. Nor should the dock workers in that case, taken collectively, be regarded as constituting an undertaking<sup>79</sup>. However an ex-employee who carries on an independent business would be<sup>80</sup>.

In *Albany*<sup>81</sup> the Court of Justice was concerned with a case where organisations representing employers and employees collectively agreed to set up a single pension fund

<sup>70</sup> *Ibid*, paras 35–36.

<sup>71</sup> Case C-205/03 P [2006] ECR I-6295, [2006] 5 CMLR 559, paras 25–26; Advocate General Maduro's Opinion in this case contains an extensive review of the law and literature on the issues raised.

<sup>72</sup> Case T-319/99 [2003] ECR II-357, [2003] 5 CMLR 34, paras 41–44.

<sup>73</sup> See ch 3 n 20 above.

<sup>74</sup> Case C-35/96 [1998] ECR I-3851, [1998] 5 CMLR 889; see similarly Case T-513/93 *CNSD v Commission* [2000] ECR II-1807, [2000] 5 CMLR 614, upholding the Commission's decision in *CNSD* OJ [1993] L 203/27, [1995] 5 CMLR 889; *Coapi* OJ [1995] L 122/37, [1995] 5 CMLR 468; *EPI code of conduct* OJ [1999] L 106/14, [1999] 5 CMLR 540, partially annulled on appeal to the General Court Case T-144/99 *Institut des Mandataires Agréés v Commission* [2001] ECR II-1087, [2001] 5 CMLR 77.

<sup>75</sup> Cases C-180/98 etc *Pavel Pavlov v Stichting Pensioenfonds Medische Specialisten* [2000] ECR I-6451, [2001] 4 CMLR 30, para 77.

<sup>76</sup> *Ibid*, paras 78–82; the Commission, intervening, had argued that, when making such contributions, the specialists were acting as consumers rather than as undertakings.

<sup>77</sup> Case C-22/98 [1999] ECR I-5665, [2001] 4 CMLR 968.

<sup>78</sup> *Ibid*, para 26.

<sup>79</sup> *Ibid*, para 27.

<sup>80</sup> See eg *Reuter/BASF* OJ [1976] L 254/40, [1976] 2 CMLR D44.

<sup>81</sup> See ch 3 n 54 above.

responsible for managing a supplementary pension scheme and requested the public authorities to make affiliation to the fund compulsory. One of the issues in the case was whether an agreement between such organisations was an agreement between undertakings. The Court of Justice's answer was that it was not. The Treaty's activities include not only the adoption of a competition policy, but also a policy in the social sphere: this is stated in Article 4(2)(b) TFEU and revealed, for example, in Article 153 TFEU, the purpose of which is to promote close cooperation between Member States in the social field, particularly in matters relating to the right of association and collective bargaining between employers and workers. The Court of Justice's view was that the social objectives pursued by collective agreements would be seriously undermined if they were subject to Article 101 and that therefore they fall outside it<sup>82</sup>. However the same exclusion does not apply in relation to a decision taken by members of the liberal professions, since it is not concluded in the context of collective bargaining between employers and employees<sup>83</sup>. In *Norwegian Federation of Trade Unions v Norwegian Association of Local and Regional Authorities*<sup>84</sup> the EFTA Court took a similar view of collective labour agreements under Article 53 of the European Economic Area ('EEA') Agreement, but noted that provisions in such agreements which pursue objectives extraneous to that of improving conditions of work and employment could amount to an infringement<sup>85</sup>.

In *FNCBV v Commission*<sup>86</sup> the General Court rejected an argument that the application of Article 101 to agreements between associations of farmers to fix prices and to prevent imports of beef into France restricted the freedom of trade union activity<sup>87</sup>.

## (B) 'Associations of undertakings'

Article 101 applies not only to agreements and concerted practices between undertakings; it also applies to the decisions of 'associations of undertakings'<sup>88</sup>. A trade association does not have to have a commercial or economic activity of its own to be subject to Article 101(1)<sup>89</sup>; it follows that Article 101(1) may be applicable to the *decisions* of a trade association, even if it does not apply to its *agreements* because the association does not enter into the agreements as an undertaking<sup>90</sup>. Where an association is an undertaking, an agreement between it and other undertakings may be caught by Article 101(1)<sup>91</sup>. Article 101(1)

<sup>82</sup> *Ibid*, para 59; for critical comment see Van den Bergh and Camesasca 'Irreconcilable Principles? The Court of Justice Exempts Collective Labour Agreements from the Wrath of Antitrust' (2000) 25 *EL Rev* 492; Boni and Manzini 'National Social Legislation and EC Antitrust Law' (2001) 24 *World Competition* 239; see also Case C-222/98 *Van der Woude v Stichting Beatrixoord* [2000] ECR I-7111, [2001] 4 *CMLR* 93; Case C-437/09 *AG2R Prévoyance v Beaudort Père et Fils SARL* [2011] ECR I-000, [2011] 4 *CMLR* 1029, paras 28–36.

<sup>83</sup> Cases C-180/98 etc *Pavel Pavlov v Stichting Pensioenfond Medische Specialisten* [2000] ECR I-6451, [2001] 4 *CMLR* 30, paras 67–70.

<sup>84</sup> Case E-8/00 [2002] 5 *CMLR* 160, paras 33–46.

<sup>85</sup> *Ibid*, paras 33–46 and 47–59.

<sup>86</sup> Cases T-217/03 and T-245/03 [2006] ECR II-4987, [2008] 5 *CMLR* 406, upheld on appeal Cases C-101/07 P and C-110/07 P *FNCBV v Commission* [2008] ECR I-10193, [2009] 4 *CMLR* 743.

<sup>87</sup> *Ibid*, paras 97–103.

<sup>88</sup> In *SEL-Imperial Ltd v The British Standards Institution* [2010] EWHC 854 (Ch) Roth J pointed out, at paras 36 and 41, that this expression is a term of art rather than one with a colloquial meaning.

<sup>89</sup> Cases T-25/95 etc *Cimenteries CBR SA v Commission* [2000] ECR II-491, [2000] 5 *CMLR* 204, para 1320, citing many earlier judgments of the Court of Justice and General Court to similar effect; *MasterCard*, Commission decision of 19 December 2007, para 342.

<sup>90</sup> See the Opinion of Advocate General Slynn in Case 123/85 *BNIC v Clair* [1985] ECR 391, p 396, [1985] 2 *CMLR* 430, p 442.

<sup>91</sup> Cases T-25/95 etc *Cimenteries CBR SA v Commission* [2000] ECR II-491, [2000] 5 *CMLR* 204, paras 1325 and 2622.

also applies to decisions by associations of trade associations<sup>92</sup>. A decision does not acquire immunity because it is subsequently approved and extended in scope by a public authority<sup>93</sup>, nor does a trade association fall outside Article 101(1) because it is given statutory functions or because its members are appointed by the Government<sup>94</sup>. The Court of Justice has specifically stated that the public law status of a national body (for example an association of customs agents) does not preclude the application of Article 101<sup>95</sup>.

In *Wouters v Algemene Raad van de Nederlandsche Orde van Advocaten*<sup>96</sup> the Court of Justice held that the General Council of the Dutch Bar was an association of undertakings, and rejected the argument that this was not so in so far as it was exercising its regulatory functions; the position might have been different if a majority of the members of the Council had been appointed by the state, rather than by members of the profession, and if the state had specified the public interest criteria to be taken into account by the Council<sup>97</sup>. Just as a ‘functional’ approach should be taken to the concept of an undertaking<sup>98</sup>, so too it may be that a body can qualify as an association of undertakings when carrying out some of its tasks, but not when performing others (for example regulatory supervision on behalf of the state)<sup>99</sup>.

### (C) The ‘single economic entity’ doctrine

Article 101(1) does not apply to agreements between two or more legal persons that form a single economic entity: collectively they comprise a single undertaking, and so there is no agreement *between* undertakings. The most obvious example of this is an agreement between a parent and a subsidiary company, though the relationship between a principal and agent<sup>100</sup> and between a contractor and sub-contractor<sup>101</sup> is analogous. Numerous important consequences flow from the single economic entity doctrine, as will be seen below: one is that a parent company can be held liable for infringement of the competition rules by a subsidiary<sup>102</sup>.

#### (i) Parent and subsidiary: the basic rule

Firms within the same corporate group can enter into legally enforceable agreements with one another. However such an agreement will not fall within Article 101 if the relationship

<sup>96</sup> Case C-309/99 [2002] ECR I-1577, [2002] 4 CMLR 913; the Opinion of Advocate General Léger deals with the meaning of ‘association of undertakings’ at length: see paras 56–87.

<sup>97</sup> Case C-309/99 [2002] ECR I-1577, [2002] 4 CMLR 913, paras 50–71.

<sup>98</sup> See ‘Need to adopt a functional approach’, pp 84–85 above.

<sup>99</sup> On this point see the Opinion of Advocate General Jacobs in Cases C-67/96 etc *Albany International BV v SBT* [1999] ECR I-5751, [2000] 4 CMLR 446, para 214 and Case C-309/99 *Wouters* [2002] ECR I-1577, [2002] 4 CMLR 913, para 64.

<sup>100</sup> See ch 16, ‘Commercial Agents’, pp 621–623 and, in particular, the Commission’s *Guidelines on Vertical Restraints* OJ [2010] C 130/1, paras 12–21.

<sup>101</sup> See ch 16, ‘Sub-Contracting Agreements’, pp 676–677 and, in particular, the Commission’s *Notice on Sub-contracting Agreements* OJ [1979] C 1/2, [1979] 1 CMLR 264.

<sup>102</sup> See ‘Implications of the economic entity doctrine’, pp 95–97 below; note that the same principle means that a principal may be found guilty of participating in a cartel if it was represented at cartel meetings by a commercial agent: see eg *Candle Waxes*, Commission decision of 1 October 2008, paras 399–409, on appeal to the General Court Cases T-543/08 etc *RWE and RWE Dea v Commission*, not yet decided.

between them is so close that economically they form a single economic entity, that is to say that they ‘consist of a unitary organisation of personal, tangible and intangible elements, which pursue a specific economic aim on a long-term basis, and can contribute to the commission of an infringement of the kind referred to in [Article 101 TFEU]’<sup>103</sup>. Where this is the case the agreement is regarded as the internal allocation of functions within an economic group rather than a restrictive agreement between independent undertakings.

## (ii) **The Viho judgment**

The proposition that agreements between entities in the same economic group fall outside Article 101 can be traced back to 1971<sup>104</sup>. The issue was revisited in *Viho v Commission*<sup>105</sup>. Parker Pen had established an integrated distribution system for Germany, France, Belgium, Spain and the Netherlands, where it used subsidiary companies for the distribution of its products. The Commission concluded that Article 101 had no application to this allocation of tasks within the Parker Pen group. This finding was challenged by a third party, Viho, which had been trying to obtain supplies of Parker Pen’s products and which considered that the agreements between Parker Pen and its subsidiaries infringed Article 101. The General Court and the Court of Justice upheld the decision of the Commission, that Article 101 had no application. At paragraph 15 of its judgment the Court of Justice noted that Parker Pen held 100 per cent of the shares in the subsidiary companies, it directed their sales and marketing activities and it controlled sales, targets, gross margins, sales costs, cash flow and stocks:

Parker and its subsidiaries thus form a single economic unit within which the subsidiaries do not enjoy real autonomy in determining their course of action in the market, but carry out the instructions issued to them by the parent company controlling them<sup>106</sup>.

The Court of Justice went on to say that in those circumstances the fact that Parker Pen could divide national markets between its subsidiaries was outside Article 101, although it pointed out that such unilateral conduct could fall foul of Article 102 where the requirements for its application were satisfied<sup>107</sup>. In its *Guidelines on the applicability of Article 101 of the Treaty on the Functioning of the European Union to horizontal co-operation agreements*<sup>108</sup> the Commission relies on the *Viho* judgment for the proposition that ‘[w]hen a company exercises decisive influence over another company they form a

<sup>108</sup> OJ [2011] C 11/1.

single economic entity and, hence, are part of the same undertaking'; it adds that the same would be true of 'sister companies, that is to say, companies over which decisive influence is exercised by the same parent company'<sup>109</sup>.

### (iii) The test of control

The crucial question, therefore, is whether parties to an agreement are independent in their decision-making or whether one is able to exercise decisive influence over the other with the result that the latter does not enjoy 'real autonomy' in determining its commercial policy on the market. For these purposes it is necessary to examine various factors such as the shareholding that a parent company has in its subsidiary, the composition of the board of directors, the extent to which the parent influences the policy of or issues instructions to the subsidiary and similar matters<sup>110</sup>.

In *Akzo Nobel NV v Commission*<sup>111</sup> the issue before the Court of Justice was not whether an agreement between a parent and subsidiary infringed Article 101, but whether the Commission could address a decision to a parent company that it was liable for infringing Article 101 where it was a subsidiary company that was actually involved in the cartel. The Court held, referring to earlier judgments such as *Imperial Chemical Industries v Commission*<sup>112</sup>, that where the parent has a 100 per cent shareholding in a subsidiary the parent exercises decisive influence over the subsidiary, and there is a rebuttable presumption that the parent does in fact exercise such influence<sup>113</sup>. In those circumstances the Commission may regard the parent as jointly and severally liable for any fine imposed on its subsidiary unless the parent can adduce sufficient evidence that the subsidiary acts independently on the market<sup>114</sup>. The Court added that, where the presumption applies, the Commission is not required to find additional evidence that the parent controlled the subsidiary: the presumption suffices unless rebutted<sup>115</sup>. In *Akzo Nobel* the General Court<sup>116</sup> had concluded that the parent had failed to rebut the presumption, and that judgment was upheld by the Court of Justice on appeal. There have been numerous other cases, before and since *Akzo*, in which a parent company has attempted to rebut the presumption: such attempts usually, though not inevitably, fail<sup>117</sup>.

What is not clear is whether a minority shareholder might be held to have sufficient control to negate autonomy on the part of the subsidiary. Clearly the *Akzo* presumption would not apply, since that arises where a parent owns the totality, or almost the totality, of the shares of the subsidiary. Under Article 3(2) of the EU Merger Regulation ('the EUMR') a minority shareholder that would have the 'possibility of exercising decisive influence' over the affairs of another undertaking would have sufficient control for there to be a concentration<sup>118</sup>. The case law has yet to explain whether the notion of control in

<sup>109</sup> *Ibid*, para 11.

<sup>110</sup> See eg Case 107/82 *AEG-Telefunken v Commission* [1983] ECR 3151, [1984] 3 CMLR 325, paras 47–53.

<sup>111</sup> Case C-97/08 P [2009] ECR I-8237, [2009] 5 CMLR 2633.

<sup>112</sup> Case 48/69 [1972] ECR 619, [1972] CMLR 557.

<sup>113</sup> Case C-97/08 P [2009] ECR I-8237, [2009] 5 CMLR 2633, para 60; the presumption was also held to apply where Elf Aquitaine owned more than 97 per cent of the shares in Arkema France: Cases T-299/08 and T-343/08 *Elf Aquitaine v Commission* [2011] ECR II-000, on appeal to the Court of Justice Case C-401/11 P, not yet decided.

<sup>114</sup> Case C-97/08 P [2009] ECR I-8237, [2009] 5 CMLR 2633, para 61.

<sup>115</sup> *Ibid*, para 62; in saying this the Court was trying to avoid any possible confusion caused by its judgment in Case C-286/98 P *Stora Kopparbergs v Commission* [2000] ECR I-9925, [2001] 4 CMLR 370, which appeared to suggest that further indicia of control were needed even where the presumption applies.

<sup>116</sup> Case T-112/05 *Akzo Nobel NV v Commission* [2007] ECR II-5049, [2008] 4 CMLR 321.

<sup>117</sup> See 'Implications of the economic entity doctrine', pp 95–97 below.

<sup>118</sup> See ch 21, 'The concept of control', pp 834–836; note the more formalistic test of control for the purpose of calculating the turnover of 'undertakings concerned' in Article 5(4) of the EUMR: 'Turnover', pp 842–843.

the EUMR should be applied to the ‘single economic entity’ doctrine under Article 101(1), or whether the notions of control differ as between these two provisions. There are arguments for the adoption of a consistent approach<sup>119</sup>; however the notion of control under the EUMR includes negative control, and has the jurisdictional function of determining which transactions have to be scrutinised under that Regulation; the language of the cases under Article 101 suggest that there the requirement is for positive rather than negative control, where the test has substantive, as opposed to jurisdictional, consequences.

#### (iv) Decisions where the economic entity doctrine did not apply

In *Ijsselcentrale*<sup>120</sup> the Commission rejected the argument that four Dutch electricity generating companies and the joint venture that they controlled formed a single economic entity, and that therefore Article 101 did not apply to agreements between them. The fact that the generators formed part of an indivisible system of public electricity supply did not mean that they were one unit, for they were separate legal persons, not controlled by a single natural or legal person, and were able to determine their own conduct independently. In *Gosmé/Martell-DMP*<sup>121</sup> DMP was a joint subsidiary of Martell and Piper-Hiedsieck. Each parent held 50 per cent of the capital of DMP and the voting rights; half of the supervisory board members represented Martell shareholders and half Piper-Hiedsieck shareholders; DMP distributed brands not belonging to its parent companies; Martell and Piper-Hiedsieck products were invoiced to wholesalers on the same document; DMP had its own sales force and it alone concluded the contracts of sale with buying syndicates in France. In these circumstances the Commission concluded that Martell and DMP were independent undertakings, so that an agreement between them to identify and prevent parallel exports infringed Article 101 and attracted fines of €300,000 in the case of Martell and €50,000 in the case of DMP<sup>122</sup>.

If a subsidiary becomes independent of its parent, for example by being sold off, an agreement between the two companies could be caught by Article 101 once the parent–subsidiary relationship ends. In *Austin Rover/Unipart*<sup>123</sup> the relationship between those undertakings following the privatisation of British Leyland and the selling off of Unipart was investigated by the Commission under Article 101, but was found to satisfy the criteria of Article 101(3).

#### (v) Implications of the economic entity doctrine

Numerous consequences flow from the economic entity doctrine.

First, although an agreement between connected firms may not infringe Article 101, the manipulation of a subsidiary company by a parent might mean that the competition rules are broken in other ways; for example a parent might order its subsidiaries to impose export bans on their distributors: the agreements containing such restrictions could themselves infringe Article 101<sup>124</sup>.

<sup>119</sup> See Wils ‘The Undertaking as Subject of EC Competition Law and the Imputation of Infringements to Natural or Legal Persons’ (2000) 25 EL Rev 99, pp 104–108.

<sup>120</sup> OJ [1991] L 28/32, [1992] 5 CMLR 154, paras 22–24.

<sup>121</sup> OJ [1991] L 185/23, [1992] 5 CMLR 586, para 30.

<sup>122</sup> Note, however, the General Court’s judgment in Case T-314/01 *Coöperatieve Verkoop- en Productievereniging van Aardappelmeel en Derivaten Avebe BA* [2006] ECR II-3085, [2007] 4 CMLR 9, where the General Court held that the parents of a joint venture were responsible for its participation in a cartel and could therefore be fined: see in particular paras 135–142.

<sup>123</sup> OJ [1988] L 45/34, [1988] 4 CMLR 513.

<sup>124</sup> See eg *Re Kodak* JO [1970] L 147/24, [1970] CMLR D 19.

Secondly, as already noted in *Akzo Nobel*, the economic entity doctrine means that a parent company can be liable for the activities of its subsidiaries. Whereas Article 101 applies to agreements between *undertakings*, Commission decisions must be addressed to *legal entities*, and one undertaking can consist of many entities. The Commission regularly addresses infringement decisions to both a parent and its subsidiary, each of which is then jointly and severally liable for the infringement<sup>125</sup>; the parents of a joint venture can also be the addressees of a decision where their joint venture has infringed Article 101<sup>126</sup>. In *Bananas*<sup>127</sup> the Commission concluded that Del Monte was jointly and severally liable with Weichert for infringing Article 101 as a result of the combination of a partnership agreement and a distribution agreement between them that enabled Del Monte to exercise decisive influence over Weichert<sup>128</sup>. There have been many appeals in which parents have argued that the presumption that 100 per cent ownership of a subsidiary confers decisive influence has been successfully rebutted: such appeals usually fail. However the General Court held in *Alliance One International v Commission*<sup>129</sup> that the presumption had been rebutted by one member of the Standard Group of companies, Trans-Continental Leaf Tobacco Corp, although not by two others, Alliance One International and Standard Commercial Tobacco<sup>130</sup>.

Thirdly, where a parent and a subsidiary (or subsidiaries) form a single economic entity, the maximum fine permitted by Article 23(2) of Regulation 1/2003 of 10 per cent of an undertaking's worldwide turnover refers to the entire group's turnover, not just the turnover of the entity that actually committed the infringement: clearly this means that the maximum fine that can be imposed – for example where the subsidiary is part of a large conglomerate group – may be vastly greater than would otherwise be the case<sup>131</sup>. Fourthly, it may be that an action for damages can be brought either against a parent of a subsidiary company, or even against a subsidiary of a parent company; this can have significant implications for jurisdictional issues in civil litigation, potentially increasing the range of countries in which the action may be brought<sup>132</sup>. Fifthly, from a competition authority's point of view, it is desirable to attribute responsibility for infringements of the competition rules to the highest possible entity within a corporate group, not least in the hope that the board of directors of the parent company will take responsibility for eradicating anti-competitive behaviour from the entire organisation. Sixthly, the economic entity doctrine means that a parent company may bear responsibility for any infringements committed by subsidiaries within the corporate group, and this may lead to the imposition of higher fines because of recidivism<sup>133</sup>.

A seventh point is that the Commission can carry out a surprise inspection of a legal entity that is part of an economic unit even though the alleged infringement of the competition rules was the responsibility of another part of it<sup>134</sup>. A further point is that the

<sup>125</sup> Recent examples include *Power transformers*, Commission decision of 7 October 2009, paras 175ff; *Heat stabilisers*, Commission decision of 11 November 2009, paras 500ff.

<sup>126</sup> See ch 3 n 122 above. <sup>127</sup> Commission decision of 15 October 2008.

<sup>128</sup> The decision is on appeal to the General Court in Case T-587/08 *Fresh Del Monte Produce v Commission*, not yet decided.

<sup>129</sup> Case T-24/05 [2010] ECR II-000, [2011] 4 CMLR 545; see also Case T-185/06 *Air Liquide SA v Commission* [2011] ECR II-000, paras 63–64.

<sup>130</sup> Both the Commission and the two unsuccessful applicants have appealed to the Court of Justice in Cases C-628/10 P and C-14/11 P, not yet decided.

<sup>131</sup> See Case T-112/05 *Akzo Nobel NV v Commission* [2007] ECR II-5049, [2008] 4 CMLR 321, paras 90–91.

<sup>132</sup> See *Provimi Ltd v Aventis Animal Nutrition SA* [2003] EWHC 961 (Comm), [2003] All ER (D) 59 (May), a case arising out of the *Vitamins Cartel*, paras 31–36; see further ch 8, 'Private international law', pp 308–309.

<sup>133</sup> On the significance of recidivism to the level of fines see ch 7, 'Adjustments to the basic amount', pp 277–280.

<sup>134</sup> Case T-66/99 *Minoan Lines v Commission* [2003] ECR II-5515, [2005] 5 CMLR 1597.

logical consequence of the economic entity doctrine is that, when counting the number of undertakings that are party to an agreement for the purpose of applying one of the block exemptions, the legal and natural persons that form a single economic entity are counted as one<sup>135</sup>. Lastly, the immunity of agreements from Article 101 is in a sense a double-edged weapon: the EU Courts and the Commission have held that EU law can be applied to a parent company not present within the EU because of the conduct of its subsidiaries carried on there<sup>136</sup>.

## (D) Corporate reorganisation

Separate legal entities may be treated as one and the same undertaking where there is a corporate reorganisation in which one entity succeeds another: the liabilities of the latter may be attributed to the former<sup>137</sup>. In *Compagnie Royale Asturienne des Mines SA and Rheinzink GmbH v Commission*<sup>138</sup> the Court of Justice held that:

a change in the legal form and name of an undertaking does not create a new undertaking free of liability for the anticompetitive behaviour of its predecessor when, from an economic point of view, the two are identical.

In *PVC*<sup>139</sup> the Commission held that it is a matter of EU law whether one undertaking can be liable for the past conduct of another: changes in organisation under national company law are not decisive. In order to decide whether there is ‘undertaking identity’, the expression used by the Commission in the *PVC* decision, the determining factor ‘is whether there is a functional and economic continuity between the original infringer and the undertaking into which it was merged’<sup>140</sup>. It repeated this formulation in the second *PVC* decision<sup>141</sup>. In *All Weather Sports Benelux BV v Commission*<sup>142</sup> the General Court held that the Commission must adequately explain its reasoning when it imposes a fine on a successor to the entity that committed the infringement.

<sup>135</sup> Case 170/83 *Hydrotherm Gerätebau v Andreoli* [1984] ECR 2999, [1985] 3 CMLR 224; this is relevant, for example, under Regulation 330/2010, which requires that, for the block exemption to apply, there must not be two undertakings to a vertical agreement operating at the same level of the market: see ch 16, ‘Article 2(4): agreements between competing undertakings’, pp 658–659; and under Regulation 772/2004 on technology transfer agreements, which confers block exemption only on bilateral agreements: see ch 19, ‘The exempted agreement must be bilateral’, p 783.

<sup>136</sup> See Case 48/69 *ICI v Commission* [1972] ECR 619, [1972] CMLR 557; Case 6/72 *Europemballage Corp and Continental Can Co Inc v Commission* [1973] ECR 215, [1973] CMLR 199; see ch 12 on extraterritoriality generally.

<sup>141</sup> OJ [1994] L 239/14, paras 14–43.

<sup>142</sup> Case T-38/92 [1994] ECR II-211, [1995] 4 CMLR 43, paras 26–36.

In *Autorità Garante della Concorrenza e del Mercato v Ente tabacchi italiani – ETI SpA*<sup>143</sup> the Amministrazione autonoma dei monopoli di Stato ('AAMS') was an organ of the Italian state that had responsibility for managing the tobacco monopoly in that country. In 1999 its activities were transferred by law to a newly-created public body, Ente tabacchi italiani ('ETI'). ETI was subsequently transformed into a public company and was then privatised, coming under the control of British American Tobacco plc. The Italian competition authority adopted a decision that the Philip Morris group of companies had implemented a cartel in Italy in conjunction with AAMS and, subsequently, with ETI. A fine of €20 million was imposed on ETI. In its decision the Italian competition authority attributed AAMS's conduct prior to 1999 to ETI. An Italian court held that it was wrong to have done so; on appeal the Italian Council of State referred the matter to the Court of Justice under Article 267 TFEU. The Court of Justice held that it was legitimate for the Italian competition authority to have imposed the fine on ETI: AAMS and ETI were answerable to the same public authority, and the same unlawful conduct was carried out first by AAMS and then by its successor, ETI; the Court applied the reasoning of the *Rheinzink* case, and said that it made no difference that the activity transferred to ETI occurred not as a result of individuals but through the action of the legislature preparing ETI for privatisation<sup>144</sup>.

### (E) Liability for competition law infringements when one business is sold to another

An important question arises where one undertaking commits an infringement of the competition rules, but then sells the business that was responsible for the infringement to a third party. Clearly the purchaser will need to know whether it bears the risk of a future fine in the event of a competition authority adopting a decision. The basic rule of personal responsibility is that, if the undertaking that was responsible for the business is still in existence, it remains liable for the infringement rather than the acquirer<sup>145</sup>. For example in *Zinc Phosphate*<sup>146</sup> the Commission decided that, where an undertaking commits an infringement of Article 101 and then disposes of the assets that were the vehicle of the infringement and withdraws from the market, it will still be held responsible if it is still in existence<sup>147</sup>. However the liability may pass to a successor where the corporate entity which committed the violation has ceased to exist in law after the infringement was committed<sup>148</sup>; or where the initial participant in the cartel still has a legal existence but no longer carries on an economic activity on the relevant market and where there are structural links between the initial entity and the new operator of the undertaking<sup>149</sup>. In *Hoechst GmbH v Commission*<sup>150</sup> Hoechst failed to establish that its liability in relation to a monochloroacetic acid cartel had passed to the purchaser of that business under either of these two exceptions<sup>151</sup>. In *Conex Bänninger Ltd v European Commission*<sup>152</sup> the purchaser of assets from an undertaking that had been fined for infringing Article 101 in the *Copper*

*fittings* decision<sup>153</sup> faced the uncertainty of not knowing whether the Commission would seek to enforce the fines against it; however *Conex* failed in its attempt to obtain a declaration from the High Court in England and Wales that it was not liable and/or to have the matter referred to the Court of Justice in Luxembourg.

### 3. Agreements, Decisions and Concerted Practices

The policy of Article 101 is to prohibit cooperation between undertakings which prevents, restricts or distorts competition. In particular Article 101 is concerned with the eradication of cartels: chapter 13 will examine this subject in detail. However it is important to bear in mind that Article 101 can also apply to vertical agreements: the difficulties in establishing the existence of a vertical agreement are discussed below<sup>154</sup>.

The application of Article 101(1) is not limited to legal contracts: this would make evasion of the law simple. Article 101 applies also to cooperation achieved through informal agreements, decisions of trade associations and concerted practices. The Chapter I prohibition in the UK Competition Act 1998 has the same scope<sup>155</sup>. As will be seen, a broad interpretation has been given to each of the terms ‘agreement’, ‘decision’ and ‘concerted practice’. A difficult issue is whether parallel behaviour by firms in an oligopolistic industry is attributable to an agreement or concerted practice between them, in which case Article 101(1) would be applicable; or whether it is a natural effect of the structure of the market, in which case a different competition law response might be needed. Chapter 14 will consider the issue of oligopoly, tacit collusion and so-called ‘collective dominance’ under Article 102 and the Chapter II prohibition in the Competition Act.

#### (A) Agreements

In *Bayer AG v Commission*<sup>156</sup> the General Court reviewed the case law on the meaning of agreement and stated that the concept:

centres around the existence of a concurrence of wills between at least two parties, the form in which it is manifested being unimportant so long as it constitutes the faithful expression of the parties’ intention<sup>157</sup>.

In this section examples will be given of fact patterns that have been characterised as agreements for the purposes of Article 101. Consideration will then be given to the way in which the term ‘agreement’ applies to complex cartels. Discussion will follow on the steps that should be taken by an undertaking that wishes to ‘publicly distance’ itself from a cartel agreement. The final part of this section will look at the problems of proving that undertakings are party to a vertical agreement; the Court of Justice has stated specifically that the standard of proof on the Commission to prove the existence of an agreement contrary to Article 101(1) is the same whether the case is a horizontal or a vertical one<sup>158</sup>.

<sup>153</sup> Commission decision of 20 September 2006.

<sup>154</sup> See “‘Unilateral’ conduct and Article 101(1) in vertical cases”, pp 105–110 below.

<sup>155</sup> See ch 9, ‘Agreements’, pp 337–340.

<sup>156</sup> Case T-41/96 [2000] ECR II-3383, [2001] 4 CMLR 176.

<sup>158</sup> Case C-260/09 P *Activision Blizzard Germany GmbH v Commission* [2011] ECR I-000, [2011] 4 CMLR 964, para 71.

### (i) Examples of agreements

A legal contract of course qualifies as an agreement, including a compromise of litigation such as a trade mark delimitation agreement<sup>159</sup> or the settlement of a patent action<sup>160</sup>. ‘Gentleman’s agreements’<sup>161</sup> and simple understandings<sup>162</sup> have been held to be agreements, though neither is legally binding; there is no requirement that an agreement should be supported by enforcement procedures<sup>163</sup>. A ‘protocol’ which reflects a genuine concurrence of will between the parties constitutes an agreement within the meaning of Article 101(1)<sup>164</sup>. Connected agreements may be treated as a single one<sup>165</sup>. An agreement may be oral<sup>166</sup>. The Commission will treat the contractual terms and conditions in a standard-form contract as an agreement within Article 101(1)<sup>167</sup>. An agreement which has expired by effluxion of time but the effects of which continue to be felt can be caught by Article 101(1)<sup>168</sup>. The constitution of a trade association qualifies as an agreement<sup>169</sup>. An agreement entered into by a trade association might be construed as an agreement on the part of its members<sup>170</sup>. An agreement to create a European Economic Interest Grouping, or the bye-laws establishing it, may be caught by Article 101(1)<sup>171</sup>. There may be ‘inchoate understandings and conditional or partial agreement’ during a

<sup>159</sup> See eg *Re Penney’s Trade Mark* OJ [1978] L 60/19, [1978] 2 CMLR 100; *Re Toltecs and Dorcet* OJ [1982] L 379/19, [1983] 1 CMLR 412, upheld on appeal Case 35/83 *BAT v Commission* [1985] ECR 363, [1985] 2 CMLR 470; it is not entirely clear what effect embodiment of the compromise in an order of a national court has on the applicability of Article 101(1): see Case 258/78 *LC Nungesser KG v Commission* [1982] ECR 2015, [1983] 1 CMLR 278, paras 80–91, where the Court of Justice was delphic on this issue; the tenor of the Court of Justice’s judgment in *BAT v Commission* would suggest that the agreement would be caught even where sanctioned by a national court. On trade mark delimitation agreements, see further ch 19, ‘Settlements of litigation’, pp 795–796.

<sup>160</sup> See eg Case 65/86 *Bayer v Sülhofer* [1988] ECR 5249, [1990] 4 CMLR 182; see further ch 19, ‘Settlements of litigation’, pp 795–796.

bargaining process sufficient to amount to an agreement in the sense of Article 101(1)<sup>172</sup>. Guidelines issued by one person that are adhered to by another can amount to an agreement<sup>173</sup>; and circulars and warnings sent by a manufacturer to its dealers may be treated as part of the general agreement that exists between them, although the Commission lost a case of this kind in *Volkswagen*<sup>174</sup>. The exchange of correspondence can amount to an agreement<sup>175</sup>. The fact that formal agreement has not been reached on all matters does not preclude a finding of an agreement<sup>176</sup>, and there can be an agreement or concerted practice notwithstanding the fact that only one of the participants at a meeting reveals its intentions<sup>177</sup>. Undertakings cannot justify infringement of the competition rules by claiming that they were forced into an agreement by the conduct of other traders<sup>178</sup>. Where an agreement is entered into unwillingly, this may be significant in influencing the Commission to mitigate a fine<sup>179</sup>, not to impose a fine<sup>180</sup> or not to institute proceedings at all. The fact that one party accepts that it was party to an agreement does not preclude the other(s) from challenging the existence of the same agreement<sup>181</sup>. The fact that the natural person who entered into the agreement did not have authority to do so does not mean that the undertaking that employs him or her is not liable<sup>182</sup>.

## (ii) Complex cartels

Many cartels are complex and of long duration. Over a period of time some firms may be more active than others in the running of a cartel; some may ‘drop out’ for a while but subsequently re-enter; others may attend meetings or communicate in other ways in order to be kept informed, without necessarily intending to fall in line with the agreed plan; there may be few occasions on which all the members of a cartel actually meet or behave precisely in concert with one another. This presents a problem for a competition authority: where the shape and active membership of a cartel changes over a period of time, must the authority prove a series of discrete agreements or concerted practices, and identify each of the parties to each of those agreements and concerted practices? This would require a considerable amount of evidence and impose a very high burden on the competition authority. It might also mean that it would not be possible to impose fines in relation to ‘old’ agreements and concerted practices, in relation to which infringement

<sup>172</sup> *Pre-Insulated Pipe Cartel* OJ [1999] L 24/1, [1999] 4 CMLR 402, para 133, substantially upheld on appeal Cases T-9/99 etc *HFB Holding v Commission* [2002] ECR II-1487, [2002] 5 CMLR 571.

proceedings had become time-barred<sup>183</sup>: precisely this issue arose, for example, in *BASF AG v Commission*<sup>184</sup>, an appeal in the *Choline Chloride* case.

The Commission, upheld by the EU Courts, has addressed these problems in two ways: first, by developing the idea that it is not necessary to characterise infringements of Article 101(1) specifically as an agreement on the one hand or a concerted practice on the other; and secondly by establishing the concept of a ‘single overall agreement’ for which all members of a cartel bear responsibility, irrespective of their precise involvement from day to day<sup>185</sup>.

#### (A) *Agreement ‘and/or’ concerted practice*

The Commission has stated that agreements and concerted practices are conceptually distinct<sup>186</sup>. However Advocate General Reischl has said that there is little point in defining the exact point at which agreement ends and concerted practice begins<sup>187</sup>. It may be that, in a particular case, linguistically it is more natural to use one term than the other, but legally nothing turns on the distinction: the important distinction is between collusive and non-collusive behaviour<sup>188</sup>. Sometimes the Commission will say that, even if contacts between competitors do not amount to an agreement, they can still be characterised as a concerted practice<sup>189</sup>. In *PVC*<sup>190</sup> the Commission reached the conclusion that the parties to the cartel had participated in an agreement ‘and/or’ a concerted practice. On appeal to the General Court Enichem argued that the Commission was not entitled to have made this ‘joint classification’. In its judgment the General Court rejected this argument and upheld the Commission<sup>191</sup>. It held that:

In the context of a complex infringement which involves many producers seeking over a number of years to regulate the market between them the Commission cannot be expected to classify the infringement precisely, for each undertaking and for any given moment, as in any event both those forms of infringement are covered by Article [101] of the Treaty<sup>192</sup>.

The General Court went on to say that joint classification was permissible where the infringement includes elements both of an agreement and of a concerted practice, with-

<sup>183</sup> Under Article 26 of Regulation 1/2003, OJ [2003] L 1/1, the Commission cannot impose fines in relation to an infringement that ended five years or more before it initiated proceedings: see Kerse and Khan *EC Antitrust Procedure* (Sweet & Maxwell, 5th ed, 2005), paras 7.82–7.85.

<sup>184</sup> Cases T-101/05 and T-111/05 [2007] ECR II-4949, [2008] 4 CMLR 347, paras 132–223.

<sup>187</sup> See Cases 209/78 etc *Van Landewyck v Commission* [1980] ECR 3125, p 3310, [1981] 3 CMLR 134, p 185.

<sup>188</sup> *Polypropylene* OJ [1986] L 230/1, [1988] 4 CMLR 347, para 87, substantially upheld on appeal Case T-7/89 *SA Hercules NV v Commission* [1991] ECR II-1711, [1992] 4 CMLR 84, upheld on appeal to the Court of Justice Case C-51/92 P *Hercules Chemicals v Commission* [1999] ECR I-4235, [1999] 5 CMLR 976; *Soda-ash/Solvay, ICI* OJ [1991] L 152/1, [1994] 4 CMLR 645, para 55.

<sup>189</sup> See eg *Candle Waxes*, Commission decision of 1 October 2008, para 239, on appeal to the General Court, Cases T-543/08 etc *RWE and RWE Dea v Commission*, not yet decided.

<sup>190</sup> OJ [1994] L 239/14, paras 30–31; this decision was taken by the Commission after its earlier decision, OJ [1989] L 74/1, had been annulled by the Court of Justice for infringement of essential procedural requirements: Cases C-137/92 P etc *Commission v BASF* [1994] ECR I-2555.

<sup>191</sup> Cases T-305/94 etc *NV Limburgse Vinyl Maatschappij v Commission* [1999] ECR II-931, [1999] 5 CMLR 303, paras 695–699; the General Court had noted the possibility of a joint classification in its earlier judgments in the *Polypropylene* case: see eg Case T-1/89 *Rhône-Poulenc v Commission* [1991] ECR II-867, paras 125–127 and Case T-8/89 *DSM v Commission* [1991] ECR II-1833, paras 234–235.

<sup>192</sup> Cases T-305/94 etc *NV Limburgse Vinyl Maatschappij v Commission* [1999] ECR II-931, [1999] 5 CMLR 303, para 696.

out the Commission having to prove that there was both an agreement and a concerted practice throughout the period of the infringement. This approach has been confirmed by the Court of Justice in *Commission v Anic*<sup>193</sup> and in *Asnef-Equifax*<sup>194</sup> where, in the case of cooperation between competitors in the form of an indirect exchange of information, it concluded that there was no need to characterise the cooperation at issue specifically as a concerted practice, an agreement or a decision of an association of undertakings.

The Commission has adopted a joint classification approach in many decisions, for example *Cartonboard*<sup>195</sup> and *Pre-Insulated Pipe Cartel*<sup>196</sup> and, more recently, *Car Glass*<sup>197</sup> and *Marine Hoses*<sup>198</sup>; it has taken this approach in vertical cases as well as horizontal ones<sup>199</sup>. As one former Commission official has put it: the search should not be for an agreement on the one hand or a concerted practice on the other; rather for a ‘partnership for unlawful purposes with all the possible disagreements about methods that may occur in such a venture without affecting the cohesion of the shared purpose and design’<sup>200</sup>.

### (B) *The concept of a ‘single, overall agreement’*<sup>201</sup>

In a series of decisions from the mid-1980s the Commission has developed the concept of a ‘single, overall agreement’ for which undertakings bear responsibility, even though they may not be involved in its operation on a day-to-day or a continuing basis. For example in *Polypropylene*<sup>202</sup> the Commission investigated a complex cartel agreement in the petrochemicals sector involving 15 firms over many years. It held that the detailed arrangements whereby the cartel operated were all part of a single, overall agreement: this agreement was oral, not legally binding, and there were no sanctions for its enforcement. Having established that there was a single agreement, the Commission concluded that all 15 firms were guilty of infringing Article 101, even though some had not attended every meeting of the cartel and had not been involved in every aspect of its decision-making: participation in the overall agreement was sufficient to establish guilt. Furthermore, the fact that some members of the cartel had reservations about whether to participate – or indeed intended to cheat by deviating from the agreed conduct – did not mean that they were not party to an agreement. The Commission reached similar conclusions in other cases, for example *PVC*<sup>203</sup>, *LdPE*<sup>204</sup>, in its second decision on *PVC*<sup>205</sup>, in *Amino Acids*<sup>206</sup> and in *Dutch Bitumen*<sup>207</sup>.

<sup>193</sup> Case C-49/92 [1999] ECR I-4125 [2001] 4 CMLR 602, paras 132 and 133; for critical comment on the Court of Justice’s judgment in *Anic* see Wessely (2001) 38 CML Rev 739, 762–764; see also Case T-62/98 *Volkswagen AG v Commission* [2000] ECR II-2707, [2000] 5 CMLR 853, para 237

<sup>202</sup> OJ [1986] L 230/1, [1988] 4 CMLR 347.

<sup>203</sup> OJ [1989] L 74/1, [1990] 4 CMLR 345.

<sup>204</sup> OJ [1989] L 74/21, [1990] 4 CMLR 382, paras 49–54.

<sup>205</sup> OJ [1994] L 239/14, paras 30–31.

<sup>206</sup> OJ [2001] L 152/24, [2001] 5 CMLR 322, paras 237–238.

<sup>207</sup> Commission decision of 13 December 2006, paras 138–141.

The General Court has confirmed the concept of a ‘single overall agreement’<sup>208</sup>. In the appeal against the second *PVC* decision the General Court upheld the Commission’s view that an undertaking can be held responsible for an overall cartel, even though it participated in only one or some of its constituent elements, ‘if it is shown that it knew, or must have known, that the collusion in which it participated... was part of an overall plan intended to distort competition and that the overall plan included all the constituent elements of the cartel’<sup>209</sup>. However the General Court has also said, in the *Cement* cases, that where there are numerous bilateral and multilateral agreements between a large number of undertakings, it cannot be *presumed* from this that they form part of a single, overall agreement: it is necessary for the Commission to prove that this is the case<sup>210</sup>. In *BASF v Commission*<sup>211</sup> the General Court annulled a Commission finding of a single overall agreement: the global and the European cartels were separate from one another, and the Commission was time-barred from imposing a fine in respect of the global cartel, which had ended in 1994<sup>212</sup>. The Court also annulled a finding of a single and continuous agreement in *Verhuizingen Coppens NV v Commission*<sup>213</sup>, one of the appeals in the *International Removal Services* case, as the Commission had failed to show that Verhuizingen knew, or ought to have known, about the offending conduct of the other participants in the cartel<sup>214</sup>.

It is not impossible that an undertaking might want to argue that it *did* participate in a single, overall agreement: for example the Commission imposed a series of fines on undertakings involved in four different infringements of Article 101 involving various graphite products<sup>215</sup>. The aggregated fines amounted to more than 10 per cent of SGL Carbon’s turnover; the General Court held that the Commission was permitted to impose four fines, since each decision involved a different infringement; if it had decided that there was a single, overall agreement affecting all graphite products, the 10 per cent ceiling would have been applicable and the fines on SGL would have been subject to a cap<sup>216</sup>.

The cumulative effect of these judgments is clearly beneficial to the Commission in its anti-cartel policy, since the EU Courts seem to have deliberately refrained from construing the expressions ‘agreement’ and ‘concerted practice’ in a legalistic or formalistic manner: what emerges, essentially, is that any contact between competitors that touches upon business behaviour such as pricing, markets, customers and volume of output is risky in the extreme.

### (iii) ‘Public distancing’ from a cartel

In *Tréfileurope v Commission*<sup>217</sup>, one of the appeals in the *Welded Steel Mesh* case, the General Court held that the fact that an undertaking does not abide by the outcome of meetings which have a manifestly anti-competitive purpose does not relieve it of full

<sup>208</sup> See Case T-1/89 *Rhône-Poulenc v Commission* [1991] ECR II-867, para 126.

responsibility for its participation in the cartel, if it has not publicly distanced itself from what was agreed in the meetings<sup>218</sup>. This has been repeated on numerous occasions, for example in *BPB de Eendracht NV v Commission*<sup>219</sup>, an appeal in the *Cartonboard* case, in the *Cement* cases<sup>220</sup> and in *Steel Beams*<sup>221</sup>: the reason for this rule is that, having participated in the meeting without publicly distancing itself from what was discussed, the undertaking has given the other participants to believe that it subscribed to what was decided there and that it would comply with it<sup>222</sup>. In *Westfalen Gassen Nederland BV*<sup>223</sup>, an appeal in the *Industrial and medical gases* case, the General Court said that the notion of ‘public distancing’ as a means of excluding liability must be interpreted narrowly<sup>224</sup>; the Court did not go so far as to say that, in order to do so, the undertaking concerned should have blown the whistle to a competition authority, but it did suggest that, at the least, it should have written to its competitors and to the secretary of the trade association responsible for the meetings to say that it did not wish to be considered to be a member of the cartel nor to participate in meetings that were a cover for unlawful concerted action<sup>225</sup>.

#### (iv) ‘Unilateral’ conduct and Article 101(1) in vertical cases<sup>226</sup>

The scheme of the EU competition rules is that Article 101 applies to conduct by two or more undertakings which is consensual and that Article 102 applies to unilateral action by a dominant firm. It follows that unilateral conduct by a firm that is not dominant is not caught at all. In a number of vertical cases the Commission has held that conduct which at first sight appeared to be unilateral fell within Article 101(1) as an agreement or a concerted practice; these were cases in which the Commission was concerned either that exports from one Member State to another were being inhibited or that resale prices were being maintained. Several of these decisions were upheld on appeal by the EU Courts; however in a number of cases, beginning with *Bayer AG/Adalat*<sup>227</sup> in 1996, findings of the Commission that there were agreements between a supplier and its distributors have been annulled on appeal<sup>228</sup>.

#### (A) *AEG Telefunken v Commission; Ford v Commission*

Two judgments of the Court of Justice in the 1980s provide an important starting point when considering this issue. In *AEG-Telefunken v Commission*<sup>229</sup> the Court of Justice rejected a claim that refusals to supply retail outlets which were objectively suitable to handle AEG’s goods were unilateral acts falling outside Article 101(1). The Court of Justice held that the refusals arose out of the contractual relationship between AEG and

<sup>228</sup> See ‘Judgments since *Bayer v Commission* annulling Commission findings of an agreement’, pp 109–110 below.

<sup>229</sup> Case 107/82 [1983] ECR 3151, [1984] 3 CMLR 325.

the established distributors within its selective distribution system and their mutual acceptance, tacit or express, of AEG's intention to exclude from the network distributors who, though qualified technically, were not prepared to adhere to its policy of maintaining a high level of prices and excluding modern channels of distribution<sup>230</sup>. The frequency of AEG's refusals to supply precluded the possibility that they were isolated cases not forming part of systematic conduct<sup>231</sup>. The AEG case suggested that it may be relatively easy to infer an agreement and/or concerted practice between the participants in a selective distribution system who have a strong mutual interest in excluding firms willing to undercut the prevailing retail price<sup>232</sup>.

In *Ford v Commission*<sup>233</sup> the Court of Justice held that a refusal by Ford's German subsidiary to supply right-hand drive cars to German distributors was attributable to the contractual relationship between them; at the time right-hand drive cars were sold in Germany to British military forces stationed there: they could then bring them back to the UK, having bought them in Germany at prices considerably below those in the UK. The *Ford* judgment appeared to be a considerable extension of *AEG*. In *AEG* there was an obvious community of interest between participants in the selective distribution system in excluding discounters. In *Ford*, however, the German distributors with whom Ford had entered into contracts did not themselves benefit from the refusal to supply right-hand drive cars: the beneficiaries of this policy were distributors in the UK, who would be shielded from cheaper parallel imports. In *Ford* the 'unilateral' act held to be attributable to the agreements between the supplier and its distributors was not an act for the benefit of those very distributors. However, the main issue in *Ford* was not whether there were agreements between Ford and its German distributors: of course there were. Rather the issue with which the Court of Justice was concerned was whether the agreements, as implemented in practice, satisfied the criteria of Article 101(3), and the Court decided that they did not<sup>234</sup>. This is how the Court distinguished the *Ford* judgment in its 2004 judgment in the *Bayer* case<sup>235</sup>, and is an important limiting principle.

### (B) *Subsequent cases prior to Bayer*

In a number of decisions after *AEG* and *Ford* the Commission successfully applied Article 101(1) to apparently unilateral conduct. In *Sandoz*<sup>236</sup> it held that, where there was no written record of agreements between a producer and its distributors, unilateral measures, including placing the words 'export prohibited' on all invoices, were attributable to the continuing commercial relationship between the parties and were within Article 101(1). On appeal the Court of Justice upheld the Commission's decision<sup>237</sup>. In *Vichy*<sup>238</sup> the Commission specifically applied paragraph 12 of the *Sandoz* judgment, and its decision finding an agreement was upheld on appeal<sup>239</sup>. In *Tipp-Ex*<sup>240</sup> the Commission applied the

<sup>234</sup> *Ibid*, para 12. <sup>235</sup> See '*Bayer v Commission*', pp 107–109 below.

<sup>236</sup> OJ [1987] L 222/28, [1989] 4 CMLR 628.

<sup>237</sup> Case C-277/87 *Sandoz Prodotti Farmaceutici SpA v Commission* [1990] ECR I-45.

<sup>238</sup> OJ [1991] L 75/57.

<sup>239</sup> Case T-19/91 *Vichy v Commission* [1992] ECR II-415.

<sup>240</sup> OJ [1987] L 222/1, [1989] 4 CMLR 425.

Court of Justice's judgments in *AEG* and *Ford*, holding that there was an infringement of Article 101 consisting of agreements between Tipp-Ex and its authorised dealers regarding the mutual protection of territories; again the Commission's decision was upheld on appeal<sup>241</sup>. In *Konica*<sup>242</sup> the Commission held that the sending of a circular to its distributors requiring them not to export Konica film from the UK to Germany was an offer by Konica, and that by complying with the circular the distributors had accepted it, with the result that there was an agreement or at least a concerted practice within Article 101; there was no appeal in this case. In *Bayo-n-ox*<sup>243</sup> goods were supplied at a special price, on condition that customers use them for their own requirements: they could not resell them; this stipulation was contained in circulars sent by the supplier to the customers. The Commission said that by accepting the products at the special price the customers had tacitly agreed to abide by the 'own requirements' condition. The Commission has said that the fact that a customer is acting contrary to its own best interests in agreeing to its supplier's terms does not mean that it is not party to a prohibited agreement under Article 101(1)<sup>244</sup>. In *Volkswagen AG v Commission*<sup>245</sup> the General Court rejected Volkswagen's argument that it had acted unilaterally as opposed to by agreement with its distributors to restrict parallel trade from Italy to Germany and Austria<sup>246</sup>. These cases clearly demonstrated the considerable risks borne by suppliers that attempt to control the resale activities of their distributors; however the *Bayer* case discussed in the next section revealed that the notion of an agreement in Article 101(1) is not infinitely elastic, and that the Commission will be successful on appeal before the EU Courts only where it can adduce convincing evidence of a meeting of minds between a supplier and its distributor(s).

### (C) *Bayer v Commission*

In *Bayer AG/Adalat*<sup>247</sup> the Commission adopted a decision that Bayer and its wholesalers were parties to an agreement to restrict parallel trade in a pharmaceutical product, Adalat, from France and Spain to the UK. On this occasion, however, the General Court annulled the decision since, in its view, the Commission had failed to prove the existence of an agreement<sup>248</sup>; an appeal by the Commission and a parallel importer to the Court of Justice to reverse the General Court's judgment failed<sup>249</sup>.

In order to prevent its French and Spanish wholesalers from supplying to parallel exporters to the UK, and thereby to protect its UK pricing strategy, Bayer had reduced the volume of its supplies of Adalat to France and Spain. An important feature of the case was that wholesalers in France and Spain were required to maintain sufficient stocks to enable them to supply local pharmacies with their requirements for drugs: clearly this

(1997) 22 EL Rev 123; Lidgard 'Unilateral Refusal to Supply: an Agreement in Disguise?' (1997) 18 ECLR 352; Jakobsen and Broberg 'The Concept of Agreement in Article 81(1) EC: On the Manufacturer's Right to Prevent Parallel Trade within the European Community' (2002) 23 ECLR 127.

<sup>248</sup> Case T-41/96 [2000] ECR II-3383, [2001] 4 CMLR 176.

<sup>249</sup> Cases C-2/01 P and C-3/01 P *Bundesverband der Arzneimittel-Importeure eV v Bayer AG* [2004] ECR I-23, [2004] 4 CMLR 653.

meant that, if Bayer assessed the level of domestic demand correctly, it could limit the volumes of Adalat supplied to the point where there would be none available for export. Prices for pharmaceuticals in France and Spain were as much as 40 per cent lower than in the UK, so that the market was ripe for parallel trade. The Commission concluded that a tacit agreement existed between Bayer and its wholesalers not to export to the UK that was contrary to Article 101(1): in its view the agreement was evidenced by the fact that the wholesalers had ceased to supply the UK in response to Bayer's tactic of reducing supplies. It has to be said that this would appear to be counter-intuitive, given that the wholesalers had tried every means possible to defy Bayer and to obtain extra supplies for the purpose of exporting to the UK: there was no 'common interest' in this case between Bayer and its wholesalers, whose respective needs were diametrically opposed. To put the point another way, this case was certainly not like *AEG*; if anything it was like *Ford*, where the beneficiary of Ford's restriction of supplies was not the German distributors deprived of suppliers, but the UK distributors protected from parallel trade. Bayer did not deny that it had reduced the quantities delivered to France and Spain, but it argued that it had acted unilaterally rather than pursuant to an agreement.

On appeal the General Court held that there was no agreement and annulled the Commission's decision. The Court acknowledged that there could be an agreement where one person tacitly acquiesces in practices and measures adopted by another<sup>250</sup>; however it concluded that the Commission had failed both to demonstrate that Bayer had intended to impose an export ban<sup>251</sup> and to prove that the wholesalers had intended to adhere to a policy on the part of Bayer to reduce parallel imports<sup>252</sup>. The General Court was satisfied that earlier judgments, including *Sandoz*, *Tipp-Ex* and *AEG*, were distinguishable<sup>253</sup>. It also rejected the argument that the wholesalers, by maintaining their commercial relations with Bayer after the reduction of supplies, could thereby be held to have agreed with it to restrain exports<sup>254</sup>. The General Court was not prepared to extend the scope of Article 101(1), acknowledging the importance of 'free enterprise' when applying the competition rules<sup>255</sup>.

The Commission and a parallel importer appealed to the Court of Justice, which upheld the General Court's judgment<sup>256</sup>. At paragraph 88 of its judgment the Court of Justice held that:

The mere fact that the unilateral policy of quotas implemented by Bayer, combined with the national requirements on the wholesalers to offer a full product range, produces the same effect as an export ban does not mean either that the manufacturer imposed such a ban or that there was an agreement prohibited by Article [101(1)] of the Treaty.

The Court of Justice noted that the Commission's analysis risked confusing the respective roles of Articles 101 and 102<sup>257</sup>, and that the *AEG* and *Ford* cases were distinguishable<sup>258</sup>.

<sup>250</sup> *Ibid*, para 71.

<sup>251</sup> *Ibid*, paras 78–110.

<sup>252</sup> *Ibid*, paras 111–157.

<sup>253</sup> *Ibid*, paras 158–171.

<sup>254</sup> *Ibid*, paras 172–182.

<sup>255</sup> *Ibid*, para 180.

<sup>256</sup> Cases C-2/01 P and C-3/01 P *Bundesverband der Arzneimittel-Importeure eV v Bayer AG* [2004] ECR I-23, [2004] 4 CMLR 653; the Court of Appeal in England and Wales applied the Court of Justice's judgment in *Bayer in Unipart Group Ltd v O2 (UK) Ltd* [2004] EWCA 1034, [2004] UKCLR 1453, in deciding that Unipart was not the victim of a margin squeeze imposed upon it by a co-contractor, O2: since O2 was not dominant Unipart could not proceed against it on the basis of Article 102 and therefore tried to argue that the margin squeeze arose from its contractual relationship with O2.

<sup>257</sup> Cases C-2/01 P and C-3/01 P *Bundesverband der Arzneimittel-Importeure eV v Bayer AG* [2004] ECR I-23, [2004] 4 CMLR 653, para 101.

<sup>258</sup> *Ibid*, paras 107–108.

The importance of the judgments of the General Court and Court of Justice in *Bayer* cannot be overstated. Had the Commission's decision been upheld, the notion that an agreement for the purpose of Article 101(1) requires consensus between the parties would have been virtually eliminated; while this would have given the Commission greater control over restrictions of parallel trade within the EU, it would have done so at the expense of the integrity of the competition rules, which clearly apprehend unilateral behaviour only where a firm has a dominant position in the sense of Article 102.

**(D) Judgments since *Bayer v Commission annulling Commission findings of an agreement*<sup>259</sup>**

There have been several cases since *Bayer* in which decisions of the Commission that vertical agreements existed between a supplier and its distributors have been annulled on appeal. For example in *JCB* the Commission imposed fines on JCB for various infringements of Article 101, including for entering into agreements with distributors to fix discounts and resale prices<sup>260</sup>. On appeal the General Court annulled the Commission's decision on this point: it was true that JCB had recommended prices to its distributors, and that the prices that it charged to them would influence their own resale prices; however this was not sufficient in itself to show that there was an agreement between JCB and the distributors<sup>261</sup>. In *General Motors Nederland BV v Commission*<sup>262</sup> the General Court heard an appeal from a Commission decision, *Opel Nederland BV*<sup>263</sup>, in which it had imposed fines of €43 million on Opel, a subsidiary of General Motors. The General Court annulled one of the Commission's findings: the Commission had argued that Opel's policy was to limit the number of cars that would be supplied to its Dutch dealers in order to prevent exports, and that this policy had been communicated to the dealers and agreed to by them; the General Court held that there was no direct proof in the decision that there had been any such communication, and even less that that measure had entered into the contractual relations between Opel and its dealers<sup>264</sup>. As a consequence the fine was reduced from €43 million to €35 million. A separate finding in this case – that a bonus system that the dealers had undoubtedly agreed to had as its object the restriction of competition – was updated by the General Court<sup>265</sup>.

In a second decision involving Volkswagen<sup>266</sup> the Commission fined that company €30.96 million for agreeing to fix prices with its distributors for the VW Passat car. Volkswagen had sent circulars and letters to its distributors urging them not to sell the Passat at discounted prices. In the Commission's view the objectives set out in these circulars or letters became integral parts of the dealership agreement that the distributors had entered into; relying on cases such as *AEG* and others on selective distribution

<sup>259</sup> The Commission's decisions finding vertical agreements were upheld in *Nintendo* OJ [2003] L 255/33, upheld on appeal Case T-13/03 *Nintendo v Commission* [2009] ECR II-975, [2009] 5 CMLR 1421 and Case T-18/03 *CD-Contact Data GmbH v Commission* [2009] ECR II-1021, [2009] 5 CMLR 1469, paras 46–75: the latter case was also upheld on appeal to the Court of Justice in Case C-260/09 P *Activision Blizzard Germany GmbH v Commission* [2011] ECR I-000, [2011] 4 CMLR 964, and in *SEP et autres/Peugeot SA* Commission decision of 5 October 2005, upheld on appeal Case T-450/05 *Automobiles Peugeot and Peugeot Nederland v Commission* [2009] ECR II-2533.

<sup>260</sup> OJ [2002] L 69/1, [2002] 4 CMLR 148, paras 138–149.

<sup>262</sup> Case T-368/00 [2003] ECR II-4491, [2004] 4 CMLR 1302.

<sup>263</sup> OJ [2001] L 59/1, [2001] 4 CMLR 1441.

<sup>264</sup> Case T-368/00 [2003] ECR II-4491, [2004] 4 CMLR 1302, paras 78–89.

<sup>265</sup> *Ibid*, paras 97–106; upheld on appeal Case C-551/03 P [2006] ECR I-3173, [2006] 5 CMLR 9.

<sup>266</sup> *Volkswagen* OJ [2001] L 262/14, [2001] 5 CMLR 1309, paras 61–69.

systems<sup>267</sup> the Commission argued that, within a selective distribution system, calls by a supplier such as Volkswagen of the type set out in the circulars and letters became part of the contractual relationship, without the need to prove any acquiescence on the part of the distributors. The General Court rejected the Commission's arguments and annulled the decision in *Volkswagen v Commission*<sup>268</sup>: the General Court did not accept the Commission's analysis of the case law on selective distribution, especially given that this would mean that the distributors, who had signed perfectly lawful dealership agreements in the first place, would be taken to have agreed to subsequent calls from Volkswagen that would make the implementation of the agreements illegal. On appeal the Court of Justice set aside the judgment of the General Court<sup>269</sup> in so far as it had suggested that a lawful clause in an agreement could never authorise a call contrary to Article 101<sup>270</sup>; nevertheless the Court of Justice still reached the same substantive conclusion, that the Commission had failed to establish an agreement<sup>271</sup>.

### (E) Comment

Clearly the judgments in the previous section in which Commission findings of agreements in vertical relationships were annulled mean that it must be particularly careful to adduce evidence that there exists 'a concurrence of wills between at least two parties', in the words of the General Court's judgment in *Bayer*. However it would be dangerous for suppliers, wishing to suppress exports or to maintain resale prices, to suppose that this case law means that this is something that can be achieved without risk. In so far as they can achieve their intended purpose on a purely unilateral basis, *Bayer* shows that Article 101 can be avoided. However it should be stressed that, in that case, if it were not for the stock-holding obligations to supply French and Spanish pharmacies with Adalat, the wholesalers in question could have decided to sell all the Adalat that they acquired to parallel traders: in other words Bayer's unilateral reduction of suppliers was not enough, in itself, to stanch the parallel trade. In *General Motors* the Commission lost on the point about Opel's export policy because it had failed to show that the policy had been communicated to its distributors or that they had reacted to a policy known to them: if one reverses the facts – suppose that Opel had communicated the policy and the distributors had changed their behaviour accordingly – there would have been an agreement. As far as *Volkswagen* is concerned, the Commission appears to have argued its case in much too legalistic a manner, basing itself on the terms of the standard-form dealership agreement and the inferences to be drawn from it. Had the Commission argued that the distributors knew of Volkswagen's intentions and altered their pricing practices accordingly, it might have succeeded. These cases are highly fact-specific, and it would be wrong for suppliers and their distributors to draw too comforting a conclusion from the Commission's succession of defeats.

### (B) Decisions by associations of undertakings

Coordination between independent undertakings may be achieved through the medium of a trade association. A trade association may have a particularly important role where the cartel consists of a large number of firms, in which case compliance with the rules of the cartel needs to be monitored: where only a few firms collude, it is relatively easy for

<sup>267</sup> See the cases cited in paras 18 and 19 of the General Court's judgment.

<sup>268</sup> Case T-208/01 [2003] ECR I-5141, [2004] 4 CMLR 727, paras 30–68.

<sup>269</sup> Case C-74/04 P *Commission v Volkswagen* [2006] ECR I-6585, [2008] 4 CMLR 1297.

<sup>270</sup> *Ibid*, paras 43–44.

<sup>271</sup> *Ibid*, para 54.

each firm to monitor what the others are doing<sup>272</sup>. The possibility that trade associations may play a part in cartel activity is explicitly recognised in Article 101(1) by the proscription of ‘decisions by associations of undertakings’ that could restrict competition. The application of Article 101(1) to decisions means that the trade association itself may be held liable and be fined<sup>273</sup>; where the Commission intends to impose a fine on the association as well as, or in addition to, its members, this must be made clear in the statement of objections<sup>274</sup>. In *FNCBV v Commission*<sup>275</sup> the General Court upheld a decision of the Commission in which it had held that, as farm operators, farmers and breeders were engaged in economic activities, they were acting as undertakings; and that it followed that their trade unions and the federations that grouped those unions together were associations of undertakings. The federations, rather than the individual undertakings, were fined in this case<sup>276</sup>; the General Court reduced the fines slightly. Further appeals to the Court of Justice were rejected<sup>277</sup>; the Court confirmed that, in determining the maximum fine that could be imposed on the federations, the Commission was entitled to take into account the members’ turnover; even though they had no power to bind their members, they had been engaged in practices directly for the benefit of their members and in cooperation with them<sup>278</sup>.

It has been held that the constitution of a trade association is itself a decision<sup>279</sup>, as well as regulations governing the operation of an association<sup>280</sup>. An agreement entered into by an association might also be a decision. A recommendation made by an association has been held to amount to a decision: the fact that the recommendation is not binding upon its members does not prevent the application of Article 101(1)<sup>281</sup>, nor that it is not unanimously accepted by the members<sup>282</sup>. In such cases it is necessary to consider whether members in the past have tended to comply with recommendations that have

been made, and whether compliance with the recommendation would have a significant influence on competition within the relevant market. In *IAZ International Belgium NV v Commission*<sup>283</sup> an association of water-supply undertakings recommended its members not to connect dishwashing machines to the mains system which did not have a conformity label supplied by a Belgian association of producers of such equipment. The Court of Justice confirmed the Commission's view that this recommendation, though not binding, could restrict competition, since its effect was to discriminate against appliances produced elsewhere in the EU.

In its decision in *MasterCard*<sup>284</sup> the Commission concluded that the rules of the MasterCard organisation remained a 'decision' of an association of undertakings even after MasterCard Inc was floated on the New York Stock Exchange<sup>285</sup>.

### (C) Concerted practices

The inclusion of concerted practices within Article 101 means that conduct which is not attributable to an agreement or a decision may nevertheless amount to an infringement. While it can readily be appreciated that loose, informal understandings to limit competition must be prevented as well as agreements, it is difficult both to define the type or degree of coordination within the mischief of the law and to apply that rule to the facts of any given case. In particular there is the problem that parties to a cartel may do all they can to destroy incriminating evidence of meetings, emails, faxes and correspondence, in which case the temptation of the competition authority may be to infer the existence of an agreement or concerted practice from circumstantial evidence such as parallel conduct on the market. This can be dangerous, for it may be that firms act in parallel not because of an agreement or concerted practice, but because their individual appreciation of market conditions tells them that a failure to match a rival's strategy could be damaging or even disastrous. The problem of parallel behaviour in oligopolistic markets will be examined in chapter 14.

It is necessary to consider first the legal meaning of a concerted practice; secondly the question of whether a concerted practice must have been put into effect for Article 101(1) to have been infringed; and lastly the burden of proof in such cases.

#### (i) Meaning of concerted practice<sup>286</sup>

*ICI v Commission*<sup>287</sup> (usually referred to as the *Dyestuffs* case) was the first important case on concerted practices to come before the Court of Justice. The Commission had fined several producers of dyestuffs which it considered had been guilty of price fixing through concerted practices<sup>288</sup>. The Commission's decision relied upon various pieces of evidence, including the similarity of the rate and timing of price increases and of instructions sent out by parent companies to their subsidiaries and the fact that there had been informal contact between the firms concerned. The Court of Justice upheld the Commission's

<sup>283</sup> Cases 96/82 etc [1983] ECR 3369, [1984] 3 CMLR 276.

<sup>284</sup> Commission decision of 19 December 2007.

<sup>285</sup> *Ibid*, paras 3 and 397–398.

<sup>286</sup> For stimulating discussion of the complexity of the notion of a concerted practice see Black 'Communication and Obligation in Arrangements and Concerted Practices' (1992) 13 ECLR 200; Black 'Concerted Practices, Joint Action and Reliance' (2003) 24 ECLR 219; Odudu *The Boundaries of EC Competition Law* (Oxford University Press, 2006), pp 71–91; for the treatment of concerted practices under the UK Competition Act 1998 see ch 9, 'Concerted practices', p 341.

<sup>287</sup> Case 48/69 [1972] ECR 619, [1972] CMLR 557.

<sup>288</sup> *Re Aniline Dyes Cartel* JO [1969] L 195/11, [1969] CMLR D23.

decision. It said that the object of bringing concerted practices within Article 101 was to prohibit:

a form of coordination between undertakings which, without having reached the stage where an agreement properly so-called has been concluded, knowingly substitutes practical cooperation between them for the risks of competition<sup>289</sup>.

In *Suiker Unie v Commission*<sup>290</sup> (the *Sugar Cartel* case) the Court of Justice elaborated upon this test. The Commission had held<sup>291</sup> that various sugar producers had taken part in concerted practices to protect the position of two Dutch producers on their domestic market. The producers denied this as they had not worked out a plan to this effect. The Court of Justice held that it was not necessary to prove that there was an actual plan. Article 101 strictly precluded:

any direct or indirect contact between such operators, the object or effect whereof is either to influence the conduct on the market of an actual or potential competitor or to disclose to such a competitor the course of conduct which they themselves have decided to adopt or contemplate adopting on the market<sup>292</sup>.

These two cases provide the legal test of what constitutes a concerted practice for the purpose of Article 101: there must be a mental consensus whereby practical cooperation is *knowingly* substituted for competition; however the consensus need not be achieved verbally, and can come about by direct or indirect contact between the parties.

The European Commission has provided guidance on the meaning of a concerted practice in the section of its *Guidelines on Horizontal Cooperation Agreements* that deals with the exchange of information<sup>293</sup>. It says that the exchange of information between competitors can amount to a concerted practice where it reduces ‘strategic uncertainty’ in the market, thereby facilitating collusion<sup>294</sup>. In paragraph 62 of those *Guidelines* it refers to the *Cement* appeals<sup>295</sup>, where the General Court found that Lafarge was party to a concerted practice when it received information at a meeting about the future conduct of a competitor: it could not argue that it was merely the passive recipient of such information<sup>296</sup>. The Commission then cites the Court of Justice’s judgment in *T-Mobile*<sup>297</sup> and says that mere attendance at a meeting where an undertaking discloses its pricing plans to its competitors is likely to be caught by Article 101, even in the absence of an explicit agreement to raise prices, adding, in support of this proposition, the presumption in the *Hüls* judgment cited below that contact between competitors leads to common conduct on the market.

## (ii) Must a concerted practice have been put into effect?: the need for a ‘causal connection’

The Court of Justice held in *Hüls*, one of the *Polypropylene* cases, that ‘a concerted practice... is caught by Article [101(1) TFEU], even in the absence of anti-competitive effects on the market’<sup>298</sup>; however, in the *Cement* cases the General Court said that there would

<sup>289</sup> Case 48/69 [1972] ECR 619, [1972] CMLR 557, para 64; see similarly Case C-8/08 *T-Mobile Netherlands BV v Raad van bestuur van de Nederlandse Mededingingsautoriteit* [2009] ECR I-4529, [2009] 5 CMLR 1701, para 26 and the cases cited therein.

<sup>298</sup> Cases C-199/92 P etc *Hüls AG v Commission* [1999] ECR I-4287, [1999] 5 CMLR 1016, para 163.

be no infringement if the parties can prove to the contrary<sup>299</sup>. In reaching its conclusion in *Hüls* the Court of Justice stated that, as established by its own case law<sup>300</sup>, Article 101(1) requires that each economic operator must determine its policy on the market independently. At paragraph 161 the Court acknowledged that the concept of a concerted practice implies that there will be common conduct on the market, but added that there must be a presumption that, by making contact with one another, such conduct will follow. In *T-Mobile*<sup>301</sup> the Court of Justice held that this presumption of a ‘causal connection’ between competitor contact and conduct on the market forms an integral part of EU law, in consequence of which a national court<sup>302</sup> applying Article 101 would be bound to apply the same presumption<sup>303</sup>; to put the point a different way, the national court would not be permitted to apply stricter evidential rules of national law than the EU presumption. The Court also held that the presumption in *T-Mobile* could apply even in the event of a single meeting between competitors<sup>304</sup>. In *Bananas*<sup>305</sup> the Commission held that three producers of bananas were party to a concerted practice by which they coordinated quotation prices for bananas in the north of Europe over a period of nearly three years<sup>306</sup>; in doing so it said that the presumption of a causal connection was stronger where the undertakings concert together on a regular basis over a long period<sup>307</sup>.

### (iii) The burden of proof

An important issue is to consider who bears the burden of proof in a concerted practice case. It is clear that the overall burden is on the Commission to establish that there has been a concerted practice; the EU Courts have annulled decisions where they were not convinced by the evidence on which the Commission relied<sup>308</sup>. However, the evidential burden of proof may be reversed, for example where the presumption of a causal connection between competitor contact and market conduct discussed in the previous paragraph applies: in that situation it will be for the parties to adduce evidence to rebut the presumption. Where the parties are able to produce evidence that appears to prove the innocence of their behaviour, the overall burden on the Commission requires it to demonstrate why that evidence is unpersuasive. For example in *Compagnie Royale Asturienne des Mines SA and Rheinzink GmbH v Commission*<sup>309</sup> the Commission had concluded that the simultaneous cessation of deliveries to a Belgian customer, Schlitz, by CRAM and

<sup>309</sup> Cases 29/83 and 30/83 [1984] ECR 1679, [1985] 1 CMLR 688.

Rheinzink of Germany was attributable to a concerted practice to protect the German market. The Court of Justice held that there was a possible alternative explanation of the refusal to supply, which was that Schlitz had been failing to settle its accounts on the due date; as the Commission had not dealt with this possible explanation of the conduct in question its decision should be quashed. On the other hand in *CISAC*<sup>310</sup> the Commission was of the opinion that the only explanation for the fact that collecting societies restricted the grant of licences to licensees domiciled within their national territories was the existence of a concerted practice between them<sup>311</sup>.

#### 4. The Object or Effect of Preventing, Restricting or Distorting Competition

Article 101(1) prohibits agreements that have as their object or effect the prevention, restriction or distortion of competition<sup>312</sup>. It contains an illustrative list of agreements that may be caught such as price fixing and market sharing, but this is insufficient in itself to explain the numerous intricacies involved in understanding how this provision works. Judgments of the General Court and, at the top of the hierarchy, the Court of Justice contain the most authoritative statements of the law, and some of the best analyses will be found in Opinions of the Advocates General; the Commission's decisions, Notices and Guidelines provide important insights of its views on the application of Article 101(1), as do its *Annual Report on Competition Policy* and the quarterly *Competition Policy Newsletter*<sup>313</sup>.

The application of Article 101(1) to agreements, in particular by the Commission, was for many years controversial. In essence the complaint of many commentators was that Article 101(1) was applied too broadly, catching many agreements that were not detrimental to competition at all<sup>314</sup>. Agreements that are caught by Article 101(1) are void and unenforceable<sup>315</sup>, and may attract a fine, unless they satisfy the criteria set out in Article 101(3). Under Regulation 17<sup>316</sup>, which conferred upon the Commission the power to enforce Articles 101 and 102, only it could grant a so-called 'individual exemption'

<sup>310</sup> Commission decision of 16 July 2008, on appeal to the General Court Cases T-398/08 etc, not yet decided.

<sup>311</sup> *Ibid*, paras 156–222.

<sup>312</sup> In the text that follows the term 'restriction' of competition is taken to include the prevention and distortion of competition.

<sup>313</sup> All of these materials are available on DG COMP's website at [www.europa.eu.int/comm/competition/publications/cpn](http://www.europa.eu.int/comm/competition/publications/cpn).

<sup>314</sup> See eg Bright 'EU Competition Policy: Rules, Objectives and Deregulation' (1996) 16 *Oxford Journal of Legal Studies* 535; there is a considerable amount of academic literature criticising the 'over'-application of Article 101(1): see eg Joliet *The Rule of Reason in Antitrust Law; American, German and Common Market Laws in Comparative Perspective* (1967), pp 77–106, 117 to the end; Korah 'The Rise and Fall of Provisional Validity' (1981) 3 *NJILB* 320; Schechter 'The Rule of Reason in European Competition Law' [1982(2)] *Legal Issues in European Integration* 1; Forrester and Norall 'The Laicization of Community Law: Self-help and the Rule of Reason' (1984) 21 *CML Rev* 11; Korah 'EEC Competition Policy – Legal Form or Economic Efficiency' (1986) 39 *CLP* 85; Venit 'Pronuptia: Ancillary Restraints or Unholy Alliances?' (1986) 11 *EL Rev* 213; Holley 'EEC Competition Practice; a Thirty-Year Retrospective' in [1992] *Fordham Corp L Inst* (ed Hawk), 669, p 689; Nazzini 'Article 81 EC Between Time Present and Time Past: A Normative Critique of 'Restriction of Competition' in EU Law (2006) 43 *CML Rev* 497; Marquis 'O2 (Germany) v Commission and the Exotic Mysteries of Article 81(1) EC' (2007) 32 *EL Rev* 29.

<sup>315</sup> See further ch 8, 'Competition law as a defence', pp 319–325.

<sup>316</sup> JO 204/62, OJ (Special Edition 1959–62) p 57.

to an agreement under Article 101(3); individual exemptions were rarely given, and the procedure for obtaining one was time-consuming, costly and cumbersome. A consequence was that many firms would ensure that they satisfied the terms of one of the 'block exemptions' under Article 101(3) in order to be certain that their agreements were legally enforceable<sup>317</sup>; where no block exemption was available firms that did not notify their agreements to the Commission for an individual exemption ran the risk of voidness and fines. An obvious solution proposed by critics of this situation was that Article 101(1) should be applied to fewer agreements: only those agreements that posed a real threat to competition should be caught in the net of competition law; others should not be ensnared by the competition rules at all.

These criticisms were loud and persistent throughout the 1980s and 1990s. However it is important to note that the advent of Regulation 1/2003<sup>318</sup> in May 2004 changed this position significantly. Under this Regulation the Commission no longer enjoys a 'monopoly' over individual exemptions under Article 101(3) – indeed there is no longer any such thing as an individual exemption; and the procedure of notifying agreements to the Commission for such an exemption has been abolished<sup>319</sup>. Instead the Commission now shares with national courts and national competition authorities ('NCAs') the power to make decisions on the application of Article 101 in its entirety. It follows that it is no longer necessary to argue that an agreement falls outside Article 101(1) for the procedural reason that it is not block exempted and has not been notified to the Commission for an individual exemption. Since Regulation 1/2003 it is always possible to argue that an agreement that is restrictive of competition under Article 101(1) satisfies the terms of Article 101(3), whether a case is being decided by the Commission, a national court or an NCA: there is no longer a procedural tail to wag the substantive dog<sup>320</sup>. Coupled with the introduction of Regulation 1/2003 is the undoubted fact that the Commission, for many years, has taken a more realistic approach both to Article 101(1) and Article 101(3), in particular to ensure that Article 101 as a whole is applied in accordance with sound economic principles. The Commission today takes a much narrower view of what is meant by a restriction of competition for the purpose of Article 101(1); and it also has a narrower approach to the circumstances in which Article 101(3) is satisfied<sup>321</sup>. Since Regulation 1/2003 the precise sphere of application of Article 101(1) on the one hand and Article 101(3) on the other does not have the significance that it did in the days of notification for individual exemption<sup>322</sup>; today the real question is whether an agreement infringes Article 101 as a whole.

### (A) Three preliminary comments

The text that follows will examine the meaning of agreements having as their 'object or effect' the prevention, restriction or distortion of competition. However, a few preliminary comments may be helpful.

<sup>317</sup> On block exemptions see ch 4, 'Block Exemptions', pp 168–172.

<sup>318</sup> OJ [2003] L 1/1.

<sup>319</sup> See ch 4, 'The end of the system of notification for individual exemption', p 167.

<sup>320</sup> See Wils *Principles of European Antitrust Enforcement* (Hart Publishing, 2005), para 35.

<sup>321</sup> See ch 4, 'First condition of Article 101(3): an improvement in the production or distribution of goods or in technical or economic progress', pp 156–162 for a discussion of the 'narrow' and the 'broad' interpretations of Article 101(3).

<sup>322</sup> Note however that the burden of proof rests with different persons under Article 101(1) and Article 101(3): see ch 4, 'The burden of proving that the conditions of Article 101(3) are satisfied', pp 152–153.

First, there are many judgments of the EU Courts that demonstrate that a contractual restriction does not necessarily result in a restriction of competition<sup>323</sup>. It is essential to understand this key point: the concept of a restriction of competition is an economic one, and as a general proposition economic analysis is needed to determine whether an agreement could have an anti-competitive effect. A relatively small class of agreements are considered by law to have as their object the restriction of competition<sup>324</sup>; in the case of all other agreements anti-competitive effects must be demonstrated for there to be an infringement of Article 101(1)<sup>325</sup>.

Secondly, in several judgments the EU Courts have made clear that the Commission must adequately demonstrate that an agreement is restrictive of competition, and that they will not simply ‘rubber-stamp’ its analysis: a particularly good example is *European Night Services v Commission*<sup>326</sup>, where the General Court exposed the thorough inadequacy of the Commission’s reasoning in its decision in that case<sup>327</sup>.

Thirdly, the General Court has said that in a case under Article 101(1) the definition of the market is relevant at the stage of determining whether there has been an impairment of competition or an effect on trade between Member States; it is not something that must be undertaken as a preliminary matter, as in the case of Article 102 where it is a necessary precondition to a finding of abuse of a dominant position<sup>328</sup>.

## (B) Horizontal and vertical agreements

One point is absolutely clear: Article 101 is capable of application both to horizontal agreements (between undertakings at the same level of the market) and to vertical agreements (between undertakings at different levels of the market). It was at one time thought that Article 101 might have no application at all to vertical agreements, but that idea was firmly contradicted by the Court of Justice’s judgment in *Consten and Grundig v Commission*<sup>329</sup>; it remains the case that undertakings must carry out a careful assessment of whether their vertical agreements are compliant with the law. The application of Article 101 to vertical agreements will be considered in detail in chapter 16.

## (C) The ‘object or effect’ of preventing, restricting or distorting competition

Article 101(1) prohibits agreements ‘which have as their *object or effect* the prevention, restriction or distortion of competition’ (emphasis added). It is important to understand the significance of the words ‘object or effect’ in Article 101(1).

<sup>323</sup> See the cases discussed at ‘Cases in which agreements containing contractual restrictions were found not to have anti-competitive effects’, pp 128–129 below.

<sup>324</sup> See ‘Agreements that have as their object the prevention, restriction or distortion of competition’, pp 121–125.

<sup>325</sup> See ‘Agreements that have as their effect the prevention, restriction or distortion of competition’, pp 125–137 below.

<sup>326</sup> Cases T-374/94 etc [1998] ECR II-3141, [1998] 5 CMLR 718.

<sup>327</sup> *European Night Services Ltd* OJ [1994] L 259/20, [1995] 5 CMLR 76.

<sup>328</sup> Case T-29/92 *SPO v Commission* [1995] ECR II-289, para 75; Cases T-25/95 etc *Cimenteries CBR SA v Commission* [2000] ECR II-491, [2000] 5 CMLR 204, para 833; Case T-62/98 *Volkswagen AG v Commission* [2000] ECR II-2707, [2000] 5 CMLR 853, paras 230–232; Case T-213/00 *CMA CGM v Commission* [2003] ECR II-913, [2003] 5 CMLR 268, para 206.

<sup>329</sup> Cases 56 and 58/64 [1966] ECR 299, [1966] CMLR 418.

### (i) 'Object or effect' to be read disjunctively

It is clear that these are alternative, and not cumulative, requirements for a finding of an infringement of Article 101(1). In *Société Technique Minière v Maschinenbau Ulm*<sup>330</sup> the Court of Justice stated that the words were to be read disjunctively. This means that where an agreement has as its object the restriction of competition, it is unnecessary to prove anti-competitive effects; only if it is not clear that the object of an agreement is to restrict competition is it necessary to consider whether it might have the effect of doing so. This has been regularly repeated by the Court of Justice, in recent years for example in *Competition Authority v Beef Industry Development Society Ltd*<sup>331</sup>, *T-Mobile Netherlands*<sup>332</sup> and in *GlaxoSmithKline Services Unlimited v Commission*<sup>333</sup>. Advocate General Kokott has pointed out that a law that forbids people from driving cars when under the influence of alcohol does not require, for a conviction, that the driver has caused an accident – that is to say proof of an effect; in the same way Article 101(1) prohibits certain agreements that have the object of restricting competition, irrespective of whether they produce adverse effects on the market in an individual case<sup>334</sup>.

### (ii) 'Object'

Case law has established that there are some types of agreement<sup>335</sup> the anti-competitiveness of which can be determined simply from their object. In *GlaxoSmithKline Services Unlimited v Commission*<sup>336</sup> the Court of Justice, citing earlier cases, said that in order to decide whether an agreement restricts by object:

regard must be had inter alia to the content of its provisions, the objectives it seeks to attain and the economic and legal context of which it forms part<sup>337</sup>.

In *T-Mobile Netherlands*<sup>338</sup> the Court said that, in order to ascribe an anti-competitive object to a concerted practice<sup>339</sup>, it is sufficient that it has the *potential* to have a negative impact on competition: the effects of such a practice would be relevant only to the level of any fine or the award of damages to victims of the harm<sup>340</sup>. The Court also said that, in order to find a restriction by object, it was not necessary to demonstrate a direct effect on prices to end users: Article 101 is designed to protect the structure of the market and competition as such<sup>341</sup>.

The text below will examine which types of agreement have been found to restrict by object<sup>342</sup>. However it may be helpful to begin with some general comments about object restrictions. The first is that the word 'object' in this context does not mean the

<sup>330</sup> Case 56/65 [1966] ECR 235, p 249, [1966] CMLR 357, p 375.

<sup>331</sup> Case C-209/07, [2008] ECR I-8637, [2009] 4 CMLR 310, paras 15 and 16.

<sup>332</sup> Case C-8/08 [2009] ECR I-4529, [2009] 5 CMLR 1701, paras 28 and 30.

<sup>333</sup> Cases C-501/06 P etc [2009] ECR I-9291, [2010] 4 CMLR 50, para 55.

<sup>334</sup> Case C-8/08 *T-Mobile Netherlands* [2009] ECR I-4529, [2009] 5 CMLR 1701, para 47.

<sup>335</sup> The Court of Justice has confirmed that a concerted practice can also have the object of restricting competition: see eg Cases C-199/92 P etc *Hüls AG v Commission* [1999] ECR I-4287, [1999] 5 CMLR 1016, para 164; Case C-8/08 *T-Mobile Netherlands* [2009] ECR I-4529, [2009] 5 CMLR 1701, paras 28–30.

<sup>336</sup> Case C-501/06 P [2009] ECR I-9291, [2010] 4 CMLR 50. <sup>337</sup> *Ibid*, para 58.

<sup>338</sup> Case C-8/08 [2009] ECR I-4529, [2009] 5 CMLR 1701.

<sup>339</sup> The *T-Mobile* case concerned a concerted practice, but the Court would presumably have said the same if it had been dealing with an agreement.

<sup>340</sup> Case C-8/08 *T-Mobile* [2009] ECR I-4529, [2009] 5 CMLR 1701, para 31; see eg *Amino Acids* OJ [2001] L 154/24, [2001] 5 CMLR 322, paras 261–298.

<sup>341</sup> Case C-8/08 *T-Mobile* [2009] ECR I-4529, [2009] 5 CMLR 1701, paras 36–39.

<sup>342</sup> See also the Commission's *Guidelines on the application of Article [101(3)] of the Treaty* OJ [2004] C 101/8, paras 21–23 and its *Guidelines on Horizontal Cooperation Agreements* OJ [2011] C 11/1, paras 24–25.

subjective intention of the parties when entering into the agreement, but the objective meaning and purpose of the agreement considered in the economic context in which it is to be applied<sup>343</sup>. This does not mean that subjective intention is altogether irrelevant: in *T-Mobile*<sup>344</sup> the Court of Justice said that

while the intention of the parties is not an essential factor in determining whether a concerted practice is restrictive, there is nothing to prevent the Commission of the European Communities or the competent Community judicature from taking it into account.<sup>345</sup>

It follows from the proposition that subjective intention is not a *necessary* condition to characterise an agreement as restrictive by object that the Court of Justice has held that it is irrelevant that the agreement was not in the commercial interest of some of the participants<sup>346</sup>; and that, where an agreement has an anti-competitive object, it does not cease to be characterised as such because it had an alternative, lawful, purpose<sup>347</sup>.

A second point about object restrictions is that, from a competition authority's point of view, the fact that it does not need to demonstrate, for example, that horizontal price-fixing agreements produce adverse economic effects relieves it of some of the burden that would otherwise rest upon it. In her Opinion in *T-Mobile*<sup>348</sup> Advocate General Kokott said that the classification of certain types of agreement as restrictive by object 'sensibly conserves resources of competition authorities and the justice system'<sup>349</sup>. She also pointed out that the existence of object restrictions 'creates legal certainty and allows all market participants to adapt their conduct accordingly'<sup>350</sup> adding that, although the concept of restriction by object should not be given an unduly broad interpretation, nor should it be interpreted so narrowly as to deprive it of its practical effectiveness<sup>351</sup>.

The third point is that, where the parties to an agreement that is restrictive by object wish to assert that it could produce efficiency-enhancing effects, they can do so only by proving that it satisfies the criteria of Article 101(3), the burden of proof being on them to prove that this is so<sup>352</sup>. Having decided in *Competition Authority v Beef Industry Development Society Ltd*<sup>353</sup> that an agreement between beef processors in Ireland to reduce overcapacity by encouraging some of them to withdraw from the market restricted competition by object, the Court of Justice said that the agreement could be defended only under Article 101(3)<sup>354</sup>.

<sup>343</sup> Cases 29/83 and 30/83 *Compagnie Royale Asturienne des Mines SA and Rheinzinc GmbH v Commission* [1984] ECR 1679, [1985] 1 CMLR 688, paras 25–26; Case C-277/87 *Sandoz Prodotti Farmaceutici v Commission* [1990] ECR I-45; Case T-148/89 *Tréfilunion v Commission* [1995] ECR II-1063, para 79; Case C-551/03 P *General Motors v Commission* [2006] ECR II-3173, [2006] 5 CMLR 4491, paras 77–78.

<sup>344</sup> Case C-8/08 [2009] ECR I-4529, [2009] 5 CMLR 1701.

<sup>345</sup> *Ibid*, para 27; on the relevance of subjective intention see Odudu 'Interpreting Article 81(1): Object as Subjective Intention' (2001) 26 EL Rev 60 and Odudu 'Interpreting Article 81(1): the Object Requirement Revisited' (2001) 26 EL Rev 379.

<sup>346</sup> See eg Case C-403/04 P *Sumitomo Metal Industries Ltd v Commission* [2007] ECR I-729, [2007] 4 CMLR 650, paras 45–46.

<sup>347</sup> Case C-551/03 P [2006] ECR I-3173, [2006] 5 CMLR 9, para 64; Case C-209/07 *Competition Authority v Beef Industry Development Society Ltd* [2008] ECR I-8637, [2009] 4 CMLR 310, para 21; the same point was made by the General Court in Cases T-49/02 etc *Brasserie Nationale SA v Commission* [2005] ECR II-3033, [2006] 4 CMLR 266, para 85.

<sup>348</sup> Case C-8/08 [2009] ECR I-4529, [2009] 5 CMLR 1701.

<sup>349</sup> *Ibid*, para 43.

<sup>350</sup> *Ibid*.

<sup>351</sup> *Ibid*, para 44.

<sup>352</sup> See ch 4 generally on Article 101(3), including the burden of proof and the nature of the evidence required to succeed in showing that that provision is satisfied.

<sup>353</sup> Case C-209/07 [2008] ECR I-8637, [2009] 4 CMLR 310; for comment on this judgment see Odudu 'Restrictions of Competition by Object – What's the Beef?' (2009) 8(1) Competition Law Journal 11.

<sup>354</sup> *Ibid*, paras 21 and 39; the case was remitted to the High Court in Ireland to consider whether the criteria of Article 101(3) were satisfied; however BIDS withdrew its defence before the Court had made

A fourth point is that the fact that there is no need to prove anti-competitive effects in the case of object restrictions does not mean that there is no quantitative component to object analysis at all. There is a rule that any restriction of competition must be *appreciable*: even a restriction of competition by object could fall outside Article 101(1) if its likely impact on the market is minimal<sup>355</sup>. Furthermore, as a jurisdictional matter, an agreement infringes Article 101(1) only if it has an *appreciable* effect on trade between Member States: again, therefore, some quantitative analysis may be required before determining that Article 101(1) is infringed<sup>356</sup>. Because of the need to prove appreciability, it is necessary for the Commission to define the relevant market even in a case involving an object restriction<sup>357</sup>.

### (iii) 'Effect'

Where an agreement does not have as its object the restriction of competition, it is necessary to demonstrate that it would have a restrictive effect; this is a much more onerous task for the Commission or the person wishing to establish an infringement of Article 101(1). The position was stated clearly by the General Court in *European Night Services v Commission*<sup>358</sup>:

it must be borne in mind that in assessing an agreement under Article [101(1)] of the Treaty, account should be taken of the actual conditions in which it functions, in particular the economic context in which the undertakings operate, the products or services covered by the agreement and the actual structure of the market concerned . . . *unless it is an agreement containing obvious restrictions of competition such as price-fixing, market-sharing or the control of outlets*. . . In the latter case, such restrictions may be weighed against their claimed pro-competitive effects only in the context of Article [101(3)] of the Treaty, with a view to granting an exemption from the prohibition in Article [101(1)] (emphasis added).

### (iv) Comment on the 'object or effect' distinction

Clearly it is important to know which agreements can be classified as having as their object the restriction of competition since in such cases it is not necessary to prove that anti-competitive effects would follow.

It may be helpful to think of the position in terms of two boxes, as follows:

<p><b>OBJECT</b></p> <p>Agreements that have as their object the restriction of competition</p>	<p><b>EFFECT</b></p> <p>Agreements that have as their effect the restriction of competition</p>
---	---

a decision on the matter: see Irish Competition Authority, Press Release of 25 January 2011, available at [www.tca.ie/default.aspx](http://www.tca.ie/default.aspx).

<sup>355</sup> For discussion of this rule see 'The *De Minimis* Doctrine', pp 140–144 below.

<sup>356</sup> See 'The Effect on Trade between Member States', pp 144–149 below on the requirement of an appreciable effect on trade between Member States.

<sup>357</sup> See eg Case T-199/08 *Ziegler SA v Commission* [2011] ECR II-000, [2011] 5 CMLR 261, paras 41–45 (one of the appeals in the *International Removal Services* case).

<sup>358</sup> Cases T-374/94 etc [1998] ECR II-3141, [1998] 5 CMLR 718, para 136.

Article 101(1), as interpreted by the EU Courts, allocates particularly pernicious types of agreement that are overwhelmingly likely to harm consumer welfare to the object box, with the consequences just described. This is done as a matter of policy: certain agreements are so clearly inimical to the objectives of the EU that they can be permitted only where they can be shown to satisfy the requirements of Article 101(3). In all other cases, however, the lawfulness of an agreement under Article 101(1) must be tested according to its anti-competitive effects and this, as we shall see, requires a wide-ranging analysis of the market<sup>359</sup>.

There is clearly an analogy here with the position under section 1 of the Sherman Act 1890 in the US, which characterises some agreements as *per se* infringements of the Act, whereas others are subject to so-called ‘rule of reason’ analysis<sup>360</sup>. Where there is a *per se* infringement, it is not open to the parties to the agreement to argue that it does not restrict competition: it belongs to a category of agreement that has, by law, been found to be restrictive of competition. However, there is an important difference in EU law in that, even if an agreement has as its object the restriction of competition, that is to say that it infringes Article 101(1) *per se*, the parties can still argue that the agreement satisfies the terms of Article 101(3). This possibility does not exist in US law, since there is no equivalent of Article 101(3) in that system. For this reason a judgment such as that of the US Supreme Court in *Leegin*<sup>361</sup>, in which that Court determined that minimum resale price maintenance should be analysed under a rule of reason standard, rather than being subjected to a *per se* rule, brings US law into alignment with that of the EU: it has always been possible for an undertaking to argue that resale price maintenance satisfies Article 101(3), even though it is classified as having as its object the restriction of competition for the purpose of Article 101(1). Paragraph 46 of the Commission’s *Guidelines on the application of Article [101(3)] of the Treaty*<sup>362</sup> cites the General Court’s judgment in *Matra Hachette v Commission*<sup>363</sup>, which established that there is no type of agreement that, on *a priori* grounds, can be said to be incapable of satisfying the criteria of Article 101(3): even agreements that restrict competition by object can do so, provided that probative evidence in support of efficiency gains can be adduced.

#### **(D) Agreements that have as their object the prevention, restriction or distortion of competition**

In *European Night Services v Commission*<sup>364</sup> the General Court referred to agreements ‘containing obvious restrictions of competition such as price-fixing, market-sharing or the control of outlets’; without using the terminology used in this chapter, it seems clear that the General Court considered that agreements of this nature should be allocated to

<sup>359</sup> See ‘Agreements that have as their effect the prevention, restriction or distortion of competition’, pp 125–137 below.

<sup>360</sup> For an interesting discussion of this topic see Black ‘Per Se Rules and Rules of Reason: What Are They?’ (1997) 18 ECLR 145: this article contains extensive citation of the literature on the position under US law; see also Jones ‘Analysis of agreements under US and EC antitrust law – Convergence or divergence?’ (2006) 51 Antitrust Bulletin 691; Andreangeli ‘From Mobile Phones to Cattle: How the Court of Justice Is reframing the Approach to Article 101 of the EU Treaty’ (2011) 34 World Competition 215.

<sup>361</sup> *Leegin Creative Leather Products Inc v PSKS Inc* 551 US 877 (2007).

<sup>362</sup> OJ [2004] C 101/97.

<sup>363</sup> Case T-17/93 [1994] ECR II-595.

<sup>364</sup> Cases T-374/94 etc [1998] ECR II-3141, [1998] 5 CMLR 718.

the ‘object’ box. Advocate General Trstenjak said in her Opinion in *Competition Authority v Beef Industry Development Society Ltd*<sup>365</sup> that the notion of restriction of competition by object cannot be reduced to an exhaustive list, and that it should not be limited just to the examples of anti-competitive agreements given in Article 101(1) itself<sup>366</sup>. It is for the EU Courts to determine which agreements restrict competition by object; over a period of time the contents of the object box may expand or contract<sup>367</sup>.

### (i) Price fixing and exchanges of information in relation to future prices

Price fixing is specifically cited as an example of an anti-competitive agreement in Article 101(1)(a) of the Treaty, and it is unsurprising that it is characterised as having as its object the restriction of competition, whether horizontal<sup>368</sup> or vertical<sup>369</sup>. In *T-Mobile*<sup>370</sup> the Court of Justice said that the exchange of information between competitors ‘is tainted with an anti-competitive object if the exchange is capable of removing uncertainties concerning the intended conduct of the participating undertakings’<sup>371</sup>; in that case mobile telephone operators exchanged information about the remuneration that they intended to pay to their dealers for the services that they provided. In its *Guidelines on Horizontal Cooperation Agreements*<sup>372</sup> the Commission says that it considers the exchange of information between competitors of individualised data regarding intended future prices or quantities to be restrictive of competition by object<sup>373</sup>. In *Bananas*<sup>374</sup> the Commission held that ‘pre-pricing communications’ in which undertakings discussed price-setting factors relevant to the setting of future quotation prices amounted to object restrictions<sup>375</sup>. Other information exchanges require effects analysis<sup>376</sup>.

### (ii) Market sharing, quotas, collective exclusive dealing

Market-sharing agreements are specifically mentioned in Article 101(1)(c), and again their treatment as restrictive by object is to be expected, in particular because they are likely to be harmful to the internal market<sup>377</sup>.

The General Court did not refer in *European Night Services* to agreements to limit output when discussing ‘obvious’ restrictions of competition, but they must also be allo-

<sup>365</sup> Case C-209/07 [2008] ECR I-8637, [2009] 4 CMLR 310.

<sup>366</sup> *Ibid*, para 48; the Court of Justice’s judgment appears to agree with this, although paragraph 23 of its judgment says only that Article 101 does not constitute an exhaustive list of prohibited collusion: the context of the statement suggests that it meant that it is not an exhaustive list of collusion *by object*.

<sup>367</sup> See ‘Refinement of the range of agreements within the object box’, pp 124–125 below; for criticism of the current lack of clarity in determining whether a restriction is one by object see Jones ‘Left Behind my Modernisation? Restrictions by Object Under Article 101(1)’ (2010) *European Competition Journal* 649; King ‘The Object Box: Law, Policy or Myth?’ (2011) 7(2) *European Competition Journal* 269.

<sup>368</sup> See ch 13, ‘Horizontal Price Fixing’, pp 522–530.

<sup>369</sup> See ch 16, ‘Article 4(a): resale price maintenance’, pp 664–665.

<sup>370</sup> Case C-8/08 [2009] ECR I-4529, [2009] 5 CMLR 1701. <sup>371</sup> *Ibid*, para 43.

<sup>372</sup> OJ [2011] C 11/1.

<sup>373</sup> *Ibid*, para 74.

<sup>374</sup> *Bananas* Commission decision of 15 October 2008, paras 263–277, on appeal Case T-587/08 *Fresh Del Monte Produce v Commission*, not yet decided.

<sup>375</sup> *Ibid*, paras 263–277.

<sup>376</sup> See eg Case C-238/05 *Asnef-Equifax v Asociación de Usuarios de Servicios Bancarios (Ausbanc)* [2006] ECR I-11125, [2007] 4 CMLR 224 and the Commission’s *Guidelines on Horizontal Cooperation Agreements* OJ [2011] C 11/1, paras 75–94; information agreements are discussed in ch 13, ‘Exchanges of Information’, pp 539–547.

<sup>377</sup> See ch 13, ‘Horizontal Market Sharing’, pp 530–533.

cated to the object box on the basis that they clearly restrict competition, and they are specifically referred to in Article 101(1)(b); analogous agreements, for example to limit sales, must also be included<sup>378</sup>. In *Competition Authority v Beef Industry Development Society Ltd*<sup>379</sup> the Court of Justice held that arrangements to enable several undertakings to implement a common policy of encouraging some of them to withdraw from the market in order to reduce overcapacity had the object of restricting competition<sup>380</sup>. The Commission has also characterised collective exclusive dealing as restricting competition by object<sup>381</sup>.

### (iii) Controlling outlets; export bans

The General Court in *European Night Services* referred to agreements to control outlets as containing obvious restrictions of competition; the control of outlets is not specifically referred to in Article 101(1), but the Court presumably had in mind the imposition on distributors of export bans from one Member State to another, which have consistently been found to have as their object the restriction of competition<sup>382</sup>; nothing could be more obviously inimical to the goal of market integration than restrictions of this kind. The judgment of the General Court in *GlaxoSmithKline v Commission*<sup>383</sup> somewhat muddied this apparently simple point by suggesting that, in the specific and unusual conditions in which pharmaceutical products are bought and sold, an indirect export ban did not have its object the restriction of competition<sup>384</sup>, although it did restrict competition by effect<sup>385</sup>. However the Court of Justice reversed the judgment of the General Court, repeating that an agreement aimed at prohibiting or limiting parallel trade has as its object the restriction of competition, and that that principle applies to the pharmaceutical sector as it does to any other<sup>386</sup>; the Court added that, in order to be found to restrict by object, it was not necessary to show that the agreement entailed disadvantages for final consumers<sup>387</sup>.

The Court of Justice has also held that the imposition of fixed or minimum resale prices on distributors is restrictive of competition by object<sup>388</sup>.

<sup>378</sup> See ch 13, 'Anti-Competitive Horizontal Restraints', pp 550–552.

<sup>379</sup> Case C-209/07 [2008] ECR I-8637, [2009] 4 CMLR 310.

<sup>380</sup> *Ibid*, paras 33–34.

<sup>381</sup> See eg *Nederlandse Federative Vereniging voor de Grootlandel op Elektrotechnisch Gebied and Technische Unie (FEG and TU)* OJ [2000] L 39/1, [2000] 4 CMLR 1208, para 105, and the further examples given in footnote 120 of that decision; the Commission's decision was upheld on appeal, Cases T-5/00 and 6/00 [2003] ECR II-5761, [2004] 5 CMLR 962.

<sup>382</sup> See eg Case 19/77 *Miller International Schallplatten v Commission* [1978] ECR 131, [1978] 2 CMLR 334, paras 7 and 18; see similarly Case C-551/03 P *General Motors BV v Commission* [2006] ECR I-3173, [2006] 5 CMLR 9, in particular paras 64–80; Cases T-175/95 and T-176/95 *BASF v Commission* [1999] ECR II-1581, [2000] 4 CMLR 33, para 133; Case T-176/95 *Accinauto SA v Commission* [1999] ECR II-1635, [2000] 4 CMLR 67, para 104.

<sup>383</sup> Case T-168/01 *GlaxoSmithKline Services v Commission* [2006] ECR II-2969, [2006] 5 CMLR 1623.

<sup>384</sup> *Ibid*, paras 114–147.

<sup>385</sup> *Ibid*, paras 148–192.

<sup>386</sup> Cases C-501/06 P etc *GlaxoSmithKline Services Unlimited v Commission* [2009] ECR I-9291, [2010] 4 CMLR 50, paras 59 and 60.

<sup>387</sup> *Ibid*, paras 62–64.

<sup>388</sup> Case 161/84 *Pronuptia de Paris GmbH v Schillgalis* [1986] ECR 353, [1986] 1 CMLR 414, paras 23 and 25.

Following the order of the text above, it seems that the contents of the ‘object’ box can be depicted as follows:

<b>The object box</b> <sup>389</sup>	
<b>Horizontal agreements:</b>	
<ul style="list-style-type: none"> <li>• to fix prices</li> <li>• to exchange information that reduces uncertainty about future behaviour</li> <li>• to share markets</li> <li>• to limit output, including the removal of excess capacity</li> <li>• to limit sales</li> <li>• for collective exclusive dealing</li> </ul>	
<b>Vertical agreements:</b>	
<ul style="list-style-type: none"> <li>• to impose fixed or minimum resale prices</li> <li>• to impose export bans</li> </ul>	

#### (iv) Refinement of the range of agreements within the object box

An important qualification must be made. This presentation of the position slightly oversimplifies the position in so far as it suggests that the content of the object box is capable of precise definition: it is not; furthermore the content of the object box is capable of change over a period of time, as the EU Courts are called upon to consider, or perhaps to reconsider, the restrictive nature of particular types of agreements. This process of categorisation and recategorisation is natural and to be expected, and has a parallel in the US where the courts are from time to time called upon to determine whether a particular type of agreement should be tested according to a *per se* or a rule of reason standard<sup>390</sup>. However the fact that a particular type of agreement might be characterised as not having as its object the restriction of competition does *not* mean that an agreement that is found to restrict by object ceases to do so if it can be proven in an individual case that it does not have a restrictive effect: in that case all object cases would, in reality, be converted into effects ones, thereby undermining the very distinction between the two<sup>391</sup>.

<sup>389</sup> It will be seen that the contents of the object box correspond to a large extent with the provisions that are blacklisted in Articles 4(a) and 4(b) of Regulation 330/2010 on vertical agreements (ch 16, ‘Article 4(a): resale price maintenance’, pp 664–665, and ch 16, ‘Article 4(b): territorial and customer restrictions’, pp 665–668), Article 5 of Regulation 1217/2010 on research and development agreements (ch 15, ‘Article 4: the market share threshold and duration of exemption’, p 597) and Article 4 of Regulation 1218/2010 on specialisation agreements (ch 15, ‘Article 4: hardcore restrictions’, p 602).

<sup>390</sup> In the US see *Continental TV v GTE Sylvania* 433 US 36 (1977), where the Supreme Court overruled an earlier judgment, *US v Arnold Schwinn & Co* 388 US 365 (1967), that had subjected non-price vertical restraints to a *per se* rule; *National Society of Professional Engineers v US* 435 US 679 (1978), where a trade association’s rules prohibiting competitive bidding by members were tested under the rule of reason rather than a *per se* rule; *Broadcast Music Inc v CBS* 441 US 1 (1979), where the rule of reason was applied to the rules of a copyright collecting society: the Supreme Court accepted that the agreement was a price fixing agreement ‘in the literal sense’, but concluded that it was not a ‘naked restraint’, but instead enabled copyright owners to market their product more efficiently; *State Oil Co v Khan* 522 US 3 (1997), where the Supreme Court held that maximum resale price maintenance should be tested under the rule of reason and not a *per se* standard; and *Leegin Creative Leather Products, Inc v PSKS, Inc* 551 US 877 (2007) where the Supreme Court decided that agreements on *minimum* resale prices should be transferred from *per se* to rule of reason analysis.

<sup>391</sup> See on this Advocate General Kokott in Case C-8/08 *T-Mobile* [2009] ECR I-4529, [2009] 5 CMLR 1701, paras 45–46; see also Kolstad ‘Object contra effect in Swedish and European competition law’, Swedish Competition Authority, 2009, available at [www.kkv.se/](http://www.kkv.se/).

A few examples can be given of agreements that might have been considered to be restrictive by object, and yet in which the Commission or Court analysed them on the basis of effects instead. In *Visa International – Multilateral Interchange Fee*<sup>392</sup> participants in the Visa system agreed on the level of the ‘multilateral interchange fee’ that ‘acquiring banks’ (which act for merchants) pay to ‘issuing banks’ (which issue Visa cards to consumers) for each transaction with a Visa card; the Commission concluded that this did restrict the freedom of banks to decide their own pricing policies<sup>393</sup>, but that this did not amount to a restriction of competition by object<sup>394</sup>, but by effect<sup>395</sup>; the Commission decided that the agreement satisfied the criteria of Article 101(3)<sup>396</sup>. In *MasterCard*<sup>397</sup> the Commission left open the question of whether the interchange fee restricted by object since it considered that it clearly had an anti-competitive effect<sup>398</sup>.

There have been a few occasions on which the Court of Justice has concluded that an export ban, in the context of a specific type of agreement, did not have as its object the restriction of competition. An example can be found in *Erauw-Jacquery Sprl v La Hesbignonne Société Coopérative*<sup>399</sup>, where the Court of Justice held that a provision preventing a licensee from exporting so-called ‘basic’ seeds protected by plant breeders’ rights could fall outside Article 101(1) where it was necessary to protect the right of the licensor to select his licensees. In *Javico v Yves St Laurent*<sup>400</sup>, where an export ban was imposed on distributors in Russia and the Ukraine, the Court of Justice held that:

In the case of agreements of this kind stipulations of the type mentioned in the question must be construed not as being intended to exclude parallel imports and marketing of the contractual product within the [EU] but as being designed to enable the producer to penetrate a market outside the [EU] by supplying a sufficient quantity of contractual products to that market. That interpretation is supported by the fact that, in the agreements at issue, the prohibition of selling outside the contractual territory also covers other non-member countries<sup>401</sup>.

Having concluded that the agreement in *Javico* did not have as its object the restriction of competition, the Court of Justice went on to consider whether it might have this effect. The *Javico* judgment is easy to understand, given that the export ban was not imposed on a distributor within the EU, but rather concerned exports from Russia and the Ukraine.

## **(E) Agreements that have as their effect the prevention, restriction or distortion of competition**

### **(i) Extensive analysis of an agreement in its market context is required to determine its effect<sup>402</sup>**

Where it is not possible to say that the object of an agreement is to restrict competition, it is necessary to conduct an extensive analysis of its effect on the market before it can be

found to infringe Article 101(1)<sup>403</sup>. This has been stressed by the EU Courts on a number of occasions. For example, in *Brasserie de Haecht v Wilkin*<sup>404</sup> the Court of Justice said that:

it would be pointless to consider an agreement, decision or practice by reason of its effect if those effects were to be taken distinct from the market in which they are seen to operate, and could only be examined apart from the body of effects, whether convergent or not, surrounding their implementation. Thus in order to examine whether it is caught by Article [101(1)] an agreement cannot be examined in isolation from the above context, that is, from the factual or legal circumstances causing it to prevent, restrict or distort competition. The existence of similar contracts may be taken into consideration for this objective to the extent to which the general body of contracts of this type is capable of restricting the freedom of trade<sup>405</sup>.

An important case which demonstrates the depth of analysis required in determining whether an agreement has the effect of restricting competition is *Delimitis v Henninger Bräu AG*<sup>406</sup>. There the Court of Justice considered a provision in an agreement between a brewery and a licensee of a public house owned by the brewery, whereby the licensee was required to purchase a minimum amount of beer each year. The litigation in the German courts concerned the refusal by the brewery, on termination, to return the full deposit to the licensee that he had paid when entering into the agreement: the brewery had deducted sums that it considered it was entitled to. The licensee claimed that the agreement was void and unenforceable under Article 101; an appeal court in Germany referred the case to the Court of Justice under Article 267 TFEU. The Court of Justice said that beer supply agreements of the type under consideration do not have as their object the restriction of competition<sup>407</sup>. Instead it stressed that the agreement had to be considered in the context in which it occurred<sup>408</sup>. To begin with it was necessary to define the relevant product and geographic markets<sup>409</sup>: these were defined as the sale of beer in licensed premises (as opposed to beer sold in retail outlets) in Germany. Having defined the markets, the Court then said that it was necessary to determine whether access to the market was impeded: could a new competitor enter the market, for example by buying an existing brewery together with its network of sales outlets or by opening new public houses<sup>410</sup>? If the answer was that access to the market was impeded, it was necessary to ask whether the agreements entered into by Henninger Bräu contributed to that foreclosure effect, for example because of their number and duration<sup>411</sup>. Only if the answer to both of these questions was yes could it be held that Article 101(1) was infringed. The analysis suggested in this case was specific to the issues raised by beer supply agreements, and is not

<sup>403</sup> Helpful guidance on the Commission's approach to the establishment of anti-competitive effects can be found in the Commission's *Guidelines on the application of Article [101(3)] of the Treaty* OJ [2004] C 101/8, paras 24–27 and in its *Guidelines on Horizontal Cooperation Agreements* OJ [2011] C 11/1, paras 26–47.

necessarily the same to be applied, for example, to restrictive covenants taken on the sale of a business<sup>412</sup> or to the rules of a group purchasing association<sup>413</sup>. However the important point about the judgment is its requirement that a full analysis of the agreement in its market context must be carried out before it is possible to determine whether its effect is to restrict competition.

### (ii) The need to establish a ‘counter-factual’

In determining whether an agreement has a restrictive effect on competition, it is necessary to consider what the position would have been in the absence of the agreement<sup>414</sup>: by comparing the two situations it should be possible to form a view as to whether the agreement could restrict competition. The need to examine the ‘counter-factual’ was stressed by the General Court in *O2 (Germany) GmbH & Co, OHG v Commission*<sup>415</sup>, where it annulled a Commission decision<sup>416</sup> finding that a roaming agreement in the mobile telephony sector had the effect of restricting competition: the Commission had failed to show what the position would have been in the absence of the agreement, or that the agreement could have restrictive effects on competition<sup>417</sup>.

### (iii) Actual and potential competition

In deciding whether Article 101 is infringed the Commission and the EU Courts will not limit their consideration to whether existing competition will be restricted by the agreement; they will also take into account the possibility that an agreement might affect potential competition in a particular market. Following criticism of its overly interventionist approach in the 1980s the Commission shifted its perception of ‘potential competition’ under Article 101(1), and it now adopts a more realistic view of the expression so that fewer agreements are caught than previously<sup>418</sup>. The General Court in *European Night Services v Commission*<sup>419</sup> rejected in its entirety a finding of the Commission that the establishment of the joint venture European Night Services Ltd could restrict actual or potential competition between its parents: the Court considered this to be:

a hypothesis unsupported by any evidence or any analysis of the structure of the relevant market from which it might be concluded that it represented a real, concrete possibility<sup>420</sup>.

However, the Commission would be erring in law if it were to disregard altogether the impact of an agreement on potential competition<sup>421</sup>; while in *Visa Europe Ltd v*

#### (iv) Cases in which agreements containing contractual restrictions were found not to have anti-competitive effects

The point was made earlier that a contractual restriction does not necessarily result in a restriction of competition. There have been many judgments in which the EU Courts have concluded that agreements containing contractual restrictions did not have the effect of restricting competition. Several of these cases were Article 267 references, where one party was trying to avoid a contractual restriction freely entered into by invoking Article 101(2) TFEU – which says that agreements that infringe Article 101 are void – in litigation in a national court.

The first case of note was as long ago as 1966: in *Société Technique Minière v Maschinenbau Ulm*<sup>425</sup> the Court of Justice said that a term conferring exclusivity on a distributor might not infringe Article 101(1) where this seemed to be 'really necessary for the penetration of a new area by an undertaking'. Two weeks later, the Court of Justice in *Consten and Grundig v Commission*<sup>426</sup> reached the conclusion that an agreement conferring absolute territorial protection on a distributor had as its object the restriction of competition and did not satisfy the criteria of Article 101(3). These two judgments are highly instructive. *Société Technique Minière* shows that simply granting exclusive rights to a territory, without export bans, may not infringe Article 101(1) at all: it is an empirical question whether such an agreement, assessed in its market context, has a restrictive effect; *Consten and Grundig*, however, shows that where an agreement goes further, imposing export bans and preventing the possibility of parallel trade, it is considered by law to have as its object the restriction of competition. There is no better illustration of the impact of the 'single market imperative'<sup>427</sup> than this.

In *Metro SB–Grossmärkte v Commission*<sup>428</sup> the Court of Justice held that restrictive provisions in a selective distribution system may fall outside Article 101(1) where they satisfy objective, qualitative criteria and are applied in a non-discriminatory manner<sup>429</sup>. In *LC Nungesser KG v Commission*<sup>430</sup> the Court of Justice held that an open exclusive licence of plant breeders' rights would not infringe Article 101(1) where, on the facts of the case, the licensee would not have risked investing in the production of maize seeds at all without some immunity from intra-brand competition<sup>431</sup>. In *Coditel v Ciné Vog Films SA (No 2)*<sup>432</sup> the Court of Justice held that an exclusive copyright licence to exhibit a film in a Member State would not necessarily infringe Article 101(1), even where this might prevent transmission of that film by cable broadcasting from a neighbouring Member State, where this was necessary to protect the investment of the licensee. Restrictive covenants may fall outside Article 101(1), provided that they are duly limited in time, space and subject-matter; in other words that they satisfy the principle of proportionality. This

<sup>429</sup> See ch 16, 'Selective distribution agreements', pp 641–645.

<sup>430</sup> Case 258/78 [1982] ECR 2015, [1983] 1 CMLR 278.

<sup>431</sup> See ch 19, 'Territorial exclusivity and the *Maize Seeds* case', pp 774–775.

<sup>432</sup> Case 262/81 [1982] ECR 3381, [1983] 1 CMLR 49.

was established by the Commission in *Reuter/BASF*<sup>433</sup>, and confirmed by the Court of Justice in *Remia BV and Verenigde Bedrijven and Nutricia v Commission*<sup>434</sup>; there the Court recognised that, in order to effect the sale of a business together with its associated goodwill, it may be necessary that the vendor should be restricted from competing with the purchaser; in the absence of such a covenant it may not be possible to sell the business at all. In *Métropole télévision v Commission*<sup>435</sup> the General Court held that an ancillary restriction is one that is ‘directly related and necessary to the implementation of a main operation’<sup>436</sup>, and said that this is a ‘relatively abstract’ matter that does not require a full market analysis<sup>437</sup>.

In *Pronuptia de Paris v Schillgalis*<sup>438</sup> the Court of Justice held that many restrictive provisions in franchising agreements designed to protect the intellectual property rights of the franchisor and to maintain the common identity of the franchise system fall outside Article 101(1). In *Erauw-Jacquery Sprl v La Hesbignonne Société Coopérative*<sup>439</sup> the Court of Justice held that a provision preventing a licensee from exporting basic seeds protected by plant breeders’ rights could fall outside Article 101(1) where it was necessary to protect the right of the licensor to select his licensees. In *Gøttrup-Klim Grovvarforeninger v Dansk Landburgs Grovvarveselskab AmbA*<sup>440</sup> the Court of Justice held that a provision in the statutes of a cooperative purchasing association, forbidding its members from participating in other forms of organised cooperation which were in direct competition with it, did not necessarily restrict competition, and may even have beneficial effects on competition<sup>441</sup>; it was necessary to consider the effect of the provision on the market, and it would not be caught by Article 101(1) if it was restricted to what was necessary to ensure that the cooperative could function properly and maintain its contractual power in relation to the suppliers with which it had to deal<sup>442</sup>.

#### (v) Commercial ancillarity

These judgments of the EU Courts show that, when considering whether an agreement has the effect of restricting competition, it is possible to argue successfully that restrictions which are necessary to enable the parties to an agreement to achieve a legitimate commercial purpose fall outside Article 101(1)<sup>443</sup>. The legitimate purposes under consideration were of various kinds: for example the penetration of a new market, the sale of a business and the successful establishment of a group purchasing association. An idea

<sup>443</sup> These issues are interestingly discussed in an English case, *Bookmakers’ Afternoon Greyhound Services Ltd v Amalgamated Racing Ltd* [2008] EWHC 1978 (Ch), upheld on appeal [2009] EWCA Civ 750.

that unifies these judgments is that the restrictions found to fall outside Article 101(1) were ancillary to a legitimate commercial operation, and the expression ‘commercial ancillarity’ might be helpful in understanding that group of cases<sup>444</sup>; they can be distinguished from the judgment of the Court of Justice in *Wouters*, discussed in the next section, which recognises the idea of ‘regulatory ancillarity’.

#### (vi) Regulatory ancillarity: the judgment of the Court of Justice in *Wouters*

In the cases discussed in the previous section the Court of Justice concluded that restrictions in agreements fell outside Article 101(1) where they were necessary to facilitate a commercial activity. In *Wouters v Algemene Raad van de Nederlandsche Orde van Advocaten*<sup>445</sup> the Court of Justice dealt with a rather different situation. In that case Mr Wouters challenged a rule adopted by the Dutch Bar Council which prohibited lawyers in the Netherlands from entering into partnership with non-lawyers: Mr Wouters wished to practise as a lawyer in a firm of accountants. A number of questions were referred to the Court of Justice as to the compatibility of such a rule with EU competition law. In its judgment the Court, consisting of 13 judges, stated that a prohibition of multi-disciplinary partnerships ‘is liable to limit production and technical development within the meaning of Article [101(1)(b)] of the Treaty’<sup>446</sup>; it also considered that the rule had an effect on trade between Member States<sup>447</sup>. However, at paragraph 97 of its judgment the Court stated:

However, not every agreement between undertakings or any decision of an association of undertakings which restricts the freedom of action of the parties or of one of them necessarily falls within the prohibition laid down in Article [101(1)] of the Treaty. For the purposes of application of that provision to a particular case, account must first of all be taken of the overall context in which the decision of the association of undertakings was taken or produces its effects. More particularly, account must be taken of its objectives, which are here connected with the need to make rules relating to organisation, qualifications, professional ethics, supervision and liability, in order to ensure that the ultimate consumers of legal services and the sound administration of justice are provided with the necessary guarantees in relation to integrity and experience... It has then to be considered whether the consequential effects restrictive of competition are inherent in the pursuit of those objectives<sup>448</sup>.

This is a most interesting, and controversial, judgment. The early part of the judgment reads as though the Court would conclude that Article 101(1) was infringed, whereas from paragraph 97 onwards it explains why Article 101(1) would not be infringed if the rule in question could ‘reasonably be considered to be necessary in order to ensure the proper

<sup>444</sup> The term ‘commercial ancillarity’ is used here to connote a broader concept than the narrowly-focused ‘ancillary restraints doctrine’ considered in the *Métropole* judgment discussed above and in ch 21, ‘Contractual restrictions directly related and necessary to a merger: “ancillary restraints”’, pp 882–884.

<sup>445</sup> Case C-309/99 [2002] ECR I-1577, [2002] 4 CMLR 913; for comment on this case see Vossestein (2002) 39 CML Rev 841; Monti ‘Article 81 EC and Public Policy’ (2002) 39 CML Rev 1057; O’Loughlin ‘EC Competition Rules and Free Movement Rules: An Examination of the Parallels and their Furtherance by the Court of Justice *Wouters* Decision’ (2003) 24 ECLR 62; Loozen ‘Professional ethics and restraints of competition’ (2006) 31 EL Rev 28; see also the judgment of the High Court in Ireland that the Medical Council of Ireland was not subject to competition law when making and applying professional rules in *Hemat v The Medical Council*, [2006] IEHC 187; the case is noted by Ahern at (2007) 28 ECLR 366.

<sup>446</sup> [2002] ECR I-1577, [2002] 4 CMLR 913, para 90; see also paras 86 and 94.

<sup>447</sup> *Ibid*, para 95.

<sup>448</sup> To similar effect see Case T-144/99 *Institut des Mandataires Agréés v Commission* [2001] ECR II-1087, [2001] 5 CMLR 77, para 78.

practice of the legal profession, as it is organised in [the Netherlands]<sup>449</sup>. The judgment means that, in certain cases, it is possible to balance *non-competition* objectives against a restriction of competition, and to conclude that the former outweigh the latter, with the consequence that there is no infringement of Article 101(1). The Court does not make findings of fact in an Article 267 reference; rather it gives a preliminary ruling which the domestic court must apply to the case before it. However, it is clear that the judgment provides a basis on which the Dutch court could decide that the rule in question did not infringe Article 101(1). It also would seem from paragraphs 107 and 108 of the *Wouters* judgment that the Court of Justice was disinclined to interfere with the Bar Council's assessment of the need for, and content of, the rules in question; the position should be contrasted with Article 101(3), where the burden of proof rests on the undertaking(s) defending the agreement and where the Commission insists on convincing evidence of economic efficiencies<sup>450</sup>.

Numerous questions arise from the judgment in *Wouters*. First, why did the Court of Justice decide that Article 101(1) was not applicable? Secondly, how does this judgment fit with those discussed in section (iv) above? Thirdly, how broad is the rule in *Wouters*? Finally, could the Court have decided the case in a different way, but still have come to the conclusion that the rule in question did not infringe Article 101?

#### **(A) Why was Article 101(1) not applicable?**

On the first point, the Court of Justice must have felt that it was appropriate to establish that 'reasonable' regulatory rules fall outside Article 101(1). Furthermore, it is possible that the Court was deliberately trying to reach a similar outcome under Article 101 to that which would have been achieved under Article 56 TFEU had the case been argued under the provisions on the free movement of services. It might have been the case that the rule in question had been adopted by the Dutch Government itself, if the regulatory regime for the legal profession in the Netherlands had been different: in that case the rule could not have been challenged under Article 101(1), but might have been under Article 56. Under that provision a Member State may adopt rules which restrict the free movement of services to the extent that they are necessary to achieve a legitimate public interest<sup>451</sup>; the judgment in *Wouters* effectively applies the same reasoning to a case in which the regulatory function was not carried out by a Member State, and so was not susceptible to challenge under Article 56, but by a private body empowered by the state to adopt regulatory rules, subject to control, if at all, under the competition rules<sup>452</sup>.

#### **(B) The relationship between the judgment in *Wouters* and earlier case law of the EU Courts**

On the second point, the judgment in *Wouters* does have a conceptual similarity to the cases discussed in section (iv) above, in that they all are concerned with the idea

<sup>450</sup> See ch 4, 'The burden of proving that the conditions of Article 101(3) are satisfied', pp 152–153.

<sup>451</sup> See eg Case 33/74 *Van Binsbergen v Bestuur Van de Bedrijfsvereniging voor de Metaalnijverheid* [1974] ECR 1299, [1975] 1 CMLR 298, para 14.

<sup>452</sup> The Court cited Case 107/83 *Klopp* [1984] ECR 2971, para 17 and Case C-3/95 *Reisebüro Broede* [1996] ECR I-6511, para 37, cases on Article 56 TFEU, in para 99 of its judgment in *Wouters*: in these cases it had held that, in the absence of specific EU rules in the field, each Member State is in principle free to regulate the exercise of the legal profession in its territory; on the point discussed in the text see Monti 'Article 81 EC and Public Policy' (2002) 39 CML Rev 1057, in particular at pp 1086–1090, and Mortelmans 'Towards Convergence in the Application of the Rules on Free Movement and on Competition?' (2001) 38 CML Rev 613; see also O'Loughlin 'EC Competition Rules and Free Movement Rules: An Examination of the Parallels and their Furtherance by the Court of Justice *Wouters* Decision' (2003) 24 ECLR 62.

of ancillarity: restrictions on conduct, even ones that, in a colloquial sense, appear to restrict competition, do not infringe Article 101(1) where they are ancillary to some other legitimate purpose. What is of interest about *Wouters*, however, is that the restriction in that case was not necessary for the execution of a commercial transaction or the achievement of a commercial outcome on the market; instead it was ancillary to a regulatory function ‘to ensure that the ultimate consumers of legal services and the sound administration of justice are provided with the necessary guarantees in relation to integrity and experience’<sup>453</sup>. This seems to be a different application of the concept of ancillarity from that in the earlier case law: the *Wouters* case is concerned with what could be described as ‘regulatory ancillarity’, whereas earlier judgments were concerned with ‘commercial ancillarity’; perhaps the use of these two terms would be useful in, first, demonstrating a continuity with the earlier case law, through the common use of the idea of ancillarity, while also capturing the difference between the two situations, by distinguishing commercial and regulatory cases.

### (C) *How broad is the rule in Wouters?*

On the third point, that is the breadth of the rule in *Wouters*, there is nothing in the judgment itself that expressly limits its application to so-called ‘deontological’ (that is to say professional ethical) rules for the regulation of the legal profession, nor to the liberal professions generally. The Court of Justice’s judgment in *Meca-Medina v Commission*<sup>454</sup> confirms that the *Wouters* doctrine can apply to other regulatory rules. In *Meca-Medina* the Court of Justice concluded that the anti-doping rules of the International Swimming Federation had a legitimate objective: to combat drugs in order for competitive sport to be conducted fairly, including the need to safeguard equal chances for athletes, athletes’ health, the integrity and objectivity of competitive sport and ethical values in sport<sup>455</sup>; the Court went on to decide that the restrictions of competition inherent in the rules were proportionate<sup>456</sup>. The *Meca-Medina* judgment justifies the way in which the Commission had dismissed a complaint about rules of UEFA, the body responsible for the Champions League football tournament, which restricted the ownership of shares in more than one football team competing in the Champions League: the rules were necessary to protect the integrity of the tournament and were therefore, pursuant to *Wouters*, outside Article 101(1)<sup>457</sup>: spectators would not be confident that the results of football matches were genuine if the same person controlled opposing teams<sup>458</sup>.

In *Wouters* the rules under scrutiny undoubtedly had a public law character: Dutch legislation provided for the regulation of the legal profession, albeit that the rule-making function belonged to a private law association of undertakings. In *Meca-Medina* the International Olympic Committee (‘IOC’) was responsible for the regulatory system: the IOC is a creature of public international law, which may explain the Court of Justice’s willingness to apply the *Wouters* doctrine in that case. An intriguing question for the future is whether *Wouters* could be extended yet further, to a purely private regulatory system where there is no public component at all. Many sporting organisations have a purely private law character, such as the Football Association in the UK: the Court of Justice may be prepared to extend the *Wouters* case to such bodies. However other cases

<sup>453</sup> Case C-309/99 *Wouters v Algemene Raad van de Nederlandsche Orde van Advocaten* [2002] ECR I-1577, [2002] 4 CMLR 913, para 97.

<sup>455</sup> Case C-519/04 P [2006] ECR I-6991, [2006] 5 CMLR 1023, paras 42–45.

<sup>456</sup> *Ibid*, paras 47–56.

<sup>457</sup> Commission Press Release IP/02/942, 27 June 2002.

<sup>458</sup> See further ‘The application of Article 101(1) to sporting rules’, pp 133–134 below.

are less easy to predict: for example, suppose that firms in a particular sector were to adopt rules for the protection of the environment on their own initiative, without any encouragement by the kind cognisable under Article 101(3): it remains to be seen whether *Wouters* could be invoked in such a case. In *Hilti v Commission*<sup>459</sup> the General Court said that, where there is a public authority with powers, for example, in relation to product safety, it is not for private undertakings to take private initiatives to eliminate products that they consider to be unsafe<sup>460</sup>.

**(D) Could the Court of Justice in *Wouters* have reached the same conclusion by a different route?**

On the fourth point, it is interesting to consider whether the Court of Justice could have reached the conclusion that there was no infringement of the competition rules in *Wouters* by some other route than the one it adopted. Perhaps the most obvious alternative solution would have been to hold that the rules did infringe Article 101(1) – as noted, the Court did say that the prohibition on multi-disciplinary partnerships was liable to limit production and technical development within the meaning of Article 101(1)(b) – but that they satisfied the terms of Article 101(3)<sup>461</sup>. However this approach was not available in *Wouters* since, at the relevant time, a decision under Article 101(3) could be made only by the Commission pursuant to a notification under Article 4 of Regulation 17 and no notification had been made. It was not open to the Court of Justice to apply the provisions of Article 106(2) TFEU, since the Bar Council itself was not an entrusted undertaking<sup>462</sup>. The Court could have concluded that there was no effect on trade between Member States, so that Article 101(1) did not apply, thereby in effect referring the matter back to the Netherlands for the application of Dutch competition law; however it expressly held that trade between Member States was affected<sup>463</sup>.

**(vii) The application of Article 101(1) to sporting rules<sup>464</sup>**

This discussion of the *Wouters* judgment provides an opportunity for a brief diversion, to discuss the application of Article 101(1) to sporting rules. All sports have rules: footballers, with the exception of goalkeepers, cannot handle the ball; boxers must not hit ‘below the belt’; javelin throwers should not throw the javelin at other javelin throwers. These are ‘the rules of the game’, and self-evidently do not infringe Article 101(1). Similarly, all sports have disciplinary rules: violent conduct can lead to suspension; taking prohibited drugs may lead to bans. Again, football clubs that belong to one league will be prohibited

<sup>460</sup> *Ibid*, para 118.

<sup>461</sup> On this point see Case No 1003/2/1/01 *Institute of Independent Insurance Brokers v Director General of Fair Trading* [2001] CAT 4, [2001] CompAR 62, paras 168–178, in which the UK Competition Appeal Tribunal considered that the regulatory rules of the General Insurance Standards Council infringed s 2 of the Competition Act 1998 (the domestic equivalent of Article 101(1)), and should have been examined under ss 4 and 9 of that Act (the equivalent of Article 101(3)): see further ch 9, ‘Object or effect the prevention, restriction or distortion of competition within the UK’, p 342.

<sup>462</sup> See ch 6, ‘Article 106(2)’, pp 235–242 on the derogation from the application of Articles 101 and 102 provided by Article 106(2).

<sup>463</sup> Case C-309/99 [2002] ECR I-1577, [2002] 4 CMLR 913, para 95.

<sup>464</sup> For a general discussion of EU law and sport see Weatherill ‘“Fair Play Please”: Recent Developments in the Application of EC law to Sport’ (2003) 40 CML Rev 51; Van den Bogaert and Vermeersch ‘Sport and the EC Treaty: a Tale of Uneasy Bedfellows?’ (2006) 31 ECLR 821; Szyszczak ‘Competition and sport’ (2007) 32 EL Rev 95; Kienapfel and Stein ‘The application of Articles 81 and 82 EC in the sport sector’ (2007) 3 *Competition Policy Newsletter* 6; the Opinion of Advocate General Kokott in Case C-49/07 *MOTOE*, [2008] ECR I-4863, [2008] 5 CMLR 790; note also the Commission’s *Declaration on Sport*, annexed to the final act of the Treaty of Amsterdam, OJ [1997] C 340/136. For the position in the US see *National Collegiate Athletic Association v Board of Regents of University of Oklahoma* 468 US 85 (1984).

from belonging to another one. A conundrum for EU competition law has been to determine whether, and if so when, sporting rules might infringe Article 101 or 102. It is clear that some rules could have restrictive effects on competition in the market, for example where they go beyond ‘the rules of the game’ and instead distort competition in neighbouring broadcasting markets<sup>465</sup>.

In *Meca-Medina* the General Court had held that a sporting rule that ‘has nothing to do with any economic consideration’<sup>466</sup> falls entirely outside Articles 101 and 102. On appeal the Court of Justice held that this was an error of law on the General Court’s part and therefore set the judgment aside<sup>467</sup>. The Court of Justice’s approach is clearly preferable to that of the General Court: the latter’s judgment would mean that sporting rules could not be scrutinised at all under the competition provisions, whereas the Court of Justice’s means that they can be tested for anti-competitive effects, albeit that they might be permissible by virtue of the *Wouters* doctrine.

### (viii) Have the EU Courts embraced the ‘rule of reason’?

As mentioned above, critics of Article 101(1) complain that it is applied to too many agreements; they argue for the application of a ‘rule of reason’, which would result in fewer agreements being caught. The judgments that have just been discussed raise the question of whether the EU Courts have adopted a rule of reason under Article 101(1). Discussion of the rule of reason under Article 101(1) is often very imprecise. It is sometimes used as little more than a slogan by opponents of the judgments of the Courts and, in particular, decisions of the Commission. In so far as the call for a rule of reason is a request for good rather than bad, or reasonable rather than unreasonable, judgments and decisions, no one could disagree with it. However, if proponents of the rule of reason mean that US jurisprudence on the rule of reason under the Sherman Act 1890 should be incorporated into EU competition law, this seems to be misplaced: EU law is different in many ways from US law, not least in that it has the ‘bifurcation’ of Article 101(1) and Article 101(3), which does not exist in the Sherman Act, and that it is concerned with the promotion of a single market as well as with ‘conventional’ competition law concerns<sup>468</sup>.

#### (A) *The rule of reason in US law*

In US law the rule of reason has a particular meaning. In *Continental TV Inc v GTE Sylvania* the Supreme Court defined the rule of reason as calling for a case-by-case evaluation ‘that is, the factfinder weighs all the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition’<sup>469</sup>. In particular this means that, when determining whether an agreement restrains trade in the sense of section 1 of the Sherman Act, it is necessary to balance the agreement’s pro- and anti-competitive effects; where the latter outweigh the former, the agreement will be unlawful. However US and EU competition law are materially different in numerous respects, and terminology should not be imported from US law that could

blur this significant fact<sup>470</sup>. The fact that the Court of Justice has handed down reasonable judgments does not mean that it has adopted the rule of reason in the sense in which that expression is used in the US. Various commentators have argued against incorporation into EU law of a rule of reason modelled upon US experience<sup>471</sup>. In its *White Paper on Modernisation*<sup>472</sup> the Commission said that it did not see the adoption of the rule of reason as a solution to the problems of enforcement and procedure that it had identified. In particular, it said that it would ‘be paradoxical to cast aside Article [101(3)] when that provision in fact contains all the elements of a “rule of reason”’ and that the adoption of the rule of reason under Article 101(1) would ‘run the risk of diverting Article [101(3)] from its purpose, which is to provide a legal framework for the economic assessment of restrictive practices and not to allow application of the competition rules to be set aside because of political considerations’<sup>473</sup>.

### (B) *The judgment of the General Court in Métropole*

In *Métropole Télévision v Commission*<sup>474</sup> the General Court expressly rejected the suggestion that a rule of reason existed under Article 101(1). Six television companies in France had established a joint venture, Télévision par Satellite (‘TPS’), to devise, develop and broadcast digital pay-TV services in French in Europe: TPS would be a competitor to the dominant pay-TV company, Canal+. The parties notified a number of agreements to the Commission. In 1999 the Commission adopted a decision that the creation of TPS was not caught by Article 101(1); however it concluded that a non-competition clause, preventing the parents of TPS from becoming involved in other digital pay-TV satellite companies, could be cleared (that is, found not to infringe Article 101(1)) for a period of three years; and that clauses giving TPS rights of pre-emption in relation to certain channels and services offered by its parents and exclusive rights to other channels infringed Article 101(1) but could be exempted under Article 101(3) for three years. Four of the shareholders in TPS applied to the General Court requesting that the Commission’s decision should be annulled. They argued that the Commission should have applied the rule of reason, according to which ‘an anti-competitive practice falls outside Article [101(1)] of the Treaty if it has more positive than negative effects on competition on a given market’<sup>475</sup>; in particular the clauses in the agreements giving TPS rights of pre-emption and exclusivity would enable it to enter the market dominated by Canal+, and therefore would ‘favour’ new competition<sup>476</sup>. Several well-known judgments of the Court of Justice and General Court were cited in support of this version of the rule of reason<sup>477</sup>. What is of interest is the explicit way in which the General Court’s judgment rejected the applicants’ argument:

72. According to the applicants, as a consequence of the existence of a rule of reason in Community competition law, when Article [101(1)] of the Treaty is applied it is necessary to weigh the pro and anti-competitive effects of an agreement in order to determine

<sup>475</sup> Case T-112/99 [2001] ECR II-2459 [2001] 5 CMLR 1236, para 68.

<sup>476</sup> Ibid, para 69.

<sup>477</sup> Ibid, paras 68 and 70, referring, *inter alia*, to Case 258/78 *Nungesser and Eisele v Commission (Maize Seeds)* [1982] ECR 2015; Case 262/81 *Coditel v Ciné Vog Films* [1982] ECR 3381 and Cases T-374/94 etc *European Night Services v Commission* [1998] ECR II-3141.

whether it is caught by the prohibition laid down in that article. It should, however, be observed, first of all, that contrary to the applicant's assertions the existence of such a rule has not, as such, been confirmed by the Community courts. Quite to the contrary, in various judgments the Court of Justice and the Court of First Instance have been at pains to indicate that the existence of a rule of reason in Community competition law is doubtful<sup>478</sup>.

The General Court went on to say that the pro- and anti-competitive aspects of a restriction of competition should be weighed at the stage of considering whether an agreement satisfies the terms of Article 101(3)<sup>479</sup>: in the General Court's view:

Article [101(3)] would lose much of its effectiveness if such an examination had to be carried out already under Article [101(1)] of the Treaty<sup>480</sup>.

The General Court acknowledged that in various judgments the EU Courts have been 'more flexible' in their interpretation of Article 101(1), but concluded that this did not mean that they had adopted the 'rule of reason' in the sense argued for by the applicants<sup>481</sup>. Rather, the more flexible judgments of the Courts demonstrate that they are not willing to find a restriction 'wholly abstractly'; instead a full market analysis is required<sup>482</sup>. The General Court came to the same conclusion in *Van den Bergh Foods Ltd v Commission*<sup>483</sup> and in *O2 (Germany) GmbH & Co, OHG v Commission*<sup>484</sup>. The Commission cites the *Métropole* judgment in paragraph 11 of its *Guidelines on the application of Article [101(3) TFEU]* in support of its proposition that '[t]he balancing of anti-competitive and pro-competitive effects is conducted exclusively within the framework laid down by Article [101(3)]'<sup>485</sup>.

### (C) Comment

In the authors' view the judgment in *Métropole* was correct to reject the US-style rule of reason in Article 101(1). Of course, the Commission and the Courts should be 'reasonable' when applying Article 101(1), but that does not mean that they should import the method of analysis adopted in the quite different context of the Sherman Act. An interesting question is whether the judgment of the Court of Justice in *Wouters* should be read as importing a rule of reason under Article 101(1)<sup>486</sup>. The doctrine of regulatory ancillarity in that case provides for a balancing of any restriction of competition against the reasonableness of regulatory rules adopted for non-competition reasons; as such, it appears to these authors that the *Wouters* judgment does not apply a US-style rule of reason, and it is preferable not to use this expression in order to explain it<sup>487</sup>.

**(ix) Joint ventures**

Article 101(1) does not apply to full-function joint ventures, which are dealt with under the provisions on merger control: this is explained in chapter 21<sup>488</sup>.

**(F) Article 106(2)**

Article 106(2) precludes the application of the competition rules to undertakings in so far as compliance with them would obstruct them in the performance of a task entrusted to them by a Member State. This subject is dealt with in chapter 6<sup>489</sup>.

**(G) State compulsion and highly regulated markets**

The competition rules do not apply to undertakings in so far as they are compelled by law to behave in a particular way: this is sometimes referred to as the ‘state compulsion’ defence; nor do they apply where a legal framework leaves no possibility for competitive activity on the part of undertakings, that is to say where they operate on highly regulated markets. These two defences have often been invoked, but they are narrowly applied and almost invariably fail<sup>490</sup>. Where undertakings genuinely have no room for autonomous behaviour they would not be liable for infringing Article 101<sup>491</sup>; however the position would alter if a decision to disapply the national legislation has been taken and become definitive<sup>492</sup>. An argument that the Italian sugar market was so highly regulated that there was no scope for competition succeeded in *Suiker Unie v Commission*<sup>493</sup>. In *DaimlerChrysler AG v Commission*<sup>494</sup> the General Court annulled a decision of the Commission that DaimlerChrysler had infringed Article 101 by prohibiting its Spanish dealers from supplying cars to leasing companies in the absence of an identified customer

for a leasing contract: since it was a requirement of Spanish law that there should be an identified customer, the DaimlerChrysler agreements were not themselves restrictive of competition<sup>495</sup>.

The law was helpfully summarised by the Court of Justice in *Deutsche Telekom AG v Commission*<sup>496</sup>, where Deutsche Telekom argued (in an Article 102 case) that it was not guilty of an illegal margin squeeze because its behaviour was approved by the German regulator of the electronic communications sector. The Court rejected the defence because Deutsche Telekom ('DT') retained the right to adjust its prices for the retail sale of broadband internet access services and thereby bring the margin squeeze to an end: approval by the regulator did not deprive DT of its ability to behave autonomously. The Court of Justice summarised the law at paragraph 80 of its judgment<sup>497</sup>:

According to the case-law of the Court of Justice, it is only if anti-competitive conduct is required of undertakings by national legislation, or if the latter creates a legal framework which itself eliminates any possibility of competitive activity on their part, that Articles [101 TFEU and 102 TFEU] do not apply. In such a situation, the restriction of competition is not attributable, as those provisions implicitly require, to the autonomous conduct of the undertakings. Articles [101 TFEU and 102 TFEU] may apply, however, if it is found that the national legislation leaves open the possibility of competition which may be prevented, restricted or distorted by the autonomous conduct of undertakings.

The Court's judgment cited several earlier judgments, in particular pointing out that there is no defence where national law merely encourages or makes it easier for undertakings to engage in autonomous anti-competitive conduct<sup>498</sup>.

## (H) Commission Notices

There are a number of Commission Notices in which it has provided guidance on the application of Article 101(1) to various types of agreement; it might be helpful to provide a checklist of these Notices, arranged chronologically.

### (i) Notice on sub-contracting agreements<sup>499</sup>

Article 101(1) does not apply to some sub-contracting agreements.

### (ii) Notice on the application of the competition rules to cross-border credit transfers<sup>500</sup>

This *Notice* has specific application in the banking sector.

### (iii) Notice on the application of the competition rules to the postal sector<sup>501</sup>

This *Notice* has specific application in the postal sector.

### (iv) Notice on the application of the competition rules to access agreements in the telecommunications sector<sup>502</sup>

This *Notice* has specific application in the telecommunications sector.

<sup>495</sup> Ibid, para 156.

<sup>496</sup> Case C-280/08 P [2010] ECR I-000, [2010] 5 CMLR 1495.

<sup>497</sup> The law is also usefully summarised in paragraph 22 of the Commission's *Guidelines on the applicability of Article 101 TFEU to horizontal co-operation agreements* OJ [2011] C 11/1.

<sup>498</sup> The Court cites Cases 40/73 etc *Suiker Unie v Commission* [1975] ECR 1663, [1976] 1 CMLR 295, paras 36–73 and Case C-198/01 *CIF* [2003] ECR I-8055, [2003] 5 CMLR 829, para 56 for this proposition.

<sup>499</sup> OJ [1979] C1/2.

<sup>500</sup> OJ [1995] C 251/3.

<sup>501</sup> OJ [1998] C 39/2; see ch 23, 'Post', pp 984–988.

<sup>502</sup> OJ [1998] C 265/2; see ch 23, 'Application of EU competition law', pp 982–983.

**(v) Notice regarding restrictions directly related and necessary to the concentration**<sup>503</sup>

Article 101(1) does not apply to ancillary restrictions; this *Notice* is specifically of relevance to the analysis of concentrations under the EUMR, but it provides useful insights into the Commission's thinking more generally<sup>504</sup>.

**(vi) Notice on agreements of minor importance**<sup>505</sup>

This *Notice* is concerned with the *de minimis* doctrine and is examined below.

**(vii) Guidelines on the effect on trade concept contained in Articles [101 and 102 TFEU]**<sup>506</sup>

These *Guidelines* are important in determining the jurisdictional scope of Article 101 and are examined below.

**(viii) Guidelines on the application of Article [101(3) TFEU]**<sup>507</sup>

Although these *Guidelines* are predominantly concerned with the application of Article 101(3), paragraphs 13 to 37 contain useful discussion of the principles behind Article 101(1).

**(ix) Guidelines on the application of Article [101 TFEU] to technology transfer agreements**<sup>508</sup>

These *Guidelines* deal at length with the application of Article 101(1) and Article 101(3) to technology transfer agreements. They also examine matters such as technology pools.

**(x) Commission Consolidated Jurisdictional Notice**<sup>509</sup>

Article 101 does not apply to full-function joint ventures. Paragraphs 91 to 109 examine the concept of full-functionality.

**(xi) Guidelines on the application of Article [101 TFEU] to maritime transport services**<sup>510</sup>

These *Guidelines* set out the principles to be applied when assessing cooperation agreements in the maritime transport sector; in particular they consider the extent to which the exchange of information between competing undertakings may infringe Article 101.

**(xii) Communication from the Commission on the application of Article 101(3) in the insurance sector**<sup>511</sup>

This *Communication* has specific application in the insurance sector<sup>512</sup>.

**(xiii) Guidelines on vertical restraints**<sup>513</sup>

These *Guidelines* deal with the application of Article 101(1) and Article 101(3) to vertical agreements. Paragraphs 12 to 21 of these *Guidelines* provide specific guidance on the application of Article 101(1) to agreements between principal and agent.

<sup>503</sup> OJ [2005] C 56/244.

<sup>504</sup> The *Notice* is discussed in ch 21, 'Jurisdiction', pp 833–844.

<sup>505</sup> OJ [2001] C 368/13. <sup>506</sup> OJ [2004] C 101/81. <sup>507</sup> OJ [2004] C 101/97.

<sup>508</sup> OJ [2004] C 101/2; see ch 19, 'Technology Transfer Agreements: Regulation 772/2004', pp 781–791.

<sup>509</sup> OJ [2008] C 95/1.

<sup>510</sup> OJ [2008] C 245/2. <sup>511</sup> OJ [2010] C 82/20.

<sup>512</sup> See ch 15, 'The Commission's *Guidelines on Horizontal Cooperation Agreements*', pp 588–591.

<sup>513</sup> OJ [2010] C 130/1; see ch 16, 'Vertical agreements: competition policy considerations', pp 623–628.

**(xiv) Guidelines on horizontal cooperation agreements**<sup>514</sup>

These *Guidelines* deal with the application of Article 101(1) and Article 101(3) to horizontal cooperation agreements, that is to say agreements other than hard-core cartels.

**5. The *De Minimis* Doctrine****(A) Introduction**

Some agreements that affect competition within the terms of Article 101(1) may nevertheless not be caught because they do not have an appreciable impact either on competition or on inter-state trade<sup>515</sup>. This *de minimis* doctrine was first formulated by the Court of Justice in *Völk v Vervaecke*<sup>516</sup>. A German producer of washing machines granted an exclusive distributorship to Vervaecke in Belgium and Luxembourg and guaranteed it absolute territorial protection against parallel imports. Volk's market share was negligible<sup>517</sup>. In an Article 267 reference the Court of Justice held that:

an agreement falls outside the prohibition in Article [101(1)] where it has only an insignificant effect on the market, taking into account the weak position which the persons concerned have on the market of the product in question.

The Commission has provided guidance on the issue of whether an agreement does not have an appreciable effect on competition<sup>518</sup> in a series of Notices, the most recent of which appeared in 2001 and is discussed below<sup>519</sup>. This Notice will in many cases give a reasonably clear idea of whether an agreement is *de minimis*. However in some circumstances an agreement might be held to fall within Article 101(1) even though it is below the quantitative criteria established by it; and an agreement may be found not to have an appreciable effect on competition even where the thresholds in the Notice are exceeded<sup>520</sup>.

**(B) The Commission's Notice on Agreements of Minor Importance****(i) Part I of the Notice: introductory paragraphs**

Part I of the Notice contains important statements on the application of the *de minimis* doctrine. Paragraph 1 refers to the case law of the Court of Justice on appreciability. Paragraph 2 states that the Notice sets out the market share thresholds for determining when a restriction of competition is not appreciable. It points out that this 'negative' definition of appreciability (that is to say the explanation of what is *not* an appreciable restriction of competition) does not imply that agreements above the thresholds are caught by Article 101(1): agreements above the thresholds may have only a negligible effect on

<sup>514</sup> OJ [2011] C 11/1; see ch 15, 'The Commission's *Guidelines on Horizontal Cooperation Agreements*', pp 588–591.

<sup>515</sup> Note that an agreement that does not infringe Article 101 may nevertheless infringe the law of one (or more) of the Member States.

<sup>516</sup> Case 5/69 [1969] ECR 295, [1969] CMLR 273.

<sup>517</sup> 0.2 per cent and 0.5 per cent of production in Germany in 1963 and 1966 respectively.

<sup>518</sup> The issue of whether an agreement produces an appreciable effect on trade between Member States is dealt with in the Commission's *Guidelines on the effect on trade concept contained in Articles [101 and 102 TFEU]* which are discussed below.

<sup>519</sup> *Notice on Agreements of Minor Importance* OJ [2001] C 368/13, [2002] 4 CMLR 699, replacing the previous Notice OJ [1997] C 372/13, [1998] 4 CMLR 192; on the 2001 Notice see Peepkorn 'Revision of the 1997 Notice on Agreements of Minor Importance' (2001) (June) *Competition Policy Newsletter* 4.

<sup>520</sup> See the text below.

competition and so not be caught<sup>521</sup>; another way of putting this point is that the Notice establishes a ‘safe harbour’ for agreements below the thresholds, but does not establish a dangerous one for agreements above it. Paragraph 3 makes the important point that the *de minimis* Notice does *not* deal with the concept of an appreciable effect on trade between Member States: this is dealt with in the Commission’s *Guidelines on the effect on trade concept contained in Articles [101 and 102 TFEU]*<sup>522</sup>. Paragraph 3 adds, however, that agreements between small and medium-sized enterprises (‘SMEs’) are unlikely to affect trade between Member States: such undertakings are currently defined as those having fewer than 250 employees and with an annual turnover not exceeding €50 million or an annual balance-sheet total not exceeding €43 million<sup>523</sup>.

Paragraph 4 of the Notice is important: it states that the Commission will not institute proceedings either upon application or upon its own initiative in respect of agreements covered by the Notice; and that, where undertakings assume in good faith that an agreement is covered by the Notice, the Commission will not impose fines. Paragraph 4 of the Notice adds that, although not binding on them, it is intended to provide guidance to national courts and NCAs. Paragraph 5 explains that the Notice also applies to decisions by associations of undertakings and to concerted practices. Paragraph 6 states that the Notice is without prejudice to any interpretation of Article 101 by the EU Courts.

## (ii) Part II of the Notice: the threshold

The main provision in the Notice is contained in Part II, at paragraph 7. It provides as follows:

The Commission holds the view that agreements between undertakings which affect trade between Member States do not appreciably restrict competition within the meaning of Article [101(1)]:

- (a) if the aggregate market share held by the parties to the agreement does not exceed 10 per cent on any of the relevant markets affected by the agreement, where the agreement is made between undertakings<sup>524</sup> which are actual or potential competitors on any of these markets (agreements between competitors); or
- (b) if the market share held by each of the parties to the agreement does not exceed 15 per cent on any of the relevant markets affected by the agreement, where the agreement is made between undertakings which are not actual or potential competitors on any of these markets (agreements between non-competitors).

In cases where it is difficult to classify the agreement as either an agreement between competitors or an agreement between non-competitors the 10 per cent threshold is applicable.

<sup>521</sup> The Notice refers to Cases C-215/96 etc *Bagnasco* [1999] ECR I-135, [1999] 4 CMLR 624, paras 34–35 in support of this proposition; the same point will be found in two General Court judgments, Case T-7/93 *Langnese-Iglo GmbH v Commission* [1995] ECR II-1533, [1995] 5 CMLR 602, para 98; Case T-374/94 etc *European Night Services v Commission* [1998] ECR II-3141, [1998] 5 CMLR 718, paras 102–103; see also para 9 of the Commission’s *Guidelines on Vertical Restraints* OJ [2010] C 130/1.

<sup>522</sup> See ‘The Effect on Trade between Member States’, pp 144–149 below.

<sup>523</sup> See Commission Recommendation 2003/361/EC, OJ [2003] L 124/36; note also para 11 of the Commission’s *Guidelines on Vertical Restraints* OJ [2010] C 130/1 which says that vertical agreements between SMEs would rarely produce an appreciable restriction on competition or on trade between Member States and that where, exceptionally, they do so the Commission would be unlikely to take enforcement action unless those undertakings individually or collectively hold a dominant position in a substantial part of the internal market.

<sup>524</sup> Throughout the Notice the expression ‘undertakings’ includes ‘connected undertakings’ such as parents and subsidiaries: see para 12.

As can be seen the Notice treats vertical agreements more generously than horizontal ones, by providing a higher threshold.

A particular problem arises in some sectors where the cumulative effect of many vertical agreements may lead to foreclosure of the market<sup>525</sup>. The Notice provides guidance on appreciability in this situation (a) by indicating when a cumulative foreclosure effect is likely and (b) by providing a market share threshold indicating whether particular agreements contribute to that effect. Paragraph 8 provides that a cumulative foreclosure effect is unlikely to exist if less than 30 per cent of the relevant market is covered by parallel agreements having similar effects; where there is a foreclosure effect, individual suppliers or distributors will not be considered to contribute to that effect where their market share does not exceed 5 per cent.

A problem that may arise in application of the Notice is that firms may outgrow the market share thresholds established by paragraphs 7 and 8; marginal relief is provided by paragraph 9 where the thresholds (of 10 per cent, 15 per cent and 5 per cent respectively) are exceeded by no more than two percentage points during two successive years.

It is not clear what happens to an agreement when it has outgrown the Notice, including the provisions for marginal relief: one possibility is that it becomes retrospectively void; a second is that it becomes unenforceable from the moment that the Notice ceases to apply. The second suggestion appears to be consistent with the scheme of Article 101 TFEU. In the UK the Court of Appeal held in *Passmore v Morland plc*<sup>526</sup> that an agreement can infringe Article 101(1) at some times and at other times not do so, depending on the surrounding facts: in other words it can drift into and out of voidness.

Paragraph 10 of the Notice notes that guidance on market definition is provided by the Commission's *Notice on the Definition of Relevant Market for the Purpose of [EU] Competition Law*<sup>527</sup> and adds that market shares are to be calculated on the basis of sales value data or, where appropriate, purchase value data; where value data are not available, other criteria, including volume data, may be used.

A different point introduced in paragraph 44 of the Commission's *Guidelines on Horizontal Cooperation Agreements*<sup>528</sup> is the suggestion that, where the parties to a horizontal cooperation agreement have a high combined market share, but one of them has only an insignificant one and does not possess important resources, the agreement would be considered unlikely to have a restrictive effect on competition in the market.

### (iii) Part II of the Notice: the treatment of 'hard-core' restrictions

The judgment of the Court of Justice in *Völk v Vervaecke*<sup>529</sup>, that Article 101 applies only where competition is *appreciably* restricted, concerned a hard-core restriction: the distributor was granted absolute territorial protection; much more recently the Court said in *Pedro IV Servicios SL v Total España SA*<sup>530</sup> that a resale price maintenance provision would infringe Article 101 only if it 'perceptibly' restricts competition within the internal market. As a matter of law, therefore, it seems clear that even hard-core restrictions might fall outside Article 101 because they have no appreciable

<sup>525</sup> See ch 16, 'Factors to be considered in determining whether single branding agreements infringe Article 101(1)', pp 638–639.

<sup>526</sup> [1999] EWCA Civ 696, [1999] 1 CMLR 1129; see to similar effect para 44 of the Commission's *Guidelines on the application of Article [101(3) TFEU]* OJ [2004] C 101/97.

<sup>527</sup> OJ [1997] C 372/5, [1998] 4 CMLR 177; see ch 1, 'Market definition', p 27ff.

<sup>528</sup> OJ [2011] C 11/1; see ch 15, 'The Commission's *Guidelines on Horizontal Cooperation Agreements*', pp 588–591.

<sup>529</sup> See ch 3 n 516 above.

<sup>530</sup> Case C-260/07 [2009] ECR I-2437, [2009] 5 CMLR 1291, para 82, citing earlier case law.

impact. However the Commission specifically says in paragraph 11 of the Notice that the safe harbour provided by paragraph 7 does not apply to certain restrictions: horizontal agreements to fix prices, limit output or sales and to allocate markets or customers<sup>531</sup>; vertical agreements, for example to fix prices, impose export bans and to restrict sales within a selective distribution system<sup>532</sup>; and vertical agreements between competitors<sup>533</sup>. Thus there is no assurance that the Commission would not proceed against a hard-core cartel where the market share of the parties was less than 10 per cent; even SMEs might be investigated: in *Greek Ferries*<sup>534</sup> the Commission imposed fines on Marlines and Ventouris, which were SMEs as defined in an earlier Notice of 1997, since they were party to price-fixing agreements, a particularly serious infringement<sup>535</sup>.

Of course the Commission is bound by the jurisprudence of the Court of Justice, and there would appear to be a conflict between judgments such as *Völk v Vervaecke* and *Pedro IV Servicios SL v Total España SA* and paragraph 11 of the Commission's Notice; furthermore the General Court has said that agreements that restrict competition by object infringe Article 101 only if they have an appreciable effect on competition and on trade between Member States<sup>536</sup>. Equally, however, it is understandable that the Commission does not wish to be seen to be giving a 'green light' to hard-core restrictions of any kind, irrespective of the market share of the undertakings that are party to an agreement. In practice the conflict is more apparent than real, since the Commission, as a matter of administrative priority, would be highly unlikely to proceed against hard-core restrictions below the thresholds set out in the Notice.

### (C) Limitations of the Notice

It is important to note some limitations of this Notice. The Court of Justice has indicated that it is wrong to adopt a purely quantitative approach to the issue of *de minimis* agreements; in *Distillers Co Ltd v Commission*<sup>537</sup> it concluded that an agreement affecting the distribution of Pimms was of importance, notwithstanding the very small proportion of the market held by that drink, because Distillers was a major producer occupying an important position on the market for drinks generally. In *Musique Diffusion Française v Commission*<sup>538</sup> the Court of Justice held that a concerted practice was not within the *de minimis* doctrine where the parties' market shares were small but the market was a

<sup>531</sup> *De minimis Notice*, para 11(1).

<sup>532</sup> *De minimis Notice*, para 11(2); the list is the same as in Article 4 of Regulation 330/2010, as to which see ch 16, 'Article 4: hard-core restrictions', pp 663–669; on this point note *Volkswagen OJ* [2001] L 262/14, [2001] 5 CMLR 1309, para 79 (resale price maintenance could infringe Article 101(1) even where the parties' market share was below the *de minimis* threshold); see also para 10 of the Commission's *Guidelines on Vertical Restraints OJ* [2010] C 130/1 and the cases referred to in footnote 4 of the *Guidelines*.

<sup>533</sup> *De minimis Notice*, para 11(3).

<sup>534</sup> *Greek Ferry Services Cartel OJ* [1999] L 109/24, [1999] 5 CMLR 47, upheld on appeal Case T-59/99 *Ventouris Group Enterprises v Commission* [2003] ECR II-5257, [2005] 5 CMLR 1781, paras 167–170.

<sup>535</sup> *OJ* [1999] L 109/24, [1999] 5 CMLR 121, para 151.

<sup>536</sup> See eg Case T-199/08 *Ziegler SA v Commission* [2011] ECR II-000, [2011] 5 CMLR 261, paras 41–45 (one of the appeals in the *International Removal Services* case), see also Case T-49/01 *Brasserie Nationale v Commission* [2005] ECR II-3033, [2006] 4 CMLR 266, para 140.

<sup>537</sup> Case 30/78 [1980] ECR 2229, [1980] 3 CMLR 121; see similarly Case 19/77 *Miller International v Commission* [1978] ECR 131, [1978] 2 CMLR 334; Case 107/82 *AEG-Telefunken v Commission* [1983] ECR 3151, [1984] 3 CMLR 325, para 58.

<sup>538</sup> Cases 100/80 etc [1983] ECR 1825, [1983] 3 CMLR 221; see also *Yves Saint Laurent Parfums OJ* [1992] L 12/24, [1993] 4 CMLR 120.

fragmented one, their market shares exceeded those of most competitors and their turnover figures were high.

#### (D) Other examples of non-appreciability

The *de minimis* doctrine described in the preceding sections stems from the judgment in *Völk v Vervaecke*<sup>539</sup>, which referred to the ‘weak position’ that the persons had on the market in question; this is why the Commission’s Notice giving expression to the doctrine does so in terms of market share thresholds, which are used as a proxy for undertakings’ market power, or rather lack of market power. It should be noted however that appreciability may be relevant to the application of Article 101(1) in a different way: judgments of the EU Courts and decisions of the Commission can be found in which it was concluded that a restriction of competition was not appreciable, not because the parties to an agreement lacked market power, but because the restriction itself was insignificant in a qualitative sense. For example in *Pavel Pavlov v Stichting Pensioenfonds Medische Specialisten*<sup>540</sup> the Court of Justice concluded that a decision by medical specialists to set up a pension fund entrusted with the management of a supplementary pension scheme did not appreciably affect competition within the common market: the cost of the scheme had only a marginal and indirect influence on the final cost of the services that they offered. This finding was not linked in any way to the market power of the specialists<sup>541</sup>.

## 6. The Effect on Trade Between Member States

The application of Article 101 is limited to agreements, decisions or concerted practices *which may affect trade between Member States*. The scope of Article 102 is similarly limited. The inter-Member State trade clause is very important in EU competition law, since it defines ‘the boundary between the areas respectively covered by [EU] law and the law of the Member States’<sup>542</sup>.

Historically both the Commission and the EU Courts have adopted a liberal interpretation of the inter-state trade clause, thereby enlarging the scope of Articles 101 and 102<sup>543</sup>. This was of particular significance at a time when many Member States had no competition laws

<sup>539</sup> See ch 3 n 516 above.

<sup>540</sup> Cases C-180/98 etc [2000] ECR I-6451, [2001] 4 CMLR 30, paras 90–97.

<sup>541</sup> Similar conclusions, where the non-appreciability of restrictions was not related to the parties’ market power, can be found in *Irish Banks’ Standing Committee* OJ [1986] L 295/28, [1987] 2 CMLR 601, para 16 (an agreement on the opening hours of Irish banks did not appreciably restrict competition); *Visa International* OJ [2001] L 293/24, [2002] 4 CMLR 168, para 65 (a rule of the Visa card system which required a bank to issue a certain number of Visa cards before contracting with retailers for processing credit card payments did not appreciably restrict competition since it improved the utility of the card system for traders and did not create significant barriers to entry: the same conclusion was reached in relation to the ‘no-discrimination’ rule: *ibid*, paras 54–58 and the principle of territorial licensing: *ibid*, paras 63–64); *UEFA’s broadcasting regulations* OJ [2001] L 171/12, [2001] 5 CMLR 654, paras 49–58 (regulations preventing the live transmission of football matches at certain times on a Saturday or Sunday afternoon, in order to protect amateur participation in sport and to encourage live attendance at football matches, did not result in an appreciable restriction of competition); and *Identrus* OJ [2001] L 249/12, paras 54–55 (a prohibition on the members of Identrus selling their equity interest in it to third parties without first offering to sell the interest to Identrus itself or its other members did not amount to an appreciable restriction of competition).

<sup>542</sup> Case 22/78 *Hugin Kassaregister AB v Commission* [1979] ECR 1869, p 1899, [1979] 3 CMLR 345, p 373.

<sup>543</sup> Cf the position in the US where the inter-state commerce clause has also been construed flexibly: see eg *Manderville Island Farms v American Crystal Sugar Co* 334 US 219, 237 (1948); see also *United States v Lopez* 514 US 549, 560 (1995) and *United States v Morrison* 529 US 598, 610 (2000): these are not competition law cases, but each deals with the inter-state commerce clause.

of their own, or competition laws that were weak in terms of powers of investigation and sanctions. This point does not have the same significance today, since all the Member States have effective competition laws, and for the most part these are modelled upon Articles 101 and 102<sup>544</sup>. It follows that a cartel and/or abusive behaviour by a dominant firm will be illegal either under domestic or EU law, and to this extent it matters little whether the infringement occurs under one system or the other (or both). However the concept of inter-state trade is of central importance since the entry into force of Regulation 1/2003<sup>545</sup>, and the creation of the European Competition Network. Determining whether an agreement or practice has an effect on trade between Member States is important for a series of reasons<sup>546</sup>:

- where there is an effect on trade between Member States, national courts and NCAs that apply national competition law to agreements or practices have an *obligation* to also apply Articles 101 and 102<sup>547</sup>
- where there is an effect on trade between Member States, national courts and NCAs cannot apply stricter national competition law to agreements, although they can apply stricter national law to unilateral conduct<sup>548</sup>
- NCAs that apply Articles 101 and 102 have an obligation to inform the Commission of the fact no later than 30 days before the adoption of the decision<sup>549</sup>. Clearly an NCA could avoid this obligation by reaching the conclusion that there is no effect on trade between Member States
- when the Commission is informed that an NCA intends to adopt a decision on the basis of EU competition law, the Commission has the power to initiate its own proceedings and thereby to terminate the proceedings of the NCA<sup>550</sup>
- the Commission and the NCAs have the right to exchange information for the purpose of applying Articles 101 and 102<sup>551</sup>
- there are cooperation provisions in place that facilitate the enforcement of Articles 101 and 102 by national courts, as well as an obligation for Member States to inform the Commission of court cases deciding on the application of those provisions<sup>552</sup>
- NCAs and national courts that apply Articles 101 and 102 must not take decisions that conflict with decisions adopted by the Commission<sup>553</sup>.

Clearly these rules mean that it remains important to know whether an agreement or practice has an effect on trade between Member States. This is why the Commission has published *Guidelines on the effect on trade concept contained in Articles [101 and 102 TFEU]* ('the *Guidelines on inter-state trade*')<sup>554</sup>. They draw substantially on the case law of the EU Courts, going back to *Consten and Grundig v Commission* in 1966<sup>555</sup>. In the account of the *Guidelines on inter-state trade* that follows this case law will not be cited, but the reader should be aware that references to the relevant cases will be found in the footnotes of the *Guidelines*.

Part 1 of the *Guidelines on inter-state trade* contain a brief introduction explaining, in particular, that they deal with the issue of what is meant by an appreciable effect on inter-state trade, but not with the separate question of what is meant by an appreciable

restriction of competition<sup>556</sup>. Part 2 of the *Guidelines* explains the effect on trade criterion, and is divided into four parts: general principles, the concept of ‘trade between Member States’, the notion ‘may affect’, and the concept of appreciability. Part 3 considers the application of the effect on trade criterion to particular examples of agreements and practices.

## (A) The effect on trade criterion

### (i) General principles

Articles 101 and 102 are applicable only where any effect on trade between Member States is appreciable<sup>557</sup>. In the case of Article 101 the question is whether the agreement affects trade: it is not necessary that each part of the agreement does so<sup>558</sup>; and if the agreement affects trade between Member States it is irrelevant that a particular undertaking that is party to the agreement does not itself produce such an effect<sup>559</sup>. In the case of Article 102 the abuse must have an effect on trade between Member States, but this does not mean that each element of the behaviour must be assessed in isolation to determine its effect: the conduct must be assessed in terms of its overall impact<sup>560</sup>.

### (ii) The concept of ‘trade between Member States’

The concept of ‘trade’ is not limited to traditional exchanges of goods and services across borders: it is a wider concept and covers all cross-border activity, including the establishment by undertakings of agencies, branches or subsidiaries in other Member States<sup>561</sup>. The concept of trade also covers situations where the competitive structure of the market is affected by agreements and/or conduct<sup>562</sup>. There can be an effect on trade between Member States where parts only of those States are affected: the effect does not need to extend to their entire territories<sup>563</sup>. The question of whether trade between Member States is affected is separate from the issue of the relevant geographical market: trade could be affected even though the geographical market is national or even smaller than national<sup>564</sup>.

### (iii) The notion ‘may affect’

The Court of Justice has often said that the notion that an agreement or practice ‘may affect’ trade between Member States means that it must be possible to foresee, with a sufficient degree of probability on the basis of a set of objective factors of law or fact, that the agreement or practice may have an influence, direct or indirect, actual or potential, on the pattern of trade between Member States<sup>565</sup>. Subjective intent to affect trade is not required<sup>566</sup>; and it is sufficient that the agreement or practice is capable of having an effect: it is not necessary to prove that it actually will do so<sup>567</sup>. In determining whether the pattern of trade is influenced it is not necessary to show that trade is or would be restricted or reduced: an increase in trade also means that it has been influenced<sup>568</sup>: the effect on trade criterion is simply jurisdictional, determining whether an examination of an agreement or conduct under the EU competition rules is warranted<sup>569</sup>.

The fact that the influence on trade may be ‘direct or indirect, actual or potential’ clearly means that the jurisdictional reach of Articles 101 and 102 can be extensive<sup>570</sup>. However, in the case of indirect and potential influence the analysis must not be based on remote

<sup>570</sup> See *ibid*, paras 36–42.

or hypothetical effects: a person claiming that trade is affected in this way must be able to explain how and why this is the case<sup>571</sup>.

#### (iv) The concept of appreciability

Any effect on trade must be appreciable. The stronger the market position of the undertakings concerned, the likelier it is that any effect will be appreciable<sup>572</sup>. An undertaking's market share, and the value of its turnover in the products concerned, are relevant to the appreciability of any effect<sup>573</sup>. An assessment of appreciability must be considered in the legal and economic context of any agreement or practice including, in the case of vertical agreements, the cumulative effect of parallel networks<sup>574</sup>.

The *Guidelines on inter-state trade* do not provide general quantitative rules on when trade is appreciably affected; however they do provide two examples of situations where trade is normally *not* capable of being appreciably affected.

##### (A) *Small and medium-sized businesses*

The *Guidelines* state that agreements between small and medium-sized businesses, as defined in Commission Recommendation 2003/361/EC<sup>575</sup>, would not normally affect trade between Member States; however they might do so where they engage in cross-border activity<sup>576</sup>. The point is repeated in paragraph 11 of the Commission's *Guidelines on Vertical Restraints*<sup>577</sup>.

##### (B) *A negative rebuttable presumption of non-appreciability*

The *Guidelines* also set out a negative rebuttable presumption of non-appreciability. This arises where:

- the aggregate market share of the parties on any relevant market within the EU affected by the agreements does not exceed 5 per cent and
- the parties' turnover is below €40 million: turnover is calculated differently according to whether the agreement is horizontal or vertical<sup>578</sup>.

The presumption continues to apply where the turnover threshold is exceeded during two successive calendar years by no more than 10 per cent and the market share threshold by no more than 2 per cent.

##### (C) *A positive rebuttable presumption of appreciability*

The *Guidelines* also set out a positive rebuttable presumption of appreciability in the case of agreements which 'by their very nature' are capable of affecting trade between Member States, such as agreements on imports and exports. This arises where:

- the turnover thresholds set out above are exceeded and
- the parties' market shares exceed 5 per cent.

This positive presumption does not apply where the agreement covers part only of a Member State<sup>579</sup>.

<sup>577</sup> OJ [2010] C 130/1.

<sup>578</sup> Ibid, para 52.

<sup>579</sup> Ibid, para 53.

## (B) The application of the effect on trade criterion to particular agreements and conduct

The *Guidelines on inter-state trade* proceed to examine how the effect on trade criterion applies in relation to particular types of agreement and conduct. They do so by reference to three categories: first, agreements and abuse covering or implemented in several Member States<sup>580</sup>; secondly, cases covering a single, or only part of a, Member State<sup>581</sup>; and thirdly, cases involving undertakings located in third countries<sup>582</sup>. It is important to understand that Articles 101 and 102 are capable of application irrespective of where the undertakings concerned are located, provided that the agreement or practice is implemented or has effects within the EU<sup>583</sup>. It is also possible that an export ban imposed by an EU supplier on a distributor in a third country, which prevents the latter from re-importing into the EU, could have an effect on trade between Member States in certain circumstances, for example where there is a significant price differential between prices in the different territories, where that differential would not be eroded by customs duties and transport costs, and where significant volumes of a product could be exported from the third country to the EU<sup>584</sup>.

There have been some judgments of the EU Courts since the *Guidelines* were published. The General Court held in *Raiffeisen Zentralbank Österreich AG v Commission*<sup>585</sup> that a banking cartel in Austria had an effect on trade between Member States. In that case there was a series of regional committees within Austria; the Court held that it was not necessary to consider whether each individual committee had an effect on trade: rather it was necessary to look at the cumulative effect of all the committees<sup>586</sup>. The overall cartel in Austria affected the entire country, and the Court said that this raised a strong presumption that trade between Member States was affected<sup>587</sup>. The Court noted that there had been cases in which this presumption had been rebutted<sup>588</sup>, but held that it was not rebutted on the facts of this case<sup>589</sup>. In *Ziegler SA v Commission*<sup>590</sup> (one of the appeals in the *International Removal Services* case) the General Court rejected an argument that the Commission had failed to demonstrate an appreciable effect on trade between Member States<sup>591</sup>.

In *Emanuela Sbarigia v Azienda USL RM/A*<sup>592</sup> Ms Sbarigia, who operated a pharmacy in a pedestrianised part of Rome heavily used by tourists in the summer season, was challenging legislation, on the basis of both the free movement and the competition rules of the TFEU, that limited the maximum number of hours that she could trade, required her to close on Sundays, to close one half day per week and on public holidays and to take a minimum number of holidays each year. The Court of Justice concluded, as far as the application of the competition rules was concerned, that it was ‘quite obvious’ that the legislation in question could not affect trade between Member States, with the result that

<sup>592</sup> Case C-393/08 [2010] ECR I-000.

the reference of the matter under Article 267 TFEU by the Tribunale amministrativo regionale per il Lazio was inadmissible<sup>593</sup>. It is noticeable in this case that the referring court had itself expressed dissatisfaction with the relevant legislation, as had the Italian competition authority<sup>594</sup>; however the lack of an effect on inter-state trade meant that this matter could not be addressed under the TFEU.

## 7. Checklist of Agreements That Fall Outside Article 101(1)

At the end of this chapter it may be helpful to set out a checklist of the circumstances in which an agreement might be found not to infringe Article 101(1): the list follows the order of the text of this chapter:

- Article 101(1) does not apply to an agreement that is not between undertakings<sup>595</sup>
- Article 101(1) does not apply to collective agreements between employers and workers<sup>596</sup>
- Article 101(1) does not apply to an agreement between two or more persons that form a single economic entity<sup>597</sup>
- Article 101(1) normally does not apply to agreements between a principal and agent<sup>598</sup>
- Article 101(1) normally does not apply to an agreement between a contractor and a sub-contractor<sup>599</sup>
- Article 101(1) does not apply to unilateral conduct that is not attributable to a concurrence of wills between two or more undertakings<sup>600</sup>
- Article 101(1) does not apply to an agreement that has neither the object nor the effect of preventing, restricting or distorting competition<sup>601</sup>
- Article 101(1) does not apply to contractual restrictions that enable undertakings to achieve a legitimate purpose and which are not disproportionate<sup>602</sup>
- Article 101 does not apply to full-function joint ventures<sup>603</sup>
- a realistic view must be taken of potential competition<sup>604</sup>
- Article 101(1) does not apply to an agreement if this would obstruct an undertaking or undertakings in the performance of a task of general economic interest entrusted to them by a Member State<sup>605</sup>
- Article 101(1) does not apply to an agreement which undertakings were compelled to enter into by law<sup>606</sup>

<sup>593</sup> Ibid, paras 29–33.      <sup>594</sup> Ibid, paras 13–15.

<sup>606</sup> See ‘State compulsion and high regulated markets’, pp 137–138 above.

- Article 101(1) does not apply to an agreement in a market that is so highly regulated that there is no latitude left for competition<sup>607</sup>
- Article 101(1) does not apply to an agreement that has no appreciable effect on competition<sup>608</sup>
- Article 101(1) does not apply to an agreement that does not have an appreciable effect on trade between Member States<sup>609</sup>
- Article 101(1) does not apply to an agreement that satisfies the criteria of Article 101(3)<sup>610</sup>.

## Article 101(3)<sup>1</sup>

1. Introduction	151	3. Regulation 1/2003	166
2. The Article 101(3) Criteria	155	4. Block Exemptions	168

### 1. Introduction

An agreement that falls within Article 101(1) of the Treaty is not necessarily unlawful. Article 101(3) provides a ‘legal exception’ to the prohibition in Article 101(1) by providing that it may be declared inapplicable in respect of agreements, decisions or concerted practices<sup>2</sup>, or of categories<sup>3</sup> of agreements, decisions or concerted practices, that satisfy four conditions, the first two positive and the last two negative. To satisfy Article 101(3) an agreement:

- must contribute to improving the production or distribution of goods or to promoting technical or economic progress
- while allowing consumers a fair share of the resulting benefit.

Furthermore the agreement<sup>4</sup>:

- must not impose on the undertakings concerned restrictions which are not indispensable to the attainment of these objectives nor
- afford such undertakings the possibility of eliminating competition in a substantial part of the products in question<sup>5</sup>.

<sup>1</sup> For further reading on Article 101(3) readers are referred to Faull and Nikpay *The EC Law of Competition* (Oxford University Press, 2nd ed, 2007), ch 3, paras 3.395–3.460; Bellamy & Child *European Community Law of Competition* (Oxford University Press, 6th ed, 2008, eds Roth and Rose), ch 3.

<sup>2</sup> The reference to decisions is useful since it means eg that the rules of a trade association may satisfy Article 101(3); it will only be rarely that Article 101(3) is applied to a concerted practice, but this can happen: see eg *Re International Energy Agency* OJ [1983] L 376/30, [1984] 2 CMLR 186; renewed in 1994, OJ [1994] L 68/35; in *CISAC*, Commission decision of 16 July 2008, the Commission concluded that Article 101(3) was not applicable to a concerted practice between a number of copyright collecting societies which amounted to a systematic delineation of the market between them along territorial lines; the decision is on appeal Cases T-401/08 etc *Teosto v Commission*, not yet decided.

<sup>3</sup> The inclusion of ‘categories’ of agreements is important since it paves the way for block exemptions: see ‘Block Exemptions’, pp 168–172 below.

<sup>4</sup> The term ‘agreement’ should be taken to include decisions and concerted practices in the rest of this chapter.

<sup>5</sup> Note that the UK Competition Act 1998 contains a similar provision in s 9: see ch 9, ‘The Chapter I prohibition: exemptions’, pp 356–360.

Under Regulation 17 of 1962<sup>6</sup> the Commission had the exclusive right to grant so-called ‘individual exemption’ under Article 101(3) to agreements notified to it<sup>7</sup>. However the system of notification of agreements to the Commission and the grant of individual exemption was abolished with effect from 1 May 2004 by Council Regulation 1/2003<sup>8</sup>; since then Article 101(3) has been directly applicable<sup>9</sup>, and the Commission shares the competence to apply Article 101(3) with the national competition authorities (‘the NCAs’)<sup>10</sup> and national courts<sup>11</sup>. It is no longer correct to say that agreements are given individual exemption: they either do, or do not, satisfy Article 101(3).

In order to provide guidance to national courts and NCAs, as well as to undertakings and their professional advisers, the Commission has published *Guidelines on the application of Article [101(3)] of the Treaty* (‘the Article [101(3)] Guidelines’ or ‘the Guidelines’)<sup>12</sup>. The *Guidelines* should be applied ‘reasonably and flexibly’ rather than in a mechanical manner<sup>13</sup>. The Commission has cited the *Guidelines* in several of its decisions since 2004<sup>14</sup>. Additional guidance on the application of Article 101(1) and (3) to agreements is provided by the Commission’s guidelines on technology transfer agreements<sup>15</sup>, on vertical restraints<sup>16</sup> and on horizontal cooperation agreements<sup>17</sup>.

An alternative way of satisfying Article 101(3) is to draft an agreement to satisfy one of the so-called ‘block exemptions’ issued by the Council of the European Union (‘the Council’) or by the Commission under powers conferred on it by the Council; the system of block exemptions is unaffected by Regulation 1/2003.

After discussing the burden of proof under Article 101(3) and the implications of the General Court’s important judgment in *Matra Hachette v Commission*, section 2 of this chapter will discuss the criteria in Article 101(3). It will then consider the implications of Regulation 1/2003 for undertakings and their professional advisers, and in particular their need to ‘self-assess’ the application of Article 101(3) to their agreements. The final section in this chapter describes the system of block exemptions.

### **(A) The burden of proving that the conditions of Article 101(3) are satisfied**

Article 2 of Regulation 1/2003 confirms well-settled case law that the burden of proof is on the Commission, the NCAs or the person opposing an agreement in a national court to show that it infringes Article 101(1), but that it is on the undertaking or undertakings seeking to defend an agreement to demonstrate that it satisfies the four conditions in Article 101(3)<sup>18</sup>. The Commission must examine the arguments and evidence put forward by the undertakings relying on Article 101(3); if it is unable to refute them it may be that the undertakings will be taken to have discharged the burden of proof upon

<sup>18</sup> See similarly s 9(2) of the UK Competition Act 1998, see ch 9, ‘Exemption criteria’, p 357.

them<sup>19</sup>. National rules on the standard of proof apply in Article 101(3) cases before the NCAs and national courts<sup>20</sup>.

All four of the conditions must be satisfied if an agreement is to benefit from Article 101(3): the Court of Justice has stressed this on a number of occasions<sup>21</sup>, and paragraph 42 of the *Article [101(3)] Guidelines* contains a statement to the same effect. For example the General Court annulled a Commission decision that an agreement satisfied Article 101(3) in *Métropole télévision SA v Commission*<sup>22</sup> because the Commission had failed to demonstrate that restrictions in the agreement were indispensable<sup>23</sup>. Paragraph 35 of the *Article [101(3)] Guidelines* points out, however, that parties to an agreement covered by a block exemption do not have to show that each of the conditions of Article 101(3) is satisfied: there is a rebuttable presumption that agreements falling within the scope of a block exemption satisfy all four conditions.

Paragraph 44 of the *Article [101(3)] Guidelines* explains that Article 101(3) applies only for as long as the four conditions contained in it are satisfied; however when applying this rule due consideration must be given to the time that it will take, and the restrictions that may be needed, when firms make sunk investments to realise economic efficiencies.

## (B) *Matra Hachette v Commission*

A very important point about Article 101(3) is that, as the General Court stated in *Matra Hachette v Commission*<sup>24</sup>, there are no anti-competitive agreements which, *as a matter of law*, could never satisfy the four conditions set out in that provision: it is possible for the parties to any type of agreement to argue that the conditions of Article 101(3) are satisfied. Even an agreement that has as its *object* the restriction of competition in the sense of Article 101(1) is capable, in principle, of satisfying the conditions of Article 101(3): in this sense EU law differs from US law, since there are no agreements that are irredeemably, or *'per se'*, illegal in the EU system<sup>25</sup>. An example of a case in which an agreement restrictive of competition by object satisfied the terms of Article 101(3) can be found in *Société Air France/Alitalia Linee Aeree Italiane SpA*<sup>26</sup> where the Commission authorised an extensive strategic alliance between those two airlines. Of course it would require extremely convincing evidence to satisfy the Commission, an NCA or a national court that restrictions of competition by object such as horizontal price-fixing and market-sharing satisfy Article 101(3)<sup>27</sup>, but in exceptional circumstances even this may be possible: indeed

<sup>19</sup> Cases 56/64 and 58/64 *Consten and Grundig v Commission* [1966] ECR 299, p 347, [1966] CMLR 418, p 478; Cases C-204/00 P etc *Aalborg Portland v Commission* [2004] ECR I-123, [2005] 4 CMLR 251, para 55; Cases C-501/06 P etc *GlaxoSmithKline Services Unlimited v Commission* [2009] ECR I-9291, [2010] 4 CMLR 50, paras 82–83.

<sup>20</sup> Regulation 1/2003, recital 5.

<sup>21</sup> See eg Cases 43/82 and 63/82 *VBVB and VVVB v Commission* [1984] ECR 19, para 61; Case C-238/05 *Asnef-Equifax v Asociación de Usuarios de Servicios Bancarios (Ausbanc)* [2006] ECR I-11125, [2007] 4 CMLR 6, para 65.

<sup>22</sup> Cases T-528/93 etc [1996] ECR II-649, [1996] 5 CMLR 386, para 93.

<sup>23</sup> The General Court did so again in Case T-185/00 *M6 v Commission* [2002] ECR II-3805, [2003] 4 CMLR 707, para 86, where it considered that the Commission had incorrectly concluded that an agreement would not substantially eliminate competition.

<sup>24</sup> Case T-17/93 [1994] ECR II-595, para 85; see also Case T-168/01 *GlaxoSmithKline Services Unlimited v Commission* [2006] ECR II-2969, [2006] 5 CMLR 29, para 233, and para 46 of the *Article [101(3)] Guidelines*.

<sup>25</sup> See further ch 3, 'Have the EU Courts embraced the "rule of reason"?', pp 134–136.

<sup>26</sup> Commission decision of 7 April 2004, OJ [2004] L 362/17.

<sup>27</sup> See the *Article [101(3)] Guidelines*, para 46.

for many years Articles 3 to 5 of Council Regulation 4056/86 on maritime transport<sup>28</sup> provided block exemption for horizontal price-fixing in the case of containerised cargo carried by international liner conferences due to the particular characteristics of that industry, though this exemption was ended in October 2008<sup>29</sup>.

There have been two recent cases in which the possibility of an Article 101(3) defence for an agreement that restricted competition by object has been explored<sup>30</sup>. In *Competition Authority v Beef Industry Development Society Ltd* ('BIDS')<sup>31</sup> the Court of Justice concluded that an agreement between beef processors in Ireland to reduce capacity for beef processing there (some firms would stay in the market, and would pay other firms to exit and to agree not to re-enter for several years) had the object of restricting competition. Any justification for the agreement would have to be made out under Article 101(3)<sup>32</sup>. The Supreme Court of Ireland, which had referred the matter to the Court of Justice, subsequently asked the Irish High Court to consider whether the Society had produced evidence to support a finding on the basis of Article 101(3)<sup>33</sup>. However it was announced on 25 January 2011 that BIDS had withdrawn its claim under Article 101(3), with the result that the Court was not required to reach a conclusion on the matter.

In *GlaxoSmithKline Services Unlimited v Commission*<sup>34</sup> the Court of Justice considered that a term in a vertical agreement, whereby wholesale purchasers of pharmaceutical products from Glaxo in Spain were charged a higher price if the products were exported from Spain to higher-priced countries such as the UK, restricted competition by object; however the Court was not satisfied that the Commission was correct to dismiss Glaxo's arguments in support of the agreement under Article 101(3). Unfortunately the Commission did not subsequently give a view as to whether Article 101(3) was, in fact, satisfied, so that the parties must determine the issue for themselves.

There have been decisions in which the Commission was satisfied that the fixing of prices satisfied the requirements of Article 101(3). These were far from being classic cartel cases: rather they concerned network industries in which prices were 'fixed' between participants in a network that supplied services to one another (the price fixing was business to business, or 'B to B'), whereas 'hard-core' price fixing involves the fixing of prices to customers (business to customer, or 'B to C'). It is interesting to note that, in these decisions, the Commission considered that the agreements restricted competition *by effect* rather than *by object*: in other words it did not treat the restrictions as hard-core. In *Reims II*<sup>35</sup> the Commission considered that an agreement between the public postal operators in Europe as to the amount that one operator would pay to another for the onward delivery of letters in the latter's territory satisfied the terms of Article 101(3). The agreement did entail the 'fixing' of prices, in that participants in the scheme were committed to its principles; but this was price fixing of an 'unusual' nature<sup>36</sup>, and the Commission could identify a number of economic efficiencies that would follow from it<sup>37</sup>. Similarly in *Visa International – Multilateral Interchange Fee*<sup>38</sup> the Commission stated that it is not the case that an agree-

<sup>37</sup> *Ibid*, paras 69–76; this was a decision where the Commission granted individual exemption under the old procedure in Regulation 17 of 1962: the exemption was renewed in 2003 and expired on 31 December 2006, OJ [2004] L 56/76, [2004] 5 CMLR 2.

<sup>38</sup> OJ [2002] L 318/17, [2003] 4 CMLR 283.

ment concerning prices is always to be classified as a cartel and therefore as inherently incapable of satisfying Article 101(3)<sup>39</sup>: in that decision, adopted under the old procedure in Regulation 17, the Commission granted individual exemption to a ‘multilateral interchange fee’ agreed upon between ‘acquiring’ and ‘issuing’ banks within the Visa system<sup>40</sup>.

## 2. The Article 101(3) Criteria

Each of the four requirements of Article 101(3) will now be examined. It is essential to consider them in conjunction with the *Article [101(3)] Guidelines*. The text that follows will emulate the *Guidelines* by reversing the treatment of the second and third conditions set out in Article 101(3) (a fair share to consumers and indispensability): the Commission’s view is that consideration of whether consumers would obtain a fair share of any resulting benefit does not arise in the event that any restrictions fail the indispensability test, so that it is logical to consider the latter first<sup>41</sup>.

### (A) First condition of Article 101(3): an improvement in the production or distribution of goods or in technical or economic progress

The ‘benefit’ produced by an agreement must be something of objective value to the EU as a whole, not a private benefit to the parties themselves; cost savings that arise simply from the exercise of market power, for example by fixing prices or sharing markets, cannot be taken into account<sup>42</sup>. Any advantages claimed of the agreement must outweigh the detriments it might produce<sup>43</sup>; the Commission has declined to accept that an agreement produces an improvement if, in practice, its effect is a disproportionate distortion of competition in the market in question<sup>44</sup>. An agreement must be examined in the light of all the factual arguments and evidence put forward by the parties in support of their argument that Article 101(3) is satisfied<sup>45</sup>. The Commission requires the parties to found their argument that Article 101(3) applies ‘on a detailed, robust and compelling analysis that relies in its assumptions and deductions on empirical data and facts’: it will not be persuaded ‘by economic theory alone’<sup>46</sup>. In *Groupeement des Cartes Bancaires* the Commission concluded that the *Groupeement* had provided no empirical evidence that the restrictive fees

<sup>39</sup> *Ibid*, para 79; the Commission’s suggestion in this paragraph that some agreements are inherently incapable of satisfying Article 101(3) is clearly wrong given the judgment of the General Court in the *Matra Hachette* case.

<sup>40</sup> The individual exemption expired on 31 December 2008; subsequently the Commission accepted commitments from Visa Europe under Article 9 of Regulation 1/2003 that involved a significant reduction of the interchange fee for debit cards: see Commission Press Release IP/10/1684, 8 December 2010.

<sup>41</sup> *Article [101(3)] Guidelines*, para 39.

<sup>46</sup> See *MasterCard*, Commission decision of 19 December 2007, para 690: see also paras 694–701; the decision is on appeal to the General Court, Case T/111/08 *MasterCard and others v Commission*, not yet decided.

for membership of the CB payment card system were necessary to prevent new entrants from free riding on investment by the other members<sup>47</sup>.

The benefits that may be claimed are specified in Article 101(3): the restrictions in the agreement must either contribute to an improvement in the production or distribution of goods<sup>48</sup> or promote technical or economic progress. These concepts overlap, and in many cases the Commission has considered that more than one – or even that all – the heads were satisfied<sup>49</sup>. In other cases a particular type of benefit may be obviously appropriate for the agreement in question. When permitting specialisation agreements, which can lead to economies of scale and other efficiencies, the Commission has considered that there would be an improvement in the production of goods<sup>50</sup>, while it has often held that research and development projects would lead to technical and economic progress<sup>51</sup>. Vertical agreements between suppliers and distributors naturally come under the head of improvements in distribution<sup>52</sup>. The Commission has recognised network externalities as contributing to technical and economic progress from which consumers derive a benefit<sup>53</sup>.

An important question is to determine how broad the criteria in the first condition of Article 101(3) are: to use an analogy from many card games, in what circumstances can a ‘benefit’ under Article 101(3) ‘trump’ a restriction of competition under Article 101(1), with the result that an agreement which would have been prohibited under Article 101(1) is in fact permitted as a result of the legal exception provided by Article 101(3)? The issue of the breadth of Article 101(3) has attracted considerable attention in recent years for various reasons. First, the abolition of the Commission’s ‘monopoly’ over decision-making in individual cases under Article 101(3) as a result of the adoption of Regulation 1/2003 means that Article 101(3) decisions can now be made by NCAs and national courts as well as the Commission: concern was expressed when Regulation 1/2003 was in gestation that the criteria in Article 101(3) were so broad that they were not appropriate to be decided upon by NCAs and national courts; and that there was a risk that the criteria would be applied inconsistently from one Member State to another. A second point is that Governments increasingly find that social policies that they would like to pursue – for example encouraging undertakings in the drinks industry to restrict the sale of ‘cheap’ alcohol to young people, or supermarkets to impose a charge for providing environmentally unfriendly plastic bags – may infringe competition law, in particular if a ‘narrow’ rather than a ‘broad’ view of Article 101(3) is taken. A third point is that the global financial crisis that erupted in 2008 led to many calls for undertakings to be allowed to enter into cooperative agreements to enable them to survive, supported by an indulgent application of Article 101(3). These factors have led to urgent and lively debate about the ‘true meaning’ of Article 101(3).

<sup>47</sup> Commission decision of 17 October 2008, on appeal to the General Court in Case T-491/07 *CB v Commission*, not yet decided.

<sup>48</sup> Note that services are not explicitly referred to here; however para 48 of the *Article [101(3)] Guidelines* states that Article 101(3) applies, by analogy, to services; in the UK s 9 of the Competition Act 1998 specifically includes improvements in the production or distribution of goods or services.

**(i) A narrow view of Article 101(3)**

A narrow view of Article 101(3) is that it permits only agreements that would bring about improvements in economic efficiency: the very wording of Article 101(3), which speaks of improvements to production and distribution and to technical and economic progress, is clearly suggestive of an efficiency standard. Article 101(3), therefore, simply allows a balancing of the restrictive effects of an agreement under Article 101(1) against the enhancement of efficiency under Article 101(3); in striving to achieve the right balance the other criteria of Article 101(3) – a fair share to consumers, no dispensable restrictions and no substantial elimination of competition – are there to ensure that a reasonable outcome in terms of consumer welfare is achieved. The Commission's *White Paper on Modernisation*<sup>54</sup>, which began the process that culminated in the adoption of Regulation 1/2003, explained Article 101(1) and (3) in precisely this way<sup>55</sup>; and the *Article [101(3)] Guidelines* are drafted explicitly in terms of economic efficiency<sup>56</sup>. An attractive way of thinking of Article 101 as a whole is that Article 101(1) is concerned to establish whether an agreement could lead to allocative inefficiency, and that Article 101(3) permits such an agreement where there would be a compensating enhancement of productive efficiency<sup>57</sup>.

**(ii) A broader approach to Article 101(3)**

However an alternative, and broader, view of Article 101(3) is possible: that it allows policies other than economic efficiency to be taken into account when deciding whether to allow agreements that are restrictive of competition. There are many important policies in the Union, for example on industry<sup>58</sup>, the environment<sup>59</sup>, employment<sup>60</sup>, the regions<sup>61</sup> and culture<sup>62</sup>, which go beyond the simple enhancement of economic efficiency. According to a broad view of Article 101(3) a benefit in terms of any of these policies may be able to 'trump' a restriction of competition under Article 101(1)<sup>63</sup>; another way of putting the point is to suggest that *non-economic* criteria can be taken into account under Article 101(3) as well as economic ones<sup>64</sup>.

Some of these broader considerations do seem to have had an influence on the application of Article 101(3) during the years when the Commission enjoyed a monopoly over decision-making under that provision<sup>65</sup>. For example industrial policy can be detected

<sup>54</sup> [1999] C 132/1, [1999] 5 CMLR 208. <sup>55</sup> *Ibid*, para 57.

<sup>56</sup> See 'The Commission's approach in the *Article [101(3)] Guidelines*', pp 160–162 below.

<sup>58</sup> On industry under the TFEU see Article 173 (ex Article 157 EC).

<sup>59</sup> On environmental protection under the TFEU see Article 11 (ex Article 6 EC) and Articles 191–193 (ex Articles 174–176 EC).

<sup>60</sup> On employment under the TFEU see Articles 145–159 (ex Articles 125–130 EC).

<sup>61</sup> On economic and social cohesion under the TFEU note Articles 174–178 (ex Articles 158–162 EC).

<sup>62</sup> On culture under the TFEU see Article 167 (ex Article 151 EC); several appellants in the *CISAC* case are relying on Article 167: see Cases T-392/08 etc *AEPI v Commission*, not yet decided.

<sup>63</sup> For powerful argument as to why these broader issues should not be brought within the internal regime of competition law see Odudu *The Boundaries of EC Competition Law: The Scope of Article 81* (Oxford University Press, 2006), ch 7; see also Kjolbye 'The new Commission guidelines on the application of Article 81(3): an economic approach to Article 81' (2004) 25 ECLR 566.

<sup>64</sup> For an interesting review of the issues see the OFT's discussion note 'Article 101(3) – A discussion of narrow versus broad definition of benefits' and the notes of the roundtable discussion held at the OFT on 12 May 2010, available at [www.oft.gov.uk](http://www.oft.gov.uk).

<sup>65</sup> For discussion of the policies under consideration in this section see Monti *EC Competition Law* (Cambridge University Press, 2007), ch 4; Jones and Sufrin *EU Competition Law: Text, Cases, and Materials* (Oxford University Press, 4th ed, 2010), pp 244–247.

in some competition law developments<sup>66</sup>: Amato suggests that the block exemption for specialisation agreements, with its acceptance that rationalisation in production fulfils the Article 101(3) criteria, reflects industrial policy rather than competition thinking<sup>67</sup>. In *Metro v Commission*<sup>68</sup> the Court of Justice considered that employment was a relevant factor under the first condition in Article 101(3), saying that the agreement under consideration was ‘a stabilising factor with regard to the provision of employment which, since it improves the general conditions of production, especially when market conditions are unfavourable, comes within the framework of the objectives to which reference may be had pursuant to Article [101(3)]’. When considering whether an exemption might be given to a joint venture to produce a ‘multi-purpose vehicle’ in Portugal in *Ford/Volkswagen*<sup>69</sup> the Commission ‘took note’ of ‘exceptional circumstances’ in that it would bring a large number of jobs and substantial foreign investment to one of the poorest regions of the EU, promoting harmonious development, reducing regional disparities and furthering European market integration<sup>70</sup>. The Commission emphasised, however, that this would not be enough in itself to make an exemption possible unless the other conditions of Article 101(3) were fulfilled<sup>71</sup>. In its submissions to the General Court when the decision was unsuccessfully challenged by a third party on appeal, the Commission argued that it was possible to take into account factors other than those expressly mentioned in Article 101(3) including, for example, the maintenance of employment<sup>72</sup>. The General Court concluded that, since the Commission would have granted an individual exemption anyway, its decision could not be impugned for having taken into account improper criteria<sup>73</sup>.

In *UEFA*, when granting an individual exemption to the sale of the media rights to the UEFA Champions League, the Commission took note of the financial solidarity that supports the development of European football (citing the Court of Justice’s judgments in *Metro* and *Remia*)<sup>74</sup>. In *Laurent Piau v Commission*<sup>75</sup> the General Court seems to have accepted that rules of FIFA, the body that controls football worldwide, that required football players’ agents to comply with a mandatory licensing system, could contribute to economic progress by raising professional and ethical standards for players’ agents in order to protect football players who have a short playing career<sup>76</sup>. In *Stichting Baksteen*<sup>77</sup> the Commission considered that the restructuring of the Dutch brick industry, involving coordinated closures ‘carried out in acceptable social conditions, including the redeployment of employees’, promoted technical and economic progress<sup>78</sup>. In *CECED*<sup>79</sup> the Commission granted an individual exemption to an agreement between manufacturers

<sup>66</sup> Note however that Article 173 TFEU provides that the Union’s industrial policy is to be conducted ‘in accordance with a system of open and competitive markets’; see further OECD Roundtable on Competition Policy, ‘Industrial Policy and National Champions’ (2009), available at [www.oecd.org/competition](http://www.oecd.org/competition).

<sup>67</sup> Amato *Antitrust and the Bounds of Power* (Hart Publishing, 1997), pp 63–64; the relevant block exemption is now Regulation 1218/2010, OJ [2010] L 335/43.

<sup>79</sup> OJ [2000] L 187/47, [2000] 5 CMLR 635.

of domestic appliances (washing machines etc) which would lead to energy efficiencies, and in doing so noted not only individual economic benefits to consumers from lower energy bills but also the ‘collective environmental benefits’ that would flow from the agreement<sup>80</sup>, referring specifically to the Union’s environmental policy in its decision. The Commission reached a similar conclusion when it informally settled cases relating to ‘environmental’ agreements for water heaters and dishwashers<sup>81</sup>.

It is clear, therefore, that a number of factors appear to have been influential in decisions under Article 101(3), not all of which can be considered to be ‘narrow’ improvements in economic efficiency. There are significant proponents of the view that Article 101(3) does admit broad, non-competition considerations<sup>82</sup>, and the General Court, in *Métropole télévision SA v Commission*<sup>83</sup>, said that ‘in the context of an overall assessment, the Commission is entitled to base itself on considerations *connected with the pursuit of the public interest* in order to grant exemption under Article [101(3)]’ (emphasis added)<sup>84</sup>. It is also worth mentioning in passing that ‘public interest’ criteria may also be relevant when deciding whether Article 101(1) is infringed in the first place, as the Court of Justice’s judgment in *Wouters*<sup>85</sup> has demonstrated: indeed the suppression of non-economic considerations under Article 101(3) might result in their re-emergence under the *Wouters* case law. Public interest issues are also relevant when deciding whether Article 106(2) permits a derogation from the application of Article 101(1)<sup>86</sup>.

### (iii) Comment

This discussion shows that, over a number of years, there has been uncertainty – even confusion – as to the proper application of Article 101(3). As long as the Commission enjoyed a monopoly over decision-making under Regulation 17 this may not have been too serious a problem: the Commission undoubtedly enjoyed a ‘margin of appreciation’ when applying Article 101(3)<sup>87</sup> under Regulation 17 and it would hardly be surprising if, when making decisions in individual cases over the period from 1962 to 2004, it was influenced, at least sometimes, by issues other than ‘pure’ economic efficiency. However Regulation 1/2003 makes it necessary to decide on the true content of Article 101(3) be-

cause decisions since 1 May 2004 can be made by NCAs and national courts as well as by the Commission itself. These institutions, and the undertakings that enter into agreements that might be challenged under Article 101, need to know the limits of what can be justified under Article 101(3); and the NCAs and national courts, unlike the Commission, are not well placed to balance a restriction of competition under Article 101(1) against a variety of European Union policies ranging from industrial and environmental policy to social and cultural issues under Article 101(3). It seems reasonable to suppose that NCAs and national courts would have less difficulty in applying a ‘narrow’ interpretation of Article 101(3), limited to a consideration of economic efficiencies. These considerations suggest that, in the post-Regulation 1/2003 world, Article 101(3) should be interpreted in a narrow rather than a broad manner, according to standards and by reference to principles that are justiciable in courts of law. This is borne out by the Commission’s report of April 2009 on the functioning of Regulation 1/2003 during its first five years<sup>88</sup>, in which it noted that ‘neither the case practice of the Commission and the national enforcers, nor the experience reported by the business and legal community, indicate major difficulties with the direct application of Article [101(3)] which has been widely welcomed by stakeholders’<sup>89</sup>.

#### (iv) The Commission’s approach in the Article [101(3)] Guidelines

It is absolutely clear from the Commission’s *Article [101(3)] Guidelines* that it intends Article 101(3) to be applied according to the narrow approach based on economic efficiency<sup>90</sup>. Paragraph 11 of the *Guidelines* states that Article 101(3) allows ‘pro-competitive benefits’ to be taken into account under Article 101(3), and that these may outweigh any ‘anti-competitive effects’ under Article 101(1). Paragraph 32 of the *Guidelines* again speaks of the ‘positive economic effects’ of agreements that can be taken into consideration under Article 101(3). Paragraph 33 refers to the achievement of ‘pro-competitive effects by way of efficiency gains’, explaining that efficiencies may create additional value by lowering the cost of producing an output, improving the quality of the product or creating a new product. Significantly paragraph 42 of the *Guidelines* explicitly states that ‘[g]oals pursued by other Treaty provisions can be taken into account only to the extent that they can be subsumed under the four conditions of Article 101(3)’. When the *Guidelines*, at paragraphs 48 to 72, reach the point of discussing the first condition of Article 101(3) – an improvement in production or distribution or in technical or economic progress – they do so specifically under the heading of ‘efficiency gains’, thereby removing any lingering doubt that might still remain that the Commission considers that other, non-economic, considerations could be relevant to the assessment. Similarly paragraph 20 of the Commission’s *Guidelines on Horizontal Cooperation Agreements*<sup>91</sup> says that Article 101(3) asks whether any pro-competitive effects of an agreement outweigh its restrictive effects on competition.

It would not be unreasonable to expect that NCAs and national courts will take – and will be happy to take – a strong lead from the *Article [101(3)] Guidelines*, although it is obviously open to undertakings to argue that they do not fully reflect the jurisprudence

<sup>88</sup> Regulation 1/2003, Article 44.

<sup>89</sup> *Report on the functioning of Regulation 1/2003* COM(2009) 206 final, para 12.

<sup>90</sup> It is also noticeable that the recitals to the various block exemptions (as to which see ‘Block Exemptions’, pp 168–172 below) explain the reasons for permitting certain agreements under Article 101(3) purely in terms of economic efficiency; and that the approach taken in the *Guidelines* is consistent with the Commission’s *Guidelines on the assessment of horizontal mergers* OJ [2004] C 31/5, paras 76–90 and its *Guidance on the Commission’s enforcement priorities in applying Article [102 TFEU] to abusive exclusionary conduct by dominant undertakings* OJ [2009] C 45/7, paras 28–31, 46, 62, 74 and 89–90.

<sup>91</sup> OJ [2011] C 11/1.

of the General Court and the Court of Justice. There may be litigation in the future in which those Courts will have to reconsider some of the statements in cases such as *Metro*<sup>92</sup> and *Remia and Nutricia*<sup>93</sup> (both decided when the Commission had a ‘monopoly’ over decision-making under Article 101(3)) and to decide whether to allow a broader approach to Article 101(3) than the *Guidelines* envisage; or whether to adopt the narrower, and more justiciable, approach suggested by the Commission. In *GlaxoSmithKline Services Unlimited v Commission* the General Court’s analysis of whether GSK had satisfied the first condition of Article 101(3) was conducted under the heading ‘Evidence of a gain in efficiency’, suggesting that it was comfortable with a narrow approach to that provision<sup>94</sup>.

Paragraph 51 of the *Article [101(3)] Guidelines* stresses that all efficiency claims must be substantiated in order to verify:

- the *nature* of the claimed efficiencies, so that it is possible for the decision-maker to verify that they are objective in nature<sup>95</sup>
- the *link* between the agreement and the efficiencies which, as a general proposition, should be direct rather than indirect<sup>96</sup>
- the *likelihood* and *magnitude* of each claimed efficiency and
- *how* and *when* each claimed efficiency would be achieved.

The decision-maker must be able to verify the value of the claimed efficiencies in order to be able to balance them against the anti-competitive effects of the agreement<sup>97</sup>. The Commission’s requirement that undertakings must substantiate their claims is an important feature of the *Article [101(3)] Guidelines* and its decisional practice since May 2004. Mere speculation or conjecture will be insufficient: there must be ‘convincing arguments and evidence’<sup>98</sup> that the agreement will lead to the efficiencies claimed, the burden being on the parties seeking to defend it.

The Commission identifies two broad categories of efficiencies in the *Guidelines*, while acknowledging that it is not appropriate to draw clear and firm distinctions between the various categories<sup>99</sup>.

#### (A) *Cost efficiencies*

Paragraphs 64 to 68 consider cost efficiencies which may result, for example, from the development of new production technologies and methods<sup>100</sup>, synergies arising from the integration of existing assets<sup>101</sup>, from economies of scale<sup>102</sup>, economies of scope<sup>103</sup> and from better planning of production<sup>104</sup>.

#### (B) *Qualitative efficiencies*

Paragraphs 69 to 72 consider qualitative efficiencies as opposed to cost reductions: research and development agreements are particularly cited in this respect<sup>105</sup>, as are

<sup>92</sup> Case 26/76 [1977] ECR 1875, [1978] 2 CMLR 1.

<sup>93</sup> Case 42/84 [1985] ECR 2545, [1987] 1 CMLR 1.

<sup>94</sup> Case T-168/01 [2006] ECR II-2969, [2006] 5 CMLR 29, paras 247–308; the General Court’s judgment in relation to Article 101(3) was upheld on appeal to the Court of Justice, Cases C-501/06 P etc *GlaxoSmithKline Services Unlimited v Commission* [2009] ECR I-9291, [2010] 4 CMLR 50, paras 68–168.

<sup>95</sup> *Article [101(3)] Guidelines*, para 52.

<sup>96</sup> *Ibid*, paras 53 and 54.

<sup>97</sup> *Ibid*, paras 55–58.

<sup>98</sup> See Case T-168/01 *GlaxoSmithKline Services Unlimited v Commission* [2006] ECR II-2969, [2006] 5 CMLR 29, para 235, upheld on appeal Cases C-501/06 P etc *GlaxoSmithKline Services Unlimited v Commission* [2009] ECR I-9291, [2010] 4 CMLR 50, para 82.

<sup>99</sup> *Article [101(3)] Guidelines*, para 59.

<sup>100</sup> *Ibid*, para 64.

<sup>101</sup> *Ibid*, para 65.

<sup>102</sup> *Ibid*, para 66.

<sup>103</sup> *Ibid*, para 67.

<sup>104</sup> *Ibid*, para 68.

<sup>105</sup> *Ibid*, para 70.

licensing agreements and agreements for the joint production of new or improved goods or services<sup>106</sup>; there is also a reference to the possibility of distribution agreements delivering qualitative efficiencies<sup>107</sup>.

### **(B) Third condition of Article 101(3): indispensability of the restrictions**

The *Article [101(3)] Guidelines* deal with the indispensability of restrictions before the question of a fair share for consumers, since the latter issue would not arise if the restrictions are not indispensable<sup>108</sup>. Paragraph 73 of the *Guidelines* states that the indispensability condition implies a two-fold test: first, whether the restrictive agreement itself is reasonably necessary in order to achieve the efficiencies; and secondly whether the individual restrictions of competition flowing from the agreement are reasonably necessary for the attainment of the efficiencies. Paragraph 30 of the *Guidelines* explains that the requirement of indispensability in Article 101(3) is conceptually distinct from the ancillary restraints doctrine: Article 101(3) involves a balancing of pro- and anti-competitive effects, which is not the case when determining whether a restraint is ancillary.

#### **(i) The efficiencies must be specific to the agreement**

Paragraphs 75 to 77 consider the first part of the two-fold test: the requirement that the efficiencies are specific to the agreement or, to put the point another way, that there are no other economically practicable and less restrictive means of achieving them<sup>109</sup>. The parties should explain, for example, why they could not have achieved the same efficiencies acting alone<sup>110</sup>.

#### **(ii) The indispensability of individual restrictions**

Paragraphs 78 to 82 consider whether any individual restrictions of competition flowing from the agreement are indispensable. The parties must demonstrate both that the nature of any restriction and that its ‘intensity’ are reasonably necessary to produce the claimed efficiencies<sup>111</sup>. A restriction is indispensable if its absence would eliminate or significantly reduce the efficiencies that follow from the agreement or make it significantly less likely that they will materialise; restrictions of the kind ‘blacklisted’ in any of the block exemptions – for example horizontal price-fixing and market-sharing and the imposition of export bans in vertical agreements – would be unlikely to be considered indispensable<sup>112</sup>. A restriction may be indispensable only for a certain period of time; once that time has expired, it will cease to be so<sup>113</sup>.

### **(C) Second condition of Article 101(3): fair share for consumers**

The undertakings concerned must show that a fair share of the benefit that results from an agreement will accrue to consumers if Article 101(3) is to apply: it is helpful to think

<sup>106</sup> *Ibid*, para 71.

<sup>107</sup> *Ibid*, para 72.

<sup>108</sup> *Ibid*, para 39.

<sup>109</sup> *Ibid*, para 75; note that under para 85 of the Commission’s *Guidelines on the assessment of horizontal mergers* OJ [2004] C 31/5 efficiencies are recognised in the assessment of mergers only where they can be shown to be merger-specific.

<sup>110</sup> *Article [101(3)] Guidelines*, para 76.

<sup>111</sup> *Ibid*, para 78.

<sup>112</sup> *Ibid*, para 79; for ‘blacklisted’ clauses in block exemptions see ch 15, ‘Article 4: hard-core restrictions’, p 602 (specialisation agreements) and ‘Article 5: hard-core restrictions’, pp 597–598 (research and development agreements); ch 16, ‘Article 4: hard-core restrictions’, pp 663–669 (vertical agreements); and ch 19, ‘Article 4: hard-core restrictions’, pp 786–789 (technology transfer agreements).

<sup>113</sup> *Ibid*, para 81.

of this as the ‘pass-on’ requirement. Paragraph 84 of the *Article [101(3)] Guidelines* states that the concept of consumers in Article 101(3) encompasses all direct or indirect users of the products covered by the agreement, including producers that use the products as an input, wholesalers, retailers and final consumers; ‘undertakings’, in the competition law sense of the term<sup>114</sup>, can be consumers for this purpose just as much as a natural person who purchases as a consumer in the lay sense. It is the beneficial nature of the effect on all consumers in the relevant markets that must be taken into consideration under this part of Article 101(3), not the effect on each member of that category of consumers<sup>115</sup>. Negative effects on consumers in one geographic or product market cannot normally be balanced against and compensated by positive effects for consumers in unrelated markets, although this may be possible where markets are related provided that the consumers affected by the restriction and benefiting from the efficiency gains are substantially the same<sup>116</sup>.

If an agreement would leave consumers worse off than they would otherwise have been the pass-on condition of Article 101(3) will not have been satisfied<sup>117</sup>; however consumers do not have to gain from each and every efficiency achieved provided that they receive a fair share of the overall benefits<sup>118</sup>. It could be the case that an agreement, for example to produce a new product more quickly than if the parties had proceeded alone, might also lead to greater market power and therefore higher prices; the Commission does not rule out that early access to the new products might amount to a ‘fair share’ for consumers, notwithstanding the higher prices<sup>119</sup>. In its *MasterCard* decision the Commission said that if an agreement is likely to lead to higher prices, consumers must be compensated through increased quality or other benefits<sup>120</sup>. The greater the restriction of competition under Article 101(1), the greater must be the efficiency and the pass-on under Article 101(3)<sup>121</sup>; and where an agreement has substantial anti-competitive and substantial pro-competitive effects paragraph 92 of the *Guidelines* states that the decision-maker should take into account that competition is an important long-term driver of efficiency and innovation. The *Guidelines* proceed to discuss the pass-on requirement in relation to cost efficiencies and qualitative efficiencies respectively.

### (i) Cost efficiencies

Paragraphs 95 to 101 consider pass-on and the balancing of cost efficiencies. Paragraph 96 notes that cost efficiencies may lead to increased output and lower prices for consumers: in assessing whether this is likely the following factors should be taken into account:

- the characteristics and structure of the market
- the nature and magnitude of the efficiency gains
- the elasticity of demand and
- the magnitude of the restriction of competition.

Paragraph 98 points out that consumers are more likely to benefit from a reduction in the parties’ variable costs than in their fixed costs, since pricing and output

<sup>114</sup> See ch 3, ‘Undertakings and Associations of Undertakings’, pp 83–99.

<sup>115</sup> Case C-238/05 *Asnef-Equifax v Asociación de Usuarios de Servicios Bancarios (Ausbanc)* [2006] ECR I-11125, [2007] 4 CMLR 6, para 70.

<sup>116</sup> *Article [101(3)] Guidelines*, para 43.

<sup>117</sup> *Ibid*, para 85.

<sup>118</sup> *Ibid*, para 86.

<sup>119</sup> *Ibid*, para 89.

<sup>120</sup> Commission decision of 19 December 2007, para 734, on appeal Case T-111/08 *MasterCard v Commission*, not yet decided; see further Repa, Malczewska, Teixeira and Martinez Rivero ‘Commission prohibits MasterCard’s multilateral interchange fees for cross-border card payments in the EEA’ (2008) 1 *Competition Policy Newsletter* 1.

<sup>121</sup> *Article [101(3)] Guidelines*, para 90.

decisions are determined predominantly by variable costs and demand conditions. Paragraph 99 explains that the actual rate of any pass-on to consumers will depend on the extent to which consumers will expand their demand in response to a lowering of price; this will depend, among other things, on the extent to which sellers are able to discriminate in price between different categories of customers. Paragraph 101 cautions that any reduction in costs, and therefore any prospect of lower prices for consumers, must be balanced against the fact that an agreement being considered under Article 101(3) must necessarily involve a restriction of competition under Article 101(1), which in itself is likely to mean that the parties have the ability to raise their prices as a result of their increased market power: these ‘opposing forces’ must be balanced against one another.

### (ii) Qualitative efficiencies

Paragraphs 102 to 104 consider pass-on and the balancing of other types of efficiencies: for example the emergence of a new and improved product might compensate for the fact that an agreement leads to higher prices. Paragraph 103 concedes that this involves a value judgment and that it is difficult to assign precise values to a balancing exercise of this nature. Paragraph 104 acknowledges that new and improved products are an important source of consumer welfare; it continues that, where prices will be higher as a result of the restrictive effect of the agreement on competition, it is necessary to consider whether the claimed efficiencies will create ‘real value’ for consumers that will compensate for this.

## (D) Fourth condition of Article 101(3): no elimination of competition in a substantial part of the market

Paragraph 105 of the *Article [101(3)] Guidelines* states that ultimately the protection of rivalry and the competitive process is given priority over pro-competitive efficiency gains that result from restrictive agreements.

### (i) The relationship between Article 101(3) and Article 102

Paragraph 106 of the *Guidelines* explains that the concept of elimination of competition in a substantial part of the market is an autonomous EU concept specific to Article 101(3). Paragraph 106 then considers the relationship between Article 101(3) and Article 102. It refers to case law that establishes that Article 101(3) cannot prevent the application of Article 102<sup>122</sup> and that Article 101(3) cannot apply to agreements that constitute an abuse of a dominant position<sup>123</sup>. Paragraph 106 goes on to explain, however, that not all restrictive agreements concluded by a dominant undertaking necessarily constitute an abuse of a dominant position. The fact that most block exemptions contain market share caps means that dominant firms will rarely be in a position to rely on them<sup>124</sup>.

<sup>122</sup> See Cases C-395/96 P etc *Compagnie Maritime Belge Transports SA v Commission* [2000] ECR I-1365, [2000] 4 CMLR 1076, para 130.

<sup>123</sup> Case T-51/89 *Tetra Pak Rausing SA v Commission* [1990] ECR II-309, [1991] 4 CMLR 334, para 28, and Cases T-191/98 etc *Atlantic Container Line v Commission* [2003] ECR II-3275, [2005] 4 CMLR 20, para 1456; in *Decca Navigator System* OJ [1989] L 43/27, [1990] 4 CMLR 627, para 122, the Commission refused individual exemption to an agreement that involved an abuse of a dominant position.

<sup>124</sup> See ‘The format of block exemptions’, pp 171–172 below.

**(ii) Determining whether competition will be substantially eliminated**

Paragraphs 107 to 116 explain how to assess whether an agreement will substantially eliminate competition. Paragraph 107 states that it is necessary to evaluate the extent to which competition will be reduced as a result of the agreement: the more that competition is already weakened in the market before the agreement, and the more that the agreement will reduce competition in the market, the more likely it is that the agreement will be considered to eliminate competition substantially. Both actual and potential competition should be taken into account when making the assessment<sup>125</sup>. The degree of actual competition in the market should not be assessed on the basis of market shares alone, but should be based on more extensive qualitative and quantitative analysis<sup>126</sup>. The *Article [101(3)] Guidelines* set out a series of factors that should be taken into account when assessing entry barriers and the possibility of entry into the market on a significant scale, including, for example, the cost of entry including sunk costs, the minimum efficient scale within the industry and the competitive strengths of potential entrants<sup>127</sup>.

**(E) Judicial review by the General Court<sup>128</sup>**

The Commission's decisions on the application of Article 101(3) are subject to judicial review by the General Court and (on a point of law) by the Court of Justice. In *Consten and Grundig v Commission*<sup>129</sup> the Court of Justice indicated that it would not adopt an interventionist stance on applications for review; Article 101(3) involves complex evaluations of economic issues, and the Court of Justice considered that this task is essentially one for the Commission: the Court would confine itself to examining the relevant facts and the legal consequences deduced therefrom; it would not substitute its decision for the Commission's. The EU Courts have maintained this approach, emphasising the extent of the margin of appreciation available to the Commission when applying Article 101(3) and (by implication) their unwillingness to interfere with the exercise of this appreciation<sup>130</sup>. However it is essential that the Commission's decision should be adequately reasoned<sup>131</sup>, and where there is a defect in this respect the Courts will be prepared to annul the decision in question<sup>132</sup>. Similarly the General Court will annul a Commission decision where it has seriously misapprehended the facts of a particular case<sup>133</sup>. The General Court summed up the position in *GlaxoSmithKline Services Unlimited v Commission*<sup>134</sup> as follows:

241 ...the Court dealing with an application for annulment of a decision applying Article 101(3) EC carries out, in so far as it is faced with complex economic assessments, a review confined, as regards the merits, to verifying whether the facts have been accurately stated, whether there has been any manifest error of appraisal and whether the legal consequences deduced from those facts were accurate.

242 It is for the Court to establish not only whether the evidence relied on is factually accurate, reliable and consistent, but also whether it contains all the information which

<sup>125</sup> *Article [101(3)] Guidelines*, paras 108 and 114.

<sup>126</sup> *Ibid*, para 109.

<sup>127</sup> *Ibid*, para 115.

<sup>128</sup> See generally Bailey 'Scope of Judicial Review under Article 81 EC' (2004) 41 CMLRev 1327.

<sup>129</sup> Cases 56/64 and 58/64 [1966] ECR 299, [1966] CMLR 418.

<sup>130</sup> See eg Case 26/76 *Metro SB-Grossmärkte v Commission* [1977] ECR 1875, [1978] 2 CMLR 1, paras 45 and 50; Case T-79/93 *Langnese-Iglo GmbH v Commission* [1995] ECR II-1533, [1995] 5 CMLR 602, para 178.

<sup>131</sup> Article 296 TFEU provides that decisions by the Commission shall state the reasons on which they are based.

<sup>132</sup> See eg Case C-360/92 P *Publishers' Association v Commission* [1995] ECR I-23, [1995] 5 CMLR 33.

<sup>133</sup> Cases T-79/95 R etc *SNCF and BRB v Commission* [1996] ECR II-1491, [1997] 4 CMLR 334.

<sup>134</sup> Case T-168/01 [2006] ECR II-2969, [2006] 5 CMLR 29.

must be taken into account for the purpose of assessing a complex situation and whether it is capable of substantiating the conclusions drawn from it.

243 On the other hand, it is not for the Court to substitute its own economic assessment for that of the institution which adopted the decision the legality of which it is requested to review.

In the *Glaxo* case the General Court annulled the Commission's decision that GSK's standard conditions of sale, which were intended to prevent parallel trade from the low-priced Spanish pharmaceutical market to the higher-priced UK one, did not satisfy the criteria of Article 101(3): GSK argued that the restriction of trade was necessary to promote investment into research and development in the sector. The General Court held that the Commission had failed to carry out a proper examination of the factual arguments and evidence put forward by GSK or to refute its arguments<sup>135</sup>. On appeal the Court of Justice held that the General Court had stated the position accurately and dismissed the Commission's argument that it had misapplied the case law on the burden and standard of proof in an Article 101(3) case<sup>136</sup>.

Despite their recognition of the margin of appreciation enjoyed by the Commission, the Courts have intervened on some occasions, as in the *Glaxo* case just discussed. Other cases in which the Commission's findings under Article 101(3) have been overturned include the Court of Justice's judgment in *Publishers' Association v Commission*<sup>137</sup> and the judgments of the General Court in *Métropole télévision SA v Commission*<sup>138</sup>, *European Night Services v Commission*<sup>139</sup>, and *Métropole télévision SA (M6) v Commission*<sup>140</sup>.

### 3. Regulation 1/2003

#### (A) The Commission's former monopoly over the grant of individual exemptions

Under Regulation 17 of 1962 the Commission had sole power (subject to review by the General Court and the Court of Justice) to grant individual exemptions to agreements on the basis of the criteria in Article 101(3)<sup>141</sup>. This monopoly over the grant of individual exemptions meant that the Commission had the opportunity to develop its policy towards various types of agreement over a period of time, and in some cases to give expression to this policy in its block exemption regulations. However the monopoly had many drawbacks: the Commission never had sufficient staff to deal with the enormous volume of agreements that were notified to it: the result was that severe delays were experienced; considerable business time was spent collecting the data and preparing the so-called 'Form A/B' on which notifications had to be submitted; substantial expense was incurred, not least on legal and other professional fees; and businesses faced a long period of uncertainty as to the lawfulness of their agreements. The Commission was overburdened with notifications, many of which concerned agreements that had no seriously anti-competitive effect, with the consequence

<sup>135</sup> Ibid, paras 247–308.

<sup>136</sup> Cases C-501/06 P etc *GlaxoSmithKline Services Unlimited v Commission* [2009] ECR I-9291, [2010] 4 CMLR 50, paras 78–88.

<sup>137</sup> Case C-360/92 P [1995] ECR I-23, [1995] 5 CMLR 33.

<sup>138</sup> Cases T-528/93 etc [1996] ECR II-649, [1996] 5 CMLR 386.

<sup>139</sup> Cases T-374/94 etc [1998] ECR II-3141, [1998] 5 CMLR 718 at paras 205–221.

<sup>140</sup> Cases T-185/00 etc [2002] ECR II-3805, [2003] 4 CMLR 707.

<sup>141</sup> Regulation 17, Article 9(1).

that it was distracted from other tasks, such as the pursuit of cartels and abusive behaviour, which are of much greater significance for the public interest: as recital 3 of Regulation 1/2003 says, ‘the system of notification . . . prevents the Commission from concentrating its resources on curbing the most serious infringements. It also imposes considerable costs on undertakings.’ The problems associated with the process of notification for individual exemption were ameliorated to some extent, for example by the adoption of block exemption regulations and by the informal settlement of some cases. However the ‘problem’ of the monopoly over the grant of individual exemptions was a real one, and this led the Commission, in the White Paper of 1999, to propose abolition of the process of notification altogether; this policy was carried into effect by Regulation 1/2003.

## (B) The end of the system of notification for individual exemption

Regulation 1/2003 ended the system of notification for individual exemption with effect from 1 May 2004. Previous editions of this book explained in detail how the system of individual exemptions operated<sup>142</sup>.

## (C) Self-assessment

The fact that undertakings and their lawyers can no longer notify agreements to the Commission and await an administrative ‘stamp of approval’ certifying that the criteria of Article 101(3) are satisfied means that they must now be self-reliant and conduct their own ‘self-assessment’ of the application of that provision. This caused some consternation in the business and legal communities at the time that Regulation 1/2003 was being debated. However, since Regulation 1/2003 entered into effect, there has been nothing to suggest that the direct applicability of Article 101(3) is causing difficulties in practice: it would appear to be the case that lawyers and their business clients are able to deal with self-assessment. This was the conclusion reached by the Commission in its *Report on the functioning of Regulation 1/2003*<sup>143</sup>. A helpful Report, *Practical methods to assess efficiency gains in the context of Article [101(3) of the TFEU]*<sup>144</sup>, provides a structured framework on how to conduct a self-assessment of efficiency claims under Article 101(3); and DG COMP’s *Best Practices for the Submission of Economic Evidence and Data Collection in Cases Concerning the Application of Articles 101 and 102 TFEU and in Merger Cases* set out best practices concerning the generation as well as the presentation of relevant economic and empirical evidence that may be taken into account in the assessment of competition cases.

Of course there may be cases in which there is genuine uncertainty whether an agreement infringes Article 101(1) and/or satisfies Article 101(3). Regulation 1/2003 provides three ways in which cases might be resolved following Commission intervention: the acceptance of legally-binding commitments under Article 9; a finding of inapplicability under Article 10; and the provision of informal guidance. Each of these possibilities is discussed in chapter 7<sup>145</sup>. The provisions on findings of inapplicability and informal guidance in certain cases of uncertainty, have

<sup>142</sup> See the fourth edition, ch 4, pp 136–141; see also Bellamy and Child *European Community Law of Competition* (Sweet & Maxwell, 6th ed, 2008, eds Roth and Rose), paras 13-004–13-016.

<sup>143</sup> COM(2009) 206 final, para 12; see further the accompanying Staff Working Paper, SEC(2009) 574 final, para 11; both documents are available at [www.ec.europa.eu](http://www.ec.europa.eu).

<sup>144</sup> Available at [www.ec.europa.eu/enterprise/library/lib-competition/doc/efficiency\\_guidance.pdf](http://www.ec.europa.eu/enterprise/library/lib-competition/doc/efficiency_guidance.pdf); note that this Report was commissioned by DG Enterprise and Industry rather than DG COMP.

<sup>145</sup> See ch 7, ‘Article 9: commitments’, pp 255–262; in the UK the OFT has issued an Opinion in relation to the distribution of newspapers and magazines, and it has also introduced a practice of providing ‘short-form Opinions’: see ch 10, ‘Opinions’, p 404.

yet to be used<sup>146</sup>. However there have been Article 9 decisions in cases concerning the possible application of Article 101. A notable example is *British Airways, American Airlines and Iberia*<sup>147</sup> where the Commission accepted commitments, in particular to make landing and take-off slots available at Heathrow, Gatwick and JFK-New York airports, in order to facilitate entry and/or expansion by competitors on various aviation routes from and to the US.

Article 9 decisions lead to the Commission closing the case, without any finding that Article 101 (or Article 102) has been infringed, and as such are conceptually different from individual exemption decisions of the kind that used to be adopted under Regulation 17: under that Regulation the Commission would find that Article 101(1) was inapplicable because Article 101(3) was satisfied. Nevertheless there is a certain resemblance between an Article 9 decision, where the parties formally commit to change their behaviour and could be punished if they were to deviate from that commitment, and an individual exemption under the old system granted subject to conditions and obligations. Another important Article 9 commitment decisions was *Visa Europe*<sup>148</sup>.

#### (D) Notification and individual exemptions under domestic law

Regulation 1/2003 does not *require* Member States to abolish systems of notification for exemption under *domestic* law; however it would seem in principle to be undesirable to maintain a domestic system of notification following the reforms at EU level. The provisions in the UK Competition Act 1998 on notification and individual exemption were repealed by the Competition Act 1998 and Other Enactments (Amendment) Regulations 2004<sup>149</sup>; and paragraph 36 of the Staff Working Paper accompanying the Commission's *Report on the functioning of Regulation 1/2003*<sup>150</sup> stated that more than 20 Member States now operate without a system of notification.

## 4. Block Exemptions<sup>151</sup>

### (A) Role of block exemptions

Article 101(3) foreshadowed the advent of block exemptions by providing that the prohibition in Article 101(1) could be declared inapplicable both in relation to agreements and to *categories* of agreements; in other words the Treaty itself envisaged the generic authorisation of agreements as well as pursuant to individual assessment. Most block exemptions are adopted by the Commission, acting under powers conferred upon it by regulations of the Council<sup>152</sup>.

<sup>146</sup> On findings of inapplicability and informal guidance see ch 7, 'Article 10: finding of inapplicability' and 'Informal guidance', p 261; in the UK the OFT has issued an Opinion in relation to the distribution of newspapers and magazines, and it has also introduced a practice of providing 'short-form Opinions': see ch 10, 'Opinions and Informal Advice', pp 403–404.

<sup>147</sup> Commission decision of 14 July 2010.

<sup>148</sup> See ch 7, 'Article 9: commitments', pp 255–261.

<sup>149</sup> SI 2004/1261; see ch 10, 'Opinions and Informal Advice', pp 403–404.

<sup>150</sup> See ch 4 n 143 above.

<sup>151</sup> The terms 'bloc' and 'group' exemptions are also used: the expression 'block exemption' is used here as it is the most common one, and the one normally used by the Commission.

<sup>152</sup> See '*Vires* and block exemptions currently in force', pp 169–171 below. There have been two exceptions to this, where the Council itself granted the block exemption: the block exemption for certain agreements in the road and inland waterway sectors was originally provided by Article 4 of Council Regulation 1017/68, OJ [1968] L 175/1, and is now to be found in Article 3 of Council Regulation 169/2009; and block exemption

Agreements within the terms of a block exemption have never needed, and do not need to be, notified to the Commission: they are valid without specific authorisation. The block exemptions therefore provide desirable legal certainty for firms and their professional advisers. In practice there is much to be said for drafting, for example, a vertical agreement or a transfer of technology licence so that it satisfies the terms of the relevant block exemption as this provides a 'safe harbour' for it; if an agreement satisfies a block exemption, there may be little point in determining whether it infringes Article 101(1) in the first place<sup>153</sup>. In the days of notification for individual exemption the block exemptions were also important from the Commission's point of view since, without them, there would have been hundreds, if not thousands, of notifications for individual exemption<sup>154</sup>.

As paragraph 2 of the Commission's *Article [101(3)] Guidelines* points out, the system of block exemptions remains in effect, notwithstanding the abolition of individual exemptions as a result of Regulation 1/2003. Paragraph 2 of the *Guidelines* also points out that an agreement that is covered by a block exemption cannot be declared invalid by a national court. Article 29 of that Regulation provides the Commission and NCAs, in certain circumstances, with a power to withdraw the benefit of a block exemption in an individual case<sup>155</sup>. However paragraph 31 of the *Guidelines* explains that a national court cannot withdraw the benefit of a block exemption.

## (B) Vires and block exemptions currently in force

The Commission requires authority from the Council to issue block exemptions<sup>156</sup>. The Council has published a number of empowering Regulations; these are listed below, along with the Commission Regulations currently in force (if any) under each Council Regulation.

### (i) Council Regulation 19/65

Regulation 19/65<sup>157</sup>, as amended by Regulation 1215/99<sup>158</sup>, authorises the Commission to grant block exemption to vertical agreements and to bilateral licences of intellectual property rights. The following Commission Regulations are in force under Council Regulation 19/65:

- Regulation 772/2004 on technology transfer agreements<sup>159</sup>; Regulation 772/2004 is discussed in chapter 19<sup>160</sup>
- Regulation 330/2010 on vertical agreements<sup>161</sup>; Regulation 330/2010 is discussed in chapter 16<sup>162</sup>

for various agreements in the containerised shipping segment of the maritime transport sector was granted by Articles 3 to 6 of Council Regulation 4056/86, OJ [1986] L 378/1: this block exemption was repealed with effect from October 2008 by Regulation 1419/2006, OJ [2006] L 269/1.

<sup>153</sup> See Case C-260/07 *Pedro IV Servicios SL v Total España SA* [2009] ECR I-2247, [2009] 5 CMLR 1291, para 36.

<sup>154</sup> Indeed the adoption of block exemptions was a device used by the Commission to overcome the flood of notifications that it received pursuant to the notification provisions of Regulation 17 of 1962: for discussion see Goyder and Albers *Goyder's EC Competition Law* (Oxford University Press, 5th ed, 2009), pp 59–60.

<sup>155</sup> See 'The format of block exemptions', pp 171–172 below.

<sup>156</sup> The Council has power to confer such *vires* by virtue of Article 103(2)(b) TFEU.

<sup>157</sup> JO [1965] p 533, OJ [1965–66] p 35. <sup>158</sup> OJ [1999] L 148/1.

<sup>159</sup> OJ [2004] L 123/11; this Regulation replaced Regulation 240/96, OJ [1996] L 31/2.

<sup>160</sup> See ch 19, 'Transfer Technology Agreements: Regulation 772/2004', pp 781–791.

<sup>161</sup> OJ [2010] L 102/1; this Regulation replaced Regulation 2790/99, OJ [1999] L 336/21.

<sup>162</sup> See ch 16, 'Vertical Agreements: Regulation 330/2010', pp 649–672.

- Regulation 461/2010<sup>163</sup> on vertical agreements in the motor vehicle sector; Regulation 461/2010 is discussed in chapter 16<sup>164</sup>.

(ii) **Council Regulation 2821/71**

Regulation 2821/71<sup>165</sup> authorises the Commission to grant block exemption in respect of standardisation agreements, research and development agreements and specialisation agreements. The following Commission Regulations are in force under Council Regulation 2821/71:

- Regulation 1217/2010<sup>166</sup> on research and development agreements; Regulation 1217/2010 is discussed in chapter 15<sup>167</sup>
- Regulation 1218/2010<sup>168</sup> on specialisation agreements; Regulation 1218/2010 is discussed in chapter 15<sup>169</sup>.

(iii) **Council Regulation 1534/91**

Regulation 1534/91<sup>170</sup> authorises the Commission to grant block exemption in the insurance sector. In March 2010 the Commission adopted Regulation 267/2010<sup>171</sup>, replacing Regulation 358/2003<sup>172</sup>, under the powers conferred upon it by Regulation 1534/91. Regulation 267/2010 is discussed in chapter 15<sup>173</sup>.

(iv) **Council Regulation 169/2009**

Council Regulation 169/2009<sup>174</sup> itself provides block exemption for certain agreements between small and medium-sized undertakings in the road and inland waterway sectors<sup>175</sup>. There are no Commission Regulations granting block exemption under Regulation 169/2009.

(v) **Council Regulation 246/2009**

Council Regulation 246/2009<sup>176</sup> authorises the Commission to provide block exemption to consortia between liner shipping companies. In September 2009 the Commission adopted Regulation 906/2009<sup>177</sup>, under the powers conferred upon it by Regulation 246/2009.

(vi) **Council Regulation 487/2009**

Regulation 487/2009<sup>178</sup> authorises the Commission to grant block exemptions for certain agreements in the air transport sector. There are no Commission Regulations currently in force under Regulation 487/2009<sup>179</sup>.

<sup>163</sup> OJ [2010] L 129/52; Regulation 461/2010 replaced Regulation 1400/2002, OJ [2002] L 203/30.

<sup>164</sup> See ch 16, 'Regulation 461/2010 on Motor Vehicle Distribution', pp 674–676.

<sup>165</sup> JO [1971] L 285/46, OJ [1971] p 1032.

<sup>166</sup> OJ [2010] L 335/36; this Regulation replaced Regulation 2659/2000, OJ [2000] L 304/7.

<sup>179</sup> See ch 23, 'Air transport', pp 974–977.

### (C) The format of block exemptions

The typical format of block exemptions is that they begin with a series of recitals which explain the policy of the Commission in adopting the regulation in question; these recitals may themselves be of legal significance, as they may be referred to for the purpose of construing the substantive provisions of the regulation itself where there are problems of interpretation. Each regulation will then confer block exemption upon a particular category of agreements: for example Article 2 of Regulation 330/2010 block exempts vertical agreements, as defined in Article 1(1)(a) thereof. The older block exemptions were very specific as to the clauses that could benefit from block exemption: only those set out in the so-called ‘white list’ would do so. This was considered by many critics to be too prescriptive and formalistic, and the current block exemptions do not contain white lists. They do, however, contain black lists (as did all earlier regulations), setting out provisions that must not be included if an agreement is to enjoy block exemption.

Most block exemptions have market share thresholds. For example Article 3 of Regulation 330/2010 provides that an agreement will not qualify for block exemption where the supplier’s or the buyer’s market share exceeds 30 per cent; however where the parties’ market shares exceed this threshold, an agreement may still be able to satisfy the conditions of Article 101(3) when assessed individually. Article 4 of the Regulation for research and development agreements has one of 25 per cent and Article 3 of the Regulation for specialisation agreements one of 20 per cent. Article 3 of the Regulation for technology transfer agreements has a 20 per cent cap for agreements between competitors and a 30 per cent cap for those between non-competitors.

Article 29(1) of Regulation 1/2003 confers power on the Commission to withdraw the benefit of a block exemption where it finds, in a particular case, that an agreement covered by a block exemption regulation has certain effects that are incompatible with Article 101(3). Block exemption has been withdrawn from an agreement on only one occasion, in *Langnese-Iglo GmbH v Commission*<sup>180</sup>; the Commission’s decision to do so was upheld on appeal by the General Court<sup>181</sup>.

Article 29(2) of Regulation 1/2003 gives to each NCA a power to withdraw the benefit of a block exemption from agreements which have effects incompatible with the conditions of Article 101(3) within its territory or a part thereof, where that territory has all the characteristics of a distinct geographical market. Paragraph 36 of the *Article [101(3)] Guidelines* explains that in such a situation the Member State must demonstrate both that the agreement infringes Article 101(1) and that it does not fulfil the conditions of Article 101(3). Withdrawal of the benefit of a block exemption applies only from the date of the decision.

Article 6 of Regulation 330/2010 gives power to the Commission, by regulation, to withdraw the benefit of the block exemption from an entire sector, where parallel networks of similar vertical restraints cover more than 50 per cent of a relevant market; Article 7 of Regulation 772/2004 contains a similar provision. These provisions have yet to be used.

### (D) Expiry of block exemptions

Each block exemption regulation contains an expiry date. For example, Regulation 330/2010 will expire on 31 May 2022. This means that a vertical agreement that will endure

<sup>180</sup> OJ [1993] L 183/19, [1994] 4 CMLR 51.

<sup>181</sup> Case T-793 [1995] ECR II-1533, [1995] 5 CMLR 602.

beyond that date cannot be said, with certainty, to be exempt from 1 June 2022 onwards. Clearly this may present the parties with difficulty. The Commission is well aware of the need for legal certainty and so, if it subsequently adopts a new regulation, it will normally include transitional provisions for agreements already in force. Obviously it is necessary to examine the provisions of each particular regulation to find out what the position is on transition. It is also possible that, even if an agreement does not satisfy the terms of a new block exemption that replaces an old one, the agreement may either fall outside Article 101(1) or satisfy Article 101(3) on an individual basis.

Typically the Commission reviews and consults on the functioning of a block exemption regulation which is about to expire. When so doing the Commission goes back to ‘first principles’ and will ask whether a block exemption is necessary and, if it is, on what terms it should be renewed. There is no presumption in favour of renewing a block exemption. The Commission will consider possible alternatives to renewal, including the publication of guidelines; the provision of informal guidance<sup>182</sup>; and/or the adoption of Commission decisions pursuant to Article 9 or Article 10 of Regulation 1/2003<sup>183</sup>. The Commission decided not to renew the block exemptions for certain agreements in the insurance, maritime and motor vehicle sectors in the light of changed market conditions, considering that it would be more appropriate that they be subject to ‘self-assessment’. At the same time the Commission has published sector-specific guidance on certain agreements in each of these sectors<sup>184</sup>. The block exemptions on vertical agreements and horizontal cooperation agreements were found to have worked well in practice and should be retained; however they were both updated to take account of recent market developments, such as, in the case of the block exemption for vertical agreements, the evolution of sales via the Internet<sup>185</sup>.

<sup>182</sup> See ch 7, ‘Informal guidance’, pp 261–262.

<sup>183</sup> See ch 7, ‘Article 9: commitments’, pp 255–261.

## Article 102<sup>1</sup>

1. Introduction	173	7. Small Firms and Narrow Markets	190
2. The Commission's Guidance on Article 102 Enforcement Priorities	174	8. Abuse	192
3. Undertakings	177	9. Defences	210
4. The Effect on Inter-State Trade	178	10. The Consequences of Infringing Article 102	214
5. Dominant Position	179		
6. A Substantial Part of the Internal Market	189		

### 1. Introduction

Article 102 TFEU is an important companion of Article 101. Whereas Article 101 is concerned with agreements, decisions and concerted practices which are harmful to competition, Article 102 is directed towards the unilateral conduct of dominant firms which act in an abusive manner. Article 102 provides as follows:

Any abuse by one or more undertakings of a dominant position within the internal market or in a substantial part of it shall be prohibited as incompatible with the internal market in so far as it may affect trade between Member States. Such abuse may, in particular, consist in:

- (a) directly or indirectly imposing unfair purchase or selling prices or unfair trading conditions;
- (b) limiting production, markets or technical development to the prejudice of consumers;

<sup>1</sup> For further reading on Article 102 readers are referred to O'Donoghue and Padilla *The Law and Economics of Article 82* (Hart Publishing, 2006); *European Competition Law Annual: What is an Abuse of a Dominant Position?* (Hart Publishing, 2006, eds Ehlermann and Atanasiu); Faull and Nikpay *The EC Law of Competition* (Oxford University Press, 2nd ed, 2007), ch 4; Bellamy and Child *European Community Law of Competition* (Oxford University Press, 6th ed, 2008, eds Roth and Rose), ch 10; *Article 82 EC: Reflections on Its Recent Evolution* (Hart Publishing, 2009, ed Ezrachi); Rousseva *Rethinking Exclusionary Abuses in EU Competition Law* (Hart Publishing, 2010); Nazzini *The Foundations of European Union Competition Law: Objectives and Principles of Article 102* (Oxford University Press, 2011); Niels, Jenkins and Kavanagh *Economics for Competition Lawyers* (Oxford University Press, 2011), ch 4; see also *Dominance: the regulation of dominant firm conduct in 35 jurisdictions worldwide* (Global Competition Review, 2011, eds Janssens and Wessely).

- (c) applying dissimilar conditions to equivalent transactions with other trading parties, thereby placing them at a competitive disadvantage;
- (d) making the conclusion of contracts subject to acceptance by the other parties of supplementary obligations which, by their nature or according to commercial usage, have no connection with the subject of such contracts.

The purpose of this chapter is to describe the main features of Article 102. Section 2 introduces the Commission's *Guidance on the Commission's enforcement priorities in applying Article [102 TFEU] to abusive exclusionary conduct by dominant undertakings* ('the *Guidance on Article 102 Enforcement Priorities*' or 'the *Guidance*')<sup>2</sup>, an important document that will be referred to at several points in the text that follows and in later chapters of this book. Section 3 briefly discusses the meaning of undertaking and section 4 examines the requirement of an effect on trade between Member States: concepts that have already been discussed in the context of Article 101. Section 5 considers what is meant by a dominant position under Article 102. Section 6 looks at the requirement that any dominant position should be held in a substantial part of the internal market. Section 7 makes the point that quite small firms might find themselves the subject of an Article 102 investigation; not least because of the possibility that relevant markets might be narrowly defined. Section 8 looks at the central – and most complex – issue in this chapter, the meaning of abuse: more detailed analysis of individual abusive practices will be found in later chapters of this book, in particular chapters 17, 18 and 19, which examine, first, non-pricing abuses, then pricing abuses, and finally abuses that can arise in relation to the exercise, or sometimes the non-exercise, of intellectual property rights. Section 9 considers defences to allegations of abuse, and section 10 briefly considers the consequences of infringing Article 102.

## 2. The Commission's *Guidance on Article 102 Enforcement Priorities*

### (A) Introduction

Many of the most controversial competition law decisions of the Commission have been taken under Article 102, the most notable being the finding in 2004 of two abuses on the part of Microsoft, a refusal to supply interoperability information to competitors and the tying of a media player with its operating software, for which Microsoft was fined €497.2 million<sup>3</sup>. Another controversial decision involved the imposition by the Commission in 2009 of a fine of €1.06 billion on Intel for various exclusionary practices including the offering of loyalty rebates to customers who purchased all or most of their microprocessor chips from that undertaking; this decision is currently on appeal to the General Court<sup>4</sup>.

<sup>2</sup> OJ [2009] C 45/7.

<sup>3</sup> *Microsoft* Commission decision of 24 March 2004, upheld on appeal Case T-201/04 *Microsoft Corpn v Commission* [2007] ECR II-3601, [2007] 5 CMLR 846; the *Microsoft* decision is discussed at various places in this book: see in particular ch 17, '*Microsoft*', pp 693–694 on the tying abuse and ch 19, '*The Microsoft case*', pp 800–802 on the refusal to provide interoperability information; for further reading on the *Microsoft* case see Beckner and Gustafson *Trial and Error: United States v. Microsoft* (Citizens for a Sound Economy Foundation, 2nd ed, 2002); McKenzie *Trust on Trial: How the Microsoft case is reframing the rules of competition* (Perseus Publishing, 2000); *Microsoft on Trial: Legal and Economic Analysis of a Transatlantic Antitrust Case* (Edward Elgar Publishing, 2010, ed Luca Rubini).

<sup>4</sup> *Intel* Commission decision of 13 May 2009, on appeal Case T-286/09 *Intel v Commission*, not yet decided; the decision is discussed in ch 18, '*The Intel case*', pp 732.

A frequent complaint against the Commission has been that it tends, when applying Article 102 in cases such as *Microsoft* and *Intel*, not to concern itself with the maintenance of the competitive process but, instead, with the protection of competitors, a quite different matter. To put the point another way, in any competition, whether economic, sporting or of some other kind, the most efficient or the fittest person will win: this is an inevitable part of the competitive process. This would suggest that, if a firm ends up as a monopolist simply by virtue of its superior efficiency, this should be applauded, or at the very least not be condemned. A more specific criticism of the Commission (and of the EU Courts) has been that they adopt a formalistic (as opposed to an economics-based) approach to the application of Article 102 and that as a consequence business practices of dominant firms have been condemned that did not have, or could not have, any harmful effect on consumer welfare; and which, indeed, may have been pro-competitive. Clearly it would be a strange paradox if it were to transpire that the application of competition law resulted in the condemnation of competitive behaviour that benefits consumers.

### (B) DG COMP's Discussion Paper on exclusionary abuses

Aware of these concerns, in 2004 the Commission launched a review of the law and practice of Article 102 as it applied to exclusionary (as opposed to exploitative) abuses (this distinction is discussed later in this chapter<sup>5</sup>), leading to the publication, in December 2005, of a *Discussion Paper on the application of Article [102] of the Treaty to exclusionary abuses*<sup>6</sup>. This was a working paper produced by the staff of DG COMP: it was **not** an official document of the Commission itself, nor was it a set of draft guidelines on the application of Article 102, although many commentators erroneously treated it as such. The *Discussion Paper* led to feverish debate as to the proper application of Article 102, in which a broad spectrum of views was expressed, ranging from a staunch defence of the status quo, on the one hand, to demands, on the other, for a radical reorientation of the law of Article 102 that would leave dominant firms substantially freer from the risk of surveillance by competition authorities and hostile litigation in domestic courts. Between these extremes there was a fair degree of consensus that Article 102 ought not to be applied simply to protect competitors as such; that a dominant firm that is able to defeat its rivals as a result of its greater efficiency ought not to be condemned as acting abusively; that the economics of abuse are sufficiently complex that this is not an area in which formalistic, or 'per se', rules are appropriate; and that (to put the point another way) behaviour should be condemned as abusively exclusionary under Article 102 only where it could be demonstrated that the conduct in question has had, or was likely to have, a seriously anti-competitive effect on the market.

However, even if there was some consensus in favour of a 'more economic approach' or an 'effects-based approach' to the application of Article 102 to exclusionary abuses, this still left the Commission with a formidable problem of how to 'operationalise' such a consensus: how could the principle of an effects-based approach to Article 102 be converted into administrable rules, capable of being applied by competition authorities, courts, lawyers and economists and their business clients? The task was not made easier by the fact that it was clear that there were disagreements as to the best way forward at several levels: within the Commission; between Member States and different competition authorities; at the private bar; and among undertakings, some of which considered themselves to be the victims of outrageously abusive behaviour, on the one hand, and others of which believed that they were the subject of outrageous accusations of abuse,

<sup>5</sup> See 'Exploitative, exclusionary and single market abuses', pp 201–202 below.

<sup>6</sup> Available at [www.ec.europa.eu/competition/antitrust/art82/index.html](http://www.ec.europa.eu/competition/antitrust/art82/index.html).

on the other. A further difficulty lay in the fact that, even if the Commission were to consider that the law of Article 102 needed to change, this was not within its prerogative: the EU Courts determine what is and what is not an abuse of a dominant position, and the Commission cannot contradict established jurisprudence (although it can hope to shape its future development, a quite different matter).

### (C) Adoption of the Commission's Guidance on Article 102 Enforcement Priorities

The outcome of this process was that, in February 2009, the Commission published its *Guidance on Article 102 Enforcement Priorities*. It is important to understand that this document is **not** a set of guidelines on the law of Article 102; the document is what it says it is: guidance on the Commission's enforcement priorities. The *Guidance* does not purport to state the law of exclusionary abuse under Article 102: for that, interested stakeholders must consult the jurisprudence of the EU Courts. Some commentators consider that this gives rise to legal uncertainty, the Commission apparently taking a more lenient (less interventionist) approach to the application of Article 102 to exclusionary abuses than the case law: an example of this is the Court of Justice's judgment in *Konkurrensverket v TeliaSonera Sverige AB*<sup>7</sup>, where its interpretation of the abuse of margin squeeze is clearly stricter than the Commission's approach in paragraph 80 of the *Guidance*<sup>8</sup>. It has even been suggested that this dissonance between the jurisprudence of the EU Courts and the *Guidance on Article 102 Enforcement Priorities* is so serious that the Commission should withdraw it<sup>9</sup>; a less extreme view is that the Commission's *Guidance* fails to establish priorities, and may leave undertakings more confused about the law in this area than they were before<sup>10</sup>.

To the authors of this book these criticisms are unconvincing. To repeat: the *Guidance* is not a set of guidelines that slavishly describe the existing law. Rather it explains why the Commission, with its finite resources, would have a greater interest in prosecuting some cases than others; in particular it explains that it is the likelihood that particular conduct could cause seriously anti-competitive foreclosure effects on markets, thereby, ultimately, causing harm to consumers, that legitimates intervention by the Commission<sup>11</sup>.

<sup>7</sup> Case C-52/09 [2011] ECR I-000, [2011] 4 CMLR 982.

<sup>8</sup> For discussion see ch 18, 'The Commission's decisional practice', p 757.

<sup>9</sup> See Gormsen 'Why the European Commission's enforcement priorities on Article 82 EC should be withdrawn' (2010) 31(2) ECLR 45.

<sup>10</sup> See Akman 'The European Commission's Guidance on Article 102 TFEU: From *Inferno* to *Paradiso*?' (2010) 73(4) *Modern Law Review* 605; for further commentary on the debate leading to the *Guidance* and the *Guidance* itself see *European Competition Law Annual 2007: A Reformed Approach to Article 82 EC* (Hart Publishing, 2008, eds Ehlermann and Marquis); Ezrachi 'The European Commission Guidance on Article 82 EC – The Way in Which Institutional Realities Limit the Potential for Reform' [2009] *Oxford Legal Research Paper Series* (No 27/2009), available at [www.ssrn.com](http://www.ssrn.com); Petit 'From Formalism to Effects? – The Commission's Communication on Enforcement Priorities in Applying Article 82 EC' (2009) 32 *World Competition* 485; Kellerbauer 'The Commission's New Enforcement Priorities in Applying Article 82 EC to Dominant Companies' Exclusionary Conduct: A Shift Towards a More Economic Approach?' (2010) 31(5) *ECLR* 175 (the author is a member of the Commission's Legal Service); Geradin 'Is the Guidance Paper on the Commission's Enforcement Priorities in Applying Article 102 TFEU to Abusive Exclusionary Conduct Useful?', available at [www.ssrn.com](http://www.ssrn.com); *European Competition Law: The Impact of the Commission's Guidance on Article 102* (Edward Elgar, 2011, ed Pace).

<sup>11</sup> An interesting question is what the legal position would be if the Commission were to refuse to consider a complaint about conduct that clearly infringes Article 102 according to the jurisprudence of the EU Courts on the basis that it does not comply with the *Guidance on Article 102 Enforcement Priorities*: see Wils 'Discretion and Prioritisation in Public Antitrust Enforcement' (2011) 34(3) *World Competition* 353.

The *Guidance* does not ‘rewrite’ the law of Article 102; it does not and cannot bind the EU Courts, nor the domestic courts of the Member States. On the other hand it is not unreasonable to suppose that competition authorities and courts, faced with competing arguments as to the proper scope of Article 102, will, at the least, be aware of the Commission’s approach to certain business behaviour – for example pricing below cost, refusals to supply, the offering of discounts and rebates – and that, over a period of time, the *Guidance* will have an influence on the future orientation of Article 102 in its application to exclusionary behaviour. In his Opinion in *TeliaSonera*<sup>12</sup> Advocate General Mazák said that the *Guidance* could not bind the Court, but that it did provide a ‘useful point of reference’<sup>13</sup>. The relationship of the *Guidance* to the existing law, and its potential for influencing future enforcement of the law, will be discussed throughout this book<sup>14</sup>.

Whatever the merits of the criticism that has surrounded Article 102 over the years, it is undoubtedly the case that a dominant firm (or one that fears that it might be characterised as dominant) must behave on the market with great caution. A transgression of Article 102 may have serious consequences. Not only can the Commission (or a national competition authority) impose a very large fine, as occurred in *Microsoft* and *Intel*; an injured third party may also bring an action for an injunction and/or damages in a national court<sup>15</sup>. Furthermore the Commission has explicit power to impose structural remedies, albeit subject to limitations, as a result of Article 7 of Regulation 1/2003; it has yet to impose such a remedy in an infringement decision, although several cases have been closed as a result of undertakings offering structural commitments under Article 9 of Regulation 1/2003<sup>16</sup>.

### 3. Undertakings

The term ‘undertaking’ has the same meaning in Article 102 as in Article 101, and reference should be made to the relevant section of chapter 3<sup>17</sup>. It may be worth pointing out in passing that several of the cases on the meaning of an undertaking have arisen in the context of Article 102, for example where complaints were made to the Commission about the monopsonistic power of the Spanish Health Service<sup>18</sup> or the standard-setting power of Eurocontrol<sup>19</sup>: it was held that neither of those entities was acting as an undertaking, with the consequence that the competition rules did not apply to them.

<sup>12</sup> See ch 5 n 7 above.

<sup>13</sup> In Case T-201/11 *Si.mobil v Commission*, not yet decided, an applicant to the General Court is complaining that the Commission failed to apply its *Guidance* when rejecting a complaint of abuse of dominance contrary to Article 102.

<sup>14</sup> See in particular ‘Recent case law and decisions do require effects analysis’, pp 200–201 below and chs 17 and 18 generally.

<sup>15</sup> It was reported in the media that out-of-court settlements were reached between Microsoft and various of the complainants against it for the payment of damages: a report in the *Financial Times* of October 2005 suggested that Microsoft had paid a total of \$3.73 billion; it was similarly reported that Intel had agreed to pay damages to AMD, the complainant in that case, amounting to \$ 1.25 billion: see *Financial Times*, 13 November 2009.

<sup>16</sup> See ch 7, ‘Article 9: commitments’, pp 255–261.

<sup>17</sup> See ch 3, ‘Undertakings and Associations of Undertakings’, pp 83–91.

<sup>18</sup> Case T-319/99 *FENIN v Commission* [2003] ECR II-357, [2003] 5 CMLR 34, upheld on appeal to the Court of Justice Case C-205/03 P *FENIN v Commission* [2006] ECR I-6295, [2006] 5 CMLR 559.

<sup>19</sup> Case T-155/04 *SELEX Sistemi Integrati v Commission* [2006] ECR II-4797, [2007] 4 CMLR 372, upheld on appeal to the Court of Justice Case C-113/07 P *SELEX Sistemi Integrati v Commission* [2009] ECR I-2207, [2009] 4 CMLR 1083.

The issue of the application of the competition rules to public undertakings or to undertakings entrusted with exclusive or special rights will be discussed in chapter 6<sup>20</sup>; a few particular points about Article 102 and the public sector should, however, be noted here. First, the fact that an undertaking has a monopoly conferred upon it by statute does not, in itself, remove it from the ambit of Article 102<sup>21</sup>. Secondly, Member States have a duty under Article 4(3) TEU not to do anything ‘which could jeopardise the attainment of the Union’s objectives’, one of which is expressed in Protocol 27 to the Treaties to be the institution of a system ensuring that competition is not distorted<sup>22</sup>. This means that a Member State cannot confer immunity on undertakings from Article 102, except to the limited extent provided for in Article 106(2)<sup>23</sup>. Thirdly, the provisions in Article 106(2) permitting derogation from the competition rules to the extent that their application would ‘obstruct the performance, in law or in fact, of the particular tasks assigned to them’ have consistently been interpreted narrowly by both the Commission and the EU Courts<sup>24</sup>. Lastly, it is important in this context to bear in mind Article 37 TFEU, the function of which is to prevent Member States from discriminating in favour of their own state monopolies of a commercial character. This provides the Commission with a useful alternative weapon for dealing with some monopolies in the public sector<sup>25</sup>.

#### 4. The Effect on Inter-State Trade

The meaning of this phrase was analysed in chapter 3, to which reference should be made<sup>26</sup>. For the purpose of Article 102 particular attention should be paid to the Court of Justice’s judgment in *Commercial Solvents v Commission*<sup>27</sup> in which it held that the requirement of an effect on trade between Member States would be satisfied where conduct brought about an alteration in the structure of competition in the common market<sup>28</sup>. This test, which has been applied by both the EU Courts and the Commission on subsequent occasions<sup>29</sup>, is of particular importance in Article 102 cases: Article 102 can be applied only where

<sup>20</sup> See ch 6, ‘Article 106 TFEU – compliance with the Treaties’, pp 222–244.

<sup>21</sup> Case 311/84 *Centre Belge d’Etudes de Marché Télémarketing v CLT* [1985] ECR 3261, [1986] 2 CMLR 558, para 16; see also Case 26/75 *General Motors v Commission* [1975] ECR 1367, [1976] 1 CMLR 95; Case 41/83 *Italy v Commission* [1985] ECR 873, [1985] 2 CMLR 368; Case 226/84 *British Leyland v Commission* [1986] ECR 3263, [1987] 1 CMLR 185; Case C-41/90 *Höfner v Macrotron* [1991] ECR I-1979, [1993] 4 CMLR 306, para 28; Case C-18/93 *Corsica Ferries* [1994] ECR I-1783, para 43; Case C-242/95 *GT-Link v De Danske Statsbaner (DSB)* [1997] ECR I-4349, [1997] 5 CMLR 601, para 35; see also the Commission’s decision in *French-West African Shipowners’ Committees* OJ [1992] L 134/1, [1993] 5 CMLR 446, para 64.

<sup>22</sup> See eg Case C-260/89 *Elliniki Radiophonia Tiléorassi-Anonimi Etairia (ERT) v Dimotiki Etairia Pliroforissis (DEP)* [1991] ECR I-2925, [1994] 4 CMLR 540, para 27; note also that, under Article 119(1) TFEU, Member States (and the EU) are required to observe the principle of an ‘open market economy with free competition’.

<sup>23</sup> Case 13/77 *INNO v ATAB* [1977] ECR 2115, [1978] 1 CMLR 283; see ch 6, ‘Article 4(3) TEU – duty of sincere cooperation’, pp 216–222.

<sup>24</sup> See ch 6, ‘Article 106(2)’, pp 235–242.

<sup>25</sup> See ch 6, ‘Article 37 TFEU – state monopolies of a commercial character’, pp 245–246.

<sup>26</sup> See ch 3, ‘The Effect on Trade between Member States’, pp 144–149.

<sup>27</sup> Cases 6/73 and 7/73 [1974] ECR 223, [1974] 1 CMLR 309, para 33; see also Cases T-24/93 etc *Compagnie Maritime Belge v Commission* [1996] ECR II-1201, [1997] 4 CMLR 273, para 203.

<sup>28</sup> The Commission refers to the ‘competitive structure’ test at para 20 of its *Guidelines on the effect on trade concept contained in Articles [101] and [102] of the Treaty* OJ [2004] C 101/81.

<sup>29</sup> See eg Case 27/76 *United Brands v Commission* [1978] ECR 207, [1978] 1 CMLR 429; *Tetra Pak I (BTG Licence)* OJ [1988] L 272/27, [1988] 4 CMLR 881, para 48; *Napier Brown – British Sugar* OJ [1988] L 284/41, [1990] 4 CMLR 196, paras 77–80; *London European – Sabena* OJ [1988] L 317/47, [1989] 4 CMLR 662, para 33.

there is already a dominant position – that is to say substantial market power – and it is unsurprising that the Commission will be concerned with the structure of the market in such cases. In the *Soda-ash* decisions under Article 102<sup>30</sup> the Commission held that rebates offered by ICI and Solvay in their respective markets had the effect of reinforcing the structural rigidity of the EU market as a whole and its division along national lines. What is of interest about these decisions is that it was US exporters who were excluded from the EU market, but the Commission still held that there was an effect on inter-state trade: imports would have helped to undermine the dominant positions of ICI and Solvay in their respective markets.

The Commission's *Guidelines on the effect on trade concept contained in Articles [101] and [102] of the Treaty*<sup>31</sup> contain paragraphs that give specific consideration to the circumstances in which abusive behaviour – for example exploitative abuses that harm downstream trading partners and exclusionary abuses that harm competitors – might have an effect on trade between Member States<sup>32</sup>.

Under Regulation 1/2003<sup>33</sup> national courts and national competition authorities have an obligation to apply Article 102 where an abuse of a dominant position has an effect on trade between Member States<sup>34</sup>. This, however, does not preclude them from adopting or applying on their own territories stricter national laws which prohibit or sanction unilateral conduct engaged in by undertakings<sup>35</sup>; and the obligation is without prejudice to the application of provisions of national law that predominantly pursue an objective different from those pursued by Articles 101 and 102<sup>36</sup>.

## 5. Dominant Position

Article 102 applies only where one undertaking has a 'dominant position' or where two or more undertakings are 'collectively dominant'<sup>37</sup>. The Court of Justice in *United Brands v Commission*<sup>38</sup> laid down the following test of what is meant by a dominant position:

65 The dominant position thus referred to by Article [102] relates to a position of economic strength enjoyed by an undertaking which enables it to prevent effective competition being maintained on the relevant market by affording it the power to behave to

<sup>30</sup> *Soda-ash/Solvay* OJ [1991] L 152/21 and *Soda-ash/ICI* OJ [1991] L 152/1; these decisions were annulled on procedural grounds by the General Court: Cases T-30/91 etc *Solvay SA v Commission* [1995] ECR II-1775, [1996] 5 CMLR 57; the Commission's appeal to the Court of Justice failed, Cases C-286/95 P etc [2000] ECR I-2341, [2000] 5 CMLR 413 and 454; the Commission readopted the decisions in December 2000: OJ [2003] L 10/1, which were substantially upheld in Case T-57/01 *Solvay SA v Commission* [2009] ECR II-4621, [2011] 4 CMLR 9, and Case T-66/01 *Imperial Chemical Industries Ltd v Commission* [2010] ECR II-000, [2011] 4 CMLR 162, the second *Solvay* judgment is now on appeal to the Court of Justice, Case C-109/10 P *Solvay SA v Commission*, not yet decided.

<sup>31</sup> OJ [2004] C 101/81.

<sup>32</sup> *Ibid*, paras 73–76 (dealing with abuses covering several Member States); paras 93–96 (abuses covering a single Member State); paras 97–99 (abuses covering part only of a Member State); and paras 106–109 (abuses involving undertakings located in third countries).

<sup>33</sup> OJ [2003] L 1/1.

<sup>34</sup> Regulation 1/2003, Article 3(1); see ch 2, 'Obligation to apply Articles 101 and 102', pp 76–77.

<sup>35</sup> Regulation 1/2003, Article 3(2).

<sup>36</sup> *Ibid*, Article 3(3).

<sup>37</sup> The issue of whether any dominance is *collective* is discussed in ch 14 of this book, which considers in general terms the issues of oligopoly and tacit coordination between independent undertakings.

<sup>38</sup> Case 27/76 [1978] ECR 207, [1978] 1 CMLR 429; it has used the same formulation on several other occasions, eg in Case 85/76 *Hoffmann-La Roche v Commission* [1979] ECR 461, [1979] 3 CMLR 211, para 38.

an appreciable extent independently of its competitors, customers and ultimately of its consumers<sup>39</sup>.

The expression ‘dominant position’ will not be found in textbooks on economics; economists would ask whether a firm or firms have substantial market power. Paragraph 65 of the Court’s judgment in *United Brands* can be understood to equate dominance with substantial market power; the Commission does so in paragraph 10 of its *Guidance on Article 102 Enforcement Priorities* where it says that the notion of independence referred to by the Court is related to the degree of competitive constraint exerted on the undertaking under investigation. Where competitive constraints are ineffective, the undertaking in question enjoys ‘substantial market power over a period of time’; in paragraph 11 of the *Guidance* the Commission considers that an undertaking has substantial market power if it is ‘capable of profitably increasing prices above the competitive level for a significant period of time’<sup>40</sup>. The same definition of dominance is used in the ICN’s *Unilateral Conduct Workbook*<sup>41</sup>.

An important point to bear in mind about Article 102 is that, as a matter of economics, there are degrees of market power: at one end of the spectrum would be a firm with no or only imperceptible market power; at the other end a firm which is a true monopolist. Between these two extremes could be found firms with ‘some’, or ‘appreciable’, or ‘significant’, or ‘substantial’ market power. However the legal expression ‘dominant position’ is a binary term: either an undertaking is dominant and therefore subject to Article 102 and the ‘special responsibility’ that this entails; or it is not, in which case its unilateral behaviour is not subject to competition law scrutiny at all. This is why a finding of dominance is so important; and why some commentators would like there to be a fairly generous ‘safe harbour’ for market shares below a certain percentage<sup>42</sup>.

A finding of dominance – whether individual or collective – involves a two-stage assessment. The first is to determine the relevant market: market definition has been discussed in detail in chapter 1, in particular the ‘hypothetical monopolist’ or ‘SSNIP’ test; the problem of the ‘Cellophane Fallacy’ in Article 102 cases which might lead to the inclusion of false substitutes in the market definition; and the types of evidence that may be of assistance when defining relevant product, geographical and temporal markets<sup>43</sup>.

Having defined the market, it is necessary in an Article 102 case to determine what is meant by a dominant position. This cannot be determined purely by reference to an

<sup>39</sup> This definition does not adequately reflect (what is undoubtedly true) that Article 102 also applies to market power on the buying as well as the selling side of the market, since that was not in issue in *United Brands*; a powerful purchaser may be able to behave independently of its sellers who are not ‘customers’ in the normal sense of that word; for action taken against undertakings with buyer power see *Re Eurofima* [1973] CMLR D217; *Re GEMA* OJ [1971] L 134/15, [1971] CMLR D35; Case 298/83 *CICCE v Commission* [1985] ECR 1105, [1986] 1 CMLR 486; *UK Small Mines Commission’s XXIst Report on Competition Policy* (1991), point 107; *Virgin/British Airways* OJ [2000] L 30/1, [2000] 4 CMLR 999, upheld on appeal to the General Court, Case T-219/99 *British Airways plc v Commission* [2003] ECR II-5917, [2004] 4 CMLR 1008: the Court stated specifically at para 101 of its judgment that Article 102 can apply to undertakings with a dominant position on either side of the market; see also ch 1, ‘Procurement markets’, p 38.

<sup>40</sup> The Commission goes on in this paragraph to explain that ‘increase in prices’ is a short-hand term which includes other ways of influencing competition to the advantage of the dominant undertaking, for example by decreasing output, innovation, variety or quality of goods or services; on the same point see ch 1, ‘Market Definition and Market Power’, pp 25–48.

<sup>41</sup> Chapter 3 of the *Workbook* on the ‘assessment of dominance’ is available on the ICN website at [www.internationalcompetitionnetwork.org](http://www.internationalcompetitionnetwork.org).

<sup>42</sup> See ‘Findings of dominance below the 50 per cent threshold’, p 183 below.

<sup>43</sup> See further ch 1, ‘Market definition’ and following sections, pp 27–42.

undertaking's market share. Rather it is necessary to examine three issues, as set out in paragraph 12 of the *Guidance*:

- constraints imposed by the existing supplies from, and the position on the market of, *actual competitors* (the market position of the dominant undertaking and its competitors)
- constraints imposed by the credible threat of future expansion by actual competitors or entry by *potential competitors* (expansion and entry)
- constraints imposed by the bargaining strength of the undertaking's customers (*countervailing buyer power*) (emphasis added).

Each of these three criteria has already been discussed in chapter 1<sup>44</sup>. Some additional commentary will be provided here based on the judgments of the EU Courts and the decisional practice of the Commission in Article 102 cases. In paragraph 11 of its *Guidance* the Commission, citing case law of the EU Courts such as *United Brands*, points out that a finding of a dominant position derives from a combination of several factors which, taken separately, are not necessarily determinative.

### (A) Actual competitors

True monopoly is rare, except where conferred by the state. The majority of cases are therefore concerned with the problem of deciding at what point an undertaking, though not a true monopolist, has sufficient power over the market to fall within the ambit of Article 102.

#### (i) Statutory monopolies

Various cases have concerned undertakings with a statutory monopoly in the provision of goods or services<sup>45</sup>. The Court of Justice has rejected the argument that, because a monopoly is conferred by statute, this immunises the undertaking from Article 102<sup>46</sup>; where an undertaking has a statutory monopoly it must comply with Article 102, its only special privilege being that conferred by Article 106(2)<sup>47</sup>. A different point is that the fact that an undertaking has a dominant position as a result of rights derived from national legislation does not in itself mean that it has exclusive rights in the sense of Article 106<sup>48</sup>.

#### (ii) The relevance of market shares

In cases where there is no statutory monopoly, market shares provide valuable information about the structure of the market and of the relative importance of the undertakings active on it; however, as the Commission says in paragraph 13 of its *Guidance on Article 102 Enforcement Priorities*, market shares are only a 'useful first indication', and an assessment of market power requires that market conditions generally should be taken into account, including the dynamics of the market, the extent to which products are differentiated and the trend or development of market shares over time.

As far as Article 102 is concerned, it is obvious that the larger the market share, the more likely a finding of dominance. A market share of 100 per cent is rare in the absence

<sup>44</sup> See ch 1, 'Market power', pp 42–45.

<sup>45</sup> See eg Case T-229/94 *Deutsche Bahn AG v Commission* [1997] ECR II-1689, [1998] 4 CMLR 220, para 57.

<sup>46</sup> See the cases cited at ch 5 n 21 above.

<sup>47</sup> See ch 6, 'Article 106(2)', pp 235–241.

<sup>48</sup> See ch 6, 'Exclusive rights', pp 224–225.

of statutory privileges, although not unheard of<sup>49</sup>. However some firms have been found to have very large market shares. For example in *Tetra Pak 1 (BTG Licence)*<sup>50</sup> Tetra Pak's market share in the market for machines capable of filling cartons by an aseptic process was 91.8 per cent; and in *BPB Industries plc*<sup>51</sup> BPB was found to have a market share in plasterboard of 96 per cent, although the Commission had excluded wet plastering from the market definition. In the *Microsoft* decision<sup>52</sup> the Commission concluded that Microsoft had over 90 per cent of the market for personal computer operating software systems and at least 60 per cent of the market for work group server operating systems<sup>53</sup>.

### (A) *The Court of Justice's judgment in Hoffmann-La Roche v Commission*

In *Hoffmann-La Roche v Commission*<sup>54</sup> the Court of Justice said:

41... Furthermore although the importance of the market shares may vary from one market to another the view may legitimately be taken that very large shares are in themselves, and save in exceptional circumstances, evidence of the existence of a dominant position. An undertaking which has a very large market share and holds it for some time... is by virtue of that share in a position of strength...

### (B) *The AKZO presumption of dominance where an undertaking has a market share of 50 per cent or more*

In *AKZO v Commission*<sup>55</sup> the Court of Justice referred to the passage from *Hoffmann-La Roche* quoted above and continued that a market share of 50 per cent could be considered to be very large so that, in the absence of exceptional circumstances pointing the other way, an undertaking with such a market share will be presumed dominant; that undertaking will bear the evidential burden of establishing that it is not dominant. The General Court applied this test in *Hilti AG v Commission*<sup>56</sup>. Clearly this is a very significant rule, which means that firms are at risk of being found to be dominant where they fall considerably short of being monopolists in the strict sense of that term. Some critics of Article 102, who believe that it is applied in too intrusive a manner, would like to see the 50 per cent threshold in *AKZO* raised: perhaps to 75 per cent; the binary effect of Article 102, whereby conduct that is legal when practised by a non-dominant firm becomes illegal when the firm is dominant, would be less pronounced if the presumption of dominance was set at a higher market share threshold. However the EU Courts have shown no inclination to discard or revise the *AKZO* presumption; recent judgments of the General Court such as *France*

<sup>49</sup> In *GVL* OJ [1981] L 370/49, [1982] 1 CMLR 221 that body had a 100 per cent market share in the market in Germany for the management of performing artists' rights of secondary exploitation; see also *Amministrazione Autonoma dei Monopoli di Stato ('AAMS')* OJ [1998] L 252/47, [1998] 5 CMLR 786, para 31, where the Commission found AAMS held a *de facto* monopoly of the Italian market for the wholesale distribution of cigarettes, upheld on appeal to the General Court Case T-139/98 *AAMS v Commission* [2001] ECR II-3413, [2002] 4 CMLR 302, para 52.

<sup>50</sup> OJ [1988] L 272/27, [1988] 4 CMLR 881, para 44, upheld on appeal to the General Court Case T-51/89 *Tetra Pak Rausing SA v Commission* [1990] ECR II-539, [1991] 4 CMLR 334.

<sup>51</sup> OJ [1989] L 10/50, [1990] 4 CMLR 464, upheld on appeal to the General Court Case T-65/89 *BPB Industries Plc and British Gypsum Ltd v Commission* [1993] ECR II-389, [1993] 5 CMLR 33 and to the Court of Justice Case C-310/93 P *BPB Industries Plc and British Gypsum Ltd v Commission* [1995] ECR I-865, [1997] 4 CMLR 238.

<sup>52</sup> *Microsoft* Commission decision of 24 March 2004.

<sup>53</sup> *Ibid*, paras 430–435 and 473–499.

<sup>54</sup> Case 85/76 [1979] ECR 461, [1979] 3 CMLR 211; the Commission specifically referred to this paragraph in *Van den Bergh Foods Ltd* OJ [1998] L 246/1, [1998] 5 CMLR 530, para 258.

<sup>55</sup> Case C-62/86 [1991] ECR I-3359, [1993] 5 CMLR 215, para 60.

<sup>56</sup> Case T-30/89 [1991] ECR II-1439, [1992] 4 CMLR 16, para 92; see similarly Cases T-191/98 etc *Atlantic Container Line v Commission* [2003] ECR II-3275, [2005] 4 CMLR 1283, para 907.

*Télécom v Commission*<sup>57</sup>, *Solvay SA v Commission*<sup>58</sup> and *AstraZeneca AB v Commission*<sup>59</sup> have continued to stress that high market shares can in themselves be indicative of dominance and to cite the *AKZO* presumption of dominance; indeed in *AstraZeneca* the Court went so far as to say that the Commission could not disregard the importance to be attached to AZ's very large market share throughout the relevant period of alleged abuse<sup>60</sup>.

Interestingly the Commission does not refer to the *AKZO* presumption in its *Guidance on Article 102 Enforcement Priorities*, perhaps suggesting that it is not keen on a legal presumption that attaches such weight to a market share figure. Instead it notes at paragraph 15 that the higher the market share, and the longer the period of time over which it is held, the more likely it is that it constitutes an important preliminary indication of the existence of a dominant position; however the Commission concludes the paragraph by saying that it would come to a final conclusion on dominance only after examining all the relevant factors that may be relevant to constraining the behaviour of the undertaking under investigation.

### (C) Findings of dominance below the 50 per cent threshold

The Court of Justice held in *United Brands* that that firm, with a market share in the range of 40 per cent to 45 per cent, was dominant. In that case other factors were considered to be significant: the market share alone would not have been sufficient to sustain a finding of dominance; however the case shows that a firm supplying less than 50 per cent of the market may be held to have a dominant position. In *United Brands* the Court said that, even though there was lively competition on the market at certain periods of the year, *United Brands* could still be held to be dominant for the purposes of Article 102; the Commission notes this point in paragraph 10 of its *Guidance*.

The decision in *Virgin/British Airways*<sup>61</sup> marked the first (and only) occasion on which an undertaking with a market share of less than 40 per cent has been found by the Commission to be in a dominant position under Article 102. BA was held to be dominant in the UK market for the procurement of air travel agency services with a market share of 39.7 per cent. When the Commission's decision was challenged before the General Court the Court agreed that BA was dominant, noting that its market share was considerably larger than its rivals, and that this was reinforced by the world rank held by BA in terms of international scheduled passenger-kilometres flown, the extent of the range of its transport services and its hub network; the General Court also considered that BA was an obligatory business partner for travel agents<sup>62</sup>. The General Court stated specifically that the fact that BA's market share was in decline could not, in itself, constitute proof that it was not dominant<sup>63</sup>.

Some commentators would like there to be a 'safe harbour' below which a firm could not be found to be dominant. However the case law of the EU Courts does not provide one, and the Commission is not in a position to create one in the absence of jurisprudence enabling it to do so. In paragraph 14 of its *Guidance on Article 102 Enforcement Priorities* the Commission says that dominance is 'not likely' if the undertaking's market share is below 40 per cent; however it goes on to say that there could be some cases below that figure that may deserve its attention. Clearly this falls short of a safe harbour.

<sup>57</sup> Case T-340/03 [2007] ECR II-107, [2007] 4 CMLR 919, paras 99–101.

<sup>58</sup> Case T-57/01 [2009] ECR II-4621, [2011] 4 CMLR 9, paras 275–305.

<sup>59</sup> Case T-321/05 [2010] ECR II-000, [2010] 5 CMLR 1585, paras 242–254.

<sup>60</sup> *Ibid*, para 245.

<sup>61</sup> OJ [2000] L 30/1.

<sup>62</sup> Case T-219/99 *British Airways plc v Commission* [2003] ECR II-5917, [2004] 4 CMLR 1008, paras 189–225, upheld on appeal to the Court of Justice Case C-95/04 P *British Airways plc v Commission* [2007] ECR I-2331, [2007] 4 CMLR 982.

<sup>63</sup> *Ibid*, para 224.

## (B) Potential competitors

As was stressed in chapter 1 and earlier in this chapter, market shares do not in themselves determine whether a firm has a dominant position; in particular they cannot indicate the competitive pressure exerted by firms not yet operating on the market but with the capacity to enter it in a timely manner. Paragraphs 16 and 17 of the Commission's *Guidance on Article 102 Enforcement Priorities* explain the importance of the impact of expansion by existing competitors and entry by potential ones to any assessment of dominance. In particular paragraph 17 provides examples of various barriers, such as legal barriers; economic advantages enjoyed by the dominant undertaking; costs and network effects that impede customers from switching from one supplier to another; and the dominant firm's own conduct.

### (i) Legal barriers

The ownership of patents, trade marks and other intellectual property rights may constitute barriers to entry, depending on their strength and duration<sup>64</sup>, although they do not, in themselves, confer dominance. In *Tetra Pak 1 (BTG Licence)*<sup>65</sup> the acquisition by Tetra Pak of a company that had the benefit of an exclusive patent and know-how licence was regarded as a factor indicating dominance, as it made entry to the market more difficult for other firms that would be unable to gain access to the licensed technology. In *Hugin v Commission*<sup>66</sup> the Court of Justice seems to have accepted that Hugin was dominant in the market for spare parts for its cash registers because other firms could not produce spares for fear of being sued by Hugin in the UK under the Design Copyright Act 1968. Other obvious legal barriers to entry are Government licensing requirements and planning regulations, governmental control of frequencies for the transmission of radio signals<sup>67</sup>, statutory monopoly power<sup>68</sup> and tariffs and non-tariff barriers.

### (ii) Economic advantages

Various economic advantages have been considered to be barriers to entry or expansion:

- the Court of Justice considered economies of scale to be a relevant factor in *United Brands v Commission*<sup>69</sup>, and the Commission referred to this matter specifically in *BPB Industries plc*<sup>70</sup>; economies of scope would no doubt be treated in the same way<sup>71</sup>
- the control of an essential facility could confer an economic advantage on an incumbent undertaking<sup>72</sup>, as could preferential access to natural resources, innovation or R&D

<sup>64</sup> See eg *Eurofix-Bauco v Hilti* OJ [1988] L 65/19, [1989] 4 CMLR 677, para 66; *Magill TV Guide/ITP, BBC and RTE* OJ [1989] L 78/43, [1989] 4 CMLR 757, para 22 (copyright protection of TV listings relevant to finding of dominance), upheld on appeal to the General Court Cases T-69/89 etc *RTE v Commission* [1991] ECR II-485, [1991] 4 CMLR 586, and further on appeal to the Court of Justice Cases C-241 and C-242/91 P [1995] ECR I-743, [1995] 4 CMLR 718.

<sup>65</sup> OJ [1988] L 272/27, [1988] 4 CMLR 881, para 44, upheld on appeal Case T-51/89 *Tetra Pak Rausing SA v Commission* [1990] ECR II-309, [1991] 4 CMLR 334.

<sup>66</sup> Case 22/78 [1979] ECR 1869, [1979] 3 CMLR 345.

<sup>67</sup> *Decca Navigator System* OJ [1989] L 43/27, [1990] 4 CMLR 627.

<sup>68</sup> Case 311/84 *Centre Belge d'Etudes de Marché Télémarketing v CLT* [1985] ECR 3261, [1986] 2 CMLR 558; see Marenco 'Legal Monopolies in the case law of the Court of Justice of the European Communities' [1991] Fordham Corp L Inst (ed Hawk), pp 197–222.

<sup>69</sup> Case 27/76 [1978] ECR 207, [1978] 1 CMLR 429.

<sup>70</sup> See ch 5 n 65 above, para 116.

<sup>71</sup> Economies of scale and scope are discussed in ch 1, 'Economies of scale and scope and natural monopolies', pp 10–11.

<sup>72</sup> On essential facilities see ch 17, 'Is the product to which access is sought indispensable to someone wishing to compete in the downstream market?', pp 701–707.

- the Court of Justice has considered an undertaking's superior technology to be an indicator of dominance in several cases, including *United Brands v Commission*<sup>73</sup>, *Hoffmann-La Roche v Commission*<sup>74</sup> and *Michelin v Commission*<sup>75</sup>
- in *Continental Can*<sup>76</sup> the Commission regarded that firm's access to the international capital market as significant, and this factor was stressed in *United Brands v Commission*<sup>77</sup>
- in *United Brands v Commission*<sup>78</sup> the Court of Justice described the extent to which UBC's activities were integrated – it owned banana plantations and transport boats and it marketed its bananas itself – and said that this provided that firm with commercial stability which was a significant advantage over its competitors
- in *Hoffmann-La Roche v Commission*<sup>79</sup> the Court of Justice pointed to Roche's highly developed sales network as a relevant factor conferring upon it commercial advantages over its rivals. The Commission has treated both vertical integration and the benefit of well-established distribution systems as a barrier to entry in several other decisions<sup>80</sup>, since this could impede access for a would-be entrant to the market
- in *United Brands v Commission*<sup>81</sup> the Court of Justice considered that United Brand's advertising campaigns and brand image were significant factors indicating dominance: it had spent considerable resources establishing the Chiquita brand name which was well protected by trade marks. In its second *Michelin* decision the Commission relied upon the 'indisputable' quality and reputation of the Michelin tyre brand in its finding of dominance<sup>82</sup>. The Commission has often noted (in cases under the EU Merger Regulation ('the EUMR')) that advertising expenditure could make entry difficult into the market for fast-moving consumer goods such as soft drinks<sup>83</sup>, sanitary protection<sup>84</sup>, and toilet tissue<sup>85</sup>.

### (iii) Costs and network effects

Network effects may be a barrier to expansion or entry<sup>86</sup>. This was a relevant consideration in *Microsoft*<sup>87</sup>: the Commission said that the ubiquity of Microsoft in the personal computer operating systems market meant that nearly all commercial applications software was written first and foremost to be compatible with the Microsoft platform. This gave

<sup>73</sup> Case 27/76 [1978] ECR 207, [1978] 1 CMLR 429, paras 82–84.

<sup>86</sup> On network effects see ch 1, 'Network effects and two-sided markets', pp 11–12.

<sup>87</sup> Commission decision of 24 March 2004.

rise to a self-reinforcing dynamic: the more users there were of the Microsoft platform, the more software was written for it, and vice versa<sup>88</sup>.

#### (iv) Conduct

The Court of Justice in *United Brands v Commission*<sup>89</sup> agreed with the idea that the conduct of an alleged dominant firm could be taken into account in deciding whether it is dominant. This means, for example, that it might be legitimate to take into account the fact that a firm has offered discriminatory rebates to certain customers in deciding whether it is dominant: the rebates may themselves prevent competitors entering the market and so constitute a barrier to entry. In *Michelin v Commission*<sup>90</sup> the Commission had relied on Michelin's price discrimination as an indicator of dominance. Michelin argued before the Court of Justice that this approach was circular: the Commission was saying that because it had offered discriminatory prices, it was dominant, and because it was dominant its discriminatory prices were an abuse. The Court of Justice did not explicitly deal with this issue in its judgment, but in affirming the Commission's decision there is at least tacit approval of considering conduct as a factor indicating dominance.

Despite criticism of the circularity of this approach, the Commission has continued to regard conduct as a relevant factor indicating dominance: for example in *Eurofix-Bauco v Hilti*<sup>91</sup> it regarded that firm's behaviour as 'witness to its ability to act independently of, and without due regard to, either competitors or customers...'<sup>92</sup>; in *AKZO* it found that that undertaking's ability to weaken or eliminate troublesome competitors was an indicator of dominance<sup>93</sup>; and in *Michelin II* it considered that Michelin's conduct was strong evidence that a dominant position existed<sup>94</sup>. There is increasing recognition that there are types of behaviour that may deter entry<sup>95</sup>, and it would be wrong to discount such conduct from the consideration of whether an undertaking is dominant.

#### (v) Evidence of managers

In *BBI/Boosey and Hawkes: Interim Measures*<sup>96</sup> the Commission regarded internal documents of Boosey and Hawkes, in which it had described its instruments as 'automatically first choice' of all the top brass bands, as significant in its finding that Boosey and Hawkes was dominant. In *Prokent-Tomra*<sup>97</sup> the Commission referred to several documents found during its inspection of Tomra's premises containing statements such as that Tomra's overall goal was to 'maintain market dominance and market share'<sup>98</sup>. Statements of this

<sup>88</sup> Ibid, paras 448–459.

<sup>89</sup> Case 27/76 [1978] ECR 207, [1978] 1 CMLR 429, paras 67–68.

<sup>90</sup> Case 322/81 [1983] ECR 3461, [1985] 1 CMLR 282.

<sup>91</sup> OJ [1988] L 65/19, [1989] 4 CMLR 677.

<sup>92</sup> Ibid, para 71; the objection to the 'circularity' argument may be met if the Commission uses conduct as an indicator only in clear cases, and provided that it is not relied on exclusively to support a finding of dominance.

<sup>93</sup> *ECS/AKZO* OJ [1985] L 374/1, [1986] 3 CMLR 273, para 56, upheld on appeal Case 62/86 *AKZO Chemie BV v Commission* [1991] ECR I-3359, [1993] 5 CMLR 215, para 61.

<sup>94</sup> *PO-Michelin* OJ [2002] L 143/1, [2002] 5 CMLR 388, paras 197–199.

<sup>95</sup> See eg Ordovery and Salonen 'Predation, Monopolisation and Antitrust' in *The Handbook of Industrial Organisation* (North-Holland, 1989, eds Schmalensee and Willig); OFT Research Paper 2 *Barriers to Entry and Exit in UK Competition Policy* (London Economics, 1994) and *Assessment of Market Power* OFT 415, December 2004, paras 5.23–5.28.

<sup>96</sup> OJ [1988] L 286/36, [1988] 4 CMLR 67, para 18.

<sup>97</sup> Commission decision of 29 March 2006, upheld on appeal to the General Court Case T-155/06 *Tomra Systems ASA v Commission* [2010] ECR II-000, [2011] 4 CMLR 416.

<sup>98</sup> Commission decision of 29 March 2006, para 91; see also *Wanadoo Interactive* Commission decision of 16 July 2003, paras 229–230 (referring to Wanadoo's stock exchange listing prospectus noting the synergies it derived from being part of the France Télécom group).

kind could not be probative of dominance in themselves. However it is clearly advisable for in-house lawyers to exercise restraint over hawkish commercial personnel, given to describing their position in the global widget market in memoranda and advertising copy as ‘world-beating’, ‘the strongest’ or ‘clearly the dominant player’. Whilst shareholders might like to hear this, and whilst no doubt individuals’ bonuses may be linked to their performance, it is not always easy to convince Commission officials that one’s market power is insignificant in the face of such assertions.

### (C) Countervailing buyer power

As has been explained in chapter 1, a further issue of significance is whether a supplier or suppliers are confronted with buyer power<sup>99</sup>.

### (D) Previous findings of dominance

In *Coca-Cola Co v Commission*<sup>100</sup> the General Court held that, whenever the Commission adopts a decision applying Article 102 (or the EUMR), it must define the relevant market and make a fresh analysis of the conditions of competition within it on the basis of the available evidence at the appropriate time; this may lead to a determination of the market which is different from a previous finding<sup>101</sup>. Furthermore a national court (or a national competition authority) would not be bound in a later case by a previous finding of dominance by the Commission in a different case<sup>102</sup>. However the actual decision in an Article 102 case may serve as a basis for an action for damages brought by a third party before a national court in relation to the same facts, even where the Commission’s decision did not impose a fine<sup>103</sup>.

### (E) The emergence of super-dominance

It may be the case<sup>104</sup> that the responsibility of a dominant firm becomes greater, so that a finding of abuse becomes more likely, where the firm under investigation is not merely dominant, but rather ‘enjoys a position of dominance approaching a monopoly’<sup>105</sup>. The Court of Justice has said that the scope of the special responsibility of a dominant firm must be considered in the light of the special circumstances of each case<sup>106</sup>. It follows that behaviour may be considered not to be abusive when carried out by some dominant firms but to be abusive when carried out by others. An example of the distinction is afforded by the practice of a dominant firm which selectively cuts its prices to some customers, but

<sup>99</sup> See ch 1, ‘Countervailing buyer power’, p 45.

<sup>100</sup> Cases T-125/97 etc [2000] ECR II-1733, [2000] 5 CMLR 467; the Commission defined the relevant product and geographic market afresh in its second *Michelin* decision: OJ [2002] L 143/1, [2002] 5 CMLR 388, paras 109–171.

<sup>101</sup> [2000] ECR II-1733, [2000] 5 CMLR 467, para 82.

<sup>102</sup> *Ibid*, para 85.

<sup>103</sup> *Ibid*, para 86; see also Case C-344/98 *Masterfoods Ltd v HB Ice Cream Ltd* [2000] ECR I-11369, [2001] 4 CMLR 449 and Article 16(1) of Regulation 1/2003, discussed in ch 8, ‘Article 16: uniform application of EU competition law’, pp 304–305 and ch 8, ‘Article 16(1) of Regulation 1/2003’, pp 313–314.

<sup>104</sup> Note that the Court of Justice’s judgment in Case C-52/09 *Konkurrensverket v TeliaSonera Sverige AB* [2011] ECR I-000, paras 78–82 casts some doubt on the text that follows: see ‘The emergence of super-dominance’, pp 187–189 below.

<sup>105</sup> See para 136 of the Opinion of Advocate General Fennelly in Cases C-395/96 P etc *Compagnie Maritime Belge Transports SA v Commission* [2000] ECR I-1365, [2000] 4 CMLR 1076.

<sup>106</sup> Case C-334/94 P *Tetra Pak v Commission* [1996] ECR I-5951, [1997] 4 CMLR 662, para 24; Cases C-395/96 P etc *Compagnie Maritime Belge Transports SA v Commission* [2000] ECR I-1365, [2000] 4 CMLR 1076, para 114.

not to below cost in the sense of the law on predatory pricing<sup>107</sup>, whilst charging higher prices to others. There are strong arguments for not condemning this practice: if the dominant firm is not losing money, it would appear to be competing on the basis of efficiency, which competition law should encourage<sup>108</sup>. In *Compagnie Maritime Belge Transports SA v Commission*<sup>109</sup> the Court of Justice refrained from deciding generally on the practice of selective price cutting<sup>110</sup>; however, at paragraph 119 it said that:

It is sufficient to recall that the conduct at issue here is that of a conference having a share of over 90 per cent of the market in question and only one competitor. The appellants have, moreover, never seriously disputed, and indeed admitted at the hearing, that the purpose of the conduct complained of was to eliminate G&C from the market.

On this basis the Court of Justice upheld the finding that there had been an abuse of a dominant position, whilst leaving open the possibility that the same conduct on the part of an undertaking with less than 90 per cent of the market and facing more competition would not have been found to be unlawful.

The idea that the obligations on dominant firms become more onerous depending on the special circumstances of the case (to use the language of the Court of Justice in *Tetra Pak II*), finds expression in decisions and judgments that seem to have turned on the degree of market power that the dominant undertaking enjoys. For example Tetra Pak's market share in the market for aseptic cartons and carton-filling machines was in the region of 90 to 95 per cent, and it was found to have abused a dominant position where its conduct did not take place in the market in which it was dominant, and was not intended to benefit its position in that market<sup>111</sup>. In *Compagnie Maritime Belge* the conference's market share was 90 per cent or more<sup>112</sup>, and in the *IMS* case<sup>113</sup> the Commission, when ordering IMS to grant a licence of its copyright to third parties on the market on a non-discriminatory basis, noted that IMS was in a 'quasi-monopoly situation'<sup>114</sup>.

In *Deutsche Post AG – Interception of cross-border mail*<sup>115</sup> the Commission noted that:

[t]he actual scope of the dominant firm's special responsibility must be considered in relation to the degree of dominance held by that firm and to the special characteristics of the market which may affect the competitive situation<sup>116</sup>.

In *Microsoft*<sup>117</sup> the Commission said that Microsoft, with a market share above 90 per cent, had an 'overwhelmingly' dominant position<sup>118</sup>. The Commissioner for Competition said after the General Court's judgment upholding the Commission's decision that the Court's judgment 'sends a clear signal that super-dominant companies cannot abuse

<sup>107</sup> See ch 18, 'Selective price cutting but not below cost', pp 748–752.

<sup>108</sup> It is possible that this pricing policy may amount to a different type of abuse, namely price discrimination (see ch 18, 'Price Discrimination', pp 759–764), but the issue here is whether the selective price cutting, but not to below cost, *in itself* amounts to an abuse.

<sup>109</sup> Cases C-395/96 P etc [2000] ECR I-1365, [2000] 4 CMLR 1076.

<sup>110</sup> *Ibid*, para 118.

<sup>111</sup> See 'The dominant position, the abuse and the effects of the abuse may be in different markets', pp 205–208 below.

<sup>112</sup> See similarly, on the responsibility of a monopolist, Case 7/82 *GVL v Commission* [1983] ECR 483, [1983] 3 CMLR 645, para 56; this was cited by the Commission in 1998 *Football World Cup OJ* [2000] L 5/55, [2000] 4 CMLR 963, para 85.

<sup>113</sup> *NDC Health/IMS Health: Interim Measures OJ* [2002] L 59/18, [2002] 4 CMLR 111; see also *Deutsche Post AG – Interception of cross-border mail OJ* [2001] L 331/40, [2002] 4 CMLR 598, paras 103 and 124.

<sup>114</sup> *OJ* [2002] L 59/18, [2002] 4 CMLR 111, para 58; this decision was subsequently withdrawn by the Commission: see Commission Press Release IP/03/1159, 13 August 2003.

<sup>115</sup> *OJ* [2001] L 331/40, [2002] 4 CMLR 598.

<sup>116</sup> *Ibid*, para 103, citing the *Tetra Pak II* case.

<sup>117</sup> Commission decision of 24 March 2004.

<sup>118</sup> *Ibid*, para 435.

their position to hurt consumers and dampen innovation by excluding competition in related markets<sup>119</sup>.

The idea that firms with a position of dominance approaching a monopoly may be subject to particularly onerous responsibilities would also help to explain why firms that control ‘essential facilities’ have an obligation in certain circumstances to provide access to them, since their market power is particularly strong<sup>120</sup>. It may be helpful, therefore, to identify a concept over and above dominance, that we might call ‘super-dominance’, where the risks of being found to be acting abusively are correspondingly higher: if a dominant undertaking has a ‘special’ responsibility, a super-dominant has one that is even greater.

The Commission does not use the expression ‘super-dominance’ in its *Guidance on Article 102 Enforcement Priorities*. However in paragraph 20, discussing factors that it will take into account when deciding whether to intervene on the basis that certain conduct may be having an anti-competitive foreclosure effect on the market, it says that the stronger the dominant position of the undertaking under investigation, the higher the likelihood that conduct protecting that position would have such an effect. Interestingly the Court of Justice’s judgment in *Konkurrensverket v TeliaSonera*<sup>121</sup> seems to endorse this approach: whilst acknowledging that some of its judgments had referred to ‘super-dominance’ and ‘quasi-monopoly’, it said that, as a general rule, the degree of market strength of a dominant firm was relevant to the assessment of the effects of its conduct rather than to the question of whether an abuse as such exists<sup>122</sup>.

## 6. A Substantial Part of the Internal Market

Once it has been established that a firm has a dominant position on the market, one further jurisdictional question must be answered before going on to the issue of abuse: is that dominant position held in the whole or a substantial part of the internal market? If not Article 102, by its own terms, does not apply. This issue is not the same as the delimitation of the relevant geographic market: that concept is used as part of the investigation into a firm’s market power. The requirement that market power should exist over a substantial part of the internal market is in a sense the equivalent of the *de minimis* doctrine under Article 101, according to which agreements of minor importance are not caught<sup>123</sup>.

Obviously there is no problem with the issue of substantiality where it is decided that an undertaking is dominant throughout the EU. The position may be less obvious where dominance is more localised than this. Suppose that a firm is dominant in just one Member State, or even in a part of one Member State: when will that area be considered to constitute a substantial part of the EU? Four points must be noted.

The first is that the issue is not solely a geographic one. In *Suiker Unie v Commission*<sup>124</sup> the Court of Justice said that for this purpose:

the pattern and volume of the production and consumption of the said product as well as the habits and economic opportunities of vendors and purchasers must be considered<sup>125</sup>.

<sup>119</sup> See SPEECH/07/539, 17 September 2007.

<sup>120</sup> On essential facilities see ch 17, ‘Is the product to which access is sought indispensable to someone wishing to complete in the downstream market?’, pp 701–707.

<sup>121</sup> Case C-52/09 [2011] ECR I-000, [2011] 4 CMLR 982.

<sup>122</sup> *Ibid*, paras 78–82.

<sup>123</sup> See ch 3, ‘The *De Minimis* Doctrine’, pp 140–144.

<sup>124</sup> Cases 40/73 etc [1975] ECR 1663, [1976] 1 CMLR 295.

<sup>125</sup> *Ibid*, para 371.

This indicates that substantiality is not simply a question of relating the *physical size* of the geographic market to the EU as a whole. In *Suiker Unie* the Court of Justice considered the ratio of the volume of Belgian and South German production of sugar to EU production overall and concluded on this basis that each of those markets could be considered to be substantial.

The second point is that it is likely that each Member State would be considered to be a substantial part of the internal market, in particular where an undertaking enjoys a statutory monopoly<sup>126</sup>, and *Suiker Unie* further established that parts of a Member State can be<sup>127</sup>.

The third point is that neither the EU Courts nor the Commission have laid down that any particular percentage of the internal market as a whole is critical in determining what is substantial. In *BP v Commission*<sup>128</sup> Advocate General Warner took the view that sole reliance should not be placed on percentages in such cases and was of the opinion that the Dutch market for petrol, which represented only about 4.6 per cent of the EU market as a whole, could be considered substantial. The Court of Justice did not comment on this issue, as it quashed the Commission's finding of abuse on other grounds.

There are numerous examples of the test of substantiality having been satisfied in relation to a single facility: in each of *Merci Convenzionali Porto di Genova v Siderugica Gabriella*<sup>129</sup>, *Sealink/B and I – Holyhead: Interim Measures*<sup>130</sup>, *Sea Containers v Stena Sealink – Interim Measures*<sup>131</sup>, *Flughafen Frankfurt/Main*<sup>132</sup>, *Corsica Ferries*<sup>133</sup>, *Portuguese Airports*<sup>134</sup>, *Ilmailulaitos/Luftfartsverket*<sup>135</sup> and *Spanish Airports*<sup>136</sup> ports or airports have been found to be sufficiently substantial. Furthermore the Court of Justice has held that, where national law confers a contiguous series of monopolies within a Member State which, taken together, cover the entire territory of that State, that law creates a dominant position in a substantial part of the internal market<sup>137</sup>.

The fourth point is that, in the event that an undertaking is found not to be dominant in a substantial part of the internal market, the possibility remains that it might be guilty of infringing the domestic equivalent of Article 102, a variant of which will be found in all the Member States of the EU.

## 7. Small Firms and Narrow Markets

### (A) Small firms

It might be assumed that Article 102 is applicable only to large undertakings. It is certainly true that the Commission has used it to investigate some of the industrial giants of the world such as Roche, Commercial Solvents, United Brands, IBM, Microsoft and

<sup>126</sup> Case 127/73 *BRT v SABAM* [1974] ECR 313, [1974] 2 CMLR 238, para 5; Case T-229/94 *Deutsche Bahn AG v Commission* [1997] ECR II-1689, [1998] 4 CMLR 220; Case T-228/97 *Irish Sugar v Commission* [1999] ECR II-2969, [1999] 5 CMLR 1300, para 99.

<sup>127</sup> It is important to remember however that the abuse must also have an effect on trade between Member States to fall within Article 102: see 'The Effect on Inter-State Trade', pp 178–179 above.

<sup>128</sup> Case 77/77 [1978] ECR 1513, [1978] 3 CMLR 174.

<sup>129</sup> Case C-179/90 [1991] ECR I-5889, [1994] 4 CMLR 422, para 15.

<sup>130</sup> [1992] 5 CMLR 255, para 40.

<sup>131</sup> OJ [1994] L 15/8, [1995] 4 CMLR 84.

<sup>132</sup> OJ [1998] L 72/30, [1998] 4 CMLR 779.

<sup>133</sup> Case C-18/93 [1994] ECR I-1783.

<sup>134</sup> OJ [1999] L 69/31, [1999] 5 CMLR 103, upheld on appeal Case C-163/99 *Portugal v Commission* [2001] ECR I-2613, [2002] 2 CMLR 1319.

<sup>135</sup> OJ [1999] L 69/24, [1999] 5 CMLR 90.

<sup>136</sup> OJ [2000] L 208/36, [2000] 5 CMLR 967.

<sup>137</sup> Case C-323/93 *La Crespelle* [1994] ECR I-5077, para 17; this reasoning was applied by the Commission in, for example, *Portuguese Airports* OJ [1999] L 69/31, [1999] 5 CMLR 103, paras 21–22.

Intel. However it would be wrong to suppose that only firms such as these fall within the risk of Article 102. The significant issue under Article 102 is market power, not the size of an undertaking. Given that the relevant market may be drawn very narrowly, small firms may be found guilty of an abuse of Article 102. In *Hugin*<sup>138</sup> that firm was fined by the Commission for refusing to supply its spare parts to Liptons, the market for these purposes being spare parts for Hugin machines; Hugin's share of the cash register market was 12 to 14 per cent, but its share of the spare parts market for its machines was 100 per cent. On appeal<sup>139</sup> the Court of Justice quashed the Commission's decision because it considered there to be no effect on inter-state trade, but it upheld the finding on dominance. A vivid illustration of the vulnerability of small firms under Article 102 is afforded by *BBI/Boosey and Hawkes: Interim Measures*<sup>140</sup>. Boosey and Hawkes was found by the Commission, in an interim decision, to have abused its dominant position when it refused to supply musical instruments to customers who were threatening to enter into competition with it. Boosey and Hawkes' worldwide sales in all products were worth £38 million in 1985, and the market it was accused of dominating was defined as instruments for British-style brass bands, in which its market share was 80 to 90 per cent.

## (B) Narrow markets

In the *Hugin* case a small part of Hugin's activities, the supply of spare parts, constituted the relevant market within which it was dominant. Similarly in *General Motors v Commission*<sup>141</sup>, where the Belgian Government had given General Motors the exclusive power to grant test certificates to second-hand imports of Opel cars, this function was held to constitute a separate market, and General Motors' exclusive right meant that it was in a dominant position. The decision in *British Leyland v Commission*<sup>142</sup> was similar, that firm being held to have a dominant position in the provision of national type-approval certificates for its vehicles. Two further cases illustrate how narrowly a market can be defined. In *Porto di Genova v Siderurgica Gabrielli*<sup>143</sup> the Court of Justice held that the organisation of port activities at a single port could constitute a relevant market; and in *Corsica Ferries*<sup>144</sup> it reached the same conclusion in relation to the provision of piloting services at the same port. Similarly narrow markets have been found by the Commission in a series of decisions on services linked to access to airports<sup>145</sup>.

The 1998 *Football World Cup*<sup>146</sup> decision epitomises the possibility of narrow market definitions. The Commission proceeded on the basis of abuse in the market for 574,300 'blind pass' tickets to matches at the 1998 World Cup, a blind pass consisting of a ticket where the consumer does not know, at the time of purchase, what game he or she will be seeing<sup>147</sup>. The CFO, responsible for the ticketing arrangements, was found to have abused its dominant position by selling tickets only to customers having a postal address in

France: this had caused complaints, not surprisingly, that it was guilty of discrimination in favour of French nationals. A token fine of €1,000 was imposed.

## 8. Abuse

### (A) Introduction

It is not controversial to say that Article 102 is controversial. In the case of Article 101 undertakings are liable only where they enter into agreements or concerted practices that restrict competition; a great deal of the Commission's (and of the national competition authorities') attention is focused on the deliberate and secret cartelisation of markets, and there are few apologists today for this kind of behaviour<sup>148</sup>. Article 102, on the other hand, bears upon the individual behaviour of dominant firms<sup>149</sup>; by its nature the application of Article 102 involves a competition authority or a court having to decide whether that behaviour deviates from 'normal' or 'fair' or 'undistorted' competition, or from 'competition on the merits', none of which expressions is free from difficulty. It should be added that the controversy surrounding Article 102 is not unique to the EU: all systems of competition law contain provisions on the unilateral conduct of firms with substantial market power, and competition authorities and courts worldwide have had to grapple with the issues under consideration in this chapter. Significant work has been undertaken under the auspices of the International Competition Network on this topic: in particular in May 2007 the Unilateral Conduct Working Group produced a *Report on the Objectives of Unilateral Conduct Laws, Assessment of Dominance/Substantial Market Power, and State-Created Monopolies* which contains a useful discussion of this complex area<sup>150</sup>.

#### (i) The 'special responsibility' of dominant firms

It is clear that it is not an offence in itself for a firm to have a dominant position; what is offensive is to abuse the position of dominance. However the Court of Justice in *Michelin v Commission*<sup>151</sup> stated that a firm in a dominant position has a 'special responsibility not to allow its conduct to impair undistorted competition' on the internal market<sup>152</sup>. This statement is routinely repeated in the judgments of the EU Courts and the decisions of the Commission on Article 102<sup>153</sup>. In a sense it is a statement of the obvious: it is clear that Article 102 imposes obligations on dominant firms that non-dominant firms do not bear. Unilateral behaviour is not controlled under Article 101, which applies only to conduct which is attributable to a concurrence of wills; unilateral

<sup>148</sup> See ch 13 generally on cartels.

<sup>149</sup> Article 102 can also apply to the abuse of collective dominance, although this is not a concept that has been explored in much detail in the case law: see ch 14, 'Abuse of collective dominance under Article 102', pp 579–582.

<sup>150</sup> Available at [www.internationalcompetitionnetwork.org](http://www.internationalcompetitionnetwork.org); many other interesting work products on unilateral conduct laws will be found on this site, along with the current and long-term work plans of the ICN in this area; see also the OECD Roundtable on *Competition on the Merits* of 2005, available at [www.oecd.org](http://www.oecd.org).

<sup>151</sup> Case 322/81 [1983] ECR 3461, [1985] 1 CMLR 282.

<sup>152</sup> *Ibid*, para 57.

<sup>153</sup> For recent statements to the same effect see Case C-280/08 P *Deutsche Telekom AG v Commission* [2010] ECR I-000, [2010] 5 CMLR 1495, para 176 and Case C-52/09 *Konkurrensverket v TeliaSonera Sverige AB* [2011] ECR I-000, [2011] 4 CMLR 982, para 24.

acts can however amount to an infringement of Article 102<sup>154</sup>. However the conundrum for anyone interested in Article 102 is to determine what, precisely, is meant by an abuse of a dominant position.

## (ii) Article 102 does not contain an exhaustive list of what amounts to abusive behaviour

Article 102 gives examples of conduct that is abusive – such as charging unfair prices, limiting production and discrimination that places certain trading parties at a competitive disadvantage – but this list is not exhaustive<sup>155</sup>; the Commission's decisions and the case law of the EU Courts have applied Article 102 to numerous practices not specifically mentioned in it. A recent example of this is the General Court's judgment in *AstraZeneca AB v Commission*<sup>156</sup> in which it held that a pattern of making misleading misrepresentations to national patent offices in various Member States that led to the extension of patent protection for pharmaceutical products to which AZ was not, in fact, entitled amounted to an abuse of a dominant position; the same was true of the submission of requests to public authorities to deregister market authorisations for particular drugs, thereby impeding entry to the market by generic manufacturers. A reading of the list of examples of abusive behaviour in Article 102 would not prepare any but the most imaginative reader to suppose that these practices were abusive; but the Court appears to have had no hesitation in finding them to be illegal. Examples of practices found to be abusive will be given later in this chapter and will be considered in depth in chapter 17 (non-pricing abuses) and chapter 18 (pricing abuses).

## (iii) False positives and false negatives

A difficulty with Article 102 is that the line between pro- and anti-competitive conduct is not always an easy one to draw, and there is an obvious danger that, if Article 102 is applied too aggressively, firms might refrain from conduct that is in fact pro-competitive. Clearly it would be the ultimate paradox if a law designed to promote competition in fact were to have the effect of diminishing it<sup>157</sup>.

A more stylised way of presenting this problem is to consider the difference between what are sometimes referred to as 'false positives' and 'false negatives'<sup>158</sup>.

A **false positive** occurs where a competition authority incorrectly concludes that pro-competitive behaviour is abusive: a harm to the firm(s) found guilty, and also to consumers, since the pro-competitive behaviour will be prohibited. The problem here is that the law is over-inclusive.

A **false negative** occurs where a competition authority incorrectly concludes that anti-competitive behaviour is not illegal and therefore permits it: a harm to consumers. Here the law is under-inclusive.

<sup>154</sup> The respective roles of Articles 101 and 102 are spelt out particularly clearly in the judgment of the General Court in Case T-41/96 *Bayer v Commission* [2000] ECR II-3383, [2001] 4 CMLR 126, paras 175–176.

<sup>155</sup> Case 6/72 *Continental Can v Commission* [1973] ECR 215, [1973] CMLR 199, para 26; Cases C-395/96 P etc *Compagnie Maritime Belge Transports SA v Commission* [2000] ECR I-1365, [2000] 4 CMLR 1076, para 112; Case C-280/08 P *Deutsche Telekom AG v Commission* [2010] ECR I-000, [2010] 5 CMLR 1495, para 173.

<sup>156</sup> Case T-321/05 [2010] ECR II-000, [2010] 5 CMLR 1585; the judgment is on appeal to the Court of Justice, Case C-457/10 P *AstraZeneca AB v Commission*, not yet decided.

<sup>157</sup> A series of essays on the question of whether (mis)application of laws dealing with unilateral conduct have a chilling effect on competition, by Bougeois, Fingleton and Nikpay, Lewis and Lugard respectively, will be found in chs 15–18 of [2008] Fordham Corporate Law Institute (ed Hawk).

<sup>158</sup> Economics literature sometimes uses the expressions 'Type I errors' and 'Type II errors', but the tendency to confuse which error is of which type (sometimes referred to jocularly as a 'Type III' error) argues in favour of the language of false positives and false negatives.

Given the inherent difficulty of determining which unilateral acts are anti-competitive and which are pro-competitive, it is inevitable that competition authorities will sometimes make errors; a policy question when framing rules on unilateral behaviour is to decide which of the two errors is preferable. There is an undoubted perception that the enforcement authorities and the courts in the US today are more concerned about false positives than false negatives: that is to say that they err on the side of non-intervention under section 2 of the Sherman Act 1890, which forbids the monopolisation of markets<sup>159</sup>, whereas the Commission and the EU Courts perhaps tend the other way<sup>160</sup>. In *Verizon Communications Inc v Law Offices of Curtis Trinko*<sup>161</sup> the US Supreme Court, in a refusal to supply case, was explicit about its fear of false positives:

Against the slight benefits of antitrust intervention here, we must weigh a realistic assessment of its costs... Mistaken inferences and the resulting false condemnations are 'especially costly, because they chill the very conduct the antitrust laws are designed to protect'... The cost of false positives counsels against an undue expansion of s. 2 liability<sup>162</sup>.

The same attitude helps to explain the conclusion of the Supreme Court in *Pacific Bell v linkLine*<sup>163</sup>, where it held that a margin squeeze is not an independent infringement of section 2 of the Sherman Act<sup>164</sup>. In contrast one might note that on many occasions when the EU Courts have been invited to expand Article 102 liability they have done so: for example when apparently establishing *per se* infringements<sup>165</sup>; when establishing that Article 102 could apply to mergers<sup>166</sup>; when deciding that there did not need to be any causation between the market power held by a dominant firm and its abusive behaviour<sup>167</sup>; when accepting that the dominance, abuse and effects of the abuse can be in different markets<sup>168</sup>; when extending the application of Article 102 to collective, as well as to individual, dominance<sup>169</sup>; and when acknowledging the possibility of an individual abuse of a collective dominant position<sup>170</sup>. This record does not suggest the same reticence as that of the Supreme Court in *Verizon*.

<sup>159</sup> For discussion of section 2 of the Sherman Act see Sullivan and Harrison *Understanding Antitrust and Its Economic Implications* (LexisNexis, 4th ed, 2003), ch 6; Sullivan and Hovenkamp *Antitrust Law, Policy and Procedure: Cases, Materials, Problems* (LexisNexis, 5th ed, 2004), ch 6; Fox, Sullivan and Peritz *Cases and Materials on US Antitrust in Global Context* (Thomson/West, 2nd ed, 2004), ch 3; Hovenkamp *Federal Antitrust Policy: The Law of Competition and Its Practice* (Thomson/West, 3rd ed, 2005), chs 6–10; Kovacic 'The Intellectual DNA of Modern US Competition Law for Dominant Firm Conduct: The Chicago/Harvard Double Helix' (2007) *Columbia Business Law Review* 1; for a critique of the 'vacuous standards and conclusory labels that provide no meaningful guidance about which conduct will be condemned as exclusionary' under section 2 of the Sherman Act see Elhauge 'Defining Better Monopolization Standards' (2003) 56 *Stanford Law Review* 253.

## (B) What is the purpose of Article 102?

Before considering the jurisprudence of the EU Courts and the practice of the Commission on the meaning of abuse of dominance, it is necessary to give some consideration to the underlying purpose of Article 102. The various possible objectives of competition law have been discussed in chapter 1 of this book<sup>171</sup>. There it was pointed out that competition authorities today stress the central importance of consumer welfare when applying competition law, but that other matters such as the redistribution of wealth and the protection of small firms against more powerful rivals have also been influential at various points in time.

### (i) Protection of competitors or protection of competition?

A specific criticism of Article 102 is that it is used to protect competitors, including inefficient ones, rather than the process of competition, which is a quite different matter. According to this view Article 102, in effect, subjects dominant firms to a handicap: competitive acts, such as price reductions or the bundling of different products, that are perfectly legal for non-dominant firms, become illegal when a firm is dominant. The complaint is that this means that firms that possess superior efficiency are restrained in order to provide a place in the competitive arena for less efficient ones. This characteristic of Article 102 would be exacerbated if it is, indeed, the case that institutions in the EU have a tendency to be more concerned about false negatives than false positives.

The criticism that Article 102 protects competitors rather than competition brings to mind Robert Bork's attack on the antitrust rules as they were applied in the US in the 1960s and 1970s, and in particular what he regarded as the 'uncritical sentimentality in favour of the small guy' of the enforcement authorities and the courts there at that time<sup>172</sup>. The most high-level accusation of the EU's supposed predilection for protecting competitors rather than competition came from the Assistant Attorney General for Antitrust at the US Department of Justice in response to the judgment of the General Court of the EU in September 2007 upholding the European Commission's decision that Microsoft had abused its dominant position<sup>173</sup>. After expressing 'concern' about the standard applied to unilateral conduct in Europe, Mr Barnett said that:

In the United States, the antitrust laws are enforced to protect consumers by protecting competition, not competitors<sup>174</sup>.

Without saying more, his meaning could hardly have been clearer: that in the EU the prime concern is not with the protection of consumers through competition, but with the protection of competitors.

Some commentators lay the blame for what they see as an unduly interventionist application of Article 102 at the door of the school of ordoliberalism which, through its concern to protect economic freedom, including the right of access to markets unconstrained by barriers such as exclusive agreements or rebating and discounting practices having analogous effects, led to the adoption of formalistic rules capable of having perverse consequences<sup>175</sup>.

<sup>171</sup> See ch 1, 'Goals of competition law', pp 19–24.

<sup>172</sup> Bork *The Antitrust Paradox* (The Free Press, 1993).

<sup>173</sup> Case T-201/04 *Microsoft Corp v Commission* [2007] ECR II-3601, [2007] 5 CMLR 846.

<sup>174</sup> See Press Release of 17 September 2007, available at [www.justice.gov.atr](http://www.justice.gov.atr).

<sup>175</sup> For a discussion of ordoliberalism see ch 1, 'Protecting competitors', pp 21–22; for an example of criticism of the impact of ordoliberalism see eg Kallaugher and Sher 'Rebates Revisited: Anti-Competition Effects and Exclusionary Abuse Under Article 82' (2004) 25 ECLR 263; Venit 'Article 82: The Last Frontier – Fighting Fire with Fire' (2005) 28 *Fordham International Law Journal* 1157; Ahlborn and Padilla 'From Fairness to Welfare: Implications for the Assessment of Unilateral Conduct under EC Competition Law' in

However, in the opinion of the authors of this book the assertion that the fingerprints of the ordoliberal school are to be found on the case law of Article 102, and that this has led to a systematic bias in favour of competitors and against efficient dominant firms, is at best a misdescription of the true position and at worst little more than a slogan by protagonists of minimalist intervention. One commentator has examined the *travaux préparatoires* of Article 102 and suggested that its drafters were mainly concerned with increasing economic efficiency; their intention was not to protect competitors, but their customers<sup>176</sup>. This explains why the language of Article 102 is predominantly focused on exploitative behaviour, such as the imposition of unfair selling prices, terms and conditions and the limitation of markets to the prejudice of consumers, rather than exclusionary abuses<sup>177</sup>. It also tends to refute the widely-held belief in the English-language literature that Article 102 is based on ordoliberal foundations.

### (ii) Article 102 protects competition; and competition is for the benefit of consumers

Numerous statements to the effect that Article 102 is actually concerned with the protection of competition rather than the protection of competitors can be found. Many of these come from the Commission (or from Commission officials), but they can also be found in judgments of the EU Courts, particularly in recent years in judgments such as *Deutsche Telekom* and *TeliaSonera* (see below).

A clear statement to this effect was made by Neelie Kroes, the former Commissioner for Competition, when discussing the Commission's review of exclusionary abuses at the annual conference at Fordham in September 2005<sup>178</sup>:

My own philosophy on this is fairly simple. First, it is competition, and not competitors, that is to be protected. Second, ultimately the aim is to avoid consumers harm.

I like aggressive competition – including by dominant companies – and I don't care if it may hurt competitors – as long as it ultimately benefits consumers. That is because the main and ultimate objective of Article 102 is to protect consumers, and this does, of course, require the protection of an undistorted competitive process on the market.

That was a statement by one individual, but the same idea is stated more formally at several points in the Commission's *Guidance on Article 102 Enforcement Priorities*<sup>179</sup>. A few examples illustrate the point. In paragraph 5 the Commission says that:

The Commission... will direct its enforcement to ensuring that markets function properly and that consumers benefit from the efficiency and productivity which result from effective competition between undertakings.

In paragraph 6 it says that:

[T]he Commission is mindful that *what really matters is protecting an effective competitive process and not simply protecting competitors*. This may well mean that competitors

*European Competition Law Annual 2007: A Reformed Approach to Article 82 EC* (Hart Publishing, 2008, eds Ehlermann and Marquis).

<sup>176</sup> See Akman 'Searching for the Long-Lost Soul of Article 82 EC' (2009) 29(2) OJLS 267.

<sup>177</sup> See 'Exploitative, exclusionary and single market abuses', pp 201–202 below on the distinction between exploitative and exclusionary abuses.

<sup>178</sup> SPEECH/05/537, 23 September 2005; numerous statements to the same effect can be found: see eg speech by Lowe 'Innovation and Regulation of Dominant Firms', 23 September 2008 and speech by Commissioner Almunia 'Converging paths in unilateral conduct', 3 December 2010, available at [www.ec.europa.eu](http://www.ec.europa.eu).

<sup>179</sup> OJ [2009] C 45/7.

who deliver less to consumers in terms of price, choice, quality and innovation will leave the market (emphasis added).

The Commission adds, in paragraph 23, that:

[T]he Commission will normally only intervene where the conduct concerned has already been or is capable of hampering competition from competitors *which are considered to be as efficient* as the dominant undertaking (emphasis added).

Sceptics might argue that these are merely statements of the Commission that lack the force of law, and that the *Guidance* simply sets out its enforcement policy: it does not describe the jurisprudence of the EU Courts. However judgments of the Court of Justice themselves stress the importance of protecting the process of competition for the benefit of consumers<sup>180</sup>; and in both *Deutsche Telekom AG v Commission*<sup>181</sup> and *Konkurrensverket v TeliaSonera Sverige AB*<sup>182</sup> it seemed to go out of its way to stress that Article 102 protects only ‘as efficient’ competitors, and not inefficient ones. At paragraph 177 of its judgment in *Deutsche Telekom* the Court said that:

Article [102 TFEU] prohibits a dominant undertaking from, inter alia, adopting pricing practices which have an exclusionary effect *on its equally efficient actual or potential competitors* (emphasis added)<sup>183</sup>.

The same language occurs repeatedly throughout the judgment<sup>184</sup>; the same is true of the *TeliaSonera* judgment<sup>185</sup>.

Collectively these various utterances reveal a consistent tendency on the part of both the Court of Justice and the Commission, at least in recent times, to stress competition, efficiency and consumer welfare as the key objectives of Article 102. It is difficult, therefore, to sustain the argument that the EU institutions today have an active policy of protecting competitors rather than the process of competition.

### (C) Jurisprudence on the meaning of abuse

As already noted, Article 102 does not contain an exhaustive list of all the practices that can amount to an abuse. Nor is there one particular judgment of the Court of Justice or the General Court that provides an all-encompassing definition of what is meant by abuse. This is understandable: cases on abuse of dominance very much turn on their own particular facts – a point stressed on numerous occasions<sup>186</sup> – and the EU Courts have refrained from broad theoretical statements, preferring instead to decide each case on

<sup>180</sup> See eg (in a case on Article 101 rather than Article 102) the Court of Justice in Cases C-501/06 P etc *GlaxoSmithKline Services Unlimited v Commission* [2009] ECR I-9291, [2010] 4 CMLR 50, para 63; see also the General Court in Case T-340/03 *France Télécom v Commission* [2007] ECR II-107, [2007] 4 CMLR 919, para 266 and Case T-321/05 *AstraZeneca AB v Commission* [2010] ECR II-000, [2010] 5 CMLR 1585, para 353.

<sup>181</sup> Case C-280/08 P [2010] ECR I-000, [2010] 5 CMLR 1495; note also that the Court’s judgment in Case C-7/97 *Oscar Bronner GmbH* [1998] ECR I-7791, [1999] 4 CMLR 112 presaged the ‘as efficient competitor’ test: see ch 17, ‘Is the product to which access is sought indispensable to someone wishing to compete in the downstream market?’, pp 701–703.

<sup>182</sup> Case C-52/09 [2011] ECR I-000, [2011] 4 CMLR 982.

<sup>183</sup> Case C-280/08 P [2010] ECR I-000, [2010] 5 CMLR 1495, para 177.

<sup>184</sup> *Ibid*, paras 203, 234, 236, 240, 252–255 and 259.

<sup>185</sup> Case C-52/09 *Konkurrensverket v TeliaSonera Sverige AB* [2011] ECR I-000, [2011] 4 CMLR 982, paras 31–33, 39–40, 43, 63–64, 67, 70 and 73.

<sup>186</sup> See eg Case C-95/04 P *British Airways plc v Commission* [2007] ECR I-2331, [2007] 4 CMLR 982, para 64; see also para 68 of the Opinion of Advocate General Jacobs in Case C-53/03 *Syfait* [2005] ECR I-4609, [2005] 5 CMLR 7.

its merits (albeit taking into account earlier judgments). As Philip Lowe, at the time the Director General of DG COMP, said in his remarks on unilateral conduct in Washington in September 2006:

[J]ust as physicists strive to find the theory that unifies Newtonian physics and quantum mechanics, so economists strive to find the theory that unifies the various aspects of anti-competitive unilateral conduct. And the economists, just as the physicists, have not yet found it<sup>187</sup>.

One paragraph that is regularly cited on the meaning of abuse of dominance will be found in the judgment of the Court of Justice in *Hoffmann-La Roche v Commission*<sup>188</sup>. At paragraph 91 it said that abuse is:

An objective concept relating to the behaviour of an undertaking in a dominant position which is such as to influence the structure of a market where, as a result of the very presence of the undertaking in question the degree of competition is weakened and which, through recourse to methods different from those which condition normal competition in products or services on the basis of the transaction of commercial operators, has the effect of hindering the maintenance of the degree of competition still existing in the market or the growth of that competition.

This is an important paragraph, but it does not provide an overarching definition of abuse. For example it does not capture the idea of exploitative, as opposed to exclusionary, practices of a dominant firm, such as charging customers excessively high prices: such conduct cannot be said to *hinder* competition, and yet it can undoubtedly amount to an abuse of a dominant position, as Article 102 explicitly states. However the Court's judgment in *Hoffmann-La Roche* does introduce the idea that dominant undertakings must refrain from 'methods different from those which condition normal competition'. Of course this begs the question: what is 'normal' competition, a vague and indeterminate word<sup>189</sup>. However the idea of 'normal' competition comes more clearly into focus if slightly different language is used: namely that dominant firms should 'compete on the merits', and that competition that is not on the merits is 'abnormal' competition. The EU Courts do use the language of competition on the merits, noticeably so in recent judgments. For example in *Deutsche Telekom v Commission*<sup>190</sup> it said, after quoting from paragraph 91 of *Hoffmann-La Roche*, that a dominant firm must not strengthen its dominant position:

By using methods other than those which come within the scope of competition on the merits<sup>191</sup>.

It used the same language in paragraph 43 of its judgment in *TeliaSonera*<sup>192</sup>, as did the General Court in two judgments in 2010, *AstraZeneca AB v Commission*<sup>193</sup> and *Tomra*

<sup>187</sup> See speech of 11 September 2006, available at [www.ec.europa.eu](http://www.ec.europa.eu).

<sup>188</sup> Case 85/76 [1979] ECR 461, [1979] 3 CMLR 211; for a more recent statement to the same effect see eg Case C-280/08 P *Deutsche Telekom AG v Commission* [2010] ECR I-000, [2010] 5 CMLR 1495, para 174 and the case law cited therein.

<sup>189</sup> In *National Grid Plc v Gas & Electricity Markets Authority* [2010] EWCA Civ 114, [2010] UKCLR 386, the English Court of Appeal said that 'normal' competition is not 'a sufficiently hard-edged concept that it can be determined as a matter of law'; it is a 'question of expert appreciation': *ibid*, para 41.

<sup>190</sup> Case C-280/08 P [2010] ECR I-000, [2010] 5 CMLR 1495.

<sup>191</sup> *Ibid*, para 177; see similarly Case T-201/04 *Microsoft Corp v Commission* [2007] ECR II-3601, [2007] 5 CMLR 846, para 1070.

<sup>192</sup> Case C-52/09 [2011] ECR I-000, [2011] 4 CMLR 982.

<sup>193</sup> Case T-321/05 [2010] II-ECR 000, [2010] 5 CMLR 1585, paras 354–355, 672 and 824.

*Systems ASA v Commission*<sup>194</sup>. There are a number of Article 102 cases pending before the EU Courts at the moment<sup>195</sup>, and it will be of interest to see if they continue to use the language of ‘competition on the merits’, and whether they will attempt to explain in greater depth what this term means.

The Commission has given examples of what it considers to be competition on the merits in paragraph 5 of its *Guidance on Article 102 Enforcement Priorities*: offering lower prices, better quality and a wider choice of new and improved goods and services. When compared to business behaviour of this kind, it is not difficult to see that other acts – such as a margin squeeze, the misleading of patent authorities leading to the award of additional patent protection from generic producers of pharmaceutical products and the grant of rebates in return for exclusivity or near-exclusivity – do not amount to competition on the merits, and are therefore capable of being found to be abusive.

### (D) Are there or should there be any *per se* rules under Article 102?

The discussion so far suggests that Article 102, as applied today, is concerned to protect consumer welfare; it does not protect competitors as such; and that dominant firms should compete on the merits and refrain from ‘abnormal’ competition. However, even if this is the case, there remains a problem: can these ideas be expressed in administrable rules capable of being applied by competition authorities, courts, professional advisers and dominant undertakings themselves? More specifically, is it possible to avoid the problem of false positives and false negatives, both of which are undesirable in principle?

One of the most common complaints about Article 102 is that the Commission and the EU Courts apply it in too formalistic a manner. This criticism can be articulated in various ways. One is the argument that some practices appear to be unlawful *per se*, but that *per se* rules are inappropriate for behaviour such as price cutting and refusals to deal which may, depending on the facts of a particular case, be pro-competitive, anti-competitive, or neutral. Another way of voicing the same criticism is to argue that the Commission and the Courts often fail to demonstrate how a particular practice could have significant effects on the market: too often they fail to articulate a convincing theory of economic harm and/or to produce evidence that adverse effects would follow from the practice under investigation.

### (i) Are there any *per se* rules under Article 102?

Historically there has been a tendency on the part of both the Courts and the Commission to apply *per se* rules, at least to some abuses; however the undoubted trend, which the authors of this book expect to continue, is away from a *per se* standard towards effects-based analysis. There is no doubt that language can be found in some judgments that suggests that at least some unilateral practices are *per se* illegal. A few extracts from the General Court’s judgment in *Michelin v Commission*, summarising earlier case law, illustrate this<sup>196</sup>:

[I]t is apparent from a consistent line of decisions that a loyalty rebate, which is granted in return for an undertaking by the customer to obtain his stock exclusively or almost exclusively from an undertaking in a dominant position, is contrary to Article [102 TFEU]<sup>197</sup>.

<sup>194</sup> Case T-155/06 [2010] ECR II-000, [2011] 4 CMLR 416, paras 206 and 241.

<sup>195</sup> See eg Case T-336/07 *Telefónica v Commission*; Case T-286/09 *Intel v Commission*; Case T-201/11 *Si.mobil v Commission*; Case C-209/10 *Post Danmark A/S v Konkurrencerådet*; Case C-549/10 P *Tomra ASA v Commission*; Case C-109/10 P *Solvay SA v Commission*.

<sup>196</sup> Case T-203/01 [2003] ECR II-4071, [2004] 4 CMLR 923; for comment see Waelbroeck ‘Michelin II: A *per-se* rule against rebates by dominant companies?’ (2005) 1 Journal of Competition Law and Economics 149.

<sup>197</sup> Case T-203/01 [2003] ECR II-4071, [2004] 4 CMLR 923, para 56.

Later the General Court says that:

[I]t may be inferred generally from the case law that any loyalty-inducing rebate system applied by an undertaking in a dominant position has foreclosure effects prohibited by Article [102 TFEU]<sup>198</sup>.

Later again the General Court says that:

[D]iscounts granted by an undertaking in a dominant position must be based on a countervailing advantage which may be economically justified<sup>199</sup>.

If these statements are correct, then it would seem that there are, indeed, *per se* rules under Article 102, at least for some types of rebates and discounts. In particular it is noticeable that the General Court says here that foreclosure effects can be *inferred*: that is to say that they do not need to be proved; in the language of Article 101(1), this would suggest that a loyalty-inducing rebate system abuses *by object*, so that there is no need to prove effects.

The General Court has repeated this kind of language on several occasions: recent examples are its judgments in *Solvay v Commission*<sup>200</sup> and *ICI v Commission*<sup>201</sup>. A further illustration can be found in *Tomra Systems ASA v Commission*<sup>202</sup> in which the General Court seemed to regard the rebates and exclusive agreements under consideration as unlawful *per se*<sup>203</sup>; however the General Court went on to accept a finding of the Commission that Tomra's practices were capable of having anti-competitive effects<sup>204</sup>, suggesting an ambiguity on its part as to the desirability of *per se* rules in this area.

## (ii) Recent case law and decisions do require effects analysis

Judgments of the kind just discussed make it difficult to say that the Courts have never tolerated *per se* rules under Article 102. However, as noted earlier in this chapter, there is an increasing intellectual consensus against the application of *per se* rules in the law and practice on unilateral behaviour; the Commission in its *Guidance on Article 102 Enforcement Priorities* considers that it should concentrate its enforcement activity on practices likely to have seriously anti-competitive effects on the market; and, in its recent decisions under Article 102, the Commission has sought evidence of anti-competitive effects, even where it considered that it was not legally obliged to do so. For example in *Microsoft*<sup>205</sup> the Commission decided that Microsoft was guilty of tying the provision of its Windows Media Player to its operating software only after demonstrating that the tying would restrict competition<sup>206</sup>. Similarly, in *Telefónica*<sup>207</sup> the Commission noted that, although it was not formally obliged to do so, it had demonstrated that Telefónica's pricing practices would harm competition and consumers<sup>208</sup>. The Commission adopted the same approach in its *Intel* decision<sup>209</sup>. When

<sup>198</sup> *Ibid*, para 65.

<sup>199</sup> *Ibid*, para 100. <sup>200</sup> Case T-57/01 [2009] ECR II-4621.

<sup>201</sup> Case T-66/01 [2010] ECR II-000, [2011] 4 CMLR 162.

<sup>202</sup> Case T-155/06 [2010] ECR II-000, [2011] 4 CMLR 416, on appeal to the Court of Justice, Case C-549/10 P, not yet decided.

<sup>203</sup> *Ibid*, para 208–210.

<sup>204</sup> Commission decision of 29 March 2006, paras 331–346, upheld on appeal Case T-155/06 *Tomra Systems ASA v Commission* [2010] ECR II-000, [2011] 4 CMLR 416, paras 215–230.

<sup>205</sup> Commission decision of 24 March 2004.

<sup>206</sup> *Ibid*, paras 835–954, upheld on appeal to the General Court, Case T-201/04 *Microsoft Corp v Commission* [2007] ECR II-3601, [2007] 5 CMLR 846, paras 1031–1090.

<sup>207</sup> Commission decision of 4 July 2007, on appeal to the General Court, Case T-336/07 *Telefónica v Commission*, not yet decided and Case T-398/07 *Spain v Commission*, not yet decided.

<sup>208</sup> *Ibid*, paras 543–618.

<sup>209</sup> Commission decision of 13 May 2009, paras 1597–1616; the Commission carried out an extensive 'as efficient competitor' analysis in paras 1002–1576 of its decision; this decision is on appeal Case T-286/09 *Intel v Commission*, not yet decided.

adopting its *Guidance on Article 102 Enforcement Priorities* the Commission stressed that it now adopts an effects-based approach to its decision-making under Article 102<sup>210</sup>. Of course the Commission does not establish what the law is (although it can help to influence it): the law is determined by the EU Courts. As pointed out, some judgments have applied Article 102 in a formalistic manner. However it is noticeable that other judgments have stressed the need for a demonstration of anti-competitive effects. For example in two recent judgments, *Deutsche Telekom v Commission*<sup>211</sup> and in *TeliaSonera*<sup>212</sup>, the Court of Justice stated that potential anti-competitive effects must be demonstrated before a margin squeeze is condemned as unlawful<sup>213</sup>. For example in *TeliaSonera* it said that:

in order to establish whether [a margin squeeze] is abusive, that practice must have an anti-competitive effect on the market.<sup>213a</sup>

It has been noted above that these same judgments stressed that Article 102 protects ‘as efficient’ competitors, rather than competitors as such; and that they both invoked the idea that dominant undertakings should compete ‘on the merits’. These ideas, together with the insistence that anti-competitive effects should be demonstrated in these cases, are consistent with the position outlined in the Commission’s *Guidance on Article 102 Enforcement Priorities*. It is for these reasons that the authors of this book consider that the trend towards effects analysis under Article 102 is clearly established, both on the part of the Courts and the Commission, and is unlikely to be reversed. It may be that the task of ‘improving’ the application of Article 102 remains ‘work-in-progress’, but the direction of travel seems to be clear and consistent.

## (E) Exploitative, exclusionary and single market abuses

When reviewing the decisional practice of the Commission and the jurisprudence of the EU Courts, it is possible to identify at least two, and perhaps three, types of abuse. The first consists of **exploitative abuses**. The most obvious objection to a monopolist is that it is in a position to reduce output and increase the price of its products above the competitive level, thereby exploiting customers<sup>214</sup>. However in the absence of barriers to entry a monopolist earning monopoly profits would be expected to attract new entrants to the market: in other words exploitation of a monopoly position may in itself increase competition over time.

Of greater long-term significance is behaviour by a dominant firm designed to, or which might have the effect of, preventing the development of competition, and much of the case law of the EU Courts and the decisional practice of the Commission has been concerned with **exclusionary abuses** of this kind. The Commission’s *Guidance on Article 102 Enforcement Priorities* recognises the distinction between exploitative and exclusionary abuses, and paragraph 7 explicitly states that it is limited to exclusionary conduct. Neelie Kroes, the former Commissioner for Competition, said in September 2005 that:

We think that it is sound for our enforcement policy to give priority to so-called exclusionary abuses<sup>215</sup>.

<sup>210</sup> Commission Press Release IP/08/1877, 3 December 2008.

<sup>211</sup> Case C-280/08 P *Deutsche Telekom AG v Commission* [2010] ECR I-000, [2010] 5 CMLR 1495.

<sup>212</sup> Case C-52/09 *Konkurrensverket v TeliaSonera Sverige AB* [2011] ECR I-000, [2011] 4 CMLR 982.

<sup>213</sup> Case C-280/08 P *Deutsche Telekom AG v Commission* [2010] ECR I-000, [2010] 5 CMLR 1495, paras 250–261; Case C-52/09 *Konkurrensverket v TeliaSonera Sverige AB* [2011] ECR I-000, [2011] 4 CMLR 982, paras 60–77.

<sup>213a</sup> *Ibid*, para 64.

<sup>214</sup> See the analysis of price theory in ch 1, ‘The Theory of Competition’, pp 3–7.

<sup>215</sup> SPEECH/05/537, 23 September 2005, available at [www.ec.europa.eu](http://www.ec.europa.eu).

In order to illustrate the kind of behaviour which falls within the mischief of Article 102 it is therefore helpful to consider exploitative and exclusionary abuses separately, although this is not to suggest that there is a rigid demarcation between these two categories: the same behaviour may exhibit both characteristics. For example a dominant firm that refuses to supply may have an exploitative purpose (for example where it is threatened or effected in order to make a customer pay a higher price) and/or an exclusionary one (where it is intended to remove a competitor from the market).

A possible third category of cases under Article 102 is concerned with **single market abuses**. For example excessive pricing, as well as being exploitative, may be a ploy to impede parallel imports and to limit intra-brand competition, as in the case of *British Leyland v Commission*<sup>216</sup>.

## (F) Exploitative abuses

It is clear from its very wording that Article 102 is capable of application to exploitative behaviour: Article 102(2)(a) gives as an example of an abuse the imposition of unfair purchase or selling prices or other unfair trading conditions. Exploitative pricing practices are considered further in chapter 18<sup>217</sup>. There have also been cases on the activities of collecting societies in which their rules have been scrutinised in order to ensure that they do not act in a way that unfairly exploits the owner of the copyright or the would-be licensee of it; collecting societies are considered in chapter 19<sup>218</sup>. Unfair trading conditions were condemned by the Commission in *AAMS*<sup>219</sup> and in *1998 Football World Cup*<sup>220</sup>, where it considered that the arrangements for the sale of tickets were unfair to consumers resident outside France.

In its colloquial sense, exploitation suggests the earning of monopoly profits at the expense of the customer. One of the other ‘benefits’ of the monopolist is the ‘quiet life’ and the freedom from the need to innovate and improve efficiency in order to keep up with or ahead of competitors<sup>221</sup>. This raises the question whether inefficiency or inertia could be considered to be an abuse under Article 102. Article 102(2)(b) gives as an example of abuse the limitation of production, markets or technical development to the prejudice of the consumer, and in *British Telecommunications*<sup>222</sup> the Commission objected to behaviour on BT’s part which, among other things, meant that the possible use of new technology was impeded. This is dealt with in chapter 6<sup>223</sup>.

## (G) Exclusionary abuses

Article 102 has most frequently been applied to behaviour which the Commission and EU Courts consider to be exclusionary. The Commission’s *Guidance on Article 102 Enforcement Priorities* contains useful insights into the considerations that it considers

<sup>216</sup> Case 226/84 [1986] ECR 3263, [1987] 1 CMLR 185; see ‘Abuses that are harmful to the single market’, pp 205–206 below and ch 18, ‘Pricing Practices That are Harmful to the Single Market’, pp 764–766.

<sup>217</sup> See ch 18, ‘Exploitative Pricing Practices’, pp 718–728.

<sup>218</sup> See ch 19, ‘Collecting societies’, pp 803–804.

<sup>219</sup> OJ [1998] L 252/47, [1998] 5 CMLR 786, paras 33–46, upheld on appeal to the General Court Case T-139/98 *Amministrazione Autonoma dei Monopoli di Stato v Commission* [2001] ECR II-3413, [2002] 4 CMLR 302, paras 73–80.

<sup>220</sup> OJ [2000] L 5/55, [2000] 4 CMLR 963, para 91; see also paras 99–100.

<sup>221</sup> See ch 1, ‘The harmful effects of monopoly’, pp 6–7.

<sup>222</sup> OJ [1982] L 360/36, [1983] 1 CMLR 457, upheld on appeal Case 41/83 *Italy v Commission* [1985] ECR 873, [1985] 2 CMLR 368.

<sup>223</sup> Ch 6, ‘Manifest inability to meet demand’, pp 231–232.

to be important when deciding whether to investigate a possible exclusionary abuse; however the reader is reminded that this document does not contain a statement of the law, but rather an indication of the Commission's enforcement priorities.

(i) ***Continental Can v Commission***<sup>224</sup>

The Court of Justice established in *Continental Can v Commission* that Article 102 was capable of application to exclusionary abuses as well as exploitative ones. The specific question before the Court was whether mergers could be prohibited under Article 102. One argument against this was that Article 102 was concerned only with the direct exploitation of consumers and not with the more indirect adverse effects that might be produced by harming the competitive process<sup>225</sup>; according to this argument structural changes in the market could not be caught. The Court of Justice rejected this. It was not possible to draw a distinction between direct and indirect effects on the market; instead it was necessary to interpret Article 102 in the light of the spirit of the Treaty generally. Article 3(3) TEU provides that the EU shall establish an internal market which, as explained in Protocol 27 to the Treaties, includes 'a system ensuring that competition is not distorted'<sup>226</sup>. Articles 101 and 102 had to be interpreted with this aim in mind: it would be futile to prevent agreements which distort competition under Article 101 but then to allow mergers which resulted in the elimination of competition. The adoption in 1989 of the EUMR means that Article 102 is now largely redundant in respect of mergers<sup>227</sup>; however *Continental Can* remains immensely important to the law on Article 102, since it confirmed that it could be applied to exclusionary abuses as well as to exploitative ones.

(ii) **Causation**

One of the arguments raised by *Continental Can* was that, even if mergers were caught by Article 102, it had not *used* its market power to effect the merger in question; thus there was a break in the chain of causation between its position on the market and the behaviour alleged to amount to an abuse. It had not, for example, threatened to drive the target firm out of the market by predatory price cutting if it refused to merge. The Court of Justice rejected this argument as well. It was possible to abuse a dominant position without actually exercising or relying on market power. It was an abuse simply for a dominant firm to strengthen its position and substantially to eliminate competition by taking over a rival. Abuse is an objective concept, and the conduct of an undertaking may be regarded as abusive in the absence of any fault and irrespective of the intention of the dominant undertaking. The scope of Article 102 would obviously be reduced if the Commission could apply it only to practices which were attributable to the exercise of

<sup>224</sup> Case 6/72 *Europemballage Corp'n and Continental Can Co Inc v Commission* [1973] ECR 215, [1973] CMLR 199; the impact of the judgment is discussed in Vogelenzang 'Abuse of a Dominant Position in Article 86: the Problem of Causality and Some Applications' (1976) 13 CML Rev 61.

<sup>225</sup> See eg Joliet *Monopolisation and Abuse of Dominance* (Martinus Nijhoff, 1970); it was also argued in *Continental Can* that mergers were not caught by Article 102 as Article 66(1) of the former ECSC Treaty dealt with them explicitly so that, by inference, the EC Treaty (now TFEU), which was silent on the issue, could not apply to them; and that anyway behaviour could not be abusive unless it was attributable to and caused by the use of the position of dominance (see below).

<sup>226</sup> This objective was previously contained in Article 3(1)(g) of the EC Treaty and, at the time of the *Continental Can* judgment, in Article 3(f) of the EEC Treaty: see ch 2, 'The competition chapter in the TFEU', pp 50–51.

<sup>227</sup> See ch 21 n 127, p 845.

market power that a dominant undertaking enjoys<sup>228</sup>. In *Hoffmann-La Roche* the Court of Justice said that:

The interpretation suggested by the applicant that an abuse implies that the use of the economic power bestowed by a dominant position is the means whereby the abuse has been brought about cannot be accepted<sup>229</sup>.

In *Tetra Pak II*<sup>230</sup> the Court of Justice stated at paragraph 27 of its judgment that ‘application of Article [102] presupposes a link between the dominant position and the alleged abusive conduct’. This may appear to contradict the causation point in *Continental Can*. However, the issue in *Tetra Pak* was whether it is possible for the abuse to take place in a market different from the one in which an undertaking is dominant<sup>231</sup>; the Court was not concerned with the issue of whether the market power had to have been used in order to bring about the abuse.

It is interesting to note in passing that some systems of law – for example Australia and New Zealand – do require a causal connection between the position of dominance and the abusive behaviour: the majority judgment of the UK Privy Council in *Carter Holt Harvey Building Products Group Ltd v The Commerce Commission*<sup>232</sup> contains an interesting discussion of the case law in those two countries. Clearly such an approach will result in fewer findings of abuse; however the *Continental Can* judgment is clear that causation is not required under Article 102. The General Court relied on the judgments of the Court of Justice in *Continental Can* and *Hoffmann-La Roche* in *AstraZeneca AB v Commission*<sup>233</sup>, where it said that ‘an abuse of a dominant position does not necessarily have to consist in the use of the economic power conferred by the dominant position’<sup>234</sup>.

### (iii) Horizontal and vertical foreclosure

The concern about exclusionary abuses is that a dominant firm is able to behave in a way that forecloses competitors in an anti-competitive way<sup>235</sup> from entering the market, or prevents existing competitors from growing within it. The foreclosure might occur ‘upstream’ or ‘downstream’ in the market. Suppose that a firm is vertically integrated: it extracts a raw material, widgets, from its widget mines and processes widgets into widget dioxide: the upstream market is raw widgets, the downstream one is widget dioxide. Harm to competition could occur at either level of the market:

- **horizontal foreclosure**<sup>236</sup> arises where the dominant firm takes action to exclude a competitor that supplies widgets.

<sup>228</sup> See Vogelenzang ‘Abuse of a Dominant Position in Article [102]: the Problem of Causality and Some Applications’ (1976) 13 CML Rev 61; the Commission relied specifically on this aspect of the *Continental Can* judgment in para 46 of its decision in *Tetra Pak I (BTG Licence)* OJ [1988] L 272/27, [1988] 4 CMLR 881.

<sup>229</sup> Case 85/76 [1979] ECR 461, [1979] 3 CMLR 211, at para 91; note the suggestion by Advocate General Reischl at para 7c of his Opinion in *Hoffmann-La Roche* that causation might be treated differently according to the nature of the abuse in question.

<sup>230</sup> Case C-333/94 P *Tetra Pak International v Commission* [1996] ECR I-5951, [1997] 4 CMLR 662.

<sup>231</sup> See ‘Horizontal and vertical foreclosure’, pp 204–205 below. <sup>232</sup> [2004] UKPC 37.

<sup>233</sup> Case T-321/05 [2010] ECR II-000, [2010] 5 CMLR 1585. <sup>234</sup> *Ibid*, para 354.

<sup>235</sup> If a competitor is foreclosed by the superior efficiency of the dominant firm, the foreclosure would not be anti-competitive or abusive.

<sup>236</sup> The language of ‘horizontal’ and ‘vertical’ foreclosure is taken from paras 69–73 of DG COMP’s *Discussion paper on the application of Article [102] of the Treaty to exclusionary abuses*; the Commission’s *Guidance on Article 102 Enforcement Priorities* does not use the same language, while the Commission’s *Guidelines on the assessment of non-horizontal mergers* OJ [2008] C 265/6, paras 30–59, distinguish between ‘customer’ and ‘input’ foreclosure, which are synonymous for horizontal and vertical foreclosure respectively.

Fig. 5.1 Horizontal foreclosure

- **vertical foreclosure** arises where the dominant firm takes action to exclude a competitor in the downstream market for widget dioxide.

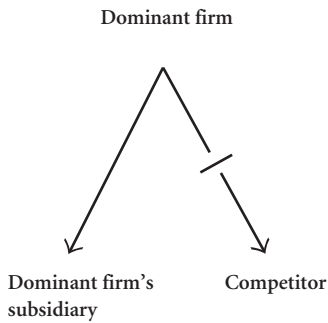

Fig. 5.2 Vertical foreclosure

Many exclusionary abuses are concerned with horizontal foreclosure: for example exclusive purchasing agreements, rebates and predatory pricing. Others however, for example refusal to supply and margin squeezing, are predominantly<sup>237</sup> concerned about harm to competition in the downstream market.

**(iv) The dominant position, the abuse and the effects of the abuse may be in different markets**

It is not necessary for the dominance, the abuse and the effects of the abuse all to be in the same market. In a simple case, X may be dominant in the market for widgets and charge high prices to exploit its customers or drop its prices in order to eliminate competitors from the widget market: clearly Article 102 can apply to this behaviour. However more complex situations may occur. X might be present on both the widget market and the downstream widget dioxide market, and may act on one of those markets in order to derive a benefit in the other: as we have just seen, there may be a horizontal or a vertical foreclosure of the market.

Some examples will illustrate the range of possibilities.

<sup>237</sup> A refusal to supply may sometimes have a horizontal effect: see ch 17, 'Horizontal foreclosure', p 708.

**(A) *Michelin v Commission***<sup>238</sup>

Michelin was dominant in the market for replacement tyres and committed various abuses in order to protect its position in that market.

**(B) *Commercial Solvents***<sup>239</sup>

Commercial Solvents supplied a raw material in which it was dominant to a customer which used it to make an anti-tuberculosis drug. The raw material was the upstream product; the drug was the downstream product. Commercial Solvents decided to produce the drug itself and ceased to supply the customer. Commercial Solvents was found to have abused its dominant position: it refused to supply the raw material in relation to which it was dominant, but this was done to benefit its position in the drug market, where it was not yet present at all.

**(C) *De Poste-La Poste***<sup>240</sup>

The Belgian Post Office, dominant in the market for the delivery of 'normal' letters, abused its dominant position in that market in order to eliminate a competitor in the neighbouring market for business-to-business mail services.

**(D) *Télémarketing***<sup>241</sup>

The dominant undertaking, a broadcasting authority with a statutory monopoly, decided to enter the downstream telemarketing sector. It ceased to supply broadcasting services to the only other telemarketer, thereby eliminating it from the market and effectively reserving the telemarketing business to itself.

**(E) *Sealink/B&I - Holyhead: Interim Measures***<sup>242</sup>

Sealink, which owned and operated the port at Holyhead, was considered to have committed an abuse on the market for the provision of port facilities for passenger and ferry services, in which it was dominant, by structuring the sailing schedules there to the advantage of its own downstream ferry operations and to the disadvantage of its competitor at that level of the market, B&I. The same point can be noted in *Sea Containers v Stena Sealink - Interim Measures*<sup>243</sup>.

**(F) *British Gypsum v Commission***<sup>244</sup>

British Gypsum was dominant in the plasterboard market, but not dominant in the neighbouring plaster market (these markets were horizontally, rather than vertically, related). Among its abuses, British Gypsum gave priority treatment to customers for plaster who remained loyal to it in relation to plasterboard. This differs from the above examples, since in *British Gypsum* the abuse was committed in the non-dominated market in order to protect British Gypsum's position in its dominated market.

<sup>238</sup> Case 322/81 [1983] ECR 3461, [1985] 1 CMLR 282.

<sup>241</sup> Case 311/84 *Centre Belge d'Etudes de Marché Télémarketing v CTL* [1985] ECR 3261, [1986] 2 CMLR 558.

<sup>242</sup> [1992] 5 CMLR 255.

<sup>243</sup> OJ [1994] L 15/8, [1995] 4 CMLR 84.

<sup>244</sup> Case C-310/93 P [1995] ECR I-865, [1997] 4 CMLR 238.

(G) *Tetra Pak II*<sup>245</sup>

The Court of Justice concluded that Tetra Pak had infringed Article 102 by tying practices and predatory pricing in the market for non-aseptic liquid repackaging machinery and non-aseptic cartons. It was not dominant in this market, but the abusive conduct was intended to benefit its position in that market. Tetra Pak was dominant in the (horizontally) associated market for aseptic machinery and cartons. The Court of Justice, after citing *Commercial Solvents*, *Télémarketing* and *British Gypsum*, held that ‘in special circumstances’<sup>246</sup>, there could be an abuse of a dominant position ‘where conduct on a market distinct from the dominated market produces effects on that distinct market’<sup>247</sup>. The Court of Justice then went on to describe the ‘close associative links’ between the aseptic and non-aseptic markets which amounted to sufficiently special circumstances to engage Article 102: for example Tetra Pak had or could have customers in both markets, it could rely on having a favoured status in the non-dominated market because of its position in the dominated one, and it could concentrate its efforts on the non-aseptic market independently of other economic operators because of its position in relation to the aseptic market. This case extends the scope of application of Article 102 beyond, even, *British Gypsum*.

A table may help to explain the propositions set out in this paragraph.

### 5.3 Dominance, abuse and neighbouring markets

Case	Market A	Market B
<i>Michelin v Commission</i>	Dominance Abuse Benefit	
<i>Commercial Solvents</i>	Dominance	Benefit
<i>Télémarketing</i>	Abuse	
<i>De Poste-La Poste</i>		
<i>Sealink decisions</i>		
<i>British Gypsum</i>	Dominance Benefit	Abuse
<i>Tetra Pak v Commission</i>	Dominance	Abuse Benefit

<sup>245</sup> Case C-333/94 P [1996] ECR I-5951, [1997] 4 CMLR 662; the Court of Justice’s approach to the issue of abuse was different from that of the Commission’s in its decision.

<sup>246</sup> Case C-333/94 P [1996] ECR I-5951, [1997] 4 CMLR 662, paras 25–31.

<sup>247</sup> *Ibid*, para 27.

Many of the Commission's decisions under Article 102 in recent years have involved two rather than one markets<sup>248</sup>. Obvious examples are *Deutsche Telekom v Commission*<sup>249</sup>, *Microsoft v Commission*<sup>250</sup> and *Konkurrensverket v TeliaSonera*<sup>251</sup>; in the latter judgment the Court said that Article 102 gives no explicit guidance as to the market in which the abuse takes place: each case must be decided in the light of its specific circumstances<sup>252</sup>. Footnote 39 of the Commission's *Guidance on Article 102 Enforcement Priorities* says that the Commission may pursue predatory practices by dominant firms on markets on which they are not yet dominant.

The Commission could presumably apply the reasoning just described in the context of neighbouring product markets to dominance, abuse and benefits in neighbouring geographical markets<sup>253</sup>.

#### (v) Effects analysis

It was pointed out above that there has been much criticism that the law and practice of Article 102 has been insufficiently aligned with sound economic principles. In recent years there have been several occasions on which the Commission has accepted that, where unilateral behaviour of a dominant firm is in issue, something more than proving the existence of that behaviour is needed to determine whether it is abusive<sup>254</sup>. There is much to be said for condemning alleged exclusionary conduct as abusive only where it can convincingly be demonstrated that there have been or will be adverse effects on the market<sup>255</sup>. Judgments such as *Deutsche Telekom* and *TeliaSonera* endorse this approach.

An important issue to consider is the standard of proof required: if every case were to require the demonstration of anti-competitive effects, to a high standard of proof, the enforcement of Article 102 might become all but impossible, which would bring one back to the problem of false negatives (as opposed to false positives)<sup>256</sup>. The text that follows will consider how the Commission seeks to deploy a realistic effects analysis when deciding which cases to bring under Article 102.

The Commission's *Guidance on Article 102 Enforcement Priorities* explains, at paragraph 19, that the aim of its enforcement activity in relation to exclusionary abuses is to ensure that dominant undertakings do not impair effective competition by foreclosing their competitors in an anti-competitive way: the concern is that such behaviour would have an adverse effect on consumer welfare, whether in the form of higher price levels than would otherwise have prevailed, or in some other form such as limiting the quality of goods or services or reducing consumer choice. 'Anti-competitive foreclosure' differs from 'mere foreclosure', which occurs where the dominant undertaking wins business on the merits as a result of its superior efficiency. Paragraph 20 of the *Guidance* sets out a series of factors which the Commission will take into account when deciding whether to intervene in relation to an alleged exclusionary abuse under Article 102: these factors will enable it to determine whether the conduct in question is likely to lead to an anti-competitive foreclosure

<sup>248</sup> Case T-219/99 *British Airways plc v Commission* [2003] ECR II-5917, [2004] 4 CMLR 1008, paras 127–135.

<sup>249</sup> Case C-280/08 P [2010] ECR I-000, [2010] 5 CMLR 1495.

<sup>250</sup> Case T-201/04 [2007] ECR II-3601, [2007] 5 CMLR 846.

<sup>251</sup> Case C-52/09 [2011] ECR I-000, [2011] 4 CMLR 982.

<sup>252</sup> *Ibid.*, paras 84–89.

<sup>253</sup> See eg *Interbrew* in the Commission's XXVth *Report on Competition Policy* (1996), point 53, where *Interbrew* was considered to have acted in non-dominated geographical markets to protect its dominant position in Belgium.

<sup>254</sup> See 'Recent case law and decisions do require effects analysis', pp 200–201 above.

<sup>255</sup> *Ibid.*

<sup>256</sup> See 'False positives and false negatives', pp 193–194 above.

of the market. The Commission adds that it would want there to be cogent and compelling evidence before it would intervene. The factors include:

- **the position of the dominant undertaking:** in general, the stronger the dominant position, the higher the likelihood that conduct protecting that position leads to anti-competitive foreclosure
- **the conditions on the relevant market:** these include the conditions of entry and expansion, such as the existence of economies of scale and/or scope and network effects
- **the position of the dominant undertaking's competitors:** even a fairly small competitor may play a significant competitive role where it is the closest competitor to the dominant undertaking, is particularly innovative or has the reputation of systematically cutting prices
- **the position of the customers or input suppliers:** this may include the possible selectivity of the conduct in question, for example where the dominant undertaking applies the practice only to selected customers or input suppliers who may be of particular importance for the entry or expansion of competitors, thereby enhancing the likelihood of anti-competitive foreclosure
- **the extent of the allegedly abusive conduct:** in general, the higher the percentage of total sales in the relevant market affected by the conduct, the longer its duration, and the more regularly it has been applied, the greater is the likely anti-competitive foreclosure effect
- **possible evidence of actual foreclosure:** where the conduct in question has already been taking place, there may be actual evidence of the dominant undertaking's market share having increased, or of competitors having exited the market; and
- **direct evidence of any exclusionary strategy:** there may be direct evidence – for example internal documents – of a strategy to exclude competitors, and this may be helpful in interpreting the dominant undertaking's conduct.

Paragraph 21 of the *Guidance* explains that, when pursuing a case, the Commission will develop its analysis, that is to say whether particular conduct is likely to have an anti-competitive foreclosure effect, using the general factors set out in paragraph 20, and the specific factors set out in later sections of the *Guidance*. This is a very important point to note. Later paragraphs of the *Guidance* discuss particular issues that are relevant to the assessment of the likelihood of anti-competitive foreclosure arising from individual practices. These specific points should always be understood within the broader context of the general factors discussed in paragraph 20 of the *Guidance*: they are a complement to, and not a substitute for, that paragraph.

The effects analysis described in the *Guidance* can be expected to have a positive influence on the future application of Article 102 to exclusionary behaviour. One must assume that the Commission will, in practice, apply its *Guidance* when deciding which cases to bring. This will mean that future cases brought by the Commission will concern conduct which it considers to have had, or to be likely to have, a significant anti-competitive foreclosing effect. It remains to be seen whether, over time, the EU Courts will follow the lead suggested by the Commission for a more detailed effects analysis under Article 102. What will also be interesting to observe is the extent to which the *Guidance* in practice has an influence on the decisions reached by national competition authorities and national courts. While they, of course, are bound by the jurisprudence of the EU Courts, it is not impossible to imagine that there might be occasions when, faced with an 'old' judgment lacking in sophisticated economic analysis, and analysis in the Commission's

*Guidance* that seems to be more convincing, the *Guidance* will play some part in the final decision<sup>257</sup>.

#### (vi) Examples of exclusionary abuses

The Commission and the EU Courts have condemned many practices which could have anti-competitive effects. These will be examined in detail in chapters 17 to 19, which will consider in turn the following abuses:

- exclusive dealing agreements<sup>258</sup>
- tying<sup>259</sup>
- refusals to supply<sup>260</sup>
- miscellaneous other non-pricing abuses<sup>261</sup>
- rebates and other practices having effects similar to exclusive dealing agreements<sup>262</sup>
- bundling<sup>263</sup>
- predatory pricing<sup>264</sup>
- margin squeezing<sup>265</sup>
- price discrimination<sup>266</sup>
- refusals to license intellectual property rights or to provide proprietary information<sup>267</sup>.

#### (H) Abuses that are harmful to the single market

As one would expect, abuses that are harmful to the single market are condemned<sup>268</sup>. Examples will be found later in this book of non-pricing<sup>269</sup> and pricing<sup>270</sup> abuses in which this was an obvious concern.

## 9. Defences

The term ‘abuse’ bears great intellectual strain, particularly as there is no equivalent in Article 102 to Article 101(3) whereby an agreement that restricts competition can nevertheless be permitted because it produces economic efficiencies. Over a number of years the Commission and the EU Courts came to recognise that there was some conduct which, although presumptively abusive, in fact did not amount to a violation of Article 102 because

<sup>257</sup> See eg in the UK *Alleged abuse of a dominant position by Flybe Limited* OFT decision of 5 November 2010, OFT 1286 (relying on the *Guidance* in support of its approach to predatory pricing).

<sup>258</sup> Ch 17, ‘Exclusive Dealing Agreements’, pp 682–688. <sup>259</sup> Ch 17, ‘Tying’, pp 688–696.

<sup>260</sup> Ch 17, ‘Refusal to Supply’, pp 697–711.

<sup>261</sup> Ch 17, ‘Miscellaneous Other Non-Pricing Abuses’, pp 712–714.

<sup>262</sup> Ch 18, ‘Rebates That Have Effects Similar to Exclusive Dealing Agreements’, pp 728–737.

<sup>263</sup> Ch 18, ‘Bundling’, pp 737–739. <sup>264</sup> Ch 18, ‘Predatory Pricing’, pp 739–754.

<sup>265</sup> Ch 18, ‘Margin Squeezing’, pp 754–759. <sup>266</sup> Ch 18, ‘Price Discrimination’, pp 759–764.

<sup>267</sup> Ch 19, ‘Article 102 and Intellectual Property Rights’, pp 796–803.

<sup>268</sup> See ch 1, ‘The single market imperative’, pp 23–24 and ch 2, ‘The single market imperative’, p 51.

<sup>269</sup> See ch 17, ‘Non-Pricing Abuses That are Harmful to the Internal Market’, pp 711–712.

<sup>270</sup> See ch 18, ‘Pricing Practices That are Harmful to the Single Market’, pp 764–766.

it had an ‘objective justification’<sup>271</sup>. For example in *Sot. Lélos*<sup>272</sup> the Court of Justice stated that the fact that an undertaking is in a dominant position cannot deprive it of its entitlement to protect its own commercial interests when they are attacked; however the Court added that such behaviour cannot be allowed if its purpose is to strengthen the dominant position and thereby abuse it. In its *Guidance on Article 102 Enforcement Priorities*, from paragraphs 28 to 31, the Commission says that it will take into account claims put forward by a dominant undertaking that its behaviour is objectively necessary or produces substantial efficiencies that outweigh any anti-competitive effects on consumers.

This section will examine what is meant by objective justification; it will briefly consider the question of whether a defence can be based on the principle of non-interference with property rights; and will conclude with a discussion of the burden of proving a defence.

### (A) Objective justification<sup>273</sup>

The language of objective justification can be found in many judgments and decisions, coupled with the proposition that, to be objectively justified, the conduct in question must be proportionate. For example in *Centre Belge d’Etudes de Marché Télémarketing v CLT*<sup>274</sup> the Court of Justice held that an undertaking in a dominant position in television broadcasting which entrusted ‘telemarketing’ to its own subsidiary, thereby excluding other firms from entering this market, would be guilty of an abuse where there was no objective necessity for such behaviour<sup>275</sup>. The principles of objective justification and proportionality have been invoked on other occasions<sup>276</sup> and are firmly part of Article 102 analysis.

At paragraph 29 of the *Guidance on Article 102 Enforcement Priorities* the Commission says that a claim to objective necessity would have to be based on factors external to the dominant undertaking: for example, health or safety considerations. The Commission points out that it is normally the task of the public authorities to set and enforce public health and safety standards: this is based on judgments of the General Court in the *Hilti*<sup>277</sup> and *Tetra Pak II*<sup>278</sup> cases.

At paragraph 30 of the *Guidance* the Commission says that it will also consider arguments to the effect that conduct which apparently forecloses competitors can be defended

<sup>271</sup> For an interesting discussion of the concept of objective justification see the Opinion of Advocate General Jacobs in Case C-53/03 *Syfait* [2005] ECR I-4609, [2005] 5 CMLR 7, paras 71–72.

<sup>275</sup> *Ibid*, para 26; see also Case C-95/04 P *British Airways plc v Commission* [2007] ECR I-2331, [2007] 4 CMLR 982, para 69.

<sup>276</sup> See eg *BBI/Boosey and Hawkes* OJ [1987] L 286/36, [1988] 4 CMLR 67; *BPB Industries plc* OJ [1989] L 10/50, [1990] 4 CMLR 464, para 132, upheld on appeal Case T-65/89 *BPB Industries plc and British Gypsum v Commission* [1993] ECR II-389, [1993] 5 CMLR 32 and further on appeal to the Court of Justice Case C-310/93 P *BPB Industries plc and British Gypsum v Commission* [1995] ECR I-865, [1997] 4 CMLR 238; *Napier Brown – British Sugar* OJ [1988] L 284/41, [1990] 4 CMLR 196, paras 64 and 70; *NDC Health/IMS Health: Interim Measures* OJ [2002] L 59/18, [2002] 4 CMLR 111, paras 167–174; *Portuguese Airports* OJ [1999] L 69/31, [1999] 5 CMLR 103, para 29; *Prokent-Tomra* Commission decision of 29 March 2006, paras 347–390.

<sup>277</sup> Case T-30/89 *Hilti AG v Commission* [1991] ECR II-1439, [1992] 14 CMLR 16, paras 102–119.

<sup>278</sup> Case T-83/91 *Tetra Pak International SA v Commission* [1994] ECR II-755, [1997] 4 CMLR 726, paras 136–140, upheld on appeal to the Court of Justice Case C-333/94 P *Tetra Pak International SA v Commission* [1996] ECR I-5951, [1997] 4 CMLR 662, para 37.

on efficiency grounds. The Commission explains that four cumulative conditions would have to be fulfilled before an efficiency ‘defence’ could succeed:

- the efficiencies would have to be realised, or be likely to be realised, as a result of the conduct in question
- the conduct would have to be indispensable to the realisation of those efficiencies
- the efficiencies would have to outweigh any negative effects on competition and consumer welfare in the affected markets; and
- the conduct must not eliminate all effective competition.

In its decision in *Wanadoo de España v Telefónica*<sup>279</sup> the Commission included a lengthy discussion of possible defences including, from paragraphs 641 to 663, efficiencies, which it rejected on the facts of the case. In the opinion of the authors the Commission’s approach seems reasonable, in that efficiency considerations can be taken into account under Article 101(3)<sup>280</sup> and in EU merger control<sup>281</sup>: it would seem odd if efficiency had no part to play in Article 102 analysis.

## (B) Abuse of dominance and property rights

In a number of cases under Article 102 a particular issue has been the extent to which a dominant undertaking could be held to have acted abusively in relation to the way in which it chose to use, or not to use, its own property. Article 345 TFEU provides that:

The Treaties shall in no way prejudice the rules in Member States governing the system of property ownership.

If it is possible for the Commission, under Article 102, to order the owner, for example, of an essential facility to provide access to it to a third party<sup>282</sup>, this clearly affects that undertaking’s property rights; but has it affected them to the point where the rules on property ownership in Member States have been prejudiced? The issue arose in relation to *Frankfurt Airport*<sup>283</sup> where the Commission required FAG, the owner and operator of that airport, to allow competition in the market for ground-handling services there. The Commission rejected the argument that this would interfere with the property rights of FAG. The Commission noted that the Court of Justice in *Hauer v Land Rheinland Pfalz*<sup>284</sup> had acknowledged the existence of a fundamental right to property in the EU legal order; however it had also noted that the constitutions of the Member States recognised that the exercise of property rights may be restricted in the public interest. In the *Frankfurt Airport* decision the Commission said that it followed from the *Hauer* judgment that the competition rules in the Treaty may be considered to constitute restrictions on the right of property which correspond to objectives of general interest pursued by the EU<sup>285</sup>. In the Commission’s view, allowing the provision of ground-handling services within the airport would not constitute an excessive or intolerable interference

<sup>279</sup> Commission decision of 4 July 2007, on appeal to the General Court Case T-336/07 *Telefónica v Commission*, not yet decided and Case T-398/07 *Spain v Commission*, not yet decided.

<sup>280</sup> See ch 4, ‘First condition of Article 101(3): an improvement in the production or distribution of goods or in technical or economic progress’, pp 155–162.

<sup>281</sup> See ch 21, ‘Efficiencies’, pp 874–876.

<sup>282</sup> See ch 17, ‘Refusal to Supply’, pp 697–708.

<sup>283</sup> *Flughafen Frankfurt* OJ [1998] L 72/30, [1998] 4 CMLR 779.

<sup>284</sup> Case 44/79 [1979] ECR 3727, [1980] 3 CMLR 42, para 17.

<sup>285</sup> OJ [1998] L 72/30, [1998] 4 CMLR 779, para 90.

with FAG's rights as owner of the airport; it would not interfere with FAG's own ability to provide these services, and FAG could charge a reasonable fee to third parties for their right to do so.

In his Opinion in *Masterfoods Ltd v HB Ice Cream Ltd*<sup>286</sup> Advocate General Cosmas had no doubt that:

it is perfectly comprehensible for restrictions to be placed on the right to property ownership pursuant to Articles [101 and 102 TFEU], to the degree to which they might be necessary to protect competition<sup>287</sup>.

In *Van den Bergh Foods Ltd v Commission*<sup>288</sup> the General Court rejected an argument that the Commission's decision in *Van den Bergh Foods Ltd*<sup>289</sup>, requiring that space be made available in Van den Bergh's freezer cabinets for the ice-cream of competitors, amounted to a disproportionate interference with its property rights<sup>290</sup>. In *Microsoft v Commission* the General Court rejected the argument that Microsoft was entitled to refuse to supply interoperability information to competitors because it was protected by intellectual property rights: this would be inconsistent with the rule, derived from the *Magill* and *IMS Health* cases, that, in exceptional circumstances, there can be an obligation to grant licences to third parties<sup>291</sup>.

### (C) Burden of proof

In *Microsoft v Commission*<sup>292</sup> the General Court stated that:

it is for the dominant undertaking concerned, and not for the Commission, before the end of the administrative procedure, to raise any plea of objective justification and to support it with arguments and evidence. It then falls to the Commission, where it proposes to make a finding of an abuse of a dominant position, to show that the arguments and evidence relied on by the undertaking cannot prevail and, accordingly, that the justification cannot be accepted<sup>293</sup>.

The General Court went on to state that it was not sufficient for the dominant undertaking to put forward 'vague, general and theoretical arguments' in support of its objective justification<sup>294</sup>. Paragraph 31 of the Commission's *Guidance on Article 102 Enforcement Priorities* adopts the same approach to the burden of proof.

<sup>286</sup> Case C-344/98 [2000] ECR I-11369, [2001] 4 CMLR 449; see also Case C-163/99 *Portugal v Commission* [2001] ECR I-2613, [2002] 2 CMLR 1319, paras 58–59.

<sup>287</sup> *Ibid*, para 105.

<sup>291</sup> Case T-201/04 [2007] ECR II-3601, [2007] 5 CMLR 846, paras 690–691; see ch 19, '*Microsoft*', pp 800–802.

<sup>292</sup> Case T-201/04 [2007] ECR II-3601, [2007] 5 CMLR 846.

<sup>293</sup> *Ibid*, para 688; the General Court adopted the same approach in Case T-301/04 *Clearstream Banking AG v Commission* [2009] ECR II-3155, [2009] 5 CMLR 2677, para 185.

<sup>294</sup> *Ibid*, para 698; for discussion of proof generally in Article 102 cases see Paulis 'The burden of proof in Article 82 cases' [2006] Fordham Corporate Law Institute (ed Hawk), ch 20; Nazzini 'The wood began to move: an essay on consumer welfare, evidence and burden of proof in Article 82 EC cases' (2006) 31 ELRev 518.

## 10. The Consequences of Infringing Article 102

### (A) Public enforcement<sup>295</sup>

Where the Commission finds an abuse of a dominant position it has power, pursuant to Article 23 of Regulation 1/2003, to impose a fine<sup>296</sup>, and to order the dominant undertaking to cease and desist from the conduct in question<sup>297</sup>; where necessary, it may also order a dominant undertaking to adopt positive measures in order to bring an infringement to an end<sup>298</sup>. It is even possible for the Commission to order the divestiture of an undertaking's assets, or to break an undertaking up, under the powers conferred by Article 7 of the Regulation 1/2003<sup>299</sup>, provided it is proportionate and necessary to bring the infringement to an end and provided that there is no equally effective behavioural remedy or that such a remedy would be more burdensome<sup>300</sup>. The Commission has not, to date, imposed a structural remedy under Article 7, although such remedies have been accepted as legally-binding commitments under Article 9 of that Regulation<sup>301</sup>.

### (B) Private enforcement

The civil law consequences of infringing Article 102 are discussed in chapter 8<sup>302</sup>.

## The obligations of Member States under the EU competition rules

1. Introduction	215	4. Article 37 TFEU – State Monopolies of a Commercial Character	245
2. Article 4(3) TEU – Duty of Sincere Cooperation	216	5. Articles 107 to 109 TFEU – State Aids	246
3. Article 106 TFEU – Compliance with the Treaties	222		

### 1. Introduction

This chapter will examine the obligations of Member States in relation to EU competition law. Specifically it will consider the obligations that Article 4(3) TEU and Articles 37 and 106 TFEU place upon Member States; Articles 107 to 109 TFEU on state aid will be briefly mentioned at the end of the chapter. The expression ‘Member State’ for these purposes includes all organs of the state, of which a national competition authority<sup>1</sup> and an economic regulator<sup>2</sup> would be examples. Article 4(3) imposes a general duty of ‘sincere cooperation’ or ‘loyalty’ on Member States; Article 37 deals specifically with state monopolies of a commercial character; and Article 106 is concerned with measures that are contrary to the Treaty. In *France v Commission*<sup>3</sup> Advocate General Tesouro spoke of the ‘obscure clarity’ of Article 37 as opposed to the ‘clear obscurity’ of Article 106. These provisions are complex and the law has taken a long time to develop: the encroachment of EU law on national monopolies and state activity is inevitably political and contentious.

Article 3(3) TEU provides that the EU shall establish an internal market which, as explained in Protocol 27 to the Treaties, includes ‘a system ensuring that competition is not distorted’<sup>4</sup>. Article 3(3) also provides that one of the EU’s objectives is a highly competitive social market economy. Article 119 TFEU provides that the activities of the Member States and the EU shall be conducted in accordance with the principle of an open market economy with free competition<sup>5</sup>. State involvement in economic activities may work against this goal;

<sup>1</sup> See eg Case C-198/01 *Conorzio Industrie Fiammiferi* [2003] ECR I-8055, [2003] 5 CMLR 829, discussed at ‘*Conorzio Industrie Fiammiferi*’, pp 219–220 below.

<sup>2</sup> See the decision of the National Lottery Commission of 3 March 2011 in which it refused consent to Camelot UK Lotteries Ltd, the operator of the UK Lottery, to provide commercial services such as over-the-counter cash bill payment and mobile phone top-up through its National Lottery terminals as this gave rise to ‘serious concerns’ about a possible infringement of Article 106 in conjunction with Articles 101 and/or 102.

<sup>3</sup> Case C-202/88 [1991] ECR I-1223, [1992] 5 CMLR 552, at para 11 of his Opinion.

<sup>4</sup> This objective was previously contained in Article 3(1)(g) of the EC Treaty: see ch 2, ‘The competition chapter in the TFEU’, pp 50–51.

<sup>5</sup> Note that the Court of Justice stressed the importance of Article 119 TFEU in its judgment in Case C-198/01 *Conorzio Industrie Fiammiferi (CIF)* [2003] ECR I-8055, [2003] 5 CMLR 829, para 47.

however Member States may take offence at too much interference at an EU level in domestic economic and social policy. Articles 101 and 102 are essentially private law provisions, conferring rights and imposing obligations on undertakings; many other Articles in the TFEU are primarily of a public law nature, imposing obligations on Member States. The extent to which Member States and undertakings which enjoy special or exclusive rights are subject to Articles 101 and 102 is an issue that is still being explored by the Commission and the EU Courts.

EU law is neutral on the issue of public ownership of industry in itself. Article 345 TFEU provides that the Treaties ‘shall in no way prejudice the rules in Member States governing the system of property ownership.’ This means that Member States may confer legal monopolies on organs of the state or on undertakings that are not publicly owned, and in cases under Article 106(1) such as *Sacchi*<sup>6</sup>, *ERT v Dimotiki*<sup>7</sup> and *Höfner & Elser v Macrotron GmbH*<sup>8</sup> the Court of Justice has held that the conferment of special or exclusive rights on an undertaking is not, in itself, an infringement of EU law. However there is a tension between this principle and the obligation imposed on Member States by Article 106(1) not to enact nor to maintain in force measures contrary to the competition rules, with the result that property rights are not as inviolable as the wording of Article 345 suggests<sup>9</sup>.

## 2. Article 4(3) TEU – Duty of Sincere Cooperation

Article 4(3) TEU provides that the EU and the Member States shall assist each other in carrying out tasks which flow from the Treaties. Article 4(3) also imposes positive and negative duties on Member States: it requires them to take all appropriate measures to ensure fulfilment of the obligations arising out of the Treaties and to refrain from any measure which could jeopardise the attainment of the EU’s objectives. There have been many cases in which individuals and undertakings have invoked Article 4(3) in proceedings in the criminal and civil courts of Member States, both as plaintiff and defendant, to claim that a particular law of a Member State is unenforceable because of its incompatibility with the competition rules in the Treaty; many of these cases have led to references to the Court of Justice under Article 267 TFEU, and will be discussed in this section of the chapter. The Court has established that the obligation of Member States to disapply national legislation that contravenes EU law attaches not only to national courts but also to administrative bodies, including national competition authorities<sup>10</sup>. Where a Member State is in breach of its obligations under Article 4(3) it would also be possible for the Commission to take action against it, either under Article 258 TFEU, as in the case of *Commission v Italy*<sup>11</sup>, or, where there is an infringement of Article 106(1), under Article 106(3)<sup>12</sup>.

<sup>6</sup> Case 155/73 [1974] ECR 409, [1974] 2 CMLR 177, para 14.

<sup>7</sup> Case C-260/89 [1991] ECR I-2925, [1994] 4 CMLR 540, para 16.

<sup>8</sup> Case C-41/90 [1991] ECR I-1979, [1993] 4 CMLR 306, para 29.

<sup>9</sup> See further ‘Making sense of the case law on Article 102 in conjunction with Article 106(1)’, pp 229–235.

<sup>10</sup> See Case C-198/01 *Conorzio Industrie Fiammiferi (CIF)* [2003] ECR I-8055, [2003] 5 CMLR 829, paras 49–50.

<sup>11</sup> Case C-35/96 [1998] ECR I-3851, [1998] 5 CMLR 889; see ‘Article 106(3)’, pp 242–244 below.

<sup>12</sup> See further ‘Article 106(3)’, pp 242–244.

### (A) The relationship between Article 4(3) TEU and Articles 101 and 102 TFEU

The case law on Article 4(3) is complex, for reasons that are not difficult to understand<sup>13</sup>. It is obvious that measures adopted by Member States may distort competition: they might do so for example by imposing minimum or maximum prices for goods or services; by adopting discriminatory measures of taxation; by imposing regulatory rules that make it difficult for undertakings to enter markets; or by operating restrictive licensing regimes for particular economic activities. Each of these measures might have serious implications for the competitiveness of markets. However the issue that arises in relation to Article 4(3), when read in conjunction with Articles 101 and 102, is the extent to which those measures can be challenged, and be found to be unlawful, under EU law.

Article 4(3) is addressed to Member States; Articles 101 and 102 are directed to undertakings. The conundrum is to decide when a Member State can be held liable for behaviour of undertakings that infringes the competition rules. On the one hand Member States are naturally jealous of their sovereignty, and do not welcome the use of Article 4(3) to undermine national laws, delegated legislation, regulatory regimes and other measures because they happen to have an effect on the competitiveness of markets; a broad use of Article 4(3) would be particularly objectionable given that there are clear legal bases for proceeding against Member States under other parts of the Treaty dealing, for example, with the free movement of goods and services. On the other hand the full effectiveness of Articles 101 and 102 could be seriously undermined if Member States could act as the agent of cartels and dominant undertakings that act abusively by adopting measures that have the same effect on the market as the undertakings would have achieved themselves. The case law of the Court of Justice has sought to achieve a balance and to identify those infringements of Articles 101 and 102 for which Member States must bear responsibility.

### (B) The case law predominantly concerns Article 4(3) TEU in conjunction with Article 101 TFEU

It is noticeable that state measures that raise issues in relation to abusive behaviour under Article 102 usually arise in the context of Article 106(1), which imposes a specific duty on Member States not to enact nor to maintain in force measures in the case of ‘public undertakings and undertakings to which Member States grant special or exclusive rights’ which infringe the Treaty and, specifically, the competition rules<sup>14</sup>. The case law on Article 4(3) therefore has been predominantly concerned with the liability of Member States for infringements of Article 101. Before considering the cases themselves it may be helpful to illustrate the type of problem that arises. Suppose the following:

- in Member State A all lawyers belong to a privately-established bar association and agree to comply with the fees that it recommends for legal services
- in Member State B the state itself fixes legal fees

<sup>13</sup> For interesting discussions of the issues involved see Bacon ‘State Regulation of the Market and EC Competition Rules: Articles 85 and 86 Compared’ (1997) 18 ECLR 283; Ehle ‘State Regulation under the US Antitrust State Action Doctrine and under EC Competition Law: a Comparative Analysis’ (1998) 19 ECLR 380; Neergaard *Competition Competences: The Tensions between European Competition Law and Anti-competitive Measures by the Member States* (DJØF Publishing, 1998); Gagliardi ‘United States and European Union Antitrust Versus State Regulation of the Economy: Is There a Better Test?’ (2000) 25 EL Rev 353; Schepel ‘Delegation of Regulatory Powers to Private Powers under EC Competition Law: Towards a Procedural Public Interest’ (2002) 39 CML Rev 31; on the position in the US in relation to state regulatory measures see *Parker v Brown* 317 US 341 (1943) and Delacourt and Zywicki ‘The FTC and State Action: Evolving Views on the Proper Role of Government’ (2005) 72(3) Antitrust LJ 1075.

<sup>14</sup> See ‘Article 106(1)’, pp 223–235 below.

- in Member State C the bar association is established by law but the association is free to decide whether to recommend fees and, if so, to determine the level of those fees
- in Member State D the state requires the bar association to fix fees but leaves it to determine what they should be
- in Member State E a Government Minister has the power, by order, to decree that all lawyers will comply with a draft tariff of fees prepared by the bar association.

In each of these cases the likely outcome will be that there is little competition in relation to legal fees: the effect is that of a horizontal cartel. However in EU competition law the important question is which, if any, of these situations is unlawful; and, specifically in the case of Article 4(3), whether there is a state measure that violates EU law with the consequence that it is void and unenforceable. These questions will be considered after the case law has been analysed.

### (C) The case law of the Court of Justice on Article 4(3) and the competition rules

#### (i) The *INNO* doctrine

In *INNO v ATAB*<sup>15</sup> the Court, dealing in that case with the taxation of tobacco in Belgium, held that the combined effect of Article 4(3) TEU and Articles 101 and 102 TFEU<sup>16</sup> meant that a Member State could infringe EU law by maintaining in force legislation which could deprive the competition rules of their effectiveness. Subsequent cases have had to search out the implications of this judgment<sup>17</sup>. A challenge to French legislation requiring retailers of books to comply with minimum resale prices imposed by publishers failed since the Court of Justice was not certain that this practice was unlawful under Article 101 anyway<sup>18</sup>; a challenge to fixed minimum prices for petrol also failed, since this was a pure state measure unrelated to any agreement between undertakings<sup>19</sup>. Opposition to a French law forbidding the undercutting of tariffs for air fares approved by the Minister for Civil Aviation and made binding upon all traders also failed since, at the time, there was no implementing regulation for the application of the competition rules to the air transport sector; this meant that there was no mechanism in place for determining whether any agreements satisfied the terms of Article 101(3)<sup>20</sup>. In *BNIC v Clair*<sup>21</sup> a French trade association, BNIC, sued Clair for undercutting minimum prices established by it, but then extended by Ministerial decree to the entire industry. Under French law these ‘extension orders’ became binding on everyone in the industry, and BNIC was given the right to

<sup>15</sup> Case 13/77 [1977] ECR 2115, [1978] 1 CMLR 283.

<sup>16</sup> The Court also referred to Article 3(1)(g) EC but this provision was repealed by the Lisbon Treaty with effect from 1 December 2009; on Article 3(1)(g) and Protocol 27 to the Treaties see ch 2, ‘The competition chapter in the TFEU’, pp 50–51.

<sup>17</sup> The Opinion of AG Maduro in Case C-94/04 *Cipolla* [2006] ECR I-11421, [2007] 4 CMLR 286, paras 31–40 contains a useful review of the case law.

<sup>18</sup> See Case 229/83 *Association des Centres Distributeurs Edouard Leclerc v Au Ble Vert* [1985] ECR 1, [1985] 2 CMLR 286; Case 254/87 *Syndicat des Libraires de Normandie v L’Aigle Distribution SA* [1988] ECR 4457, [1990] 4 CMLR 37.

<sup>19</sup> Case 231/83 *Cullet v Centre Leclerc, Toulouse* [1985] ECR 305, [1985] 2 CMLR 524.

<sup>20</sup> Cases 209/84 etc *Ministère Public v Asjes* [1986] ECR 1425, [1986] 3 CMLR 173, paras 46–69; however the Court continued that, if an adverse finding had been made under Article 104 or 105(2), it would have been contrary to Article 4(3) TEU for France to have reinforced the effects of an unlawful agreement: *ibid*, paras 70–77; on the application of the competition rules to air transport: see ch 23, ‘Air Transport’, pp 974–977.

<sup>21</sup> Case 123/83 [1985] ECR 391, [1985] 2 CMLR 430.

bring an action against anyone selling at less than the fixed price. The Court of Justice, in an Article 267 reference from a French court, held that the involvement of the Minister did not deprive the activities of BNIC of illegality under Article 101(1). This confirmed the Commission's decisions in *BNIA*<sup>22</sup> and *BNIC*<sup>23</sup>; however the Court was not asked in this reference to consider the legality of the French legislation or of the Ministerial order themselves, so that Article 4(3) was not discussed.

## (ii) Successful application of the INNO doctrine

### (A) *BNIC v Yves Aubert*

The *INNO* doctrine was successfully applied in a similar case, *BNIC v Yves Aubert*<sup>24</sup>. There the Court of Justice held that the Minister's extension order, which in this case fixed quotas for wine-growers and permitted fines to be imposed on anyone who exceeded them, was itself unlawful. The order had the effect of strengthening the impact of the prior agreement made within the membership of BNIC and was a breach of France's obligations under the Treaty; it followed that an action brought against Yves Aubert by BNIC for infringement of the extension order failed.

### (B) *Vlaamse Reisbureaus v Sociale Dienst*

In *Vlaamse Reisbureaus v Sociale Dienst*<sup>25</sup> a tour operator in Belgium brought an action against an association of travel agents which was passing on to its customers the commission it received from tour operators. By Belgian law the tour operator was permitted in these circumstances to bring an action for unfair competition against the price-cutter. The defendant raised the incompatibility of this law with Article 101(1). The Court of Justice held that there was a constellation of agreements in the industry between tour operators and agents intended to dampen price competition and which infringed Article 101(1); the Belgian legislation buttressed this anti-competitive system by giving it permanent effect, extending it to non-participating undertakings, and by providing penalties for firms which passed on their commission. Therefore the legislation infringed EU law and the claimant's action for unfair competition should fail.

### (C) *Ahmed Saeed*

In *Ahmed Saeed Flugreisen v Zentrale zur Bekämpfung Unlauteren Wettbewerbs eV*<sup>26</sup> the Court of Justice held that the approval by aeronautical authorities of air tariffs fixed by agreement by airlines involved a breach by Member States of their obligations under Article 4(3) TEU and Articles 101 and 102 TFEU. The material distinction between this case and *Ministère Public v Asjes*<sup>27</sup> was that by the time of the litigation in *Ahmed Saeed* the implementing regulation in the air transport sector had come into effect<sup>28</sup>, so that there was no longer the problem that existed at the time of the earlier case<sup>29</sup>.

### (D) *Conorzio Industrie Fiammiferi*

In *Conorzio Industrie Fiammiferi*<sup>30</sup> the Court of Justice held that the Italian competition authority was required by Article 4(3) TEU to disapply an Italian law of 1923 which regulated

<sup>22</sup> OJ [1976] L 231/24, [1976] 2 CMLR D63.

<sup>23</sup> OJ [1982] L 379/1, [1983] 2 CMLR 240.

<sup>24</sup> Case 136/86 [1987] ECR 4789, [1988] 4 CMLR 331.

<sup>25</sup> Case 311/85 [1987] ECR 3801, [1989] 4 CMLR 213.

<sup>26</sup> Case 66/86 [1989] ECR 803, [1990] 4 CMLR 102.

<sup>27</sup> Cases 229/84 etc [1986] ECR 1425, [1986] 3 CMLR 173.

<sup>28</sup> See ch 6 n 20 above.

<sup>29</sup> See 'The *INNO* doctrine', pp 218–219 above.

<sup>30</sup> Case C-198/01 [2003] ECR I-8055, [2003] 5 CMLR 829; for comment see *Nebbia* (2004) 41 CML Rev 839; *Kaczorowska* 'The Power of a National Competition Authority to Disapply National Law Incompatible

the manufacture and sale of matches in Italy in so far as that law required or facilitated price fixing and market sharing contrary to Article 101; it added that penalties could be imposed on the undertakings involved in the unlawful period, except to the extent that the behaviour in question was required as opposed to merely being permitted by the legislation.

In each of these cases an infringement of Article 4(3) was found where the legislation of a Member State strengthened or encouraged anti-competitive agreements that were already in existence; in *Yves Aubert* and *Ahmed Saeed* the Member States had delegated the power to fix prices to private operators, subsequently reinforcing the effect of their decisions. In *P Van Eycke v ASPA*<sup>31</sup> a claimant, disappointed at the interest rate payable on a deposit of his savings, claimed that the rate had been reduced below his expectations because of tax legislation which contravened Article 101. The Court of Justice held that the *INNO* doctrine was inapplicable as there was no suggestion that the legislation in question encouraged or extended a prior anti-competitive private agreement. In its judgment the Court said that the case law showed that a Member State would be in breach of Article 4(3) TEU in conjunction with Article 101 TFEU if it were:

to require or favour the adoption of agreements, decisions or concerted practices contrary to Article [101] or to reinforce their effects, or to deprive its own legislation of its official character by delegating to private traders responsibility for taking decisions affecting the economic sphere<sup>32</sup>.

This is a formulation that the Court of Justice has repeated on subsequent occasions<sup>33</sup>. A particularly clear application of the doctrine is to be found in *Commission v Italy*<sup>34</sup>, an action brought by the Commission under Article 258 TFEU, challenging – successfully – Italian legislation which required the National Council of Customs Agents to set compulsory tariffs for customs agents. The Court of Justice concluded that the National Council had itself infringed Article 101(1) by adopting the tariff<sup>35</sup>. However it held further that Italy had also infringed the Treaty by requiring the Council to compile a compulsory, uniform tariff<sup>36</sup>; by wholly relinquishing to private economic operators the powers of the public authorities to set tariffs<sup>37</sup>; by prohibiting, in the primary legislation, any derogation from the tariff<sup>38</sup>; and by adopting a Decree having the appearance of approving the tariff by public regulation<sup>39</sup>.

### (iii) No liability where there is no agreement between undertakings

Several challenges to national legislation have failed where the final determination of prices remained with a Member State: Article 4(3) TEU in conjunction with Article 101 is infringed only where a Member State requires, favours or reinforces an anti-competitive agreement or abandons its own price-setting powers and delegates them to private operators. Thus in *Meng*<sup>40</sup> the Court of Justice declined to strike down a German regulation which prohibited

with EC Law – and its Practical Consequences’ (2004) 25 ECLR 591; for discussion of the *CIF* judgment in the UK see Case No 1027/2/3/04 *VIP Communications Ltd (in administration) v OFCOM* [2009] CAT 28, [2010] CompAR 13 paras 20–27.

<sup>31</sup> Case 267/86 [1988] ECR 4769, [1990] 4 CMLR 330. <sup>32</sup> *Ibid*, para 16.

<sup>33</sup> See eg Case C-185/91 *Reiff* [1993] ECR I-5801, [1995] 5 CMLR 145, para 14; Case C-153/93 *Delta Schiffahrts- und Speditionsgesellschaft* [1994] ECR I-2517, [1996] 4 CMLR 21, para 14; Case C-38/97 *Autotrasporti Librandi v Cuttica Spedizioni e Servizi Internazionali* [1998] ECR I-5955, [1998] 5 CMLR 966, para 26.

<sup>34</sup> Case C-35/96 [1998] ECR I-3851, [1998] 5 CMLR 889; the Commission’s decision finding that the National Council itself had infringed Article 101(1), OJ [1993] L 203/27, [1995] 5 CMLR 495, was upheld on appeal by the General Court in Case T-513/93 *CNSD v Commission* [2000] ECR II-1807, [2000] 5 CMLR 614.

<sup>35</sup> [1998] ECR I-3851, [1998] 5 CMLR 889, para 51. <sup>36</sup> *Ibid*, para 56.

<sup>37</sup> *Ibid*, para 57. <sup>38</sup> *Ibid*, para 58. <sup>39</sup> *Ibid*, para 59.

<sup>40</sup> Case C-2/91 [1993] ECR I-5751; note that *Meng* was decided at about the same time as Case C-267/91 *Keck and Mithouard* [1993] ECR I-6097, [1995] 1 CMLR 101, in which the Court of Justice declined to apply

insurance companies from passing on commissions to their customers: unlike the position in *Vlaamse*, where Belgium had acted to reinforce prior agreements between travel agents, there was no agreement in *Meng*<sup>41</sup>; similar conclusions were reached in *Ohra*<sup>42</sup>, *Reiff*<sup>43</sup> and in a number of later judgments<sup>44</sup>. In *Arduino*<sup>45</sup> the Court of Justice held that the involvement of the Italian National Bar Council in the production of a draft tariff for legal fees did not divest the tariff adopted by the Minister of the character of legislation<sup>46</sup>. The insistence that there must be an agreement contrary to Article 101 before a Member State can be found to have infringed Article 4(3) places an obvious limit on the extent to which it is possible to use the *INNO* doctrine to challenge state measures; in particular it is clear that Article 4(3) cannot be used simply because a state measure produces effects similar to those of a cartel. The other requirements for the application of Article 101 TFEU, such as the concepts of undertaking<sup>47</sup> and effect on trade between Member States<sup>48</sup>, also limit the application of the *INNO* doctrine. Furthermore it can apply only where any agreement that is entered into is one that infringes Article 101. This was not the case in *AG2R Prévoyance v Beaudort Père et Fils SARL*<sup>49</sup>: there the agreement was the result of collective bargaining between employers' and employees' organisations within the French traditional bakery and pastry-making sector, a type of agreement that the Court of Justice has held to fall outside Article 101<sup>50</sup>.

#### (D) Application of the case law to lawyers' fees

Having analysed the case law under the *INNO* doctrine we should return briefly to the alternative situations set out above in relation to legal fees<sup>51</sup>:

- in the case of Member State A lawyers agreed to comply with the recommendations of a privately-established bar association: this could clearly amount to an infringement of Article 101(1) TFEU, assuming an appreciable effect on competition and inter-state

Article 34 TFEU to national marketing rules forbidding the use of loss-leaders (selling below cost) in retail outlets: see Reich 'The "November Revolution" of the European Court of Justice: *Keck*, *Meng* and *Audi* Revisited' (1994) 31 CML Rev 459.

<sup>41</sup> Case C-2/91 [1993] ECR I-5751, para 14<sup>2</sup>. Case C-245/91 [1993] ECR I-5851.

<sup>43</sup> Case C-185/91 [1993] ECR 5801, [1995] 5 CMLR 145.

<sup>44</sup> See eg Case C-153/93 *Delta Schiffahrts- und Speditionsgesellschaft* [1994] ECR I-2517, [1996] 4 CMLR 21; Case C-412/93 *Société d'Importation Edouard Leclerc-Siplec v TFI and M6* [1995] ECR I-179, [1995] 3 CMLR 422; Case C-96/94 *Centro Servizi Spediporto v Spedizioni Marittima del Golfo* [1995] ECR I-2883, [1996] 4 CMLR 613; Cases C-140/94 etc *DIP SpA v Comune di Bassano del Grappa* [1995] ECR I-3257, [1996] 4 CMLR 157; Case C-38/97 *Autotrasporti Librandi v Cuttica Spedizioni e Servizi Internazionali* [1998] ECR I-5955, [1998] 5 CMLR 966; Case C-266/96 *Corsica Ferries* [1998] ECR I-3949, [1998] 5 CMLR 402; Case C-446/05 *Ioannis Doulamis* [2008] ECR I-1377, [2008] 5 CMLR 376.

<sup>45</sup> Case C-35/99 [2002] ECR I-1529, [2002] 4 CMLR 866; for discussion of this case see Thunstrom, Carle and Lindeborg 'State Liability Under the EC Treaty Arising from Anti-competitive State Measures' (2002) 25 World Competition 515.

<sup>46</sup> Case C-35/99 [2002] ECR I-1529, [2002] 4 CMLR 866, paras 40–44; see to similar effect Case C-250/03 *Mauri*, order of 17 February 2005 [2005] ECR I-1267, [2005] 4 CMLR 723, paras 31–38; Cases C-94/04 etc *Cipolla* [2006] ECR I-11421, [2007] 4 CMLR 286, paras 48–54; Case C-386/07 *Hospital Consulting Srl & Ors v Estate SpA & Ors*, order of 5 May 2008; Opinion of Advocate General Mengozzi given on 11 November 2010 in Case C-437/09 *AG2R Prévoyance* [2011] ECR I-000, [2011] 4 CMLR 1029, paras 36–47.

<sup>47</sup> See Case C-350/07 *Kattner Stahlbau GmbH v Maschinenbau- und Metall- Berufsgenossenschaft* [2009] ECR I-1513, [2009] 2 CMLR 1339, para 70.

<sup>48</sup> See Case C-393/08 *Emanuela Sbarigia v Azienda USL RM/A* [2010] ECR I-000, para 32.

<sup>49</sup> Case C-437/09 [2011] ECR I-000, CMLR, paras 37–39.

<sup>50</sup> See ch 3, 'Employees and trades unions', pp 90–91 on the *Albany* judgment.

<sup>51</sup> See 'The case law predominantly concerns Article 4(3) TEU in conjunction with Article 101 TFEU', pp 217–218 above.

trade; however there is no involvement on the part of the state, so the application of Article 4(3) TEU does not arise<sup>52</sup>

- in the second situation Member State B itself fixed the fees: however in this case there is no suggestion of an agreement, and so there can be no infringement of Article 101(1); this situation may be suitable for ‘competition advocacy’ by the competition authority of Member State B<sup>53</sup>
- in the third case Member State C established a regulatory mechanism, but left it to the bar association to decide whether to recommend fees and, if so, to determine what their level should be: the association in doing so would be infringing Article 101(1), but it is not clear whether the Member State has acted unlawfully; it has given freedom to the bar association to decide how to act, rather than requiring it to act
- in the case of Member State D, however, it has delegated its regulatory role to the bar association and required it to fix fees, so that it would be held responsible for the price fixing that ensues
- Member State E could be considered to be strengthening the effect of an agreement contrary to Article 101 by issuing a decree compelling compliance with the bar association’s recommendations. However the Court of Justice has held that if the Minister is free to vary the tariff, acting on the advice of other public bodies, there would be no infringement; the decree retains the character of legislation rather than amounting to the encouragement or reinforcement of an agreement<sup>54</sup>.

### 3. Article 106 TFEU – Compliance with the Treaties<sup>55</sup>

Article 106 provides that:

1. In the case of public undertakings and undertakings to which Member States grant special or exclusive rights, Member States shall neither enact nor maintain in force any measure contrary to the rules contained in the Treaties, in particular to those rules provided for in Article 18 and Articles 101 to 109.
2. Undertakings entrusted with the operation of services of general economic interest or having the character of a revenue-producing monopoly shall be subject to the rules contained in the Treaties, in particular to the rules on competition, in so far as the application of such rules does not obstruct the performance, in law or in fact, of the particular tasks assigned to them. The development of trade must not be affected to such an extent as would be contrary to the interests of the Union.
3. The Commission shall ensure the application of the provisions of this Article and shall, where necessary, address appropriate directives or decisions to Member States.

<sup>52</sup> On the application of the competition rules to the professions see ch 3, ‘The professions’, p 90.

<sup>53</sup> On competition advocacy see ch 1, ‘Competition advocacy and public restrictions of competition’, p 25.

<sup>54</sup> Case C-35/99 *Arduino* [2002] ECR I-1529, [2002] 4 CMLR 866; Cases C-94/04 etc *Cipolla* [2006] ECR I-11421, [2007] 4 CMLR 286.

<sup>55</sup> For further reading on Article 106 see Buendia Sierra *Exclusive Rights and State Monopolies under EC Law* (Oxford University Press, 1999): this book contains an extensive bibliography of literature on Article 106 at pp 431–451; Faull and Nikpay *The EC Law of Competition* (Oxford University Press, 2nd ed, 2007), ch 6; Bellamy and Child *European Community Law of Competition* (Oxford University Press, 6th ed, 2008, eds Roth and Rose), paras 11.009–11.028; see also Blum and Logue *State Monopolies under EC Law* (Wiley, 1998); Edwards and Hoskins ‘Article 90: Deregulation and EC Law: Reflections Arising from the XVI FIDE Conference’ (1995) 32 CML Rev 157; Holmes ‘Fixing the Limits of EC Competition Law: State Action and the Accommodation of the Public Services’ (2004) 57 Current Legal Problems 149.

Article 106(1) is a prohibition addressed to Member States themselves; Article 106(2) provides a limited exception for certain undertakings from the application of the competition rules; Article 106(3) provides the Commission with important powers to ensure compliance with the provisions of Article 106. The law of Article 106 is complex and still developing. After a long period when it was little used it has proved to be a formidable provision in the process of liberalising numerous markets in Europe, in particular in ‘utility’ sectors such as telecommunications, energy and post and related services. The Court of Justice has said in *Spain v Commission* that:

[P]aragraph 2 of Article [106 TFEU], read with paragraph (1) thereof, seeks to reconcile the Member States’ interest in using certain undertakings, in particular in the public sector, as an instrument of economic or social policy with the [EU’s] interest in ensuring compliance with the rules on competition and the preservation of the unity of the [internal] market.<sup>56</sup>

### (A) Article 106(1)

Article 106(1) is closely related to Article 4(3): each seeks to ensure effective adherence to the Treaty on the part of Member States. However Article 106 goes beyond Article 4(3) in that it has its own sphere of application and is not limited to compliance with general principles of law. Article 106(1) imposes an obligation on Member States not to enact nor to maintain in force measures ‘*contrary to those rules contained in the Treaties, in particular to those rules provided for in Article 18 and Articles 101 to 109*’. Two important features of Article 106(1) should be noted at the outset. The first is that Article 106(1) is a ‘renvoi’ provision or a ‘reference rule’, that is to say it does not have an independent application but applies only in conjunction with another Article or other Articles of the Treaties. The second point is that Article 106(1) is not limited in its scope only to infringements of the competition rules; although the competition rules (and the rule of non-discrimination in Article 18) are specifically mentioned, measures that infringe, for example, Article 34 on the free movement of goods<sup>57</sup>, Article 45 on the free movement of workers<sup>58</sup>, Article 49 on the freedom of establishment<sup>59</sup> and Article 56 on the free movement of services<sup>60</sup>, could all result in an infringement of Article 106(1). It follows that Article 106(1) did not need to have been placed in the chapter of the Treaty on competition law; however the fact that it is there indicates that the Treaty’s authors were aware of the potential for Member States to distort competition through the legislative and other measures that they adopt. The importance of Article 106(1) in relation to the competition rules is that, in certain circumstances, a Member State can be liable for the abuses that have been, or would be, carried out by undertakings.

#### (i) Undertakings

Article 106(1) applies to measures concerning ‘public undertakings and undertakings to which Member States grant special or exclusive rights’. The term ‘undertaking’ has been considered in the context of Articles 101 and 102 in earlier chapters<sup>61</sup>. In particular it

<sup>56</sup> Case C-463/00 [2003] ECR I-4581, [2003] 2 CMLR 557, para 82.

<sup>57</sup> See eg Case C-18/88 *RTT* [1991] ECR I-5941.

<sup>58</sup> See eg Case C-179/90 *Merci* [1991] ECR I-5889, [1994] 4 CMLR 422.

<sup>59</sup> See eg *Greek Insurance* OJ [1985] L 152/25.

<sup>60</sup> See eg Case C-260/89 *ERT v Dimotiki* [1991] ECR I-2925, [1994] 4 CMLR 540.

<sup>61</sup> See ch 3, ‘Undertaking and Associations of Undertakings’, pp 83–99 and ch 5, ‘Undertakings’, pp 177–178.

should be noted that state-owned bodies can be acting as undertakings, but that organs of the state that are not involved in any economic activity fall outside the definition<sup>62</sup>.

(ii) **Public undertakings**<sup>63</sup>

The term ‘public undertaking’ appears only in Article 106(1) TFEU, and is not defined. There is no uniform notion of this expression among the Member States, and state intervention in and control of economic behaviour takes many different forms. For this reason Advocate General Reischl has stated that the term must be a concept of EU law which should be given a uniform interpretation for all Member States<sup>64</sup>. In Article 2(1)(b) of the Transparency Directive<sup>65</sup> the Commission said that a public undertaking means:

any undertaking over which the public authorities may exercise, directly or indirectly, a dominant influence by virtue of their ownership of it, their financial participation therein, or the rules which govern it.

On appeal the Court of Justice upheld the legality of the Directive and approved the above definition, without elaborating further<sup>66</sup>. The crucial question in each case should be whether the state does have such influence, not the legal form of the undertaking in question.

(iii) **Undertakings with ‘special or exclusive rights’**

Article 106(1) applies to measures in the case both of public undertakings and of undertakings having ‘special or exclusive rights’: sometimes the latter are referred to as ‘privileged undertakings’ to distinguish them from public undertakings. It is important to understand what each of the expressions ‘special’ and ‘exclusive’ means. The Treaty does not define them, but definitions can be found in Article 2(f) and (g) of the Transparency Directive<sup>67</sup>. Often special or exclusive rights will have been given to a public undertaking, in which case it is unnecessary to give separate consideration to this head of Article 106(1); however many undertakings may have exclusive or special rights without being ‘public’. In *FIFA v Commission*<sup>68</sup> FIFA failed to persuade the General Court that the Secretary of State for Culture, Media and Sport had conferred exclusive or special rights on the BBC and ITV, two free-to-air television stations, by placing World Cup football matches on a list that they would then be able to broadcast on a non-exclusive basis. FIFA’s complaint was that this led to a distortion of competition in which pay-TV companies could not bid for the very valuable right to show such games on an exclusive basis. The Court observed that the pay-TV companies could still broadcast on a non-exclusive basis<sup>69</sup>.

(A) **Exclusive rights**<sup>70</sup>

A company established by insurance undertakings to perform a specific statutory task<sup>71</sup>, an agricultural marketing board<sup>72</sup>, an entity granted a monopoly over the provision of recruitment services<sup>73</sup>, a dock-work undertaking entrusted with the exclusive right to

<sup>62</sup> See in particular ch 3, ‘Regardless of the legal status of the entity and the way in which it is financed’, pp 85–88.

<sup>72</sup> Case 83/78 *Pigs Marketing Board v Redmond* [1978] ECR 2347, [1979] 1 CMLR 177.

<sup>73</sup> Case C-41/90 *Höfner & Elser v Macrotron GmbH* [1991] ECR I-1979, [1993] 4 CMLR 306, para 34.

organise dock work for third parties<sup>74</sup>, a limited partnership between a Member State, a district authority and eight industrial undertakings responsible for waste management<sup>75</sup> and a state-owned post office granted a monopoly over postal services which do not form part of a universal service obligation<sup>76</sup> are examples of bodies that were considered to have been granted exclusive rights. It would appear that an ‘exclusive’ right can be granted to more than one undertaking: in *Entreprenørforeningens Affalds v Københavns Kommune*<sup>77</sup> the Court of Justice held that three undertakings authorised to receive building waste in Copenhagen had been granted an exclusive right, but it did not explain why these rights were exclusive rather than special, which would have been a more natural finding.

In principle it seems appropriate that a functional rather than a formalistic approach should be taken to the meaning of ‘exclusive rights’. Rights may be exclusive in substance, even though they are not described as such (or as monopolies) in the measure in question. For example in *La Crespelle*<sup>78</sup> the Court of Justice concluded that a scheme for the artificial insemination of cattle in France involved exclusive rights because of the way the national legislation was operated in practice<sup>79</sup>. Furthermore the exclusive rights may derive from a series of different legislative and administrative measures rather than just one<sup>80</sup>. On the other hand the Court has held that the mere fact that a body exercises powers conferred upon it by the state and that it has a dominant position in the market is not sufficient in itself to establish that it has exclusive rights<sup>81</sup>. This is consistent with an early Commission decision that a copyright collecting society that could derive benefits from national copyright legislation did not have exclusive rights where there was no impediment to other such societies claiming the same benefit<sup>82</sup>; nevertheless the Commission did conclude that the society in question had a dominant position for the purpose of Article 102. The concepts of ‘exclusive rights’ and ‘dominant position’ are independent of one another.

### (B) *Special rights*<sup>83</sup>

The Court of Justice’s judgment in *France v Commission*<sup>84</sup> indicates that there is a distinction between exclusive and special rights. The Court held that the provisions in the Commission’s Directive on Telecommunications Equipment<sup>85</sup> were void in so far as they required Member States to remove special rights from national telecommunications services providers, since it had failed to specify which rights were special or why they were incompatible with the Treaty. In the subsequent Directive on Telecommunications

<sup>75</sup> Case C-203/96 *Dusseldorp* [1998] ECR I-4075, [1998] 3 CMLR 873, para 58.

<sup>76</sup> Case C-340/99 *TNT Traco SpA v Poste Italiane SpA* [2001] ECR I-4109, [2003] 4 CMLR 663.

<sup>77</sup> Case C-209/98 [2000] ECR I-3743, [2001] 2 CMLR 936.

<sup>78</sup> Case C-323/93 [1994] ECR I-5077.

<sup>79</sup> Although the Court of Justice did not address the point directly, the Opinion of Advocate General Gulmann indicates that the parties agreed that exclusive rights existed.

<sup>80</sup> See *Exclusive Rights to Broadcast Television Advertising in Flanders* OJ [1997] L 244/18, [1997] 5 CMLR 718, paras 1 and 2, upheld on appeal Case T-266/97 *Vlaamse Televisie Maatschappij NV v Commission* [1999] ECR II-2329, [2000] 4 CMLR 1171.

<sup>81</sup> Case C-387/93 *Banchemo* [1995] ECR I-4663.

<sup>82</sup> *GEMA* OJ [1971] L 134/15, [1971] CMLR D35.

<sup>83</sup> On the concept of special rights see *Buendia Sierra* (ch 6 n 55, p 222 above), paras 2.01–2.22.

<sup>84</sup> Case C-202/88 [1991] ECR I-1223, [1992] 5 CMLR 552, paras 31–47; see similarly Cases C-271/90 etc *Spain v Commission* [1992] ECR I-5833, paras 32 and 34.

<sup>85</sup> Commission Directive 88/301/EEC, OJ [1988] L 131/73, [1991] 4 CMLR 922.

Liberalisation<sup>86</sup> the Commission states at Article 1(4) that, in the telecommunications sector, special rights include:

rights that are granted by a Member State to a limited number of undertakings, through any legislative, regulatory or administrative instrument which, within a given geographical area, limits to two or more the number of undertakings, otherwise than according to objective, proportional and non-discriminatory criteria<sup>87</sup>.

This definition can presumably be carried over to other sectors of the economy, unless there is specific legislation containing a different one. In *Second Operator of GSM Radiotelephony Services in Italy*<sup>88</sup> the Commission decided that the grant to Telecom Italia of the right to operate a GSM radiotelephony network qualified as a special right, since the operator had been designated otherwise than according to objective and non-discriminatory criteria. In *French savings accounts* the Commission concluded that the grant to three banks of the right to distribute tax-free savings products was a special right<sup>89</sup>. In *MOTOE* the power of the Greek Motorcycling Federation, ELPA, to authorise motorcycling events was held to be a special right within the meaning of Article 106(1)<sup>90</sup>.

#### (iv) 'Measures'

For a Member State to be in breach of Article 106(1) it must have adopted a 'measure'. This expression has been given a wide meaning by the Commission, and its approach has been endorsed by the Court of Justice. In an early Directive under Article 34<sup>91</sup> the Commission said that measures in that Article included 'laws, regulations, administrative provisions, administrative practices, and all instruments issued from a public authority, including recommendations'; there is no reason to suppose that the expression should have a different meaning under Article 106(1). In another case under Article 34, *Commission v Ireland*<sup>92</sup>, the Court of Justice said that a measure did not have to be legally binding, provided that it might be capable of exerting an influence and of frustrating the aims of the Union<sup>93</sup>. The measure does not have to have been adopted by central government or by a national Parliament: a measure of any body that is a manifestation of the state could fall within Article 106(1), such as the local communes in *Corinne Bodson v Pompes Funèbres*<sup>94</sup>.

Numerous examples can be given to support the view that the expression 'measures' has a wide meaning under Article 106(1): for example in *Second Operator of GSM Radiotelephony in Italy*<sup>95</sup> and *Second Operator of GSM Radiotelephony in Spain*<sup>96</sup> the grant of a second mobile licence subject to a substantial licence fee which had not been levied on the incumbent operator amounted to a measure; in *Port of Rødby*<sup>97</sup> the refusal to grant a

<sup>86</sup> Commission Directive 2008/63/EC, OJ [2008] L 162/20; for discussion of this definition see the Opinion of Advocate General Jacobs in Case C-475/99 *Ambulanz Glöckner v Landkreis Südwestpfalz* [2001] ECR I-8089, [2002] 4 CMLR 726, paras 83–89.

<sup>90</sup> Case C-49/07 *Motosykletistiki Omospondia Ellados NPID (MOTOE) v Elliniko Dimosio* [2008] ECR I-4863, [2008] 5 CMLR 790, para 43.

<sup>91</sup> Commission Directive 70/50/EEC based on the provisions of Article 33(7) on the abolition of measures which have an effect equivalent to quantitative restrictions on imports and are not covered by other provisions adopted in pursuance of the EEC Treaty, JO [1970] L 13/29.

<sup>92</sup> Case 249/81 [1982] ECR 4005 (the 'Buy Irish' case).

<sup>93</sup> *Ibid*, para 28.

<sup>94</sup> Case 30/87 [1988] ECR 2479, [1989] 4 CMLR 984.

<sup>95</sup> OJ [1995] L 280/49.

<sup>96</sup> OJ [1997] L 76/19.

<sup>97</sup> OJ [1994] L 55/52.

ferry company access to a state-run Danish port was a measure; and in *Brussels National Airport (Zaventem)*<sup>98</sup>, *Portuguese Airports*<sup>99</sup> and *Spanish Airports*<sup>100</sup> systems of stepped landing fee discounts at various national airports were measures.

In each of the above cases the Member State had adopted specific measures which affected the conduct of the public undertaking or the undertaking given special or exclusive rights. In some cases a public authority enters into an agreement with an undertaking granting the latter an exclusive right to perform a particular task: for example to provide funeral services<sup>101</sup>. The question here is whether this amounts to a measure granting exclusive rights, in which case Article 106(1) may apply, or an agreement between undertakings that restricts competition, in which case Article 101(1) may apply. In *Bodson* the Court of Justice considered that Article 101(1) would not be applicable where a local authority was acting pursuant to its public law powers, since it would not be acting as an undertaking<sup>102</sup>.

#### (v) The obligations on Member States under Article 106(1)

Article 106(1) requires Member States to refrain from enacting or maintaining in force any measure contrary to the Treaties, and in particular one which would contravene Article 18, Article 101 or Article 102. The relationship of Article 106(1) with Articles 101 and 102 is one of the most difficult areas of competition law. Articles 101 and 102 are addressed to undertakings, but Article 106 to Member States: as in the case of Article 4(3)<sup>103</sup> the conceptual issue is to determine how, and in what circumstances, these provisions can operate in such a way as to lead to an infringement of the Treaties by a Member State. As has been seen, under Article 4(3) TEU the liability of Member States in relation to Article 101 is quite limited; however the jurisprudence of the Court of Justice has been more dramatic in cases dealing with Article 106(1) in conjunction with Article 102. For many years this issue was barely addressed at all; however the position began to change as a result of a remarkable series of cases in 1991 in which the Court of Justice delivered four judgments on the relationship between Article 106(1) and other Treaty Articles, including in particular Article 102. A further landmark judgment, in the *Corbeau* case, followed in 1993<sup>104</sup>.

#### (vi) The judgments of 1991

##### (A) *Höfner & Elser v Macrotron*

In April 1991 the Court of Justice held in *Höfner & Elser v Macrotron GmbH*<sup>105</sup> that a Member State which had conferred exclusive rights on a public employment agency could be in breach of Article 106(1) where the exercise by that agency of its rights would inevitably involve an infringement of Article 102. In Germany the Federal Employment Office ('the FEO') had a legal monopoly as an intermediary in the employment market, though in practice it was unable to satisfy demand and tolerated 'head-hunting' agencies which, strictly, were acting illegally. An agency seeking payment of its fee for having successfully recruited on behalf of a client was met with the defence that, as the agency was acting

<sup>98</sup> OJ [1995] L 216/8, [1996] 4 CMLR 232.

<sup>99</sup> OJ [1999] L 69/31, [1999] 5 CMLR 103, upheld on appeal Case C-163/99 *Portugal v Commission* [2001] ECR I-2613, [2002] 2 CMLR 1319.

<sup>100</sup> OJ [2000] L 208/36, [2000] 5 CMLR 967.

<sup>101</sup> Case 30/87 *Corinne Bodson v Pompes Funèbres* [1988] ECR 2479, [1989] 4 CMLR 984.

<sup>102</sup> See ch 3, 'Activities connected with the exercise of the powers of a public authority are not economic', p 89.

<sup>103</sup> See 'Article 4(3) TEU – duty of sincere cooperation', pp 216–222 above.

<sup>104</sup> Case C-320/91 [1993] ECR I-2533, [1995] 4 CMLR 621.

<sup>105</sup> Case C-41/90 [1991] ECR I-1979, [1993] 4 CMLR 306.

unlawfully, it could not enforce the contract; thus the alleged infringement by Germany of EU law was raised as a defence to a contract action between two private undertakings. The matter was referred to the Court of Justice pursuant to Article 267. The Court held that the fact that Germany had granted a legal monopoly to the FEO did not in itself entail a breach of Articles 102 and 106(1)<sup>106</sup>; however there would be a breach if the mere exercise of its right would inevitably lead to an abuse under Article 102. This could be the case if the undertaking was manifestly unable to satisfy demand, as was the case here by the admission of the FEO, and if the legal monopoly prevented a competitor from trying to satisfy that demand<sup>107</sup>.

**(B) *ERT v Dimotiki***

In June 1991 the Court of Justice considered in *ERT v Dimotiki*<sup>108</sup> the compatibility with the Treaty of the Greek television and radio station's monopoly over broadcasting. The Court held that the existence of the monopoly in itself was not contrary to the Treaty, but that the manner in which it was exercised could be so<sup>109</sup>. Specifically on Article 102 the Court of Justice held that, if a Member State which had granted the exclusive right to transmit television broadcasts then granted the same undertaking the right to retransmit broadcasts, it would infringe Article 106(1) if this created a situation in which the broadcaster would be led to infringe Article 102 by virtue of a discriminatory policy which favours its own broadcasts. In contrast to *Höfner* there do not appear to have been any national rules that obliged ERT to pursue a discriminatory broadcasting policy; it was sufficient that the exclusive rights bestowed on ERT placed it in a position where it might practise discrimination.

**(C) *Merci Convenzionali Porto di Genova v Siderurgica Gabrielli***

In December 1991 the Court of Justice gave its judgment in *Merci Convenzionali Porto di Genova v Siderurgica Gabrielli*<sup>110</sup>. *Merci* was a private undertaking given an exclusive concession for the handling of loading operations in the harbour of Genoa. As a result of a strike at *Merci*, *Siderurgica* was unable to unload goods imported in a ship from Germany. *Siderurgica* sued for damages. The Court stated that the simple fact of creating a dominant position by granting exclusive rights is not as such incompatible with Article 106(1)<sup>111</sup>; however the Court repeated the ideas in *Höfner* and *ERT* that there could be an infringement by a Member State if the undertaking in question, merely by exercising the exclusive rights granted to it, cannot avoid abusing its dominant position (*Höfner*), or when such rights are liable to create a situation in which that undertaking is induced to commit such abuses (*ERT*)<sup>112</sup>. In this case the Court observed that *Merci* appeared to have been induced to demand payment for services which had not been requested, to charge disproportionate prices, to refuse to have recourse to modern technology and to treat customers in a discriminatory manner: matters which are specifically mentioned as possible abuses in Article 102(2)(a), (b) and (c)<sup>113</sup>.

**(D) *RTT v GB-Inno-BM***

The Court of Justice delivered a further judgment in December 1991, three days after the judgment in *Merci*, in *RTT v GB-Inno-BM*<sup>114</sup>. *RTT* had exclusive rights in Belgium

<sup>106</sup> *Ibid*, para 29.

<sup>107</sup> *Ibid*, paras 30–31.

<sup>109</sup> *Ibid*, paras 12 and 32.

<sup>110</sup> Case C-179/90 [1991] ECR I-5889, [1994] 4 CMLR 422; see Gyselen (1992) 29 CML Rev 1229.

<sup>111</sup> [1991] ECR I-5889, [1994] 4 CMLR 422, para 16.

<sup>112</sup> *Ibid*, para 17.

<sup>113</sup> *Ibid*, paras 18 and 19.

<sup>114</sup> Case C-18/88 [1991] ECR I-5941; see Gyselen, ch 6 n 110 above.

for the operation of telephone services and for the approval of telecommunications terminal equipment such as telephones; it was also a supplier of telephones itself. GB-Inno sold telephones in Belgium which had been imported from the Far East. RTT asked for an injunction to prevent such sales, since this encouraged people to connect equipment which had not been approved according to Belgian law. The Court referred to earlier case law, that an abuse is committed where an undertaking holding a dominant position on a particular market reserves to itself an ancillary activity which might be carried out by another undertaking as part of its activities on a neighbouring but separate market, with the possibility of eliminating all competition from such an undertaking<sup>115</sup>. The Court went on to say that, where a state measure brings about such a reservation of an ancillary activity, the measure in question infringes Article 106(1)<sup>116</sup>. RTT argued that there would be an infringement of Article 106(1) only where the Member State favoured an abuse, for example by acting in a discriminatory manner<sup>117</sup>, but the Court rejected this, stating that the extension of RTT's monopoly was itself a state measure contrary to Article 106(1)<sup>118</sup>. The establishment of a regulatory system which gave RTT the power to determine at will which telephone equipment could be connected to the public telephone network, thereby placing itself at an obvious advantage over its competitors, was unlawful<sup>119</sup>.

#### (vii) The *Corbeau* judgment

A further judgment of great significance was *Corbeau* in 1993<sup>120</sup>. Criminal proceedings had been brought against Corbeau, a businessman from Liège, for infringing the Belgian legal monopoly for postal services. Corbeau was operating a door-to-door express delivery service in the Liège area: he was not conducting the service of delivering letters on a daily-delivery basis. The Court of Justice, after referring to the requirement in Article 106(1) not to enact nor to maintain in force measures contrary to the competition rules<sup>121</sup>, spent the rest of its judgment considering, under Article 106(2), whether the breadth of the monopoly given to the Belgian Post Office was greater than was necessary to enable it to carry out the task of general economic interest entrusted to it<sup>122</sup>. The significance of the judgment for Article 106(1) was that the Court of Justice, in effect, was ruling that the breadth of the monopoly granted to the Belgian Post Office was, to the extent that it could not be justified under Article 106(2), unlawful under the Treaty. In other words the Court was challenging the exclusive rights themselves, despite its numerous statements that the creation of dominance is not in itself incompatible with the Treaty.

#### (viii) Making sense of the case law on Article 102 in conjunction with Article 106(1)

The difficulty with these cases, and with the Court of Justice's subsequent judgments<sup>123</sup>, is to determine the circumstances in which a Member State can be liable under Article 106(1)

<sup>115</sup> *Ibid*, para 18, referring to Case 311/84 *CBEM* (the *Télémarketing* judgment) [1985] ECR 3261, [1986] 2 CMLR 558.

<sup>116</sup> *Ibid*, para 21.

<sup>117</sup> *Ibid*, para 22.

<sup>118</sup> *Ibid*, para 23.

<sup>119</sup> In reaching this finding the Court of Justice relied on another of its judgments in 1991, the *Telecommunications Directive* case, ch 6 n 84, p 225 above, at para 51.

<sup>120</sup> Case C-320/91 [1993] ECR I-2533, [1995] 4 CMLR 621; see Hancher (1994) 31 CML Rev 105.

<sup>121</sup> [1993] ECR I-2533, [1995] 4 CMLR 621, para 12.

<sup>122</sup> For discussion of Article 106(2), and of the *Corbeau* judgment on this issue, see 'Article 106(2)', pp 235–241 below.

<sup>123</sup> There have been several subsequent judgments on the relationship between Article 102 and Article 106(1): see in particular Case C-393/92 *Almelo* [1994] ECR I-1477; Case C-18/93 *Corsica Ferries Italia srl v Corpo del Piloti del Porto de Genoa* [1994] ECR I-1783; Case C-323/93 *Centre d'Insémination de la Crespelle v Coopérative de la Mayenne* [1994] ECR I-5077; Case C-111/94 *Job Centre (I)* [1995] ECR I-3361; Case C-242/95 *GT-Link*

for an infringement of Article 102. Two points can be made at the outset. First, as Advocate General Jacobs explained at paragraph 388 of his Opinion in *Albany*<sup>124</sup>, a Member State cannot be held responsible for independent anti-competitive behaviour on the part of an undertaking simply because it takes place within its jurisdiction. Article 106(1) can be infringed 'only where there is a causal link between a Member State's legislative or administrative intervention on the one hand and anti-competitive behaviour of undertakings on the other hand'. Secondly, the mere creation of a dominant position by the grant of exclusive rights does not infringe Article 106(1); this has been stressed by the Court of Justice on many occasions<sup>125</sup>: the point is exemplified by the judgment in *Crespelle*<sup>126</sup>, where the Court concluded that French legislation conferring legal monopolies on insemination centres for the provision of certain services to cattle breeders did not lead to an abuse for which France was responsible.

Helpful though these two points are, they do not shed any light on the circumstances in which a Member State will be found to have infringed Article 106(1) as a result of an abuse that infringes Article 102. Furthermore, the frequently-repeated statement that the mere creation (or reinforcement) of dominance does not in itself infringe Article 106(1) does not sit easily with judgments such as *ERT*, *RTT* and *Corbeau* which do seem, in effect, to have concluded that the monopoly rights in question were incompatible with the Treaty. The judgments of the Court of Justice on the necessary causal link between the measure under Article 106(1) and the abuse under Article 102 are neither clear nor consistent: in *Höfner* the Court considered that a measure would be unlawful where it led to an 'inevitable' abuse; in *ERT* if it would induce an infringement; in *Banchemo*<sup>127</sup> the Court of Justice considered that there would be an infringement only if the Member State created a situation in which the undertaking in question 'cannot avoid abusing its dominant position'<sup>128</sup>. In *Dusseldorp*<sup>129</sup> the Court was much less guarded: a Member State infringes Article 106(1) in conjunction with Article 102 'if it adopts any law, regulation or administrative provision which enables an undertaking on which it has conferred rights to abuse its dominant position'<sup>130</sup>. Some formulations of the necessary causal link impose quite a high threshold before a Member State will be found liable; others, such as the one in *Dusseldorp*, suggest a lower threshold. What seems clear is that the causal link must

*A/S v De Danske Statsbaner* [1997] ECR I-4349, [1997] 5 CMLR 601; Case C-387/93 *Banchemo* [1995] ECR I-4663; Case C-55/96 *Job Centre (II)* [1997] ECR I-7119, [1998] 4 CMLR 708; Case C-70/95 *Sodemare v Regione Lombardia* [1997] ECR I-3395, [1998] 4 CMLR 667; Case C-163/96 *Silvano Raso* [1998] ECR I-533, [1998] 4 CMLR 737; Case C-266/96 *Corsica Ferries France SA v Gruppo Antichi Ormeggianti del Porto di Genova* [1998] ECR I-3949, [1998] 5 CMLR 402; Case C-203/96 *Dusseldorp* [1998] ECR I-4075, [1998] 3 CMLR 873; Cases C-67/96 etc *Albany International BV v SBT* [1999] ECR I-5751, [2000] 4 CMLR 446; Cases C-147/97 and C-148/97 *Deutsche Post AG v GZS* [2000] ECR I-825, [2000] 4 CMLR 838; Case C-258/98 *Giovanni Carra* [2000] ECR I-4217, [2002] 4 CMLR 285; Case C-209/98 *Entreprenorforeningens Affalds/Miljøsektion v Københavns Kommune* [2000] ECR I-3743, [2001] 2 CMLR 936, on which see van Calster 'Exclusive Rights Ruling No Safe Harbour for Export Restrictions' (2001) 26 CML Rev 502; Case C-340/99 *TNT Traco SpA v Poste Italiane SpA* [2001] ECR I-4109, [2003] 4 CMLR 663; Case C-475/99 *Ambulanz Glöckner v Landkreis Südwestpfalz* [2001] ECR I-8089, [2002] 4 CMLR 726; Case C-49/07 *Motosykletistiki Omospondia Ellados NPID (MOTOE) v Elliniko Dimosio* [2008] ECR I-4863, [2008] 5 CMLR 790.

be stronger in some kinds of cases than others, depending on how likely it is that abusive behaviour will follow from the measure in question.

Many attempts have been made to make sense of the cases, in particular by identifying specific categories<sup>131</sup>; this is a natural response to the case law, but it is noticeable that different commentators have devised different categories, or have assigned the cases differently. This is not surprising: the cases can be explained in different, and sometimes in overlapping, ways, and the jurisprudence is still evolving. As Advocate General Fennelly stated in his Opinion in *Silvano Raso*<sup>132</sup>:

I do not think that any general test can be enunciated for determining in advance the existence of such a [causal] link. Instead, in each individual case, it will be necessary to assess the impact of impugned national rules in the economic and factual circumstances in which they operate<sup>133</sup>.

The text that follows attempts a categorisation, but must be read subject to the caveat that it is simply one way, among several others, of trying to make sense of the jurisprudence of the Court of Justice and the decisional practice of the Commission.

### (A) *Manifest inability to meet demand*

In *Höfner & Elser v Macrotron GmbH*<sup>134</sup> the Court of Justice held that there would be an infringement of Article 106(1) where Germany had created a situation in which the FEO was ‘manifestly not in a position to satisfy demand’ for recruitment services, and its legal monopoly prevented a competitor from satisfying that demand. The idea that inability to meet demand can be abusive can be traced back to Article 102(2)(b), which gives as an example of abuse ‘limiting production, markets or technical development to the prejudice of consumers’. On similar facts to *Höfner*, in *Job Centre (II)*<sup>135</sup> the Court concluded that the enforcement of an employment procurement monopoly enforced in Italy through criminal proceedings was a measure contrary to Article 106(1). In the *Albany* judgment<sup>136</sup> the Court seems to have considered that the exclusive right given to the operator of a sectoral pension fund amounted to a limitation of demand<sup>137</sup>, although it went on to decide that this could be justified under Article 106(2)<sup>138</sup>. The judgment in *Merci*<sup>139</sup> can be explained, in part, on the basis that the entrusted undertaking had refused to have recourse to modern technology, which resulted in a failure to satisfy the demand of customers. In *Dusseldorp*<sup>140</sup> a requirement that waste for recovery could be supplied only to the entrusted undertaking, and could not be exported to a third undertaking, was held to restrict outlets and to contravene Article 106(1) in conjunction with Article 102<sup>141</sup>.

<sup>131</sup> See eg *Buendia Sierra* (ch 6 n 55, p 222 above), paras 5.68–5–109; see also *Buendia Sierra* in Faull and Nikpay *The EC Law of Competition* (Oxford University Press, 2nd ed, 2007), paras 5.52–5.79; Edward and Hoskins ‘Article 90: Deregulation and EC Law: Reflections arising from the XVI FIDE Conference’ (1995) 32 CML Rev 157; Advocate General Jacobs in his Opinion in *Albany* (ch 6 n 124 above), paras 396–440; Ritter, Braun and Rawlinson *European Competition Law: a Practitioner’s Guide* (Kluwer Law International, 3rd ed, 2005), pp 764–767; see also, on the issue of causation, the Opinion of Advocate General Fennelly in Case C-163/96 *Silvano Raso* [1998] ECR I-533, [1998] 4 CMLR 737, paras 57–66.

<sup>132</sup> Case C-163/96 [1998] ECR I-533, [1998] 4 CMLR 737.

<sup>133</sup> *Ibid*, para 65.

<sup>134</sup> Case C-41/90 [1991] ECR I-1979, [1993] 4 CMLR 306.

<sup>135</sup> Case C-55/96 [1997] ECR I-7119, [1998] 4 CMLR 708; see also Case C-258/98 *Giovanni Carra* [2000] ECR I-4217, [2002] 4 CMLR 285.

<sup>136</sup> Cases C-67/96 etc [1999] ECR I-5751, [2000] 4 CMLR 446.

<sup>137</sup> *Ibid*, para 97.

<sup>138</sup> See ‘Article 106(2)’, pp 235–242 below.

<sup>139</sup> Case C-179/90 [1991] ECR I-5889, [1994] 4 CMLR 422.

<sup>140</sup> Case C-203/96 [1998] ECR I-4075, [1998] 3 CMLR 873.

<sup>141</sup> *Ibid*, para 63.

However in *Ambulanz Glöckner v Landkreis Südwestpfalz*<sup>142</sup> Advocate General Jacobs suggested that a Member State would be liable under Article 106(1) only where there is a systemic failure to meet demand and not where there is a failure merely due to inefficient management<sup>143</sup>. The Commission's decisions on courier services, *Dutch Express Delivery Services*<sup>144</sup> and *Spanish International Courier Services*<sup>145</sup>, on licences for mobile telephony operators, *Second Operator of GSM Radiotelephony Services in Italy*<sup>146</sup> and *Second Operator of GSM Radiotelephony Services in Spain*<sup>147</sup> and on *Slovakian postal legislation relating to hybrid mail services*<sup>148</sup> can be included, in part, in this category of cases<sup>149</sup>.

### (B) Conflict of interest

In *ERT v Dimotiki*<sup>150</sup> the Court of Justice held that there would be an infringement of Article 106(1) where Greece had created a situation in which the broadcaster ERT would be led to infringe Article 102 by virtue of a discriminatory policy in favour of its own broadcasts. A notable feature of this case was that it was not necessary for ERT to have actually abused its dominant position in the manner suggested: the granting of the exclusive right made this sufficiently likely that the measure in question infringed Article 106(1). The Court seems to have considered it to be inevitable that an undertaking in the position of ERT, because of its conflict of interest, would act abusively. The same idea was presumably present in *RTT v GB-Inno-BM*<sup>151</sup>, since the regulatory function of RTT inevitably gave rise to a conflict of interest, although the Court specifically relied there on the extension of monopoly rights to neighbouring markets<sup>152</sup>. In *Silvano Raso*<sup>153</sup>, a dock-work scheme granted an undertaking the exclusive right to supply temporary labour to terminal concessionaires, but also enabled it to compete with them on the market for the provision of dock services: merely by exercising its monopoly rights the entrusted undertaking would be able to distort competition in its favour, for example by imposing on its competitors unduly high costs or by supplying them with labour less suited to the work to be done<sup>154</sup>; the Court of Justice specifically mentioned the conflict of interest of the entrusted undertaking in this judgment<sup>155</sup>. A further example of a conflict of interest case is *MOTOE*<sup>155a</sup> in which a provision of the Greek Road Traffic Code infringed Articles 102 and 106(1) by granting ELPA, a body which organised motorcycling events, the exclusive and unfettered power to authorise competing motorcycling events in Greece, thereby placing ELPA at an obvious advantage over its competitors. The Court would be less likely to find

<sup>142</sup> Case C-475/99 [2001] ECR I-8089, [2002] 4 CMLR 726.

<sup>143</sup> *Ibid*, para 148 of his Opinion; the Court of Justice did not deal with this point explicitly, though the tone of its comments at paras 62–65 appear to be consistent with the views of the Advocate General.

<sup>144</sup> OJ [1990] L 10/47, [1990] 4 CMLR 947 quashed on appeal Cases C-48/90 and C-66/90 *Netherlands and Koninklijke PTT Nederland v Commission* [1992] ECR I-565, [1993] 5 CMLR 316.

<sup>145</sup> OJ [1990] L 233/19, [1991] 4 CMLR 560, para 11.

<sup>148</sup> Decision of 7 October 2008, paras 149–155, on appeal Case T-556/08 *Slovenská Pošta v commission*, not yet decided.

<sup>149</sup> The same decisions can also be included in the 'reservation of an ancillary activity' category: see below.

<sup>150</sup> Case C-260/89 [1991] ECR I-2925, [1994] 4 CMLR 540.

<sup>151</sup> Case C-18/88 [1991] ECR I-5941. <sup>152</sup> See below.

<sup>153</sup> Case C-163/96 [1998] ECR I-533, [1998] 4 CMLR 737; the Commission condemned various aspects of the same dock-work legislation in *Provisions of Italian Ports Legislation Relating to Employment* OJ [1997] L 301/17; it noted the conflict of interest created by the legislation at para 30(b) and (c) of its decision, referring to this as 'inherently an abuse'.

<sup>154</sup> Case C-163/96 [1998] ECR I-533, [1998] 4 CMLR 737, paras 28–31.

<sup>155</sup> *Ibid*, para 28. <sup>155a</sup> See n 90 above.

an infringement of Article 106(1) where provision exists for judicial review of the decisions made by an apparently conflicted undertaking<sup>156</sup>.

### (C) *Reservation of an ancillary activity*

In *RTT v GB-Inno-BM*<sup>157</sup> the Court of Justice held that a measure that resulted in the extension of RTT's monopoly to an ancillary activity on a neighbouring but separate market infringed Article 106(1). As noted in the preceding paragraph, the Court of Justice could have reached the same conclusion on the basis of a conflict of interest, but it decided the case specifically on the basis of its earlier judgment in the *Télémarketing* case<sup>158</sup>. In *Ambulanz Glöckner v Landkreis Südwestpfalz*<sup>159</sup> the Court of Justice held that a law adopted by Länder in Germany concerning the provision of ambulance services infringed Article 106(1) because medical aid organisations that had an exclusive right to provide emergency ambulance services were enabled to also offer non-emergency patient transport services, which could have been carried out by independent operators<sup>160</sup>. The Commission considered that there were abuses under this head in *Dutch Express Delivery Services*<sup>161</sup> and *Spanish International Courier Services*<sup>162</sup>. In each of *Second Operator of GSM Radiotelephony Services in Italy*<sup>163</sup> and *Second Operator of GSM Radiotelephony Services in Spain*<sup>164</sup> the Commission decided that, in requiring a second mobile operator to make a substantial payment for a mobile telephony licence that had not been paid by the incumbent telecommunications companies, there had been state measures capable of extending the monopoly rights of the latter. The judgment of the Court of Justice in *Connect Austria Gesellschaft für Telekommunikations GmbH v Telekom-Control-Kommission*<sup>165</sup>, an Article 267 reference from an Austrian court, points to the same conclusion. The Commission also considered that there was an abuse under this head in *Port of Rødby*<sup>166</sup> where the refusal by a port operator, DSD, to allow Euro-Port A/S access to the port of Rødby eliminated competition in the downstream market for ferry services from Rødby to Puttgarden, in which it was collectively dominant with Deutsche Bahn. Similarly, the Commission objected to Italy<sup>167</sup> and Slovakia<sup>168</sup> respectively extending the statutory monopoly of the incumbent postal operators to the delivery of hybrid mail services, which had previously been open to competition. In the case of *Greek Lignite*<sup>169</sup> the Commission found that Greece had reinforced the dominant position of PPC, a state-owned electricity company, in the wholesale electricity market by granting it quasi-monopolistic rights for access to lignite, a cheap fuel used to produce electricity. Greece subsequently took steps to ensure fair access to Greek lignite deposits<sup>170</sup>.

<sup>156</sup> Case C-67/96 *Albany International BV v SBT* [1999] ECR I-5751, [2000] 4 CMLR 446, paras 116–121.

**(D) Corbeau**

In *Corbeau*<sup>171</sup> the Court of Justice did not discuss Article 106(1) in any detail, but instead considered the extent to which the postal monopoly of the Belgian Post Office could be justified under Article 106(2)<sup>172</sup>. However the interest of the case under Article 106(1) is that, to the extent that the monopoly was not justifiable under Article 106(2), the Court of Justice seems to have considered that it would amount to a measure contrary to Article 106(1). This could be seen as an example of the unlawful extension of a monopoly right to an ancillary activity, as in the cases just discussed. More radically, however, the case seems to suggest that it is possible to strike down monopolies that are too broad: in *RTT*, for example, that company would be able to use its monopoly right to extend its activities into the neighbouring market; in *Corbeau* the Court seems simply to have regarded the monopoly of the Belgian Post Office as too broad in itself. To the extent that this is a correct interpretation of *Corbeau* the judgment is very radical, and seems to go beyond the often-repeated assertion that the grant of an exclusive right is not, in itself, unlawful. Since *Corbeau* a specific Directive has been adopted in the postal sector determining the permitted extent of the 'reserved area' (that is to say the monopoly) in the postal sector<sup>173</sup>. As for the judgment itself, it is possible that this was the 'high tide' of intervention under Article 106(1), and that the Court of Justice has since taken a more cautious approach, as the judgments in *Crespelle*<sup>174</sup> and *Banchero*<sup>175</sup> seem to suggest<sup>176</sup>.

**(E) Discrimination**

In *Merci*<sup>177</sup> the Court of Justice referred to the discriminatory treatment of customers as an abuse for which a Member State could be responsible under Article 106(1). In *GT-Link A/S v De Danske Statsbaner*<sup>178</sup> the Court stated that, where a public undertaking which owns and operates a commercial port waives the port duties on its own ferry services and some of its trading partners whilst charging the full duties to other customers, there could be an infringement of Article 102(2)(c), which refers to the application of dissimilar conditions to equivalent transactions placing other trading parties at a competitive disadvantage<sup>179</sup>. Appropriately transparent accounting would be needed to show that this was not the case<sup>180</sup>. In a series of decisions in relation to charges levied for the use both of airports<sup>181</sup> and ports<sup>182</sup> the Commission has expressly condemned price discrimination contrary to Article 102(2)(c), and found the Member State in question to have adopted a measure contrary to Article 106(1). In these cases the airport or port was a natural monopoly<sup>183</sup>, which would result in a particularly strict responsibility not to act in an

<sup>183</sup> For discussion of the meaning of natural monopoly see ch 1, 'Economies of scale and scope and natural monopolies', p 10.

abusive manner<sup>184</sup>; and it may be necessary, under the so-called ‘essential facilities doctrine’<sup>185</sup>, for the owner of such infrastructure to grant access to third parties on non-discriminatory terms<sup>186</sup>.

### (ix) Remedies and direct effect

Article 106(1) has direct effect when applied in conjunction with another directly applicable provision of EU law, with the consequence that individuals can bring an action in a national court against a Member State which has infringed it<sup>187</sup>. Furthermore, the direct effect of Article 106(1) means that, as in the case of *Höfner & Elser v Macrotron GmbH*<sup>188</sup>, one undertaking may be able to invoke it against another before a national court. An interesting question is whether an individual or a third party can bring an action for damages against a Member State which has acted in breach of Article 106(1). After the *Factortame* litigation in 1996<sup>189</sup>, in which the Court of Justice held that in certain circumstances a Member State may have to compensate individuals who suffer loss or damage as a result of infringing EU law, this must at least be arguable.

### (B) Article 106(2)

Article 106(2) is a somewhat awkwardly drafted provision<sup>190</sup>. It is in three parts. To begin with, it states that undertakings entrusted with the operation of services of general economic interest or having the character of a revenue-producing monopoly shall be subject to the rules in the Treaty, and in particular to the competition rules. It then states, however, that this subjection to the rules applies only ‘in so far as the application of such rules does not obstruct the performance, in law or in fact, of the particular tasks assigned to them’. Perhaps an easier way to think of Article 106(2) is to ask whether it provides a way of justifying what would otherwise amount to an infringement of the competition rules<sup>191</sup>. Since Article 106(2) results in the non-application of Articles 101 and 102, it must be interpreted strictly<sup>192</sup>. Article 106(2) requires that any restriction of competition should satisfy the principle of proportionality<sup>193</sup>. The burden of proof is on the undertaking

<sup>184</sup> See ch 5, ‘Dominant Position’, pp 179–189 on the responsibilities of dominant, and ‘super-dominant’, undertakings.

<sup>185</sup> See ch 18, ‘Refusal to Supply’, pp 697–711.

<sup>186</sup> See eg *Port of Rødby* OJ [1994] L 55/52, where the Commission decided that a refusal to allow access to the port was an unlawful extension of the monopoly right enjoyed by the port operator: see ‘Reservation of an ancillary activity’, p 233 above.

<sup>192</sup> See Cases C-157/94 etc *Commission v Netherlands* [1997] ECR I-5699, [1998] 2 CMLR 373, para 37; see also *Reims II* OJ [1999] L 275/17, [2000] 4 CMLR 704, para 92.

<sup>193</sup> See *Buendia Sierra* (ch 6 n 55, above) paras 8.115–8.261; also *Buendia Sierra in Faull and Nikpay* (ch 6 n 55, above) paras 6.162–6.204.

seeking to rely on this provision<sup>194</sup>. However to succeed under Article 106(2) it is not necessary to show that an undertaking's survival would be threatened if it were to be subjected to the competition rules<sup>195</sup>; nor to prove that there is no other conceivable measure that could secure that the task in question could be performed<sup>196</sup>. A third limb to Article 106(2) adds that the development of trade must not be affected to such an extent as would be contrary to the interests of the EU; the burden is on the Commission or third party complainants to prove this<sup>197</sup>.

The effect of Article 106(2) is that some undertakings can successfully claim that Articles 101 and 102 do not apply where their application would prevent them from carrying on the tasks assigned to them by a Member State; however a Member State's interest in doing this must be balanced against the EU's interest in ensuring free competition and a single market. A good example of circumstances in which Article 106(2) may be applicable is afforded by postal services: all Member States must ensure that users enjoy the right to a universal service involving the permanent provision of a postal service of specified quality at all points in their territory at affordable prices for all users<sup>198</sup>. The postal operator will charge the same price for the delivery of letters to all parts of the country. In effect, this means that the inhabitants of urban areas subsidise the postal services of those living in rural ones: delivering a letter from one part of London to another is cheaper than from the south-west of England to the north-east of Scotland. In a sense, therefore, the uniform tariff is discriminatory and could be attacked as such under Article 102. However, in so far as the uniform tariff provides an income to the postal operator that enables it to maintain the universal service, Article 106(2) is applicable and the undertaking is not subject to the competition rules.

A number of points require consideration.

### (i) Services of general economic interest

An undertaking can claim to be excluded from the rules in the Treaties only if it has been entrusted with services of general economic interest or if it has the character of a revenue-producing monopoly. It is not enough in itself that the undertaking performs that service; it must have been entrusted with that performance, which will mean that it is under certain obligations<sup>199</sup>. It is not necessary that the undertaking has been entrusted with the performance of the service by a legislative measure; this could have come about, for example, as a result of the terms and conditions of a concession agreement<sup>200</sup>. The fact that an undertaking is entrusted at its own request does not mean that Article 106(2) is inapplicable as long as its position derives from an act of public authority<sup>201</sup>.

The expression 'services of general economic interest' is not defined in the TFEU. Advocate General Colomer has suggested that to be of general economic interest a service should be uninterrupted, for the benefit of all consumers in the relevant territory and be available at a uniform tariff: put more succinctly there should be continuity, universality

<sup>194</sup> See Cases 157/94 etc *Commission v Netherlands* [1997] ECR I-5699, [1998] 2 CMLR 373, para 51.

<sup>195</sup> *Ibid*, para 43. <sup>196</sup> *Ibid*, para 58.

<sup>197</sup> See 'Adverse development of trade', p 241 below.

<sup>198</sup> See Article 3 of Directive 97/67/EC, OJ [1998] L 15/14, as amended by Directive 2008/6/EC, OJ [2008] L 52/3.

<sup>199</sup> See the Opinion of Advocate General Jacobs in Case C-203/96 *Dusseldorp* [1998] ECR I-4075, [1998] 3 CMLR 873, para 103.

<sup>200</sup> Case 30/87 *Corinne Bodson v Pompes Funèbres* [1988] ECR 2479, [1989] 4 CMLR 984.

<sup>201</sup> Case T-17/02 *Fred Olsen SA v Commission* [2005] ECR II-2031, paras 187–190.

and equality, with perhaps transparency and affordability added to this trinity<sup>202</sup>. Obvious examples of such services are the operation of the basic postal service<sup>203</sup> and the provision of services, for example in the transport sector, which are not economically viable in their own right<sup>204</sup>. However it is noticeable that, in recent judgments, the Court of Justice has recognised that the ‘protection’ of Article 106(2) can extend beyond the conventional utilities: for example it has been found to be capable of application to pension schemes<sup>205</sup>, ambulance services<sup>206</sup>, the treatment of waste material<sup>207</sup> and the provision of private medical insurance<sup>208</sup>. The General Court has held that Member States enjoy a wide discretion to define what they regard as services of general economic interest<sup>209</sup>.

The protection afforded to services of general economic interest is a sensitive political issue and was addressed at the 1997 Inter-Governmental Conference. Proposals to amend Article 106(2) itself were rejected in favour of the insertion of Article 16 EC by the Treaty of Amsterdam (now Article 14 TFEU). This expressly preserves the application of Article 106 because of:

the place occupied by services of general economic interest in the shared values of the Union as well as their role in promoting social and territorial cohesion<sup>210</sup>.

Article 14 TFEU reinforces the commitment of the EU and Member States to support undertakings required to provide services of general economic interest. The Commission has issued numerous publications clarifying the application of internal market and competition rules to services of general interest<sup>211</sup>. A *Green Paper on services of general interest* was published in May 2003<sup>212</sup>. This was followed in 2004 by the publication of a *White Paper on services of general interest*<sup>213</sup> which recognised the importance of well-functioning, accessible, affordable and high-quality services of general interest for the quality of life of European citizens, the environment and the competitiveness

<sup>202</sup> See his Opinion on Case C-265/08 *Federutility v Autorità per l'energia elettrica e il gas* [2010] ECR I-000, paras 54–55; on the concept of universality see Case T-289/03 *BUPA v Commission* [2008] ECR II-81, [2009] 2 CMLR 1043, paras 186, 187 and 203.

of European enterprises. In December 2009 the Lisbon Treaty entered into force: this reformulated Article 16 EC as Article 14 TFEU and annexed Protocol 26 on services of general interest to the Treaties<sup>214</sup>. Protocol 26 emphasises ‘the essential role and the wide discretion of national, regional and local authorities’ in the provision of services of general economic interest<sup>215</sup> and confirms that EU law does not affect the competence of Member States to control the provision of non-economic services of general interest. In May 2010 Commissioner Almunia indicated that the Commission intends to reflect further on the relationship between competition policy and services of general economic interest<sup>216</sup>.

### (ii) Undertakings having the character of a revenue-producing monopoly

This expression is not defined in the TFEU. It would apply to a monopoly created in order to raise revenue for the state; usually this monopoly would be conferred upon a public undertaking which would contribute its profits to the state, but it could also be conferred upon a private undertaking in exchange for revenue. Undertakings that have the character of a revenue-earning monopoly may also be subject to Article 37, and the Court of Justice has established that Article 106(2) may be invoked as a defence in an action under that provision<sup>217</sup>.

### (iii) Scope of the exception: obstruction of the performance of the tasks assigned

In a number of cases undertakings have argued that they were shielded from the competition rules by virtue of Article 106(2); in *BRT v SABAM*<sup>218</sup> the Court of Justice ruled that, as Article 106(2) involves a derogation from the application of the competition rules, it should be construed narrowly, and the Commission and the EU Courts have consistently done so, thereby maximising the application of Articles 101 and 102. In particular they have been sceptical of the assertion that anti-competitive behaviour is *necessary* to enable undertakings to carry out the tasks assigned to them.

#### (A) Unsuccessful claims based on Article 106(2)

Claims based on Article 106(2) have often been rejected<sup>219</sup>. For example, in *ANSEAU-NAVEWA*<sup>220</sup> the Commission held that an agreement requiring purchasers in Belgium to

<sup>214</sup> Protocols to the Treaties form an integral part thereof: Article 51 TEU.

<sup>215</sup> This point is reiterated by Article 36 of the Charter of Fundamental Rights which, in accordance with Article 6(1) TEU, has the same legal value as the other Treaties.

<sup>218</sup> Case 127/73 [1974] ECR 313, [1974] 2 CMLR 238.

<sup>219</sup> As well as the cases mentioned in the text see Case 172/80 *Züchner v Bayerische Vereinsbank* [1981] ECR 2021, [1982] 1 CMLR 313 and *Uniform Eurocheques* OJ [1985] L 35/43, [1985] 3 CMLR 434, paras 29 and 30 (both cases on banking); *Decca Navigator System* OJ [1989] L 43/27, [1990] 4 CMLR 627, para 128; *Magill TV Guide/ITP, BBC and RTE* OJ [1989] L 78/43, [1989] 4 CMLR 757, para 25; *Dutch Express Delivery Services* OJ [1990] L 10/47, paras 16–18; *Spanish International Courier Services* OJ [1990] L 233/19, [1991] 4 CMLR 560, paras 13–14; Case C-179/90 *Merci Convenzionale Porto di Genova v Siderurgica Gabrielli* [1991] ECR I-5889, [1994] 4 CMLR 540, paras 25–28; Case C-18/88 *RTT v GB-Inno-BM* [1991] ECR I-5941, paras 14–28; *Ijsselcentrale* OJ [1991] L 28/32, [1992] 5 CMLR 154, paras 39–42; Case C-242/95 *GT-Link A/S v De Danske Statsbaner* [1997] ECR I-4349, [1997] 5 CMLR 601, paras 47–55; Case C-393/92 *Almelo* [1994] ECR I-1477, paras 46–51; when this case returned to the Dutch court the claim based on Article 106(2) was unsuccessful: see Hancher (1997) 34 CML Rev 1509; Case T-271/03 *Deutsche Telekom v Commission* [2008] ECR II-477, [2008] 5 CMLR 631, para 314; *CISAC*, Commission decision of 16 July 2008, paras 256–259, on appeal on this point in Case T-411/08 *Artisjus Magyar Szerzői Jogvédő Iroda Egyesület v Commission*, not yet decided.

<sup>220</sup> OJ [1982] L 167/39 as amended at L 325/20, [1982] 2 CMLR 193; upheld on appeal, Cases 96/82 etc *IAZ International Belgium Nv v Commission* [1983] ECR 3369, [1984] 3 CMLR 276.

acquire ‘conformity labels’ before washing machines and dishwashers could be plumbed in infringed Article 101(1) because it had the effect of discriminating against imports from other Member States. The association of Belgian water authorities involved in running the scheme claimed the benefit of Article 106(2). The Commission accepted that they qualified as a body to whom services of a general economic interest had been entrusted, but went on to hold that the scheme in question was much more restrictive than necessary, saying that:

a possible limitation of the application of the rules on competition can only be envisaged in the event that the undertaking concerned has no other technically and economically feasible means of performing its particular task<sup>221</sup>.

Similarly in *British Telecommunications*<sup>222</sup> the Commission rejected BT’s defence based on Article 106(2); when the Italian Government challenged this decision before the Court of Justice the Commission’s decision was upheld<sup>223</sup>. The Court held that Italy had failed to show that the Commission’s censure of BT, for prohibiting private message-forwarding agencies from using its network to forward messages from other Member States, put the performance of its tasks in jeopardy. Article 106(2) also failed in *Air Inter v Commission*<sup>224</sup>, where the General Court rejected TAT’s appeal against a Commission decision requiring the termination of exclusive rights on French air routes. The General Court accepted that the airline was entrusted with a public task of maintaining unprofitable domestic air routes. However it held that subjection to the competition rules would merely hinder or make more difficult the performance of this task; for Article 106(2) to apply it was necessary to show that this would obstruct it, in fact or in law<sup>225</sup>. The General Court reached a similar conclusion in respect of a recycling scheme in *Duales System Deutschland v Commission*<sup>226</sup>.

A particularly important judgment on Article 106(2) is *Corbeau*<sup>227</sup>. As we have seen, the case concerned the operation of an express delivery service in Liège, in contravention of the Belgian Post Office’s postal monopoly<sup>228</sup>. The core of the Court of Justice’s judgment dealt with the extent to which the postal monopoly could be justified under Article 106(2)<sup>229</sup>. The Court acknowledged that the Post Office was entrusted with a service of general economic interest<sup>230</sup>, and that it might be necessary for it to benefit from a restriction of competition in order to be able to offset less profitable activities against profitable ones<sup>231</sup>: put more colloquially, it may be legitimate to prevent an entrant into the market from ‘cream-skimming’ or ‘cherry-picking’, leaving the incumbent postal operator to carry out unprofitable services pursuant to its universal service obligation. However the Court continued that:

the exclusion of competition is not justified as regards specific services dissociable from the service of general interest which meet special needs of economic operators and which call for certain additional services not offered by the traditional postal service, such as collection from the senders’ address, greater speed or reliability of distribution or the possibility of changing the destination in the course of transit, in so far as such services, by their nature and the conditions in which they are offered, such as the geographical area in

<sup>230</sup> *Ibid*, para 15.

<sup>231</sup> *Ibid*, paras 17–18.

which they are provided, do not compromise the economic equilibrium of the service of general economic interest performed by the holder of the exclusive right<sup>232</sup>.

Since this was a reference under Article 267, the Court then stated that it would be for the national court to make a decision under Article 106(2) on the particular facts of the case<sup>233</sup>, but it is clear that it was giving a strong indication that it should not be possible to maintain a monopoly over express courier services in order to sustain the basic service of the daily delivery of letters<sup>234</sup>.

### (B) *Successful claims based on Article 106(2)*

It would be wrong to suppose from the foregoing that claims based on Article 106(2) are always unsuccessful. In particular, as the competition rules have come to be applied with greater regularity to the utilities (gas, electricity, water and similar sectors) and to areas of activity for which the state has historically taken responsibility, so too Article 106(2) has been invoked more often with successful effect. This point can be demonstrated by reference to five judgments of the Court of Justice from 1998 to 2001. In *Corsica Ferries France SA v Gruppo Antichi Ormeggiatori del Porto di Genova*<sup>235</sup> the Court was concerned with Italian legislation requiring ships from other Member States using the ports of Genoa and La Spezia in Italy to use the services of local mooring companies. It considered that mooring operations were of general economic interest: mooring groups are obliged to provide at any time and to any user a universal mooring service, for reasons of safety in port waters<sup>236</sup>. As a result it was not incompatible with Article 106(1) in conjunction with Article 102 to include in the price of the service a component designed to cover the cost of maintaining the universal mooring service, and Article 106(2) was applicable<sup>237</sup>.

In the *Albany* judgment<sup>238</sup> the Court of Justice held that the exclusive right of a pension fund to manage supplementary pensions in a particular sector could be justified under Article 106(2), since otherwise ‘young employees in good health engaged in non-dangerous activities’ would leave the scheme, leaving behind members who would be bad insurance risks, thereby undermining the success of the system<sup>239</sup>. In *Deutsche Post AG v Gesellschaft für Zahlungssysteme mbH and Citicorp Kartenservice GmbH*<sup>240</sup> the Court considered that Article 106(2) justified the grant by a Member State to its postal operators of a statutory right to charge internal postage on items of so-called ‘remain’<sup>241</sup>. Environmental considerations led to the successful application of Article 106(2) in *Entreprenørforeningens Affalds/Miljøsektion v Københavns Kommune*<sup>242</sup>. In *Ambulanz Glöckner v Landkreis Südwestpfalz*<sup>243</sup> the Court considered that a national law which protected the providers of emergency ambulance services against competition from independent operators, even on a related non-emergency transport market, could be justified under Article 106(2) if this was necessary for them to perform their tasks in economically

<sup>232</sup> Ibid, para 19.

<sup>233</sup> Ibid, para 20.

<sup>234</sup> See to similar effect Case C-220/06 *Asociación Profesional de Empresas de Reparto y Manipulado de Correspondencia v Administración del Estado*, [2007] ECR I-12175, paras 79–83, a case concerned with the Postal Services Directive; similarly Case C-162/06 *International Mail Spain* [2007] ECR I-9991, [2008] 4 CMLR 18, para 38.

<sup>235</sup> Case C-266/96 [1998] ECR I-3949, [1998] 5 CMLR 402.

<sup>236</sup> Ibid, para 45.

<sup>237</sup> Ibid, paras 46–47.

<sup>238</sup> Cases C-67/96 etc *Albany International BV v SBT* [1999] ECR I-5751, [2000] 4 CMLR 446.

<sup>239</sup> Ibid, paras 98–111.

<sup>240</sup> Cases C-147/97 etc [2000] ECR I-825, [2000] 4 CMLR 838.

<sup>241</sup> Ibid, paras 41–54.

<sup>242</sup> Case C-209/98 [2000] ECR I-3743, [2001] 2 CMLR 936, paras 74–83.

<sup>243</sup> Case C-475/99 [2001] ECR I-8089, [2002] 4 CMLR 726.

acceptable conditions<sup>244</sup>. In *AG2R Prévoyance v Beaudort Père et Fils SARI*<sup>245</sup> the Court considered that Article 106(2) could apply to an exclusive right granted to a provident society to manage a scheme for the supplementary reimbursement of healthcare costs<sup>246</sup>.

Although Article 106(2) is drafted in terms of the position of undertakings, it has become clear that Member States themselves can rely on it. For example in *Dusseldorp*<sup>247</sup> the Court of Justice, following the Opinion of Advocate General Jacobs, confirmed that the Netherlands could rely on Article 106(2) in relation to its ‘Long Term Plan’ relating to waste disposal. The same point arose in *Commission v Netherlands*<sup>248</sup>. The Court of Justice has also held that Article 106(2) may be invoked by a Member State in defence of state aid that might otherwise be incompatible with the internal market<sup>249</sup>. The implications of this judgment are considered in a Commission decision<sup>250</sup>.

#### (iv) Adverse development of trade

It is not possible to rely on Article 106(2) if the development of trade would be affected to such an extent as would be contrary to the interest of the EU. This must mean something more than an effect on inter-state trade in the sense of Articles 101 and 102, since without such an effect the EU competition rules would not be applicable anyway. The Court of Justice has held in *Commission v Netherlands* that the Commission must prove whether the exclusive right has affected and continued to affect the development of intra-EU trade ‘to an extent which is contrary to the interests of the [EU]’<sup>251</sup>. An application will be dismissed where it fails to do so<sup>252</sup>. If the matter were to arise in domestic litigation, not involving the Commission, it would presumably fall upon the claimant to demonstrate an adverse effect on the development of trade.

#### (v) Direct effect

In *Belgische Radio en Televisie (BRT) v SABAM*<sup>253</sup> the Court of Justice established that Articles 101(1) and 102 are directly applicable to the undertakings described in Article 106(2) so that an action may be brought against them in domestic proceedings, whether the Commission has acted under Article 106(3) or not. A national court should investigate whether the undertaking falls within Article 106(2); if it does not, the court may go ahead and apply the competition rules<sup>254</sup>. In cases of doubt the national court can stay the action whilst the opinion of the Commission is sought<sup>255</sup>.

<sup>244</sup> Ibid, paras 51–65.

<sup>254</sup> Case 155/73 *Italy v Sacchi* [1974] ECR 409, [1974] 2 CMLR 177.

<sup>255</sup> Case C-260/89 *ERT v Dimotiki* [1991] ECR I-2925, [1994] 4 CMLR 540, para 34 and Case C-393/92 *Almelo* [1994] ECR I-1477, para 50.

It remains uncertain whether the final sentence of Article 106(2), which requires that trade must not be affected contrary to the interests of the EU, has direct effect. It is arguable that only the Commission should be entitled to carry out the task of assessing the interests of the EU.

### (C) **Article 106(3)**<sup>256</sup>

Article 106(3) provides that the Commission shall ensure the application of Article 106(1) and (2) and that, where necessary, it shall address appropriate decisions or directives to Member States. The Commission began to employ it in the 1980s, most notably in the context of the telecommunications sector<sup>257</sup>, and it is now an important part of its armoury. The advantage of Article 106(3) from the Commission's perspective is that it can adopt a decision or directive itself; in doing so, it is not subject to any particular procedural framework, although it must of course comply with the general principles of EU law, and must provide adequate reasons for its action, in accordance with Article 296 TFEU<sup>258</sup>. The Commission liaises with other interested parties, including the Parliament, when exercising its powers under Article 106(3), and particularly when adopting a directive<sup>259</sup>. If the Commission did not have its Article 106(3) powers, it would be able to proceed against measures that offend Article 106(1) only by taking proceedings before the Court of Justice under Article 258 or by persuading the Council to adopt the measures it favours.

Article 106(3) enables the Commission to adopt both decisions and directives: a decision can be adopted establishing that a Member State is in breach of an EU obligation; but a directive can go further and legislate for the elimination of existing violations of the Treaty and the prevention of future ones.

#### (i) **Decisions**

In *Greek Public Property Insurance*<sup>260</sup> the Commission required Greece, by decision under Article 106(3), to alter its domestic legislation requiring that all public property in Greece be insured by Greek public-sector insurance companies and that staff of Greek state-owned banks recommend to their customers insurance with companies affiliated to the public banking sector and controlled by it. When Greece failed to take the necessary measures to do this within the prescribed period the Commission brought an action under Article 258 for failure to fulfil its Treaty obligations. The Court of Justice made the declaration<sup>261</sup>, holding in the course of its judgment that a decision by the Commission under Article 106(3) is 'binding in its entirety' on the person to whom it is addressed so that the addressee must comply with it until it obtains from the Court a suspension of its operation or a declaration that it is void. In *Spanish Transport Fares*<sup>262</sup> the Commission addressed a decision to Spain condemning its discriminatory fares for passengers from mainland Spain to the Balearic and Canary Islands. The Commission also adopted decisions under Article 106(3) in:

<sup>256</sup> On Article 106(3) generally, see *Buendia Sierra Exclusive Rights and State Monopolies under EC Law*, paras 10.01–10.184 and *Buendia Sierra in Faull and Nikpay* (ch 6 n 55, p 222 above) paras 6.217–6.257.

<sup>257</sup> See 'Directives', pp 243–244 below.

## (ii) Directives

The competence of the Commission to adopt directives under Article 106(3) has been considered by the Court of Justice on three occasions. The Transparency Directive<sup>280</sup> was challenged in *France v Commission*<sup>281</sup> on the basis that, since it concerned the surveillance of state aids, it should have been adopted under Article 109 rather than Article 106(3). The Court ruled that the fact that the Commission could have proceeded under Article 109 did not mean that it could not also do so under Article 106(3). Towards the end of the

<sup>263</sup> OJ [1990] L 10/47, annulled on appeal Cases C-48/90 and C-66/90 *Netherlands and Koninklijke PTT Nederland v Commission* [1992] ECR I-565, [1993] 5 CMLR 316 as the Commission had failed to give the Dutch Government a fair hearing.

<sup>275</sup> OJ [2002] L 120/19.

<sup>276</sup> Commission decision of 20 October 2004.

<sup>277</sup> Commission decision of 10 May 2007.

<sup>278</sup> Commission decision of 5 March 2008, on appeal Case T-169/08 *DEI v Commission*, not yet decided.

<sup>279</sup> Commission decision of 7 October 2008, on appeal Case T-556/08 *Slovenská Pošta v Commission*, not yet decided.

<sup>280</sup> Commission Directive 80/723/EEC, OJ [1980] L 195/35, repealed and replaced by Commission Directive 2006/111/EC, OJ [2006] L 318/17.

<sup>281</sup> Cases 188/80 etc [1982] ECR 2545, [1982] 3 CMLR 144; for a later challenge related to this Directive, see Case C-325/91 *France v Commission* [1993] ECR I-3283.

1980s the Commission's concern about the fragmented nature of the telecommunications market in the EU and the consequent lack of competition led to the adoption of two directives, the first on the telecommunications terminal equipment market<sup>282</sup> and the second on telecommunications themselves<sup>283</sup>. Opposition from Member States to these Directives was considerable and both were challenged before the Court of Justice. In each case the Court upheld the competence of the Commission to have proceeded under Article 106(3)<sup>284</sup>. In *France v Commission*<sup>285</sup> three Member States complained that the Commission should have proceeded under Article 258 rather than Article 106(3). The Court held that there had been no misuse of powers: the Commission may use the powers conferred upon it by Article 106(3) to specify in general terms the obligations that arise under Article 106(1); however the Commission may not use a directive under Article 106(3) to rule upon specific infringements of the TFEU, for which the Article 258 procedure must be used<sup>286</sup>. The Court also held that the fact that the Council had competence to adopt legislation relating to telecommunications did not mean that the Commission had no competence<sup>287</sup>. The Court annulled Articles 2, 7 and 9 of the Directive on terminal equipment since the Commission had failed to explain which rights were 'special' and why they were contrary to EU law<sup>288</sup>. It is not possible to use Article 106(3) for the purpose of achieving harmonisation, the legislative base for which is provided by Articles 114 and 115 TFEU: this explains why in the telecommunications sector there are Article 106(3) Directives, dealing with the conditions of competition, and a raft of separate measures under Articles 114 and 115 on harmonisation<sup>289</sup>.

### (iii) Judicial review of the Commission's powers under Article 106(3)

The Commission enjoys a wide discretion in the field covered by Article 106(1) and (3)<sup>290</sup>. The Court will not annul a decision or directive unless it is reasonably likely that an error on the part of the Commission may have affected it in a material respect. Third parties cannot, except in an exceptional situation, bring an action against a Commission decision not to use its powers under Article 106(3)<sup>291</sup>.

<sup>282</sup> Commission Directive 88/301/EEC, OJ [1988] L 131/73, [1991] 4 CMLR 922; this Directive was replaced by Commission Directive 2008/63/EC, OJ [2008] L 162/20.

<sup>283</sup> Commission Directive 90/388/EEC, OJ [1990] L 192/10, [1991] 4 CMLR 932; this Directive was replaced by Commission Directive 2002/77/EC, OJ [2002] L 249/21.

## 4. Article 37 TFEU – State Monopolies of a Commercial Character<sup>292</sup>

Article 37(1) of the Treaty provides that:

Member States shall adjust any State monopolies of a commercial character so as to ensure that no discrimination regarding the conditions under which goods are procured and marketed exists between nationals of Member States<sup>293</sup>.

Article 37(1) goes on to state that it applies to any body through which a Member State supervises, determines or appreciably influences imports or exports between Member States, and also that it applies to monopolies delegated by the state to others. Article 37(2) obliges Member States not to introduce any new measure contrary to the principles in Article 37(1) or which restricts the scope of the Treaty Articles dealing with the prohibition of customs duties and quantitative restrictions between Member States. However Article 37 does not require the abolition of existing monopolies; only that they should be adjusted to prevent discrimination.

Article 37 is designed to prevent state monopolies of a commercial character discriminating against nationals of other Member States. One way of ensuring that Member States do not discriminate in this way is to alter their public procurement policies, in which area the Council has been active<sup>294</sup>. The Commission continues to monitor the conduct of Member States under Article 37; details of its application of Article 37 will be found in its annual reports on competition policy<sup>295</sup>. In *Commission v Greece*<sup>296</sup> the Court of Justice held that Greece was obliged to terminate exclusive rights to import and sell petroleum derivatives since those rights discriminated against exporters of such products in other Member States and since they upset the normal conditions of competition between Member States. Where the Commission suspects infringement of Article 37 it may take proceedings against the Member State under Article 258 or it could make use of the powers available to it under Article 106(3)<sup>297</sup>. Where the Commission brings Article 258 proceedings it must prove that a Member State has failed to fulfil its obligations and it must place before the Court of Justice the information needed to enable it to decide whether this is the case<sup>298</sup>. An injured undertaking could bring an action in a national court, as Article 37 is directly effective<sup>299</sup>.

In *Commission v Netherlands* the Court of Justice found that import and export monopolies for gas and electricity in the Netherlands, Italy and France amounted to an infringement of Article 37(1)<sup>300</sup>. However the Court considered that Article 106(2) could be invoked by Member States in proceedings brought under Article 37 to justify such monopolies. Justification was possible, provided that the maintenance of monopoly rights was necessary to enable the undertaking in question to perform the tasks of general economic interest entrusted to it under economically acceptable conditions; it was not

<sup>292</sup> See generally Buendia Sierra *Exclusive Rights and State Monopolies under EC Law* (Oxford University Press, 1999) paras 3.01–3.201; also Buendia Sierra in *Faull and Nikpay*, paras 6.106–6.121.

<sup>293</sup> Note that Article 37 TFEU is not identical to the original Article 37 EEC, which contained transitional rules that had become redundant.

<sup>294</sup> See ch 2 n 7, p 50 above.

<sup>295</sup> See eg the Commission's XXVIth *Report on Competition Policy* (1996), points 132–135; XXVIIth *Report on Competition Policy* (1997), points 137–144; XXXIInd *Report on Competition Policy* (2002), point 636; XXXIIIrd *Report on Competition Policy* (2003), point 659.

<sup>296</sup> Case C-347/88 [1990] ECR I-4747.

<sup>297</sup> See 'Article 106(3)', pp 242–244 above.

<sup>298</sup> See eg Cases C-157/94 etc *Commission v Netherlands* [1997] ECR I-5699, [1998] 2 CMLR 373, para 59.

<sup>299</sup> Case 91/78 *Hansen v Hauptzollamt Flensburg* [1979] ECR 935.

<sup>300</sup> See Cases C-157/94 etc *Commission v Netherlands* [1997] ECR I-5699, [1998] 2 CMLR 373: the nature of the monopolies varied from state to state.

necessary to demonstrate that the survival of the undertaking itself would be threatened in the absence of such a monopoly. On the facts the Commission failed to satisfy the Court that the monopolies could not be justified under Article 106(2). In *Krister Hanner*<sup>301</sup> the Court of Justice considered, in an Article 267 reference from a Swedish court, that Article 37(1) precluded a sales regime that conferred a legal monopoly at the retail level of trade in medicinal preparations on Apoteket, an entity in which the Swedish state had a majority shareholding and the management of which was predominantly in the hands of politicians and civil servants. The Court's concern was that Apoteket's procurement arrangements were liable to discriminate against medicinal preparations from outside Sweden<sup>302</sup>. In October 2007 the Commission announced that it would bring proceedings under Article 37 against Malta unless it adjusted a monopoly for the importation, storage and wholesale of petroleum products<sup>303</sup>; the case was closed after Malta took steps to open the market to third parties<sup>304</sup>.

## 5. Articles 107 to 109 TFEU – State Aids<sup>305</sup>

The Treaty provides the Commission with power under Articles 107 to 109 TFEU to deal with state aids that could distort competition in the internal market. A considerable amount of DG COMP's energies go into this issue<sup>306</sup>, but lack of space prevents a detailed discussion of the topic here.

Article 107(1) provides that:

Save as otherwise provided in the Treaties, any aid granted by a Member State or through State resources in any form whatsoever which distorts or threatens to distort competition by favouring certain undertakings or the production of certain goods shall, in so far as it affects trade between Member States, be incompatible with the internal market.

Article 107(2) provides that aids having a social character granted to individual consumers, aids to make good the damage caused by national disasters or exceptional occurrences and aids granted to the economy of certain areas of Germany affected by the division of that country after the Second World War<sup>307</sup> shall be compatible with the internal market. Article 107(3) gives the Commission discretion to permit other aids, for example to promote the economic development of areas where the standard of living is abnormally low or where there is serious unemployment, or to promote the execution of an important project of common European interest or to remedy a serious disturbance in the economy of a Member State. The Commission has proactively applied these provisions since

<sup>301</sup> Case C-438/02 [2005] ECR I-4551, [2005] 2 CMLR 1010.

<sup>302</sup> *Ibid*, paras 32–49.

<sup>303</sup> Commission Press Release IP/07/1544, 18 October 2007.

<sup>304</sup> Commission Press release IP/07/1952, 18 December 2007.

<sup>305</sup> For further reading on state aids see Hancher, Ottervanger and Slot *EC State Aids* (Sweet & Maxwell, 3rd ed, 2006); Wyatt and Dashwood *European Union Law* (Sweet & Maxwell, 5th ed, 2006), ch 24; Faull and Nikpay *The EC Law of Competition* (Oxford University Press, 2nd ed, 2007), ch 16; Bellamy and Child *European Community Law of Competition* (Oxford University Press, 6th ed, 2008, ed Roth and Rose), ch 15; Quigley *European State Aid Law* (Hart Publishing, 2nd ed, 2009); Bacon *European Community Law of State Aid* (Oxford University Press, 2009); the Commission's *Annual Report on Competition Policy* contains a detailed account of its activities under the state aids provisions.

<sup>306</sup> DG AGRI and DG MARE deal with state aids in agriculture and fisheries respectively.

<sup>307</sup> Article 107(2) provides that the Council, acting on a proposal from the Commission, may adopt a decision repealing this point after 1 December 2014.

autumn 2008 so that Member States could adopt measures to safeguard the stability of their financial systems without unduly distorting competition<sup>308</sup>. DG COMP has established an Economic Crisis Team to handle the state aid implications of national measures designed to promote economic recovery<sup>309</sup>.

Article 108 deals with procedure. The Commission may, by Article 108(2)(i), adopt a decision that a state aid which is incompatible with the internal market shall be abolished or altered. If the Member State does not comply with this decision within the stated time, the Commission or another Member State may take the matter to the Court of Justice under Article 108(2)(ii) without having to resort to the procedure under Articles 258 and 259 TFEU<sup>310</sup>. Repayment of state aids will usually be demanded. Article 108(3) requires plans to grant or alter aids to be notified to the Commission in sufficient time to enable it to submit its comments. The procedural powers of the Commission in relation to state aids are set out in Council Regulation 659/1999<sup>311</sup> and Commission Regulation 794/2004<sup>312</sup>. The aid may not be implemented until the Commission has reached a decision. Article 108(3) is directly effective<sup>313</sup> and an individual may seek relief in a domestic court where aid is granted without notification under Article 108(3) or put into effect before the Commission's decision<sup>314</sup>.

It can be difficult to tell, in the absence of relevant information, whether competition is being distorted where a Member State controls part of the economy directly or grants financial aids to certain firms. To overcome this problem the Commission issued a Directive in 1980 to increase the transparency of the relationship between Member States and public undertakings<sup>315</sup>, which was unsuccessfully challenged in *France v Commission*<sup>316</sup>; the Directive has been amended a number of times and was codified in November 2006<sup>317</sup>. The Commission uses the data that it receives through this Directive to monitor the compatibility of state aids with Article 107.

Article 109 TFEU authorises the Council to adopt regulations on state aid, in particular exempting aid from notification. The Council has adopted Regulation 994/98<sup>318</sup> which confers powers on the Commission to adopt 'group exemptions' for certain categories of state aid, and to adopt a regulation on *de minimis* aids. Several regulations have been adopted by the Commission under Regulation 994/98: they can be accessed on the website of DG COMP<sup>319</sup>. That website provides a considerable amount of other information about state aid policy, including details of current developments, a register of cases, reports on state aid matters and discussion of the measures introduced as a result of the Commission's *State Aid Action Plan*<sup>320</sup>.

<sup>308</sup> See eg Commission Communication *The application of state aid rules to measures taken in relation to financial institutions in the context of the current global financial crisis* OJ [2008] C 270/8 and MEMO/11/68, 3 February 2011.

## Articles 101 and 102: public enforcement by the European Commission and national competition authorities under Regulation 1/2003

1. Overview of Regulation 1/2003	250	3. Regulation 1/2003 in Practice	288
2. The Commission's Enforcement Powers under Regulation 1/2003	251	4. Judicial Review	290

Infringement of Articles 101 and 102 has serious consequences for guilty undertakings. Such is the importance of competition law that undertakings are well advised to put in place effective compliance programmes to ensure that the competition rules are not infringed and that employees understand what types of behaviour must be avoided; the Commission and the EU Courts are unimpressed by arguments sometimes put forward by undertakings that they intended to comply with competition law, but that their employees disobeyed instructions and wrongly entered into price-fixing or similar agreements<sup>1</sup>. The powers of the Commission to enforce Articles 101 and 102 were originally contained in Regulation 17 of 1962<sup>2</sup>. Major changes in the enforcement of Articles 101 and 102 were effected by Regulation 1/2003<sup>3</sup>, which became applicable on 1 May 2004<sup>4</sup>. This chapter will explain the main features of the public enforcement system: there are numerous practitioners' books that provide a more detailed analysis of the position<sup>5</sup>. The chapter will begin with a brief overview of Regulation 1/2003. Section 2 provides a

<sup>1</sup> See eg Case T-53/03 *BPB v Commission* [2008] ECR II-1333, [2008] 5 CMLR 1201, para 360; *Candle Waxes*, Commission decision of 1 October 2008, paras 642–643: the decision is on appeal Cases T-543 etc *RWE and RWE Dea v Commission*, not yet decided.

<sup>2</sup> JO 204/62, OJ (Special Edition 1959–62), p 57.

<sup>3</sup> OJ [2003] L 1/1, as amended by Regulation 411/2004, OJ [2004] L 68/1 and Regulation 1419/2006, OJ [2006] L 269/1.

<sup>4</sup> The temporal effect of Regulation 1/2003 is under examination in Case C-17/10 *Toshiba Corp v Úřad pro ochranu hospodářské soutěže*, not yet decided; for discussion of the issues see the Opinion of AG Kobott of 8 September 2011.

<sup>5</sup> See in particular Kerse and Khan *EC Antitrust Procedure* (Sweet & Maxwell, 5th ed, 2005); Ortiz Blanco *European Community Competition Procedure* (Oxford University Press, 2nd ed, 2006); Faull and Nikpay *The EC Law of Competition* (Oxford University Press, 2nd ed, 2007), ch 2; Bellamy and Child *European Community Law of Competition* (Oxford University Press, 6th ed, 2008, eds Roth and Rose), ch 13; for a series of seminal essays on all aspects of public enforcement see Wils *The Optimal Enforcement of EC Antitrust Law* (Kluwer Law International, 2002); Wils *Principles of European Antitrust Enforcement*

detailed examination of the Commission's enforcement powers; it also describes the procedure introduced by the Commission in 2008 whereby it sometimes settles cartel cases. Section 3 discusses the operation of the European Competition Network ('the ECN') that brings together the Commission and the national competition authorities of the Member States ('the NCAs'). The final section of the chapter will provide a brief account of judicial review of the Commission's decisions. Articles 101 and 102 are directly applicable and may be invoked in proceedings in the domestic courts of the Member States: the private enforcement of the competition rules will be considered in chapter 8.

In understanding the extent of – or rather the limits to – the Commission's powers, it is important to have reference to the general principles of EU law some of which, such as respect for the rights of the defence and the principles of proportionality, equal treatment, the protection of legitimate interests, legal certainty and non-retroactivity, have obvious significance for the enforcement of the competition rules<sup>6</sup>. Two further important issues are the relationship between the Commission's procedures and the standards required by the European Convention on Human Rights<sup>7</sup> and by the Charter of Fundamental Rights of the European Union<sup>8</sup>; recital 37 of Regulation 1/2003 states that it should be interpreted in accordance with the rights and principles recognised in the Charter, and Article 6(1) TEU provides that the Charter has the same force as the other Treaties<sup>9</sup>. In *Knauf Gips KG v Commission* the Court of Justice specifically relied on the Charter when allowing an appeal by Knauf which claimed that its rights of defence had been infringed<sup>10</sup>. However whilst it is important to ensure that the rights of the defence are properly respected, it is also important to avoid them being so elevated that it becomes disproportionately difficult for the Commission to enforce the law: a balance has to be struck between the private interest of undertakings not to be found guilty of behaviour of which they are innocent and the public interest of punishing serious infringements of the law. A related point is that the law of 'human' rights was developed with the laudable goal of protecting natural persons from arbitrary and oppressive behaviour, including physical maltreatment. It would not be surprising if the EU Courts were to develop different standards of human rights for natural persons on the one hand and for well-resourced multinational corporations on the other with access to sophisticated legal advice in the context of administrative proceedings based on Articles 101 and 102 TFEU<sup>11</sup>.

<sup>10</sup> Case C-407/08 P [2010] ECR I-000, [2010] 5 CMLR 708, paras 91–93.

<sup>11</sup> See eg the Opinion of Advocate General Geelhoed in Case C-301/04 P *Commission v SGL Carton* [2006] ECR I-5915, [2006] 5 CMLR 877, paras 62–69 and the judgment of the Court of Justice in Case C-411/04 P *Salzgitter v Commission* [2007] ECR I-965, [2007] 4 CMLR 682, paras 40–50; note however the judgment of the European Court of Human Rights in *Jussila v Finland* (2007) 45 EHRR 892, categorising infringements of competition law as criminal for the purpose of Article 6 of the European Convention on Human Rights, but noting the distinction between the 'hard-core' of criminal cases and cases not belonging to the traditional categories of criminal law: see Wils 'The Increased Level of EU Antitrust Fines, Judicial Review and the ECHR' (2010) 33(1) *World Competition* 5; see also the same Court's judgment in *Menarini Diagnostics Srl v Italy*, judgment of 27 September 2011.

## 1. Overview of Regulation 1/2003

Regulation 1/2003 abolished the notification of agreements to the Commission for individual exemption and the Commission's exclusive power to make decisions on the application of Article 101(3) in individual cases: that provision is now directly applicable in the same way that Articles 101(1), 101(2) and 102 have always been<sup>12</sup>. One of the reasons for this fundamental change in the procedural regime was to enable the Commission to use its resources for investigating serious infringements of the competition rules, such as price-fixing and market-sharing cartels, rather than having to devote a large amount of time to examining agreements and practices notified to it which, for the most part, did not raise serious competition problems<sup>13</sup>. However Regulation 1/2003 did not deal only with these matters: the opportunity was taken to refresh the enforcement powers of the Commission generally, and the Regulation adopted a number of new provisions including, for example, the possibility of the Commission adopting decisions on the basis of legally binding commitments as to undertakings' future behaviour (Article 9) and the power to conduct inspections at people's homes (Article 21).

### (A) The content of Regulation 1/2003

Regulation 1/2003 consists of 11 chapters:

- Chapter I is entitled 'Principles': Article 1 provides for the direct applicability of Articles 101 and 102, Article 2 explains who bears the burden of proof in cases under Articles 101 and 102 and Article 3 deals with the relationship between those provisions and national competition law<sup>14</sup>
- Chapter II of the Regulation sets out the powers of the Commission, the NCAs and national courts
- Chapter III provides for various types of Commission decision: findings of infringement, interim measures, the acceptance of commitments and findings of inapplicability
- Chapter IV is concerned with cooperation between the Commission, NCAs and national courts
- Chapter V deals with the Commission's powers of investigation
- Chapter VI deals with penalties
- Chapter VII is concerned with limitation periods for the imposition and enforcement of penalties
- Chapter VIII deals with hearings and professional secrecy
- Chapter IX provides for the withdrawal of the benefit of block exemption regulations in certain circumstances
- Chapter X contains general provisions
- Chapter XI contains transitional, amending and final provisions.

<sup>12</sup> See ch 4, 'Regulation 1/2003', pp 166–168.

<sup>13</sup> For a discussion of the background to the adoption of Regulation 1/2003, including the Commission's *White Paper on Modernisation*, see the fifth edition of this book, ch 7, pp 245–251 and the extensive list of literature cited there.

<sup>14</sup> The relationship between EU and domestic competition law is discussed in ch 2, 'The Relationship Between EU Competition Law and National Competition Laws', pp 75–79.

## (B) Supporting measures

The Commission has adopted a number of supporting measures necessary for the successful application of Regulation 1/2003. These measures consist of one Commission Regulation and a number of Notices, as follows:

- Commission Regulation 773/2004 relating to the conduct of proceedings under Articles 101 and 102, the 'Implementing Regulation'<sup>15</sup>
- *Notice on cooperation within the network of competition authorities*<sup>16</sup>
- *Notice on the cooperation between the Commission and courts of the EU Member States in the application of Articles [101 and 102 TFEU]*<sup>17</sup>
- *Notice on the handling of complaints by the Commission under Articles [101 and 102 TFEU]*<sup>18</sup>
- *Notice on informal guidance relating to novel questions concerning Articles [101 and 102 TFEU] that arise in individual cases (Guidance letters)*<sup>19</sup>
- *Notice on the effect on trade concept contained in Articles [101 and 102 TFEU]*<sup>20</sup>
- *Guidelines on the application of Article [101(3) TFEU]*<sup>21</sup>
- *Notice on the conduct of settlement procedures in view of the adoption of Decisions pursuant to Article 7 and Article 23 of Council Regulation No 1/2003 in cartel cases*<sup>22</sup>
- *Explanatory note to an authorisation to conduct an inspection*<sup>23</sup>

The Commission also published three documents in October 2011 that provide details of its procedure in competition cases<sup>24</sup>:

- *Best Practices on the conduct of proceedings concerning Articles 101 and 102 TFEU*
- *Best Practices for the submission of economic evidence and data collection in cases concerning the application of Articles 101 and 102 TFEU and in merger cases*
- *Decision of the President of the Commission on the function and terms of reference of the hearing officer in certain competition proceedings*<sup>25</sup>.

## 2. The Commission's Enforcement Powers under Regulation 1/2003

### (A) Burden of proof

Article 2 of Regulation 1/2003 provides that the burden of proving an infringement of Article 101(1) or Article 102 is on the person or competition authority alleging the infringement and that the burden of showing that Article 101(3) is satisfied is on the person making that claim. There may be circumstances where the party bearing the burden of proof produces evidence that requires the other party to provide an explanation or justification,

<sup>15</sup> OJ [2004] L 123/18, as amended by Regulation 622/2008, OJ [2008] L 171/3.

<sup>16</sup> OJ [2004] C 101/43.

<sup>17</sup> OJ [2004] C 101/54.

<sup>18</sup> OJ [2004] C 101/65.

<sup>19</sup> OJ [2004] C 101/78.

<sup>20</sup> OJ [2004] C 101/81.

<sup>21</sup> OJ [2004] C 101/97.

<sup>22</sup> OJ [2008] C 167/1.

<sup>23</sup> Available at [www.ec.europa.eu/competition/antitrust/legislation/legislation.html](http://www.ec.europa.eu/competition/antitrust/legislation/legislation.html).

<sup>24</sup> *Ibid.*

<sup>25</sup> All three documents are available at [www.ec.europa.eu](http://www.ec.europa.eu).

failing which it is permissible to conclude that the burden of proof has been satisfied<sup>26</sup>. The Commission's *Guidelines on the application of Article [101(3) TFEU]*<sup>27</sup> explain the kind of evidence that undertakings should provide when defending an agreement under Article 101(3).

The Regulation does not discuss the burden of proof where an undertaking raises objective justification as a defence under Article 102. The position is that the evidential burden in such a situation rests with the undertaking asserting the justification, and that it is then incumbent on the Commission to show why that justification is inapplicable<sup>28</sup>. Similarly it would seem that an undertaking that asserts that a contractual restriction is ancillary bears the evidential burden of showing that this is so, and that the Commission should then have to show why this is not so<sup>29</sup>.

## (B) Chapter II: powers

Articles 4 to 6 deal with the powers of the Commission, the NCAs and national courts respectively.

### (i) Article 4: powers of the Commission

Article 4 states that the Commission shall have the powers provided for by Regulation 1/2003: of particular importance are the decision-making powers in Chapter III; the powers of investigation contained in Chapter V; and the powers to impose penalties provided by Chapter VI; these are described below.

### (ii) Article 5: powers of the NCAs

Recital 6 of the Regulation states that, to ensure the effective application of the competition rules, NCAs should be associated more closely with their application. Article 5 therefore provides that NCAs shall have the power to apply Articles 101 and 102 in individual cases. For this purpose the NCAs may make decisions requiring the termination of an infringement, ordering interim measures, accepting commitments and imposing fines and periodic penalty payments; they may also decide that there are no grounds for action on their part, but not that the EU competition rules are not infringed<sup>30</sup>. Article 35 of the Regulation requires Member States to designate the competition authority or authorities responsible for the application of Articles 101 and 102 in such a way that its provisions are effectively complied with; the designated authorities can include courts. Designated national authorities must have the right to participate, as a defendant or respondent, in judicial proceedings against a decision that the authority has taken in relation to Articles 101 and/or 102<sup>31</sup>. The Commission works with the NCAs through the medium of the ECN, the work of which is discussed in section 3 below.

<sup>26</sup> Cases C-204/00 P etc *Aalborg Portland A/S v Commission* [2004] ECR I-123, [2005] 4 CMLR 251, para 79.

<sup>27</sup> OJ [2004] C 101/97.

<sup>28</sup> See eg Case T-201/04 *Microsoft Corp v Commission* [2007] ECR II-3601, [2007] 5 CMLR 846, para 688.

<sup>29</sup> On this point see a case under the UK Competition Act 1998, Case Nos 1035/1/1/04 etc *Racecourse Association v OFT* [2005] CAT 29, [2006] CompAR 99, paras 130–134.

<sup>30</sup> Case C-375/09 *Prezes Urzędu Ochrony Konkurencji i Konsumentów v Tele2 Polska sp. z o.o., now Netia SA* [2011] ECR I-000, [2011] 5 CMLR 48.

<sup>31</sup> Case C-439/08 *Vlaamse defteratie van verenigingen van Brood- en Banketbakkers, Ijsbereiders en Chocoladebewaterkers (VEBIC) VZW* [2010] ECR I-000, [2011] 4 CMLR 635.

**(iii) Article 6: powers of the national courts**

Article 6 provides specifically that national courts shall have the power to apply Article 101, in its entirety, and Article 102: the role of national courts is discussed in chapter 8.

**(C) Chapter III: Commission decisions**

Articles 7 to 10 deal with Commission decisions. The Commission has also issued a *Notice on informal guidance relating to novel questions concerning Articles [101 and 102 TFEU] of the EC Treaty that arise in individual cases (Guidance letters)*<sup>32</sup> explaining the (rare) circumstances in which it might be prepared to give undertakings informal guidance on the application of the competition rules. In 2008 the Commission introduced a system whereby some cartel cases can be settled. Informal guidance and settlements will be discussed after the powers conferred by Articles 7 to 10 have been described.

**(i) Article 7: finding and termination of an infringement**

Article 7(1) provides that where the Commission, acting on a complaint or on its own initiative, finds an infringement of Article 101 or 102, it may by decision require an end to it. Article 7(1) continues by stating that the Commission may impose on undertakings behavioural or structural remedies which are proportionate to the infringement and necessary to bring the infringement effectively to an end.

**(A) Behavioural remedies**

A behavioural remedy may be negative, for example to stop a certain kind of conduct, or positive, to order an undertaking to do something. In a typical cartel case the Commission will require the participants in the cartel to stop the illegal behaviour, in so far as they have not already done so, and to refrain from any act or conduct having the same or a similar object or effect in the future<sup>33</sup>.

The ability of the Commission to make a positive order under Regulation 17 was confirmed by the Court of Justice in *Commercial Solvents Co v Commission*<sup>34</sup>; there is no reason to suppose that its powers would be any different under Regulation 1/2003. In *Commercial Solvents* that firm was found guilty of an unlawful refusal to supply contrary to Article 102 and was ordered to resume supplies to a former customer. In *Microsoft*<sup>35</sup> the General Court upheld the Commission's infringement decision, but held that the Commission did not have the right to appoint an independent monitoring trustee to enforce the remedy: this went 'far beyond' retaining an expert to advise it on implementation of the remedies<sup>36</sup>.

Whereas an undertaking can be ordered to supply a distributor or customer where it has infringed Article 102, this cannot be done following an infringement of Article 101<sup>37</sup>. Articles 101 and 102 have a different logic: Article 101 prohibits agreements, and the Commission may make an order to terminate them; Article 102 prohibits abuse, and again the Commission can make an order to terminate an abuse. However a refusal to

<sup>32</sup> OJ [2004] C 101/78.

<sup>33</sup> See eg Article 3 of the Commission's decision in *Gas Insulated Switchgear* of 24 January 2007; see however Case T-395/94 *Atlantic Container Line AB v Commission* [2002] ECR II-875, [2002] 4 CMLR 1008, paras 410–420.

<sup>34</sup> Cases 6/73 and 7/73 [1974] ECR 223, [1974] 1 CMLR 309.

<sup>35</sup> Commission decision of 24 March 2004, substantially upheld on appeal Case T-201/04 *Microsoft Corp v Commission* [2007] ECR II-3601, [2007] 5 CMLR 846.

<sup>36</sup> *Ibid*, paras 1251–1279.

<sup>37</sup> Case T-24/90 *Automec v Commission (No 2)* [1992] ECR II-2223, [1992] 5 CMLR 431.

supply cannot in itself be unlawful under Article 101. The Commission could order an undertaking to terminate an agreement not to supply, but it does not follow that it can also make an order to supply. Any further civil law consequences of an infringement of Article 101 should be determined in the domestic courts of Member States<sup>38</sup>.

### (B) Structural remedies

Regulation 17 did not specifically provide for a structural remedy, and the explicit inclusion of this possibility in Regulation 1/2003 was controversial. Article 7(1) states that structural remedies can be imposed only where there is no equally effective behavioural remedy or where a behavioural remedy would be more burdensome for the undertaking concerned than the structural remedy. Recital 12 adds that changes to the structure of an undertaking as it existed before the infringement was committed would be proportionate only where there is a substantial risk of a lasting or repeated infringement that derives from the very structure of the undertaking. A possible example of this could arise where a vertically-integrated undertaking consistently denies access to an essential facility or discriminates against downstream competitors in relation to a vital input; another example could be where an undertaking repeatedly indulges in margin-squeezing<sup>39</sup>. The Commission has not yet imposed a structural remedy under Article 7; however in several cases, particularly in the energy sector, structural commitments were offered to, and accepted by, the Commission under Article 9 of the Regulation<sup>40</sup>.

### (C) Past infringements

Article 7(1) of Regulation 1/2003 ends by providing that the Commission, where it has a legitimate interest in doing so, may adopt a decision that an infringement has been committed in the past<sup>41</sup>. There might be an interest in doing so, for example in order to clarify an important point of principle or as a way of facilitating a follow-on action for damages<sup>42</sup>. However the Commission must explain why there is an EU interest in the adoption of a decision relating to past behaviour, and a failure to do so could lead to the decision being annulled on appeal<sup>43</sup>; an example of such an explanation can be found in *Morgan Stanley/Visa International and Visa Europe*, where the Commission gave, among its reasons, that Visa continued to deny that its behaviour was contrary to Article 101 and that it wished to impose a fine<sup>44</sup>. The Commission cannot state in the narrative of its decision that an undertaking has committed an infringement of the competition rules unless it also reaches a conclusion to that effect in the operative part of its decision: the undertaking has a right of appeal only in relation to the operative part of the decision and

<sup>38</sup> Ibid, para 50; see also Cases C-377/05 and C-376/05 *A Brünsteiner GmbH v Bayerische Motorenwerke AG* [2006] ECR I-11383, [2007] 4 CMLR 259, paras 48–51.

<sup>39</sup> See ch 17, 'Refusal to Supply a new customer', pp 697–711 and ch 18, 'Margin Squeezing', pp 754–759 on these practices.

<sup>40</sup> See 'Article 9: commitments', pp 255–261 below.

<sup>41</sup> This was possible under Regulation 17: see Case 7/82 *GVL v Commission* [1983] ECR 483, [1983] 3 CMLR 645; *Bloemenveilingen Aalsmeer* OJ [1988] L 262/27, [1989] 4 CMLR 500, paras 164–168; *Distribution of Package Tours During the 1990 World Cup* OJ [1992] L 326/31; *Zera/Montedison* OJ [1993] L 272/28, [1995] 5 CMLR 320, para 132; *Europe Asia Trades Agreement* OJ [1999] L 193/23, [1999] 5 CMLR 1380, paras 182–185.

<sup>42</sup> See ch 8, 'Article 16: uniform application of EU competition law', pp 304–305.

<sup>43</sup> See Joined Cases T-22/02 and 23/02 *Sumitomo Chemical Co Ltd v Commission* [2005] ECR II-4065, [2006] 4 CMLR 42, paras 129–140.

<sup>44</sup> Commission decision of 3 October 2007, upheld on appeal Case T-461/07 *Visa Europe v Commission* [2011] ECR II-000, [2011] 5 CMLR 74.

should not be exposed to the risk, for example, of a damages claim in relation to assertions of fact which it has no ability to challenge<sup>45</sup>.

#### (D) *Complainants*

Article 7(2) of the Regulation provides that those entitled to lodge a complaint for the purpose of Article 7(1) are natural or legal persons who can show a legitimate interest and Member States. The position of complainants is considered below<sup>46</sup>.

##### (ii) **Article 8: interim measures**

Article 8(1) of the Regulation provides that, in cases of urgency due to the risk of serious and irreparable damage to competition, the Commission, acting on its own initiative<sup>47</sup>, may, on the basis of a prima facie finding of infringement, order interim measures. Article 8(2) states that an order shall be for a specified period of time, and may be renewed in so far as this is necessary and appropriate. Regulation 17 was silent on the issue of interim measures, but the Court of Justice established in *Camera Care v Commission*<sup>48</sup> that the Commission did have power under Article 3 of that Regulation to grant interim relief. Recital 11 of Regulation 1/2003 says that explicit provision should be made for interim measures. In practice the Commission did not often adopt interim measures under the *Camera Care* judgment: it preferred third parties to seek interim relief in their domestic courts<sup>49</sup> or from NCAs<sup>50</sup>. The Commission has yet to impose interim measures under Article 8<sup>51</sup>. On a few occasions the Commission has negotiated an interim settlement with undertakings without formally adopting an interim decision. This happened for example in *Hilti*<sup>52</sup>; the terms of the undertaking were subsequently broken and the Commission took this into account in its final decision.

##### (iii) **Article 9: commitments**

Article 9 provides for the adoption of decisions by the Commission whereby undertakings under investigation make legally-binding commitments as to their future behaviour;

<sup>45</sup> Case T-474/04 *Pergan Hilfsstoffe für Industrielle Prozesse GmbH v Commission* [2007] ECR II-4225, [2008] 4 CMLR 148.

<sup>46</sup> See 'The position of complainants', p 286 below.

<sup>47</sup> Note that interim measures are adopted, if at all, at the initiative of the Commission and not pursuant to any 'right' of complainants to ask the Commission to act: see Nordsjö 'Regulation 1/2003: Power of the Commission to Adopt Interim Measures' (2006) 27 ECLR 299.

<sup>48</sup> Case 792/79 R [1980] ECR 119, [1980] 1 CMLR 334.

<sup>49</sup> On applications for interim measures in the UK courts see ch 8, 'Interim relief', p 310.

<sup>50</sup> On the powers of the OFT in the UK to adopt interim measures see ch 10, 'Interim measures', p 398.

<sup>51</sup> The decisions that the Commission adopted prior to Regulation 1/2003 will be relevant if and when it makes any decisions under Article 8: see eg *Ford Werke AG-Interim Measure* OJ [1982] L 256/20, [1982] 3 CMLR 263: this decision was annulled on appeal to the Court of Justice Cases 228/82 and 229/82 *Ford Werke AG v Commission* [1984] ECR 1129, [1984] 1 CMLR 649; *ECS/AKZO* OJ [1983] L 252/13, [1983] 3 CMLR 694; *BBI/Boosey and Hawkes: Interim Measures* OJ [1987] L 286/36, [1988] 4 CMLR 67; *Ecosystem SA v Peugeot SA* [1990] 4 CMLR 449, upheld on appeal Case T-23/90 *Peugeot v Commission* [1991] ECR II-653, [1993] 5 CMLR 540; *Langnese-Iglo/Mars* unreported decision of 25 March 1992; see XXIIInd *Report on Competition Policy* (1992), point 195: this decision was suspended in part in Cases T-24/92 and 28/92 R *Langnese-Iglo GmbH v Commission* [1992] ECR II-1839; *Sealink/B & I - Holyhead: Interim Measures* [1992] 5 CMLR 255; *Sea Containers v Stena Sealink - Interim Measures* OJ [1994] L 15/8, [1995] 4 CMLR 84; *Irish Continental Group v CCI Morlaix* [1995] 5 CMLR 177; and *NDC Health/IMS Health: Interim Measures* OJ [2002] L 59/18: this decision was subsequently withdrawn: Commission Press Release 1P/03/1159, 13 August 2003.

<sup>52</sup> The undertakings given by Hilti were attached as an Annex to the Commission's final decision: *Eurofix-Bauco v Hilti* OJ [1988] L 65/19, [1989] 4 CMLR 677; other examples of interim undertakings include *Ford Motor Co XVth Report on Competition Policy* (1985), point 49; *British Sugar/Napier Brown XVth Report on Competition Policy* (1986), point 74; *Irish Distillers Group v G C & C Brands Ltd* [1988] 4 CMLR 840.

the Commission then closes its file without making a finding as to whether there has been or continues to be an infringement of Articles 101 and/or 102. As the Court of Justice explained in *Commission v Alrosa*<sup>53</sup> the Article 9 procedure enables the rapid solution of some cases and is based on considerations of procedural economy. Article 9 was influenced by the practice in the US of settling cases on the basis of ‘consent decrees’<sup>54</sup>. Article 9 was an innovatory provision in Regulation 1/2003: there were no provisions in Regulation 17 whereby a case could be settled on the basis of legally-binding commitments. Despite this there were several cases in which the Commission did close its file on the basis of commitments, some of which were clearly of great significance: among the best known were *IBM*<sup>55</sup>, *Microsoft (licensing agreements)*<sup>56</sup>, *Interbrew*<sup>57</sup>, *IRI/Nielsen*<sup>58</sup> and *Digital*<sup>59</sup>. Article 9 of Regulation 1/2003 for the first time provided a legal basis for commitments; it has generated quite a lot of literature<sup>60</sup>. By 20 June 2011 commitments had been accepted in 23 cases, as shown in Table 7.1 below (‘Table of Article 9 commitment decisions’, p 259).

### (A) Article 9: substantive rules

Article 9(1) of Regulation 1/2003 provides that, where the Commission intends to adopt a decision requiring that an infringement of Articles 101 and/or 102 be brought to an end and the undertakings concerned offer commitments to meet the concerns expressed by the Commission in its preliminary assessment, the Commission may adopt a decision that makes those commitments binding on the undertakings. The final sentence of Article 9(1) provides that the decision may be for a specified period (though this is not a requirement<sup>61</sup>) and shall conclude that there are no longer grounds for action by the Commission. Article 9(2) provides that the Commission may reopen the proceedings in certain specified circumstances, for example where the undertakings concerned act contrary to their commitments. Recital 13 of the Regulation states that the Article 9 procedure is not appropriate in cases where the Commission intends to impose a fine: commitment decisions are therefore excluded in the case of hard-core cartels. Furthermore the Commission is never obliged to accept commitments under Article 9 rather than

proceeding under Article 7 to a finding of infringement<sup>62</sup>. In a memorandum of 17 September 2004 the Commission said that commitments may be behavioural or structural and may be limited in time<sup>63</sup>; structural commitments have been accepted in several cases in the energy and transport sectors<sup>64</sup>.

The Court of Justice has held that a decision under Article 9 is conceptually distinct from an infringement decision under Article 7: the purpose of Article 7 is to bring an infringement to an end, whereas a decision under Article 9 is intended to address any concerns that the Commission might have following its preliminary assessment<sup>65</sup>. It follows that the Commission is not obliged, when agreeing to accept a commitment under Article 9, to equate the remedy offered with a measure that it could have imposed under Article 7<sup>66</sup>; an undertaking might offer a change of behaviour under Article 9 that the Commission could not have demanded under Article 7<sup>67</sup>.

Article 23(2)(c) of Regulation 1/2003 provides that fines can be imposed on an undertaking that fails to comply with a commitment of up to 10 per cent of its total turnover in the preceding business year. Article 24(1)(c) provides for the imposition of periodic penalty payments of up to 5 per cent of average daily turnover in the previous business year for a continuing infringement of a commitment decision.

### **(B) Article 9: procedure**

The Article 9 procedure is a formal one and entails the initiation of proceedings by the Commission. The Commission does not have to issue a statement of objections: it would suffice that it sends the undertakings concerned a 'preliminary assessment' of its case which may be shorter and less formal than a statement of objections. The preliminary assessment may be contained in a letter or may be sent as an independent document. The preliminary assessment or statement of objections gives the undertakings concerned a period of time within which to respond to the Commission's concerns and to offer draft commitments.

The Court of Justice has held that a third party is not a 'party concerned' in the sense of Article 27(2) of Regulation 1/2003<sup>68</sup> which means that it does not have a right of access to the Commission's file in a case being conducted under the commitments procedure<sup>69</sup>.

Article 27(4) of the Implementing Regulation provides that where the Commission intends to adopt an Article 9 decision it must publish a concise summary of the case and the main content of the commitments; third parties are then given an opportunity to comment within a fixed time limit of not less than one month. The Commission has said that it will publish the full text of the draft commitments in their original language on the Internet<sup>70</sup>. It adds that the process of 'market testing' the draft commitments may reveal weaknesses in them that could lead the Commission to renegotiate them or abandon the Article 9 procedure and revert to the possibility of proceeding to an infringement decision under Article 7: this happened in the case of *CISAC*<sup>71</sup>. Article 30 of Regulation 1/2003 provides that the Commission must publish its Article 9 decisions.

<sup>70</sup> See Commission MEMO/04/217, 17 September 2004.

<sup>71</sup> See Table 7.1 below.

**(C) Article 9: practical considerations**

Various practical points should be noted about Article 9 commitments. First, recital 13 of Regulation 1/2003 says that commitment decisions will not conclude whether or not there has been or still is an infringement of the competition rules, and adds that commitment decisions are without prejudice to the powers of NCAs and national courts to decide upon the case, a point repeated in the final sentence of recital 22. It follows that the fact that the Commission accepts commitments from undertakings as to their future behaviour in no way immunises them from the possibility of a challenge as to their past behaviour; in particular they remain vulnerable to a standalone action for damages in a national court.

Where undertakings give commitments to the Commission as to their future behaviour the question arises of whether third parties could challenge conduct that is consistent with the commitments as being unlawful under Articles 101 and/or 102. Article 9 of the Regulation simply states that the Commission's decision 'shall conclude that there are no longer grounds for action by the Commission'. However this does not in itself mean that the Commission has concluded that there is no longer an infringement: it could mean that it has decided, having been offered suitable commitments, that the case is no longer one that, as a matter of administrative priority, it wishes to pursue. It would seem to follow that a commitment decision does not provide immunity as to future behaviour either.

Given that the Article 9 procedure is voluntary on the part of the parties that offer commitments it is unlikely that they would appeal against the substance of an Article 9 decision, and this has never happened; however they may wish to challenge aspects of the Commission's procedure, such as their right of access to the file. Undertakings that offer commitments could appeal against the Commission's refusal to accept them; however, the General Court having said that the Commission is never obliged to accept commitments, it seems unlikely that such appeals will succeed<sup>72</sup>. Third parties may wish to bring Article 9 cases to the General Court. This might happen where they have complained to the Commission of anti-competitive behaviour, but where they believe that a commitment has been accepted which is inadequate to bring an end to the infringement: this happened in the case of *Hynix Semiconductor v Commission*<sup>73</sup>, an appeal against the Commission's decision in *Rambus*.

Table 7.1 provides details of cases in which the Commission had accepted commitments by 20 June 2011.

**(D) Comment**

A few observations may be made about the Article 9 decisions adopted since Regulation 1/2003 entered into force. The first is that it is probably true to say that there have been more Article 9 decisions than was anticipated when the Regulation was adopted. In particular nine decisions were adopted in 2009 and 2010; this may, in part, be explained by a desire on the part of Commissioner Kroes to bring an end to a number of high-profile and complex cases, such as *Microsoft (tying)*, before the end of her term as Commissioner for Competition. A second point is that more than half of the Article 9 decisions arose from investigations concerning possible infringements of Article 102 rather than Article 101. This is not surprising: as noted, the Article 9 procedure is not used in the case of hardcore cartels, and the Commission adopts several infringement decisions each year under

<sup>72</sup> Note the pending appeals in Case T-421/08 *Performing Right Society v Commission* and Case T-433/08 *Società Italiana degli Autori ed Editori v Commission*, not yet decided.

## 7.1 Table of Article 9 commitment decisions

Case name	Date of publication of proposed commitments	Date when commitments were made legally binding	Date until which commitments to remain in force
<i>DFB</i>	14.9.2004	19.1.2005	30.6.2009
<i>Coca-Cola</i>	19.10.2004	22.6.2005	31.10.2010
<i>Repsol CPP SA</i> <sup>74</sup>	20.10.2004	12.4.2006	31.12.2011
<i>Alrosa</i> <sup>75</sup>	3.6.2005	22.2.2006	Infinite duration
<i>BUMA/SABAM (Santiago Agreement)</i>	17.8.2005	No decision taken	
<i>Austrian Airlines/SAS cooperation agreement</i>	22.9.2005	No decision taken	
<i>The Football Association Premier League Limited</i>	30.4.2004	22.3.2006	30.6.2013
<i>Cannes Agreement</i>	23.5.2006	4.10.2006	Infinite duration
<i>Carmakers (DaimlerChrysler, Opel, Toyota and Fiat)</i>	22.3.2007	14.9.2007	May 2010
<i>Distrigaz</i>	5.4.2007	11.10.2007	31.10.2010
<i>CISAC</i>	9.6.2007	The Commission abandoned the Article 9 procedure and adopted an infringement decision <sup>76</sup>	
<i>Sky Team</i>	19.10.2007	No decision taken	

(continued)

<sup>74</sup> On appeal Case T-274/06 *Estaser El Mareny v Commission*, order of 25 October 2007 dismissing the action as inadmissible; see also Case T-45/08 *Transportes Evaristo Molina v Commission*, order of 14 November 2008 dismissing the action as inadmissible; appeal dismissed, Case C-36/09 P, order of 11 November 2010.

<sup>75</sup> Decision annulled on appeal to the General Court, Case T-170/06 *Alrosa Co Ltd v Commission*, [2007] ECR II-2601, [2007] 5 CMLR 494; on appeal the Court of Justice set aside the judgment of the General Court, Case C-441/07 P *Commission v Alrosa Co* [2010] ECR I-000, [2010] 5 CMLR 643.

<sup>76</sup> *CISAC* Commission decision of 16 July 2008, on appeal Cases T-442/08 etc *CISAC v Commission*, not yet decided.

## 7.1 (continued)

Case name	Date of publication of proposed commitments	Date when commitments were made legally binding	Date until which commitments to remain in force
<i>German electricity wholesale market and German electricity balancing market</i>	12.6.2008	26.11.2008	Infinite duration
<i>RWE gas foreclosure</i>	26.11.2008	18.3.2009	Infinite duration
<i>Ship classification</i>	10.6.2009	14.10.2009	14.10.2014
<i>Rambus</i> <sup>76a</sup>	12.6.2009	9.12.2009	9.12.2014
<i>GDF foreclosure</i>	26.6.2009	3.12.2009	Various
<i>Swedish interconnectors</i>	6.10.2009	14.4.2010	24.4.2020
<i>Microsoft (tying)</i>	7.10.2009	16.12.2009	16.12.2014
<i>Long term electricity contracts in France</i>	14.10.2009	17.3.2010	Various
<i>British Airways, American Airlines and Iberia</i>	10.3.2010	14.7.2010	14.7.2020
<i>ENI</i>	5.3.2010	29.9.2010	Infinite duration
<i>Visa MIF</i>	28.5.2010	8.12.2010	8.12.2014

Article 7 in relation to them. Article 102 cases tend to be more complex than cartels, and a negotiated outcome that involves a change of behaviour to the satisfaction of the Commission but no finding of an infringement on the part of the undertaking concerned clearly can have benefits for both parties.

A third point is that a significant number of the Article 9 decisions – *Distrigaz*, *German electricity*, *RWE gas foreclosure*, *GDF foreclosure*, *Swedish interconnectors*, *Long term electricity contracts in France* and *ENI* – involved gas or electricity markets: the Commission's sectoral investigation of these markets had identified a series of concerns<sup>77</sup>, many of which have been allayed as a result of these decisions. A final point to note is that in three out of seven of these energy cases the Commission accepted structural rather than, or in addition

<sup>76a</sup> On appeal Case T-148/10 *Hynix Semiconductor v Commission*, not yet decided.

<sup>77</sup> See 'Article 17: investigations into sectors of the economy and into types of agreements', pp 267–268 below.

to, behavioural commitments: an obvious example being ENI's commitment to divest itself of its interests in three cross-border gas pipelines, thereby terminating the conflict of interest that arose from its vertical integration as both a supplier and transporter of gas<sup>78</sup>. The Commission has never imposed a structural remedy under Article 7, and yet it obtained structural remedies in these cases.

#### (iv) Article 10: finding of inapplicability

Article 10 provides that, where the EU public interest requires, the Commission may adopt a 'finding of inapplicability' that Article 101 and/or Article 102 do not apply to an agreement or practice. Firms do not have a right to ask for such a decision, but the Commission might decide to adopt one (in 'exceptional cases', as recital 14 says) where this would clarify the law and ensure its consistent application throughout the EU; the same recital adds that this might be particularly useful where new types of agreements or practices occur in relation to which there is no case law or administrative practice. The Commission had not adopted any Article 10 decisions by 20 June 2011<sup>79</sup>. Article 10 (or informal guidance, discussed below) might be a useful tool with which the Commission could illustrate the circumstances in which vertical agreements imposing resale price maintenance might be permitted<sup>80</sup> or apparently abusive behaviour might be objectively justified or economically efficient<sup>81</sup>.

#### (v) Informal guidance

The need for undertakings to have legal certainty in order to promote innovation and investment is acknowledged in recital 38 of Regulation 1/2003: it says that where there is genuine uncertainty because of novel or unresolved questions of competition law undertakings may seek informal guidance from the Commission. Both Article 10 and recital 38 address the anxieties of those who were concerned that the procedure of notifying agreements for individual exemptions under Article 101(3) was to be abolished. The Commission has issued a *Notice on informal guidance relating to novel questions arising under Articles [101 and 102 TFEU] (Guidance letters)*<sup>82</sup>. The *Notice* points out that undertakings have access to a substantial body of case law, decisional practice, block exemptions, guidelines and notices enabling them to undertake a self-assessment of the legality of their commercial plans<sup>83</sup>; however it also notes that there might be cases in which a guidance letter would be appropriate<sup>84</sup>. The Commission says that issuing a guidance letter would be considered only where the following cumulative criteria are satisfied:

- there is no current case law, guidance or precedent in relation to a particular type of agreement or practice
- guidance would be useful taking into account the economic importance from the point of view of the consumer of the goods or services to which the agreement or practice relates and/or
- the extent to which the agreement or practice corresponds to more widely spread economic usage in the marketplace and/or

<sup>78</sup> Structural commitments (the divestiture of airport slots) were also accepted by the Commission in *British Airways, American Airlines and Iberia*, decision of 14 July 2010.

<sup>79</sup> See Commission Staff Working Paper accompanying the *Report on the functioning of Regulation 1/2003 SEC(2009) 574 final*, para 114, available at [www.ec.europa.eu](http://www.ec.europa.eu).

<sup>80</sup> See ch 16, 'Resale price restrictions', pp 647–649.

<sup>81</sup> See ch 5, 'Defences', pp 210–212.

<sup>82</sup> OJ [2004] C 101/78.

<sup>83</sup> *Ibid*, para 3. <sup>84</sup> *Ibid*, para 5.

- the scope of the investments linked to the transaction in relation to the size of the undertakings concerned and the extent to which the transaction relates to a structural operation such as the creation of a non-full-function joint venture
- guidance can be given on the basis of information already provided to the Commission and no further fact-finding is required<sup>85</sup>.

The Commission will not issue guidance letters in relation to purely hypothetical questions<sup>86</sup>. A memorandum should be submitted with a request for a guidance letter containing information specified by the Commission<sup>87</sup>. A guidance letter will set out a summary of the facts on which it is based and the principle legal reasoning underlying the Commission's understanding of the novel questions raised by the request<sup>88</sup>. Guidance letters will be published on the Commission's website, subject to the deletion of business secrets<sup>89</sup>. Guidance letters are not Commission decisions and do not bind NCAs or national courts<sup>90</sup>. No such letters had been issued by 20 June 2011.

#### (vi) Settlements of cartel cases<sup>91</sup>

##### (A) Introduction

In July 2008 the Commission introduced a system for settling cartel cases: the package consisted of Regulation 622/2008 that amends Regulation 773/2004, in particular by inserting a new Article 10a into that Regulation, entitled 'Settlement procedure in cartel cases'<sup>92</sup> and a *Settlements Notice*<sup>93</sup>. The procedure is available for any case that was pending at the time of publication of the *Settlements Notice* in the Official Journal (2 July 2008) and any subsequent case<sup>94</sup>. The essence of the settlement system is that at a certain point in a cartel investigation the parties, having seen the evidence in the Commission's file, acknowledge their involvement in the cartel and their liability for it; in return for this the Commission reduces the fine that it would otherwise have imposed on them by 10 per cent<sup>95</sup>. The reduction of a fine is a reward for cooperation: settlements are *not* a negotiation between the Commission and the cartellists as to the existence of the infringement or the level of the penalty<sup>96</sup>. The advantages to the Commission of the settlements procedure are that cases can be concluded more quickly than would otherwise have been the case, and that it is unlikely that there will be any appeals to the EU Courts: this frees up resources that can be deployed on other cartel investigations. The advantages to the parties, apart from the reduced fine, are that less time and money are

<sup>85</sup> Ibid, para 8.

<sup>86</sup> Ibid, para 10.

<sup>87</sup> Ibid, para 14.

<sup>88</sup> Ibid, para 19.

<sup>89</sup> Ibid, para 21.

<sup>90</sup> Ibid, para 25.

<sup>91</sup> Note that the competition authorities in the UK have also made use of settlements procedures: see ch 10, 'Settlements and early resolution of cases', p 418; for discussion of settlements see Whish 'Settlements – the Future of Competition Litigation?' in *Current Developments in European and International Competition Law* (14th st Gallen International Competition Law Forum, ed Baudenbacher, Helbing Lichtenhahn, 2008); Lawrence and Sansom 'The Increasing Use of Administrative Settlement Procedures in UK and EC Competition Investigations' (2007) 3 *Competition Law Journal* 163; some papers on settlements will be found in *European Competition Law Annual 2006: Enforcement of Prohibition of Cartels* (Hart Publishing, 2007, eds Ehlermann and Atansiu), 597ff; Wils 'The Use of Settlements in Public Antitrust Enforcement: Objectives and Principles' (2008) 31(3) *World Competition*. The OECD held a roundtable discussion on *Plea Bargaining/Settlement of Cases* in 2006, available at [www.oecd.org](http://www.oecd.org); see also the settlement agreed between the South African Competition Commission and Pioneer Foods, Media Release of 2 November 2010, available at [www.compcom.co.za](http://www.compcom.co.za), where Pioneer agreed not only to pay a fine and to adjust its prices of flour and bread, but also to create a fund to make finance available on favourable terms that would enable small and medium-sized enterprises to enter the market.

<sup>92</sup> OJ [2008] L 171/3.

<sup>93</sup> *Notice on the conduct of settlement procedures in view of the adoption of Decisions pursuant to Article 7 and Article 23 of Council Regulation No 1/2003 in cartel cases* OJ [2008] C 167/1.

<sup>94</sup> *Settlements Notice*, para 34.

<sup>95</sup> Ibid, para 32.

<sup>96</sup> Ibid, para 2.

spent on the investigation; and there may also be reputational benefits where investigations are speedily concluded rather than lasting for many years.

Reduced fines under the *Settlements Notice* are conceptually distinct from reductions granted for voluntarily providing information under the Commission's *Leniency Notice*<sup>97</sup>: it follows that an undertaking may be able to obtain cumulative reductions<sup>98</sup>.

### (B) *Settlements procedure*

The settlements procedure, as provided for by the amendments to Regulation 773/2004, is described in Part 2 of the Commission's *Settlements Notice*: an overview of the procedure will be found at the end of the *Notice*. Paragraph 5 makes clear that the Commission retains a broad margin of discretion to determine which cases may be suitable for settlement; the Commission cannot impose a settlement on the parties<sup>99</sup>, but nor do the parties have a right to settle<sup>100</sup>. The Commission has the right at any time during the procedure to discontinue settlement discussions, in relation to a case generally or to one or more of the parties involved, where it considers that procedural efficiencies are unlikely to be achieved<sup>101</sup>.

Where undertakings indicate a willingness to participate in settlement discussions, the Commission may decide to pursue the settlement procedure on the basis of bilateral contacts<sup>102</sup>; it will control their order and sequence<sup>103</sup>. Article 10a(2) of Regulation 773/2004 provides that the parties to settlement discussions may be informed by the Commission of:

- its objections to their behaviour
- the evidence used to determine those objections
- non-confidential versions of relevant documents; and
- the range of potential fines.

Article 15(1a) of the Implementing Regulation provides that, once proceedings have been initiated, the Commission will disclose that information to the parties: the idea of this 'early disclosure' is that it should enable the parties to make an informed decision on whether or not to settle<sup>104</sup>. In appropriate cases the Commission will set a time limit of at least 15 working days for an undertaking to produce a 'settlement submission'<sup>105</sup>; undertakings can call upon the Hearing Officer at any point during the procedure, whose duty is to ensure that the effective exercise of the rights of defence is respected<sup>106</sup>. If the parties fail to introduce a settlement submission the case will continue under the standard investigative procedure<sup>107</sup>.

Parties opting for the settlement procedure must make a formal request in the form of a settlement submission<sup>108</sup>. After receipt of a settlement submission the Commission will send the parties a statement of objections; this will be able to take into account the views of the parties, as contained in their submission<sup>109</sup>. The Commission would expect

<sup>97</sup> See 'The Commission's Leniency Notice', pp 280–282 below.

<sup>98</sup> This happened to three of the undertakings concerned, Infineon, Hynix and Samsung, in the Commission's first settlement decision, *DRAM*, Commission decision of 19 May 2010.

<sup>99</sup> *Settlements Notice*, para 4; see also Recital 4 of Regulation 622/2008.

<sup>100</sup> *Settlements Notice*, para 6. <sup>101</sup> Article 10a(4) of Regulation 773/2004.

<sup>102</sup> *Settlements Notice*, para 14.

<sup>103</sup> *Ibid*, para 15. <sup>104</sup> *Ibid*, para 16.

<sup>105</sup> Article 10a(2), final subparagraph, of Regulation 773/2004 and para 17 of the *Settlements Notice*.

<sup>106</sup> *Settlements Notice*, para 18.

<sup>107</sup> *Ibid*, para 19; on the standard procedure see 'A typical case', pp 285–286 below.

<sup>108</sup> See para 20 of the *Settlements Notice* which specifies the content of a settlement submission.

<sup>109</sup> *Ibid*, para 25.

them then to reply, within a period of not less than two weeks, simply confirming that the statement of objections corresponds to their submissions and that they remain committed to the settlement procedure<sup>110</sup>. The Commission may decide not to accept the parties' settlement submission, in which case it could issue a statement of objections in accordance with the standard procedure<sup>111</sup>.

Assuming that the case does proceed to a settlement, the parties will not seek an oral hearing; nor will they request access to the file after receiving the statement of objections: these are examples of the procedural efficiencies that lead to quicker decisions<sup>112</sup>. As already noted, paragraph 32 of the *Settlements Notice* states that the fine imposed by the Commission will be reduced by 10 per cent from what it would otherwise have been; the 10 per cent reduction will be made to the amount of the fine after the 10 per cent cap on the maximum fine payable has been applied<sup>113</sup>, and any increase for deterrence will not exceed a multiplication of two<sup>114</sup>.

Paragraphs 35 to 40 of the *Settlements Notice* deal with the disclosure of settlement submissions to other parties to the alleged cartel, complainants, NCAs and national courts, and adopt a predominantly cautious approach<sup>115</sup>. Paragraph 41 of the *Settlements Notice* acknowledges the fact that all final decisions taken by the Commission under Regulation 1/2003 can be appealed to the General Court and, on a point of law, to the Court of Justice. However this is unlikely to happen often in practice. None of the parties in the *DRAM* case appealed. The only undertaking to do so in the second settlement case, *Animal Feed Phosphates*<sup>116</sup>, was Timab<sup>117</sup>, which had originally participated in the settlement discussions but then decided to withdraw and to contest the case.

#### (D) Chapter IV: cooperation

Recital 15 of Regulation 1/2003 states that the Commission and the NCAs should form a 'network of public authorities'. The network is known as the European Competition Network; its composition and operation in practice are described in section 3 below<sup>118</sup>. The members of the ECN are linked by a secure Intranet. Recital 21 adds that cooperation between the Commission and the national courts is also necessary, and recital 22 stresses the need for uniform application of the competition rules on the part of the Commission, NCAs and national courts. Articles 11 to 16 of the Regulation contain provisions to promote cooperation between the Commission, NCAs and national courts. The Commission has issued two important notices on cooperation, the *Notice on cooperation within the network of competition authorities* ('the *Notice on NCA cooperation*')<sup>119</sup> and the *Notice*

<sup>110</sup> Article 10a(3) of Regulation 773/2004 and paragraph 26 of the *Settlements Notice*.

<sup>111</sup> *Settlements Notice*, para 27. <sup>112</sup> *Ibid*, para 28.

<sup>113</sup> On this cap see 'Article 23: fines', pp 275–276 below.

<sup>114</sup> On the uplift of fines for deterrence see 'Basic amount of the fine', p 277 below.

<sup>115</sup> See also Article 6(1) of Regulation 773/2004 which provides that a complainant does *not* have a right to receive a non-confidential version of the statement of objections in a settlement case, but only written information about the nature and subject-matter of the procedure. There is an appeal against the Commission's decision to refuse access to decisions fixing the probable ranges of fines imposed following the settlement procedure in *Animal Feed Phosphates*, Cases T-14/11 and T-211/11 *Timab Industries and CFPR v Commission*, not yet decided.

<sup>116</sup> See Commission Press Release IP/10/985, 20 July 2010.

<sup>117</sup> Case T-456/10 *Timab Industries SA v Commission*, not yet decided.

<sup>118</sup> See 'Case allocation under Regulation 1/2003', p 289.

<sup>119</sup> OJ [2004] C 101/43; note that this *Notice* is subject to periodic review by the Commission and the NCAs: *ibid*, para 70.

on the co-operation between the Commission and courts of the EU Member States in the application of Articles [101 and 102 TFEU]<sup>120</sup>.

**(i) Article 11: cooperation between the Commission and the NCAs<sup>121</sup>**

Article 11(1) of the Regulation provides that the Commission and the NCAs are to apply the competition rules in close cooperation. Article 11(2) requires the Commission to transmit to NCAs the most important documents it has collected with a view to the adoption of decisions under Articles 7 to 10 (above) or Article 29(1) (below). Article 11(3) requires NCAs to inform the Commission in writing before or without delay after commencing proceedings under Article 101 or Article 102; this information may also be made available to the NCAs via the Intranet. The *Notice on NCA cooperation* explains that the purpose of Article 11(2) and (3) is to ensure that cases can be allocated to a 'well placed' authority<sup>122</sup>. The *Notice* sets out the principles by reference to which a well-placed authority is to be identified<sup>123</sup>. The Commission is particularly well placed where an agreement or practice has effects in more than three Member States<sup>124</sup>.

Article 11(4) and Article 11(6) are of particular importance. Article 11(4) provides that, not later than 30 days before adopting an infringement decision, accepting commitments or withdrawing the benefit of a block exemption, NCAs must inform the Commission: guidance on the application of Article 11(4) will be found in the *Notice on NCA cooperation*<sup>125</sup>. Article 11(6) provides that the initiation by the Commission of proceedings shall relieve NCAs of their competence to apply Articles 101 and 102<sup>126</sup>; the *Notice* provides guidance on how this provision is to be applied in practice<sup>127</sup>. Article 11(4) and (6) are central to the functioning of Regulation 1/2003 and mean that the Commission can halt the proceedings of an NCA and take a case over itself. The *Notice on NCA cooperation* explains the limited range of circumstances in which the Commission is likely to make use of Article 11(6)<sup>128</sup>. The power to terminate the proceedings of an NCA had not been exercised in any case as at 20 June 2011.

Article 11(5) provides that NCAs may consult with the Commission on any case involving the application of EU competition law.

**(ii) Article 12: exchange of information**

**(A) Free movement of information**

Article 12 of the Regulation provides for the exchange of information between the Commission and NCAs. It must be read in conjunction with Article 28 which contains provisions restricting the use or disclosure of information covered by an obligation of professional secrecy<sup>129</sup>. The Commission's view is that Article 12 is a key element in the

<sup>120</sup> OJ [2004] C 101/54; this *Notice* is discussed in ch 8, 'Private enforcement and Regulation 1/2003', pp 302–304.

<sup>121</sup> See Wils 'The EU Network of Competition Authorities, the European Convention on Human Rights and the Charter of Fundamental Rights of the EU' in *European Competition Law Annual 2002: Constructing the EU Network of Competition Authorities* (Hart Publishing, 2003, eds Ehlermann and Atanasiu), pp 433–464; Brammer 'Concurrent jurisdiction under Regulation 1/2003 and the issue of case allocation' (2005) 42 CML Rev 1383; Andreangeli 'The impact of the Modernisation Regulation on the guaranteees of due process in competition proceedings' (2006) 31 EL Rev 342; Brammer *Co-operation Between National Competition Agencies in the Enforcement of EC Competition Law* (Hart Publishing, 2009).

<sup>124</sup> *Ibid*, para 14.

<sup>125</sup> *Ibid*, paras 43–49.

<sup>126</sup> Article 11(6) of the Regulation requires that, if an NCA is already acting on a case, the Commission shall initiate proceedings only following consultation.

<sup>127</sup> OJ [2004] C 101/43, paras 50–57.

<sup>128</sup> *Ibid*, para 54.

<sup>129</sup> See 'Article 28: professional secrecy', p 286 below.

proper functioning of the ECN and a precondition to the efficient and effective allocation of cases<sup>130</sup>. Article 12(1) provides that the Commission and NCAs have the power to provide one another with and use in evidence any matter of fact or law, including confidential information: the exchange of information can take place both between the Commission and the NCAs and also between NCAs<sup>131</sup>. Article 12(2), however, states that information exchanged can be used only for the purpose of applying Articles 101 and 102 and in respect of the subject-matter for which it was collected; an exception to this is that an NCA can use information received in order to apply its domestic law, where the same case involves the parallel application of Article 101 or Article 102 and the outcome would be the same under both systems of law<sup>132</sup>.

**(B) Restrictions on the use of information**

In some Member States natural persons can be the subject of fines, or even terms of imprisonment: this is true, for example, where the ‘cartel offence’ is committed under the Enterprise Act 2002 in the UK<sup>133</sup>. There are restrictions on the use of information exchanged between competition authorities in these circumstances<sup>134</sup>. The first indent of Article 12(3) provides that information exchanged pursuant to Article 12(1) can be used in evidence to impose sanctions on natural persons only where the law of the transmitting authority foresees sanctions of a similar kind in relation to an infringement of Article 101 or Article 102; this means, for example, that if the law of both the transmitting and the receiving authority were to provide for terms of imprisonment to be imposed, the information exchanged could be used as evidence in a criminal case leading to imprisonment. The second indent of Article 12(3) provides that, where it is not the case that the law of the transmitting authority foresees sanctions of the same kind as the law of the receiving authority, the information can be used by the latter only where it has been collected by the former in a way which respects the same level of protection of the rights of defence of natural persons as provided for under the national rules of the receiving authority; however in this case the information cannot be used to impose custodial sentences at all, but only for other sanctions such as fines.

**(C) The exchange of information with third countries**

Article 12 does not discuss the issue of information exchange between the European Commission and institutions outside the EU. To some extent this is dealt with in cooperation agreements entered into, for example, with the US, Canada and Japan<sup>135</sup>. An attempt by AMD, a plaintiff in proceedings brought in the US, to obtain an order from a court there against Intel requiring it to produce information about alleged violations of EU competition law being investigated by the European Commission failed in *AMD Inc v Intel Corporation*<sup>136</sup>; the Commission indicated in an *amicus curiae* brief to the US court that it did not want it to make such an order.

<sup>130</sup> Notice on NCA cooperation, para 26.

<sup>131</sup> Ibid, para 27.

<sup>132</sup> Note that it follows from this wording that information could not be exchanged for the purpose of applying stricter national law on unilateral behaviour, as to which see ch 2, ‘Conflicts: Article 102’, pp 77–78.

<sup>133</sup> See ch 10, ‘The cartel offence’, pp 425–434.

<sup>134</sup> See the Notice on NCA cooperation, para 28(c).

<sup>135</sup> See ch 12, ‘The EU’s dedicated cooperation agreements on competition policy’, pp 509–511.

**(iii) Article 13: suspension or termination of proceedings**

Article 13 contains provisions to avoid the duplication of investigations; the *Notice on NCA cooperation* provides additional guidance<sup>137</sup>. Article 13(1) provides that, where an NCA is dealing with a case, this is a sufficient ground for another NCA or the Commission to suspend proceedings or to reject a complaint; however there is no obligation to do so, thereby leaving the NCAs with some discretion as to whether to proceed or not<sup>138</sup>. Article 13(2) states that an NCA or the Commission may reject a complaint which has already been dealt with by another competition authority. Recital 18 of the Regulation adds that the provisions of Article 13 are without prejudice to the right of the Commission to reject a complaint due to lack of EU interest<sup>139</sup>.

**(iv) Article 14: Advisory Committee<sup>140</sup>**

Article 14(1) of the Regulation requires the Commission to consult with the Advisory Committee on Restrictive Practices and Dominant Positions when taking key decisions, such as findings of an infringement or the imposition of a fine. Article 14(2) deals with the constitution of the Advisory Committee. Article 14(3) and (4) explain the consultation procedure, which may take place at a meeting or (an innovation introduced by the Regulation) in writing. Article 14(5) requires the Commission to take the 'utmost account' of the Advisory Committee's opinion. Article 14(7) provides that cases being decided by an NCA may be discussed at the Advisory Committee, and that an NCA may request that the Advisory Committee should be consulted when the Commission is contemplating the initiation of proceedings under Article 11(6).

**(v) Article 15: cooperation with national courts**

Article 15 deals with cooperation with national courts: this is discussed in chapter 8<sup>141</sup>.

**(vi) Article 16: uniform application of EU competition law**

Article 16 of the Regulation deals with the effect of Commission decisions on national courts (Article 16(1)) and NCAs (Article 16(2)). The position of national courts is discussed in chapter 8<sup>142</sup>. Article 16(2) provides that NCAs cannot take decisions which would run counter to a decision adopted by the Commission.

**(E) Chapter V: powers of investigation**

Chapter V of the Regulation gives the Commission various powers of investigation: of particular importance are Article 18, which enables it to request information, and Articles 20 and 21, which enable it to conduct inspections, even of an individual's home.

**(i) Article 17: investigations into sectors of the economy and into types of agreements**

Article 17(1) enables the Commission to conduct an investigation into a sector of the economy or a type of agreement where it appears that there may be a restriction or distortion of competition, for example because of the lack of new entrants into a market or the

<sup>139</sup> See 'The position of complainants', p 286 below.

<sup>140</sup> See *Notice on NCA cooperation*, paras 58–68.

<sup>141</sup> See ch 8, 'Private enforcement and Regulation 1/2003', pp 302–304.

<sup>142</sup> *Ibid*.

rigidity of prices<sup>143</sup>. Article 17(2) gives the Commission the power to request information and to conduct inspections of business (not residential) premises for the purpose of conducting a sectoral investigation. The third indent of Article 17(1) states that the Commission may publish a report on the results of its inquiry and invite comments from interested parties. The Commission does not have any remedial powers following such a sectoral investigation<sup>144</sup>. The European Commission conducts a sectoral investigation under Article 17 in order to obtain a better understanding of the competition conditions within a sector, and decides at the end of the process what should happen next.

In recent years the Commission has conducted three investigations under Article 17, into financial services, energy markets and pharmaceuticals; each took about 18 months. Full information about these investigations, including the reports themselves, can be obtained from DG COMP's website<sup>145</sup>. Commissioners for Competition<sup>146</sup> have spoken of the important role that sectoral investigations play in EU competition policy.

## (ii) Article 18: requests for information

### (A) *The Commission's powers*

Article 18 of Regulation 1/2003 enables the Commission, in order to carry out its duties under the Regulation, to require 'all necessary information'<sup>147</sup>; Article 18(1) of Regulation 1/2003 provides that the Commission may simply request information, or may require it by decision.

Article 18(2) deals with simple requests: the Commission must state the legal basis and the purpose of the request, specify what information is required and fix the time limit within which it is to be provided; it must also explain the penalties in Article 23 of the Regulation for supplying incorrect or misleading information<sup>148</sup>. There is no obligation to comply with a simple request. However, undertakings must respond to a Commission decision requiring information: Article 18(3) says that, where the Commission requires information by decision, it must also explain that a penalty can be imposed under Article 23 for not supplying the information at all, and that the undertaking required to provide the information may seek a judicial review of the decision by the General Court. The fact that an undertaking considers that the Commission has no grounds for action

<sup>143</sup> A similar power had existed in Article 12 of Regulation 17, although it was not used on many occasions; the last investigation under Article 12 was of *Sports content over third generation mobile networks*, Commission Report of 21 September 2005, available at [www.ec.europa.eu/comm/competition/antitrust/others/sector\\_inquiries/new\\_media/3g/index.html](http://www.ec.europa.eu/comm/competition/antitrust/others/sector_inquiries/new_media/3g/index.html).

<sup>144</sup> In this respect sectoral inquiries are like an OFT market study in the UK, on which see ch 11, 'OFT Market Studies', pp 458–466; but not like a market investigation by the Competition Commission under the Enterprise Act 2002, where that institution does have remedial powers: on market investigations see ch 11, 'Market Investigation References', pp 466–473.

<sup>145</sup> See [www.ec.europa.eu/comm/competition/antitrust/sector\\_inquiries.html](http://www.ec.europa.eu/comm/competition/antitrust/sector_inquiries.html).

<sup>146</sup> See Kroes 'Five years of sector and antitrust inquiries', speech of 3 December 2009; Almunia 'Competition v Regulation: where do the roles of sector specific and competition regulators begin and end?', speech of 23 March 2010.

<sup>147</sup> Information for this purpose includes documents: Case 374/87 *Orkem v Commission* [1989] ECR 3283, [1991] 4 CMLR 502, paras 13–14; Case 27/88 *Solvay & Cie v Commission* [1989] ECR 3355, [1991] 4 CMLR 502, paras 13–14; on the meaning of 'necessary information' see Case C-36/92 P *SEP v Commission* [1994] ECR I-1911; see also Case T-46/92 *Scottish Football Association v Commission* [1994] ECR II-1039.

<sup>148</sup> Penalties were imposed on a number of occasions for the provision of misleading information under Article 11 of Regulation 17: see eg *Telos* OJ [1982] L 58/19, [1982] 1 CMLR 267; *National Panasonic (Belgium) NV* OJ [1982] L 113/18, [1982] 2 CMLR 410; *National Panasonic (France) SA* OJ [1982] L 211/32, [1982] 3 CMLR 623; *Comptoir Commercial d'Importation* OJ [1982] L 27/31, [1982] 1 CMLR 440; *Peugeot* OJ [1986] L 295/19, [1989] 4 CMLR 371; *Anheuser-Busch Incorporated/Scottish & Newcastle* OJ [2000] L 49/37, [2000] 5 CMLR 75.

under Article 101 does not entitle it to resist a request for information<sup>149</sup>. However the Commission would not be entitled to request information for a purpose other than the enforcement of the competition rules, and in exercising its discretion under Article 18 it must have regard to the principle of proportionality<sup>150</sup>.

Article 18(4) explains who should provide the information: authorised lawyers can supply information on behalf of a client, although the client remains responsible for incomplete, incorrect or misleading information. Article 18(5) requires the Commission to inform NCAs in the relevant Member State of information required of undertakings by decision, and Article 18(6) provides that the Commission can request information from governments and NCAs.

Quite often the Commission will request information under Article 18 *after* it has carried out an on-the-spot investigation under Article 20 or 21<sup>151</sup>, for example because it needs to check particular points that have arisen out of the inspection or to pursue certain matters further.

The issue arises under Article 18 (and also where the Commission conducts an inspection under Article 20 or Article 21) of whether it is possible to resist answering questions or providing information on the basis that this would be self-incriminating, or that the information sought is protected by legal professional privilege. Recital 23 of Regulation 1/2003 (in acknowledgement of the case law discussed below) states that undertakings, when complying with a decision requesting information, cannot be forced to admit that they have committed an infringement; however it adds that they are obliged to answer factual questions and to provide documents, even if this information may be used to establish an infringement against them or another undertaking. The Regulation is silent on the issue of legal professional privilege. There was case law of the EU Courts on both types of privilege under Regulation 17, and it will continue to apply under Regulation 1/2003.

### **(B) Privilege against self-incrimination**

In the *Orkem* and *Solvay* cases<sup>152</sup> the Court of Justice considered whether undertakings could refuse to answer certain questions in a Commission request for information on the basis that to do so would be self-incriminating. The Court of Justice's conclusion was that there is a limited privilege against self-incrimination in EU law, which entitles undertakings to refuse to answer questions that would require them to admit to the very infringement the Commission is seeking to establish; however this privilege does not entitle them to refuse to hand over documents to the Commission which might serve to establish

<sup>149</sup> See eg *Fire Insurance* OJ [1982] L 80/36, [1982] 2 CMLR 159 and *Deutsche Castrol* OJ [1983] L 114/26, [1983] 3 CMLR 165.

<sup>150</sup> Case C-36/92 P *SEP v Commission* [1994] ECR I-1911.

<sup>151</sup> See 'Article 21: the Commission's powers of inspection', pp 272–274 below.

<sup>152</sup> Case 374/87 *Orkem v Commission* [1989] ECR 3283, [1991] 4 CMLR 502: for comment see Lasok 'The Privilege against Self-incrimination in Competition Cases' (1990) 11 ECLR 90; Case 27/88 *Solvay & Cie v Commission* [1989] ECR 3355, [1991] 4 CMLR 502; see also Case T-34/93 *Société Générale v Commission* [1995] ECR II-545, [1996] 4 CMLR 665, paras 72–74; as to privilege against self-incrimination in domestic courts see Case C-60/92 *Otto v Postbank* [1993] ECR I-5683: for comment on this case see Kerse (1994) 31 CML Rev 1375; Cumming 'Otto v Postbank and the Privilege Against Self-Incrimination in Enforcement Proceedings of Articles [81] and [82] before the English Courts' (1995) 16 ECLR 401; on self-incrimination generally see Wils 'Self-incrimination in EC antitrust enforcement: A legal and economic analysis' (2003) 26 World Competition, p 566; Vesterdorf 'Legal Professional Privilege and the Privilege against Self-incrimination in EC Law: Recent Developments and Current Issues' in [2004] Fordham Corporate Law Institute (ed Hawk), 701; MacCulloch 'The privilege against self-incrimination in competition investigations: theoretical foundations and practical implications' (2006) 26(2) Legal Studies 211.

an infringement by the undertaking concerned or by another one. It is presumably the case that the same doctrine applies in the case of inspections under Articles 20 and 21. The Court of Justice has held that privilege against self-incrimination can be claimed only where the Commission requires information under compulsion, that is to say in an Article 18(3) case; privilege does not attach to information provided in response to a mere request under Article 18(2)<sup>153</sup>.

In *Mannesmann-Röhrenwerke AG v Commission*<sup>154</sup> the General Court held that there is no absolute right to silence in competition proceedings<sup>155</sup>, except in so far as a compulsion to provide answers would involve an admission of the existence of an infringement<sup>156</sup>; in the Court's view certain questions asked by the Commission did go beyond what it was entitled to ask<sup>157</sup>. Judgments of the European Court of Human Rights in *Funke v France*<sup>158</sup> and *Saunders v United Kingdom*<sup>159</sup> have recognised a right to remain silent in criminal cases involving natural persons, but it seems after the *Mannesmann* judgment that EU law will not extend privilege this far in relation to cases under Articles 101 and 102.

In *Commission v SGL Carbon AG*<sup>160</sup> the Court of Justice held that undertakings are required to produce documents in their possession, even if those documents can be used to establish the existence of an infringement: privilege against self-incrimination applies only where the Commission requires answers to questions addressed to undertakings under investigation<sup>161</sup>.

### (C) Legal professional privilege<sup>162</sup>

That some documents are covered by legal professional privilege under EU law was established by the Court of Justice in *AM & S Europe Ltd v Commission*<sup>163</sup>, where certain papers had been withheld from Commission officials during an inspection; the same principle must surely apply to a request for information under Article 18. The *AM & S* case dealt with two issues: first, whether there is a doctrine of privilege in EU law; secondly, if there is one, what mechanism should be adopted to ascertain whether any particular document is privileged. On the first question the Court held that some, but not all, correspondence between a client and an independent lawyer based in the EU (and now the EEA) was privileged, but that dealings with an in-house lawyer or with a lawyer in a third country were not. The limitation of privilege to correspondence with EU and EEA lawyers is overtly discriminatory; at one point the Commission intended to try to persuade the Council to rectify this<sup>164</sup>, but it is understood that it subsequently dropped the idea. Privilege mainly extends to correspondence relating to the defence of a client after the initiation of proceedings by the Commission, although it also applies to correspondence before the initiation of proceedings though intimately linked with their subject-matter. The privilege belongs to the client, not the lawyer. Correspondence between an undertaking's external lawyer and a lawyer acting for a third party does not enjoy privilege<sup>165</sup>.

<sup>153</sup> Case C-407/04 P *Dalmine v Commission* [2007] ECR I-835, paras 33–36.

<sup>159</sup> (1996) 23 EHRR 313. <sup>160</sup> Case C-301/04 P [2006] ECR I-5915, [2006] 5 CMLR 877.

<sup>161</sup> *Ibid*, paras 33–51.

<sup>162</sup> See Gippini Fournier 'Legal Professional Privilege in Competition Proceedings Before the European Commission: Beyond the Cursory Glance' (2005) 28 Fordham International Law Journal 967.

<sup>163</sup> Case 155/79 [1982] ECR 1575, [1982] 2 CMLR 264.

<sup>164</sup> See the XIIIth *Report on Competition Policy* (1983), point 78 and Faull 'Legal Professional Privilege (*AM and S*): the Commission Proposes International Negotiations' (1985) 10 EL Rev 119.

<sup>165</sup> *Perindopril (Servier)*, Commission decision of 23 July 2010.

The Court of Justice limited privilege to dealings with independent lawyers because in many Member States employed lawyers are not subject to professional codes of discipline. In some Member States, for example the UK, Ireland and the Netherlands, in-house lawyers may remain subject to the rules of the Bar Council or the Law Society, so that it is arguable that this reason for excluding privilege ought not to apply; however the Court of Justice's judgment in *AM & S* was quite clear that there was no privilege in these circumstances<sup>166</sup>. In *John Deere*<sup>167</sup> the Commission relied on written advice by an in-house lawyer to show that an undertaking knew that it was infringing Article 101. However the position was slightly relaxed in *Hilti v Commission*<sup>168</sup>, where the General Court held that privilege does extend to an internal memorandum prepared by an in-house lawyer which simply reports what an independent lawyer has said.

The issue of legal professional privilege for advice given by in-house lawyers was litigated again in a case involving Akzo Nobel Chemicals and its subsidiary, Akros Chemicals, which were under investigation for participation in an alleged cartel in heat stabilisers<sup>169</sup>. In *Akzo Nobel Chemicals Ltd v Commission*<sup>170</sup> the General Court was invited to reconsider the Court of Justice's ruling in *AM & S*, but it very clearly declined to do so<sup>171</sup>. Akzo appealed against the General Court's judgment to the Court of Justice, in particular on the basis that the in-house lawyer in the *Akzo* case was subject to the legal professional rules of the Dutch Bar Council; however the Court still considered that, as an employee of Akzo, the lawyer lacked independence from his employer and therefore saw no reason to depart from the position that it had taken in the *AM & S* case<sup>172</sup>. The Court rejected a number of other arguments for departing from *AM & S*, including that the status of privilege in the laws of the Member States had evolved to a point that the law should be revised<sup>173</sup>.

On the question of how claims to privilege should be adjudicated the Court of Justice in *AM & S* held, in effect, that it (or, now, the General Court) should fulfil this task. This seems cumbersome, but is better than allowing the Commission itself to see the documents: even if a Commission official were to accept that they were privileged, an undertaking would be bound to suspect that he or she had been influenced by what had been seen. It follows that, as a matter of law, what has to happen in the case of a dispute as to privilege is that the Commission must make a formal decision, requiring the documents in question; this decision may then be appealed to the General Court, which will resolve the issue: indeed this is what happened in the *Akzo* case. In October 2011 the Mandate of the Hearing Officer was amended to give the holder of that office a role in settling disputes as to privilege<sup>174</sup>.

<sup>166</sup> See however the strong argument of Advocate General Slynn to the contrary in the *AM & S* case; note that under s 30 UK Competition Act 1998 communications with in-house lawyers do enjoy privilege: see ch 10, 'Legal professional privilege', p 399.

<sup>167</sup> OJ [1985] L 35/58, [1985] 2 CMLR 554; see similarly *London European-Sabena* OJ [1988] L 317/47, [1989] 4 CMLR 662; privilege was unsuccessfully claimed in *VW* OJ [1998] L 124/60, [1998] 5 CMLR 55, para 199.

<sup>168</sup> Case T-30/89 [1990] ECR II-163, [1990] 4 CMLR 16.

<sup>169</sup> The Commission adopted an infringement decision in relation to this cartel on 11 November 2009; the decision is on appeal to the General Court Cases T-23/10 etc *Arkema v Commission*, not yet decided.

<sup>173</sup> Case C-550/07 [2010] ECR I-000, [2010] 5 CMLR 1143, paras 69–77.

<sup>174</sup> See the Decision of the President of the European Commission of 13 October 2011 on the function and terms of reference of the hearing officer in certain competition proceedings, Article 4(2)(a).

**(iii) Article 19: power to take statements**

Regulation 1/2003 confers power on the Commission by Article 19 to interview natural or legal persons, with their consent, for the purpose of collecting information relating to the subject-matter of an investigation. Article 3 of the Implementing Regulation sets out the procedure for conducting voluntary interviews. NCAs must be informed of interviews within their territory, and they have a right to be present. There are no penalties for providing incorrect or misleading information at an interview. The Commission has used the Article 19 procedure regularly in recent years, and is reflecting on the absence of penalties under this provision<sup>175</sup>.

**(iv) Article 20: the Commission's powers of inspection<sup>176</sup>**

An important part of a competition authority's armoury is the ability to conduct a 'dawn raid' – better described as a 'surprise inspection' – on undertakings: those responsible for hard-core cartels, for example, are perfectly aware that what they are doing is illegal, and they may go to great lengths to suppress evidence of their activities. Article 20 of Regulation 1/2003 enables the Commission to conduct inspections of business premises, either by agreement or by surprise; Article 21 allows an inspection of 'other premises', including an individual's home: this had no counterpart in Regulation 17.

Article 20(1) enables the Commission, in order to be able to carry out its duties under the Regulation, to conduct 'all necessary inspections'. Article 20(2) empowers those conducting the inspection:

- to enter premises
- to examine books and other records, including data stored in electronic form, for example on a hard disk, a CD-ROM or a memory stick
- to take or obtain copies or extracts from them: it is sensible to make photocopying facilities available to the inspectors and to make a duplicate set of all items copied for retention by the undertaking that is being investigated
- to seal premises, books or records to the extent necessary for the inspection: this can be important, for example, where an inspection will go into a second day (or longer, as sometimes happens) and the inspectors wish to ensure that evidence will not be interfered with overnight<sup>177</sup>. In January 2008 the Commission imposed a fine of €38 million on E.ON Energie AG for breaching a seal that had been affixed to documents during an inspection in May 2006<sup>178</sup>; a fine of €8 million was imposed for the same reason in 2011 on Suez Environnement<sup>179</sup>
- to ask for explanations of facts or documents and to record the answers.

<sup>175</sup> See the Commission *Staff Working Paper accompanying the Report on the functioning of Regulation 1/2003* SEC(2009) 574 final, para 84.

<sup>176</sup> On the position of dawn raids under the European Convention on Human Rights see Case 37971/97 *Société Colas Est v France* (2004) 39 EHRR 17, European Court of Human Rights, finding France to have infringed the applicants' fundamental rights and awarding damages as the inspectors had entered without prior judicial warrant and Case 41604/98 *Buck v Germany* (2006) 42 EHRR 440, stating that it must be clearly established that the proportionality principle has been adhered to in order for a home search to be justified.

<sup>177</sup> Recital 25 of Regulation 1/2003 states that seals should not normally be affixed for more than 72 hours.

<sup>178</sup> See Commission Press Release IP/08/108, 30 January 2008: the Commission's decision was upheld on appeal to the General Court, Case T-141/08 *E.ON Energie v Commission* [2010] ECR II-000; this case is now on appeal to the Court of Justice, Case C-89/11 P, not yet decided.

<sup>179</sup> See Commission Press Release IP/11/632, 24 May 2011; in the Netherlands the Dutch Competition Authority imposed a fine of €269,000 on Sara Lee for breaching seals affixed to a door during an inspection: decision of 20 October 2008 available at [www.nmanet.nl/engels/home/index.asp](http://www.nmanet.nl/engels/home/index.asp).

The rules on self-incrimination and legal professional privilege, discussed above, would apply to inspections. Undertakings may submit to an inspection voluntarily; however they must submit to an inspection ordered by decision under Article 20(4), which may be conducted without prior announcement: the so-called 'dawn raid'. The Commission does not have an obligation to attempt a voluntary inspection prior to a dawn raid<sup>180</sup>.

#### (A) *Voluntary investigations*

In the case of a voluntary investigation Article 20(3) requires the Commission's officials and other accompanying persons authorised by the Commission (for example a forensic IT specialist, whose function is to search computer records, emails and other electronic media) to produce an authorisation in writing; it must specify the subject-matter and purpose of the investigation and the penalties which may be imposed for incomplete production of the required books and business records or the provision of incorrect or misleading information. NCAs must be informed of inspections in their territory. The Commission held (in decisions under Regulation 17) that a firm being investigated is under a positive duty to assist the Commission's officials in finding the information they want: it is not sufficient simply to grant them unlimited access to all the filing cabinets or the IT system<sup>181</sup>; this has been confirmed in the case law of the EU Courts<sup>182</sup>.

#### (B) *Mandatory investigations*

The Commission may adopt a decision under Article 20(4) requiring an undertaking to submit to an inspection<sup>183</sup>. The Commission must consult with the local NCA before carrying out such an inspection in its territory, but this can be done in an informal manner, by telephone if necessary<sup>184</sup>. The Commission has said that, although there is no entitlement to the presence of a lawyer at an inspection, the undertaking may consult a lawyer; however the Commission will accept only a short delay for consultation with the lawyer before beginning the inspection<sup>185</sup>. The Commission's decision must explain the penalties for non-compliance with the decision ordering the inspection, and that the decision can be reviewed by the General Court<sup>186</sup>. The Commission imposed fines on several occasions for non-compliance under Regulation 17<sup>187</sup>. Surprise inspections may take place in a number of jurisdictions – not just within the EU – as a result of coordination between different competition authorities<sup>188</sup>.

Quite apart from these penalties the Commission's recent practice has been to regard a lack of cooperation during an inspection as an aggravating factor when it comes to determining the level of the fine for the substantive infringement of Article 101 and/or 102.

<sup>180</sup> Case 136/79 *National Panasonic (UK) Ltd v Commission* [1980] ECR 2033, [1980] 3 CMLR 169, paras 8–16.

<sup>181</sup> See *Fabbrica Pisana* OJ [1980] L 75/30, [1980] 2 CMLR 354 and *Pietro Sciarra* OJ [1980] L 75/35, [1980] 2 CMLR 362; the same would be true of an investigation under Article 20(4).

<sup>182</sup> See eg Case C-301/04 P *Commission v SGL Carbon* [2006] ECR I-5915, [2006] 5 CMLR 877, para 40.

<sup>183</sup> See *Explanatory note to an authorisation to conduct an inspection in execution of a Commission decision under Article 20(4) of Council Regulation No 1/2003*, as well as a sample *Authorisation to conduct an inspection*, both available at [www.ec.europa.eu/competition/antitrust/legislation.html](http://www.ec.europa.eu/competition/antitrust/legislation.html).

<sup>184</sup> Case 5/85 *AKZO Chemie BV v Commission* [1986] ECR 2585, [1987] 3 CMLR 716, para 24.

<sup>185</sup> *Explanatory note*, para 6.

<sup>186</sup> Such an appeal was dismissed in Case T-23/09 *CNOP and CCG v Commission* [2010] ECR II-000.

<sup>187</sup> See eg *CSM NV* (€3,000); *Ukwal* OJ [1992] L 121/45, [1993] 5 CMLR 632 (€5,000); *Mewac* OJ [1993] L 20/6, [1994] 5 CMLR 275 (€4,000); *AKZO* OJ [1994] L 294/31 (€5,000).

<sup>188</sup> See Commission MEMO/03/33 of 13 February 2003 noting simultaneous inspections in the EU, US, Japan and Canada in relation to the *Heat Stabilisers* cartel; this decision is on appeal Cases T-23/10 etc *Arkema v Commission*, not yet decided.

For example in *Dutch Bitumen*<sup>189</sup> the fine on KWS was increased by 10 per cent because it refused to allow the Commission officials access to the premises and in *Professional videotapes* the fine on Sony was increased by 30 per cent because one of its employees refused to answer questions during an inspection and another shredded documents during it<sup>190</sup>.

### (C) *The involvement of Member States*

Article 20(5) of Regulation 1/2003 provides that officials of NCAs shall, at the request of the Commission, actively assist its officials with their inspections<sup>191</sup>. Where an undertaking refuses to submit to an inspection, Article 20(6) requires the Member State concerned to afford the Commission the necessary assistance to enable the inspection to take place: this may require the involvement of the police or an equivalent enforcement authority. The Commission itself is not entitled to use force to enter premises<sup>192</sup>. Article 20(7) states that, if judicial authorisation is required, for example to obtain entry to premises, this must be applied for. Article 20(8), which gives expression to the judgment of the Court of Justice in *Roquette Frères SA v Commission*<sup>193</sup>, sets out the role of the judicial authority in circumstances where it is asked, for example, to issue a warrant ordering entry into premises. The court should ensure that the Commission's decision is authentic and that the coercive measures sought are neither arbitrary nor excessive; for this purpose the court may address questions to the Commission. However the court may not call into question the necessity for the inspection, nor demand that it be provided with all the information in the Commission's file.

### (v) **Article 21: inspection of other premises**

Recital 26 of Regulation 1/2003 states that experience has shown that there are cases where business records are kept in people's homes, and that therefore it should be possible, subject to judicial authorisation, to conduct inspections there. The *SAS/Maersk Air*<sup>194</sup> decision provides an example of this, where important documents relating to a market-sharing agreement were kept in individuals' homes. Article 21 therefore confers a power on the Commission to inspect 'other premises', which can include homes; Article 21(3) requires prior authorisation by a court. It is reasonable to predict that this power will be exercised rarely, but in principle it seems correct that the Commission should be able to conduct such inspections where it has reason to believe that the individuals responsible for cartels (or, less likely, abusive practices) are keeping relevant information at home. The Commission is known to have exercised this power on two occasions between 1 May 2004 and 1 May 2009<sup>195</sup>.

### (vi) **Article 22: investigations by NCAs**

Article 22(1) of Regulation 1/2003 enables an NCA to conduct an inspection in its territory on behalf of an NCA in another Member State<sup>196</sup>. Article 22(2) provides that NCAs

<sup>189</sup> Commission decision of 13 September 2006, paras 340–341, on appeal Cases T-357/06 etc *Koninklijke Wegenbouw Stevin v Commission*, not yet decided.

<sup>193</sup> Case C-94/00 [2002] ECR I-9011, [2003] 4 CMLR 46.

<sup>194</sup> OJ [2001] L 265/15, [2001] 5 CMLR 1119, paras 7, 89 and 123.

<sup>195</sup> See para 75 of the Commission Staff Working Paper accompanying the *Report on the functioning of Regulation 1/2003*.

<sup>196</sup> A striking example of this occurred when the OFT conducted an inspection in the UK on behalf of the French Competition Authority investigating a complaint about behaviour in Réunion in the Indian Ocean: see [www.ec.europa.eu/competition/ecn/brief/01\\_2010/brief\\_01\\_2010\\_short.pdf](http://www.ec.europa.eu/competition/ecn/brief/01_2010/brief_01_2010_short.pdf), p2.

shall carry out inspections which the Commission considers to be necessary under Article 20(1) or Article 20(4)<sup>197</sup>.

## (F) Chapter VI: penalties

Articles 23 and 24 provide for fines and periodic penalty payments. The Commission cannot impose fines on individuals, except in so far as an individual acts as an undertaking<sup>198</sup>, nor can it sentence them to terms of imprisonment. Some Member States, including the UK, do have powers to impose sanctions on individuals<sup>199</sup>.

### (i) Article 23: fines<sup>200</sup>

Article 23 enables fines to be imposed on undertakings both for procedural and for substantive infringements. Procedural fines can be imposed under Article 23(1) on undertakings that commit offences in relation to requests for information or inspections under Article 17, 18 or 20 of the Regulation (fines cannot be imposed on individuals whose homes are inspected under Article 21). A typical infringement would be the supply of incorrect or misleading information, or the refusal by an undertaking to submit to an inspection.

Article 23(2) provides for very substantial fines to be imposed where undertakings infringe Articles 101 and 102 TFEU, where they contravene an interim measures decision made under Article 8 of the Regulation, or where they fail to comply with a commitment made binding by a decision under Article 9. In these cases the maximum fine that can be imposed is 10 per cent of an undertaking's worldwide turnover in the preceding business year<sup>201</sup>: clearly this can be an enormous amount, in particular since it is not limited to turnover in the market affected by the infringement, nor to turnover within the EU. Decisions can be found where the Commission has had to limit fines because the 10 per cent worldwide turnover limit had been attained<sup>202</sup>; Figure 1.11 of the Commission's Cartel Statistics shows that from 2006 to 2010 the fines on 22 of the 150 undertakings punished for infringing Article 101 represented 9 to 10 per cent of their worldwide turnover<sup>203</sup>.

<sup>197</sup> On the position in the UK see ch 10, 'EU investigations', p 402.

<sup>198</sup> See ch 3, 'Regardless of the legal status of the entity and the way in which it is financed', pp 86–87; the Commission has never imposed a fine on an individual, although in *French beef* it imposed fines on trade unions representing individual farmers: OJ [2003] L 209/12, upheld on appeal to the General Court, Cases T-217/03 and T-245/03 *FNCBV v Commission* [2006] ECR II-4987, [2008] 5 CMLR 406 and on appeal to the Court of Justice, Cases C-101/07 P and C-110/07 P *Coop de France bétail and viande v Commission* [2008] ECR I-10193, [2009] 4 CMLR 743.

<sup>199</sup> See ch 10, 'The cartel offence', pp 425–434.

<sup>200</sup> See Wils 'The European Commission's 2006 Guidelines on Antitrust Fines: A Legal and Economic Analysis' (2007) 30(2) *World Competition* 197; Motta 'On Cartel Deterrence and Fines in the European Union' (2008) 29 *ECLR* 209; Manzini 'European Antitrust in Search of the Perfect Fine' (2008) 31(1) *World Competition* 3; Vesterdorf 'The Court of Justice and Unlimited Jurisdiction: What Does It Mean in Practice?' (2009) 6(2) *CPI Antitrust Chronicle*, Spring 2009; Wils 'The Increased Level of EU Antitrust Fines, Judicial Review, and the ECHR' (2010) 33(1) *World Competition* 5; Castillo de la Torre 'The 2006 Guidelines on Fines: Reflections on the Commission's Practice' (2010) 33 *World Competition* 359; Barbier de La Serre and Winckler 'Legal Issues Regarding Fines Imposed in EU Competition Proceedings' (2010) 1(4) *Journal of European Competition Law & Practice* 327.

<sup>201</sup> Where an undertaking had no turnover in the preceding year an earlier year can be used: Case C-76/06 *Britannia Alloys v Commission* [2007] ECR I-4405, [2007] 5 CMLR 251, paras 10–33.

<sup>202</sup> See eg Case T-71/03 *Tokai Carbon v Commission* [2005] ECR II-10, [2005] 5 CMLR 489, paras 388–390; *Sodium Chlorate*, Commission decision of 11 June 2008, in the case of Finnish Chemicals; *Car Glass*, Commission decision of 12 November 2008, in the case of Soliver.

<sup>203</sup> Available at [www.ec.europa.eu/competition/cartels/statistics](http://www.ec.europa.eu/competition/cartels/statistics).

In fixing the level of a fine, the Commission is required by Article 23(3) to have regard to the gravity and to the duration of the infringement. Where a fine is imposed on a trade association Article 23(4) provides that, if the association is insolvent, the association must call for contributions from its members to cover the fine; in case of default the Commission can impose the fine on the members themselves.

It is noticeable that the cartel cases in recent years that have been appealed to the General Court contain at least as much, if not more, analysis of the level of fines than on the finding of the substantive infringement. A detailed study of the ‘science’ of setting the right level of a fine is beyond the scope of this book: the practitioners’ works cited earlier contain extensive commentary on the subject<sup>204</sup>.

The General Court has an unlimited jurisdiction on appeal to determine the level of fines; this includes the power to increase as well as to decrease the fines imposed by the Commission<sup>205</sup>.

In 2006 the Commission adopted two important Notices (replacing earlier ones) on its fining policy. The first concerned its method of calculating the level of a fine and the second its policy of allowing leniency towards whistleblowers.

## (ii) The Commission’s guidelines on the method of setting fines

The Commission enjoys a wide margin of appreciation when determining the level of fines<sup>206</sup>. However, in the interests of transparency and impartiality, it decided in 1998 to publish guidelines on its methodology when setting fines<sup>207</sup>; they were replaced in 2006 by new guidelines building on the Commission’s subsequent experience<sup>208</sup>. The *Fining Guidelines* apply in relation to cases in which the Commission issued a statement of objections after 1 September 2006, the date on which they were published in the Official Journal<sup>209</sup>. The *Fining Guidelines* respond to the criticism that, even if the Commission has a wide margin of appreciation, it is not an unfettered one; in the US, for example, there are sentencing guidelines that enable the level of a fine (and the duration of a prison sentence) to be predicted with a fairly high degree of accuracy<sup>210</sup>. The Commission points out in the *Guidelines* that fines should have a sufficiently deterrent effect both on the undertakings involved in a particular infringement of the competition rules (‘specific deterrence’) and also on other undertakings that might be inclined to act unlawfully (‘general deterrence’)<sup>211</sup>. The Court of Justice has repeatedly held that the need to deter infringements of the competition rules is one of the factors to be taken into account when determining the level of fines<sup>212</sup> and has established that the Commission is entitled to change its methodology for the setting of fines, including introducing higher fines, where

<sup>204</sup> See ch 7 n 5 above.

<sup>205</sup> See ‘Article 261: penalties’, pp 293–294 below.

<sup>206</sup> See eg Cases C-189/02 P etc *Dansk Rørindustri A/S and others v Commission* [2005] ECRI-5425, [2005] 5 CMLR 796, para 172.

<sup>207</sup> *Guidelines on the method of setting fines imposed pursuant to Article 15(2) of Regulation No 17 and Article 65(3) of the ECSC Treaty* OJ [1998] C 9/3.

<sup>208</sup> *Guidelines on the method of setting fines imposed pursuant to Article 23(2)(a) of Regulation 1/2003* OJ [2006] C 210/2, available at [www.ec.europa.eu/comm/competition/antitrust/legislation/fines.html](http://www.ec.europa.eu/comm/competition/antitrust/legislation/fines.html).

<sup>209</sup> *Ibid*, para 38.

<sup>210</sup> See the Sentencing Reform Act 1984 and the US Sentencing Commission *Guidelines Manual*, available at [www.ussc.gov](http://www.ussc.gov).

<sup>211</sup> *Fining Guidelines* OJ [2006] C 210/2, para 4.

<sup>212</sup> See eg Cases 100/80 etc *Musique Diffusion Française SA v Commission* [1983] ECR 1825, [1983] 3 CMLR 221, paras 105–106; Case C-289/04 P *Showa Denko KK v Commission* [2006] ECR I-5859, [2006] 5 CMLR 840, para 16.

this is necessary for the effective enforcement of the competition rules<sup>213</sup>. The Court of Justice has held that an undertaking cannot deduct fines when assessing its taxable profits<sup>214</sup>.

The *Guidelines* of 2006 propose a two-step methodology when setting fines.

#### (A) *Basic amount of the fine*

The Commission begins by setting a 'basic amount' for the fine, which is determined by reference to the value of the sales of the goods or services to which the infringement relates<sup>215</sup>. It is not necessary for the Commission to conduct a full definition of the relevant market for these purposes<sup>216</sup>. The basic amount will be related to a proportion of the value of such sales, depending on the degree of gravity of the infringement, multiplied by the number of years of infringement<sup>217</sup>. The gravity of the infringement is determined on a case-by-case basis<sup>218</sup>; as a general rule it will be set at a level of up to 30 per cent of the value of sales<sup>219</sup>. Hard-core cartel infringements are likely to be at the top end of the scale<sup>220</sup>. The amount determined as a result of the rules just mentioned will then be multiplied by the number of years of participation in the cartel<sup>221</sup>. Furthermore an amount of between 15 and 25 per cent of the basic amount will be imposed as a sanction for participating in the infringement in the first place, a so-called 'entry fee' intended to act as an additional deterrent<sup>222</sup>. Clearly these rules can lead to enormous fines, in particular where a cartel has lasted for a long time: the Commission's Press Release in relation to the *Organic Peroxides* cartel suggested that it had lasted for 29 years, a very significant 'multiplier'<sup>223</sup>; the *Animal Feed Phosphates* cartel lasted for almost 35 years, although not all the cartelists were involved throughout<sup>224</sup>. However it should be recalled that Article 23(2) of the Regulation provides that a fine cannot exceed 10 per cent of an undertaking's worldwide turnover.

#### (B) *Adjustments to the basic amount*

Having determined the basic amount of the fine, the Commission then takes into account various aggravating and mitigating circumstances<sup>225</sup>. Aggravating circumstances are set out in paragraph 28 of the *Guidelines* and include:

- the fact that an undertaking is a recidivist: the basic amount will be increased by up to 100 per cent for each past finding of an infringement of Article 101 or 102, whether by the Commission or an NCA<sup>226</sup>

<sup>213</sup> See eg Case C-189/02 P *Dansk Rørindustri Als v Commission* [2005] ECR I-5425, [2005] 5 CMLR 796, paras 227–228; Case C-397/03 P *Archer Daniels Midland Co v Commission* [2006] ECR I-4429, [2006] 5 CMLR 230, paras 21–22.

<sup>214</sup> Case C-429/07 *Inspecteur van de Belastingdienst v X BV* [2009] ECR I-4833, [2009] 5 CMLR 1745, para 39.

<sup>215</sup> *Fining Guidelines* OJ [2006] C 210/2, paras 12–26.

<sup>216</sup> Case T-48/02 *Brouwerij Haacht NV v Commission* [2005] ECR II-5259, [2006] 4 CMLR 621, para 59.

<sup>217</sup> *Ibid*, para 19. <sup>218</sup> *Ibid*, para 20.

<sup>219</sup> *Ibid*, para 21; the Commission adds that the particularities of a given case might mean that it would depart from the methodology in the *Guidelines*, including the 30 per cent figure: *ibid*, para 37.

<sup>220</sup> *Ibid*, para 23.

<sup>221</sup> *Ibid*, para 24.

<sup>222</sup> *Ibid*, para 25; see also para 7.

<sup>223</sup> Commission Press Release IP/03/1700, 10 December 2003.

<sup>224</sup> Commission Press Release IP/10/985, 10 July 2010.

<sup>225</sup> *Fining Guidelines* OJ [2006] C 210/2, paras 27–29.

<sup>226</sup> The largest uplifts for recidivism to date for one previous infringement have been of 50 per cent, in *Calcium Carbide* Commission decision of 22 July 2009: uplift on Evonik Degussa of 50 per cent; in *Power Transformers* Commission decision of 7 October 2009: uplift on ABB of 50 per cent; and in *Air Cargo*, Commission decision of 9 November 2010: uplift on SAS of 50 per cent; in *Heat Stabilisers* Commission

- refusal to cooperate with or obstruction of the Commission in its investigation<sup>227</sup>
- acting as leader or instigator of the infringement<sup>228</sup>.

Increases for recidivism have become common; appeals to the EU Courts against uplifts for recidivism generally fail<sup>228a</sup>. The Court of Justice confirmed in *Groupe Danone v Commission*<sup>229</sup> that the Commission is entitled to treat recidivism as an aggravating circumstance where past infringers need to be induced to change their behaviour<sup>230</sup>. There is no limitation period for considering past infringements<sup>231</sup>: the test is whether an undertaking shows a tendency to infringe the competition rules and not to draw appropriate conclusions from a finding of infringement on the part of the Commission<sup>232</sup>. An uplift can be applied for recidivism even if no fine was imposed on a previous occasion<sup>233</sup>; it would appear to be the case that the fine could be increased for a past infringement even where a firm had blown the whistle on that occasion. The previous infringements do not have to have been in the same product market<sup>234</sup>, and may have been committed by different legal entities within the same economic unit<sup>235</sup>. However a previous violation of Article 101 would not provide a pretext for a recidivist uplift of a fine in a subsequent finding of an infringement of Article 102<sup>236</sup>.

Mitigating circumstances are set out in paragraph 29 and include:

- early termination of infringing behaviour as soon as the Commission began its investigation (this does not apply to secret agreements or concerted practices, in particular cartels<sup>237</sup>)
- negligent, as opposed to intentional, infringements
- having a limited role in the infringement
- cooperating with the Commission outside the scope of the *Leniency Notice*<sup>238</sup>
- authorisation or encouragement of the infringement by public authorities or by legislation.

decision of 11 November 2009 the uplift on Arkema for three previous infringements was 90 per cent (upheld on appeal in Case T-343/08 *Arkema France v Commission* [2011] ECR II-000) and in *Calcium Carbide* the uplift on Akzo for four previous infringements was 100 per cent.

<sup>227</sup> See the *Dutch Bitumen* and *Professional Videotapes* decisions discussed at 'Mandatory investigations', pp 273–274 above.

<sup>228</sup> See eg *Candle Waxes*, Commission decision of 1 October 2008, paras 681–686, where the fine on Sasol was increased by 50 per cent as it was the leader of the cartel; this decision is on appeal to the General Court, Cases T-541/08 etc *Sasol v Commission*, not yet decided.

<sup>228a</sup> Note however two judgments in 2011 in which appeals against recidivist uplifts succeeded: Case T-39/07 *ENI v Commission* [2011] ECR II-000 and Case T-144/07 *Thyssenkrupp Liften v Commission* [2011] ECR II-000.

<sup>232</sup> Case C-413/08 P *Lafarge SA v Commission* [2010] ECR I-000, [2010] 5 CMLR 586, paras 69–71; the test includes previous cartel infringements committed under the European Coal and Steel Community Treaty: Case T-20/05 *Outokumpu Oyj v Commission* [2010] ECR II-000, [2010] 5 CMLR 1276, para 63.

<sup>233</sup> *Ibid*, para 41.

<sup>234</sup> Cases T-101/05 and T-111/05 *BASF AG v Commission* [2007] ECR II-4949, [2008] 4 CMLR 347, para 64.

<sup>235</sup> See *Candle Waxes*, Commission decision of 1 October 2008, paras 672–678; the decision is on appeal Cases T-543/08 etc *RWE and RWE Dea v Commission*, not yet decided.

<sup>236</sup> Case T-57/01 *Solvay v Commission* [2009] ECR II-4621, paras 506–511 and Case T-66/01 *ICI v Commission* [2010] ECR II-000, paras 376–387.

<sup>237</sup> See eg Case T-329/01 *Archer Daniels Martin Co v Commission* [2006] ECR II-3255, [2006] 5 CMLR 230, paras 272–287 in which the General Court upheld the Commission's refusal to recognise termination of participation in a secret cartel as an attenuating circumstance.

<sup>238</sup> See eg *Power transformers*, Commission decision of 7 October 2009, paras 262–274.

In exceptional cases the inability of an undertaking to pay a fine, to the point that its economic viability would be jeopardised, may be taken into account by the Commission<sup>239</sup>. In assessing whether a fine may result in a firm going into liquidation and exiting the market the Commission will typically consider a firm's financial statements, its liquidity, solvency and other financial ratios and its relations with banks and shareholders<sup>240</sup>. In 2010 the Commission accepted claims of inability to pay in three of its six new cartel decisions, *Bathroom Fittings*<sup>241</sup>, *Prestressing Steel*<sup>242</sup> and *Animal Feed Phosphates*<sup>243</sup>; the maximum reduction to date is 95 per cent for one of the undertakings in the *Heat Stabilisers* cartel<sup>244</sup>.

The fact that an undertaking adopts a competition law compliance programme is not a factor that the Commission is obliged to take into account as an attenuating factor<sup>245</sup>, nor that it has taken disciplinary action against employees involved in the infringement<sup>246</sup>. The Commission is not required to reduce a fine on the basis that a defendant has paid damages to the victims of its anti-competitive behaviour<sup>247</sup>.

The principle of *ne bis in idem* prevents the same person from being fined more than once for the same unlawful conduct. The principle is subject to three cumulative conditions: the facts must be identical; the offender must be the same undertaking; and the legal interest protected must be the same<sup>248</sup>. It follows that the principle does not apply where a fine has been imposed, for example, in the US, since it does not relate to the same interest as that protected by EU law<sup>249</sup>. Furthermore the Commission is permitted to cure a procedural irregularity – for example by reopening a case against a defendant whose rights of the defence have been violated<sup>250</sup> – without infringing the principle of *ne bis in idem*<sup>251</sup>. By readopting decisions in this way the Commission seeks to make the point that, although it may be possible to win procedural points on appeal to the EU Courts,

<sup>239</sup> *Fining Guidelines* OJ [2006] C 210/2, para 35; see eg *Electrical and mechanical carbon and graphite products*, Commission decision of 3 December 2003, paras 340–363, upheld on appeal Case T-68/04 *SGL Carbon AG v Commission* [2008] ECR II-2511, [2009] 4 CMLR 7; further upheld on appeal to the Court of Justice, Case C-564/08 P *SGL Carbon AG v Commission* [2009] ECR I-191.

<sup>251</sup> Case T-24/07 *ThyssenKrupp Stainless AG v Commission* [2009] ECR II-2309, [2009] 5 CMLR 1773, paras 178–192.

ultimately this will be to no avail if it is possible to cure the procedural deficiency by reopening the case.

### (iii) The Commission's Leniency Notice<sup>252</sup>

Undertakings that participate in cartels are usually fully aware that their behaviour is unlawful and go to great lengths to maintain secrecy and to avoid detection. Competition authorities therefore face considerable difficulties in detecting cartels. A crucial tool in practice is to incentivise participants in cartels to 'blow the whistle' to the relevant competition authority or authorities. The Commission's policy is to allow total immunity – a fine of zero – to the first undertaking in a cartel to blow the whistle, and to impose lower fines than would otherwise be the case on undertakings that provide it with further evidence that enables it to proceed more effectively with the investigation of a case. The encouragement of whistleblowing has proved to be immensely successful in the US in prosecuting cartels<sup>253</sup>; the US policy can be accessed on the home page of the Department of Justice<sup>254</sup>. Nearly all of the cartel cases brought by the Commission in recent years began with a whistleblower<sup>255</sup>. However it should be noted that some major cases are brought on the Commission's own initiative: it is not dependent on whistleblowers<sup>256</sup>; for example the Commission's decision in *Car Glass* originated in a 'tip-off' from an anonymous source<sup>257</sup>. It is important to point out that whistleblowing does not affect the liability of a whistleblower to pay damages to victims of a cartel as a matter of civil law<sup>258</sup>.

The Commission first adopted a Notice on leniency in 1996<sup>259</sup> which was replaced in 2002<sup>260</sup>. A new Notice was published in December 2006 setting out the Commission's current policy; the 2006 *Notice* is intended to provide greater transparency as to what is expected of undertakings when they apply for leniency; it also introduced some procedural innovations<sup>261</sup>. The *Notice* is in line with the principles of the ECN's *Model Leniency Programme* which was adopted by the heads of the NCAs in September 2006<sup>262</sup>. After some introductory comments, Section II of the *Leniency Notice* explains the circumstances in which an undertaking may qualify for immunity from fines; Section III deals with the possibility of reduced fines; Section IV discusses ways of making 'corporate statements',

<sup>252</sup> See Wils 'Leniency in Antitrust Enforcement: Theory and Practice' (2007) 30(1) *World Competition* 25; for a global review see *Leniency Regimes: Jurisdictional Comparisons* (eds Arquit, Buhart and Antoine) European Lawyer Reference 2007; *Global Antitrust Leniency Manual* (Oxford University Press, 2008, ed Mobley (Baker & McKenzie)); see also Botana 'Antitrust Enforcement and Deterrence of Collusive Behaviour: The Role of Leniency Programs' (2006/2007) 13(1) *Columbia Journal of Law* 47.

<sup>253</sup> Major cases in the US such as *Vitamins*, *Citric Acid* and *Sotheby's/Christies* all came to light as a result of whistleblowing.

<sup>254</sup> See [www.justice.gov/atr/public/guidelines](http://www.justice.gov/atr/public/guidelines).

<sup>255</sup> Between 2007 and 2010 19 out of 26 decisions of the Commission started with a whistleblower; in the period 2009–2010 this was true of 10 out of 11 decisions.

<sup>256</sup> See eg *Flat Glass* Commission decision of 28 November 2007, para 80, discussed at 'Case allocation under Regulation 1/2003', p 289 below; *Professional Videotapes* Commission decision of 20 November 2007, para 44; *Elevators and Escalators* Commission decision of 21 February 2007, para 91.

<sup>257</sup> See *Car Glass* Commission decision of 12 November 2008, para 38; the decision is on appeal to the General Court, Cases T-56/09 etc *Saint Gobain Glass France v Commission*, not yet decided.

<sup>259</sup> OJ [1996] C 207/4.

<sup>260</sup> OJ [2002] C 45/3.

<sup>261</sup> *Notice on Immunity from fines and reduction of fines in cartel cases* OJ [2006] C 298/17, available at [www.ec.europa.eu/comm/competition/cartels/legislation/leniency\\_legislation.html](http://www.ec.europa.eu/comm/competition/cartels/legislation/leniency_legislation.html); for discussion of the 2006 Notice see Suurnäkki and Tierno Centella 'Commission adopts revised Leniency Notice to reward companies that report hard-core cartels' (2007) (Spring) *Competition Policy Newsletter* 7.

<sup>262</sup> See 'Leniency', p 289 below.

including the possibility of doing so orally in order to avoid problems that might arise in civil litigation. It should be noted that there is no 'one-stop shop' for leniency applications, either within the EU or internationally: it follows that a potential leniency applicant may have to blow the whistle in a number of different jurisdictions in order fully to protect its position<sup>263</sup>. However, within the EU, there has been fairly substantial convergence of national systems of leniency<sup>264</sup>.

#### (A) Section I: introduction

The *Notice* sets out the framework for the Commission to reward undertakings that are or have been members of secret cartels that cooperate with it in its investigation<sup>265</sup>. The *Notice* recognises two types of leniency: immunity from fines and a reduction of fines. It states that immunity from fines may be justified where an undertaking makes a decisive contribution to the opening of an investigation or to the finding of an infringement<sup>266</sup>; a reduction of a fine may be justified where an undertaking provides the Commission with evidence that adds 'significant value' to that already in its possession<sup>267</sup>. The Court of Justice has held that a reduction under the leniency programme can be justified only where the conduct of the undertaking concerned demonstrates a genuine spirit of cooperation on its part<sup>268</sup>. The Commission acknowledges in the introduction to the *Leniency Notice* that the making of corporate statements ought not to expose undertakings to risks in civil litigation not experienced by undertakings that do not cooperate with it<sup>269</sup>.

#### (B) Section II: immunity from fines

Immunity from a fine will be granted to the first undertaking in a cartel to submit information to the Commission that will enable it to carry out an inspection or to find an infringement of Article 101 in connection with the cartel<sup>270</sup>; immunity will not be granted if the Commission already had sufficient evidence to proceed to an inspection or to a final decision<sup>271</sup>. The whistleblower must make a corporate statement to the Commission containing specified information such as a description of the cartel, the names, positions, office locations and, where necessary, home addresses of the individuals involved in the cartel and details of any other competition authorities that have been contacted as well as any other relevant evidence in the whistleblower's possession<sup>272</sup>. The whistleblower must comply with a series of conditions in order to qualify for immunity:

- genuine, continuous and expeditious cooperation<sup>273</sup>
- termination of any involvement in the cartel, unless the Commission considers that continuing involvement might be useful for the preparation of inspections: if the

<sup>263</sup> On this point see Schwab and Steinle 'Pitfalls of the European Competition Network – Why Better Protection of Leniency Applicants and Legal Regulation of Case Allocation is Needed' (2008) 29 ECLR 523.

<sup>264</sup> See the ECN's *ECN Model Leniency Programme: Report on Assessment of the State of Convergence*, available at [www.ec.europa.eu/competition/ecn/documents.html](http://www.ec.europa.eu/competition/ecn/documents.html).

<sup>265</sup> Note that the *Notice* does not apply to cooperation in relation to vertical agreements, for example involving resale price maintenance; however para 29 of the *Fining Guidelines* (ch 7 n 211 above) provides for reductions in fines for cooperation with the Commission 'outside the scope of the Leniency Notice'.

<sup>266</sup> *Leniency Notice* OJ [2006] C 298/17, para 4.

<sup>267</sup> *Ibid*, para 5.

<sup>268</sup> Case C-301/04 P *Commission v SGL Carbon AG* [2006] ECR I-5915, [2006] 5 CMLR 877, paras 66–70.

<sup>269</sup> *Leniency Notice*, para 6.

<sup>270</sup> *Ibid*, para 8.

<sup>271</sup> *Ibid*, paras 10 and 11.

<sup>272</sup> *Ibid*, para 9.

<sup>273</sup> For a case in which the Commission denied an undertaking immunity on the ground that it had failed in its duty of cooperation see *Italian Raw Tobacco* Commission decision of 20 October 2005, paras 430–485, on appeal Case T-12/06 *Deltafina v Commission*, upheld, [2011] ECR II-000, paras 102–182.

whistleblower were to be absent from cartel meetings, for example, the other participants might guess what has happened and realise that inspections are imminent

- it must not have destroyed, falsified or concealed any relevant evidence when contemplating its application for immunity<sup>274</sup>.

The *Leniency Notice* explains the procedure for making an application for immunity<sup>275</sup>, including the so-called ‘marker system’ whereby an undertaking can contact the Commission and agree with it a date by when it will provide the evidence needed to pass the threshold for leniency. If the undertaking ‘perfects’ the marker by the agreed date its application will be deemed to have been made at the time of the original approach to the Commission, and will therefore rank higher in the queue of leniency applicants than an undertaking that made an application before the marker was perfected<sup>276</sup>.

### (C) Section III: reduction of fines

An undertaking that does not qualify for immunity, for example because it was not the first to blow the whistle, may nevertheless qualify for a reduced fine where it provides evidence to the Commission ‘which represents significant added value’<sup>277</sup>. Reductions in the range of 20 to 50 per cent are available for such an undertaking<sup>278</sup>. The *Leniency Notice* explains the procedure for such cases<sup>279</sup>.

### (D) Section IV: corporate statements

The *Leniency Notice* discusses how corporate statements may be made<sup>280</sup>, and makes specific provision for such statements to be oral rather than written<sup>281</sup>. The reason for this is the fear that, if an undertaking were to prepare a written corporate statement, this might be discoverable in the event of a treble damages action in the US: this might deter the undertaking from blowing the whistle at all, in which case the cartel might go undetected. An oral statement is rendered into writing by the Commission. As it is not a document of the whistleblower it cannot be discovered from it; and any attempt by a US court to demand that the Commission should hand its own document over would probably fail on public interest grounds<sup>282</sup>.

### (iv) Article 24: periodic penalty payments

Article 24 provides for the imposition of periodic penalty payments on undertakings, for example where they persist in an infringement of Article 101 or Article 102 even after a decision requiring it to end, or where they continue to fail to supply complete and accurate information in response to a Commission request. The fines are up to 5 per cent of an undertaking’s average daily turnover in the preceding business year. In July of 2006 the Commission adopted a decision that Microsoft had failed to comply with its obligation to supply full interoperability information in accordance with its decision of March 2004 and imposed a fine of €280.5 million, €1.5 million per day from 16 December 2005 to 20 June 2006<sup>283</sup>. This was followed by a second fine, of €899 million, in February 2008 for charging unreasonable prices for access to interface documentation<sup>284</sup>.

<sup>274</sup> *Leniency Notice*, para 12.

<sup>275</sup> *Ibid*, paras 14–22.

<sup>276</sup> *Ibid*, para 15.

<sup>277</sup> *Ibid*, paras 24 and 25.

<sup>278</sup> *Ibid*, para 26.

<sup>279</sup> *Ibid*, paras 27–30.

<sup>280</sup> *Ibid*, paras 31–35.

<sup>281</sup> *Ibid*, para 32.

<sup>282</sup> See *In Re Rubber Chemicals Antitrust Litigation* 486 F Supp 2d 1078 (ND Cal 2007) in which the District Court refused a discovery request for certain communications between an EU leniency applicant and the Commission; see further ‘The exchange of information with third countries’, p 266 above.

<sup>283</sup> Commission decision of 12 July 2006.

<sup>284</sup> Commission decision of 27 February 2008, on appeal Case T-167/08 *Microsoft v Commission*, not yet decided.

## (G) Chapter VII: limitation periods

### (i) Article 25: limitation periods for the imposition of penalties

Article 25 of Regulation 1/2003, which replaces the rules formerly contained in Regulation 2988/74<sup>285</sup>, establishes limitation periods for action on the part of the Commission against competition law infringements: the period is three years in the case of provisions concerning requests for information or the conduct of inspections, and five years in the case of all other infringements; provision is made for the interruption of the limitation period in the event of certain action taken by the Commission or an NCA<sup>286</sup>. The burden of proving the duration of an infringement of the competition rules – and therefore of demonstrating that the limitation period has not expired – rests with the Commission<sup>287</sup>. A finding by the Commission that there has been a single continuous agreement or abuse may mean that the Commission is able to impose fines, provided that it brings proceedings within three or five years of when the infringement ceases<sup>288</sup>; if the correct analysis were to be that there had been a series of separate agreements or abuses, it might transpire that some of them had ended so long ago that a fine could no longer be imposed<sup>289</sup>.

The Commission sometimes addresses a decision to an undertaking stating that it has been in a cartel, but does not impose a fine because of the limitation rule. The Commission's interest in doing so includes that the undertaking might be sued for damages on a follow-on basis in the courts of a Member State. However the Commission must explain its reason for addressing the decision to the undertaking<sup>290</sup>.

### (ii) Article 26: limitation period for the enforcement of penalties

Article 26 provides that the limitation period for enforcing fines and periodic penalty payments is five years<sup>291</sup>.

## (H) Chapter VIII: hearings and professional secrecy

Articles 26 and 27 deal respectively with hearings and with professional secrecy.

### (i) Article 27: hearing of the parties, complainants and others

#### (A) The provisions of Article 27

Article 27(1) provides that, before decisions are taken under Articles 7 and 8 (infringement and interim measures decisions) or under Articles 23 and 24 (fines and periodic penalty payments), the undertakings that are the subject of the proceedings have a right to be heard. The Commission may base its decisions only on objections on which the par-

<sup>285</sup> OJ [1974] L 319/1.

<sup>286</sup> Regulation 1/2003, Article 25(3)–(6); for discussion of the rules on interruption under Regulation 2988/74 see Case T-276/04 *Compagnie maritime belge SA v Commission* [2008] ECR II-1277, [2009] 4 CMLR 968, paras 22–38.

<sup>287</sup> Case T-120/04 *Peróxidos Orgánicos SA v Commission* [2006] ECR II-4441, [2007] 4 CMLR 153, para 52; Case T-58/01 *Solvay SA v Commission* [2009] ECR II-4781, paras 294–295.

<sup>288</sup> Regulation 1/2003, Article 25(2).

<sup>289</sup> See the cases discussed in ch 3, 'The concept of a "single, overall agreement"', pp 103–104 under Article 101 where this is precisely the point that was under consideration.

<sup>290</sup> See 'Past infringements', pp 254–255 above.

<sup>291</sup> For litigation under the predecessor of Article 26 in Regulation 2988/74 see Case T-153/04 *Ferrière Nord SpA v Commission* [2006] ECR II-3889, [2006] 5 CMLR 1416, reversed on appeal to the Court of Justice, Case C-516/06 P *Commission v Ferrière Nord SpA* [2007] ECR I-10685, [2008] 4 CMLR 267, paras 27–34; this case traces back to the Commission's decision in *Welded Steel Mesh* as long ago as 1989, OJ [1989] L 260/1, [1991] 4 CMLR 13.

ties have had an opportunity to comment. Complainants ‘shall be closely associated with the proceedings’.

Article 27(2) provides that the rights of the defence shall be fully respected during the Commission’s proceedings, including the right to have access to the Commission’s file. Article 27(2) of the Regulation makes clear that there is no right of access to confidential information, nor to internal documents of the Commission and the NCAs and correspondence within the ECN. Article 27(3) provides that the Commission may hear third parties with a sufficient interest, and Article 27(4) provides that, where the Commission intends to adopt a decision under Article 9 or 10, it must publish the fact of its intention and allow third parties an opportunity to be heard.

### (B) *The conduct of proceedings*

Commission Regulation 773/2004<sup>292</sup> (‘the Implementing Regulation’) explains how and when the Commission may initiate proceedings, and how the right to be heard is exercised, in competition cases. Specifically it sets out the rules in relation to the statement of objections that must be sent to the parties and the right to be heard, and confers upon the parties a right to an oral hearing; third parties with a sufficient interest may also be heard<sup>293</sup>. The Regulation sets out the rules for the oral hearing, which is conducted by a Hearing Officer. A Commission decision of October 2011 sets out the terms of reference of the Hearing Officers in competition cases<sup>294</sup>; also of significance is the Commission’s *Best practices for the conduct of proceedings concerning Articles 101 and 102 TFEU*<sup>295</sup>. Regulation 1/2003 also explains how confidential information is to be dealt with during proceedings, and how disputes should be resolved.

The Commission’s *Notice on the rules for access to the Commission’s file*<sup>296</sup> explains its current policy on access to the file in the context of the relevant legislation, including Regulation 1/2003 and the Implementing Regulation and the jurisprudence of the EU Courts. Access to the file for competition law purposes is subject to different criteria and exceptions from the right of access to EU documents under Regulation 1049/2001<sup>297</sup>. The *Notice on access to the file* explains who is entitled to access to the file; which documents can be accessed; and when access may be granted. Complaints about denial of access may be taken to the Hearing Officer; another possibility, if the approach to the Hearing Officer does not provide a satisfactory outcome, would be to approach the European Ombudsman<sup>298</sup>.

Where the Commission is in possession of documents that might provide exculpatory evidence for a defendant undertaking, it must make them available, although a failure to do so would lead to the annulment of the Commission’s decision only if their availability

<sup>292</sup> OJ [2004] L 123/18; note that the Implementing Regulation was amended by Regulation 622/2008, OJ [2008] L 171/3, as a result of the introduction by the Commission of the procedure for settling cartel cases: see ‘Settlements of cartel cases’, pp 262–264 above.

<sup>293</sup> They are also entitled to receive a non-confidential version of the statement of objections: Cases T-213/01 and T-214/01 *Österreichische Postsparkasse AG v Commission* [2006] ECR II-1601, [2007] 4 CMLR 506.

<sup>296</sup> OJ [2005] C 325/7; this *Notice* replaces an earlier one, OJ [1997] C 27/3.

<sup>297</sup> OJ [2001] L 145/43; see the *Notice on access to the file*, para 2. <sup>298</sup> See below.

would have led to a different outcome<sup>299</sup>. In *Salzgitter v Commission*<sup>300</sup> the Court of Justice confirmed that the Commission may attach probative value to evidence provided by a source that insists on anonymity.

The Court of Justice has established that undertakings are entitled to expect that competition law proceedings will be concluded within a reasonable period<sup>301</sup>.

Apart from recourse to the Hearing Officer, in recent years a practice has arisen, in some cases, of complaints about maladministration on the part of the Commission being taken to the European Ombudsman<sup>302</sup>. This occurred with some success in the case of *Intel*<sup>303</sup> and *Ryanair*<sup>304</sup>, though was unsuccessful in the case of *X, E.ON*<sup>305</sup>. A complaint may be made to the Ombudsman only after appropriate approaches have been made to the institutions concerned; and the Ombudsman's decisions are not binding.

### (C) A typical case

In a typical cartel case<sup>306</sup> the Commission's procedure would be as follows:

- a whistleblower applies to the Commission for immunity from fines, or the Commission decides to start an investigation on its own initiative
- the Commission conducts surprise inspections
- the Commission considers the evidence it has obtained and sends requests for or requires further information
- the Commission issues statements of objections to the undertakings it considers to be in the cartel
- the undertakings submit written replies to the statements of objections
- an oral hearing is held<sup>307</sup>
- DG COMP prepares a draft decision
- the draft decision goes to the Commissioner for Competition
- the Advisory Committee is consulted on the draft decision
- the draft decision is seen by the College of Commissioners
- the College adopts the final decision.

<sup>299</sup> See eg Case T-314/01 *Coöperatieve Verkoop- en Productievereniging van Aardappelmeel en Derivaten Avebe BA v Commission* [2006] ECR II-3085, [2007] 4 CMLR 9, paras 66–67 and the case law cited therein.

<sup>300</sup> Case C-411/04 P [2007] ECR I-965, [2007] 4 CMLR 682, paras 40–50.

<sup>301</sup> Case C-185/95 P *Baustahlgewebe v Commission* [1998] ECR I-8417, [1999] 4 CMLR 1203, paras 28–49; see similarly Cases C-105/04 and C-113/04 P *Nederlandse Federatieve Vereniging voor de Groothandel op Elektrotechnisch Gebied v Technische Unie BV v Commission* [2006] ECR I-8725, [2006] 5 CMLR 1257, paras 35–52; Case C-385/07 *Duales System Deutschland GmbH v Commission* [2009] ECR I-6155, [2009] 5 CMLR 2215, paras 176–196.

<sup>302</sup> For further information about the Ombudsman see [www.ombudsman.europa.eu](http://www.ombudsman.europa.eu); for discussion see Amory and Desmedt 'The European Ombudsman's First Scrutiny of the EC Commission in Antitrust matters' (2009) 30 ECLR 205.

<sup>303</sup> See Decision of the European Ombudsman closing his inquiry into complaint 1935/2008/FOR against the European Commission, 14 July 2009.

<sup>304</sup> See Decision of the European Ombudsman closing his inquiry into complaint 1342/2007/FOR against the European Commission, 27 April 2009.

<sup>305</sup> See Decision of the European Ombudsman closing his inquiry into complaint 2953/2008/FOR against the European Commission, 27 July 2010.

<sup>306</sup> An Article 102 case would be very similar but, for obvious reasons, would not involve a whistleblower; where the parties decide to settle a cartel case, and the Commission considers this to be an appropriate way to proceed, the procedure may be shorter than the one outlined in the text: see 'Settlements of cartel cases', pp 262–264 above.

<sup>307</sup> In some cases undertakings waive their right to an oral hearing.

**(D) The position of complainants**

Various provisions in Regulation 1/2003, including Article 27(3), acknowledge that third parties with a sufficient interest have a right to participate in proceedings, although these rights are less than those of the undertakings accused of an infringement. Chapter IV of the Implementing Regulation<sup>308</sup> also deals with the handling of complaints, and the Commission has published a *Notice on the handling of complaints by the Commission under Articles [101 and 102 TFEU]*<sup>309</sup>. Part II of the *Notice on Complaints* discusses the complementary roles of public and private enforcement of the competition rules, pointing out the benefits for complainants, in some circumstances, of going to a court rather than a competition authority: for example only a court can award damages or determine the effect on a contract of the voidness provided for by Article 101(2)<sup>310</sup>. It also explains the provisions on case allocation within the ECN, which should assist a complainant in deciding which public authority it would be sensible to approach if that is preferred to private litigation<sup>311</sup>. Part III of the *Notice on Complaints* explains in detail how the Commission goes about handling complaints, and specifies the information that must be supplied on Form C, the form that must be used when making a complaint<sup>312</sup>. The *Notice* discusses the Commission's right to prioritise its enforcement efforts and to concentrate on cases that have a 'Community interest'<sup>313</sup>; the right of the Commission to do so was clearly restated by the General Court in 2008 in *Scippecercola v Commission*<sup>314</sup>, and in 2010 the same Court repeated earlier case law that complainants do not have a right to a final decision as to the existence or non-existence of an infringement of Articles 101 and/or 102<sup>315</sup>. The final part of the *Notice* explains the Commission's procedure when dealing with complaints, including the procedural rights of complainants and Commission decisions to reject complaints<sup>316</sup>.

The Commission is entitled to make use of evidence provided by third parties on condition of their anonymity being maintained, although such evidence would not be sufficient in itself to sustain a finding of infringement but would have to be part of a body of evidence<sup>317</sup>.

**(ii) Article 28: professional secrecy**

Article 28 contains two provisions: first, information collected under the Regulation may be used only for the purpose for which it was acquired; secondly, the Commission and the NCAs must not disclose information acquired or exchanged by them under the Regulation if that information is covered by an obligation of professional secrecy. Quite apart from the provisions of Article 28 of the Regulation, Article 339 TFEU itself imposes restrictions on the transmission of such information: paragraph 28(a) of the Commission's *Notice on NCA cooperation* provides guidance on the practical application of Article 28.

<sup>314</sup> Case T-306/05 [2008] ECR II-4, [2008] 4 CMLR 1418, paras 91–93.

<sup>315</sup> Case T-432/05 *EMC Development AB v Commission* [2010] ECR II-000, [2010] 5 CMLR 757, upheld on appeal Case C-367/10 P *EMC Development AB v Commission*, order of 31 March 2011.

<sup>316</sup> *Ibid*, paras 53–81.

<sup>317</sup> Case C-411/04 P *Salzgitter Mannesmann GmbH v Commission* [2007] ECR I-965, [2007] 4 CMLR 682, paras 47 and 50.

**(I) Chapter IX: exemption regulations**

Article 29 of Regulation 1/2003 provides power for the Commission and the NCAs to withdraw the benefit of block exemptions in individual cases<sup>318</sup>.

**(J) Chapter X: general provisions****(i) Article 30: publication of decisions**

Article 30(1) requires the Commission to publish its decisions under Articles 7 to 10, 23 and 24, having regard to the legitimate interests of the parties in the protection of their business secrets.

**(ii) Article 31: review by the Court of Justice**

Article 31 provides that the EU Courts have unlimited jurisdiction to review decisions in which the Commission has imposed a fine or a periodic penalty payment.

**(K) Chapter XI: transitional, amending and final provisions**

Articles 35 to 42 contain transitional and final provisions.

**(i) Article 34: transitional provisions**

Article 34(1) provides that all existing notifications for an individual exemption to the Commission lapsed on 1 May 2004. Individual exemptions granted under Regulation 17 continue in force<sup>319</sup>.

**(ii) Article 35: designation of competition authorities of Member States**

Article 35 requires Member States to designate the competition authority or authorities responsible for the application of Articles 101 and 102<sup>320</sup>.

**(iii) Articles 36–42: miscellaneous amendments**

The provisions on the transport Regulations in Articles 36, 38, 39 and 41 have been overtaken by subsequent events<sup>321</sup>. Article 37 repeals the provisions of Regulation 2988/74 on limitation periods, since they are now dealt with by Articles 25 and 26. Article 40 repeals the powers in earlier Regulations to enable the withdrawal of the benefit of block exemptions; since the power to do this is now conferred by Article 29<sup>322</sup>, Article 42 is no longer significant.

**(iv) Article 43: repeal of Regulations 17 and 141**

Article 43(1) repeals Regulation 17, except in relation to conditions and obligations attached to individual exemptions already granted by the Commission<sup>323</sup>. Article 43(2) repeals Regulation 141, which had exempted the transport sector from Regulation 17<sup>324</sup>.

<sup>318</sup> For discussion of the possibility of withdrawing the benefit of Regulation 330/2010 from vertical agreements see ch 16, 'Withdrawal of the block exemption by the Commission or by a Member State', p 671.

<sup>320</sup> See 'Article 5: powers of the NCAs', p 250 above.

<sup>321</sup> See ch 23, 'Transport', pp 967–977.

<sup>322</sup> See 'Chapter IX: exemption regulations', see above.

<sup>323</sup> See ch 4, 'Regulation 1/2003', pp 166–167.

<sup>324</sup> See ch 23, 'Transport', pp 961–970.

### (v) **Article 44: Report on the application of Regulation 1/2003**

The Commission was required to report to the Parliament and the Council in 2009 on the functioning of the Regulation, in particular on Article 11(6) and Article 17, and assess whether it is appropriate to propose any revisions. In its *Report on the functioning of Regulation 1/2003*<sup>325</sup> the Commission reported that the Regulation had worked well in practice, significantly improving its enforcement of Articles 101 and 102 and bringing about coherence in their application throughout the EU. However the Commission also noted certain issues – for example the fact that different Member States have different procedures for the enforcement of Articles 101 and 102 and the divergence of national laws in the area of unilateral conduct – where further evaluation is called for, but left open the question of whether amendments to existing rules or practice are required.

## 3. Regulation 1/2003 in Practice<sup>326</sup>

Since 2004 the European Commission shares the task of enforcing the competition rules in the TFEU with the NCAs of the 27 Member States and with the national courts. The Commission and the NCAs together operate within the framework of the ECN, a manifestation of the general duty of sincere cooperation required by Article 4(3) TEU. Articles 101 and 102 are now applied with far greater frequency by the NCAs than by the Commission.

### (A) **The European Competition Network**

The ECN does not have legal identity nor is it an international organisation as such. Rather it provides a framework within which the Commission and the NCAs discuss the sharing of work: for example which authority is best placed to handle a particular investigation. Information is exchanged between competition authorities within the framework of the ECN, as is experience gathered both in relation to actual cases and the development of policy. Members of the ECN are linked by a secure Intranet. The Commission takes the lead role in ensuring coherence in the application of the competition rules, in particular as a result of its examination of draft decisions of the NCAs in conjunction with its power to initiate its own proceedings, and thereby to suspend those of an NCA, under Article 11(6) of the Regulation. Information about the work of the ECN is obtainable from the website of DG COMP including, for example, the number of investigations under Articles 101 and 102 reported to the ECN and the proportion of them that had been started by an NCA on the one hand or the Commission on the other<sup>327</sup>. The Directors General of the NCAs meet once a year to discuss major policy issues within the ECN: this is the top

<sup>325</sup> SEC(2009) 574: see also the Commission's *Staff Working Paper accompanying the Report on the functioning of Regulation 1/2003*, COM(2009) 206 final, which contains detailed analysis of the operation of Regulation 1/2003 between 2004 and 2009; both documents are available at [www.ec.europa.eu/competition/antitrust/legislation.html](http://www.ec.europa.eu/competition/antitrust/legislation.html).

<sup>326</sup> See DeKeyser and Gauer 'The new enforcement system for Articles 81 and 82 EC and the rights of defence' in *2004 Annual Proceedings of the Fordham Corporate Law Institute* (Juris Publishing 2005, ed Hawk), 549; DeKeyser and Jaspers 'A New Era of ECN Cooperation' (2007) 30(1) *World Competition* 3; Commission's *Report on Competition Policy 2006*, COM(2007) 358 final, pp 86–89; Reichelt 'To what extent does the cooperation within the European Competition Network protect the rights of undertakings?' (2005) 42 *CML Rev* 745; the Commission's *Annual Report on Competition Policy* also provides helpful detail on the operation of the ECN.

<sup>327</sup> See [www.ec.europa.eu/comm/competition/ecn/index\\_en.html](http://www.ec.europa.eu/comm/competition/ecn/index_en.html).

level of the ECN framework. The so-called ‘ECN Plenary’ consisting of officials in the NCAs and the Commission meets four times a year. It has a number of working groups, for example on issues of cooperation, leniency and sanctions, and it also has a number of sectoral sub-groups, for example on the liberal professions, energy and financial services. The ECN, since January 2010, has published a periodical *Brief* in which it provides information about its activities and those of its members<sup>328</sup>.

## (B) Case allocation under Regulation 1/2003

The *Notice on NCA cooperation*<sup>329</sup> sets out the jurisdictional principles according to which cases should be allocated within the ECN<sup>330</sup>. An example of a case being reallocated from an NCA to the Commission is *iTunes*, where the OFT in the UK considered that the Commission was in a better position to consider a complaint by Which? (formerly the Consumers’ Association) that Apple’s iTunes service discriminated on price according to the user’s country of residence, in particular since this gave rise to issues concerning the wider single market in Europe<sup>331</sup>. The Commission announced that Apple had agreed to equalise the prices of its downloads across Europe in January 2008<sup>332</sup>. Another interesting case is *Flat Glass*, where several NCAs cooperated with the Commission within the ECN, leading to the imposition by the Commission of fines totalling €488 million<sup>333</sup>. The fact that an NCA has started to investigate a matter does not mean that the Commission cannot carry out a surprise inspection in relation to the same behaviour<sup>334</sup>.

## (C) ‘Soft’ convergence

An interesting by-product of Regulation 1/2003 and the establishment of the ECN has been the considerable amount of soft convergence that has taken place in relation to national competition laws and procedures. Although the Regulation did not explicitly require there to be convergence, the reality is that in many respects – for example the abolition of national systems of notification and individual exemption, the alignment of investigative procedures, the introduction of leniency programmes and of commitments procedures similar to those in Article 9 – national laws have been brought into alignment with those of the EU. Information about the reform of the competition laws of the Member States since Regulation 1/2003 came into force is available on the website of the ECN<sup>335</sup> and in the *Staff Working Paper accompanying the Report on the functioning of Regulation 1/2003*.

## (D) Leniency

The work of the ECN in the area of leniency has been of particular importance. Under the aegis of the ECN, 26 of the 27 NCAs now have a leniency programme<sup>336</sup>, and the ECN has produced a *Model Leniency Programme* aimed at achieving soft harmonisation through

<sup>328</sup> Available at [www.ec.europa.eu/competition/ecn/brief.pdf](http://www.ec.europa.eu/competition/ecn/brief.pdf). <sup>329</sup> OJ [2004] C 101/43.

<sup>330</sup> *Ibid*, paras 5–15.

<sup>335</sup> See [www.ec.europa.eu/comm/competition/ecn/index\\_en.html](http://www.ec.europa.eu/comm/competition/ecn/index_en.html).

<sup>336</sup> The only Member State not to do so is Malta.

convergence. The *Model Leniency Programme* has been endorsed by the heads of all the NCAs and is available on the ECN's website<sup>337</sup>. The ECN published a *Report on Assessment of the State of Convergence* in October 2009<sup>338</sup> which noted that most Member States have aligned their leniency programmes with the key features of the Model Programme.

#### 4. Judicial Review<sup>339</sup>

It is possible to bring an action before the General Court (and ultimately the Court of Justice on points of law) in respect of Commission decisions on competition matters; Article 265 TFEU of the Treaty deals with failures to act, Article 263 with actions for annulment and Article 261 with penalties. The EU Courts have exclusive competence to consider whether acts of the Commission are lawful or not<sup>340</sup>. Proceedings before the General Court must be completed within a reasonable time; reasonableness is tested by reference to the importance of the case for the person concerned, its complexity and the conduct of the applicant and the competent authorities<sup>341</sup>.

##### (A) Article 265: failure to act

Under Article 265 it is possible to bring an action against the Commission where, in infringement of the Treaty, it has failed to act. The Commission must have been under a specific duty to carry out the act in question. An action may be brought only where the Commission has been required to act and has failed to do so within two months; the action itself must be brought within the following two months<sup>342</sup>. Article 265 is sometimes invoked by complainants wishing to force the Commission to investigate complaints against undertakings suspected of infringing the competition rules<sup>343</sup>.

<sup>337</sup> See [www.ec.europa.eu/comm/competition/ecn/index\\_en.html](http://www.ec.europa.eu/comm/competition/ecn/index_en.html); for discussion see Gauer and Jaspers 'ECN Model Leniency Programme – a first step towards a harmonised leniency policy in the EU' (2007) (Spring) *Competition Policy Newsletter* 35.

<sup>338</sup> See MEMO/09/456, 15 October 2009; the Report is available at [www.ec.europa.eu/competition/ecn/documents.htm](http://www.ec.europa.eu/competition/ecn/documents.htm).

<sup>339</sup> See Kerse and Khan *EC Antitrust Procedure* (Sweet & Maxwell, 5th ed, 2005), ch 8; Craig *EU Administrative Law* (Oxford University Press, 2006), Part 2; Bailey 'Scope of Judicial Review Under Article 81 EC' (2004) 41 CML Rev 1328; Vesterdorf 'Judicial Review in EC Competition Law: Reflections on the Role of the Community Courts in the EC System of Competition Law Enforcement' (2005) 1(2) *Competition Policy International* 3; Forrester 'A Bush in Need of Pruning: The Luxuriant Growth of Light Judicial Review' in *European Competition Law Annual 2009: Evaluation of Evidence and its Judicial Review in Competition Cases* (Hart Publishing, 2010, eds Ehlermann and Marquis); Castillo de la Torre 'Evidence, Proof and Judicial Review in Cartel Cases', *ibid*; Jaeger 'The standard of Review in Competition Cases Involving Complex Economic Assessments: Towards the Marginalisation of the Marginal Review?' (2011) 2(4) *Journal of European Competition Law and Practice* 295.

<sup>340</sup> See Case C-344/98 *Masterfoods* [2000] ECR I-11369, [2001] 4 CMLR 449; the EU Courts have no jurisdiction to review decisions by NCAs or judgments of national courts: see Case T-386/09 *Grúas Abril Asistencia, SL v Commission*, order of the General Court of 24 August 2010.

<sup>341</sup> Case C-185/95 P *Baustahlgewebe GmbH v Commission* [1998] ECR I-8417, [1999] 4 CMLR 1203; the fine was reduced by €50,000 in this case because of the delay in the proceedings; see also Case C-385/07 *Duales System Deutschland GmbH v Commission* [2009] ECR I-6155, [2009] 5 CMLR 2215, paras 176–196.

<sup>342</sup> Article 265(2); time limits are applied strictly by the General Court: see Case T-12/90 *Bayer v Commission* [1991] ECR II-219, [1993] 4 CMLR 30, paras 14, 16 and 46.

<sup>343</sup> See 'The position of complainants', p 286 above.

Where the Commission is guilty of a failure to act, an undertaking that suffers damage in consequence may bring an action against the Commission for compensation under Article 268 and Article 340 TFEU<sup>344</sup>.

## (B) Article 263: action for annulment

Under Article 263 it is possible to bring an action to have various ‘acts’ of the Commission annulled. Proceedings must be commenced within two months of the applicant hearing of the act in question<sup>345</sup>. Where an action succeeds in part only, Article 264 enables the unlawful parts of a decision to be severed and annulled, leaving the remainder intact. Four issues in particular need consideration: who may sue; what ‘acts’ may be challenged; on what grounds an action may be brought; and whether damages are available once a decision has been annulled.

### (i) Standing

Apart from Member States and the Council, Article 263(4) provides that any undertaking may challenge a decision addressed to it or to another person if it is of ‘direct and individual concern’ to it. This clearly entitles third parties in some situations to sue. In *Metro v Commission*<sup>346</sup> the Court of Justice confirmed that a complainant under Article 3(2) of Regulation 17 (Article 7(2) of Regulation 1/2003) could proceed under Article 263<sup>347</sup>; if one applicant has standing, it is not necessary for other applicants concerned in the same application do so<sup>348</sup>. In some cases the applicant’s interest may be altogether too vague to give standing<sup>349</sup>. The recipients of adverse decisions may themselves bring an action under Article 263, and their right to do so is not limited to cases in which fines have been imposed.

### (ii) Acts

It is not only decisions, but other ‘acts’ which may be challenged under Article 263. Formal decisions of the Commission applying Articles 101 and 102 of course can be challenged. In *Coca-Cola Co v Commission*<sup>350</sup> the General Court held that it is settled law that any measure which produces binding legal effects such as to affect the interest of an applicant by bringing about a distinct change in its legal position is an act or decision which may be the subject of an action under Article 263<sup>351</sup>. In *IBM v Commission*<sup>352</sup> the Court of Justice held that a statement of objections could not normally be challenged, because it was

<sup>344</sup> To date such actions in the context of the competition rules have failed: see eg Case T-64/89 *Automec Srl v Commission* [1990] ECR II-367, [1991] 4 CMLR 177; Case T-28/90 *Asia Motor France v Commission* [1992] ECR I-2285, [1992] 5 CMLR 431, paras 48–51.

<sup>345</sup> Article 230(5); see ch 7 n 342 above on the General Court’s approach to time limits.

<sup>346</sup> Case 26/76 [1977] ECR 1875, [1978] 2 CMLR 1.

<sup>347</sup> See also Case 43/85 *ANCIDES v Commission* [1987] ECR 3131, [1988] 4 CMLR 821; a third party successfully challenged the grant of an individual exemption in Cases T-528/93 etc *Métropole v Commission* [1996] ECR II-649, [1996] 5 CMLR 386.

<sup>348</sup> Case T-306/05 *Scippacercola v Commission* [2008] ECR II-4, [2008] 4 CMLR 1418, para 71.

<sup>349</sup> See eg Case 246/81 *Bethell v Commission* [1982] ECR 2277, [1982] 3 CMLR 300; Case C-70/97 P *Kruidvat BVBA v Commission* [1998] ECR I-7183, [1999] 4 CMLR 68.

<sup>350</sup> Cases T-125/97 and T-127/97 [2000] ECR II-1733, [2000] 5 CMLR 467.

<sup>351</sup> The General Court cited for this proposition the judgments in Case 60/81 *IBM v Commission* [1981] ECR 2639, [1981] 3 CMLR 635, para 9; Cases C-68/94 and C-30/95 *France v Commission* [1998] ECR I-1375, [1998] 4 CMLR 829, para 62; and Case T-87/95 *Assuriazioni Generali v Commission* [1999] ECR II-203, [2000] 4 CMLR 312, para 37.

<sup>352</sup> Case 60/81 [1981] ECR 2639, [1981] 3 CMLR 635.

simply a preliminary step in the formal procedure<sup>353</sup>. In *BAT v Commission*<sup>354</sup> the Court of Justice held that letters from the Commission to two complainants, finally rejecting their complaints, were acts capable of challenge under Article 263. The General Court held in the *Omni-Partijen Akkoord* judgments<sup>355</sup> that a letter from the Commissioner for Competition to a Member State that was purely factual in nature produced no legal effects and could not be challenged under Article 263. Mere silence on the part of an EU institution cannot produce binding legal effects unless express provision to this effect is made for it in EU law<sup>356</sup>.

### (iii) Grounds of review

The EU Courts must assess the legality of the Commission's decision according to the grounds of review specified in Article 263(2). The Commission may be challenged on grounds of:

lack of competence, infringement of an essential procedural requirement, infringement of the Treaties or of any rule of law relating to their application, or misuse of powers.

To some extent these grounds overlap. Of particular significance will be a failure by the Commission to give a fair hearing<sup>357</sup>; a failure to articulate properly the reasoning behind its decision<sup>358</sup>; and a failure to base a decision on adequate evidence<sup>359</sup>. The Commission is not required to set out in its decision exhaustively all the evidence available; it is sufficient if it refers to the conclusive evidence<sup>360</sup>.

The EU Courts have tended to review the decisions of the Commission with a degree of self-restraint, having due regard to the margin of appreciation enjoyed by the Commission when making complex technical and economic assessments<sup>361</sup>. However, within the limits of the review that it may carry out under Article 263, the General Court has been prepared to exercise its power of review of the substance of Commission decisions in a

<sup>353</sup> See similarly Cases T-10/92 etc *SA Cimenteries CBR v Commission* [1992] ECR II-2667, [1993] 4 CMLR 259; Cases T-377/00 etc *Philip Morris International Inc v Commission* [2003] 1 CMLR 676; Case T-48/03 *Schneider Electric v Commission*, order of 31 January 2006 [2006] ECR II-111, which held that a Commission decision under the EU Merger Regulation to take a case into Phase II is not susceptible to judicial review: an appeal to the Court of Justice was dismissed in Case C-188/06 P [2007] ECR I-35; see also Case C-516/06 P *Commission v Ferriere Nord SpA* [2007] ECR I-10685, [2008] 4 CMLR 267: no Commission act capable of judicial review; Case T-457/08 R *Intel Corp v Commission*, order of the President of the General Court of 27 January 2009: decisions of the Commissioner and of the Hearing Officer in that case not capable of judicial review.

<sup>354</sup> Cases 142 and 156/84 [1987] ECR 4487, [1988] 4 CMLR 24; see also Case 210/81 *Demo-Studio Schmidt v Commission* [1983] ECR 3045, [1984] 1 CMLR 63.

<sup>355</sup> Cases T-113/89 etc *Nefarma v Commission* [1990] ECR II-797.

<sup>356</sup> Cases T-189/95 etc *Service pour le Groupement d'Acquisitions v Commission* [1999] ECR II-3587, [2001] 4 CMLR 215, paras 26–29.

<sup>357</sup> See eg Case 17/74 *Transocean Marine Paint Association v Commission* [1974] ECR 1063, [1974] 2 CMLR 459 where the members of the association were not given an opportunity to be heard on the conditions which the Commission intended to attach to an individual exemption.

<sup>358</sup> See eg Case 73/74 *Groupement des Fabricants des Papiers Peints de Belgique v Commission* [1975] ECR 1491, [1976] 1 CMLR 589 where the Commission failed to explain the mechanism whereby the agreement in question could affect inter-state trade.

<sup>359</sup> See eg Case 41/69 *ACF Chemiefarma v Commission* [1970] ECR 661, [1970] CMLR 43 where the Commission's decision was partially annulled for lack of evidence.

<sup>360</sup> Case T-2/89 *Petrofina SA v Commission* [1991] ECR II-1087.

<sup>361</sup> See eg Case 42/84 *Remia BV and Verenigde Bedrijven and Nutricia v Commission* [1985] ECR 2545, [1987] 1 CMLR 1, para 34; Cases 142/84 and 156/84 *BAT and Reynolds v Commission* [1987] ECR 4487, [1988] 4 CMLR 24, para 62; Case T-201/04 *Microsoft Corp v Commission* [2007] ECR II-3601, [2007] 5 CMLR 846, paras 87–88.

comprehensive and exacting manner. This is exemplified by a series of judgments rendered by the General Court on the application of the EU Merger Regulation: *Airtours v Commission*<sup>362</sup>, *Schneider Electric v Commission*<sup>363</sup> and *Tetra Laval v Commission*<sup>364</sup> at a time when considerable disquiet was being expressed about the fact that the Commission had the combined powers to investigate and prohibit mergers. In each case the General Court engaged in an exhaustive review of the substantive as well as the procedural propriety of the Commission's decision and, again in each case, annulled the decision. These cases, as well as the later judgment in *General Electric v Commission*<sup>365</sup>, demonstrate that the Commission must provide adequate reasoning in its decisions, based on accurate and persuasive evidence.

#### (iv) Actions for damages

In the event that the General Court annuls a decision of the Commission under Article 340 TFEU it may be possible for the successful applicants to bring an action for damages for any losses they have suffered as a result of the unlawful decision. The General Court considered that the Commission's erroneous prohibition of the *Schneider/Legrande* merger did give rise to a right to damages in *Schneider Electric v Commission*<sup>366</sup>; however on appeal the Court of Justice held that the Commission's decision was not the cause of the economic loss suffered by Schneider, other than the costs involved in the second investigation that followed from the prohibition<sup>367</sup>. A claim for damages was rejected in *SELEX v Commission*<sup>368</sup>.

### (C) Article 261: penalties

Under Article 261 the General Court has unlimited jurisdiction in respect of penalties imposed by the Commission. Article 31 of Regulation 1/2003 provides that the EU Courts may cancel, reduce or increase fines or periodic penalties imposed. In the exercise of its unlimited jurisdiction the Courts may review a decision in its entirety – on factual as well as legal grounds – and many of its judgments have dealt exhaustively with the facts of the case. When the General Court finds that there is a factual error in the Commission's assessment it will not hesitate to adjust the fine. This can occur, for example, where the General Court considers that the Commission has exaggerated the duration of an undertaking's participation in a cartel<sup>369</sup> or has wrongly attributed to an undertaking the role of instigator or ringleader of a cartel<sup>370</sup>. The General Court will also make adjustments to fines where it feels that an undertaking has been the victim of unequal treatment

<sup>362</sup> Case T-342/99 [2002] ECR II-2585, [2002] 5 CMLR 317.

<sup>363</sup> Case T-310/01 [2002] ECR II-4071, [2003] 4 CMLR 768.

<sup>364</sup> Case T-5/02 [2002] ECR II-4381, [2002] 5 CMLR 1182.

<sup>365</sup> Case T-210/01 [2005] ECR II-5575, [2006] 4 CMLR 686.

<sup>366</sup> Case T-351/03 [2007] ECR II-2237, [2008] 4 CMLR 1533.

<sup>367</sup> Case C-440/07 P *Commission v Schneider Electric SA* [2009] ECR I-6413, [2009] 5 CMLR 2051; this case, and the General Court's judgment in Case T-212/03 *MyTravel v Commission* [2008] ECR II-1967, [2008] 5 CMLR 1429, are discussed in ch 21, 'Damages claims against the Commission', p 897.

<sup>368</sup> Case T-86/05, order of 29 August 2007; an appeal was rejected, Case C-481/07 P *SELEX Sistemi Integrati SpA v Commission* [2009] ECR-I 127.

<sup>369</sup> See eg Cases T-44/00 etc *Mannesmannröhren-Werke AG v Commission* [2004] ECR II-2223; Case T-58/01 *Solvay SA v Commission* [2009] ECR II-4781, paras 292–306; Case T-18/05 *IMI plc v Commission* [2010] ECR II-000, [2010] 5 CMLR 1215, paras 79–97.

<sup>370</sup> Case T-15/02 *BASF v Commission* [2006] ECR II-497, [2006] 5 CMLR 27, paras 280–464; Case T-29/05 *Deltafina SpA v Commission*, [2010] ECR II-000, [2011] 4 CMLR 467, paras 319–336.

compared with other members of the same cartel<sup>371</sup>. The General Court has not actively sought to substitute its own opinion on the level of the fine for that of the Commission, where the Commission has a margin of appreciation<sup>372</sup>. However it is important to understand that the General Court has the power to increase, as well as to decrease the level of a fine, and that it has on a few occasions done so<sup>373</sup>.

## (D) Accelerated procedure

An important development for the way in which cases are handled by the General Court is the introduction of the so-called ‘accelerated procedure’ which entered into force on 1 February 2001<sup>374</sup>. This procedure enables the General Court to expedite the hearing and determination of appeals and has been used in several cases<sup>375</sup>.

## (E) Interim measures

It is possible to apply to the General Court for interim measures suspending the operation of a Commission decision pending an appeal. Three conditions must be fulfilled in order for interim relief to be granted: first, the applicant must establish a *prima facie* case that the Commission’s assessment is unlawful; secondly, it must demonstrate the urgency of interim measures to prevent it from suffering serious and irreparable damage; and thirdly it must explain why the balance of interests favours the adoption of such measures<sup>376</sup>. In cases where there is an imminent risk of severe and lasting harm to one or more of the parties, the General Court may suspend the operation of a Commission decision *ex parte*, pending the outcome of the proceedings for interim relief; this happened, for example, in *NDC Health/IMS Health: Interim Measures*<sup>377</sup>.

<sup>371</sup> See eg Cases T-109/02 etc *Bolloré SA v Commission* [2007] ECR II-947, [2007] 5 CMLR 66, where the fine on Arjo Wiggins Appleton was reduced by €33 million as a result of unequal treatment; Case T-13/03 *Nintendo Co Ltd v Commission* [2009] ECR II-947, [2009] 5 CMLR 1421, paras 169–189, where Nintendo’s fine was reduced from €149 million to €119 million because the Court considered that Nintendo should have received the same reduction of its fine for cooperation as had been awarded to John Menzies; Case T-18/03 *CD-Contact Data GmbH v Commission* [2009] ECR II-1021, [2009] 5 CMLR 1469, paras 91–121, where CD-Contact Data’s fine was reduced as its passive role in the infringement had not been taken into account as an attenuating circumstance in determining the fine, whereas another undertaking, Concentra, had benefited from a reduction on this basis; Case T-18/05 *IMI v Commission* [2010] ECR II-000, [2010] 5 CMLR 1215, paras 152–174 and Case T-21/05 *Chalkor v Commission*, [2010] ECR II-000, [2010] 5 CMLR 1295, paras 90–113.

<sup>372</sup> See ch 13, ‘Appeals to the General Court’, pp 520–521 and Vesterdorf ‘The Court of Justice and Unlimited Jurisdiction: What Does It Mean in Practice?’ (2009) CPI Antitrust Chronicle, Spring 2009, Vol 6 No 2.

<sup>373</sup> See eg Cases T-101/05 and T-111/05 *BASF AG v Commission* [2007] ECR II-4949, [2008] 4 CMLR 347, paras 212–223 where the fine on BASF was marginally increased.

<sup>374</sup> OJ [2000] L 322/4; see further ch 21, ‘Examples of third party appeals’, pp 895–897.

<sup>375</sup> See eg Case T-310/01 *Schneider Electric v Commission* [2002] ECR II-4071, [2003] 4 CMLR 768; Case T-5/02 *Tetra Laval v Commission* [2002] ECR II-4381, [2002] 5 CMLR 1182.

<sup>376</sup> Examples of cases in which interim measures have been granted are Cases 76/89 R etc *Radio Telefis Eireann v Commission* [1989] ECR 1141, [1989] 4 CMLR 749; Case T-395/94 R *Atlantic Container Line AB v Commission* [1995] ECR II-595; Case T-41/98 R *Bayer AG v Commission* [1997] ECR II-381; Case T-65/98 R *Van den Bergh Foods Ltd v Commission* [1998] ECR II-2641, [1998] 5 CMLR 475.

## Articles 101 and 102: private enforcement in the courts of Member States

1. Introduction	295	4. Competition Law as a Defence	319
2. Actions for an Injunction and/or Damages	297	5. Arbitration	325
3. Damages Actions in the UK Courts	306	6. Proposals for Reform	327

### 1. Introduction<sup>1</sup>

Chapter 7 was concerned with the public enforcement of Articles 101 and 102 by the European Commission and the national competition authorities ('the NCAs'). This chapter discusses the private enforcement of the competition rules, that is to say the situation where litigants take their disputes to a domestic court or, quite often, to arbitration.

Historically within the EU, public enforcement of competition law has been much more important than private enforcement<sup>2</sup>. However the competition authorities in the EU have limited resources and they are unable to investigate every alleged infringement of the competition rules. Private enforcement can therefore be an important complement to their activities<sup>3</sup>. The Commission has for a long time been eager that Articles 101 and 102 should be applied more frequently in national courts, thereby relieving it of some of

<sup>1</sup> See generally Jones *Private Enforcement of Antitrust Law in the EU, UK and USA* (Oxford University Press, 1999); *European Competition Law Annual 2001: Effective Private Enforcement of EC Antitrust Law* (Hart Publishing, 2003, eds Ehlermann and Atanasiu); Kerse and Khan *EC Antitrust Procedure* (Sweet & Maxwell, 5th ed, 2005), ch 5, paras 5–054–5–068; Komninos *EC Private Antitrust Enforcement: Decentralised Application of EC Competition Law by National Courts* (Hart Publishing, 2007); Bellamy and Child *European Community Law of Competition* (Oxford University Press, 6th ed, 2008, eds Roth and Rose), paras 14.042–14.142; *Competition Litigation: UK Practice and Procedure* (Oxford University Press, 2010, eds Brealey and Green); *Private Antitrust Litigation* (Global Competition Review, 2011, ed Mobley); OECD *Private remedies* 2008; note also the legal periodical *Global Competition Litigation Review*, established in 2008, which is exclusively concerned with the issues under consideration in this chapter.

<sup>2</sup> See Jones *Private Enforcement of Antitrust Law in the EU, UK and USA* (Oxford University Press, 1999) who estimates that approximately 90 per cent of all antitrust cases in the US involve private rather than public action, and that as many as 2,000 cases have been brought in a single year (*ibid*, p 79); however this figure includes a large number of follow-on actions pursuant to earlier public enforcement, so that the contrast is not as great as these figures may suggest. Official statistics on the number of private antitrust actions in the US are available at [www.albany.edu/sourcebook](http://www.albany.edu/sourcebook).

<sup>3</sup> For a study of the complementary role of damages actions in the US see Lande and Davis *Report of the American Institute's Private Enforcement Project: Benefits From Private Antitrust Enforcement: An Analysis of Forty Cases* (American Antitrust Institute, 2007).

the burden of enforcement. Statements to this effect can be found more than 20 years ago<sup>4</sup>. Commissioner Monti reaffirmed the Commission's desire for more private enforcement in a speech to the Sixth EU Competition Law and Policy Workshop in Florence in June 2001<sup>5</sup>. One of the driving forces behind Regulation 1/2003 was the Commission's desire that national courts and NCAs should share with it the task of enforcing the competition rules, thereby enabling the Commission to concentrate its resources on pursuing the most serious infringements of the law<sup>6</sup>. Articles 6, 15 and 16 of Regulation 1/2003 contain important provisions dealing respectively with the powers of national courts, cooperation between national courts and the Commission and the uniform application of EU competition law. These provisions, and the accompanying Commission *Notice on the co-operation between the Commission and the courts of the EU Member States in the application of Articles [101 and 102 TFEU]*<sup>7</sup> ('the *Co-operation Notice*'), are incorporated into the text that follows. Regulation 1/2003 and the *Co-operation Notice* are silent on the subject of arbitration<sup>8</sup>.

A study published in August 2004, usually referred to as the *Ashurst Report*<sup>9</sup>, was carried out for the Commission to identify and analyse the obstacles to successful damages actions in the Member States based on infringements of competition law. The Report concluded that the picture was one of 'astonishing diversity and total underdevelopment'; on the latter point the Report found only 60 or so cases leading to a judgment on damages, 28 of which had actually led to an award of damages<sup>10</sup>. These figures to some extent misrepresent the number of damages actions that have been brought, since it is well known that many cases are settled out of court on the basis of confidentiality<sup>11</sup>; nevertheless the *Ashurst Report* did highlight numerous obstacles to private enforcement of the competition rules. This led the Commission to publish a Green Paper in December 2005, *Damages actions for breach of the EC antitrust rules*<sup>12</sup>, the purpose of which was to identify the main obstacles to a more efficient system of damages claims and to set out different options to promote more such claims; this was followed in April 2008 by a White Paper bearing the

<sup>4</sup> See eg the Commission's XIIIth *Report on Competition Policy* (1983), point 217.

<sup>5</sup> The speech is available at [www.ec.europa.eu/int/comm/competition/speeches](http://www.ec.europa.eu/int/comm/competition/speeches); see further *European Competition Law Annual 2001: Effective Private Enforcement of EC Antitrust Law* (Hart Publishing, 2003, eds Ehlermann and Atanasius); for a contrary view, arguing that 'public antitrust enforcement is inherently superior to private enforcement', see Wils 'Should Private Antitrust Enforcement Be Encouraged in Europe?' (2003) 26(3) *World Competition* 473 and Wils 'Should Private Antitrust Enforcement be Encouraged' in ch 4 of his book *Principles of European Antitrust Enforcement* (Hart Publishing, 2005).

<sup>6</sup> See recitals 3 and 7 of Regulation 1/2003.

<sup>7</sup> OJ [2004] C 101/4.

<sup>8</sup> On arbitration see 'Arbitration', pp 325–326 below.

<sup>9</sup> *Study on the conditions of claims for damages in case of infringement of EC competition rules*, August 2004, available at [www.ec.europa.eu/comm/competition/antitrust/others/actions\\_for\\_damages/study.html](http://www.ec.europa.eu/comm/competition/antitrust/others/actions_for_damages/study.html).

<sup>10</sup> *Ibid*, p 1; there has undoubtedly been an increase in the award of damages in competition law cases since the *Ashurst Report*: see eg judgment of the District Court of Dortmund of April 2004 (13 O 55/02) awarding damages of €1.6 million to August Storck KG against Hoffmann-la Roche following the Commission's decision in the *Vitamins* case; Case 85/2005 *Conduit Europe v Telefónica*, judgment of the Commercial Court of Madrid of 11 November 2005, awarding damages of €639,000 for refusal to supply contrary to Article 102; *Europe Investor Direct v VPC*, judgment of the Stockholm District Court of 20 November 2008, awarding damages of approximately €384,000 against VPC for abusing its dominant position; judgment of the Valladolid Provincial Court of 9 October 2009 awarding damages of €1.1 million to nine producers of biscuits and confectionery who had to pay higher prices for sugar due to the existence of a cartel in that market.

<sup>11</sup> See eg Rodger 'Private Enforcement of Competition Law, the Hidden Story: Competition Law Litigation Settlements 2000–2005' (2008) 29 *ECLR* 96.

<sup>12</sup> COM(2005) 672 final, 19 December 2005, available at [www.ec.europa.eu/comm/competition/antitrust/actionsdamages](http://www.ec.europa.eu/comm/competition/antitrust/actionsdamages); see also the accompanying Staff Working Paper which contains a rich source of research material.

same title<sup>13</sup>. It is noticeable that, whereas the Green Paper seemed to regard the availability of damages for infringements of Articles 101 and 102 as having an important deterrent effect, the White Paper is much more concerned with damages as a method of compensating the victims of breaches of the law. It is important that policy in this area should be clear-sighted as to its aims: the Commission's current position would appear to be that deterrence is best achieved through effective public enforcement of the law, and compensation through private actions<sup>14</sup>.

The Green and White Papers are discussed in the final section of this chapter; so too is the Commission's consultation document, *Towards a Coherent European Approach to Collective Redress*. The final section will also mention proposals for possible reform in the UK<sup>15</sup>.

Section 2 of this chapter will deal with actions for an injunction and/or damages based on infringements of Articles 101 and/or 102 TFEU as a matter of EU law. Section 3 deals with damages actions in the UK courts including, specifically, so-called 'follow-on' actions for damages in the UK Competition Appeal Tribunal under section 47A of the Competition Act 1998. Section 4 deals with the use of competition law not as a 'sword', where the claimant's cause of action is based on an infringement of competition law, but rather as a 'shield', that is to say as a defence, for example to an action for breach of contract or infringement of an intellectual property right. Section 5 contains a brief discussion of issues that can arise where competition law disputes are referred to arbitration rather than to a court for resolution. Section 6 discusses the options for reform that are currently under consideration in the EU and the UK.

## 2. Actions for an Injunction and/or Damages

### (A) Is there a right to damages under Articles 101 and 102?

Articles 101 and 102 are directly applicable and produce direct effects: they give rise to rights and obligations which national courts have a duty to safeguard and enforce<sup>16</sup>. However until 2001 there had not been a judgment of the Court of Justice dealing specifically with the question of whether Member States have an obligation, as a matter of EU law, to provide a remedy in damages where harm has been inflicted as a result of an infringement of the competition rules. The issue is particularly important given that the Commission has no power to award damages, although it may be able to encourage a defendant to compensate its victims in return for a reduction in its fine<sup>17</sup>. The principles of non-discrimination and full effectiveness (*'effet utile'*)<sup>18</sup>, the judgment of the Court

<sup>17</sup> See eg *Pre-Insulated Pipe Cartel* OJ [1999] L 24/1, para 172; *Nintendo* Commission decision of 30 October 2002, OJ [2003] L 255/33, paras 440–441.

<sup>18</sup> See Case 106/77 *Simmenthal* [1978] ECR 629, [1978] 3 CMLR 263, para 16; Case 158/80 *REWE v Hauptzollamt Kiel* [1981] ECR 1805, [1982] 1 CMLR 449, para 44; Case 199/82 *Ammistrazione delle Finanze dello Stato v San Giorgio* [1983] ECR 3595, [1985] 2 CMLR 658; Case C-213/89 *Factortame* [1990] ECR I-2433, [1990] 3 CMLR 1, para 19.

of Justice in *Francovich v Italy*<sup>19</sup> and the opinion of Advocate General van Gerven in *HJ Banks v British Coal Corpn*<sup>20</sup> all pointed towards the possibility of an action for damages; and the courts in the UK had assumed, in several cases, that such an action was available<sup>21</sup>. In 2001 the Court of Justice's judgment in *Courage Ltd v Crehan*<sup>22</sup> clarified the position, emphatically establishing a right to damages. A subsequent judgment of the Court of Justice in 2006, *Manfredi*<sup>23</sup>, was equally emphatic.

## (B) *Courage Ltd v Crehan*

In *Courage Ltd v Crehan* the Court of Justice held that:

The full effectiveness of Article [101 TFEU] and, in particular, the practical effect of the prohibition laid down in Article [101(1)] would be put at risk if it were not open to any individual to claim damages for loss caused to him by a contract or by conduct liable to restrict or distort competition.

Indeed the existence of such a right strengthens the working of the [EU] competition rules and discourages agreements or practices, which are frequently covert, which are liable to restrict or distort competition. From that point of view, actions for damages before the national courts can make a significant contribution to the maintenance of effective competition in the [EU]<sup>24</sup>.

The judgment in *Courage Ltd v Crehan* was a landmark in the private enforcement of Articles 101 and 102. It was a particularly striking case in that the claimant, Crehan, was not, for example, a customer of a cartel seeking damages for harm inflicted by a horizontal agreement the object of which was to restrict competition. Rather Crehan was himself party to a vertical agreement for the supply of beer by a brewer to him. At most the agreement was one that restricted competition by effect rather than by object, and, as a co-contractor, it was arguable that Crehan should not be able to recover damages as a result of losses caused by an unlawful agreement for which he was himself partly responsible. In English law there is a rule that one party to an agreement cannot recover damages from another party if they are both equally responsible for it (*'in pari delicto'*)<sup>25</sup>. The Court of Justice's view was that there should not be an absolute bar to a person in the position of

<sup>25</sup> See Monti 'Anticompetitive Agreements: the Innocent Party's Right to Damages' (2002) 27 EL Rev 282 (critical of the judgment); Odudu and Edelman, *ibid.*, 327; Cumming 'Courage Ltd v Crehan' (2002) 27 ECLR 199; Jones and Beard 'Co-contractors, Damages and Article 81: The ECJ Finally Speaks' (2002) 23 ECLR 246; on the position in the US, see *Perma Life Mufflers Inc v International Parts Corpn* 392 US 134 (1968).

Crehan bringing an action<sup>26</sup>: the national court should take into account matters such as the economic and legal context in which the parties find themselves and the respective bargaining power and conduct of the two parties to the contract<sup>27</sup>. Of particular importance would be whether a person in the position of Crehan found himself in a markedly weaker position than a brewer such as Courage, so as seriously to compromise or even eliminate his freedom to negotiate the terms of the contract and his capacity to avoid the loss or reduce its extent<sup>28</sup>. A further point was that, in a situation such as that in *Crehan*, the restrictive effect of Courage's agreement with Crehan arose from the fact that it was one of many similar agreements having a cumulative effect on competition<sup>29</sup>: in those circumstances Crehan could not be considered to bear significant responsibility for the infringement of the competition rules<sup>30</sup>.

Unfortunately for Crehan when the case reverted to the English High Court in the UK Park J held that the agreement did not infringe Article 101 anyway and dismissed his claim<sup>31</sup>; this finding was ultimately upheld on appeal to the House of Lords (now the Supreme Court)<sup>32</sup>. After 13 years of litigation Crehan recovered no damages whatsoever; however he made a crucial contribution to the important issue of the private enforcement of competition law.

### (C) *Manfredi*

In *Manfredi* the Italian Competition Authority had found that various insurance companies had violated Italian competition law through the unlawful exchange of information; the decision was upheld on appeal to the Council of State. Customers of the insurance companies sued for damages for breaches of both Italian and EU competition law. Various questions were submitted to the Court of Justice under Article 267 TFEU, partly as to the right to damages under Article 101 and partly as to specific Italian provisions concerning damages claims under internal Italian law. On the right to damages the Court of Justice repeated what it had said in *Crehan*. The full effectiveness of Article 101(1) required that:

any individual can claim compensation for the harm suffered where there is a causal relationship between that harm and an agreement or practice prohibited under Article [101 TFEU]<sup>33</sup>.

In *Manfredi* there were some specific points about Italian procedural law that seemed to complicate the claimants' actions: for example there were rules that allocated jurisdiction in actions for damages based on competition law to a different court from the one that would deal with 'normal' damages claims, thereby increasing the cost and length of the litigation; there were limitation periods that could be harmful to their cause; and there were rules that might prevent them from recovering the full amount of their losses. The Article 267 reference asked the Court of Justice whether these domestic rules were compatible with EU law. The Court of Justice's answer, in essence, was that these were matters of domestic law, provided that they did not offend the EU principles of equivalence and effectiveness. What the *Manfredi* judgment did was to reveal that, despite the Court of

<sup>26</sup> Case C-453/99 [2001] ECR I-6297, [2001] 5 CMLR 1058, para 28.

<sup>27</sup> *Ibid*, para 32.

<sup>28</sup> *Ibid*, para 33.

<sup>29</sup> On this point see ch 16, 'Factors to be considered in determining whether single branding agreements infringe Article 101(1)', p 638.

<sup>30</sup> Case C-453/99 [2001] ECR I-6297, [2001] 5 CMLR 1058, para 34; it is interesting to speculate as to what would have happened if a third party had sued Courage and Crehan for harm suffered as a result of the agreement: the Court of Justice's reasoning would suggest that Courage, but not Crehan, should be liable.

<sup>31</sup> *Crehan v Inntrepreneur Pub Co* [2003] EWHC 1510.

<sup>32</sup> [2006] UKHL 38, [2006] UKCLR 1232.

<sup>33</sup> Cases C-295/04 etc *Vincenzo Manfredi v Lloyd Adriatico Assicurazioni SpA* [2006] ECR I-6619, [2006] 5 CMLR 17, para 61.

Justice's enthusiasm for damages actions, there remains the 'problem' that Member States retain autonomy in relation to the procedural rules of their domestic judicial systems, as well as the substantive rules of recovery in tort, delict, restitutionary and other actions, and that these rules might inhibit successful damages claims<sup>34</sup>. This is precisely why the European Commission set out to identify the 'obstacles' that lie in the way of damages actions and to consider ways of reducing or eliminating them. This issue will be returned to in the final section of this chapter.

#### (D) The 'passing-on' defence and the position of indirect purchasers

*Crehan* and *Manfredi* leave no doubt that damages are available where Articles 101 and/ or 102 are infringed. However the judgments do not deal specifically with two interrelated conundra that arise in this context, namely the possible existence of a passing-on defence, and the right of sub-purchasers from the immediate victim(s) of anti-competitive behaviour to bring an action for damages for any loss that they may have suffered.

Suppose that members of a widget cartel have been fixing prices for the last five years. Their immediate customers, who purchase widgets in order to produce widget dioxide, will have paid more for the widgets than they would have done in the absence of the cartel. However it may be the case that some – or even all – of the increased price will be 'passed on' to their own customers, the purchasers of widget dioxide. Indeed those purchasers may themselves be able to pass all or some of the increased price further down the distribution chain. Two questions arise in this situation: first, if the producers of widget dioxide sue the members of the widget cartel for damages, can the latter raise as a defence that the widget dioxide producers have passed on their loss to their customers? And if the answer to the latter question is 'yes', does it follow that sub-purchasers (also referred to as indirect purchasers) can bring an action for damages for the increased price that has been passed on to them? These are far from simple questions. To *refuse* a passing-on defence could mean that the widget dioxide producers will be allowed to recover damages for a loss that they have not actually incurred; however to *allow* a passing-on defence suggests that firms, or even end-consumers, further down the distribution chain should be able to recover. As one descends through the distribution chain, however, it becomes more difficult to calculate the actual harm suffered, and a danger exists that the harm suffered by individual firms or natural persons is so small that no one would bother to sue for damages at all: that would leave an ill-gotten gain in the hands of the cartelists, the least desirable outcome. Various economic and econometric techniques have been suggested to facilitate the calculation of damages in competition cases<sup>35</sup>, and the European Commission has published a draft guidance paper on the subject<sup>35a</sup>.

<sup>34</sup> When the case returned to Italy Mr Manfredi was awarded €889.10 in damages and €500 for legal costs by the small claims court: see *Nebbia* 'So What Happened to Mr Manfredi? The Italian Decision Following the Ruling of the European Court of Justice' (2007) 28 ECLR 591.

<sup>35</sup> See Oxera study on *Quantifying antitrust damages: Towards non-binding guidance for courts*, December 2009; Noble 'How to Quantify Damages? A Brief Overview of Economic Concepts and Techniques' (2008) 7(1) Competition Law Journal 57; for more general discussion of the issues under consideration see Hoseinian 'Passing-on Damages and Community Antitrust Policy – An Economic Background' (2005) 28(1) World Competition 3–23; Petrucci 'The Issues of the Passing-on Defence and Indirect Purchasers' Standing in European Competition Law' (2008) 29 ECLR 33; van Dijk and Verboven 'Implementing the passing-on defence in cartel damages actions' (2010) 3 Global Competition Litigation Review 98; De Coninck 'Estimating private antitrust damages' Concurrences No 1–2010, 39; Commission Staff Working Paper accompanying the White Paper on *Damages actions for breach of the EC antitrust rules* COM(2008) 404, paras 201–225.

<sup>35a</sup> Quantifying harm in actions for damages based on Articles 101 and 102 of the Treaty on the Functioning of the European Union, June 2011, available at [www.ec.europa.eu](http://www.ec.europa.eu).

In the US the Supreme Court rejected the passing-on defence in *Hanover Shoe Inc v United Shoe Machinery Corp*<sup>36</sup>, because there damages do play an important role in the deterrence of cartels<sup>37</sup>. As to indirect purchasers, the Supreme Court held in *Illinois Brick Co v Illinois*<sup>38</sup> that in general claims by indirect purchasers should not be allowed, a natural corollary of the judgment in *Hanover Shoe*. However several individual states have amended their own laws to provide for indirect purchasers to sue<sup>39</sup>, and the US Antitrust Modernisation Commission recommended legislative action to improve the law on indirect purchasers<sup>40</sup>. This thorny topic will be returned to below, both in the context of the enforcement of Articles 101 and 102 in the UK<sup>41</sup> and in the discussion of possible reform of the law at EU and/or UK level<sup>42</sup>. The Court of Justice's judgments in *Crehan* and *Manfredi* did not deal with this topic specifically<sup>43</sup>, although the Court's statement in paragraph 26 of *Crehan* and paragraph 56 of *Manfredi* that it should be open to 'any' individual for claim damages for loss caused by anti-competitive conduct would lend support to the proposition that indirect as well as direct purchasers should be able to sue; this point was repeated in paragraph 28 of the Court's judgment in *Pfleiderer AG v Bundeskartellamt*<sup>44</sup>.

## (E) Interim relief

*Crehan* and *Manfredi* establish that there is a right to damages for harm caused by an infringement of the competition rules. Quite often a claimant is as interested in obtaining an injunction to bring anti-competitive behaviour to an end as in receiving damages; more specifically the claimant may seek interim relief pending the outcome of a competition investigation by a competition authority.

The Commission has power under Article 8 of Regulation 1/2003 to adopt interim measures<sup>45</sup>; NCAs have similar powers<sup>46</sup>. However the competition authorities, acting in the public interest, are sparing in their adoption of interim measures; a claimant in need of interim relief may find that an application to a national court is a more effective way to proceed, the function of the court being to achieve justice between the parties. In his Opinion in *AOK Bundersverband*<sup>47</sup> Advocate General Jacobs considered that the *Crehan* principle that damages should be available to protect the *effet utile* of Article 101

<sup>36</sup> 392 US 481 (1968).

<sup>37</sup> This is further exemplified by the award of treble damages to successful plaintiffs rather than single (compensatory) damages.

<sup>38</sup> 431 US 720 (1977); the English High Court has described the judgment in *Hanover Shoe* 'as a policy decision not open to the English courts, damage being a necessary ingredient of the cause of action': *Emerald Supplies Ltd v British Airways plc* [2009] EWHC 741, [2009] UKCLR 801, para 37; see also Brealey 'Adopt Perma Life, but Follow Hanover Shoe to Illinois? – Who Can Sue for Damages for Breach of EC Competition Law?' (2002) 1 Competition Law Journal 127.

<sup>39</sup> See *California v ARC America Corp* 490 US 93 at 105–106 (1989).

<sup>40</sup> See Chapter IIIB of the Report, available at [www.amc.gov](http://www.amc.gov); these recommendations had not been implemented as at 20 June 2011.

<sup>41</sup> See 'Can an indirect purchaser sue?', p 311 below.

<sup>42</sup> See 'Proposals for Reform', pp 327–329 below.

<sup>43</sup> The Court of Justice has dealt with this topic in the context of non-contractual liability of the EU under Article 340(2) TFEU: see eg Case 238/78 *Ireks-Arkady v Council and Commission* [1979] ECR 2955.

<sup>44</sup> Case C-360/09 [2011] ECR I-000, [2011] 5 CMLR 219.

<sup>45</sup> See ch 7, 'Article 8: interim measures', p 255.

<sup>46</sup> On the OFT's powers under UK law to adopt interim measures see ch 10, 'Interim measures', p 407.

<sup>47</sup> Case C-264/01 [2004] ECR I-2493.

applied equally to applications for interim relief<sup>48</sup>. Applications for interim relief in the UK courts, which have sometimes been successful, are discussed below<sup>49</sup>.

## (F) Private enforcement and Regulation 1/2003

Recital 7 of Regulation 1/2003 states that national courts have an ‘essential part’ to play in applying the competition rules. Article 6 of the Regulation states simply that:

National courts shall have the power to apply Articles [101 and 102 TFEU].

There are two further provisions in Regulation 1/2003 of considerable importance to private enforcement: Article 15 on cooperation with national courts and Article 16 on the uniform application of EU competition law. They should be read in conjunction with the Commission’s *Co-operation Notice*.

### (i) Article 15: cooperation with national courts

Recital 21 of Regulation 1/2003 refers to the importance of consistency in the application of the competition rules across the EU, and to the consequent need to establish arrangements for cooperation between the Commission and national courts, whether those courts are dealing with litigation between private parties, are acting as enforcers of the law or are sitting as courts of appeal or judicial review. Article 15 provides for various types of cooperation with national courts, as set out below. The cooperation envisaged under Article 15 is between the Commission and the national courts, not between the Commission and the litigants themselves: when asked to assist a national court the Commission will not have any direct dealings with the parties to the litigation and, if approached by them, it will inform the national court of the fact<sup>50</sup>.

Regulation 1/2003 does not provide for a ‘network of national courts’ in the way that it establishes a ‘network of national competition authorities’<sup>51</sup>; however, an ‘Association of European Competition Law Judges’ was established in 2002 in order to bring together judges of the national courts to discuss and debate points of common interest<sup>52</sup>.

### (A) Requests by national courts for information or an opinion

Article 15(1) of Regulation 1/2003 provides that a national court may request the Commission to transmit to it information in the Commission’s possession or to provide it with an opinion concerning the procedural or substantive application of the EU competition rules. The Commission will endeavour to reply to a request for information within one month<sup>53</sup>. An important point is that Article 339 TFEU provides that the Commission is not allowed to transmit information covered by the obligation of professional secrecy, which may be both confidential information and business secrets: the Commission will not provide such information to a national court unless the latter can guarantee that it will protect it<sup>54</sup>. The Commission will not transmit to a national court information voluntarily submitted to it by a leniency applicant without its consent<sup>55</sup>. The Commission will endeavour to reply to a request for an opinion within four months<sup>56</sup>. When giving its opinion the Commission will limit itself to providing the national court with the factual information

<sup>48</sup> See para 104 of the Opinion.

<sup>49</sup> See ‘Interim relief’, p 310 below.

<sup>50</sup> *Co-operation Notice*, para 19.

<sup>51</sup> See ch 7, ‘Case allocation under Regulation 1/2003’, p 289.

<sup>52</sup> The website of the AECLJ is [www.aeclj.com](http://www.aeclj.com).

<sup>53</sup> *Co-operation Notice*, para 22.

<sup>54</sup> *Ibid*, paras 23–25.

<sup>55</sup> *Ibid*, para 26.

<sup>56</sup> *Ibid*, para 28.

or the economic or legal clarification asked for without considering the merits of the case<sup>57</sup>. The Article 15(1) procedure has been used on a number of occasions: for example in the course of 2006 the Commission provided two opinions to national courts<sup>58</sup>; three opinions were provided during 2007<sup>59</sup>; several during 2008<sup>60</sup> and five during 2009<sup>61</sup>. Of course a national court requiring advice on a point of law could also, should it prefer to do so, make a preliminary reference under Article 267 TFEU to the Court of Justice<sup>62</sup>.

A national court wishing to approach the Commission for assistance may do so by post, but may also do so by sending an email to a bespoke address: [comp-amicus@ec.europa.eu](mailto:comp-amicus@ec.europa.eu).

### **(B) Submission of judgments to the Commission**

Article 15(2) of Regulation 1/2003 requires Member States to submit any written judgment deciding on the application of Articles 101 and 102 to the Commission, without delay after the full written judgment is notified to the parties. The Commission has created a database of all such judgments which is accessible on its website; it contains non-confidential versions of judgments in their original language, classified according to the Member State of origin<sup>63</sup>. Unfortunately it does not appear to be up to date.

### **(C) Observations by national competition authorities and the Commission**

Article 15(3) of Regulation 1/2003 makes provision for NCAs and the Commission to make observations to national courts. Each may make written observations acting on their own initiative; oral observations may be made with the permission of the court. In order to enable them to make such observations NCAs and the Commission may request the relevant court to transmit or ensure the transmission to them of documents necessary for an assessment of the case. This provision is similar to the practice in some Member States that enables an NCA to intervene in cases before the national courts; in France, for example, the French Competition Authority may give expert testimony in civil proceedings<sup>64</sup>. Regulation 1/2003 does not provide a procedural framework for the submission of observations; this is therefore a matter for the rules and practices of the court of the Member State to which they are made<sup>65</sup>.

In 2006 the Commission made its first intervention under Article 15(3) to the Paris Court of Appeal in relation to the interpretation of the motor vehicle block exemption regulation<sup>66</sup>; in 2007 the Commission intervened in a case in the Netherlands concerning the deductibility of Commission competition fines<sup>67</sup>; and in 2009 the Commission submitted observations in front of the Paris Court of Appeal in a case about restrictions of online sales in selective distribution agreements<sup>68</sup>. The Commission also intervened under Article 15(3) in the *Beef Industry Development Society* case<sup>69</sup>. In the UK the Office

<sup>69</sup> See ch 4, '*Matra Hachette v Commission*', pp 153–155.

of Rail Regulation, relying on Article 15(3) of Regulation 1/2003, made observations to the court in the case of *English Welsh & Scottish Railway Ltd v E.ON*<sup>70</sup>.

**(D) Wider national powers**

Article 15(1) to (3) of Regulation 1/2003 establishes EU rules on cooperation; Article 15(4) states that the rules therein are without prejudice to any wider powers that might exist under national law in a particular Member State allowing competition authorities to make observations.

**(ii) Article 16: uniform application of EU competition law**

Article 16(1) of Regulation 1/2003, which is concerned with the uniform application of the EU competition rules, explains the effect of Commission decisions on national courts. As recital 22 of the Regulation points out, it is important that the competition rules should be applied uniformly throughout the EU and that conflicting decisions should be avoided. The Regulation therefore clarifies, in accordance with the case law of the Court of Justice<sup>71</sup>, the effect of Commission decisions on national courts (and NCAs). The Regulation also addresses the position of a national court dealing with a case which the Commission is investigating at the same time, without having yet reached a decision.

**(A) The effect of Commission decisions**

The first sentence of Article 16(1) gives expression to Article 288 TFEU and the Court of Justice's judgment in *Masterfoods*<sup>72</sup>. It states that, where national courts rule on a matter which has already been the subject of a Commission decision under Article 101 or Article 102, they cannot reach conclusions running counter to that of the Commission. The Regulation does not state specifically that an appellate court in a Member State would be bound by a Commission decision even where a lower court had reached a contrary conclusion prior to the Commission's decision; however this point was established by the Court of Justice in *Masterfoods*<sup>73</sup>. If the Commission's decision is on appeal to the General Court or the Court of Justice the national court should stay its proceedings pending a definitive decision on the matter by the EU Courts<sup>74</sup>. If a national court considers that a Commission decision is wrong, and if it has not been the subject of an appeal to the EU Courts, the only option available to the national court would be to make an Article 267 reference to the Court of Justice<sup>75</sup>.

Sometimes the Commission states that an undertaking has participated in a cartel, but does not impose a fine because this has become time-barred: the undertaking may challenge the reference to it in the decision because the fact renders it vulnerable to a damages claim<sup>76</sup>.

**(B) Parallel proceedings**

The second sentence of Article 16(1) states that, where a national court is hearing an action, it must avoid giving a decision which would conflict with a decision contemplated by the Commission in proceedings that it has initiated. Article 16(1) adds that the national

<sup>70</sup> [2007] EWHC 599, [2007] UKCLR 1653.

<sup>71</sup> Of particular importance is the judgment of the Court of Justice in Case C-344/98 *Masterfoods Ltd v HB Ice Cream Ltd* [2000] ECR I-11369, [2001] 4 CMLR 449; see generally Nazzini *Concurrent Proceedings in Competition Law* (Oxford University Press, 2004), esp ch 7 and Komninos 'Effect of Commission decisions on private antitrust litigation: Setting the story straight' (2007) 44 CML Rev 1387.

<sup>72</sup> See ch 8 n 71 above. <sup>73</sup> *Masterfoods*, para 60.

<sup>74</sup> *Ibid*, paras 52 and 57; *Co-operation Notice*, para 13.

<sup>75</sup> *Ibid*, para 13. <sup>76</sup> See ch 7, 'Past infringements', pp 254–255.

court in this situation should consider whether to stay its proceedings; if it were to do so, it is likely that the Commission would expedite its own proceedings in order to enable the outcome of the civil dispute to be decided. The national court could order interim measures to protect the interests of the parties while awaiting the Commission's decision<sup>77</sup>.

Where a national court has reason to believe that the Commission is conducting a parallel investigation of a possible infringement of Article 101 or 102 it could seek information from the Commission under the provisions of Article 15 of Regulation 1/2003 discussed above about any proceedings it may have in motion, what it is likely to decide in that case and when. The Commission has a duty under Article 4(3) TEU to cooperate with the judicial authorities in Member States in matters of this kind<sup>78</sup>.

### (G) The relationship between private and public enforcement of Articles 101 and 102

A complex issue is the relationship between the private and public enforcement of Articles 101 and 102. As a general proposition the Commission is in a much better position than a private plaintiff to discover infringements of the competition rules, in particular given the wide-ranging investigative powers that it can deploy throughout the EU. The Commission has resources and experience that enable it to identify infringements that many plaintiffs lack; and it is probably better able to quantify the harm caused by infringements of Articles 101 and 102. The Commission also is able to incentivise undertakings to inform it of infringements of Article 101 as a result of its leniency programme<sup>79</sup>.

Given the Commission's desire to see more private enforcement of the competition rules, one might suppose that it would facilitate follow-on actions by (a) inserting as much information in its decisions as possible about any infringement; (b) allowing access to the file to third parties that wish to obtain more information than can be found in the Commission's decision; and (c) allowing third parties access to leniency applications made by members of cartels where this might facilitate a follow-on action. However, from the Commission's point of view there is a danger that, in acceding to claimants' wishes in this respect, it may (a) infringe the EU rules on protecting confidentiality and business secrets; and (b) undermine the leniency programme, if the fear of leniency applications being disclosed were to deter undertakings from whistleblowing and cooperating with the Commission in other ways. This is not an easy balance to strike, and there are a number of current cases in which claimants are seeking to obtain access to information in the Commission's possession in order to progress their private litigation<sup>80</sup>.

The Court of Justice considered this issue in *Pfleiderer AG v Bundeskartellamt*<sup>81</sup>. In that case the Bundeskartellamt had imposed a fine on members of a décor paper cartel. *Pfleiderer* brought an action for damages and sought access to the BKA's file, including the leniency applications that had been made. The Court of Justice recognised, on the one

<sup>77</sup> *Masterfoods*, para 58; *Co-operation Notice*, para 14.

<sup>78</sup> See Case C-234/89 *Delimitis v Henninger Bräu* [1991] ECR I-935, [1992] 5 CMLR 210, para 53; see also Cases C-319/93 etc *Hendrik Evert Dijkstra v Friesland (FRICO Domo) Coöperatie BA* [1995] ECR I-4471, [1996] 5 CMLR 178, para 34; on the Commission's duty of sincere cooperation see the order of the Court of Justice in Case C-2/88 R *Zwartveld* [1990] ECR I-3365, [1990] 3 CMLR 457, para 18 and Case C-275/00 *Commission v First NV and Franex NV* [2002] ECR I-10943, [2005] 2 CMLR 257, para 49.

<sup>80</sup> See eg Case T-173/09 *Z v Commission (Marine Hoses)*, not yet decided; Case T-437/08 *CDC Hydrogene Peroxide v Commission (Bleaching Chemicals)*, not yet decided; Case T-380/08 *Kingdom of Netherlands v Commission (Dutch Bitumen)*, not yet decided; Case T-344/08 *EnBW Energie Baden-Württemberg v Commission (Gas Insulated Switchgear)*, not yet decided.

<sup>81</sup> Case C-360/09 [2011] ECR I-000, [2011] 5 CMLR 219.

hand, the important role of leniency programmes in uncovering and bringing an end to cartels<sup>82</sup>, and that disclosure of leniency applications could compromise the success of such programmes<sup>83</sup>. However it also recognised the important principle that claimants should be able to recover compensation for harm suffered<sup>84</sup>. The Court's conclusion was that it should be left to national courts to weigh these different considerations on a case-by-case basis, according to national law, taking into account all the relevant factors in the case<sup>85</sup>.

A claimant in a damages action in the US might also seek discovery of documents in the European Commission's possession, including leniency applications; such claims will be denied where the Court considers that it is appropriate in order to maintain the confidentiality of the materials sought<sup>86</sup>.

## (H) The duty of national courts

An important issue is whether a national court has a duty, of its own motion, to raise issues of competition law irrespective of whether one or more of the litigants do so. This matter was considered by the Court of Justice in *van Schijndel*<sup>87</sup> and is summarised in paragraph 3 of the Commission's *Co-operation Notice*. Where domestic law requires a national court to raise points of law based on binding domestic rules which have not been raised by the parties the same obligation also exists where binding EU rules, such as those on competition, exist; the same is the case where the national court has a discretion to raise such points of law. However EU law does not require national courts to raise a point of EU law where this would require them to abandon the passive role assigned to them by going beyond the ambit of the dispute defined by the parties.

## 3. Damages Actions in the UK Courts<sup>88</sup>

### (A) The availability of damages in the UK courts

The UK courts established nearly 30 years ago (long before *Crehan*) that damages could be available for harm caused by infringements of Articles 101 and 102<sup>89</sup>. The Competition Act 1998 does not explicitly confer a right to damages where the Chapter I and Chapter II prohibitions are infringed. However there is no doubt that damages are available<sup>90</sup>: this follows

<sup>82</sup> *Ibid*, para 25.                      <sup>83</sup> *Ibid*, paras 26 and 27.

<sup>84</sup> *Ibid*, paras 28 and 29.            <sup>85</sup> *Ibid*, para 31.

### **(B) The OFT's Discussion Paper and Recommendations on private enforcement of the competition rules**

Public policy in the UK has moved in favour of more private enforcement of the competition rules: in particular various provisions in the Enterprise Act 2002 were designed to facilitate damages claims, as will be seen in the text that follows. In April 2007 the OFT published a Discussion Paper, *Private actions in competition law: effective redress for consumers and business*<sup>93</sup>; this was followed in November of the same year by *Private actions in competition law: effective redress for consumers and business: Recommendations from the Office of Fair Trading*<sup>94</sup>; both documents will be briefly considered at the end of this chapter<sup>95</sup>. The UK Government is considering the case for reforming the law relating to private actions<sup>96</sup>.

### **(C) Which court to sue in: the jurisdiction of the High Court and the Competition Appeal Tribunal**

A claimant seeking damages in the UK has two options: to bring a 'standalone' action in the Chancery Division of the High Court<sup>97</sup> and prove an infringement of the competition rules without the benefit of a prior decision to that effect by a public authority, or, where the Office of Fair Trading ('the OFT'), a sectoral regulator or the European Commission has adopted a decision finding an infringement of EU or UK competition law, to bring a 'follow-on' action in the High Court or the Competition Appeal Tribunal ('the CAT'). Section 16 of the Enterprise Act 2002 makes provision for the Lord Chancellor to make regulations for the transfer of standalone cases to the CAT<sup>98</sup>; to date no such regulations have been made<sup>99</sup>. The following sections will discuss the issues that have arisen, or may arise, in the context of damages actions before the UK courts.

<sup>98</sup> See Lever 'Restructuring Courts and Tribunals Hearing UK and EC Competition Law Cases' (2002) 1 Competition Law Journal 47; Brown 'Section 16 Enterprise Act 2002 – Time for Activation?' (2007) 28 ECLR 488.

<sup>99</sup> Note however that there is provision for the transfer between the High Court and the CAT of follow-on actions that satisfy the terms of s 47A of the Competition Act: see 'Monetary claims before the CAT', pp 317–318 below.

## (D) Private international law

The issue of which Member States' courts have jurisdiction in relation to a competition law case are determined by reference to the *Brussels Regulation on Jurisdiction and the Recognition and Enforcement of Judgments in Civil and Commercial Matters*<sup>100</sup>. The basic rule under Article 2 of the Regulation is that the defendant should be sued where it is domiciled, although there are a number of exceptions to this: for example under Article 5 it is also possible to bring an action where the harmful act occurred or where the harm was suffered. The issue of which substantive law should be applied in a case of non-contractual obligations arising out of a restriction of competition is determined by reference to the *Regulation on the Law Applicable to Non-contractual Obligations ('Rome II')*<sup>101</sup>: the basic rule is that the law of the place where the market is affected or likely to be affected should be applied.

Numerous actions have been commenced in the High Court in recent years, and there have been several in the CAT as well under section 47A of the Competition Act 1998<sup>102</sup>; this suggests that litigants see certain advantages to litigating in England and Wales as opposed to suing in other Member States. There are various explanations for this: for example the helpful rules for discovery of evidence, effective case management procedures and considerable experience of handling complex international litigation. The judgment of the High Court in *Roche Products Ltd v Provimi Ltd*<sup>103</sup> revealed an interesting jurisdictional possibility. The claimant sought damages as a result of harm alleged to have been inflicted upon it by the *Vitamins* cartels<sup>104</sup>. Proceedings were commenced against Roche Products Ltd of the UK ('Roche UK') on the basis of Article 2 of the Brussels Regulation, as it was domiciled there. Provimi persuaded the High Court that it had 'an arguable case' that Roche UK had infringed Article 101(1) by (even unknowingly) implementing the cartels entered into by its Swiss parent company, Roche Vitamine Europa AG. The High Court also acceded to Provimi's request to join the Swiss company on the basis of Article 6 of the Regulation, which says that other entities can be joined where the claims against them are 'so closely connected that it is expedient to hear and determine them together to avoid the risk of irreconcilable judgments resulting from separate proceedings'. This meant that the presence of a subsidiary in the UK (or, more precisely, in England and Wales) could be used to establish jurisdiction over a non-UK parent. The judgment has been criticised<sup>105</sup>, and in *Cooper Tire & Rubber Company v Shell Chemicals UK Ltd*<sup>106</sup> the Court of Appeal cast doubt on its correctness; however it did not actually overrule it since the point was not germane to the actual appeal in that case.

An attempt to claim jurisdiction on the basis of Article 5(3) of the Regulation, which allows a claimant to sue in the courts of the country in which it suffered harm, failed

<sup>106</sup> [2010] EWCA Civ 864, [2010] UKCLR 1277, paras 45–47.

in *Sandisk Corporation v Koninklijke Philip Electronics NV*<sup>107</sup> where the claimant failed to demonstrate a ‘good arguable case’ and where other Member States indisputably had jurisdiction<sup>108</sup>.

Under the Brussels Regulation, if litigation between two or more parties is commenced in one Member State, the courts of the other Member States are required by Article 27 of the Regulation to refrain from taking jurisdiction in relation to the same matter. In *National Grid Electricity Transmission plc v ABB Ltd*<sup>109</sup> the claimant commenced proceedings in the High Court in England and Wales in order to pre-empt the possibility of any of the other litigants initiating proceedings in another jurisdiction.

In some circumstances a claimant may be able to sue in the US, where it may obtain the benefit of treble damages<sup>110</sup>; however this may not be possible if no antitrust harm has been suffered within the US<sup>111</sup>.

### (E) The cause of action

The claimant’s cause of action is generally considered to be for breach of statutory duty, the statute in question being the European Communities Act 1972 or the Competition Act 1998<sup>112</sup>. The point is not free from doubt. In *Courage Ltd v Crehan*<sup>113</sup> the Court of Appeal noted that Crehan would not have been able to recover damages according to the rules of that tort, since the harm he had suffered was not of the kind that Article 101 intended to prevent. However the Court of Appeal recognised that Crehan should be able to recover damages because of the direction to that effect from the Court of Justice: the EU principle of *effet utile* overrode the position at common law<sup>114</sup>. In *Devenish Nutrition v Sanofi-Aventis*<sup>115</sup> the Court of Appeal held that it is not possible to make a restitutionary award in competition cases; an ‘account of profits’ was precluded in particular where compensatory damages are an adequate remedy<sup>116</sup>.

### (F) Standard of proof

The standard of proof has been considered in a number of cases<sup>117</sup>: the burden of proof is on the claimant and it is incumbent on it to prove its allegations on the balance of probabilities. A similar approach has been adopted by the CAT<sup>118</sup>. The seriousness of what

is alleged is taken into account when considering the probabilities of an infringement having occurred; the more unlikely the allegation, the stronger the evidence must be to establish it<sup>119</sup>. A claim will be struck out where it does not adequately plead the facts and matters relied on to establish an alleged infringement to the requisite standard<sup>120</sup>.

### (G) Interim relief

The test for the grant of interim relief in competition cases is to decide which course (that is to say the grant or the refusal of the injunction) would involve less risk of injustice if it turns out to be wrong<sup>121</sup>. Applications for interim relief have sometimes been rejected on the ground that an award of damages at the trial of the action would be an adequate remedy<sup>122</sup>. However some applications have been successful, particularly where individuals' livelihoods were at stake<sup>123</sup>, but also sometimes between more substantial litigants<sup>124</sup>. An interim injunction was granted to the claimant in *Jobserve Ltd v Network Multimedia Television*<sup>125</sup>, where the judge was of the view that there was an arguable case that it was an abuse of a dominant position for Jobserve to refuse to accept job vacancy advertisements on its website: pending trial the balance of justice lay in the claimant's favour. A particularly striking example of a successful application for interim relief is the case of *Adidas-Salomon AG v Roger Draper and Paul Howorth*<sup>126</sup> in which Adidas was granted an interim injunction against the International Tennis Federation and the 'Grand Slam' tennis tournaments in relation to the dress rules for tennis players; a settlement was subsequently reached so that the case did not go to trial<sup>127</sup>. Interim orders were also successfully obtained in relation to a dispute in the mobile telephony sector in *Software Cellular Network Ltd v T-Mobile (UK) Ltd*<sup>128</sup>.

An application for an interim injunction was unsuccessful in *AAH Pharmaceuticals Ltd v Pfizer Ltd*<sup>129</sup> where the claimants were considered to have unduly delayed their application to the court, having earlier sought (and failed to obtain) interim measures from the OFT.

### (H) Is there a passing-on defence?

It has not yet been decided in the UK courts whether a purchaser that purchases goods or services from a cartel at an inflated price, but which then passes that price on to its own

paras 187–208.

<sup>129</sup> [2007] EWHC 565, [2007] UKCLR 1561.

customers, has a right to damages: arguably, since it has suffered no harm, the defendants should be able to rely on a ‘passing-on’ defence<sup>130</sup>.

### (I) Can an indirect purchaser sue?

A related issue is whether an ‘indirect purchaser’ – for example the customer that purchased from the immediate victim of the cartel and to whom the higher price was passed – should be able to sue for damages<sup>131</sup>. The policy issues around these interrelated issues are complex, and a ruling on them is eagerly awaited. In two cases pending before the CAT indirect purchasers are claiming damages against participants in the *Methionine* cartel<sup>132</sup>.

### (J) Causation

A claimant must be able to demonstrate that the anti-competitive behaviour of which it complains caused the loss it suffered<sup>133</sup>. In *Enron Coal Services Ltd v English Welsh & Scottish Railway Ltd*<sup>134</sup> the Court of Appeal agreed with the CAT that there was insufficient evidence that Enron would have won a contract but for the infringement by EW&S<sup>135</sup>. The fact that the Office of Rail Regulation (‘the ORR’) had found that EW&S had put Enron at a competitive disadvantage did not mean that Enron would have been awarded the contract; a competition authority does not necessarily find facts about causation in an infringement decision<sup>136</sup>.

### (K) Quantum

The question of quantum, that is to say the calculation of the amount of damages to be paid, remains to be decided in a competition law case. The claimant should be able to recover the difference between the price it actually paid and the price that would have prevailed in the absence of an infringement<sup>137</sup>: a simple principle to state, but something that can be very hard to establish in practice. The European Commission has published draft guidance on the methods that can be used to quantify damages<sup>138</sup>.

The date at which damages are to be calculated can have an important effect on the outcome of a case. In *Courage Ltd v Crehan*<sup>139</sup> the High Court assessed damages at the time of the trial of the action<sup>140</sup>; however on appeal the Court of Appeal determined damages

<sup>130</sup> On the passing-on defence and the related issue of the right of indirect purchasers to sue see ‘The “passing-on” defence and the position of indirect purchasers’, pp 300–301 above; see also Kennelly ‘Damages Actions before the CAT and the Passing On Defence’ (2004) 3 Competition Law Journal 238; Beard ‘Damages in Competition Law Litigation’ in *Competition Litigation in the UK* (Sweet & Maxwell, 2005, eds Ward and Smith), paras 7–049–7–061.

<sup>132</sup> Case No 1147/5/7/09 *Moy Park Ltd v Evonik Degussa GmbH*, not yet decided and Case No 1153/5/7/10 *Marshall Food Group Ltd v Evonik Degussa GmbH*, not yet decided.

<sup>133</sup> See eg the judgment of the Queen’s Bench Division of the High Court in *Arkin v Bochard Lines Ltd* [2003] EWHC 687, paras 489–570, where the court found that there was no causation between the conduct complained of and the harm suffered by the claimant.

<sup>134</sup> [2009] CAT 36, [2010] CompAR 108.

<sup>135</sup> [2011] EWCA Civ 2.

<sup>136</sup> *Ibid*, para 150.

<sup>137</sup> See *Devenish Nutrition Ltd v Sanofi-Aventis SA* [2007] EWHC 2394, [2008] UKCLR 28, para 19.

<sup>138</sup> See also the Commission’s White Paper on *Damages actions for breach of the EC antitrust rules* COM(2008) 165 final, para 2.5 and the Oxera study, ch 8 n 35 above; DG COMP’s website is a valuable source of material on quantification of harm: [www.ec.europa.eu/competition](http://www.ec.europa.eu/competition).

<sup>139</sup> See [2003] EWHC 1510, [2003] UKCLR 834.

<sup>140</sup> *Ibid*, paras 267–268.

at the time of the loss<sup>141</sup>. According to the High Court's formulation, Crehan would have been entitled to damages of £1,311,500: but that Court determined that, in fact, there had been no infringement of Article 101, and that therefore Crehan was not entitled to damages at all; the House of Lords agreed with the High Court<sup>142</sup>. The Court of Appeal did consider that Article 101 was infringed, but, by taking a different date at which to assess the harm, would have awarded only £131,336.

### (L) Interest

The Court of Justice has said that interest is an essential component of compensation<sup>143</sup>. The High Court<sup>144</sup> and the CAT<sup>145</sup> have power to award pre-judgment interest on any damages payable; this could lead to a substantial increase in the amount that a claimant can recover.

### (M) Exemplary damages?

A further issue in relation to damages actions is whether a claimant is able to recover 'punitive' or 'exemplary', as well as compensatory, damages. English law does provide for exemplary damages<sup>146</sup>. Where a defendant has already been ordered to pay a substantial penalty, for example by the OFT or the European Commission, for infringing competition law the High Court has held that exemplary damages are not available as this would violate the principle of *ne bis in idem*<sup>147</sup>; the Court was of the view that Article 16 of Regulation 1/2003 also precludes an award of exemplary damages<sup>148</sup>. On the other hand the CAT has acknowledged that such an award may be possible where a claimant is harmed by particularly serious anti-competitive behaviour, such as targeted and sustained predatory pricing, and where there has been no fine imposed by a competition authority<sup>149</sup>.

## (N) Sections 58 and 58A of the Competition Act 1998: findings of fact and findings of infringements

### (i) Section 58: findings of fact

Section 58(1) of the Competition Act provides that, unless the court directs otherwise, findings of fact by the OFT<sup>150</sup> in proceedings based on UK or EU competition law are binding on the parties in proceedings before the High Court and before the CAT<sup>151</sup>, pro-

<sup>141</sup> [2004] EWCA 637, [2004] UKCLR 1500, paras 173–180. <sup>142</sup> [2007] 1 AC 333.

<sup>143</sup> See eg Case C-271/91 *Marshall v Southampton and South-West Hampshire Area Health Authority* [1993] ECR I-4367, para 31.

<sup>144</sup> Senior Courts Act 1981, s 35A.

<sup>145</sup> Competition Appeal Tribunal Rules 2003, SI 2003/1372, r 56(2).

<sup>146</sup> *Rookes v Barnard* [1964] AC 1129; *Kuddus v Chief Constable of Leicestershire* [2002] 2 AC 122; see also Clerk & Lindsell *Torts* (Sweet & Maxwell, 20th ed, 2010), paras 28.137–28.151.

<sup>147</sup> *Devenish Nutrition Ltd v Sanofi-Aventis SA* [2007] EWHC 2394, [2008] UKCLR 28, para 52.

<sup>148</sup> *Ibid*, para 55.

<sup>149</sup> Case No 1166/5/7/10 *Albion Water Ltd v Dŵr Cymru Cyfyngedig* [2010] CAT 30, paras 27–38.

<sup>150</sup> Or a sectoral regulator with concurrent powers to enforce Articles 101 and 102 and the Chapter I and Chapter II prohibitions: see s 371 of the Communications Act 2003 in relation to the Office of Communications (Ofcom) and s 54 of and Sch 10 to the Competition Act 1998 in relation to the other regulators.

<sup>151</sup> On the application of s 58 to section 47A proceedings before the CAT see *Enron Coal Services Ltd (in liquidation) v English Welsh & Scottish Railway Ltd* [2011] EWCA Civ 2, [2011] UKCLR 303, paras 33–56.

vided that the time for appeal against the finding has expired, or that the OFT's findings are confirmed on appeal. This means that parties that initiate such proceedings will not have to go through the process of producing all the evidence once again, but can proceed on the 'coat-tail' of the OFT's findings. The wording of the OFT's decision is obviously very important for the purposes of section 58. There is a significant distinction between a statement that 'A and B agreed to fix prices' and one that says 'it appears to the OFT that A and B may have fixed prices': only the former involves a finding of fact. The Court of Appeal has emphasised that section 58(1) applies only to a clearly identifiable finding of fact, and not to passages in a decision from which a finding of fact might arguably be inferred<sup>152</sup>.

Section 58(3) of the Act enables rules of court to be made for the OFT to provide assistance to the court in private actions; no such rules have been made.

### (ii) Section 58A: findings of infringement

Section 58A of the Competition Act provides that findings by the OFT<sup>153</sup> or the CAT of infringements of UK or EU competition law are binding on courts in which damages or other sums of money are claimed once any appeal periods have elapsed. Section 58A goes beyond section 58 of the Act, which simply relates to findings of fact; section 58A means that the substantive assessment of the OFT and the CAT binds the court hearing the claim<sup>154</sup>.

### (O) Article 16(1) of Regulation 1/2003

Section 58A of the Competition Act does not say anything about the effect of findings of infringement by the European Commission. However this matter is dealt with by Article 16(1) of Regulation 1/2003, which states that a national court cannot reach a conclusion different from that of the Commission<sup>155</sup>. The *Crehan* litigation shed interesting light on the operation of this provision. In that case the Commission had reached the conclusion, in relation to beer supply agreements entered into by, for example, Whitbread<sup>156</sup>, Bass<sup>157</sup> and Scottish & Newcastle<sup>158</sup>, that access to the retail level of the beer market in the UK market was foreclosed. However *Crehan's* agreement was not with any of those brewers, but with Courage, and the Commission had not made any findings in relation to Courage's agreements. An issue in the litigation, therefore, was whether the court was 'bound' by the Commission's findings in the *Whitbread* case. The answer given by Park J<sup>159</sup> and the House of Lords on appeal<sup>160</sup> (disagreeing with the Court of Appeal<sup>161</sup>) was that, since those decisions did not deal with the same facts and the same parties, they were not binding on the court, although they were admissible as evidence<sup>162</sup>. Park J conducted his

own assessment of the market and reached the conclusion that there was no foreclosure of the UK beer market, and that therefore the agreements in question did not infringe Article 101(1); the House of Lords upheld this finding.

### (P) Group litigation orders and representative actions

Actions for damages may be facilitated by a ‘group litigation order’<sup>163</sup> or ‘representative actions’<sup>164</sup> under the English civil procedure rules. Group litigation orders provide for the case management of claims that give rise to common or related issues of fact or law<sup>165</sup>. Representative actions may provide a convenient means by which to avoid a large number of substantially similar actions; in *Emerald Supplies Ltd v British Airways plc*<sup>166</sup> the Court of Appeal, upholding the decision of the Chancellor of the High Court<sup>167</sup>, concluded that the procedure could not be used in that case where the claimants wished to represent both direct and indirect purchasers from undertakings in the *Air Cargo* cartel<sup>168</sup>. The Court held that these two groups did not have the same interest as required by the relevant rule: an indirect purchaser would presumably agree with the defendant(s) that there is a passing-on defence, so that it (the indirect purchaser) can recover rather than the direct purchaser.

### (Q) Costs and funding arrangements

The costs of litigation can be substantial. The general rule in proceedings before the High Court is that costs follow the event<sup>169</sup>. The CAT has a discretion in relation to costs<sup>170</sup>, but its starting point in private actions has been to award costs against the unsuccessful party<sup>171</sup>. The level of costs and the likelihood that the ‘loser pays’ may inhibit private enforcement to an extent, although it may also guard against unmeritorious cases. In November 2010 the Ministry of Justice began a consultation exercise on reform of civil litigation funding and costs<sup>172</sup>. The fact that lawyers are entitled to work on a conditional fee basis may be of assistance to would-be claimants<sup>173</sup>.

## (R) Limitation rules

The limitation period for bringing actions in the High Court is generally six years from the date on which the loss was suffered<sup>174</sup>. The limitation period is postponed if material facts are deliberately concealed by the defendant<sup>175</sup>, as in the case of secret cartels; time starts to run from when the claimant knew or ought to have known of those facts, which will often be when a competition authority publishes an infringement decision. A different time limit applies to follow-on actions before the CAT: proceedings must be commenced within two years of the ‘relevant date’<sup>176</sup>, which will usually be the date of the decision plus any appeal period<sup>177</sup>. In *BCL Old Co Ltd v BASF SE*<sup>178</sup> the Court of Appeal, reversing the judgment of the CAT<sup>179</sup>, held that, where defendants appeal against the level of fines imposed by the Commission in an Article 101 case, but not against its substantive finding of an infringement, the relevant date is that of the Commission decision and not the later date of any judgment on the fines of the EU Courts. The CAT rejected a subsequent application by the claimants to be allowed to file a damages claim out of time<sup>180</sup>. On appeal the Court of Appeal held that the CAT has no power to extend time for a claim under section 47A<sup>181</sup>; likewise the High Court has no power to extend time.

## (S) Mediation

It is understood that in some cases the High Court and the CAT encourage the parties to consider the possibility of mediation of their dispute, and that this process has led to several settlements out of court<sup>182</sup>.

## (T) Duty of disclosure

The High Court suggested in *Ineos Vinyls Ltd v Hunstman Petrochemicals (UK) Ltd* that a claimant before the court has a duty to inform it of any contact that it may have had with the OFT (or presumably the European Commission)<sup>183</sup>.

## (U) Standalone actions in the High Court

### (i) Successful claims

Successful claims under UK and EU competition law have been fairly rare in the UK<sup>184</sup>, although it is well known that many cases have been settled out of court in which the

<sup>174</sup> Limitation Act 1980, s 2; see generally McGee *Limitation Periods* (Sweet & Maxwell, 6th ed, 2010) and *Competition Litigation: UK Practice and Procedure* (Oxford University Press, 2010, eds Brealey and Green), ch 4.

<sup>175</sup> Limitation Act 1980, s 32(1)(b).

<sup>176</sup> Competition Appeal Tribunal Rules 2003, SI 2003/1372, r 31.

<sup>177</sup> For an interpretation of r 31 of the CAT’s Rules see Case No 1077/4/7/07 *Emerson Electric Co v Morgan Crucible Company plc* [2007] CAT 28, [2008] CompAR 9; the CAT gave Emerson permission to make a claim for damages against Morgan Crucible on 16 November 2007: [2007] CAT 30, [2008] CompAR 37. However the CAT subsequently adopted a different interpretation of r 31 in Case No 1173/5/7/10 *Deutsche Bahn AG v Morgan Crucible Company plc* [2011] CAT 16; this conflict of authority led the CAT to grant permission to the Court of Appeal, [2011] CAT 22.

<sup>178</sup> *BCL Old Co Ltd v BASF SE* [2009] EWCA Civ 434, [2009] UKCLR 789.

<sup>179</sup> [2008] CAT 24, [2008] CompAR 210.

<sup>180</sup> Case 1098/5/7/08 *BCL Old Co Ltd v BASF SE* [2009] CAT 29, [2010] CompAR 1.

<sup>181</sup> *BCL Old Co Ltd v BASF SE* [2010] EWCA Civ 1258; BCL has appealed to the Supreme Court, not yet decided.

<sup>182</sup> See eg in the CAT Case No 1088/3/7/07 *ME Burgess v W Austin & Sons Ltd*, transcript of case management conference of 20 November 2007.

<sup>183</sup> [2006] EWCA 1241, paras 262–265.

<sup>184</sup> Successful applications for interim relief were discussed in ‘Interim relief’, p 310 above.

claimant has received substantial damages<sup>185</sup>. There are no final judgments in which damages have been awarded. A partially successful action was *Hendry v World Professional Billiards and Snooker Association*<sup>186</sup> in which Lloyd J held that, for the most part, the rules of the association did not infringe competition law; however one rule, which restricted the tournaments in which players could participate in certain circumstances, was found to infringe both the Chapter I and Chapter II prohibitions<sup>187</sup>, as well, probably, as Articles 101 and 102 TFEU<sup>188</sup>. An important case was *Attheraces v British Horse Racing Board*<sup>189</sup> in which the High Court concluded that the British Horseracing Board had abused its dominant position under Article 102 by charging excessive and/or discriminatory prices for the supply of information to Attheraces about horseracing events conducted under its auspices; however this judgment was reversed on appeal<sup>190</sup>. In the case of *Purple Parking Ltd v Heathrow Airport Ltd*<sup>191</sup> Mann J found Heathrow Airport guilty of discrimination under Article 102(2)(c) in relation to the provision of valet parking services.

## (ii) Unsuccessful claims

In *Claritas (UK) Ltd v Post Office* an application by Claritas Ltd for an interim injunction against the Post Office under the Chapter II prohibition was rejected<sup>192</sup>; subsequently the OFT also rejected the Claritas complaint, albeit on different grounds from those of the High Court<sup>193</sup>. An action for a declaration, injunction and damages under the Chapter II prohibition failed in *Chester City Council v Arriva plc*<sup>194</sup> where the court held that the claimant had failed to adduce any evidence demonstrating that Arriva held a dominant position. In *Bookmakers Afternoon Greyhound Services Ltd v Amalgamated Racing Ltd*<sup>195</sup> the High Court dismissed a claim that arrangements between a number of British racecourses for distributing their rights to broadcast horseracing infringed Article 101 and the Chapter I prohibition; the judgment was affirmed by the Court of Appeal<sup>196</sup>. Several other attempts to invoke the Competition Act in litigation have failed<sup>197</sup>.

<sup>185</sup> For example some damages claims have been settled between pharmaceutical producers and the Department of Health: see eg Department of Health Press Notice of 1 April 2005, announcing the payment by Ranbaxy (UK) Ltd of £4.5 million, and the Press Releases of 4 April 2006, 22 June 2007 and 26 February 2010; see similarly Scottish Government Press Release of 4 March 2008, announcing that the Goldshield Group had agreed to pay damages of £750,000. In a different case it was announced in February 2008 that British Airways and Virgin Atlantic had made £73.5 million available to settle cases in the UK arising out of the air fuel surcharge cartel: see [www.airpassengerrefund.co.uk](http://www.airpassengerrefund.co.uk). ## (V) Follow-on actions in the CAT and the High Court

The Enterprise Act 2002 amended the Competition Act 1998 in order to facilitate ‘follow-on’ damages actions that can be brought in the CAT and the High Court. Each of these possibilities will now be considered.

### (i) Section 47A: monetary claims before the CAT

Section 47A of the Competition Act provides for follow-on actions for damages or any other sum of money to be brought before the CAT where there has been a finding of an infringement of UK or EU competition law by the OFT<sup>198</sup>, the CAT or the European Commission; proceedings can be brought only with permission before any relevant appeal periods have elapsed<sup>199</sup>. The two-year limitation period for section 47A proceedings was discussed above<sup>200</sup>. The Act does not provide for a follow-on action where an NCA of another Member State has found an infringement of Articles 101 and/or 102. The right to bring a follow-on action before the CAT is without prejudice to the right to bring proceedings before the High Court<sup>201</sup>. Part IV of the *Competition Appeal Tribunal Rules 2003*<sup>202</sup> contains provisions on claims for damages under section 47A; in the CAT’s view these rules are a coherent and self-standing set of procedural rules and are more general and flexible than the Civil Procedure Rules<sup>203</sup>. Provision is made for the transfer of claims for damages from the CAT to the High Court or County Court<sup>204</sup> and of follow-on actions from the High Court to the CAT<sup>205</sup>. Section 49 of the Act provides for an appeal on a point of law, with permission, to the Court of Appeal from a decision of the CAT on damages<sup>206</sup>.

Four follow-on actions in the CAT arose from the European Commission’s decision in the *Vitamins* case<sup>207</sup>, of which two settled<sup>208</sup> and two were brought out of time<sup>209</sup>. In *BCL Old Co Ltd v Aventis SA*<sup>210</sup> the CAT declined the defendants’ request that the claimants should be required to give security for costs; the CAT was concerned not to place undue obstacles in the way of the claimants. Two claims followed the European Commission’s decision in *Electrical and Mechanical Carbon and Graphite Products*<sup>211</sup>;

[2002] UKCLR 410; *Intel Corp v VIA Technologies* [2002] EWHC 1159, reversed on appeal [2002] EWCA Civ 1905; *Suretrack Rail Services Ltd v Infraco JNP Ltd* [2002] EWHC 1316, [2002] All ER (D) 261 (Jun); *Sel-Imperial Ltd v British Standards Institution* [2010] EWHC 854, [2010] UKCLR 493 (striking out two parts of a claim alleging an infringement of Article 101); *Humber Oil Terminals Trustee Ltd v Associated British Ports* [2011] EWHC 352.

<sup>198</sup> Or a sectoral regulator: see ch 8 n 150 above.

<sup>200</sup> See ‘Limitation rules’, p 315 above.

<sup>201</sup> Competition Act 1998, s 47A(10).

<sup>202</sup> SI 2003/1372.

<sup>203</sup> Case No 1028/5/7/04 *BCL Old Co Ltd v Aventis SA* [2005] CAT 1, [2005] CompAR 470, para 41.

<sup>204</sup> SI 2003/1372, r 48. <sup>205</sup> *Ibid*, r 49.

<sup>206</sup> On the scope of s 49 of the Competition Act see *English Welsh & Scottish Railway Ltd v Enron Coal Services Ltd* [2009] EWCA Civ 647, [2009] UKCLR 816, paras 22–24.

<sup>207</sup> OJ [2003] L 6/1, [2003] 4 CMLR 1030.

<sup>208</sup> Case Nos 1028 and 1029/5/7/04, Consent Orders of the CAT of 7 April 2005 and 24 November 2005; the CAT gave two judgments in these proceedings, one dealing with limitation [2005] CAT 1, [2005] CompAR 470 and one dealing with security for costs [2005] CAT 2, [2005] CompAR 485.

<sup>209</sup> Case Nos 1098 and 1101/5/7/08 *BCL Old Co Ltd v BASF SE* [2008] CAT 24, on appeal [2009] EWCA Civ 434; an application for an extension of time was rejected in Case No 1098/5/7/08 *BCL Old Co Ltd v BASF SE* [2009] CAT 29, [2010] CompAR 1, upheld on appeal *BCL Old Co Ltd v BASF SE* [2010] EWCA Civ 1258; BCL has appealed to the Supreme Court, not yet decided.

<sup>210</sup> Case No 1028/5/7/04 [2005] CAT 2, [2005] CompAR 485.

<sup>211</sup> Case No 1077/5/7/07 *Emerson Electric Co v Morgan Crucible Co plc*, not yet decided and Case No 1173/5/7/10 *Deutsche Bahn AG v Morgan Crucible Co plc* [2011] CAT 16, [2011] CAT 22.

they have given rise to various procedural and jurisdictional issues<sup>212</sup>. Two actions relied on the European Commission's decision in *Methionine*<sup>213</sup>. Nine follow-on actions have arisen from decisions finding infringements of the Chapter II prohibition. An award of interim damages was made in one of these cases, *Healthcare at Home v Genzyme Ltd*<sup>214</sup>, the first (and only) time that this has happened in a competition law case in the UK. The actions for damages in *ME Burgess v W Austin & Sons Ltd*<sup>215</sup> and *Albion Water v Dŵr Cymru* arose out of the CAT's own decisions in *Burgess v OFT*<sup>216</sup> and *Albion Water v Water Services Regulation Authority*<sup>217</sup> respectively; the *Burgess* case was settled. Two claims arose from the ORR's decision that EW&S had abused its dominant position: one was withdrawn<sup>218</sup>, and the other was partly struck out<sup>219</sup> and partly dismissed at trial<sup>220</sup>. Four damages claims have been made in reliance on the OFT's infringement decision in *Cardiff Bus*: one by the liquidator of the alleged victim of the predatory conduct and three by its former directors<sup>221</sup>.

### (ii) Section 47B: claims brought on behalf of consumers

Section 47B of the Competition Act 1998 provides for a specified consumer body to bring a 'representative' or 'collective' follow-on action before the CAT on behalf of two or more consumers<sup>222</sup>; it is for the Secretary of State to specify consumer bodies for this purpose<sup>223</sup>. The Rules of the CAT contain provisions on claims under this section<sup>224</sup>. The *Specified Body (Consumer Claims) Order 2005*<sup>225</sup> names the Consumers' Association (now known as Which?) for the purpose of section 47B. An advantage of representative claims is that, in some cases, the economic loss suffered by individual consumers may be so small as to make litigation uneconomic. However if enough individual claims can be aggregated litigation may become viable; the representative claimant then apportioning any damages recovered between the consumers that consented to the action<sup>226</sup>. An important limitation of section 47B is that it provides for the recovery of damages only on behalf of consumers that give their consent: this is often referred to as the 'opt-in' model. This differs from a possible alternative, the so-called 'opt-out' model, where the action is brought on behalf of a defined category of consumers; in this system consumers can opt out of

<sup>212</sup> For an overview of the *Emerson* litigation see Case No 1077/5/7/07 *Emerson Electric Co v Mersen UK Portslade Ltd* [2011] CAT 4, para 5.

<sup>213</sup> Case No 1147/5/7/09 *Moy Park Ltd v Evonik Degussa GmbH*, not yet decided and Case No 1153/5/7/10 *Marshall Food Group Ltd v Evonik Degussa GmbH*, not yet decided.

<sup>214</sup> Case No 1060/5/7/06 [2006] CAT 29, [2007] CompAR 474; note that the CAT held that the claimant could claim damages not only for the period that the OFT and the CAT itself had held that the Chapter II prohibition had been infringed, but also for the subsequent period in which the infringement continued: *ibid*, para 59.

<sup>215</sup> Case No 1087/2/3/07, order of the CAT of 25 February 2008.

<sup>218</sup> Case No 1105/5/7/08 *Freightliner Limited v English Welsh & Scottish Railway Ltd*, order of the CAT of 28 January 2009.

<sup>219</sup> Case No 1106/5/7/08 *Enron Coal Services Ltd (in liquidation) v English Welsh & Scottish Railway* [2009] CAT 7, upheld on appeal [2009] EWCA Civ 647, [2009] UKCLR 816.

<sup>220</sup> Case No 1106/5/7/08 *Enron Coal Services Ltd (in liquidation) v English Welsh & Scottish Railway* [2009] CAT 36, [2010] CompAR 108, partly upheld on appeal [2011] EWCA Civ 2.

<sup>221</sup> Case Nos 1175 to 1178/5/7/10 *DH Francis v Cardiff City Transport Services Ltd*, not yet decided.

<sup>222</sup> There are no provisions for representative actions to be brought on behalf of businesses as opposed to consumers.

<sup>223</sup> Competition Act 1998, s 47B(9).

<sup>224</sup> SI 2003/1372, r 33.

<sup>225</sup> SI 2005/2365.

<sup>226</sup> See s 47B(3) of the Competition Act 1998.

the litigation and, should they so wish, bring their own claims<sup>227</sup>. Just one representative action has been brought under section 47B, *The Consumers' Association v JJB Sports*<sup>228</sup>; this case arose out of the OFT's *Football Shirts* decision<sup>229</sup>. It was settled by agreement early in 2008 and the action was withdrawn<sup>230</sup>.

### (iii) Follow-on actions in the High Court

A number of follow-on actions for damages have been commenced in the High Court rather than in the CAT<sup>231</sup>. Many have relied on infringement decisions of the European Commission pursuant to Article 16 of Regulation 1/2003<sup>232</sup>, but some have arisen from decisions of the OFT under section 58A of the Competition Act<sup>233</sup>. Given that the CAT is a specialist competition body, and that it has jurisdiction to deal with follow-on actions, it is interesting that some claimants nevertheless prefer to litigate in the High Court. There are various explanations for this. First, proceedings can be commenced automatically in the High Court, even when there are pending appeals against the infringement decision relied on; however claimants in the CAT must seek permission before an action can be commenced, and there is a danger that, while such permission is being sought, a litigant might bring an action in another Member State, in which case Article 27 of the Brussels Regulation would deprive the CAT of jurisdiction<sup>234</sup>.

A second reason for selecting the High Court rather than the CAT, as already noted, is that different limitation periods apply, and in some cases the rules that apply in the High Court may be preferable to the CAT's<sup>235</sup>. The Court of Appeal has said that the interrelationship between the jurisdiction of the High Court and that of the CAT in this area 'may merit reassessment in the light of experience to date'<sup>236</sup>.

## 4. Competition Law as a Defence

### (A) Article 101(2)

#### (i) The sanction of voidness

Many systems of competition law deploy an important sanction, in addition to the imposition of fines and damages actions, in order to persuade undertakings to obey the law: the sanction of voidness. Article 101(2) TFEU and section 2(4) of the Competition Act 1998

<sup>227</sup> See generally Wells 'Collective Actions in the UK' (2008) 7(1) *Competition Law Journal* 57; Mulheron 'The Case for an Opt-out Class Action for European Member States: a Legal and Empirical Analysis' (2009) 15(3) *Columbia Journal of European Law* 409.

<sup>228</sup> Case No 1078/7/9/07. <sup>229</sup> OFT decision of 1 August 2003 [2004] UKCLR 6.

<sup>230</sup> Case No 1078/7/9/07, order of the CAT of 14 January 2008.

<sup>236</sup> *Enron Coal Services Ltd (In Liquidation) v English Welsh & Scottish Railway Ltd* [2011] EWCA Civ 2, para 143.

provide that an agreement that restricts competition in the sense of Article 101(1) and that does not satisfy the terms of Article 101(3) is void. In some cases the sanction of voidness may not be a very real one: the members of a price-fixing or a market-sharing cartel would not normally think of trying to enforce their agreement in a court. Their main concern will be to conceal the cartel from the competition authorities, although the latter have considerable powers to unearth this type of practice<sup>237</sup> and to penalise the recalcitrant firms<sup>238</sup>. In other cases, however, the sanction of voidness may be much more significant. If a patentee grants a licence of a patent it will calculate carefully what rate of royalties the licensee should pay and protracted negotiations may take place to settle the other terms of the bargain, for example on the quantities to be produced, the areas in which the products are to be sold and the treatment and ownership of any improvements made by the licensee. For its part the licensee will often have been granted an exclusive territory in which to manufacture and sell. If it transpires that certain aspects of the licence are void and unenforceable this will undermine the deal struck between the parties. The same would be true of an exclusive purchasing term imposed by a supplier on a distributor, as typically occurs in agreements for the sale and purchase of beer and petrol; and of non-competition covenants imposed, for example, when a vendor sells a business as a going concern to a purchaser. In these cases the threat that competition law poses is not that the Commission or some other competition authority will impose a fine, but that a key term of a contract will be unenforceable in commercial litigation. It will be noted from this that the sanction of voidness, as a general proposition, impacts not on serious infringements of the competition rules, such as the operation of cartels, but on more innocuous agreements where the harm to competition is much less obvious; this is a powerful reason for urging competition authorities to adopt a 'realistic' approach to the application of Article 101(1) and its progeny in the Member States to agreements<sup>239</sup>.

## (ii) *Eco Swiss China Time Ltd v Benetton*

Judges tend to be hostile by instinct to what may be seen as technical – even scurrilous – attempts to avoid contractual obligations by invoking points of competition law. However the Court of Justice's judgment in *Eco Swiss China Time Ltd v Benetton*<sup>240</sup> has confirmed how significant the sanction of voidness is in the legal system of the EU: where an agreement infringes Article 101(1), voidness is an important consequence. At the risk of oversimplification, the Court of Justice was asked by the Dutch Supreme Court to determine whether the EU competition rules could be considered to be rules of public policy: on this question turned the possibility of an appeal being brought against an arbitral award. The Court of Justice was quite clear<sup>241</sup>:

Article [101 TFEU] constitutes a fundamental provision which is essential for the accomplishment of the tasks entrusted to the [EU] and, in particular, for the functioning of the internal market. The importance of such a provision led the framers of the Treaty to provide expressly, in Article [101(2) TFEU], that any agreements or decisions prohibited pursuant to that Article are to be automatically void.

<sup>237</sup> For the Commission's powers of investigation see ch 7, 'Chapter V: powers of investigation', pp 267–275.

<sup>238</sup> See ch 7, 'Chapter VI: penalties', pp 275–282.

<sup>239</sup> See ch 3, 'The "object of effect" of preventing, restricting or distorting competition', pp 115–140, in particular on what is meant by an agreement having as its 'effect' the restriction of competition.

<sup>240</sup> Case C-126/97 [1999] ECR I-3055, [2000] 5 CMLR 816; see also Case C-453/99 *Courage Ltd v Crehan* [2001] ECR I-6297, [2001] 5 CMLR 1058, paras 20–22.

<sup>241</sup> Case C-126/97 [1999] ECR I-3055, [2000] 5 CMLR 816, paras 36–37; this case is discussed further at 'Arbitration', pp 325–326 below.

It follows that where its domestic rules of procedure require a national court to grant an application for annulment of an arbitration award where such an application is founded on failure to observe national rules of public policy, it must also grant such an application where it is founded on failure to comply with the prohibition laid down in Article [101(1) TFEU].

### (B) The ‘problem’ of Article 101(3) and the Commission’s role in relation to individual exemptions

Previous editions of this book, at this point, dealt at length with the fact that only the Commission could apply Article 101(3) to individual agreements, and that this threw up numerous problems as to the enforceability of agreements between the parties; these problems concerned the rules on notification, the retrospectivity of individual exemptions, the concept of provisional validity and parallel Commission and national court proceedings. However the entry into force of Regulation 1/2003 on 1 May 2004 abolished the process of notifying agreements to the Commission for an individual exemption<sup>242</sup>, and the Regulation itself contains several provisions on the role of national courts in the new regime<sup>243</sup>. For this reason the text on the ‘problem’ of applying Article 101(3) has been dropped from more recent editions of this book. Of course, the enforceability of an unnotified restrictive agreement prior to 1 May 2004 could still arise in domestic litigation, and readers should consult practitioners’ textbooks should this problem arise in practice<sup>244</sup>.

### (C) The classic ‘Euro-defence’

As suggested above there seems little doubt that the judicial mind is unsympathetic to an Article 101(2) defence where one party to an agreement freely entered into, attempts to walk away from it on the ground that it is void under competition law. The maxim ‘*pacta sunt servanda*’ – contracts should be honoured – has a powerful influence where an undertaking purports, on the basis of a ‘technicality’ of competition law, to avoid a contractual obligation. There are many cases in which Euro-defences have failed, including the *George Michael* case where the singer was attempting to extricate himself from a recording contract that he had entered into with Sony<sup>245</sup>; *Society of Lloyd’s v Clementson*<sup>246</sup> and *Higgins v Marchant & Eliot Underwriting Ltd*<sup>247</sup> which concerned the plight of individuals – known as ‘names’ – called upon by Lloyds of London to contribute substantial sums of money as a result of insurance losses; *Oakdale (Richmond) Ltd v National Westminster Bank plc*<sup>248</sup> concerning the restrictive terms of an all-moneys debenture arrangement; and *Leeds City Council v Watkins*<sup>249</sup> where the judge was highly critical of both parties’ economics experts<sup>250</sup>.

<sup>242</sup> See in particular ch 4, ‘Regulation 1/2003’, pp 166–167.

<sup>243</sup> See ‘Private enforcement and Regulation 1/2003’, pp 302–305 above.

<sup>244</sup> See eg Bellamy and Child *European Community Law of Competition* (Oxford University Press, 6th ed, 2008, eds Roth and Rose), paras 13–004–13–007.

<sup>245</sup> *Panayiotou v Sony Music Entertainment (UK) Ltd* [1994] ECC 395, [1994] EMLR 229.

<sup>246</sup> [1995] 1 CMLR 693, [1995] ECC 390. <sup>247</sup> [1996] 1 Lloyd’s Rep 313, [1996] 3 CMLR 314.

<sup>248</sup> [1997] ECC 130, [1997] Eu LR 27, upheld on appeal [1997] 3 CMLR 815.

<sup>249</sup> [2003] EWHC 598, [2003] UKCLR 467.

<sup>250</sup> *Ibid*, paras 88–117; Euro-defences also failed in *LauritzenCool AB v Lady Navigation Inc* [2004] EWHC 2607; in *Days Medical Aids v Pihsiang* [2004] Eu LR 477, [2004] ECC 297; in *The Qualifying Insurers Subscribing to the ARP v Ross* [2006] ECC 33; in *Pirtek (UK) Ltd v Joinplace Ltd* [2010] EWHC 1641, [2010] UKCLR 1297; and in *A Nelson & Co Ltd v Guna SpA* [2011] EWHC 1202 (Comm).

However, the fact that many Euro-defences have failed does not mean that the invocation of Article 101(2) is always doomed to failure. Two cases demonstrate how powerful the provision can be. In *Calor Gas Ltd v Express Fuels (Scotland) Ltd*<sup>251</sup> the Scottish Court of Session held that an exclusive dealing agreement was unenforceable by the supplier, Calor Gas, as it infringed Article 101(1); and in *Jones v Ricoh UK Ltd*<sup>252</sup> the High Court held that a clause in a confidentiality agreement infringed Article 101(1) because it went much further than could reasonably be required to protect the information of the claimant.

#### (D) Severance

The preceding section reveals that judges may view with distaste technical invocations of the competition rules in order to avoid contractual obligations. However there will be occasions when voidness does follow from an infringement of Article 101(1): the facts of *Eco Swiss China Time v Benetton*<sup>253</sup> reveal how this might happen.

Where Article 101(1) is successfully invoked in litigation a problem can arise over the effect of the voidness upon the remainder of the agreement. The Court of Justice has held that, provided that it is possible to sever the offending provisions of the contract from the rest of its terms, the latter remain valid and enforceable<sup>254</sup>. However the Court did not lay down an EU-wide principle of severance, so that the mechanism whereby this is to be effected is a matter to be decided according to the domestic law of each Member State<sup>255</sup>. This in turn gives rise to issues under the Brussels Regulation<sup>256</sup> and Rome II<sup>257</sup>; the former determines where litigation may take place in civil and commercial cases, while the latter determines the law that should be applied in contractual disputes. Assuming that severability is regarded as a matter of substance rather than procedure the Brussels Regulation ought not to affect the outcome of litigation, since in principle Rome II should lead to the same finding of the applicable law, wherever the litigation takes place; however the determination of the applicable law may be crucial to the outcome of the litigation, since different Member States have different methods of severing unlawful restrictions from contracts.

As a matter of English contract law severance is possible in certain circumstances, although the rules on this subject are complex<sup>258</sup>. The Court of Appeal was called upon to examine severability in a competition law context in *Chemidus Wavin Ltd v Société pour la Transformation*<sup>259</sup>. A patentee was suing for royalties payable under an agreement that arguably infringed Article 101(1). The court held that the minimum royalties

<sup>258</sup> See *Chitty on Contracts* (Sweet & Maxwell, 30th ed, 2008), ch 16, paras 16.194–16.203; for discussion of the obligations of a national court to comply with EU law when determining whether to sever clauses in an agreement that infringes Article 101(1) see also *Re The Nullity of a Beer Agreement* [2002] ECC 26 (Austrian Supreme Court).

<sup>259</sup> [1977] FSR 181, [1978] 3 CMLR 514, CA.

provision was enforceable, irrespective of whether other parts of the agreement might infringe Article 101(1). Buckley LJ said:

It seems to me that, in applying Article [101] to an English contract, one may well have to consider whether, after the excisions required by the Article of the Treaty have been made from the contract, the contract could be said to fail for lack of consideration or on any other ground, or whether the contract would be so changed in its character as not to be the sort of contract that the parties intended to enter into at all.

The test in *Chemidus Wavin* has been applied in several subsequent cases<sup>260</sup>. If the effect of severing certain clauses from an agreement would be that its scope and intention would be entirely altered, bringing about a fundamental change in the bargain between the parties, the entire agreement would become unenforceable<sup>261</sup>. This was the conclusion in *English Welsh & Scottish Railway Ltd v E.ON UK plc*<sup>262</sup> where Field J held that the directions of the ORR, that various terms of a coal carriage agreement between the parties were unlawful under the Chapter II prohibition and Article 102 and should be removed or modified, altered the contract so fundamentally that it became void and unenforceable in its entirety.

### (E) Void or illegal?

Agreements which infringe Article 101(1) are stated by Article 101(2) to be void; however an important question is whether they are ‘merely’ void or whether they are also illegal. On this classification turn the important issues of whether any money paid under the contract by one party to the other would be irrecoverable, applying the principle *in pari delicto potior est conditio defendentis* (which roughly translates as ‘where both parties are to blame the defendant’s position is more powerful’)<sup>263</sup>, and whether one party to the agreement could bring an action against the other for damages for harm suffered as a result of the operation of the agreement. This issue was discussed above in relation to the judgment in *Courage Ltd v Crehan*<sup>264</sup>.

### (F) Transient voidness

One issue to have come before the Court of Appeal is whether the statutory prohibition in Article 101(2) may be ‘turned on and off’ depending on the surrounding facts<sup>265</sup>. In *Passmore v Morland plc*<sup>266</sup> the Court of Appeal upheld the Chancery Division’s judgment that an agreement could move from voidness to validity (and back again) according to the effect that it might be having on the market at any particular point in time.

<sup>266</sup> [1998] 4 All ER 468, [1998] Eu LR 580; affd [1999] Eu LR 501, [1999] 1 CMLR 1129.

### (G) Article 102

It may be that a contractual term infringes Article 102, because it amounts to an abuse of a dominant position, as well as infringing Article 101. For example an agreement to purchase one's entire requirements of a particular product from a dominant firm is quite likely to infringe both Article 101 and Article 102<sup>267</sup>, because it might foreclose access to the market on the part of competitors; it is irrelevant for this purpose whether the undertaking that accepts the obligation is willing or unwilling to accept it<sup>268</sup>. Similarly a system of loyalty rebates, which falls short of a contractual requirement not to buy from competitors but which may have the same effect, may amount to an abuse<sup>269</sup>. In this situation it has been assumed that the prohibition of Article 102 means that the offending provisions are void, although there is nothing on the face of Article 102, as there is in the case of Article 101(2), to say so. It would follow that a customer tied by an exclusive purchasing commitment which infringes Article 102 could safely ignore it and purchase supplies elsewhere. The impact of any such invalidity on the remainder of the agreement would raise the same question of severability discussed above<sup>270</sup>. In *English Welsh & Scottish Railway Ltd v E.ON UK plc*<sup>271</sup> the High Court concluded that abusive terms in coal carriage agreements rendered them void and unenforceable<sup>272</sup>.

### (H) Third party as defendant

The discussion so far has concerned contractual actions where a defendant raises UK or EU competition law as a defence. However on some occasions the competition rules (usually Article 102) are raised as a defence by a third party. In several cases the owner of an intellectual property right such as a patent, registered design or copyright has brought an action against a defendant for infringement; the defendant has then claimed that it has a defence under Article 102 on the basis that the claimant is guilty of abusing its dominant position. In particular, the defendant may claim that, by refusing to grant a licence of the intellectual property right in question, it (the claimant) is guilty of an abuse under Article 102. Whether or not a refusal to license can be abusive is itself a controversial question; it is considered in chapter 19<sup>273</sup>. However even if the claimant is abusing its dominant position, this will not in itself confer on the defendant a valid defence. The courts have established that there must be a sufficient nexus between the claimant's abusive behaviour and the defendant to entitle it to rely on Article 102. In *Chiron Corp v Organon Teknika Ltd*<sup>274</sup> Aldous J said that:

The fact that a person is abusing a dominant position does not mean that all wrongdoers have a defence in respect of all actions brought by that person. It is only in those cases where the exercise or existence of that right creates or buttresses the abuse will the court refuse to give effect to the exercise of the right<sup>275</sup>.

<sup>267</sup> See eg Case 85/76 *Hoffmann-La Roche v Commission* [1979] ECR 461, [1979] 3 CMLR 211.

<sup>268</sup> On agreements of this kind see ch 17, 'Tying', pp 688–696.

<sup>269</sup> On practices of this kind see ch 18, 'Rebates that have effects similar to exclusive dealing agreements', pp 728–736.

<sup>270</sup> See 'Severance', pp 322–323 above.

<sup>271</sup> [2007] EWHC 599, [2007] UKCLR 1653.

<sup>272</sup> See 'Void or illegal?', p 323 above.

<sup>273</sup> See ch 19, 'Article 102 and Intellectual Property Rights', pp 796–806.

<sup>274</sup> [1993] FSR 324, [1992] 3 CMLR 813, upheld on appeal [1993] FSR 567.

<sup>275</sup> [1993] FSR 324, [1992] 3 CMLR 813, para 44.

In several cases the necessary nexus has been lacking<sup>276</sup> and the defence therefore struck out. Where there is a sufficient nexus between the parties, for example where the dominant undertaking is abusing its market power specifically in order to harm the defendant, a defence based on Articles 101 and/or 102 may be pleaded<sup>277</sup>.

## 5. Arbitration

Commercial agreements very often provide for the arbitration of disputes, and it is not uncommon for competition law issues – for example the enforceability of a non-compete clause or of an exclusive purchasing obligation – to be referred to arbitration. The subject is complex; there is a growing body of literature on it<sup>278</sup>. The European Commission is conscious of the amount of arbitration (and of other forms of alternative dispute resolution) that takes place; indeed in its own remedies it quite often provides mechanisms for the settlement of disputes<sup>279</sup>. The Commission has been known to investigate cases *after* parties have settled a dispute in arbitration proceedings<sup>280</sup>.

<sup>276</sup> See eg *ICI v Berk Pharmaceuticals* [1981] 2 CMLR 91, [1981] FSR 1; *British Leyland Motor Corp v Armstrong Patents Co Ltd* [1984] 3 CMLR 102 (this decision was overturned in the House of Lords (now Supreme Court) on the issue of copyright protection for functional objects: [1986] AC 577); *Ransburg-GEMA AG v Electrostatic Plant Systems* [1989] 2 CMLR 712; *Philips Electronics v Ingman Ltd* [1998] Eu LR 666, ChD; *Sandvik Aktiebolag v KR Pffnner (UK) Ltd* [1999] Eu LR 755; *HMSO v Automobile Association Ltd* [2001] Eu LR 80, [2001] ECC 273; *P&S Amusements Ltd v Valley House Leisure Ltd* [2006] EWHC 99, [2006] UKCLR 855.

<sup>280</sup> See eg the discussion of the *Marathon* case in (2004) (Summer) *Competition Policy Newsletter* 41–43.

In *Eco Swiss China Time Ltd v Benetton International NV*<sup>281</sup> the Court of Justice was asked to consider the impact of the competition rules on arbitration proceedings. Benetton had granted a trade mark licence to Eco Swiss to market watches under the Benetton name. Benetton subsequently terminated the licence and Eco Swiss referred the matter to an arbitrator, under Dutch law, in accordance with the agreement. The arbitrator awarded Eco Swiss substantial damages. No competition law point was taken by the parties, and the arbitrator did not raise one. In fact the trade mark licence infringed Article 101(1) and was ineligible for block exemption under Regulation 240/96 on technology transfer agreements<sup>282</sup>. Benetton subsequently decided to argue that the award of damages to Eco Swiss amounted to enforcing an agreement that was contrary to EU competition law. Under Dutch law an arbitration award can be challenged before the courts, in the absence of agreement between the parties, only on grounds of public policy. The Dutch Supreme Court held that the enforcement of competition rules did not amount to public policy in Dutch law, so that if the matter were purely domestic Benetton would be unsuccessful. However, since Benetton's case rested on the EU competition rules, the matter was referred to the Court of Justice under Article 267.

As noted above the Court of Justice stressed the fundamental importance of the competition rules in the Treaty, and the importance of the sanction of voidness in ensuring compliance with them<sup>283</sup>. A consequence of this was that, if domestic law allowed an appeal against an arbitration award on grounds of public policy, the possibility that there might be a breach of the EU competition rules should be investigated. On a separate point the Court of Justice recognised that domestic procedural rules which prescribe time limits for the challenging of arbitral awards could have the effect of preventing an appeal based on the competition rules; provided that the time limits were not so fierce as to infringe the requirement of effective application of the competition rules they would themselves be valid.

The Court of Justice did not say anything specifically about the obligations of arbitrators themselves, but the case is of obvious importance to their role. Arbitration is intended to enable parties to disputes to reach a reasonably rapid and cheap settlement of disputes. If an arbitrator ignores points of competition law, but these can subsequently be raised on appeal as, subject to the time limit point, in *Eco Swiss*, the speedy and cheap conclusion of cases would be undermined. It seems sensible therefore that the arbitrator should apply his or her mind to the issue; however the Court of Justice's judgment in *Van Schijndel*<sup>284</sup> established that there is no obligation upon a national court (nor therefore upon an arbitral panel) proactively to root out infringements of the competition rules<sup>285</sup>.

It would appear to be the case that an arbitrator could not refer an issue of competition law to the Court of Justice under Article 267; the establishment of an arbitration panel is a consensual process, with the result that it is not a 'court or tribunal of a Member State'<sup>286</sup>.

<sup>281</sup> Case C-126/87 [1999] ECR I-3055, [2000] 5 CMLR 816; see Komninos (2000) 37 CML Rev 459.

<sup>282</sup> This Regulation has since been replaced by Regulation 772/2004, OJ [2004] L 123/11; it is discussed in ch 19, 'Technology Transfer Agreements: Regulation 772/2004', pp 781–791.

<sup>283</sup> See 'The sanction of voidness', pp 319–320 above.

<sup>284</sup> Cases C-430/93 etc [1995] ECR I-4705, [1996] 1 CMLR 801; see 'The duty of national courts', p 306 above; on the point in the text see *Thalès Air Defense v Euromissile*, judgment of the Paris Court of Appeal of 18 November 2004 [2006] ECC 6, where an appeal against an award of damages by an arbitral panel was dismissed since the Article 101 point had not been raised during the course of the arbitration but was only raised after the event.

<sup>285</sup> An interesting question is whether an arbitrator in a non-EU country would apply the competition rules, as a matter of public policy, where an agreement infringes Article 101 (or Article 102); on this point see Bowsher, n 278 above, paras 11–063–11–069.

<sup>286</sup> Case 102/81 *Nordsee Deutsche Hochseefischerei GmbH v Reederei Mond* [1982] ECR 1095; see further the Opinion of Advocate General Colomer in Case C-17/00 *de Coster v Collège des Bourgmestres* [2001] ECR I-9445, [2002] 1 CMLR 285.

## 6. Proposals for Reform

### (A) The European Commission's Green and White Papers

In December 2005 the European Commission published a Green Paper, *Damages actions for breach of the EC antitrust rules*<sup>287</sup>, which identified a number of obstacles to a more efficient system of damages claims and set out various options as to how they might be addressed. The Staff Working Paper that accompanied the Green Paper provides very useful additional information about the matters raised. These included the issue of access to evidence; the question of whether liability to damages should depend on a finding of fault; the nature and level of damages; the position of indirect purchasers and the 'passing-on' defence; representative actions on behalf of consumers; costs; the relationship between public and private enforcement; and jurisdiction and the applicable law. The Commission received a large number of responses to the Green Paper<sup>288</sup>.

In April 2008 the Commission published a White Paper, *Damages actions for breach of the EC Antitrust Rules*<sup>289</sup>. At the same time it also published a Staff Working Paper<sup>290</sup> and an *Impact Assessment*<sup>291</sup> which suggested that the victims of competition infringements may be foregoing anything between €5.7 to €23.3 billion in damages per annum as a result of obstacles to private enforcement.

The key recommendations of the White Paper were that:

- victims of anti-competitive behaviour should be able to claim **single damages** for their harm, but not multiple damages; indirect purchasers should be able to claim as well as purchasers that have direct dealings with those responsible for the infringement
- **collective redress** should be available to consumers and small and medium-sized businesses through representative actions by qualified bodies such as consumer associations, state bodies and trade associations and opt-in collective actions in which victims expressly decide to combine their individual claims into a single action
- there should be a **minimum level of disclosure of evidence** across the EU between parties involved in litigation, subject to strict judicial control; adequate protection should be given to corporate statements by leniency applicants and to the investigations of competition authorities
- decisions of NCAs should have a **binding effect** on courts in the same way that Commission decisions are binding by virtue of Article 16(1) of Regulation 1/2003
- where a Member State's national law requires a finding of fault before damages can be awarded, there should be a rule that, once the victim has shown a breach of Article 101 or 102, the infringer should be liable in damages unless it can show that the infringement was the result of **excusable error**.

<sup>287</sup> COM(2005) 672 final, 19 December 2005; see also the accompanying Staff Working Paper which contains a rich source of research material; see Diemer 'The Green Paper on Damages Actions for Breach of the EC Antitrust Rules' (2006) 27 ECLR 309; Pheasant 'Damages Actions for Breach of the EC Antitrust Rules: The European Commission's Green Paper' (2006) 27 ECLR 365; Homes and Doig 'Views on the Commission's Green Paper on Damages Actions for Breach of EC Antitrust Rules: Causation and Passing-on Defence' (2006) 5 Competition Law Journal 123; Eilmansberger 'The Green Paper on damages actions for breach of the EC antitrust rules and beyond: Reflections on the utility and feasibility of stimulating private enforcement through legislative action' (2007) 44 CML Rev 431; Nebbia 'Damages actions for the infringement of EC competition law: compensation or deterrence?' (2007) 33 EL Rev 23.

<sup>288</sup> Available at [www.ec.europa.eu](http://www.ec.europa.eu).

<sup>289</sup> COM(2008) 154 final, 2 April 2008.

<sup>290</sup> SEC(2008) 404.

<sup>291</sup> SEC(2008) 405.

Following a period of consultation, no legislation was forthcoming; opinions differed substantially between Member States as to the nature and extent to which domestic civil procedures should be reformed.

When the new Commission took office in February 2010 it promised to consider ways in which to strengthen the private enforcement of EU law generally, not just competition law. In October 2010 Commissioner Alumnia announced that improving procedures for collective redress, such as representative actions, would be a priority<sup>292</sup>. In February 2011 the Commission published a consultation document *Towards a Coherent European Approach on Collective Redress*<sup>293</sup> in which it seeks to identify common legal principles relating to collective redress in order to develop a coherent European approach. The Commission identified six ‘common core principles’ to guide possible future EU initiatives on collective redress:

- a system of collective redress should deliver legally certain and fair outcomes within a reasonable time frame, while respecting the rights of all parties involved
- victims of infringements of EU law should be aware of the possibilities of bringing a collective claim and the role of representative bodies
- parties should have the option to resolve their dispute out of court through mechanisms of collective consensual dispute resolution
- there should be strong safeguards to avoid abusive litigation and the excesses of US ‘class actions’
- there should be appropriate mechanisms for financing collective redress in particular for individuals and small businesses
- the rules on European civil procedural law and on applicable law should work efficiently in practice for collective actions.

The Commission invited comments on these principles by 30 April 2011. It remains to be seen how the Commission will take this agenda forward. It is possible that it will propose a directive on collective redress generally and that it will subsequently make specific proposals on facilitating damages actions in competition law cases.

## (B) The Office of Fair Trading’s Discussion Paper

In April 2007 the OFT published a Discussion Paper, *Private actions in competition law: effective redress for consumers and business*<sup>294</sup>. The Discussion Paper first discussed the principles that should inform any proposals designed to make private competition law actions more effective. It proceeded to discuss representative actions, including the possibility that representative bodies should be allowed to bring standalone actions on behalf of consumers as well as follow-on ones, and that they should be able to bring both standalone and follow-on actions on behalf of businesses. It also discussed costs and funding arrangements. The Discussion Paper then addressed evidential issues, including the suggestion that the burden of proving that a claimant has ‘passed on’ any higher prices to its customers should lie with the defendant. Other matters covered included the

<sup>292</sup> ‘Common standards for group claims across the EU’, Speech of 15 October 2010, available at [www.ec.europa.eu](http://www.ec.europa.eu).

<sup>293</sup> SEC(2011) 173, 4 February 2011, available at [www.ec.europa.eu/competition/index\\_en.html](http://www.ec.europa.eu/competition/index_en.html).

<sup>294</sup> OFT 916, available at [www.of.gov.uk](http://www.of.gov.uk).

applicable law, effective claims resolution, and the interface with public enforcement and consistency of policy.

The OFT received a large number of responses to its Discussion Paper: these can be accessed on its website<sup>295</sup>. Most of the responses were favourable to steps being taken to facilitate more private actions, although there was a general recognition that care should be taken to ensure that vexatious and frivolous cases should be avoided: establishing a ‘competition culture’ in which victims of anti-competitive behaviour can sue for compensation should not lead to a ‘litigation culture’ in which unmeritorious claims are made. The responses were also clear that private actions should be a complement to, but not a replacement for, effective public enforcement by the OFT and sectoral regulators.

In November 2007 the OFT published its recommendations to the Government<sup>296</sup>. These were that the Government should consult on the following measures, to be designed and implemented in such a way as to comply with the principles outlined above:

- modify existing or introduce new procedures to allow representative bodies to bring standalone and follow-on actions for damages and injunctions on behalf of consumers<sup>297</sup>
- modify existing or introduce new procedures to allow representative bodies to bring standalone and follow-on actions for damages and injunctions on behalf of businesses
- introduce conditional fee arrangements in representative actions which allow for an increase of greater than 100 per cent on lawyers’ fees
- codify courts’ discretion to cap parties’ costs liabilities and to provide for the courts’ discretion to give the claimant cost-protection in appropriate cases
- establish a merits-based litigation fund
- require UK courts and tribunals to ‘have regard’ to decisions and guidance of the OFT and the sectoral regulators
- confer power on the Secretary of State to exclude leniency documents from use in litigation without the consent of the leniency applicant
- confer power on the Secretary of State to remove joint and several liability for immunity recipients in private actions for damages in competition law cases.

In March 2011 the Government announced that it will consider the OFT’s recommendations following the outcome of the European Commission’s consultation on collective redress<sup>298</sup>.

## Competition Act 1998 – substantive provisions

1. Introduction	330	5. 'Governing Principles Clause': Section 60 of the Competition Act 1998	369
2. The Competition Act 1998 – Overview	331		
3. The Chapter I Prohibition	333		
4. The Chapter II Prohibition	360	6. The Competition Act 1998 in Practice	374

### 1. Introduction

The Competition Act 1998, the main provisions of which entered into force on 1 March 2000, radically reformed the domestic law of the UK on restrictive agreements and anti-competitive practices. The Competition Act swept away much of the system that had been established over the preceding 50 years: the Restrictive Trade Practices Acts 1976 and 1977, the Resale Prices Act 1976 and the provisions on anti-competitive practices in the Competition Act 1980 were all repealed<sup>1</sup>. The Enterprise Act 2002 implemented further changes to UK competition law including the creation of a new system of market investigations<sup>2</sup> and merger control<sup>3</sup>, the introduction of criminal sanctions for individuals involved in 'hard-core' cartels<sup>4</sup> and the disqualification of directors of companies that infringe competition law<sup>5</sup>. Further changes, in particular to the Competition Act 1998, were effected by the Competition Act 1998 and Other Enactments (Amendment) Regulations 2004<sup>6</sup> ('the Amendment Regulations') in order to bring domestic law into alignment with the principles of Regulation 1/2003<sup>7</sup>; these changes are incorporated in the text that follows.

Section 2 of this chapter will provide an overview of the Competition Act. Sections 3 and 4 will consider in turn the so-called Chapter I and Chapter II prohibitions in the Competition Act which are modelled upon Articles 101 and 102 TFEU respectively. Section 5 discusses the relationship between EU and domestic competition law, including the important 'governing principles' clause in section 60 of the Competition Act, which is intended to achieve consistency with EU law. Section 6 contains a table of all the decisions under the Competition Act to have been published on the website of the Office of Fair Trading ('the OFT') by 20 June 2011 and discussion of the application of the Competition Act in practice.

<sup>1</sup> On the background to the reform of domestic competition law see the fifth edition of this book, pp 306–308; Wilks 'The Prolonged Reform of UK Competition Policy' in *Comparative Competition Policy* (Clarendon Press, 1996, eds Doern and Wilks); Wilks *In the Public Interest* (Manchester University Press, 1999), pp 296–305; Whish 'The Competition Act 1998 and the Prior Debate on Reform' in *The Competition Act: A New Era for UK Competition Law* (Hart Publishing, 2000, eds Rodger and MacCulloch).

<sup>3</sup> See ch 22.

<sup>4</sup> See ch 10, 'The cartel offence', pp 425–434.

<sup>5</sup> See ch 10, 'Company director disqualification', pp 435–436.

<sup>6</sup> SI 2004/1261.

<sup>7</sup> OJ [2003] L 1/1.

Many of the decisions of the OFT and the sectoral regulators under the Competition Act, and Articles 101 and 102, will be discussed further in the contextual chapters in the second half of this book<sup>8</sup>. Private enforcement of the Act is discussed in chapter 8; public enforcement by the OFT and the sectoral regulators is considered in chapter 10.

## 2. The Competition Act 1998 – Overview

### (A) Outline of the Act

The Competition Act 1998 is a complex piece of legislation; a number of amendments to it were made by the Enterprise Act 2002, and more by the Amendment Regulations of 2004. The Competition Act is divided into four parts, consisting of 76 sections. It contains numerous schedules which contain important detail, for example on exclusions, commitments and the role of the sectoral regulators.

#### (i) Part I: the Chapter I and Chapter II prohibitions

The most important provisions are found in Part I of the Act, which is divided into five chapters. In particular it introduces prohibitions that are modelled upon Article 101 TFEU ('the Chapter I prohibition') and Article 102 TFEU ('the Chapter II prohibition'). The Act confers substantial powers of investigation and enforcement on the OFT and the sectoral regulators<sup>9</sup>. The Act established the Competition Commission ('the CC') as the successor to the former Monopolies and Mergers Commission<sup>10</sup>; the CC is responsible for carrying out in-depth merger and market investigations. The Competition Appeal Tribunal ('the CAT') hears appeals against decisions of the OFT and the regulators under the Competition Act; it also has various other functions under the Enterprise Act 2002.

#### (ii) Part II: European investigations

Part II of the Competition Act is concerned with investigations in relation to Articles 101 and 102 TFEU, giving specific powers to a High Court judge to issue a warrant authorising the OFT to enter premises in connection with an investigation ordered or requested by the European Commission<sup>11</sup>. Part 2A of the Act is concerned with investigations conducted by the OFT on behalf of a competition authority of another EU Member State pursuant to Article 22 of Regulation 1/2003<sup>12</sup>.

#### (iii) Part III: amendments to the Fair Trading Act 1973

Part III of the Act made some amendments to the monopoly provisions of the Fair Trading Act 1973; these, however, have been repealed and replaced by the market investigation provisions in the Enterprise Act 2002: they are described in chapter 11.

#### (iv) Part IV: miscellaneous amendments

Part IV of the Competition Act 1998 contains supplemental and transitional provisions, including the repeal of sections 44 and 45 of the Patents Act 1977, and provisions on Crown application.

<sup>8</sup> See eg ch 13, 'UK Law', pp 552–558 on cartels cases and see ch 18 generally.

<sup>9</sup> See ch 10, 'Concurrency', pp 437–439 on the concurrent powers of the OFT and the sectoral regulators.

<sup>10</sup> Competition Act 1998, s 45.

<sup>11</sup> See ch 10, 'EU investigations', p 402.

<sup>12</sup> Ibid.

**(B) OFT guidance**

The Competition Act 1998 requires the OFT to publish general advice and information as to how it will apply the law in practice<sup>13</sup>. The sectoral regulators may issue similar advice and information in relation to their respective sectors and have done so in conjunction with the OFT. A number of guidelines were published in 2000, when the Act first entered into force; most of these were revised to take into account changes introduced as a result of the adoption of Regulation 1/2003 and experience acquired under the Act. On 20 June 2011 the following guidelines had been published under the Competition Act<sup>14</sup>:

- *Agreements and concerted practices*<sup>15</sup>
- *Abuse of a dominant position*<sup>16</sup>
- *Market definition*<sup>17</sup>
- *Powers of investigation*<sup>18</sup>
- *Concurrent application to regulated industries*<sup>19</sup>
- *Enforcement*<sup>20</sup>
- *Trade associations, professional and self-regulatory bodies*<sup>21</sup>
- *Assessment of market power*<sup>22</sup>
- *The application of the Competition Act in the telecommunications sector*<sup>23</sup>
- *Vertical agreements*<sup>24</sup>
- *Land agreements*<sup>25</sup>
- *Services of general economic interest*<sup>26</sup>
- *The application of the Competition Act in the water and sewerage sectors*<sup>27</sup>
- *OFT's Guidance as to the appropriate amount of a penalty*<sup>28</sup>
- *Application in the energy sector*<sup>29</sup>
- *Application to services relating to railways*<sup>30</sup>
- *Application to the Northern Ireland energy sectors*<sup>31</sup>
- *Public transport ticketing schemes block exemption*<sup>32</sup>
- *Modernisation*<sup>33</sup>
- *Involving third parties in Competition Act investigations*<sup>34</sup>
- *Leniency and no-action*<sup>35</sup>, which deals with leniency applications under both the Competition Act 1998 and the Enterprise Act 2002
- *A guide to the OFT's investigation procedures in competition cases*<sup>36</sup>.

The following guidelines explain the application of the cartel offence and company director disqualification introduced by the Enterprise Act 2002:

- *Competition disqualification orders*<sup>37</sup>
- *The cartel offence*<sup>38</sup>
- *Powers for investigating criminal cartels*<sup>39</sup>.

### (C) Other information about the Competition Act

The OFT's website<sup>42</sup> contains a large amount of information about the Competition Act 1998. The guidelines listed above will be found there, as will a series of 'quick guides' on particular aspects of the Act and a video on *Understanding Competition Law*. It is also possible to follow OFT investigations and consultations on the website. The OFT maintains a public register of decisions under the Competition Act, accessible on its website.

### (D) Delegated legislation under the Act

The Secretary of State has made a number of Orders, Rules and Regulations pursuant to his powers under the Competition Act 1998, including in particular:

- The Competition Act 1998 (Small Agreements and Conduct of Minor Significance) Regulations<sup>43</sup>
- The Competition Act 1998 (Determination of Turnover for Penalties) Order<sup>44</sup>
- The Competition Act 1998 (Concurrency) Regulations 2004<sup>45</sup>
- The Competition Act 1998 (Appealable Decisions and Revocation of Notification of Excluded Agreements) Regulations 2004<sup>46</sup>
- The Competition Act 1998 (Land Agreements Exclusion and Revocation) Order 2004<sup>47</sup>
- The Competition Act 1998 and Other Enactments (Amendment) Regulations 2004<sup>48</sup>
- The Competition Act 1998 (Office of Fair Trading's Rules) Order 2004<sup>49</sup>
- The Competition Act 1998 (Land Agreements Exclusion Revocation) Order 2010<sup>50</sup>.

### (E) Literature

A large number of books and articles have been written on the Competition Act<sup>51</sup>.

## 3. The Chapter I Prohibition

The provisions on the Chapter I prohibition are contained in sections 1 to 11 of the Act. Section 50 provides for the exclusion, by order, of vertical agreements and agreements

<sup>40</sup> OFT 1340, June 2011.

<sup>41</sup> OFT 1341, June 2011.

<sup>42</sup> www.of.gov.uk.

<sup>43</sup> SI 2000/262.

<sup>44</sup> SI 2000/309, as amended by SI 2004/1259.

<sup>45</sup> SI 2004/1077.

<sup>46</sup> SI 2004/1078.

<sup>47</sup> SI 2004/1260.

<sup>48</sup> SI 2004/1261.

<sup>49</sup> SI 2004/2751.

<sup>50</sup> SI 2010/1709.

<sup>51</sup> Many of the books published in the immediate aftermath of the passage of the Act are now of little more than historical interest: a full list of them can be found on p 327 of the 6th edition of this book; of current interest see Ward and Smith (eds) *Competition Litigation in the UK* (Sweet & Maxwell, 2003); O'Neill and Sanders *UK Competition Procedure* (Oxford University Press, 2007); Green and Brealey (eds) *Competition Litigation: UK Practice and Procedure* (Oxford University Press, 2010); Roger (ed) *Ten Years of UK Competition Law Reform* (Dundee University Press, 2010); and the series of essays in (2010) 9 *Competition Law Journal* 141–294.

relating to land: this was effected by SI 2000/310 but was repealed for vertical agreements with effect from May 2005 by SI 2004/1260 and for land agreements with effect from April 2011 by SI 2010/1709<sup>52</sup>. Section 1 repealed the Acts referred to at the start of this chapter with effect from 1 March 2000. The OFT's *Guidelines Agreements and concerted practices*<sup>53</sup> and *Modernisation*<sup>54</sup> provide a useful overview of the Chapter I prohibition<sup>55</sup>.

Section 2 contains the actual Chapter I prohibition. Section 3 provides for excluded agreements. Sections 4 and 6 provide for the making of block exemptions. Section 9 reflects Article 101(3) TFEU, setting out the criteria that an agreement must satisfy to be exempt from the Chapter I prohibition. Section 10 provides for so-called 'parallel exemption' and section 11 provided exemption for certain other agreements, but this provision is now otiose. Sections 4, 5 and 12 to 16, which dealt with the notification of agreements to the OFT for individual exemption, have been repealed by the Amendment Regulations: given that Regulation 1/2003 abolished the notification of agreements to the European Commission as a matter of EU law, it was thought appropriate to do the same as a matter of domestic law. The Chapter I prohibition is closely modelled upon Article 101 TFEU, although it is not identical in every respect<sup>56</sup>. Where an agreement has an effect on trade between Member States the OFT is obliged, if it decides to proceed under domestic competition law, also to apply EU law as a result of Article 3(1) of Regulation 1/2003, and Article 3(2) prevents it from reaching a stricter conclusion under domestic than under EU law<sup>57</sup>.

The OFT has imposed penalties in several Chapter I prohibition decisions, including some in which it also found an infringement of Article 101 TFEU<sup>58</sup>.

### (A) Section 2(1): the prohibition

Section 2(1) provides that:

Subject to section 3, agreements between undertakings, decisions by associations of undertakings or concerted practices which—

- (a) may affect trade within the UK, and
- (b) have as their object or effect the prevention, restriction or distortion of competition within the UK,

are prohibited unless they are exempt in accordance with the provisions of this Part.

Section 2(2) provides an illustrative list of the kinds of agreements that might be caught by section 2(1)<sup>59</sup>.

#### (i) 'Subject to section 3'

Section 3 provides for various agreements to be excluded from the Chapter I prohibition. These exclusions are considered below<sup>60</sup>.

<sup>52</sup> See 'Section 50: land agreements', p 356 below.

<sup>53</sup> OFT 401, December 2004.

<sup>54</sup> OFT 442, December 2004.

<sup>55</sup> See also *Trade associations, professional bodies and self-regulatory organisations*, OFT 408; *Vertical agreements*, OFT 419; and *The application of competition law following the revocation of the Land Agreements Exclusion Order*, OFT 1280a.

<sup>56</sup> For detailed discussion of Article 101 TFEU see chs 3 and 4.

<sup>57</sup> See ch 2, 'Regulation 1/2003', pp 76–78.

<sup>58</sup> See the 'Table of decisions', p 374 below.

<sup>59</sup> See 'Section 2(2): illustrative list', p 346 below.

<sup>60</sup> See 'The Chapter I prohibition: excluded agreements', pp 348–356 below.

## (ii) Agreements between undertakings, decisions by associations of undertakings or concerted practices

These words are identical to those in Article 101(1). These expressions are ones that have been considered in numerous judgments of the EU Courts which, as a general proposition, the OFT and sectoral regulators, the CAT and the domestic courts in the UK are obliged to follow as a result of section 60(2) of the Act<sup>61</sup>.

### (iii) 'Undertakings'

#### (A) General comments

As in the case of EU law<sup>62</sup>, the term 'undertaking' is interpreted by the OFT to include any natural or legal person capable of carrying on commercial or economic activities relating to goods or services; an entity may engage in economic activity in relation to some of its functions but not others<sup>63</sup>. The OFT has issued a policy note on *The Competition Act 1998 and public bodies*<sup>64</sup>. In *Institute of Independent Insurance Brokers v Director General of Fair Trading*<sup>65</sup> the CAT considered that the General Insurance Standards Council (GISC), established upon the private initiative of its members rather than pursuant to a statutory requirement, was probably an undertaking for the purposes of the Chapter I prohibition, although this was not a necessary finding for the judgment<sup>66</sup>.

A parent company and its subsidiaries will be treated as one undertaking where the subsidiaries lack economic independence with the result that agreements between them would not be subject to the Chapter I prohibition; the same would be true of agreements between two companies under the control of a third<sup>67</sup>. Similarly an agreement between entities which form a single economic entity are not subject to the Chapter I prohibition; this was one of the OFT's conclusions in *Anaesthetists' groups*<sup>68</sup>, where the OFT said that a group of individuals would be treated as a single entity only if they operate and present themselves as a single entity on the market. Individuals acting under a contract of employment do not do so as undertakings<sup>69</sup>. In *Bid rigging in the construction industry in England* the OFT considered that firms within the same corporate group that formed a single undertaking were jointly and severally liable for the infringements<sup>70</sup>.

The Chapter I prohibition applies to agreements 'between undertakings', but certain provisions of the Act refer to 'persons' rather than undertakings. The reason for this is that in some contexts the word 'person' is a more appropriate expression; however, in order to prevent undertakings arguing to the contrary, section 59 provides that the expression 'persons' includes 'undertakings'<sup>71</sup>.

<sup>71</sup> See HL Report Stage, 23 February 1998, cols 511–512.

An unusual finding in *Exchange of information on future fees by certain independent fee-paying schools*<sup>72</sup> was that the Secretary of State for Defence, in his capacity as the person responsible for the governance of the Royal Hospital School, was acting as an undertaking but that, as he constituted the Crown for this purpose, no penalty could be imposed as a result of section 73(1)(b) of the Competition Act<sup>73</sup>. The OFT held that the other schools involved in this case were undertakings, their charitable status notwithstanding<sup>74</sup>.

### (B) *The Bettercare case*

The scope of application of the competition rules to public-sector organisations, both as purchasers and as providers of goods and services, is clearly a matter of major significance. The issue arose in *BetterCare Group v Director General of Fair Trading*<sup>75</sup>. The OFT had received a complaint from BetterCare that the North & West Belfast Health and Social Services Trust had abused a dominant position by offering unfairly low prices and unfair terms in its purchases of social care from BetterCare. The Trust had a statutory duty to provide nursing and residential care to elderly people: it had nursing homes of its own, but also ‘contracted out’ to the private sector. The OFT considered, for a variety of reasons<sup>76</sup>, that the Trust was not an undertaking for the purpose of the Competition Act when it purchased residential and nursing care, and therefore closed its file<sup>77</sup>. When upholding BetterCare’s appeal<sup>78</sup> the CAT concluded that the Trust was, indeed, acting as an undertaking when purchasing care from private providers, and remitted the matter to the OFT to address the question of whether the Trust had acted in an abusive manner. In reaching its decision the CAT, after a thorough review of the case law of the EU Courts, concluded that no precedent addressed the factual circumstances of the case in hand<sup>79</sup>. In the CAT’s view the contracting-out activities of the Trust amounted to an economic activity<sup>80</sup>: the fact that it was a purchaser rather than a provider did not affect the analysis<sup>81</sup>; and the Trust was active on ‘a market’, namely for the supply of residential and nursing care services in Northern Ireland<sup>82</sup>. Furthermore the Trust did not provide its services gratuitously, but sought to recover as much as possible as it could of the cost of providing care<sup>83</sup>. The CAT stressed that its finding that the Trust was an undertaking was quite separate from the question of whether it was guilty of abusive behaviour<sup>84</sup>.

The subsequent judgments of the EU Courts in *FENIN v Commission*<sup>85</sup> cast doubt on the correctness of *BetterCare*, in that the Courts took a rather robust view that, where a public-sector body purchases goods or services in order to provide a social service, it

<sup>81</sup> *Ibid*, paras 193–194.

<sup>82</sup> *Ibid*, paras 195–200.

<sup>83</sup> *Ibid*, para 201.

<sup>84</sup> *Ibid*, paras 210–217.

<sup>85</sup> Case T-319/99 *FENIN v Commission* [2003] ECR II-357, [2003] 5 CMLR 34, upheld on appeal Case C-205/03 P [2006] ECR I-6295, [2006] 5 CMLR 559; see ch 3, ‘Procurement that is ancillary to a non-economic activity is not economic’, pp 89–90 for discussion of this case, and the comments on it in relation to the *BetterCare* judgment.

does not do so as an undertaking. There are factual differences between the two cases: in particular the Trust had a role as a supplier as well as a purchaser of services and charged for its services, albeit not at a full market rate; this was not the case in *FENIN*. However, at a policy level, there seems to be an unwillingness in the *FENIN* judgments to extend the application of the competition rules to the procurement activities of the Spanish Health Service<sup>86</sup>, but less of an unwillingness on the CAT's part in *BetterCare* in relation to the Health Trust. When the matter in *BetterCare* was remitted to the OFT for further consideration it reached the conclusion that the Health Trust was not abusing a dominant position anyway; it therefore did not need to decide whether the Trust was acting as an undertaking<sup>87</sup>.

### (C) *The OFT's subsequent decisional practice*

The OFT has not refrained from considering the application of the competition rules to other public-sector entities. For example it investigated Companies House, an executive agency of the former Department of Trade and Industry, which is required by statute to maintain a register of information about companies; it also acts commercially in markets for the provision of information<sup>88</sup>. In the OFT's view Companies House was acting as an undertaking when operating on these commercial markets<sup>89</sup>; however it found no evidence that it was cross-subsidising from its statutory operations in order to predate or to impose a margin squeeze in the commercial markets<sup>90</sup>. In *Cardiff Bus*<sup>91</sup> the OFT held that a bus company owned by Cardiff Council was acting as an undertaking when providing commercial bus services; it concluded that Cardiff Bus had abused its dominant position by predatory pricing<sup>92</sup>.

### (iv) 'Agreements'

This term is to be determined in a manner consistent with the jurisprudence of the EU Courts under Article 101(1) TFEU<sup>93</sup>, the wording of which is followed in section 2(1). The Chapter I prohibition is capable of applying both to agreements between undertakings operating at the same level of trade (horizontal agreements) and to agreements between undertakings at different levels (vertical agreements). Agreements may be written or spoken and do not need to be legally binding<sup>94</sup>; a reluctant participant in an agreement can still be liable, although such reluctance may be relevant to the level of any penalty<sup>95</sup>. It is not legally necessary to distinguish between agreements and concerted practices. In some cases the European Commission has found a 'single overall agreement' to which a number of undertakings are party<sup>96</sup>. The OFT has taken the same approach in some of

<sup>86</sup> The principles in *FENIN* have since been applied by the Commission and the EU Courts in the air traffic management systems sector: Case T-155/04 *SELEX Sistemi Integrati SpA v Commission* [2006] ECR II-4797, [2007] 4 CMLR 372, paras 59–69, on appeal Case C-113/07 P [2009] ECR I-2207, [2008] 4 CMLR 1083, paras 65–123.

<sup>95</sup> *Agreements and concerted practices*, OFT 401, para 2.8, and see *Construction Recruitment Forum*, OFT decision of 29 September 2009 [2010] UKCLR 14, paras 4.49, 4.81, 4.171 and 4.330.

<sup>96</sup> See ch 3, 'The concept of a "single, overall agreement"', pp 103–104.

its cartel decisions<sup>97</sup>; however the ‘single overall agreement’ analysis does not always apply in bid-rigging, where there may be a series of discrete agreements in relation to particular contracts, each one requiring individual analysis rather than an overall plan<sup>98</sup>.

Two cases, best referred to as *Football Shirts* and *Toys and Games*, are of considerable interest to the meaning of agreement and/or concerted practice under the Act. In each case the OFT had found there to be agreements and/or concerted practices as to the retail prices at which these consumer goods were sold to the public<sup>99</sup>. The interesting feature of the cases is that the OFT decided not only that there were bilateral vertical agreements between the suppliers and their dealers, but also that there were horizontal agreements between the dealers themselves, and that these agreements had come about not, or not only, from direct contact between the dealers but also through the role played by the supplier in each case.

This can be presented in diagrammatic form:

The OFT’s case was that not only were there bilateral agreements between B and A and between B and C. It also found that there were trilateral agreements in each case between A, B and C which, as between A and C, were horizontal rather than vertical. At no time was there any direct communication between A and C. These horizontal agreements had come about as a result of indirect contact between A and C through the medium of B. This phenomenon is sometimes referred to as one of ‘hub and spokes’, where B represents the ‘hub’ and each of A and C is on the end of a ‘spoke’.

<sup>97</sup> See eg *Construction Recruitment Forum*, OFT decision of 29 September 2009 [2010] UKCLR 14, paras 4.332–4.343 (finding that a collective boycott and price fixing formed a single overall agreement).

<sup>98</sup> See eg *West Midland Roofing Contractors*, OFT decision of 17 March 2004 [2004] UKCLR 1119, upheld on appeal in Case Nos 1032/1/1/04 etc *Apex Asphalt & Paving Co Ltd v OFT* [2005] CAT 4, [2005] CompAR 507; *Bid rigging in the construction industry in England*, OFT decision of 21 September 2009 [2010] UKCLR 332, paras VI.14–VI.20 (pp 1631–1632); see ch 13, ‘Collusive Tendering’, pp 555–557 for discussion of the OFT’s decisions on bid-rigging.

<sup>99</sup> *Football Kit price-fixing*, OFT decision of 1 August 2003 [2004] UKCLR 6 and *Hasbro UK Ltd/Argos Ltd/Littlewoods Ltd*, OFT decision of 2 December 2003 [2004] UKCLR 717; note that, in the case of *Football Shirts*, the Consumers’ Association, trading as Which?, brought a follow-on action for damages in the CAT on behalf of consumers that were overcharged: see ch 8, ‘Section 47B: claims brought on behalf of consumers’, pp 318–319.

The CAT agreed with the OFT's findings of a trilateral agreement in each of the cases<sup>100</sup>. Further appeals were taken to the Court of Appeal; the two cases were heard together and a single judgment was given<sup>101</sup>. The Court of Appeal agreed that there had been trilateral agreements<sup>102</sup>. However it suggested that the CAT's formulation of how a trilateral agreement could come about in these circumstances 'may have gone too far'<sup>103</sup>. The CAT had suggested that, if A were to disclose its future pricing intentions to B in circumstances in which it was 'reasonably foreseeable' that B might make use of that information and pass it on to C, there would be a concerted practice between A, B and C<sup>104</sup>. The Court of Appeal preferred a slightly narrower formulation, omitting the reference to reasonable foreseeability:

If (i) retailer A discloses to supplier B its future pricing intentions in circumstances where A may be taken to intend that B will make use of that information to influence market conditions by passing that information to other retailers (of whom C is one or may be one), (ii) B does, in fact, pass that information to C in circumstances where C may be taken to know the circumstances in which the information was disclosed by A to B and (iii) C does, in fact, use the information in determining its own future pricing intentions, then A, B and C are all to be regarded as parties to a concerted practice having as its object the restriction or distortion of competition. The case is all the stronger where there is reciprocity: in the sense that C discloses to supplier B its future pricing intentions in circumstances where C may be taken to intend that B will make use of that information to influence market conditions by passing that information to (amongst others) A, and B does so.

Clearly these cases mean that an undertaking in the position of B must take care to ensure that it does not, consciously or unconsciously, act as the agent of a horizontal agreement between A and C. The point was put to the Court of Appeal that the formulation of an agreement and/or concerted practice in these cases could jeopardise normal commercial dealings between suppliers and dealers. The Court of Appeal rejected this: bilateral discussions between a supplier and a dealer of a purely vertical nature about matters such as likely retail prices, profit margins and wholesale prices and terms of sale would not give rise to problems of unlawfulness: what would be problematic would be discussions which clearly have 'a horizontal element'<sup>105</sup>. Permission to appeal to the House of Lords (now the Supreme Court) was rejected<sup>106</sup>.

Where there is direct contact between two undertakings – between A and C in the example above – involving the disclosure of pricing information it is much easier to establish an agreement and/or concerted practice<sup>107</sup>. In the case of *Loan Pricing* Royal Bank of Scotland agreed to pay a penalty of £28.59 million after admitting direct

<sup>100</sup> Some of the OFT's findings of fact were annulled in *Football Shirts*, Case Nos 1021/1/1/03 and 1022/1/1/03 *JJB Sports plc v OFT* [2004] CAT 17, [2005] CompAR 29; the decision in *Toys and Games* was upheld in its entirety on substance, although the CAT adjusted the level of the penalties, Case Nos 1014 and 1015/1/1/03 *Argos Ltd v OFT* [2004] CAT 24, [2005] CompAR 588 (judgment on liability) and Case Nos 1014 and 1015/1/1/03 *Argos Ltd v OFT* [2005] CAT 13, [2005] CompAR 834 (judgment on penalty).

collusion over the price of loan products to professional services firms; the other party to this agreement, Barclays, blew the whistle and therefore was not fined<sup>108</sup>.

#### (v) ‘Decisions by associations of undertakings’

This expression has been broadly interpreted in EU law<sup>109</sup>. A body can be classified as an association of undertakings irrespective of whether it carries on any commercial or economic activity of its own<sup>110</sup>, and the fact that it is a ‘loose knit association’ does not prevent it from being an association of undertakings<sup>111</sup>. However a body must be ‘a self-standing entity with ongoing existence’, usually with members, in order to be an association of undertakings<sup>112</sup>. Trade associations, agricultural cooperatives and associations of sporting bodies are typical examples of associations of undertakings.

The term ‘decision’ has a broad meaning, including the rules of trade associations, recommendations, resolutions of the management committee and rulings of the chief executive; the crucial issue is whether the object or effect of the decision is to influence the conduct or coordinate the activity of the members<sup>113</sup>. The Guideline on *Trade associations, professions and self-regulating bodies*<sup>114</sup> provides additional guidance on the meaning of decisions<sup>115</sup>; it also discusses the extent to which typical activities of a trade association, such as the promulgation of codes of conduct, can infringe Article 101 TFEU and the Chapter I prohibition<sup>116</sup>. This Guideline also has a specific section on the position of the professions<sup>117</sup> and of self-regulating bodies<sup>118</sup>.

In *Northern Ireland Livestock and Auctioneers’ Association*<sup>119</sup> the OFT concluded that a non-binding recommendation by the Association as to the commission that its members should charge for the purchase of livestock in Northern Ireland cattle marts amounted to a decision within the Chapter I prohibition<sup>120</sup>. The Standard Conditions of the Film Distributors’ Association were found to be a decision of an association of undertakings; certain clauses to which the OFT objected, including those that limited the ability of cinemas to determine their own prices and promotional activities, were dropped<sup>121</sup>.

Standard conditions drawn up by a trade association will be less likely to have an appreciable effect on competition where its members have the freedom to adopt different conditions if they so wish<sup>122</sup>.

The effect that a decision of an association might have on the UK market will depend to a certain extent on the size of the membership of the association concerned: the broader the membership of an association, the greater the influence of the association is likely to be<sup>123</sup>.

## (vi) 'Concerted practices'

This expression will be interpreted in line with the jurisprudence of the EU Courts<sup>124</sup> which identifies the main elements of a concerted practice as a form of practical cooperation, knowingly entered into by the parties, which is intended to amount to a substitution for competition in the market<sup>125</sup>. The Court of Appeal has pointed out that concerted practices can take many different forms, and the courts have always been careful not to define or limit what may amount to a concerted practice for this purpose<sup>126</sup>. Contacts or communications which influence market behaviour, depending on the nature of the contact or the effect, or even potential effect, on competition, may be caught if the conduct leads to, or would have led to, a different result had the undertakings not embarked on this conduct<sup>127</sup>.

The OFT's *Guideline Agreements and concerted practices* discusses the factors that it will take into account in establishing whether a concerted practice exists, such as whether behaviour in the market is influenced as a result of direct or indirect contact between undertakings<sup>128</sup>. In *Bookmakers' Afternoon Greyhound Services Ltd v Amalgamated Racing Ltd (No 2)*<sup>129</sup> the High Court held that, although there was some parallel behaviour on the part of a number of bookmakers, there was insufficient evidence of an alleged collective boycott by them of a new horseracing television service or of a concerted withdrawal of sponsorship from certain racecourses.

In *Apex Asphalt and Paving Co Ltd v OFT*<sup>130</sup> the CAT considered the meaning of a concerted practice in a case where the OFT had imposed fines on undertakings for participating in collusive tendering in relation to roofing contracts in the West Midlands<sup>131</sup>. Having analysed the case law of the EU Courts<sup>132</sup> the CAT distilled a number of principles, including that a concerted practice can arise where there are reciprocal contacts between undertakings which remove or reduce uncertainty as to their future conduct. The CAT continued that:

reciprocal contacts are established where one competitor discloses its future intentions or conduct on the market to another when the latter requests it or, at the very least, accepts it.

The CAT proceeded to uphold the finding of the OFT that there had been an infringement in this case<sup>133</sup>. The OFT has applied these principles in many subsequent decisions on collusive tendering<sup>134</sup> and notably, in one decision, imposed fines totalling £129.2 million on 103 undertakings for *Bid rigging in the construction industry in England*<sup>135</sup>. On appeal the CAT annulled this decision in relation to four undertakings because the OFT had erred in its findings of fact<sup>136</sup>.

(vii) ‘Object or effect the prevention, restriction or distortion of competition within the UK’

(A) *General comments*

This concept is understood and applied in the same way as Article 101(1)<sup>137</sup>. In the *GISC* case<sup>138</sup> the CAT said that the first step is normally to determine the object of an agreement; if it is not plain that the object is to restrict competition one should then move on to consider the effects<sup>139</sup>. Useful guidance on the distinction between agreements that restrict by object rather than by effect can be found in the European Commission’s *Guidelines on the application of [Article 101(3)]*, to which the High Court specifically had regard in *Bookmakers’ Afternoon Greyhound Services v Amalgamated Racing*<sup>140</sup>.

(B) *Restriction of competition by object*

The concept of a restriction of competition by object has been considered by the OFT, the CAT and the ordinary courts in several cases. The first case of note is *GISC*<sup>141</sup> in which the CAT held that the rules of GISC, which prevented its insurer members from dealing with insurance intermediaries unless they were themselves members of GISC, ‘clearly’ fell within section 2(1)(b) of the Competition Act<sup>142</sup>. The Tribunal’s view appears to have been that the rules had the object of restricting competition<sup>143</sup>. The CAT annulled the OFT’s decision that there was no infringement, and remitted the matter to the OFT<sup>144</sup> which adopted a second non-infringement decision when the offending rule had been dropped<sup>145</sup>.

In *Exchange of information on future fees by certain independent fee-paying schools*<sup>146</sup> the OFT found that the exchange of future price information between 50 independent schools about the level of their intended fees had as its object the restriction of competition and made no finding on effects<sup>147</sup>; this case was settled by agreement between the OFT and the schools, and it actually benefited the schools that the OFT did not find anti-competitive effects – that is to say higher school fees – since that might have encouraged follow-on damages actions against them.

In *Cityhook v OFT* the High Court considered that classifying an alleged collective boycott by purchasers of a supplier offering a new technology as a restriction of competition by object had ‘the attraction of simplicity’<sup>148</sup>, but recognised that the contrary view was not unreasonable<sup>149</sup>: existing case law established only that a boycott of a purchaser by suppliers was restrictive by object. The judge in *Cityhook* was reluctant to add a ‘new’

*OFT* [2011] CAT 3; Case No 1124/1/1/09 *North Midland Construction plc v OFT* [2011] CAT 14, paras 14–34; the CAT dismissed two appeals on liability see Case No 1126/1/1/09 *ISG Pearce Ltd v OFT* [2011] CAT 10, paras 24–36; Case No 1120/1/1/09 *Quarby Construction Company Ltd v OFT* [2011] CAT 11, paras 8–140.

<sup>141</sup> Case No 1003/2/1/01 [2001] CAT 4, [2001] CompAR 62.

<sup>142</sup> *Ibid*, para 192.

<sup>143</sup> *Ibid*, paras 179–192; see also paras 214–215.

<sup>144</sup> It is interesting to compare the approach taken by the CAT in the *GISC* case with the Court of Justice’s subsequent judgment in Case C-309/99 *Wouters v Algemene Raad van de Nederlandse Orde van Advocaten* [2002] ECR I-1577, [2002] 4 CMLR 913; after *Wouters* might the CAT have asked whether the GISC rule fell outside the Chapter I prohibition, subject to a test of proportionality: see ch 3, ‘Regulatory ancillarity: the judgment of the Court of Justice in *Wouters*’, pp 130–133.

<sup>145</sup> *General Insurance Standards Council* OFT decision of 22 November 2002, [2003] UKCLR 39.

<sup>146</sup> OFT decision of 20 November 2006 [2007] UKCLR 361.

<sup>147</sup> *Ibid*, paras 1348–1358.

<sup>148</sup> *R (Cityhook Ltd) v OFT* [2009] EWHC 57, [2009] UKCLR 255, para 131.

<sup>149</sup> *Ibid*, paras 132–135.

restriction by object to the existing category of such cases. The discovery of ‘new’ restrictions by object cannot be ruled out, but it is reasonable to suppose that this will be a rare occurrence<sup>150</sup>. In *Jones v Ricoh (UK) Ltd*<sup>151</sup> Roth J considered that a confidentiality agreement does not normally have the object of restricting competition, but held that the agreement in that case did have such an object because it went much further than could reasonably be required to protect the information of the claimant.

In *Bookmakers’ Afternoon Greyhound Services v Amalgamated Racing* the High Court, upheld by the Court of Appeal, dismissed a claim by several British bookmakers that arrangements by a number of British racecourses for the collective negotiation and exclusive licensing of media rights to their own broadcasting joint venture infringed the Chapter I prohibition and Article 101(1) TFEU. The Court of Appeal endorsed the judge’s conclusion that the purpose of the arrangements was to introduce competition into the previously monopsonistic market for the purchasing of horseracing media rights and that any increase in price was the consequence of that increase in competition<sup>152</sup>. It followed that the arrangements did not have as their object the restriction of competition<sup>153</sup>.

The OFT and the CAT have characterised various types of collusive tendering as restrictive of competition by object<sup>154</sup>.

In *Tobacco*<sup>155</sup> the OFT concluded that two tobacco manufacturers and ten retailers had entered into a number of bilateral, vertical agreements whereby the prices of various tobacco brands were linked to those of competitors’ brands; the OFT did not find any multilateral or horizontal agreements. The OFT concluded that these ‘price-matching’ arrangements restricted each retailer’s ability independently to set resale prices for cigarettes and considered that they restricted competition by object<sup>156</sup>. The OFT does not consider that the subjective intentions of the parties to an agreement are relevant to determining whether an agreement has as its object the restriction of competition<sup>157</sup>.

### (C) Restriction of competition by effect

Where an agreement does not have the object of restricting competition there remains the possibility that its effect, considered within its market and economic context, might be to do so<sup>158</sup>. Two judgments, of the CAT in *Racecourse Association v OFT*<sup>159</sup> and the Court of Appeal in *Bookmakers’ Afternoon Greyhound Services v Amalgamated Racing*<sup>160</sup>, were concerned with this issue. In *Racecourse Association* the CAT reached the conclu-

<sup>150</sup> See further ch 3, ‘Refinement of the range of agreements within the object box’, pp 124–125.

<sup>151</sup> [2010] EWHC 1743, [2009] UKCLR 1335.

<sup>152</sup> [2009] EWCA Civ 750, [2009] UKCLR 863, paras 73–94; the Court also pointed out that, in the absence of the racecourses’ collaboration, there was only one buyer for the media rights and consequently no competition to be restricted: *ibid*, para 92.

<sup>153</sup> *Ibid*, para 94; in reaching its conclusion the Court of Appeal referred to the Court of Justice’s judgment in Case C-209/07 *Competition Authority v Beef Industry Development Society Ltd* [2008] ECR I-8637, [2009] 4 CMLR 310: see ch 3, ‘Market sharing, quotas, collective exclusive dealing’, pp 122–123.

<sup>154</sup> See eg OFT decision of 21 September 2009 [2010] UKCLR 322, paras III.97–III.114 (cover bidding) and III.143–III.154 (compensation payments).

<sup>155</sup> OFT decision of 15 April 2010.

<sup>156</sup> The decision is under appeal to the CAT, Case Nos 1160–1165/1/1/10 *Imperial Tobacco Group plc & Ors v OFT*, not yet decided.

<sup>157</sup> *Memorandum of Understanding on the Supply of Oil Fuels in an Emergency*, OFT decision of 25 October 2001, paras 39–40.

<sup>158</sup> OFT 401, para 7.2; see also Case No 1003/2/1/01 *Institute of Independent Insurance Brokers v Director General of Fair Trading* [2001] CAT 4, [2001] CompAR 62, para 170.

<sup>159</sup> Cases Nos 1035/1/1/04 and 1041/2/1/04 [2005] CAT 29, [2005] CompAR 99.

<sup>160</sup> [2008] EWHC 1978, [2009] UKCLR 547, upheld on appeal [2009] EWCA Civ 750, [2009] UKCLR 863.

sion that the OFT had failed to demonstrate that the collective selling of broadcasting rights to horseracing events by racecourse owners had an anti-competitive effect: in particular the Tribunal considered that the OFT had proceeded on the basis of a ‘somewhat shifting, hypothetical counterfactual situation’<sup>161</sup>.

In *Bookmakers* the Court of Appeal considered that there was a ‘strong analogy’ with the *Racecourse Association* case: in each there was a need for the purchaser of rights granted by racecourses to acquire a ‘critical mass’ of them and, in practice, it would be very difficult to acquire those rights on the basis of individual negotiation with each racecourse owner. In particular in *Bookmakers* the Court held that the racecourses’ collaboration, which meant that they could not sell their rights to licensed betting offices individually, did not have an anti-competitive effect because they arose in the context of a desire by them to create a second distributor of media rights in a market in which there had previously been only one undertaking, which was itself owned by the bookmakers. The Court of Appeal also accepted that the restrictions on the racecourses should be treated as ancillary restraints within the concept of ‘objective necessity’ articulated by the General Court in *Métropole télévision v Commission*<sup>162</sup> as they were necessary to enable the creation of a second distributor in the market. In *Pirtek (UK) Ltd v Joinplace Ltd*<sup>163</sup> the High Court reached a similar conclusion, that a post-term non-compete obligation in a franchise agreement was necessary and objectively justified to protect know-how.

### (viii) Appreciability

The Chapter I prohibition (and Article 101 TFEU) applies only where an agreement brings about an *appreciable* restriction of competition. In determining whether an agreement has an appreciable effect the OFT has said<sup>164</sup> that it will have regard to the European Commission’s approach as set out in the *Notice on Agreements of Minor Importance*<sup>165</sup>. Essentially that *Notice* states that agreements between actual or potential competitors do not appreciably restrict competition where the parties’ market shares are below 10 per cent and that agreements between undertakings that are not actual or potential competitors do not do so where both parties’ market share is below 15 per cent: however the *Notice* does not apply in the case of ‘hard-core’ restrictions of competition such as horizontal price fixing, market sharing and output restriction, nor to vertical agreements, for example to fix minimum prices or to restrict passive sales<sup>166</sup>. The OFT would not impose financial penalties on undertakings that have relied in good faith on the Commission’s *Notice*<sup>167</sup>. The fact that an agreement exceeds the thresholds of the Commission’s *Notice* does not mean, in itself, that any restriction of competition is appreciable: such a finding would require further analysis, in particular to determine how much market power the parties to the agreement possess<sup>168</sup>.

<sup>161</sup> [2008] EWHC 1978, [2009] UKCLR 547, paras 177–202.

<sup>162</sup> Case T-112/99 [2001] ECR II-2459, [2001] 5 CMLR 1236: ancillarity is discussed at paras 469–474 and 496 of the High Court’s judgment and paras 111–123 of the Court of Appeal’s judgment.

<sup>163</sup> [2010] EWHC 1641, [2010] UKCLR 1297.

<sup>164</sup> *Agreements and concerted practices*, OFT 401, para 2.18.

<sup>165</sup> OJ [2001] C 368/13; see ch 3, ‘The Commission’s *Notice on Agreements of Minor Importance*’, pp 140–143.

<sup>166</sup> See para 11 of the *Notice*.

<sup>167</sup> *Agreements and concerted practices*, OFT 401, para 2.19.

<sup>168</sup> *Ibid*, para 2.20.

In *GISC*<sup>169</sup> the CAT held that the rule of GISC prohibiting insurer members from dealing with intermediaries who were not themselves members of GISC resulted in an appreciable restriction of competition<sup>170</sup>. In *Construction Recruitment Forum* the OFT considered that the ‘single overall agreement’, comprising price fixing and a collective boycott, was capable of appreciably restricting competition, but also noted that the parties’ market shares exceeded the thresholds in the Commission’s *de minimis* Notice<sup>171</sup>. In *P&S Amusements Ltd v Valley House Leisure Ltd*<sup>172</sup> the High Court concluded that there was no prospect of it being found that a beer tie in a lease of a public house in Blackpool would be found to have as its effect an appreciable restriction of competition<sup>173</sup>. In *North Midland Construction plc v OFT*<sup>174</sup> the CAT confirmed the OFT’s finding that an instance of cover pricing had an appreciable impact on competition<sup>175</sup>.

### (ix) Applicable law and territorial scope

Where the OFT intends to take action in relation to an agreement that it considers may be anti-competitive it must decide whether to do so on the basis of the Chapter I prohibition alone or whether it should also proceed under Article 101 TFEU. Where an agreement may affect trade between Member States Article 3(1) of Regulation 1/2003 requires it to apply Article 101<sup>176</sup>. The OFT will have regard to the European Commission’s *Guidelines on the Effect on Trade Concept contained in Articles [101 and 102 TFEU]*<sup>177</sup> when considering whether an agreement might infringe Article 101 TFEU.

As far as the Chapter I prohibition is concerned, this applies only where trade *within the UK* is affected. The OFT has said that its focus will be on whether an agreement appreciably restricts competition within the UK since, if it does so, it will also affect trade there<sup>178</sup>. The CAT has held that the requirement that there should be an effect on trade within the UK does not require that that effect should be appreciable<sup>179</sup>. Its reasoning was that in EU law the requirement of an appreciable effect on trade was a jurisdictional rule to demarcate the respective spheres of application of EU and domestic competition law, and that there was no need to transcribe that reasoning to a purely domestic context. However the Chancellor of the High Court felt ‘considerable misgivings’ as to whether the CAT was correct on this point in *P&S Amusements Ltd v Valley House Leisure Ltd*<sup>180</sup>; Briggs J shared the Chancellor’s reservations in *Pirtek (UK) Ltd v Joinplace Ltd*<sup>181</sup>.

<sup>169</sup> Case No 1003/2/1/01 [2001] CAT 4, [2001] CompAR 62; for discussion of appreciability in a vertical case see *Independent Media Support Ltd/BBC Broadcast* OFCOM decision of 30 May 2007 [2007] UKCLR 1357, paras 8.1–8.25, upheld on appeal [2008] CAT 13, [2008] CompAR 161; permission to appeal was refused [2008] EWCA Civ 1402.

<sup>180</sup> [2006] EWHC 1510, [2006] UKCLR 867, paras 21, 22 and 34.

<sup>181</sup> [2010] EWHC 1641, paras 61–67, in particular at para 62.

**(B) Section 2(2): illustrative list**

Section 2(2) provides that:

Subsection (1) applies, in particular, to agreements, decisions or practices which—

- (a) directly or indirectly fix purchase or selling prices or any other trading conditions;
- (b) limit or control production, markets, technical development or investment;
- (c) share markets or sources of supply;
- (d) apply dissimilar conditions to equivalent transactions with other trading parties, thereby placing them at a competitive disadvantage;
- (e) make the conclusion of contracts subject to acceptance by the other parties of supplementary obligations which, by their nature or according to commercial usage, have no connection with the subject of such contracts.

This list, which exemplifies the sorts of agreement which would infringe section 2(1), is identical to the list in Article 101(1) TFEU. However it is important to stress that Article 101(1) has been applied to many other agreements that are *not* explicitly mentioned in the list, and that the same is true in the case of the Chapter I prohibition. For example an exchange of information between competitors in relation to future prices falls within Article 101(1)<sup>182</sup>, although there is no specific reference to information exchanges in the Article itself<sup>183</sup>. This is because the list is merely illustrative and in each case the critical issue is whether the agreement has as its object or effect the restriction of competition. The OFT's *Guideline Agreements and concerted practices* sets out numerous examples of agreements that could infringe the Chapter I prohibition at paragraphs 3.3 to 3.27; these will be examined further in chapter 13 on cartels and hard-core restrictions of competition<sup>184</sup>.

Section 2(2)(d) and (e) suggest that agreements to discriminate and tie-ins may amount to infringements of Article 101 or the Chapter I prohibition. It is fair to point out, however, that in the history of the application of Article 101 by the Commission there have been few cases under Article 101(1)(d) and (e). Discrimination and tie-ins are matters which usually give rise to concern in competition law only where there is significant market power on the part of the party which is practising discrimination or which is imposing the tie. For this reason these phenomena are usually investigated, if at all, under Article 102 rather than under Article 101<sup>185</sup>.

**(C) Section 2(3): extraterritorial application**

The extraterritorial scope of the Act is considered in chapter 12<sup>186</sup>.

**(D) Section 2(4): voidness**

Section 2(4) provides that:

Any agreement or decision which is prohibited by subsection (1) is void.

This mirrors Article 101(2) TFEU. The possibility that agreements may be void is of considerable significance: for many firms it is the possibility that their agreements may turn

<sup>182</sup> Case C-8/08 [2009] ECR I-4529, [2009] 5 CMLR 1701, para 93.

<sup>183</sup> Another example would be restrictions imposed on advertising; see *Lladró Comercial*, OFT decision of 31 March 2003 [2003] UKCLR 652, paras 68–71.

<sup>184</sup> See ch 13, 'UK Law', pp 552–558.

<sup>185</sup> See ch 18, 'Price Discrimination', pp 759–764 and ch 17, 'Tying', pp 688–696.

<sup>186</sup> See ch 12, 'Competition Act 1998', pp 501–502.

out to be unenforceable that has as much, and in many cases more, significance than the possibility of being fined. A considerable compliance effort has to be maintained in order to ensure that important commercial transactions will not be undermined by one or more parties to an agreement subsequently reneging on it and claiming it to be unenforceable. These issues are considered in chapter 8<sup>187</sup>. A couple of points are worthy of mention here.

### (i) Severance<sup>188</sup>

Section 2(4) provides that ‘any agreement’ which violates section 2(1) is void. It does not say that the voidness might relate only to the provisions in the agreement that violate the Chapter I prohibition, nor does it say anything about the consequence of such voidness on the remaining provisions of the agreement. However, despite the clear wording of both section 2(4) and Article 101(2) TFEU that the agreement is void, it has been established by the Court of Justice that it may be possible to sever the offending clauses, leaving the remainder of the agreement enforceable<sup>189</sup>. The intention is that the courts in the UK should interpret section 2(4) in the same way as the Court of Justice has interpreted Article 101(2)<sup>190</sup>, and this will be possible by virtue of section 60 of the Act.

English contract law provides that severance is possible in certain circumstances, although the rules on this subject are complex<sup>191</sup>. It is a matter for the applicable law of the contract, rather than the *lex fori* of the court in which the action is brought, to determine whether, and, if so, by what criteria, severance is to be effected<sup>192</sup>.

### (ii) Void or illegal?

In *Gibbs Mew plc v Gemmell*<sup>193</sup> the Court of Appeal concluded that an agreement that infringes Article 101(1) is not only void and unenforceable, but is also illegal. This has serious consequences: for example a party who has paid money to another under an illegal agreement cannot recover that money unless it can be shown that the parties were not *in pari delicto*<sup>194</sup>. In *Crehan v Courage Ltd*<sup>195</sup>, a case concerning Article 101 TFEU referred to the Court of Justice by the Court of Appeal under Article 267 TFEU, the Court held that it would be contrary to the effective application of Article 101 for national law to impose an absolute bar on an action by one party to an agreement that restricts competition against another party to it<sup>196</sup>; however, EU law does not prevent national law from denying a party who has significant responsibility for the restriction of competition the right to obtain damages from the other contracting party<sup>197</sup>. The principles in *Courage Ltd v Crehan* would presumably be applied in a case concerning section 2(4) of the Competition Act, pursuant to the governing principles clause in section 60 of the Competition Act<sup>198</sup>.

<sup>187</sup> See also Whish ‘The Enforceability of Agreements under EC and UK Competition Law’ in *Lex Mercatoria: Essays on International Commercial Law in Honour of Francis Reynolds* (LLP, 2000, ed Rose).

<sup>188</sup> See generally ch 8, ‘Severance’, pp 322–323.

<sup>189</sup> *Ibid.* <sup>190</sup> HL Report Stage, 9 February 1998, col 890.

<sup>191</sup> See *Chitty on Contracts* (Sweet & Maxwell, 30th ed, 2008, ed Beale), paras 16.194–16.203.

<sup>192</sup> See Regulation 593/2008 of the European Parliament and of the Council on the law applicable to contractual obligations OJ [2008] L 177/6; *Dacey Morris & Collins on the Conflict of Laws* (Sweet & Maxwell, 14th ed, 2006), chs 32 and 33.

<sup>195</sup> Case C-453/99 [2001] ECR I-6297, [2001] 5 CMLR 1058; for discussion of *Crehan* see ch 8, ‘*Courage Ltd v Crehan*’, pp 298–299.

<sup>196</sup> [2001] ECR I-6297, [2001] 5 CMLR 1058, para 28. <sup>197</sup> *Ibid.*, paras 31–33.

<sup>198</sup> On s 60 of the Act, see ‘“Governing Principles Clauses”: Section 60 of the Competition Act 1998’, pp 369–374 below.

**(iii) Transient voidness**

In *Passmore v Morland plc*<sup>199</sup> the Court of Appeal held that an agreement may, in its lifetime, drift into and out of unlawfulness under Article 101(1), and therefore be void and unenforceable at some times but not at others. The same presumably will be true of section 2(4) of the Competition Act.

**(E) Sections 2(5) and 2(6): interpretation**

These provisions explain that, except where the context otherwise requires, any reference in the Act to an agreement includes a reference to a concerted practice and a decision by an association of undertakings.

**(F) Section 2(7): the UK**

Section 2(7) provides that “the UK” means, in relation to an agreement which operates or is intended to operate only in a part of the UK, that part<sup>200</sup>. The UK for this purpose includes England, Wales, Scotland plus the subsidiary islands (excluding the Isle of Man and the Channel Islands) and Northern Ireland.

**(G) Section 2(8): the ‘Chapter I prohibition’**

Section 2(8) provides that:

The prohibition imposed by subsection (1) is referred to in this Act as ‘the Chapter I prohibition’.

The expression ‘the Chapter I prohibition’ is therefore a legislative one, and is mirrored by section 18(4) which recognises the companion ‘Chapter II prohibition’.

**(H) The Chapter I prohibition: excluded agreements**

Section 3 provides for a number of exclusions from the Chapter I prohibition. Some, but not all, of these exclusions apply also in the case of the Chapter II prohibition<sup>201</sup>. Section 50 provides for the possibility of vertical and land agreements to be excluded. Vertical and land agreements were excluded from 1 March 2000 to 1 May 2005 in the case of vertical agreements and 6 April 2011 in the case of land agreements, after which they must be assessed under the Chapter I prohibition in the same way as any other type of agreement<sup>202</sup>. Section 59(2) provides that if the effect of one or more exclusions is that the Chapter I prohibition is inapplicable to one or more provisions of an agreement, those provisions do not have to be disregarded when considering whether the agreement itself infringes the prohibition for other reasons. In other words, the effect of the agreement as a whole can be considered.

Section 3(1) provides that the Chapter I prohibition does not apply in any of the cases in which it is excluded by or as a result of Schedule 1 on mergers and concentrations; Schedule 2 on competition scrutiny under other enactments; and Schedule 3 on

<sup>199</sup> [1999] 3 All ER 1005, [1999] 1 CMLR 1129; see ch 8, ‘Transient voidness’, p 323.

<sup>200</sup> See eg *Arriva/First Group* OFT decision of 5 February 2002, [2002] UKCLR 322, paras 44–45.

<sup>201</sup> See ‘Exclusions’, p 369 below.

<sup>202</sup> See ‘Section 50: vertical agreements’ and ‘Section 50: land agreements’, p 356 below and ch 16, ‘Vertical agreements under the Competition Act 1998’, pp 678–680.

planning obligations and other general exclusions. Schedule 4, which excluded from the Competition Act 1998 the regulatory rules of various professions, was repealed by section 207 of the Enterprise Act 2002. The regulatory rules of the legal profession are subject to competition scrutiny under sections 57 to 61 of the Legal Services Act 2007. Section 3(2) to (5) of the Competition Act makes provision for the Secretary of State to amend Schedules 1 and 3 in certain circumstances, whether by adding additional exclusions or by amending or removing existing ones<sup>203</sup>. Section 3(6) notes that Schedule 3 itself enables the Secretary of State in certain circumstances to exclude agreements from the Chapter I prohibition<sup>204</sup>.

### (i) Schedule 1: mergers and concentrations

Schedule 1 to the Competition Act deals with the application of the Chapter I and Chapter II prohibitions to mergers and concentrations. The basic policy of the Schedule is that the prohibitions will not apply to mergers under the Enterprise Act nor to concentrations in respect of which the European Commission has exclusive jurisdiction under the EU Merger Regulation ('the EUMR')<sup>205</sup>. The exclusion in Schedule 1 is automatic and does not require an application to the OFT.

#### (A) *Relationship of the Chapter I and Chapter II prohibitions with UK merger control*<sup>206</sup>

Schedule 1, paragraph 1(1) provides that the Chapter I prohibition does not apply to an agreement or combination of agreements which results or would result in any two enterprises 'ceasing to be distinct enterprises' for the purposes of Part 3 of the Enterprise Act<sup>207</sup>. The exclusion applies to any transaction whereby enterprises cease to be distinct, irrespective of whether there is a 'relevant merger situation' capable of being investigated under the Enterprise Act<sup>208</sup>. If this were otherwise the Competition Act would have revolutionised the control of mergers in the UK by bringing all those transactions that are not subject to the Enterprise Act, because they fall below the relevant thresholds, within the scope of the 1998 Act, which would be an absurdity.

Schedule 1, paragraph 1(2) provides in addition that the exclusion of the Chapter I prohibition extends to 'any provision directly related and necessary to the implementation of the merger provisions': this means that 'ancillary restrictions' also fall outside the Chapter I prohibition. To be ancillary the restriction must be both 'directly related [to]' and 'necessary to the implementation of' the merger provisions. The OFT has said that it will generally follow the European Commission's approach as set out in the *Notice on restrictions directly related and necessary to concentrations*<sup>209</sup>. Ancillary restrictions include, for example, appropriately limited non-compete clauses, licences of intellectual property rights and know-how and purchase and supply agreements. The OFT will

<sup>203</sup> This order-making power is subject to s 71 of the Act, which requires an affirmative resolution of each House of Parliament.

<sup>204</sup> See 'Public policy', p 354 below on Sch 3, para 7.

<sup>205</sup> Council Regulation 139/2004, OJ [2004] L 24/1.

<sup>206</sup> See *Mergers – Jurisdictional and procedural guidance*, OFT 527, June 2009, paras 4.79–4.82.

<sup>207</sup> For the meaning of 'ceasing to be distinct' see s 26 Enterprise Act 2002 and ch 22, 'Enterprises ceasing to be distinct', pp 919–927; the UK exclusion is wider than the disapplication of Article 101 to concentrations in the EU, effected by Article 21(1) of the EUMR, since 'ceasing to be distinct' is a broader concept than that of a concentration under Article 3(2) of the EUMR: see ch 22, 'Enterprises ceasing to be distinct', pp 919–921; see also HL Third Reading, 5 March 1998, col 1365 (Lord Simon of Highbury).

<sup>208</sup> See ch 22, 'Relevant merger situations', pp 918–923.

<sup>209</sup> OJ [2005] C 56/24; see ch 21, 'Contractual restrictions directly related and necessary to a merger: "ancillary restraints"', pp 882–884.

not normally state in a clearance decision which restrictions are ancillary<sup>210</sup>; it will provide guidance only in the case of a novel or unresolved questions giving rise to genuine uncertainty<sup>211</sup>.

### **(B) Newspaper mergers**

Schedule 1, paragraph 3 to the Competition Act as originally drafted provided the same exclusion from the Chapter I prohibition for newspaper mergers as defined in section 57 of the Fair Trading Act 1973, and any ancillary restraints; however section 57 was repealed by the Communications Act 2003<sup>212</sup>.

### **(C) Clawback**

Schedule 1, paragraph 4 provides for the possibility of ‘withdrawal of the paragraph 1 exclusion’ by the OFT. The ‘clawback’ provision applies only to the Chapter I prohibition<sup>213</sup>; it does not apply to the Chapter II prohibition. Paragraph 4(5) therefore provides that the OFT may, by a direction in writing<sup>214</sup>, remove the benefit of the exclusion where it considers that (a) an agreement would, if not excluded, infringe the Chapter I prohibition; and (b) the agreement is not a protected agreement<sup>215</sup>. These provisions will be exercised only rarely.

### **(D) Protected agreements**

The OFT cannot exercise the right of clawback in relation to a ‘protected agreement’. The Act defines four categories of protected agreement. First, an agreement in relation to which the OFT or Secretary of State, as the case may be, has published its or his decision not to make a reference to the CC; the OFT cannot override the decision not to refer a merger under the Enterprise Act by seeking to apply the Competition Act 1998. Secondly, an agreement in relation to which the CC has found there to be a relevant merger situation. Thirdly, an agreement that would result in enterprises ceasing to be distinct in the sense of section 26 of the Enterprise Act, other than as a result of subsections (3) and (4)(b) of that section<sup>216</sup>. Fourthly, an agreement which the CC has found gives rise to a merger in the sense of section 32 of the Water Industry Act 1991.

### **(E) Relationship of the Chapter I and Chapter II prohibitions with EU merger control<sup>217</sup>**

Paragraph 6 of Schedule 1 provides that the Chapter I prohibition does not apply to concentrations which have a Community dimension. This provision is necessary in order to comply with Article 21(3) of the EUMR<sup>218</sup>; it provides that no Member State may apply its national legislation on competition to any concentration that has a Community dimension, since the European Commission has exclusive jurisdiction in such cases. Paragraph 6 does not mention ancillary restraints specifically, but since they are deemed to be cleared

<sup>210</sup> *Mergers – Jurisdictional and procedural guidance*, OFT 527, June 2009, para 4.81.

<sup>211</sup> *Ibid*, para 4.82.

<sup>212</sup> See ch 22, ‘Public interest cases’, pp 956–958.

<sup>213</sup> See the statement of Lord Simon before the HL Committee, 13 November 1997, col 328.

<sup>214</sup> Competition Act 1998, Sch 3, para 4(7)(a); the direction cannot be retrospective: see para 4(7)(b).

<sup>215</sup> *Ibid*, Sch 3, para 5; on protected agreements see below.

<sup>216</sup> See above.

<sup>217</sup> See the joint OFT and CC *Merger Assessment Guidelines* CC2 (Revised) OFT 1254, September 2010, paras 1.13–1.18; on the EUMR generally see ch 21.

<sup>218</sup> For an interpretation of Article 21(3) of the EUMR see Case No 1174/4/1/11 *Ryanair Holdings plc v OFT* [2011] CAT 23, paras 68–130; see further ch 21, ‘The benefits of one-stop merger control’, pp 844–845.

by a Commission decision permitting a concentration it presumably follows that Member States cannot take action in relation to them<sup>219</sup>.

**(F) No clawback**

Since Schedule 1, paragraph 6 deals with matters that are within the exclusive jurisdiction of the European Commission, it follows that the OFT does not in this situation enjoy a right of clawback as it does under paragraph 4 in relation to mergers that are subject to the Enterprise Act 2002.

**(ii) Schedule 2: competition scrutiny under other enactments<sup>220</sup>**

Schedule 2 excludes agreements which are subject to ‘competition scrutiny’ under some other piece of legislation: the Government explained during the passage of the Competition Bill that, in so far as particular agreements are subject to competition scrutiny under regimes constructed to deal with the circumstances of specific sectors, it is inappropriate to subject them to the Chapter I prohibition as well, as ‘that would just create an unwelcome and unjustified double jeopardy’<sup>221</sup>.

**(A) Communications Act 2003**

Section 293 of the Communications Act 2003 requires that the Office of Communications (‘OFCOM’) periodically should review the ‘networking arrangements’ between Independent Television Ltd and the 13 regional Channel 3 licensees, including an assessment of their effect on competition. OFCOM has conducted annual reviews of these arrangements since 2005<sup>222</sup>.

**(B) Financial Services and Markets Act 2000<sup>223</sup>**

This Act established the Financial Services Authority (‘the FSA’) with the regulatory objectives of achieving market confidence, public awareness, the protection of consumers and the reduction of financial crime<sup>224</sup>. Section 95 makes provision for the Treasury, by order, to establish competition scrutiny of the FSA in relation to the official listing of securities. Sections 159 to 163 provide for competition scrutiny in relation to regulating provisions and practices adopted by the FSA. The OFT must keep them under review and may report on provisions and practices having a significant adverse effect on competition<sup>225</sup>. Where the OFT makes a report to this effect, the CC will investigate the matter further<sup>226</sup>. Where the CC’s report is adverse, the Treasury is given power to give directions, although it is not always bound to do so<sup>227</sup>. Section 164 provides for exclusion from both the Chapter I and Chapter II prohibitions for agreements, practices or conduct that are encouraged by any of the FSA’s regulating provisions. Similar provisions are to be found in sections 302 to 312 in relation to recognised investment exchanges and clearing houses. The OFT published a report under section 304(3) of the Financial Services and

<sup>219</sup> See ch 21, ‘Contractual restrictions directly related and necessary to a merger: “ancillary restraints”’, pp 882–884.

<sup>220</sup> Note that the provisions in the Competition Act, as originally enacted, excluding the supervision and qualification of auditors (Sch 2, paras 2 and 3) and of certain environmental matters (Sch 2, para 6) from the Chapter I prohibition, were repealed by the Competition Act 1998 and Other Enactments (Amendment) Regulations 2004, SI 2004/1261.

Markets Act 2000 in July 2004 into the issuer fees of the London Stock Exchange; this investigation led to a significant reduction of earlier fee increases<sup>228</sup>. The OFT has agreed a *Memorandum of Understanding* with the FSA which records the basis on which they will cooperate on financial services matters<sup>229</sup>.

**(C) Legal Services Act 2007**

Sections 57 to 61 of this legislation make provision for competition scrutiny of the regulatory rules of the legal profession by the OFT and the CC.

**(D) No power to amend Schedule 2**

There is no power to amend Schedule 2. Section 3 of the Competition Act provides the power to amend only in relation to Schedule 1 and Schedule 3.

**(iii) Schedule 3: planning obligations and other general exclusions**

Schedule 3 is entitled ‘General Exclusions’ and sets out various matters that are excluded, some of which are of considerable importance.

**(A) Planning obligations**

Paragraph 1 of Schedule 3 provides that the Chapter I prohibition does not apply to agreements involving planning obligations, for example where planning permission is given subject to the developer agreeing to provide certain services or access to facilities<sup>230</sup>.

**(B) Section 21(2) Restrictive Trade Practices Act 1976**

Paragraph 2 of Schedule 3 provided that agreements that were the subject of directions under section 21(2) of the Restrictive Trade Practices Act 1976 were excluded from the Chapter I prohibition; however this provision was repealed with effect from 1 May 2007<sup>231</sup>.

**(C) EEA regulated markets**

Paragraph 3 of Schedule 3 provides that the Chapter I prohibition does not apply to various matters concerning ‘EEA regulated [financial services] markets’. This expression is defined in paragraph 3(5) as meaning a market which is listed by another EEA State<sup>232</sup> and which does not require a dealer on the market to have a presence where trading facilities are provided or on any other trading floor of that market.

**(D) Services of general economic interest**

Paragraph 4 of Schedule 3 provides that neither the Chapter I nor the Chapter II prohibition shall apply to an undertaking:

entrusted with the operation of services of general economic interest or having the character of a revenue-earning monopoly in so far as the prohibition would obstruct the performance, in law or in fact, of the particular tasks assigned to it.

This important provision is modelled upon Article 106(2) TFEU<sup>233</sup>, although the language of the Schedule is somewhat less tortuous than that to be found in the Treaty.

<sup>228</sup> Available at [www.ofc.gov.uk](http://www.ofc.gov.uk).

<sup>229</sup> Available at [www.ofc.gov.uk](http://www.ofc.gov.uk).

<sup>230</sup> See Town and Country Planning Act 1990, s 106.

<sup>231</sup> Competition Act 1998 and Other Enactments (Amendment) Regulations 2004, SI 2004/1261, reg 4, Sch 1, para 50a; for a discussion of s 21(2) of the Restrictive Trade Practices Act see vol 47 of *Halsbury’s Laws of England*, para 269.

<sup>232</sup> Pursuant to Article 16 of Council Directive 93/22/EEC, OJ [1993] L 141/27.

<sup>233</sup> See ch 6, ‘Article 106(2)’, pp 235–242.

The OFT has published *Services of general economic interest exclusion*<sup>234</sup> containing important guidance on this provision. The OFT will interpret the exclusion strictly<sup>235</sup>. The guidance notes that, as various public-sector activities become exposed to competition or economic regulation, it is possible that certain functions that once might have been considered to be administrative or social become regarded as economic; this can have the result that an entity engaged in those activities might come to be regarded as an undertaking, and therefore fall within the purview of competition law<sup>236</sup>. The guidance discusses what is meant by the notion of ‘entrusting’ an undertaking with performance of services<sup>237</sup>; it also considers the meaning both of ‘services’<sup>238</sup> and of ‘general economic interest’<sup>239</sup>. In *Pool Reinsurance Co Ltd* the OFT was not satisfied that the scheme of terrorism reinsurance for commercial property related to services of general economic interest<sup>240</sup>.

The OFT’s guidance notes that in a number of EU cases Article 106(2) has been held to be applicable where an undertaking was subject to a universal service obligation and needed to be protected from ‘cream-skimming’ or ‘cherry-picking’<sup>241</sup>. However it also notes that in the UK the combined effect of privatisation, liberalisation and EU initiatives has been that the number of exclusive rights held by undertakings has been significantly reduced<sup>242</sup>. The OFT’s view is that, in general, effective competition will best serve the interests of consumers over time, which is why it will interpret the exclusion narrowly. The OFT’s guidance concludes by saying that it is unlikely that there are any ‘revenue-earning monopolies’ of the kind referred to in Schedule 3, paragraph 4 in the UK<sup>243</sup>.

The OFT has published specific guidance on the exclusion of services of general economic interest within the energy and railway sectors<sup>244</sup>.

### (E) Compliance with legal requirements

Paragraph 5 of Schedule 3 provides that neither the Chapter I nor the Chapter II prohibition applies to an agreement or to conduct that is required to comply with a legal requirement. For this purpose a legal requirement is one imposed by or under any enactment in force in the UK, by or under the TFEU or the EEA Agreement and having legal effect in the UK without further enactment, or under the law in force in another Member State having legal effect in the UK. An example of the operation of this exclusion occurred in the case of *Vodafone*<sup>245</sup>, in which OFCOM accepted that Vodafone had printed prices on its ‘pre-pay mobile phone vouchers’ in order to comply with a licence condition; it followed that Vodafone could not be found guilty of infringing the Chapter I prohibition<sup>246</sup>. OFCOM subsequently removed the price publication requirement from Vodafone’s licence, so that the exclusion no longer applied. Similarly an undertaking could not be found liable under the Act where it had done something required, for example, by a Commission Directive adopted under Article 106(3) TFEU<sup>247</sup>.

The exclusion in paragraph 5 of Schedule 3 applies only where the regulated undertaking is required to act in a certain way; it does not apply to the discretionary behaviour of that undertaking. In *Re-investigation of a complaint from VIP Communications Ltd*<sup>248</sup>

<sup>234</sup> OFT 421, December 2004.

<sup>245</sup> OFTEL decision of 5 April 2002.      <sup>246</sup> *Ibid*, para 4.7.

<sup>247</sup> See ch 6, ‘Article 106(3)’, pp 242–244.

<sup>248</sup> OFCOM decision of 28 June 2005 [2005] UKCLR 914, appeal rejected in Case No 1027/2/3/04 *VIP Communications Ltd (in administration) v OFCOM* [2009] CAT 28, [2010] UKCLR 13.

OFCOM considered that T-Mobile was able to rely on Schedule 3, paragraph 5 in refusing to supply certain services to VIP Communications in circumstances where it knew that VIP would use those services in order to act unlawfully in violation of the Wireless Telegraphy Act 1949: OFCOM considered that T-Mobile was required by law to desist from conduct that would result in illegal behaviour<sup>249</sup>.

In *Albion Water Ltd* the CAT disagreed with the view of the Regulation Authority Water Services<sup>250</sup> that the new provisions of the Water Industry Act 1991 constituted a legal requirement for the purposes of Schedule 3, paragraph 5(3)<sup>251</sup>.

#### (F) *Avoidance of conflict with international obligations*

Paragraph 6(1) of Schedule 3 gives to the Secretary of State the power to make an order to exclude the application of the Chapter I prohibition from an agreement or a category of agreements where this would be appropriate in order to avoid a conflict between the provisions of the Competition Act and an international obligation of the UK. The order can provide that the exclusion shall apply only in specified circumstances<sup>252</sup> and may be retrospective<sup>253</sup>. Similar provisions are contained in Schedule 3, paragraph 6(4) and (5) for exclusion from the Chapter II prohibition. Schedule 3 paragraph 6(6) was introduced in the House of Lords as a Government amendment to extend the meaning of the term ‘international obligation’ to include inter-governmental arrangements relating to civil aviation: the reason for this is that such arrangements, permitting flights between the UK and other countries, are often not made as treaties<sup>254</sup> and so do not give rise to international ‘obligations’ as such.

#### (G) *Public policy*

Paragraph 7 of Schedule 3 gives power to the Secretary of State to make an order to exclude the application of the Chapter I prohibition from an agreement or a category of agreements where there are ‘exceptional and compelling reasons of public policy’ for doing so. The order can provide that the exclusion shall apply only in specified circumstances<sup>255</sup>, and may be retrospective<sup>256</sup>. Similar provisions are contained in paragraph 7(4) and (5) of Schedule 3 for exclusion from the Chapter II prohibition. Three orders have been made under paragraph 7 in relation to the defence industry<sup>257</sup>. The TFEU provides a specific exclusion from the competition rules for certain matters related to defence in Article 346 TFEU, but there are no specific exclusions for this area from the Competition Act.

#### (H) *Coal and steel*

Paragraph 8 of Schedule 3 provides that the Chapter I and Chapter II prohibitions do not apply to agreements and conduct within the exclusive jurisdiction of the European Commission under the European Coal and Steel Treaty. These exclusions ceased to have effect when the ECSC Treaty expired on 23 July 2002<sup>258</sup>.

<sup>249</sup> *Ibid*, para 205.      <sup>250</sup> Decision of 26 May 2004 [2004] UKCLR 1973, paras 23–24.

<sup>251</sup> Case No 1046/2/4/04 *Albion Water Ltd v Water Services Regulation Authority* [2006] CAT 23, [2007] CompAR 22, paras 931 and 978.

<sup>252</sup> Competition Act, Sch 3, para 6(2).      <sup>253</sup> *Ibid*, Sch 3, para 6(3).

<sup>254</sup> HL Deb 9 February 1998, cols 972–973.      <sup>255</sup> Competition Act, Sch 3 para 7(2).

<sup>256</sup> *Ibid*, Sch 3, para 7(3).

<sup>257</sup> Competition Act 1998 (Public Policy Exclusion) Order 2006, SI 2006/605 (maintenance and repair of warships); Competition Act 1998 (Public Policy Exclusion) Order 2007, SI 2007/1896 (strategic and tactical weapons and their supporting technology); Competition Act 1998 (Public Policy Exclusion) Order 2008, SI 2008/1820 (design, construction, maintenance and disposal of nuclear submarines).

<sup>258</sup> Competition Act, Sch 3, para 8(2) and (4); see ch 23, ‘Coal and Steel’, p 967.

**(i) Agricultural products**

Paragraph 9 of Schedule 3 provides exclusion from the Chapter I prohibition for agreements that fall outside Article 101 TFEU by virtue of Regulation 1184/2006<sup>259</sup>. If the European Commission decides that an agreement is not excluded from Article 101 by Regulation 1184/2006, the exclusion from paragraph 9 of Schedule 3 ceases on the same date<sup>260</sup>. Provision is made for clawback<sup>261</sup>.

**(iv) Professional rules**

When the Competition Act 1998 was passed, paragraph 1(1) of Schedule 4 provided that the Chapter I prohibition did not apply to designated professional rules. The Government felt that professional rules which served to protect the public, which contained disciplinary arrangements and which were liable to judicial review should be excluded<sup>262</sup>. Following a detailed review of the level of competition in the professions<sup>263</sup> the OFT concluded that there was a strong case for repealing Schedule 4 to the Competition Act 1998, a view with which the Secretary of State agreed<sup>264</sup>. Section 207 of the Enterprise Act 2002 repealed Schedule 4 with effect from 1 April 2003. The application of the Chapter I prohibition to professional rules must now be considered in the light of the judgment of the Court of Justice in *Wouters*<sup>265</sup>, where it held that certain restrictions of competition might fall outside Article 101 TFEU in so far as they are necessary for the proper practice of a profession.

The OFT has established a dedicated team for reviewing the conditions of competition in the markets for professional services<sup>266</sup>. The OFT's work in this area was usefully reviewed in a speech by its chairman in September 2006<sup>267</sup>. Following a super-complaint from the consumer organisation Which? in May 2007 the OFT made recommendations to the Scottish executive in July 2007 that various restrictions imposed on the providers of legal services in Scotland should be lifted<sup>268</sup>. The Scottish executive accepted some of the OFT's recommendations, and in November 2010 the Scottish Parliament enacted the Legal Services (Scotland) Act with a view to liberalising the legal services market in Scotland. In England and Wales the Legal Services Act 2007 provides for competition scrutiny of the regulatory rules of the legal profession<sup>269</sup>. In January 2011 the OFT announced that the Bar Council of Northern Ireland had agreed to amend its Code of Conduct to remove restrictions of access to justice<sup>270</sup>.

<sup>270</sup> OFT Press Release 02/11, 5 January 2011.

**(v) Section 50: vertical agreements**<sup>271</sup>

Section 50 of the Act makes provision for the exclusion or exemption of vertical agreements from the Chapter I, but not the Chapter II, prohibition. This was effected, except in relation to vertical price fixing, by the Competition Act 1998 (Land and Vertical Agreements Exclusion) Order 2000<sup>272</sup>. However the adoption of Regulation 1/2003 meant that it was desirable that the treatment of vertical agreements in domestic and EU law should be brought into alignment with one another. As a result of this the exclusion of vertical agreements from the Chapter I prohibition was repealed<sup>273</sup>; however they may enjoy the benefit of the EU block exemption for vertical agreements<sup>274</sup>.

**(vi) Section 50: land agreements**

As the Competition Bill passed through Parliament the Government recognised that there was a compelling case for excluding certain agreements relating to land from the Chapter I, though not the Chapter II<sup>275</sup>, prohibition: an obvious case would be commercial leases containing covenants and conditions imposed for the sake of good estate management<sup>276</sup>. In particular it would be undesirable if there was widespread uncertainty as to whether such covenants and conditions might be rendered void and unenforceable as a result of section 2(4) of the Act. Pursuant to the power in section 50 of the Act the Competition Act 1998 (Land and Vertical Agreements Exclusion) Order 2000 excluded land agreements from the Chapter I prohibition from 1 March 2000 until 30 April 2005<sup>277</sup>; from 1 May 2005 until 5 April 2011 exclusion was effected by the Competition Act 1998 (Land Agreements Exclusion and Revocation) Order 2004<sup>278</sup>. However, following a consultation in 2009<sup>279</sup>, the exclusion was revoked with effect from 6 April 2011 by the Competition Act 1998 (Land Agreements Exclusion Revocation) Order 2010<sup>280</sup>. Anyone concerned with determining whether a land agreement was excluded from the Chapter I prohibition between 1 March 2000 and 5 April 2011 should refer to the 2000 and 2004 statutory instruments, which should be read in conjunction with the OFT's Guideline *Land agreements*<sup>281</sup>.

**(l) The Chapter I prohibition: exemptions****(i) Introduction**

As in the case of Article 101(3) TFEU the Competition Act provides a 'legal exception' to the Chapter I prohibition. The provisions in sections 4 and 5 of the Act whereby the OFT could grant an 'individual exemption' to an agreement notified to it were repealed by the Amendment Regulations of 2004: as in the case of EU law undertakings must conduct a

<sup>271</sup> On vertical agreements generally see ch 16.

<sup>272</sup> SI 2000/310; the application of this exclusion order to the arrangements in *Tobacco* has been raised on appeal to the CAT in Case Nos 1160–1164/1/1/10 etc *Imperial Tobacco Group plc v OFT*, not yet decided.

<sup>273</sup> This was effected by the Competition Act 1998 (Land Agreements Exclusion and Revocation) Order 2004, SI 2004/1260, which repealed SI 2000/310 that had created the exclusion for vertical agreements in the first place.

<sup>274</sup> See ch 16, 'Repeal of the exclusion for vertical agreements', p 678.

<sup>275</sup> On the application of the Chapter II prohibition and Article 102 TFEU to land agreements see *Land agreements*, OFT 12802, March 2011, paras 6.1–6.15.

<sup>276</sup> The registrability of restrictive covenants in commercial leases under the Restrictive Trade Practices Act 1976 was the subject of a test case in *Re Ravenseft Property Ltd's Application* [1978] QB 52, [1977] 1 All ER 47, RPC; on the position of shopping centre leases in Ireland see Maher *Competition Law: Alignment and Reform* (Round Hall Sweet & Maxwell, 1999) pp 430–431.

<sup>280</sup> SI 2010/1709.

<sup>281</sup> OFT 1280a, March 2011; see also the 6th edition of this book, pp 348–350.

self-assessment of whether an agreement that infringes the Chapter I prohibition satisfies the criteria of section 9 of the Act, which mirrors Article 101(3)<sup>282</sup>. Sections 6 and 8 of the Competition Act make provision for the adoption of block exemptions, while section 10 provides for so-called ‘parallel exemption’ where an agreement satisfies one of the EU block exemptions, or would do if it were to affect trade between Member States<sup>283</sup>. Section 11 of the Act, which provided ‘exemptions for other agreements’, and which was primarily concerned with certain agreements in the air transport sector, is now obsolete<sup>284</sup>.

The operation of these provisions will be explained below, after a consideration of the criteria according to which exemption may be available.

## (ii) Exemption criteria

The exemption criteria are set out in section 9(1) of the Competition Act. Exemption is available for any agreement which:

- (a) contributes to—
  - (i) improving production or distribution, or
  - (ii) promoting technical or economic progress, while allowing consumers a fair share of the resulting benefit; but
- (b) does not—
  - (i) impose on the undertakings concerned restrictions which are not indispensable to the attainment of those objectives; or
  - (ii) afford the undertakings concerned the possibility of eliminating competition in respect of a substantial part of the products in question.

The wording of section 9 is very similar to, but not quite identical with, Article 101(3) TFEU. The latter refers to ‘improving the production or distribution of goods’ (emphasis added), but the domestic provision is not so limited, and can therefore be applied to services as well. Section 9(2) of the Act provides that undertakings claiming the benefit of section 9(1) bear the burden of proving that the conditions it contains are satisfied<sup>285</sup>. In applying section 9(1) the OFT has said<sup>286</sup> that it will have regard to the European Commission’s *Guidelines on the application of Article [101(3) TFEU]*<sup>287</sup>. The OFT’s own guidance on *Agreements and concerted practices* does not provide a commentary on the constituent parts of section 9(1)<sup>288</sup>, presumably since this would be likely simply to duplicate what is in the Commission’s *Guidelines*.

There have been only a few applications of section 9(1) by the OFT and the courts in the years since it has been in force. In *LINK Interchange Network Ltd*<sup>289</sup> the OFT granted an ‘individual exemption’ to arrangements that provided for a centrally-set multilateral interchange fee for the operation of the LINK network of automated teller machines, in which the major banks and building societies in the UK participate. The OFT recognised

<sup>282</sup> On self-assessment under Article 101(3) TFEU see ch 4, ‘Self-assessment’, pp 167–168.

<sup>283</sup> On the EU block exemptions see ch 4 ‘Block exemptions’, pp 168–172.

<sup>284</sup> See ch 23, ‘Air transport’, pp 974–977.

<sup>285</sup> This mirrors Article 2 of Regulation 1/2003, OJ [2003] L 1/1: see ch 4, ‘The burden of proving that the conditions of Article 101(3) are satisfied’, pp 152–153.

<sup>286</sup> *Agreements and concerted practices*, OFT 401, December 2004, para 5.5.

<sup>287</sup> OJ [2004] C 101/97; these *Guidelines* are discussed in ch 4, ‘The Commission’s approach in the *Article 101(3) Guidelines*’, pp 160–162.

<sup>288</sup> On the application of the criteria in section 9 to land agreement see the OFT’s *Guideline The application of competition law following the revocation of the Land Agreements Exclusion Order*, OFT 1280a, March 2011, ch 5.

<sup>289</sup> OFT decision of 16 October 2001 [2002] UKCLR 59.

that charging such a fee could lead to an improvement in distribution by preventing one bank from taking a free ride on the investment of others<sup>290</sup>. The OFT considered whether the level of the multilateral interchange fee exceeded the cost of operating the network of cash machines but found that it did not<sup>291</sup>. The OFT granted an individual exemption to the arrangements in question until 16 October 2006; today the parties to such an agreement would have to self-assess the application of section 9(1).

In *MasterCard UK Members Forum Ltd*<sup>292</sup> the OFT concluded that the collective fixing of the interchange fee did not satisfy the requirement in section 9 (and Article 101(3)) of indispensability since it extended to services that were not within the scope of the payment system<sup>293</sup>.

In *Memorandum of Understanding on the supply of oil fuels in an emergency*<sup>294</sup> the OFT granted an individual exemption to an agreement which would improve distribution by enabling the Government to direct supplies of fuel to ‘essential users’ such as providers of emergency services in the event of a fuel shortage<sup>295</sup>. In *Lucite International UK Ltd and BASF plc*<sup>296</sup> the OFT concluded that the restrictions inherent in a long-term agreement for the supply of hydrogen cyanide were indispensable because they helped solve the ‘hold-up problem’ that may occur when one party is required to invest in client-specific investment<sup>297</sup>. In *Pool Reinsurance Co Ltd*<sup>298</sup> the OFT concluded that rules designed to provide reinsurance against acts of terrorism in the UK restricted competition but satisfied the conditions of section 9. In *Association of British Insurers’ General Terms of Agreement*<sup>299</sup> the OFT considered that, if certain provisions of the General Terms of Agreement were amended, it might satisfy section 9. The decision was set aside on appeal to the CAT<sup>300</sup>. The OFT subsequently decided to close the file since the case did not constitute an administrative priority<sup>301</sup>.

In *Newspapers and magazine distribution* the OFT published in October 2008 an Opinion on the application of the Chapter I prohibition and section 9(1) to agreements between newspaper and magazine publishers and their respective wholesalers<sup>302</sup>. An interesting feature of the Opinion is that it explains the OFT’s thinking on the treatment of sub-national exclusive agreements which confer absolute territorial protection upon the wholesaler; the OFT indicated such agreements could satisfy the criteria of section 9(1) if evidence could be adduced to demonstrate that they would lead to economic efficiency<sup>303</sup>.

In *Pirtek (UK) Ltd v Joinplace Ltd*<sup>304</sup> the High Court held that a franchise agreement plainly contributed to improving the production or distribution of replacement hydraulic hoses due, in particular, to the provision of know-how and assistance to franchisees;

<sup>290</sup> Ibid, paras 42–45.

<sup>296</sup> OFT decision of 29 November 2002 [2003] UKCLR 176, paras 45–46; see ch 16.

<sup>297</sup> See ch 16, ‘The hold-up problem’, p 627.

<sup>298</sup> OFT decision of 15 April 2004 [2004] UKCLR 893.

<sup>299</sup> OFT decision of 22 April 2004 [2004] UKCLR 917.

<sup>300</sup> Case No 1036/1/1/04 *Association of British Insurers v OFT*, order of 30 July 2004.

<sup>301</sup> Case closure notice of 29 January 2007, available at [www.of.gov.uk/advice\\_and\\_resources/resource\\_base/ca98/closure](http://www.of.gov.uk/advice_and_resources/resource_base/ca98/closure).

<sup>302</sup> OFT 1025, October 2008. <sup>303</sup> Ibid, paras 4.29–4.144.

<sup>304</sup> [2010] EWHC 1641, [2010] UKCLR 1297.

it also concluded that the restrictive covenant at issue satisfied the other criteria in section 9(1)<sup>305</sup>.

During the parliamentary debates on section 9 Lord Simon stated twice in the House of Lords that he expected the criteria in section 9 to be interpreted in the same broad way as Article 101(3) TFEU. The OFT gave an indication of the breadth of the exemption criteria in *Lucite International UK Ltd and BASF plc*<sup>306</sup>, where it considered that the agreement under consideration would have beneficial environmental effects. In May 2010 the OFT published a discussion paper, *Article 101(3) – A Discussion of a Narrow Versus Broad Definition of Benefits*, which notes the debate about whether Article 101(3), and as a corollary section 9(1), should be interpreted in a broad manner having regard to non-economic benefits or more narrowly according to an economic efficiency standard. The European Commission considers that, since Article 101(3) is directly applicable<sup>307</sup>, it should be applied according to the narrower approach, and, as already noted, the OFT's duty is to have regard to the Commission's position. The breadth of the criteria in Article 101(3) is discussed in chapter 4, to which reference should be made<sup>308</sup>.

### (iii) Block exemptions

Section 6 of the Competition Act allows the Secretary of State, acting upon a recommendation from the OFT, to adopt block exemptions. A block exemption may contain conditions and obligations and may be of limited duration, by virtue of sections 6(5) and 6(7) respectively. The procedure for adopting block exemptions is set out in section 8. There are a number of EU block exemptions, and these are applicable to agreements caught by the Chapter I prohibition by virtue of the parallel exemption provisions in section 10<sup>309</sup>. One block exemption has been adopted under the Competition Act, for public transport ticketing schemes that allow passengers to purchase tickets that can be used on the services of the participating travel operators. The block exemption entered into force on 1 March 2001<sup>310</sup> and will expire on 29 February 2016<sup>311</sup>. The OFT produced an updated guideline on 30 November 2006<sup>312</sup>; Annex A of the guideline contains a consolidated text of the block exemption as amended.

### (iv) Parallel exemptions

Section 10 of the Competition Act 1998 makes provision for 'parallel exemptions'. Many agreements are block exempted by an EU block exemption<sup>313</sup>; there are others that would be exempt but for the fact that they do not produce an effect on trade between Member States: since such agreements would not infringe Article 101(1) they would not require or benefit from block exemption under Article 101(3). Section 10(1) and (2) of the Act provides that any agreement that benefits from a block exemption under EU law, or that would do if it were to affect trade between Member States, will also be exempted from the Chapter I prohibition.

<sup>305</sup> *Ibid*, paras 68–71.

<sup>306</sup> OFT decision, 29 November 2002 [2003] UKCLR 176, paras 39–41.

<sup>307</sup> See Council Regulation 1/2003, OJ [2003] L 1/1, Article 51(1)–(2).

<sup>308</sup> See ch 4, 'First condition of Article 101(3): an improvement in the production or distribution of goods or in technical or economic progress', pp 155–162.

<sup>309</sup> See below.

<sup>310</sup> Competition Act 1998 (Public Transport Ticketing Schemes Block Exemption) Order 2001, SI 2001/319, as amended by the Competition Act 1998 (Public Transport Ticketing Schemes Block Exemption) (Amendment) Order 2005, SI 2005/3347.

<sup>311</sup> Competition Act 1998 (Public Transport Ticketing Schemes Block Exemption) (Amendment) Order 2011, SI 2011/227.

<sup>312</sup> *Public transport ticketing schemes block exemption*, OFT 439.

<sup>313</sup> For discussion of the EU block exemptions see ch 4, 'Block Exemptions', pp 168–172.

A consequence of the availability of parallel exemption is that the parties to such agreements do not need a block exemption under domestic law. Section 10(4) ensures that the duration of any parallel exemption is in line with the position in EU law. The most important effect of section 10 is that vertical agreements may benefit from Regulation 330/2010<sup>314</sup> and that licences of intellectual property rights may benefit from Regulation 772/2004<sup>315</sup>. Research and development agreements and specialisation agreements could benefit from Regulation 1217/2010<sup>316</sup> and Regulation 1218/2010<sup>317</sup> respectively.

Section 10(5) makes provision for the OFT, in accordance with rules made under section 51 of the Act, to impose, vary or remove conditions and obligations subject to which a parallel exemption is to have effect, or even to cancel a parallel exemption. Section 10(6) enables this cancellation to be retrospective from before the date of the OFT's notice. However Article 3(2) of Regulation 1/2003 makes clear that, as a matter of EU law, it is not open to the OFT to impose stricter standards to an agreement that fulfils the conditions under Article 101(3) TFEU<sup>318</sup>. A different point is that Article 29(2) of Regulation 1/2003<sup>319</sup> specifically authorises a Member State to withdraw the benefit of an EU block exemption in certain, specified, circumstances.

#### 4. The Chapter II Prohibition

The Chapter II prohibition is contained in section 18(1) of the Competition Act 1998. The OFT's Guidelines *Abuse of a dominant position*<sup>320</sup>, *Assessment of market power*<sup>321</sup> and *Modernisation*<sup>322</sup> provide a useful overview of the Chapter II prohibition. The domestic competition authorities and courts will also have regard to the European Commission's 2008 Communication *Guidance on the Commission's enforcement priorities in applying Article [102 TFEU] to abusive exclusionary conduct by dominant undertakings*<sup>323</sup>. The *Guidance* does not purport to state the law of exclusionary abuse under Article 102<sup>324</sup>. However it is not unreasonable to suppose that competition authorities and courts, faced with competing arguments as to the proper scope of the law, will, at the least, be aware of the Commission's approach to certain business behaviour and that, over a period of time, the *Guidance* will have an influence on the future orientation of the Chapter II prohibition and Article 102 in its application to exclusionary behaviour<sup>325</sup>.

The OFT and sectoral regulators have found infringements of the Chapter II prohibition in seven cases. The OFT has imposed fines in four cases: it imposed a penalty of £3.21

<sup>314</sup> See ch 16, 'Vertical Agreements: Regulation 330/2010', pp 649–672.

<sup>315</sup> See ch 19, 'Technology Transfer Agreements: Regulation 772/2004', pp 781–791.

<sup>316</sup> See ch 15, 'The block exemption for research and development agreements: Regulation 1217/2010', pp 595–599.

<sup>317</sup> See ch 15, 'The block exemption for specialisation agreements: Regulation 1218/2010', pp 601–603.

<sup>318</sup> See ch 2, 'Article 102: conflicts', pp 77–78; the OFT would presumably be under no constraint in a s 10(2) case, where there is, *ex hypothesi*, no EU jurisdiction.

<sup>319</sup> Council Regulation 1/2003, OJ [2003] L 1/1; see also the European Commission's *Guidelines on Vertical Restraints* OJ [2010] C 130/1, paras 74–78, on which see ch 16, 'Article 29(1) of Regulation 1/2003: withdrawal by the Commission', p 671.

<sup>320</sup> OFT 402, December 2004.

<sup>321</sup> OFT 415, December 2004.

<sup>322</sup> OFT 442, December 2004.

<sup>323</sup> OJ [2009] C 45/7; for a general discussion see ch 5, 'The Commission's *Guidance on Article 102 Enforcement Priorities*', pp 174–177.

<sup>324</sup> *Ibid*, para 3.

<sup>325</sup> The *Guidance* was referred to by the ORR in its decision in *DB Schenker Rail (UK) Ltd*, decision of 2 August 2010, para 82 and by the OFT in its decision in *Flybe Ltd*, decision of 5 November 2010, paras 6.36–6.39; both decisions are available at [www.ofg.gov.uk](http://www.ofg.gov.uk).

million for abusive pricing in *Napp*<sup>326</sup>, reduced to £2.2 million on appeal<sup>327</sup>; in *Aberdeen Journals*<sup>328</sup> it imposed a fine of £1.32 million for predatory pricing, reduced to £1 million on appeal<sup>329</sup>; in *Genzyme*<sup>330</sup> it fined Genzyme £6.8 million for engaging in various exclusionary practices, reduced to £3 million on appeal<sup>331</sup>; and in *Reckitt/Benckiser* that undertaking agreed to pay a fine of £10.2 million for withdrawing and de-listing a drug from the NHS prescription channel<sup>332</sup>. The Office of Rail Regulation ('the ORR') imposed a fine of £4.1 million in the case of *English Welsh & Scottish Railway Ltd*<sup>333</sup>, and the Gas and Electricity Markets Authority ('GEMA') imposed a fine of £41.6 million in *National Grid*<sup>334</sup>, reduced to £15 million on appeal<sup>335</sup>. In *Cardiff Bus*<sup>336</sup> the OFT concluded that Cardiff Bus had abused its dominant position by engaging in predatory conduct aimed at eliminating a competitor; no fine could be imposed in that case since Cardiff Bus's turnover was below £50 million<sup>337</sup>. On two occasions the CAT has found an abuse of a dominant position in circumstances where the OFT or sectoral regulator had decided that there was not one<sup>338</sup>. The OFT has published research into the costs of inappropriate intervention and non-intervention under the law of abuse of dominance<sup>339</sup>.

## (A) The prohibition

### (i) Section 18

The prohibition of the abuse of a dominant position is contained in section 18(1) of the Competition Act. Section 18 draws heavily on the text of Article 102<sup>340</sup>:

- (1) Subject to section 19, any conduct on the part of one or more undertakings which amounts to the abuse of a dominant position in a market is prohibited if it may affect trade within the UK.
- (2) Conduct may, in particular, constitute such an abuse if it consists in—
  - (a) directly or indirectly imposing unfair purchase or selling prices or other unfair trading conditions;
  - (b) limiting production, markets or technical development to the prejudice of consumers;
  - (c) applying dissimilar conditions to equivalent transactions with other trading parties, thereby placing them at a competitive disadvantage;

<sup>339</sup> OFT 864, September 2006, available at [www.ofg.gov.uk](http://www.ofg.gov.uk).

<sup>340</sup> For detailed discussion of EU law on the abuse of a dominant position see chs 5, 17 and 18.

- (d) making the conclusion of contracts subject to acceptance by the other parties of supplementary obligations which, by their nature or according to commercial usage, have no connection with the subject of the contracts.
- (3) In this section—  
 ‘dominant position’ means a dominant position within the UK; and ‘the UK’ means the UK or any part of it.
- (4) The prohibition imposed by subsection (1) is referred to in this Act as ‘the Chapter II prohibition’.

**(ii) ‘The Chapter II prohibition’**

Section 18(4) of the Act establishes the term ‘the Chapter II prohibition’ to refer to the prohibition set out in section 18.

**(iii) ‘Undertakings’**

This term has the same meaning as in the Chapter I prohibition and in Articles 101 and 102 TFEU<sup>341</sup>. The *BetterCare*<sup>342</sup> case, in which the CAT ruled that the North & West Belfast Health and Social Services Trust was an undertaking for the purpose of the Competition Act, was a case on the Chapter II prohibition<sup>343</sup>.

**(iv) Affecting trade within the UK**

As with the Chapter I prohibition there is a requirement that trade within the UK be affected; most conduct that is an abuse of a dominant position within the UK will also affect trade there. The CAT has held that there is no need to show an *appreciable* effect on trade within the UK<sup>344</sup>, although the High Court has questioned the correctness of this<sup>345</sup>. The requirement of an effect on trade within the UK could exclude from the scope of the prohibition an abuse of a dominant position within the UK that has its effects entirely outside the UK<sup>346</sup>.

**(v) Voidness**

The Competition Act does not refer explicitly to voidness in the case of the Chapter II prohibition. Prohibited conduct can nevertheless include agreements. In *English Welsh & Scottish Railway Ltd v E.ON UK plc*<sup>347</sup> the High Court held that coal carriage agreements that infringed the Chapter II prohibition (and Article 102 TFEU) were void and unenforceable.

**(vi) Market size**

Section 18(3) provides that a dominant position means a dominant position in the UK, and that the UK means the UK ‘or any part of it’. Unlike Article 102<sup>348</sup>, which refers to a dominant position ‘... within the internal market or in a *substantial part of it*’, there is no need for the dominant position to be in the whole or a ‘substantial’ part of the UK,

<sup>341</sup> See ‘Undertakings’, pp 335–337 above.

<sup>342</sup> Case No 1006/2/1/01 *BetterCare Group Ltd v Director General of Fair Trading* [2002] CAT 7, [2002] CompAR 299.

<sup>343</sup> The case is discussed at ‘The *BetterCare* case’, pp 336–337 above.

<sup>344</sup> Case No 1009/1/1/02 *Aberdeen Journals Ltd v OFT* [2003] CAT 11, [2003] CompAR 67, paras 459–462.

<sup>345</sup> See ‘Applicable law and territorial scope’, p 345 above.

<sup>346</sup> See ch 12, ‘Chapter II prohibition’, p 502. <sup>347</sup> [2007] EWHC 599, [2007] UKCLR 1653.

<sup>348</sup> See ch 5, ‘A substantial part of the internal market’, pp 189–190.

and a relatively small part of the UK could constitute a ‘market’ within the meaning of section 18. The Chapter II prohibition is therefore a potentially far-reaching instrument for competition authorities and litigants alike. Firms that have market power which is on only a local scale and which therefore run little risk of infringing Article 102 for lack of any appreciable effect on inter-state trade, or are dominant only in an insubstantial part of the common market, might find that they are infringing the Chapter II prohibition. Local dominance can be expected to be found in some sectors, such as the operation of bus services<sup>349</sup>: there were numerous investigations of bus services under the old Competition Act 1980<sup>350</sup> and there is an ongoing market investigation of local bus services under the Enterprise Act 2002<sup>351</sup>. In *First Edinburgh*<sup>352</sup> the OFT concluded that that company had not infringed the Chapter II prohibition by charging predatory prices or by increasing the frequency of bus services in order to foreclose access to the market to a rival bus operator, Lothian Buses plc. In November 2008 the OFT decided that Cardiff Bus was guilty of predatory conduct by running a ‘no-frills’ service to eliminate 2 Travel, its only competitor, from the market<sup>353</sup>. In *Burgess v OFT*<sup>354</sup> the CAT concluded that W Austin & Sons had abused a dominant position by refusing access to a crematorium in the Stevenage/Knebworth area of Hertfordshire.

### (vii) The relevant market

As in the case of EU law a finding of dominance requires an assessment of the relevant market. Market definition has been discussed in detail in chapter 1<sup>355</sup>. In the UK guidance on market definition can be found in the first judgment of the CAT in the *Aberdeen Journals* case<sup>356</sup> and in its judgment of December 2006 in *Albion Water v Water Services Regulation Authority*<sup>357</sup>; the OFT has also issued a Guideline on *Market definition*<sup>358</sup>. In general the OFT’s Guideline on *Market definition* follows the approach of the European Commission’s *Notice on the definition of the relevant market for the purposes of [EU] competition law*<sup>359</sup>.

Where the OFT concludes that an allegation of abusive behaviour cannot be substantiated, it may refrain from reaching a conclusion as to the relevant product and geographic

<sup>349</sup> On the application of the competition rules to the bus industry see OFT information leaflets *Frequently asked questions on competition law and the bus industry*, OFT 448, updated July 2006, and *A brief guide to the role of the OFT in the bus industry* and *The OFT and the bus industry*, OFT 397, February 2003.

<sup>357</sup> Cases No 1046/2/4/04 and 1032/2/4/04 (IR) [2006] CAT 36, [2007] CompAR 328, paras 90–117; see also Case No 1099/1/2/08 *National Grid plc v Gas and Electricity Markets Authority* [2009] CAT 14, [2009] CompAR 282, paras 34–46.

<sup>358</sup> OFT 403, December 2004; the OFT’s Guideline *Abuse of a dominant position*, OFT 402, December 2004, contains a briefer discussion of market definition at paras 4.4–4.9.

<sup>359</sup> OJ [1997] C 372/5, [1998] 4 CMLR 177.

markets<sup>360</sup>. However in *Freeserve* the CAT emphasised that it will often be appropriate, for clarity of analysis, for the OFT or sectoral regulator to indicate which markets seem to be potentially relevant in a particular case<sup>361</sup>.

### (viii) Assessing dominance

The OFT has issued a *Guideline Assessment of market power*<sup>362</sup>. As paragraph 1.2 of the *Guideline* points out the concept of market power is not part of the Competition Act; however market power is a useful tool in assessing potentially anti-competitive behaviour. The *Guideline* states that market power arises where an undertaking does not face effective competitive pressure<sup>363</sup> and can be thought of as the ability profitably to sustain prices above competitive levels or to restrict output or quality below competitive levels<sup>364</sup>. The *Guideline* quotes the well-known definition of a dominant position from *United Brands v Commission*<sup>365</sup>, the ability to ‘prevent effective competition being maintained on the relevant market’<sup>366</sup>. In *Napp Pharmaceutical Holdings Ltd v Director General of Fair Trading* (and in subsequent cases) the CAT has adopted the same definition<sup>367</sup>. In *Cardiff Bus* the OFT noted that market power is a question of degree and that it is not necessary for a finding of dominance that an undertaking has eliminated all opportunity for competition in the market<sup>368</sup>. In *Albion Water v Water Services Regulation Authority*<sup>369</sup> the CAT, perhaps concerned at the lack of findings of infringement of the Chapter II prohibition by the OFT and the sectoral regulators, said that:

when assessing dominance under the Competition Act, it is unnecessary for the competition authority to investigate distant or theoretical possibilities with a view to dotting every ‘i’ or crossing every ‘t’ that could conceivably be imagined. While a sensible analysis is required, there is no need to make the issue of dominance more complicated than it really is<sup>370</sup>.

The OFT’s *Guideline on the Assessment of market power* says that an undertaking will not be dominant unless it enjoys ‘substantial market power’<sup>371</sup>: the European Commission’s *Guidance on Article 102 Enforcement Priorities*<sup>372</sup> makes the same point<sup>373</sup>. The *Guideline* adds that assessing market power requires an examination of the competitive constraints that an undertaking faces, and it proceeds to discuss market shares (Part 4), entry barriers (Part 5) and other factors relevant to an assessment of market power (Part 6).

### (A) Market shares

Paragraph 2.11 of the *Guideline* makes the point that there is no fixed market share threshold for the determination of market power: market power depends on a variety of factors of which market share is one; paragraph 2.12 notes that there is a presumption in EU law of dominance at 50 per cent or above<sup>374</sup>, and adds that the OFT considers it unlikely that

<sup>360</sup> See eg OFT decision of 11 December 2002, *Association of British Travel Agents and British Airways plc* [2003] UKCLR 136, paras 10–19.

<sup>368</sup> Decision of 18 November 2008 [2009] UKCLR 332, paras 5.6–5.7.

<sup>369</sup> Cases No 1046/2/4/04 and 1032/2/4/04 (IR) [2006] CAT 36, CompAR 328.

<sup>370</sup> *Ibid*, para 185. <sup>371</sup> *Assessment of market power*, para 2.9.

<sup>372</sup> See ch 5, ‘The Commission’s *Guidance on Article 102 Enforcement Priorities*’, pp 174–177.

<sup>373</sup> OJ [2009] C 45/7, para 10.

<sup>374</sup> See ch 5, ‘The AKZO presumption of dominance where an undertaking has a market share of 50 per cent or more’, pp 182–183.

an undertaking would be dominant with a market share below 40 per cent<sup>375</sup>. However in *NCNN 500 OFCOM* concluded that BT, with a market share below 31 per cent, was dominant as there were sufficient additional factors indicating dominance<sup>376</sup>.

Paragraph 3.3 points out that one of the competitive constraints upon an undertaking comes from existing competitors within the relevant market, and market shares help<sup>377</sup> to assess the extent of this constraint. Part 4 of the *Guideline* discusses market shares in more detail. Market power is more likely to exist where an undertaking has a persistently high market share<sup>378</sup>. It is the development of market shares over a period of time that is important, not their calculation at a single point in time<sup>379</sup>. The *Guideline* explains various reasons why market shares might not be a reliable guide to market power, for example because barriers to entry are low or because the market is a ‘bidding market’<sup>380</sup>. In the circumstances of the recently liberalised market for the provision of domestic gas meters in *National Grid* the CAT treated market shares as high as 89 per cent as one indicator of market power but as not raising a presumption of dominance<sup>381</sup>. Paragraphs 4.6 to 4.8 provide insights into methods of calculating market shares.

### (B) Entry barriers

Paragraph 3.3 of the *Guideline* points out that one of the competitive constraints upon an undertaking comes from potential competition, and entry barriers are relevant to an examination of this issue. Part 5 of the *Guideline* discusses barriers to entry; paragraph 5.1 explains that firms already in the market may experience barriers to expansion, and that such barriers can be analysed in the same way as barriers to entry. Entry barriers are important to the assessment of potential competition: the lower they are, the more likely it is that potential competition will prevent undertakings already in the market from profitably sustaining prices above competitive levels<sup>382</sup>.

The *Guideline* acknowledges that there are various ways of classifying barriers to entry; it examines the issue under six heads<sup>383</sup>:

- **sunk costs:** that is to say costs that must be incurred to enter a market, but which are not recoverable on exiting the market, may give incumbent firms an advantage over potential entrants<sup>384</sup>
- **poor access to key inputs and distribution outlets:** there can be a barrier to entry where an incumbent has privileged access to a scarce input or distribution outlet, for example to essential facilities or intellectual property rights<sup>385</sup>
- **regulation:** for example a limitation of the numbers of undertakings licensed to operate in a market or standards that an incumbent can satisfy but that new entrants find it difficult to, can amount to a barrier to entry<sup>386</sup>
- **economies of scale:** the fact that an undertaking may need to enter the market on a large scale can constitute a barrier to entry<sup>387</sup>

<sup>375</sup> The European Commission makes the same point in its *Guidance on Article 102 Enforcement Priorities*, para 14.

<sup>376</sup> Decision of 1 August 2008 [2008] UKCLR 501, paras 5.1–5.166.

<sup>377</sup> Market share figures do not yield any information about the competitive constraint that arises from the ability of existing firms within the market to expand.

<sup>378</sup> *Assessment of market power*, para 4.2.

<sup>379</sup> *Ibid*, para 4.2.

<sup>380</sup> See ch 1, ‘Market shares’, p 43.

<sup>381</sup> Case No 1099/1/2/08 [2009] CAT 14, CompAR 282, para 51.

<sup>382</sup> *Assessment of market power*, para 5.2.

<sup>383</sup> *Ibid*, para 5.6.

<sup>384</sup> *Ibid*, paras 5.8–5.11.

<sup>385</sup> *Ibid*, paras 5.12–5.15.

<sup>386</sup> *Ibid*, paras 5.16–5.17.

<sup>387</sup> *Ibid*, paras 5.18–5.20.

- **network effects:** as in the case of economies of scale, network effects can make it hard for a new firm to enter the market where the minimum viable scale of the network is large in relation to the size of the market<sup>388</sup>
- **exclusionary behaviour:** behaviour such as predation, margin squeezes and refusals to supply may act as barriers to entry<sup>389</sup>.

The *Guideline* discusses ways of assessing the effects of barriers to entry and the type of evidence that a firm should adduce where it wishes to argue that potential competition (that is to say an absence of barriers to entry) amounts to an effective competition constraint upon its behaviour<sup>390</sup>.

### (C) *Other factors in the assessment of market power*

Part 6 of the *Guideline* considers other matters that are relevant to an assessment of market power. These include:

- **buyer power:** buyer power may act as a constraint on an undertaking's market power; however that buyer power does not come from size alone: the buyer must have a choice of supplier<sup>391</sup>, a point emphasised by the CAT in the *Genzyme*<sup>392</sup> and *National Grid*<sup>393</sup> cases
- **behaviour and performance:** the behaviour and performance of the undertaking under investigation may provide evidence of market power, for example where it can set prices consistently above an appropriate measure of cost or where it can persistently earn excessive profits<sup>394</sup>
- **economic regulation:** economic regulation may prevent an undertaking from raising prices above a competitive level, although this does not in itself mean that that undertaking does not have market power<sup>395</sup>. In the *Napp* case<sup>396</sup> the CAT rejected the argument that the Pharmaceutical Price Regulation Scheme, which limits the rate of return on a company's total sales of all its branded prescription medicines to the National Health Service, meant that Napp did not enjoy a dominant position<sup>397</sup>.

### (D) *Super-dominance*

In the *Napp* case<sup>398</sup> the CAT recognised that certain firms may be 'super-dominant', with the result that the 'special responsibility' not to impair undistorted competition that they bear may be particularly onerous<sup>399</sup>. In *BT Broadband*<sup>400</sup> the Office of Telecommunications (OFTEL, the predecessor of OFCOM) concluded that BT, with a market share in the relevant market of 65–70 per cent, was not in a super-dominant position<sup>401</sup>. In *English Welsh & Scottish*

<sup>401</sup> Ibid, para 2.23.

*Railway Ltd*<sup>402</sup> the ORR noted that EW&S had a ‘very high degree of market power’ which should be taken into account when determining the scope of its ‘special responsibility’.

(ix) **Abuse**

(A) *Examples of abuse*

Section 18(2) sets out a non-exhaustive list of abuses, in identical terms to those in Article 102 TFEU. Unlike Article 102, sections 18(1) and 18(2) refer to ‘conduct’ which amounts to an abuse, rather than merely an abuse. It is hard to see how the use of the term ‘conduct’ improves on the EU version, and indeed it is not entirely apt: there is no doubt, for example, that a refusal to supply could, in certain circumstances, amount to an abuse of a dominant position; semantically it is somewhat strange to characterise inaction as conduct.

The CAT has pointed out that the primary interest to be protected under the Chapter II prohibition is the process of competition, and ultimately the interest of the consumer, rather than the private interest of a particular competitor; but that in some cases protecting the competitive process necessarily involves having regard to the situation of competitors<sup>403</sup>.

In *National Grid plc v Gas and Electricity Markets Authority*<sup>404</sup> the Court of Appeal held that, in an abuse case, it is not necessary to ask, in isolation, whether a dominant undertaking has departed from ‘normal competition’ or ‘competition on the merits’: these are not sufficiently hard-edged concepts that they can be determined as a matter of law; rather it is necessary to look at conduct ‘in the round’ and to decide whether it is abusive as a matter of expert appreciation. The court added that, although there are benchmarks against which to consider whether particular conduct (for example predatory pricing or a refusal to supply) amount to an abuse, it does not follow that there must be a benchmark for all allegations of abuse, let alone a benchmark that can tell one precisely where the line between lawful and unlawful conduct is to be drawn. Abuse cases are ‘highly fact sensitive and dependent upon an evaluation of a wide range of factors’<sup>405</sup>. In *Purple Parking Ltd v Heathrow Airport Ltd*<sup>406</sup> Mann J said that it is not necessary to bring abuse of dominance cases within any particular ‘pigeon-hole’ of established cases of abuse<sup>407</sup>.

The OFT’s Guideline *Abuse of a dominant position*<sup>408</sup> contains a brief discussion of the meaning of abuse, but does little more than to repeat what is contained in Article 102 TFEU and section 18. The OFT published a draft *Guideline Assessment of conduct* in April 2004 which, if adopted, would have provided much more detailed discussion of the concept of abuse; although the draft Guideline is still available on its website<sup>409</sup> it is understood that the OFT will not be issuing a final guideline on this topic. The European Commission has since published its *Guidance on Article 102 Enforcement Priorities* in respect of exclusionary behaviour: as already noted the OFT must have regard to the Commission’s position<sup>410</sup>, and it is likely to be influenced by what the Commission has had to say in that document. The guidelines for particular sectors such as the energy sector and railways contain discussion of the concept of abuse in the circumstances of those

<sup>402</sup> ORR decision of 17 November 2006 [2007] UKCLR 937.

<sup>403</sup> Case No 1046/2/4/04 *Albion Water Ltd v Director General of Water Services* [2005] CAT 40, [2006] CompAR 269, para 262.

<sup>404</sup> [2010] EWCA Civ 114, [2010] UKCLR 386.

<sup>405</sup> *Ibid*, para 54; see, to similar effect, para 102 of Mann J’s judgment in *Purple Parking Ltd v Heathrow Airport Ltd* [2011] EWHC 987 (Ch), [2011] UKCLR 492.

<sup>406</sup> [2011] EWHC 987 (Ch).

<sup>407</sup> *Ibid*, paras 75–108.

<sup>408</sup> OFT Guideline 402, December 2004.

<sup>409</sup> OFT 414a, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>410</sup> On s 60(3) of the Competition Act see ‘Having regard to decisions or statements of the Commission’, p 373 below.

markets<sup>411</sup>. The OFT will also apply its *OFT Prioritisation Principles*<sup>412</sup> when selecting cases for investigation.

The jurisprudence of the EU Courts on the meaning of abuse is highly influential in the application of the Chapter II prohibition, not least because of the ‘general principles’ clause in section 60 of the Act<sup>413</sup>; as a result the reader is referred to chapter 5 for a general discussion of the meaning of abuse under Article 102<sup>414</sup>. Abusive practices themselves are considered in detail in chapter 17, which deals with non-pricing abuses, and chapter 18, which deals with pricing abuses. In each chapter specific attention is given to the application of the Chapter II prohibition<sup>415</sup>.

### (B) Objective justification

A dominant undertaking can raise a defence to an accusation of abuse where it can show that it had an objective justification for its behaviour<sup>416</sup>. In *Floe Telecom Ltd (in administration) v OFCOM*<sup>417</sup> the CAT held that OFCOM should have conducted a much more extensive inquiry before concluding that Vodafone’s refusal to supply was objectively justified<sup>418</sup>. When OFCOM re-examined the matter, in the light of the CAT’s comments, it continued to believe that Vodafone’s behaviour was objectively justified<sup>419</sup>. In *Re-investigation of a complaint from VIP Communications Ltd*<sup>420</sup> OFCOM considered that T-Mobile’s refusal to supply VIP was objectively justified for the same reason that applied in *Floe*<sup>421</sup>. The ORR accepted a defence of objective justification in *Complaint from NTM Sales and Marketing Ltd against Portec Rail Products (UK) Ltd*<sup>422</sup>. In *Cardiff Bus* the OFT was not convinced by Cardiff Bus’s explanation for launching its new bus services since it was not able to produce any contemporaneous evidence to show that the services were introduced to test market demand for ‘no frills’ services rather than merely to weaken its principal competitor<sup>423</sup>. In *Flybe Ltd*<sup>424</sup> the OFT said that it would have been prepared in that case to have decided that Flybe had an objective justification for incurring losses on an aviation route that it had newly entered, and therefore that it had not abused a dominant position<sup>425</sup>; however the OFT decided anyway that there were no grounds for action. Mann J rejected objective justification as a defence in *Purple Parking Ltd v Heathrow Airport Ltd*<sup>426</sup>.

### (C) Conduct of minor significance

Conduct of minor significance cannot be the subject of a financial penalty<sup>427</sup>; this was the reason that Cardiff Bus was not fined, even though the OFT found it guilty of abuse<sup>428</sup>; this does not apply to transgressions of Article 102 TFEU.

<sup>411</sup> These guidelines are listed at ‘OFT guidance’, pp 332–333 above.

<sup>427</sup> See ch 10, ‘Immunity for small agreements and conduct of minor significance’, pp 413–414.

<sup>428</sup> See ‘The Chapter II Prohibition’, p 360 above.

**(D) Article 3(2) Regulation 1/2003**

Unilateral conduct that is not abusive may, nevertheless, be subject to a stricter rule of national law<sup>429</sup>.

**(B) Exclusions<sup>430</sup>****(i) Exclusions for mergers subject to UK or EU merger control**

The Chapter II prohibition does not apply to conduct resulting in a relevant merger situation<sup>431</sup> or in a concentration having a Community dimension<sup>432</sup>. This exclusion is closely related to the exclusion of mergers from the Chapter I prohibition, which was described above<sup>433</sup>.

**(ii) Financial Services and Markets Act 2000**

The Chapter II prohibition will not apply to certain conduct pursuant to the regulatory provisions of the Financial Services and Markets Act 2000<sup>434</sup>.

**(iii) Other exclusions**

Section 19(1) provides that the Chapter II prohibition does not apply to cases excluded by Schedule 3<sup>435</sup>. Some of the exclusions in Schedule 3 apply only to the Chapter I prohibition; however paragraph 4 of Schedule 3 (services of general economic interest), paragraph 5 (compliance with legal requirements), paragraph 6 (avoidance of conflict with international obligations) and paragraph 7 (exceptional and compelling reasons of public policy) also exclude the application of the Chapter II prohibition.

## 5. 'Governing Principles Clause': Section 60 of the Competition Act 1998

Regulation 1/2003 requires that, where a competition authority or a court apply domestic competition law they must, in so far as an agreement or conduct has an effect on trade between Member States, also apply Articles 101 and/or 102 TFEU. The relationship between EU and national competition law, and in particular the scope for applying stricter rules than those of the EU, has already been considered in the final section of chapter 2<sup>436</sup>. In the years since Regulation 1/2003 entered into force there has been no difficulty in applying the EU and domestic rules in a harmonious fashion<sup>437</sup>, although the European Commission has indicated that the apparent divergence of standards regarding unilateral conduct is an area which merits further evaluation<sup>438</sup>.

<sup>429</sup> See ch 2, 'Article 102: conflicts', pp 77–78.

<sup>430</sup> See the detailed discussion of exclusions in the context of the Chapter I prohibition at 'The Chapter I prohibition: excluded agreements', pp 348–356 above.

<sup>433</sup> See 'Schedule 1: mergers and concentrations', pp 349–351 above.

<sup>434</sup> See 'Financial Services and Markets Act 2000', pp 351–352 above.

<sup>435</sup> For a discussion of Sch 3 see 'Schedule 3: planning obligations and other general exclusions', p 352 above.

<sup>436</sup> See ch 2, 'The Relationship Between EU Competition Law and National Competition Laws', pp 75–79.

<sup>437</sup> See Communication from the Commission to the European Parliament and the Council, *Report on the functioning of Regulation 1/2003*, COM(2009) 206 final, paras 12, 28 and 39.

<sup>438</sup> Ibid, para 27.

This section of this chapter deals with a different point which is that UK law itself, as a result of the ‘governing principles clause’ found in section 60 of the Competition Act, requires that there should be consistency, where possible, in the application of domestic and EU competition law. Section 60 has been extremely important in practice and will continue to be so in cases where there is no effect on trade between Member States with the result that domestic law alone is applicable.

Section 60 of the Competition Act sets out the governing principles to be applied in determining questions which arise in relation to competition within the UK; essentially, the principle is that there should be close conformity between the Act and the EU regime; section 60 is also applicable in relation to questions arising under the provisions for the disqualification of company directors<sup>439</sup>. Section 60 enables the UK competition authorities and courts to apply EU competition law when making decisions under the Act.

### (i) Section 60(1)

Section 60(1) sets out the purpose of the governing principles clause: the duties to which it gives rise are imposed by section 60(2) and (3). Section 60(1) provides that:

The purpose of this section is to ensure that so far as is possible (having regard to any relevant differences between the provisions concerned), questions arising under this Part in relation to competition within the UK are dealt with in a manner which is consistent with the treatment of corresponding questions arising in [EU] law in relation to competition within the [EU].

The objective of consistency is not absolute: consistency is envisaged only ‘so far as is possible’, having regard to ‘relevant differences’ and is required as to ‘corresponding questions’ that arise ‘in relation to competition’. The Government stated that ‘we are satisfied that the drafting of [section] 60 accurately expresses the concept that [EU] jurisprudence is to be followed unless the court is driven to some different interpretation by some provision in that part of the [Act]’<sup>440</sup>. Where the factual circumstances of the case law of the EU Courts differ from those in a UK case, the CAT in *BetterCare* nevertheless observed that its duty under section 60 was to approach an issue of competition law ‘in the manner in which we think the European Court would approach it, as regards the principles and reasoning likely to be followed by that Court’<sup>441</sup>.

#### (A) ‘So far as is possible’

The purpose of the Act is to achieve consistency ‘so far as is possible’. Clearly this is not possible where the Act explicitly differs from EU law: examples of this are given in the next section. Where there is some doubt in a particular case, these words indicate that there is a policy preference towards maintaining consistency with EU law.

#### (B) ‘Having regard to any relevant differences’

A critical issue is the identification of any ‘relevant differences’ between EU law and the Act. Some examples appear on the face of the Act itself: for example it contains a few exclusions

<sup>439</sup> See s 9A(11) of the Company Directors Disqualification Act 1986, inserted by s 204 Enterprise Act 2002.

<sup>440</sup> HL Consideration of Commons’ Amendments, 20 October 1998, col 1383 (Lord Simon of Highbury).

<sup>441</sup> Case No 1006/2/1/01 *BetterCare Group v Director General of Fair Trading* [2002] CAT 7, [2002] CompAR 299, para 32.

which are not available under EU law<sup>442</sup>; the Act provides a wider privilege for correspondence with lawyers than in the EU<sup>443</sup>; the exclusion under the Competition Act for mergers is wider than that provided for under EU law; and the Act makes specific provision for particular agreements to be excluded<sup>444</sup>. Secondly, the procedural and enforcement rules under the Act are not identical to those in EU law. For example there is an appeal on the merits to the CAT against decisions of the OFT and the CAT has a power to remit a case to the OFT<sup>445</sup> and the sectoral regulators; in the EU, judicial review may provide a less effective remedy to an applicant. Another procedural difference is that the provisions on leniency in the UK are different from those in the EU<sup>446</sup>. The same is true of the limitation period for imposing and the method of calculating the level of a fine; the CAT has said that there is a relevant difference between domestic and EU law and practice to the setting of penalties<sup>447</sup>.

A further example of a relevant difference, but one that is not apparent on the face of the Act, is that the EU competition rules are applied, in part, with the objective of single market integration in mind. The Competition Act, presumably, does not have to be applied for this purpose, since the goal of market integration is 'relevantly different' from one arising in relation to competition within the UK: this could lead to some divergence in the way in which the Chapter I and Chapter II prohibitions and Articles 101 and 102 are applied. In *Newspapers and magazine distribution* the OFT's opinion was that a court would be unlikely to import the single market objective into an analysis of vertical agreements under the Competition Act<sup>448</sup>.

A further area in which relevant differences might exist will arise in the substantive analysis of particular cases; for example it is provided by the OFT/OFCOM Guidelines that a different measure of costs will be used to assess alleged predatory pricing<sup>449</sup>, due to the specific features of the telecommunications sector, from the one suggested by the Court of Justice in the *AKZO* judgment<sup>450</sup>.

In *Aberdeen Journals Ltd v OFT*<sup>451</sup> the CAT concluded that there was no need to import a rule of 'appreciability' into the expression 'affect trade' in section 18(1) of the Competition Act, and that this was a 'relevant difference' from the test of 'effect on trade' in Article 102 TFEU<sup>452</sup>.

<sup>442</sup> On the exclusions from the Chapter I and Chapter II prohibitions see 'The Chapter I prohibition: excluded agreements', pp 348–356 and 'Exclusions', p 369 above.

<sup>443</sup> See ch 10, 'Legal professional privilege', p 379.

<sup>444</sup> See 'Section 50: vertical agreements', p 356 above and 'Section 50: land agreements', p 356 above on s 50 of the Competition Act 1998; in Case No 1006/2/1/01 *BetterCare Group v Director General of Fair Trading* [2002] CAT 7, [2002] CompAR 299, para 288, the CAT left open the question of whether para 5 of Sch 3 was relevantly different from EU law.

<sup>445</sup> See eg Case No 1005/1/1/01 *Aberdeen Journals v Director General of Fair Trading* [2002] CAT 4, [2002] CompAR 167, para 190; similarly the CAT has held that its power to adopt its own decision on appeal is a relevant difference: see Case No 1027/2/3/04 *VIP Communications v OFCOM* [2007] CAT 3, [2007] CompAR 666, para 51.

<sup>446</sup> See ch 10, 'Whistleblowing: the leniency programme', pp 414–418.

<sup>447</sup> See eg Case No 1120/1/1/09 *Quarby Construction Company Ltd v OFT* [2011] CAT 11, paras 43–48 (on the limitation period) and Case Nos 1117/1/1/09 etc *GF Tomlinson Building Ltd v OFT* [2011] CAT 7, paras 100–102 (on the method for setting fines).

<sup>448</sup> OFT 1025, October 2008, para 4.13.

<sup>449</sup> OFT 417, February 2000, paras 7.6–7.19 where instead of the EU assessment of predation using average variable costs and average total costs, the OFT and OFCOM will consider long run incremental cost; see also Case No 1007/2/3/02 *Freeserve.com plc v Director General of Telecommunications* [2003] CAT 5, [2003] CompAR 202, paras 212–225.

<sup>450</sup> See also *Guidance on the Application of the Competition Act 1998 in the Water and Sewerage Sectors* OFT 422, March 2010, paras 4.39–4.40; on Case C-62/86 *AKZO v Commission* [1991] ECR I-3359, [1993] 5 CMLR 215, see ch 18, '*AKZO v Commission*', pp 742–743.

<sup>451</sup> Case No 1009/1/1/02 [2003] CAT 11, [2003] CompAR 67.

<sup>452</sup> *Ibid*, paras 459–460.

**(C) ‘Corresponding questions’**

In *MasterCard UK Members Forum Ltd*<sup>453</sup> the OFT considered that the questions under consideration in that case did not ‘correspond with’ those in the European Commission’s decision in *Visa International – Multilateral Interchange Fee*<sup>454</sup> since the latter was explicitly concerned with a cross-border payment system whereas the OFT’s decision was dealing with a payment system within the UK<sup>455</sup>.

**(D) ‘Questions arising... in relation to competition’**

The duty to maintain consistency arises only where there are ‘questions arising in relation to competition’. The view of the UK Government when the Bill was proceeding through Parliament was that it was not necessary for the OFT (or sectoral regulators) to follow the same detailed procedures as the European Commission: indeed that might be undesirable, given that it is a very different institution from the OFT; it can reasonably be argued that the procedural rules do not themselves raise questions ‘in relation to competition’. However it was accepted in the House of Lords by Lord Simon of Highbury that section 60 does import the general principles of EU law as well as the specific jurisprudence on Articles 101 and 102 themselves, save where there is a relevant difference<sup>456</sup>. Examples of what have come to be termed in discussion of the Act as ‘high level principles’ are equality, legal certainty, legitimate expectation, proportionality and privilege against self-incrimination: each of these is well established in EU law<sup>457</sup>. Other general principles noted by the EU Courts include the duty to state reasons for a decision with sufficient precision<sup>458</sup>, the principle of good administration<sup>459</sup>, the right of access to the file<sup>460</sup> and equality of arms<sup>461</sup>. In *Pernod-Ricard v OFT*<sup>462</sup> the CAT considered that the rights of a third party complainant in competition proceedings raised a question which indirectly arose ‘in relation to competition’ for the purposes of section 60(2) of the Act<sup>463</sup>. The Tribunal also referred extensively to the jurisprudence of the EU Courts in *Apex v OFT*<sup>464</sup> when considering whether there were procedural defects in a statement of objections issued by the OFT<sup>465</sup>.

**(ii) Section 60(2) and (3)**

Section 60(2) and (3) provide that:

- (2) At any time when the court<sup>466</sup> determines a question arising under this Part, it must act (so far as is compatible with the provisions of this Part<sup>467</sup> and whether or not it would

<sup>453</sup> OFT decision of 6 September 2005 [2006] UKCLR 236.

<sup>454</sup> OJ [2002] L 318/17, [2003] 4 283 CMLR 283.

<sup>455</sup> *Ibid*, paras 97–106. <sup>456</sup> HL Committee, 25 November 1997, cols 960–963.

<sup>457</sup> See Wyatt and Dashwood’s *European Union Law* (Sweet & Maxwell, 5th ed, 2006, eds Arnall, Dashwood, Dougan, Ross, Spaventa and Wyatt), ch 7.

<sup>458</sup> Case T-241/97 *Stork Amsterdam BV v Commission* [2000] ECR II-309, [2000] 5 CMLR 31, para 74; the duty to give reasons is also contained in Article 296 TFEU.

<sup>459</sup> Case T-127/98 *UPS Europe SA v Commission* [1999] ECR II-2633, [2000] 4 CMLR 94, para 37.

<sup>460</sup> Cases T-25/95 etc *Cimenteries CBR SA v Commission* [2000] ECR II-491, [2000] 5 CMLR 204, para 142.

<sup>461</sup> *Ibid*, para 143; the OFT has since adopted a Guideline on *Involving third parties in Competition Act investigations*, OFT 451, April 2006, which substantially brings domestic law into alignment with EU law.

<sup>462</sup> Case No 1017/2/1/03 [2004] CAT 10, [2004] CompAR 707.

<sup>463</sup> *Ibid*, paras 228–234; note that the CAT distinguished *Pernod* in concluding that the power to impose penalties in s 36 of the Act is not limited by any limitation period: Case No 1120/1/1/09 *Quarmby Construction Company Ltd v OFT* [2011] CAT 11, para 43.

<sup>464</sup> Case No 1032/1/1/04 [2005] CAT 4, [2005] CompAR 507.

<sup>465</sup> *Ibid*, paras 92–100.

<sup>466</sup> ‘Court’ in this context, rather unusually, includes the Competition Commission, the OFT and the sectoral regulators: Competition Act 1998, s 60(5).

<sup>467</sup> ‘This Part’ of the Act deals with all matters to do with the prohibitions and their enforcement of them, but not investigations under the Enterprise Act 2002.

otherwise be required to do so) with a view to securing that there is no inconsistency<sup>468</sup> between—

- (a) the principles applied, and decision reached, by the court in determining that question; and
  - (b) the principles laid down by the Treaty<sup>469</sup> and the European Court<sup>470</sup>, and any relevant decision of that Court, as applicable at that time in determining any corresponding question arising in [EU] law.
- (3) The court must, in addition, have regard to any relevant decision or statement of the Commission.

### (A) *The duty of consistency*

Consistency must be maintained between the principles applied and the decision reached by the domestic authority or court and the principles laid down by the Treaty and the EU Courts and any decisions of those Courts in determining corresponding questions that may be applicable at that time. As already noted, ‘high level’ principles such as equality and proportionality will be imported by virtue of section 60(2).

### (B) *Having regard to decisions or statements of the Commission*

The competition authorities and courts under section 60(3) must ‘have regard to’ any relevant decision<sup>471</sup> or statement of the Commission; this is a lesser obligation than the obligation to ensure that there is no inconsistency under section 60(2). Decisions and statements of other bodies such as the Council of Ministers<sup>472</sup> or the European Parliament are not included. The Act itself does not explain what is meant by Commission statements. However the OFT’s view is that the statements must carry the authority of the Commission as a whole such as, for example, decisions in individual cases under Articles 101 and/or 102, Commission Notices and clear statements about its policy approach as published in its Annual Report on Competition Policy<sup>473</sup>. In *Albion Water Ltd*<sup>474</sup> the Court of Appeal held that the CAT was correct to direct itself by reference to the test of margin squeeze as expressly formulated in the European Commission’s guidance<sup>475</sup> and the case law<sup>476</sup>.

In *MasterCard UK Members Forum Ltd*<sup>477</sup> the OFT said that the duty to ‘have regard’ to Commission decisions and statements did not mean that it was bound to comply with them, but only to give serious consideration to them<sup>478</sup>.

<sup>468</sup> Section 60(1) puts the objective positively and is preferable to this double negative.

<sup>469</sup> ‘Treaty’ in this context refers to the EC Treaty (now the Treaty on the Functioning of the European Union): CA 1998, s 59(1); it would not apply to jurisprudence or decisions under the ECSC Treaty, nor under the EEA Agreement.

<sup>470</sup> ‘European Court’ refers to both the Court of Justice and the General Court: *ibid*; it does not refer to the opinions of the Advocates General, as to which see Buxton LJ in *Napp Pharmaceutical Holdings Ltd v Director General of Fair Trading* [2002] EWCA Civ 796, [2002] 4 All ER 376, who nevertheless characterised such opinions as ‘important and authoritative’; nor to the EFTA Court.

<sup>471</sup> On the meaning of decision see CA 1998, s 60(6).

<sup>472</sup> Documents such as the Minutes of the Council’s deliberations about the EUMR or Regulation 1/2003 would therefore not need to be considered, although they could be relevant in a particular case.

<sup>473</sup> *Modernisation*, OFT 442, para 4.11.

<sup>474</sup> *Dŵr Cymru Cyfyngedig v Albion Water Ltd* [2008] EWCA Civ 536, [2008] UKCLR 457.

<sup>475</sup> *Notice on the application of the competition rules to access agreements in the telecommunications sector* OJ [1988] C 265/2.

<sup>476</sup> *Dŵr Cymru Cyfyngedig v Albion Water Ltd* [2008] EWCA Civ 536, [2008] UKCLR 457, para 105, referring in particular to the judgment of the General Court in Case T-271/03 *Deutsche Telekom v Commission* [2008] ECR II-477, [2008] 5 CMLR 631, upheld on appeal Case C-280/08 P *Deutsche Telekom v Commission* [2010] ECR I-000, [2010] 5 CMLR 1495.

<sup>477</sup> OFT decision of 6 September 2005 [2006] UKCLR 236.

<sup>478</sup> *Ibid*, paras 107–116.

**(C) References to the Court of Justice**

The UK CAT, the Court of Appeal of England and Wales, the Court of Session in Scotland, the Court of Appeal in Northern Ireland and the UK Supreme Court can make references to the Court of Justice for a preliminary ruling under Article 267 TFEU. This is considered further in chapter 10<sup>479</sup>.

## 6. The Competition Act 1998 in Practice

The OFT maintains a register of decisions adopted by itself and by the sectoral regulators under the Competition Act. The following table sets out the decisions that have been adopted by 20 June 2011.

**Table 9.1 Table of published decisions of the OFT and sectoral regulators and appeals to the CAT<sup>1</sup> under the Competition Act 1998 and/or Articles 101 and 102 TFEU**

Case name	Date of decision	Outcome	On appeal to the CAT
<i>General Insurance Standards Council</i>	26.1.2001 and 11.5.2001	No infringement of Chapter I prohibition	Decision annulled <sup>2</sup>
<b>NB: second decision adopted 13.11.2002 – see below</b>			
<i>Napp Pharmaceutical Holdings Ltd</i>	5.4.2001	Infringement of Chapter II prohibition <b>Fine of £3.21m</b>	Finding of infringement upheld <b>Fine reduced to £2.2 million<sup>3</sup></b>
<i>Swan Solutions Ltd/ Avaya ECS Ltd (OFTEL)</i>	6.4.2001	No infringement of Chapter I and II prohibitions	
<i>DSG Retail Ltd ('Dixons')/ Compaq Computer Ltd/ Packard Bell NEC Ltd</i>	18.4.2001	No infringement of Chapter I and II prohibitions	
<i>BT Surf Together and BT Talk &amp; Surf Together pricing packages (OFTEL)</i>	4.5.2001	No infringement of Chapter II prohibition	
<i>Consignia and Postal Preference Service Limited</i>	15.6.2001 <sup>4</sup>	No infringement of Chapter II prohibition	

<sup>479</sup> See ch 10, 'Article 267 References', pp 449–450.

<b>Case name</b>	<b>Date of decision</b>	<b>Outcome</b>	<b>On appeal to the CAT</b>
<i>Aberdeen Journals Ltd</i> <b>NB: second decision adopted 16.09.2002 – see below</b>	16.7.2001	Infringement of Chapter II prohibition <b>Fine of £1.3 million</b>	Decision annulled and remitted to the OFT for re-definition of relevant product market <sup>5</sup>
<i>ICL/Synstar</i>	24.7.2001	No infringement of Chapter II prohibition	
<i>LINK Interchange Network Ltd</i>	16.10.2001	Infringement of Chapter I prohibition Granted an individual exemption	
<i>Memorandum of Understanding on the Supply of Oil Fuels</i>	25.10.2001	Infringement of Chapter I prohibition Granted an individual exemption No infringement of Chapter II prohibition	
<i>Virgin Trains (ORR)</i>	30.11.2001	No infringement of Chapter II prohibition	
<i>XDSL Wholesale Products of BT (OFTEL)</i>	24.1.2002	No infringement of Chapter II prohibition	
<i>Market sharing by Arriva plc and FirstGroup plc</i>	30.1.2002	Infringement of Chapter I prohibition <b>Fines of £848,027</b> (before leniency) <b>Fines of £203,632</b> (after leniency)	
<i>Notification by the Film Distributors' Association</i>	1.2.2002	No infringement of Chapter I prohibition	
<i>BT's Wholesale DSL Products: alleged anti-competitive pricing (OFTEL)</i>	28.3.2002	No infringement of Chapter II prohibition	
<i>Vodafone's distribution agreements for pre-pay mobile phone vouchers (OFTEL)</i>	05.4.2002	No infringement of Chapter I prohibition	

(continued)

**Table 9.1** (continued)

<b>Case name</b>	<b>Date of decision</b>	<b>Outcome</b>	<b>On appeal to the CAT</b>
<i>The North &amp; West Belfast Health and Social Services Trust</i> <b>NB: second decision adopted 23.12.03 – see below</b>	30.4.2002	No infringement of Chapter II prohibition	(i) Judgment holding that the OFT had made an appealable decision when rejecting BetterCare’s complaint <sup>6</sup> (ii) Judgment holding that the Health Trust was an undertaking and remitting the matter to the OFT <sup>7</sup>
<i>John Bruce (UK) Ltd, Fleet Parts Ltd and Truck and Trailer Components</i>	17.5.2002	Infringement of Chapter I prohibition <b>Fines of £33,737</b>	
<i>Agreement refusing to supply interconnection services for BT Ignite’s Multimedia Voice over Internet Protocol service (OFTEL)</i>	12.7.2002	Parties renounced agreement so case was closed	
<i>Harwood Park Crematorium Ltd</i> <b>NB: decision withdrawn, 9.4.2003; second decision adopted 12.8.2004 – see below</b>	6.8.2002	No infringement of Chapter II prohibition	
<i>Aberdeen Journals Ltd II</i> <b>NB: second decision</b>	16.9.2002	Infringement of Chapter II prohibition <b>Fine of £1.3 million</b>	Finding of infringement upheld on appeal <b>Fine reduced to £1 million<sup>8</sup></b>
<i>Companies House</i>	25.10.2002	No infringement of Chapter II prohibition	
<i>General Insurance Standards Council</i> <b>NB: second decision</b>	13.11.2002	No infringement of Chapter I prohibition following amendment of the GISC rules	

Case name	Date of decision	Outcome	On appeal to the CAT
<i>Lucite International UK Ltd</i>	29.11.2002	No infringement of Chapter I prohibition as the agreement was vertical and therefore covered by the Exclusion Order for vertical agreements; no reason to 'clawback' exclusion	
<i>Hasbro I</i>	6.12.2002	Infringement of Chapter I prohibition <b>Fine of £4.95 million</b>	Appeal withdrawn following grant of 100% leniency to Hasbro in <i>Hasbro II</i> – see below <sup>9</sup>
<i>ABTA and British Airways plc</i>	11.12.2002	No infringement of Chapter II prohibition	
<i>BT Group plc</i> <b>NB: second decision adopted 19.12.2003 – see below (OFTEL)</b>	9.1.2003	No infringement of Chapter II prohibition	(i) Judgment holding that OFTEL (the predecessor of OFCOM) had made an appealable decision <sup>10</sup> (ii) Judgment partially annulling OFTEL's decision but otherwise dismissing the appeal <sup>11</sup>
<i>BSkyB investigation</i> <b>NB: refusal to vary or withdraw decision 12.8.2003 – see below</b>	17.12.2002	No infringement of Chapter II prohibition	
<i>Northern Ireland Livestock and Auctioneers's Association</i>	4.2.2003	Infringement of Chapter I prohibition <b>No fine</b>	
<i>Elite Greenhouses Ltd</i>	14.2.2003	No infringement of Chapter I prohibition	

(continued)

- <sup>59</sup> Cases 1160/1/1/10 *Imperial Tobacco Group plc v OFT*, not yet decided.
- <sup>60</sup> Case No 1188/1/1/11 *Tesco Stores Ltd v OFT*, not yet decided.

A number of points can be made about the public enforcement of the Competition Act since March 2000.

### (A) Total number of infringement decisions

The OFT has found infringements of the Chapter I prohibition and Article 101 TFEU on 28 occasions; one of these decisions was set aside entirely on appeal to the CAT. The OFT will adopt formal decisions in the case of *British Airways* in due course. The OFT has found infringements of the Chapter II prohibition on five occasions. The ORR has found an infringement of Chapter II and Article 102 TFEU on one occasion, as has GEMA. The fines imposed, after allowing for reductions as a result of leniency, settlement negotiations and appeals to the CAT and the Court of Appeal, amount to £608.1 million.

## (B) Findings of infringement by the CAT

In addition to the findings of infringement by the OFT, the ORR and GEMA, on two occasions the CAT has made its own finding of an infringement of the Chapter II prohibition; this happened in appeals from non-infringement decisions of the OFT and Water Services Regulation Authority respectively. In *JJ Burgess & Sons v OFT*<sup>480</sup> the CAT concluded that W. Austin & Sons had abused a dominant position by refusing to grant access to Burgess, a competing firm of funeral directors, to its crematorium facilities at Harwood Park in Hertfordshire. In *Albion Water Ltd v Water Services Regulation Authority*<sup>481</sup> the CAT concluded that Dŵr Cymru had abused its dominant position by applying a margin squeeze to Albion Water, thereby preventing the latter from supplying water to a paper factory in Wales<sup>482</sup>.

## (C) Appeals against infringement decisions

Several of the OFT's infringement decisions have been appealed to the CAT. Most of them were upheld on substance. Some of the findings of infringements were set aside in the *Football Shirts* case<sup>483</sup> and in the *Construction bid-rigging* appeals<sup>484</sup>. The only infringement decision to have been overturned in its entirety was *Attheraces*<sup>485</sup>. The OFT had concluded that the collective selling by the Racecourse Association of the non-licensed betting office ('non-LBO') media rights to horseracing at 59 racecourses in Great Britain infringed the Chapter I prohibition; and that it did not satisfy the criteria of section 9(1) of the Competition Act, which provides a defence for restrictive agreements that produce economic efficiencies. The Racecourse Association (and the British Horseracing Board) appealed to the CAT, which disagreed with the OFT's analysis<sup>486</sup>. In the CAT's view the OFT had failed to define the relevant market correctly. The OFT had defined a market for non-LBO media rights, but the CAT considered that this was too narrow: the CAT concluded that this was a sufficient reason in itself to set the decision aside<sup>487</sup>. However the CAT also went on to consider whether, assuming the OFT had correctly defined the relevant market, the collective selling amounted to an infringement of the Chapter I prohibition<sup>488</sup>. In the CAT's opinion, the collective selling of the media rights in question was objectively necessary:

an acquisition via a central negotiation was the only realistic way forward both from the viewpoint of both bidder and sellers (*sic*) and we regard it as probable that any initial attempt at a self-assembly exercise via individual negotiations would have led quickly to a centrally negotiated one<sup>489</sup>.

<sup>480</sup> Case No 1044/2/1/04 [2005] CAT 25, [2005] CompAR 1151.

<sup>481</sup> Case No 1046/2/4/04 [2006] CAT 36, [2007] CompAR 328.

<sup>482</sup> *Dŵr Cymru Cyfyngedig v Albion Water Ltd* [2008] EWCA Civ 536, [2008] UKCLR 457; note that Albion subsequently brought a follow-on action for damages in the CAT: see ch 8, 'Section 47A: monetary claims before the CAT', p 318.

<sup>483</sup> Case Nos 1021/1/1/03 etc *JJB Sports plc v OFT* [2004] CAT 17, [2005] CompAR 29.

<sup>484</sup> Case No 1118/1/1/09 *GMI Construction Holdings plc v OFT* [2011] CAT 12; Case No 1121/1/1/09 *Durkan Holdings Ltd v OFT* [2011] CAT 6, paras 93–125; Case No 1122/1/1/09 *AH Willis & Sons Ltd v OFT* [2011] CAT 3; Case No 1124/1/1/09 *North Midland Construction plc v OFT* [2011] CAT 14, paras 14–34.

<sup>485</sup> OFT decision of 10 May 2004 [2004] UKCLR 995.

<sup>486</sup> Case Nos 1035/1/1/04 etc *Racecourse Association v OFT* [2005] CAT 29, [2006] CompAR 99.

<sup>487</sup> *Ibid*, paras 135–150.

<sup>488</sup> *Ibid*, paras 160–176.

<sup>489</sup> *Ibid*, para 171.

The CAT also concluded that the OFT had failed to demonstrate that collective selling led to an appreciable increase in price<sup>490</sup>, nor that it resulted in a loss of non-price competition<sup>491</sup>. The CAT's judgment in this case is a most interesting one, in which it takes a robust, 'commonsense' approach to the question of whether competition was restricted on the facts of the case. The discussion of the necessity of collective selling acknowledges that the *evidential* burden of proving such necessity lay with the parties to the agreement rather than with the OFT, even though the overall burden of showing an infringement of Chapter I was on the OFT<sup>492</sup>. The CAT noted the difficulty of reconciling the judgments of the Court of Justice in *Wouters*<sup>493</sup> and *Gottrup-Klim*<sup>494</sup> with the General Court's judgment in *Métropole v Commission*<sup>495</sup>, concluding, in relation to the Court of Justice's judgments, that:

What these cases show is that ostensibly restrictive arrangements which are *necessary* to achieve a proper commercial objective will not, or may not, constitute an anti-competitive infringement at all. Whether or not they will do so requires an objective analysis of the particular arrangement entered into by the parties, assessed by reference to their subjective 'wants' and against the evidence of the particular market in which they made their arrangement. The task then is to consider whether the restrictive arrangement of which complaint is made is 'necessary' to achieve the objective<sup>496</sup>.

#### (D) Total number of non-infringement decisions

The OFT and sectoral regulators have adopted 57 non-infringement decisions under the Chapter I and Chapter II prohibitions and/or Articles 101 and 102 TFEU. Four individual exemptions were granted before the abolition of notification and exemption, one of which was suspended on appeal.

#### (E) Appeals against non-infringement and case-closure decisions

The first decision of the OFT under the Competition Act, *General Insurance Standards Council*<sup>497</sup>, was a finding of non-infringement of the Chapter I prohibition, which was annulled on appeal to the CAT<sup>498</sup>. On several occasions third party complainants have challenged decisions by the OFT or one of the sectoral regulators to close the file before the CAT. The CAT has sometimes held that the authority had decided that the prohibitions in the Act had not been infringed and had made an implicit non-infringement decision; in several cases the CAT found that the authority had simply closed their file on administrative grounds, without expressing a view on the substance. These cases are discussed in chapter 10<sup>499</sup>.

<sup>490</sup> Ibid, paras 177–202.      <sup>491</sup> Ibid, paras 207–211.      <sup>492</sup> Ibid, paras 130–134.

<sup>493</sup> Case C-309/99 *Wouters v Algemene Raad van de Nederlandse Orde van Advocaten* [2002] ECR I-5777, [2002] 4 CMLR 913.

<sup>494</sup> Case C-250/92 *Gottrup-Klim Grovvarerforeiningen v Dansk Landburgs Grovvarerelskab AmbA* [1994] ECR-5641, [1996] CMLR 191.

<sup>495</sup> Case T-112/99 [2001] ECR II-2459, [2001] 5 CMLR 1236.      <sup>496</sup> See para 167 of the judgment.

<sup>497</sup> OFT decision of 26 January 2001.

<sup>498</sup> Case Nos 1002–1004/2/1/01 *Institute of Independent Insurance Brokers v Director General of Fair Trading* [2001] CompAR 62; on the GISC case see above 'General comments', p 335.

<sup>499</sup> See ch 10, 'Successful appeals against implicit non-infringement decisions', p 442.

**(F) Sectoral regulators**

There have been only two findings of an infringement by a sectoral regulator. The first was the case of *English Welsh & Scottish Railway Ltd*<sup>500</sup> and the second was the fine imposed on *National Grid* by GEMA<sup>501</sup>. In another case GEMA accepted commitments from SP Manweb, which had been accused by independent connection providers in the electricity sector of discriminatory behaviour in favour of its own affiliated connections business, that it would provide connection services in a non-discriminatory manner within recommended timescales<sup>502</sup>.

<sup>500</sup> ORR decision of 17 November 2006 [2007] UKCLR 937.

<sup>501</sup> GEMA decision of 21 February 2008, on appeal Case No 1099/1/2/08 *National Grid plc v Gas and Electricity Markets Authority* [2009] CAT 14, [2009] CompAR 282, on appeal [2010] EWCA Civ 114, [2010] UKCLR 386; permission to appeal to the Supreme Court was refused by order of 5 August 2010.

<sup>502</sup> See OFGEM press release R/42 of 27 October 2005, available at [www.ofgem.gov.uk](http://www.ofgem.gov.uk).

## Competition Act 1998 and the cartel offence: public enforcement and procedure

1. Introduction	393	6. The Cartel Offence and Company Director Disqualification	424
2. Inquiries and Investigations	394	7. Concurrence	437
3. Complaints and Super-Complaints	402	8. Appeals	439
4. Opinions and Informal Advice	403	9. Article 267 References	449
5. Enforcement	404		

### 1. Introduction

The Competition Act 1998 gives wide powers of enforcement to the Office of Fair Trading ('the OFT') and to the sectoral regulators. The exercise of these powers must satisfy the Human Rights Act 1998, which received the Royal Assent on the same day as the Competition Act 1998 (9 November 1998) and which entered into force on 2 October 2000<sup>1</sup>. The Enterprise Act 2002 amended and reinforced the Competition Act 1998 in significant ways: for example it simplified third party appeals<sup>2</sup> and made provision for monetary claims pursuant to findings of an infringement of UK or EU competition law by the competition authorities<sup>3</sup>; it provided for so-called 'super-complaints'<sup>4</sup>; it introduced a criminal 'cartel offence' which can result in the imprisonment of individuals for up to five years<sup>5</sup>; and it provided for company director disqualification where a director knew, or ought to have known, of an infringement of EU or UK competition law<sup>6</sup>. Significant changes were made to the Competition Act by the Competition Act 1998 and Other Enactments (Amendment) Regulations 2004<sup>7</sup> (the 'Amendment Regulations') in order to bring domestic law into alignment with the principles of Regulation 1/2003<sup>8</sup>; these changes are incorporated into the text that follows.

<sup>1</sup> On the Human Rights Act 1998 see 'Human Rights Act 1998 and Police and Criminal Evidence Act 1984', pp 400–401 below and, more generally, Lester, Pannick and Herberg *Human Rights Law and Practice* (LexisNexis, 3rd ed, 2009); for further discussion of procedural issues in the UK see Ward and Smith (eds) *Competition Litigation in the UK* (Sweet & Maxwell, 2003); O'Neill and Sanders *UK Competition Procedure* (Oxford University Press, 2007); Green and Brealey (eds) *Competition Litigation: UK Practice and Procedure* (Oxford University Press, 2010).

<sup>4</sup> See ch 11, 'Super-Complaints', pp 454–455.

<sup>5</sup> See 'The cartel offence', pp 425–434 below.

<sup>6</sup> See 'Company director disqualification', pp 435–436 below.

<sup>7</sup> SI 2004/1261.

<sup>8</sup> OJ [2003] L 1/1; see ch 7, 'Overview of Regulation 1/2003', pp 250–251.

This chapter will begin with a consideration of the way in which inquiries and investigations are carried out under the Competition Act. After a section on complaints and super-complaints it will consider the extent to which it may be possible to receive guidance from the OFT on the application of the Act. Section 4 deals with enforcement and section 5 with the cartel offence and company director disqualification. Section 6 considers the issue of concurrency. Section 7 contains a discussion of the appeal mechanism under the Competition Act and section 8 examines the possibility of Article 267 references to the Court of Justice. The private enforcement of the Competition Act (and of Articles 101 and 102 TFEU) in the UK was discussed in chapter 8 of this book<sup>9</sup>.

## 2. Inquiries and Investigations

The purpose of the 1998 Act is to eradicate cartels and abusive behaviour and it provides the OFT and the sectoral regulators with wide powers to conduct inquiries and investigations. These powers are set out in sections 25 to 29 of the Act as modified by the Amendment Regulations. Pursuant to Articles 20 to 22 of Regulation 1/2003 the OFT also has powers to conduct investigations on behalf of the European Commission or at the request of a national competition authority ('NCA') of another Member State of the EU: these powers are set out in sections 61 to 65 of the Competition Act, again as modified by the Amendment Regulations<sup>10</sup>. The OFT's powers to conduct inquiries and investigations are explained in some detail in the OFT's Guideline *Powers of investigation*<sup>11</sup>. The OFT has introduced a pilot project whereby rewards may be given to informants that provide it with intelligence about cartel behaviour<sup>12</sup>. These, and all the other guidance documents referred to in this chapter, are available on the OFT's website<sup>13</sup>.

In March 2011 the OFT published *A guide to the OFT's investigation procedures in competition cases*<sup>14</sup>: this guide does not replace earlier Guidelines, but it does contain detailed guidance on a number of aspects of both the law and practice on investigations under the Competition Act<sup>15</sup>.

Section 25 of the Competition Act provides that the OFT may conduct an investigation if there are 'reasonable grounds for suspecting' that either of the prohibitions in the Competition Act or that Article 101 or 102 TFEU have been infringed; this is often referred to as the 'section 25 threshold'<sup>16</sup>, and requires less evidence than an infringement decision<sup>17</sup>. Section 25 gives the OFT a discretion whether or not to conduct an investigation: it is not under a duty to conduct one. The manner in which the OFT conducts investigations, and the priority it gives to different phases of an investigation, are matters that

<sup>9</sup> See ch 8, 'Damages Actions in the UK Courts', pp 306–319.

<sup>10</sup> See 'EU investigations', p 402 below for a brief discussion of investigations under these provisions.

<sup>11</sup> OFT 404, December 2004.

<sup>12</sup> See OFT Press Release of 29 February 2008; more information is available at [www.of.gov.uk/advice\\_and\\_resources/resource\\_base/cartels/rewards](http://www.of.gov.uk/advice_and_resources/resource_base/cartels/rewards).

<sup>13</sup> [www.of.gov.uk](http://www.of.gov.uk).

<sup>14</sup> OFT 1263, March 2011, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>15</sup> The *Guide* does not apply to investigations undertaken by sectoral regulators: *ibid*, para 1.4.

<sup>16</sup> On the circumstances in which the OFT's powers can be used see *Powers of investigation*, para 2; the OFT's powers are equally available to the sectoral regulators listed in s 54 of the Competition Act and it should be assumed throughout this chapter that anything that applies to the OFT applies equally to them unless otherwise stated.

<sup>17</sup> On the section 25 threshold see further 'Written inquiries', pp 395–396 below; on the sources of the OFT's investigations see *A guide to the OFT's on investigation procedures*, ch 3.

fall within its discretion<sup>18</sup>. In *R (Cityhook Ltd) v OFT*<sup>19</sup> the Administrative Court held that the scope of the discretion conferred by section 25 does not become more circumscribed once a decision to investigate has been taken and an investigation commenced<sup>20</sup>.

A 2005 report by the National Audit Office ('NAO'), *The Office of Fair Trading: Enforcing competition in markets*<sup>21</sup>, suggested that the OFT should do more to improve the resourcing and prioritisation of its casework and the transparency and speed of its case management. The OFT accepted the NAO's conclusions<sup>22</sup>, and in October 2008 it published its *OFT Prioritisation Principles*<sup>23</sup> which explain the principles that the OFT takes into account when selecting a new project or case for investigation. In 2009 the NAO published a further report which recognised the progress that the OFT had made in this respect<sup>24</sup>. In *Cityhook*<sup>25</sup> the Administrative Court upheld the right of the OFT to prioritise its enforcement efforts. It is entitled, for example, to take into account consumer interests and the nature of an alleged infringement when selecting cases for investigation<sup>26</sup>. In *Tobacco* the OFT applied its *OFT Prioritisation Principles* when deciding to reduce the number of parties to its investigation in order to progress the case effectively and deliver a high impact outcome<sup>27</sup>.

The Act gives the OFT power to make written inquiries (section 26) and to enter business and domestic premises (sections 27 to 29)<sup>28</sup>. These powers are also available to enable the OFT to decide whether to apply for a company director disqualification order<sup>29</sup>.

### (A) Written inquiries<sup>30</sup>

Where the section 25 threshold has been reached, a written request for information may be made by a notice under section 26 requiring a person to produce to the OFT a specified document<sup>31</sup> or specified information which the OFT considers relevant to the investigation<sup>32</sup>. Where it is practical and appropriate to do so, the OFT will send the notice to the proposed addressee in draft<sup>33</sup>. The notice must indicate the subject-matter and purpose of the investigation<sup>34</sup> and the offences involved in the event of non-compliance<sup>35</sup>. Specification can be by reference to a particular item or by category and the notice may state when and where the document or information is to be provided as well as how and in what form<sup>36</sup>.

<sup>27</sup> OFT decision of 15 April 2010, para 2.99.

<sup>28</sup> Details of the inspections conducted by the OFT under the Act can be found in Annex C to the OFT's Annual Report and Resource Accounts 2008–09 (HC 475) and 2009–10 (HC 301). Note that ss 61–64 deal with investigations under Articles 101 and 102 TFEU.

<sup>29</sup> Company Directors Disqualification Act 1986, s 9C, inserted by Enterprise Act 2002, s 204.

<sup>30</sup> See *Powers of investigation*, para 3.

<sup>31</sup> Documents include 'information recorded in any form': for example records held on computers, mobile phones, mobile email and other electronic devices: Competition Act, s 59(1); see *Powers of investigation*, para 3.6.

<sup>32</sup> Competition Act 1998, s 26(1), (2). <sup>33</sup> *A guide to the OFT's investigation procedures*, para 6.8.

<sup>34</sup> Competition Act 1998, s 26(3)(a).

<sup>35</sup> *Ibid*, s 26(3)(b).

<sup>36</sup> *Ibid*, s 26(4) and (5); s 59(3) provides that, if information is not in legible form, the OFT may require a copy in legible form.

The OFT has the further power to take copies or extracts from a document produced in response to the notice and to ask for an explanation of it, or, if the document is not produced, to ask where it is believed to be<sup>37</sup>. Notices can be addressed to any person, which is defined to include an undertaking<sup>38</sup>; they may be sent not only to the undertakings suspected of infringement, but also to third parties such as complainants, suppliers, customers, competitors, liquidators or administrators of companies<sup>39</sup>. It should be noted that while section 26 applies equally to documents and to information, the Guideline on *Powers of investigation* makes clear that the power to obtain information means that the OFT can require a person to create a document incorporating that information: for example a person may be asked to provide market share information or to describe a particular market on the basis of their knowledge or experience or that of their staff<sup>40</sup>. Some section 26 notices are sent after on-site investigations in order to seek clarification of documents obtained<sup>41</sup>.

### (B) Power to enter premises without a warrant<sup>42</sup>

Section 27(1) of the Act provides that any officer of the OFT who is authorised in writing by the OFT to do so ('an investigating officer') may enter any business premises<sup>43</sup> in connection with an investigation under section 25<sup>44</sup>.

The operation of the power of entry varies depending on whether the premises are occupied by a 'third party', that is to say someone who is not suspected of an offence, or by a party under investigation for a possible infringement. In the case of a third party at least two working days' notice of the inspection must be given, together with a document explaining the subject-matter and the purpose of the investigation<sup>45</sup>. If, however, the officer has taken all reasonable steps to give notice but has been unable to do so he may dispense with the notice requirement<sup>46</sup>. In the case of a party under investigation there is no requirement to give prior warning or notice<sup>47</sup>, but the subject-matter and purpose of the investigation must be explained. It is not necessary for the OFT first to have attempted to obtain information under the powers conferred by section 26<sup>48</sup>.

When entering the premises the officer may:

- take with him any necessary equipment: this could be a laptop computer or tape-recording equipment<sup>49</sup>
- require 'any person'<sup>50</sup> to produce any documents which the officer considers relevant, to say where a document may be found, and, in relation to any document produced, may require an explanation of it

<sup>37</sup> Ibid, s 26(6); see 'Self-incrimination', pp 399–400 below for discussion of the scope of the power to request explanations and the law on self-incrimination.

<sup>38</sup> Ibid, which refers to the Interpretation Act 1978 ('person' includes a body of persons corporate or unincorporate).

<sup>39</sup> *Powers of investigation*, para 3.4.

<sup>40</sup> Ibid, para 3.7.

<sup>41</sup> Ibid, para 3.2.

<sup>42</sup> Ibid, para 4.

<sup>43</sup> Competition Act 1998, s 27(6); premises includes any land or means of transport: *ibid*, s 59(1).

<sup>44</sup> As to investigations under s 27 on Crown land see the Competition Act 1998, s 73(4)(a) and the Competition Act 1998 (Definition of Appropriate Person) Regulations 1999, SI 1999/2282; the Secretary of State may certify in the interests of national security that specified Crown premises may not be entered under this section (see s 73(8)).

<sup>45</sup> Competition Act 1998, s 27(2).

<sup>46</sup> Ibid, s 27(3)(b).

<sup>47</sup> Ibid, s 27(3)(a).

<sup>48</sup> *Powers of investigation*, para 3.2.

<sup>49</sup> Ibid, para 4.6.

<sup>50</sup> In this instance this term presumably (although not necessarily) refers to an individual rather than to an undertaking, but there is no restriction as to who the person needs to be; it could include secretaries, IT personnel and messengers as well as directors; see HL Committee, 17 November 1997, col 391 (Lord Simon of Highbury).

- take copies of or extracts from any document produced (but not the originals)
- require the production in visible, legible and portable form of any relevant information that is held on computer
- take any steps necessary to preserve or prevent interference with any document relevant to the investigation<sup>51</sup>.

The procedure when conducting an inspection without a warrant is explained in the OFT's Guideline<sup>52</sup>.

It is not permissible under section 27 to use force to enter or once on the premises; it follows that permitted equipment would not include crowbars or other tools. Section 27 entry may therefore be described as a 'right of peaceful entry'. Where force might be required to gain entry, as would be the case for example when the premises are unoccupied, the powers in section 28 must be used. Section 27 does not give a power of search: again this is available only under section 28.

### (C) Power to enter premises with a warrant<sup>53</sup>

The OFT may apply for a warrant giving power to enter and search business<sup>54</sup> or domestic premises<sup>55</sup> to named officers of the OFT<sup>56</sup> and to non-employees, such as IT experts, who may be able to assist with the investigation<sup>57</sup>. Where the OFT wishes to enter domestic premises it can be anticipated that the Human Rights Act 1998 might be invoked, since one of the 'Convention Rights' protected by that Act is the right to respect for private and family life, the home and correspondence<sup>58</sup>. A section 28 investigation cannot be conducted on Crown land<sup>59</sup>. The OFT also has powers to conduct inspections under the Enterprise Act 2002 where it has reasonable grounds for suspecting that the cartel offence established by section 188 of that Act has been committed<sup>60</sup>.

A warrant may be issued in specified circumstances by the High Court<sup>61</sup> and in this case reasonable force may be used to obtain entry<sup>62</sup>. The circumstances are that:<sup>63</sup>

- there are reasonable grounds for suspecting that a document sought by written notice, or by an investigation without a warrant, but not produced, is on the premises
- there are reasonable grounds for suspecting that a document that the OFT could obtain by written notice or by peaceful entry is on the premises but would be interfered with if it were required to be produced
- (in the case of business premises) entry without a warrant for the purpose of investigation has been impossible and there are reasonable grounds for suspecting that documents are on the premises that could have been required if entry had been obtained.

<sup>51</sup> Competition Act 1998, s 27(5); see also s 59(3).

<sup>53</sup> *Powers of investigation*, para 5; see also Peretz 'Warrants under Section 28 of the CA 1998: *OFT v D*' [2003] 2 Competition Law Journal 129.

<sup>54</sup> Competition Act 1998, s 28.

<sup>55</sup> *Ibid*, s 28A.

<sup>56</sup> *Ibid*, s 28(2) (business premises) and s 28A(2) (domestic premises).

<sup>57</sup> *Ibid*, s 28(3A) (business premises) and s 28A(4) (domestic premises).

<sup>58</sup> Human Rights Act, Sch 1, Art 8; case law of the EU Courts and the ECHR is discussed in the opening section of ch 7, p 249.

<sup>59</sup> Competition Act 1998, s 73(4)(b).

<sup>60</sup> See 'Powers of investigation and search', pp 427–428 below.

<sup>61</sup> Or the Court of Session in Scotland.

<sup>62</sup> Competition Act 1998, s 28(2)(a) (business premises) and s 28A(2)(a) (domestic premises).

<sup>63</sup> *Ibid*, s 28(1) (business premises) and s 28A(1) (domestic premises).

The section 28 powers therefore confer a ‘right of forcible entry’.

Investigation by warrant is a serious matter and the investigator’s powers are more extensive than under section 26 or 27. The subject-matter and purpose of the investigation, and the offences for non-compliance, must be indicated in the warrant itself<sup>64</sup>. It follows that the party being investigated should inspect this document carefully.

The investigators may use reasonable force to gain entry, but must lock the premises up in as secure a manner as they found them before leaving<sup>65</sup>. They may take ‘equipment’ to exercise such force but may not use force against any person<sup>66</sup>. As with investigations without a warrant the authorised officer may require documents to be produced, but the scope of this power depends on the situation in which the warrant was issued. The warrant will accordingly specify documents of ‘the relevant kind’<sup>67</sup>, that is to say those subject to a specific request under section 26 or 27, or those of the kind that could have been required on investigation under section 27 but were not provided. In addition to all the powers investigators would have on entry without a warrant, including the power to require information to be accessed from computers<sup>68</sup>, they can also take away *originals* of documents and retain them for three months if copying them on the premises is not practicable or if taking them away appears necessary to prevent their disappearance<sup>69</sup>. When acting under section 28, but not section 28A, investigating officers have the additional powers contained in section 50 of the Criminal Justice and Police Act 2001<sup>70</sup>. The investigators can also take any other necessary steps to preserve the existence of documents<sup>71</sup>. The procedure when conducting an inspection with a warrant is explained in the OFT’s Guideline<sup>72</sup>.

#### (D) Powers of surveillance

The OFT also has powers of directed surveillance and to make use of covert human intelligence sources in order to investigate infringements of the Competition Act<sup>73</sup>.

#### (E) Access to lawyers

There is no statutory right to obtain outside legal help in the case of an investigation with or without a warrant, and certainly none to delay the start of an investigation until an undertaking’s external lawyer arrives on the scene<sup>74</sup>. The OFT’s Rules provide expressly for this right ‘if the officer considers it reasonable in the circumstances to do so and if he is satisfied that such conditions as he considers...appropriate...will be complied

<sup>64</sup> *Ibid*, s 29(1).

<sup>65</sup> *Ibid*, s 28(5) (business premises), s 28A(6) (domestic premises).

<sup>66</sup> *Powers of investigation*, para 5.5.

<sup>67</sup> Competition Act 1998, s 28(2)(b) (business premises) and s 28A(2)(b) (domestic premises).

<sup>68</sup> *Ibid*, s 28(3).

<sup>69</sup> *Ibid*, s 28(2)(c), (7) (business premises) and s 28A(2)(c), (8) (domestic premises).

<sup>70</sup> See ‘Power to enter premises under a warrant’, p 428 below.

<sup>71</sup> Competition Act 1998, s 28(2)(d) (business premises) and s 28A(2)(d) (domestic premises).

<sup>72</sup> *Powers of investigation*, paras 5.10–5.14; *A guide to the OFT’s investigation procedures*, paras 6.25–6.36.

<sup>73</sup> See ‘Powers of surveillance’, pp 429–430 below.

<sup>74</sup> During the passage of the Competition Bill through Parliament Lord Simon of Highbury stated that the OFT would follow European Commission practice in this regard by giving a firm without internal legal assistance a reasonable period to obtain external help: HL Committee, 17 November 1997, col 404.

with<sup>75</sup>. The Guideline *Powers of investigation* provides further guidance on this issue<sup>76</sup>. The investigating officer will not wait for an external lawyer to arrive if the firm being investigated has an internal legal adviser<sup>77</sup>, apparently irrespective of whether he or she is specialised in competition law.

## (F) Limitation on the use of the powers of investigation<sup>78</sup>

### (i) Legal professional privilege

The OFT's power to obtain documents, whether by written notice or during an inspection, does not extend to privileged communications<sup>79</sup>. The privilege belongs to the client. Privileged communications are defined as communications either between a professional legal adviser and his client or those made in connection with, or in contemplation of, legal proceedings and which, for the purposes of those proceedings, would be protected from disclosure in High Court proceedings<sup>80</sup>. 'Professional legal adviser' includes professionally qualified lawyers employed by firms (in-house counsel) as well as those practising in their own right, and in this respect privilege under the 1998 Act is more extensive than under EU competition law<sup>81</sup>. Not only does EU law not extend to correspondence with 'in-house' (that is to say employed) lawyers; nor does it apply to dealings with independent professional lawyers not qualified in a Member State<sup>82</sup>. It follows that some communications can legitimately be withheld where the inspection is one that the OFT conducts on its own behalf but not where it is assisting the European Commission's own inspections under Articles 20 and 21 of Regulation 1/2003. The more generous domestic rules on privilege do apply where the OFT conducts an inspection on behalf of the European Commission<sup>83</sup> or on behalf of a competition authority of another Member State<sup>84</sup>.

In the case of a dispute as to privilege during an inspection the communication(s) in question may be sealed in an envelope<sup>85</sup>. If the OFT decides to require the disclosure of the communication(s), this decision is subject to judicial review.

### (ii) Self-incrimination

The OFT accepts that the privilege against self-incrimination means that it may not ask for explanations that might involve admissions of an infringement and will instead seek explanations of matters of fact, such as whether a particular employee was at a particular meeting<sup>86</sup>; however the distinction between these two will not always be clear-cut<sup>87</sup>. A statement made by a person in response to a requirement arising from sections 26 to 28A of the

<sup>75</sup> SI 2004/2751, r 3(1).

<sup>76</sup> *Powers of investigation*, paras 4.10–4.11; see also *A guide to the OFT's investigation procedures*, paras 6.33–6.34.

<sup>77</sup> *Powers of investigation*, para 4.11.

<sup>78</sup> *Ibid*, para 6.1.

<sup>79</sup> Competition Act 1998, s 30.

<sup>80</sup> On the English law of litigation privilege see Green and Brealey (eds) *Competition Litigation: UK Practice and Procedure* (Oxford University Press, 2010), chs 10 and 13; *Halsbury's Laws* (4th ed), paras 71–85; in Scotland the privilege is known as 'confidentiality of communications'.

<sup>81</sup> See *Powers of investigation*, paras 6.1–6.2, 9.7–9.9 and 10.5.

<sup>82</sup> For a discussion of privilege in EU competition law see ch 7, 'The Commission' powers, pp 268–269.

<sup>83</sup> Competition Act 1998, s 65A.

<sup>84</sup> *Ibid*, s 65J.

<sup>85</sup> *A guide to the OFT's investigation procedures*, para 7.3.

<sup>86</sup> *Powers of investigation*, para 6.6.

<sup>87</sup> The power of the OFT to obtain documents already in existence does not offend the right against self-incrimination: see Case C-301/04 P *Commission v SGL Carbon AG* [2006] ECR I-5915, [2006] 5 CMLR 877, paras 33–51; this judgment of the Court of Justice will apply to the OFT's actions by virtue of s 60(2) of the Competition Act, on which see ch 9, "Governing Principles Clause": Section 60 of the Competition Act 1998, pp 369–374.

Act cannot be used against him for the purposes of a prosecution under the cartel offence unless he makes statements inconsistent with it or adduces evidence in relation to it<sup>88</sup>.

The OFT's power to demand an 'explanation' of a document is expressly linked to and limited to documents that are produced<sup>89</sup>. However, in the case of an investigation with a warrant, an explanation can be sought in relation to 'any document appearing to be of the relevant kind'<sup>90</sup> without any specific reference to the document having been produced: this is because, in the case of a search, documents may be found as well as produced. The investigator could in theory require explanation of a document that appears to exist but which he has been unable to find, but the OFT's guidelines do not indicate any intention to act in this way.

### (iii) Confidentiality

There are detailed provisions in Part 9 of the Enterprise Act 2002 about restrictions on the disclosure of information obtained during the course of an investigation (and as a result of the operation of Part I of the Act generally) and these provide a degree of reassurance to disclosing parties. However parties subject to an investigation or to a request for information should identify any confidential information that is supplied to the OFT in order to support any subsequent claim that it should not be published or disclosed to anyone else; indeed the OFT will usually ask them to do this, particularly where significant amounts of information or numbers of documents are sought. There is no right to withhold information from the OFT's investigators on grounds of confidentiality<sup>91</sup>. The OFT's Guidelines explain the OFT's rights and obligations as regards publication<sup>92</sup>.

### (iv) Human Rights Act 1998 and Police and Criminal Evidence Act 1984 ('PACE')

In *Napp Pharmaceutical Holdings Ltd v Director General of Fair Trading*<sup>93</sup> the question arose whether penalty proceedings under the Competition Act were 'criminal' for the purpose of Article 6 of the European Convention on Human Rights, which is given effect in domestic law by the Human Rights Act 1998. The Competition Appeal Tribunal ('the CAT') held that proceedings under the Competition Act 1998 are 'criminal'<sup>94</sup> and that it followed from this that the undertaking concerned is entitled, amongst other things, to a fair and public hearing by an independent and impartial tribunal and to be presumed innocent: it is for the OFT to prove the infringements alleged<sup>95</sup>. However the CAT also concluded that this did not mean that they should be subject to the same rules of evidence or procedures as ordinary criminal proceedings<sup>96</sup>. In particular the CAT held that the Human Rights Act 1998 does not require that the criminal standard of proof 'beyond all reasonable doubt' should be applied; instead it concluded that the civil standard 'balance of probabilities' was the appropriate standard although, where a fine is imposed, this would require the OFT to provide 'strong and compelling evidence'<sup>97</sup>. The CAT added that that approach did not preclude the OFT from relying on presumptions, for example that a firm with a very high market share is dominant;

<sup>88</sup> Competition Act 1998, s 30A. <sup>89</sup> *Ibid*, ss 26(6)(a)(ii), 27(5)(b)(ii).

<sup>90</sup> *Ibid*, s 28(2)(e) (business premises) and s 28A(2)(b) (domestic premises).

<sup>91</sup> See r 6 of the OFT's Rules in relation to information provided by third parties; confidential information is defined in r 1(1).

<sup>94</sup> *Ibid*, paras 93 and 98; the European Court of Human Rights came to the same conclusion in *Menarini Diagnostics Srl v Italy*, judgment of 27 September 2011. See also the interim judgment, Case No 1001/1/1/01 [2001] CAT 3, [2001] CompAR 33, paras 69–70.

<sup>95</sup> Case No 1000/1/1/01 [2002] CAT 1, [2002] CompAR 13, para 99.

<sup>96</sup> *Ibid*, para 101.

<sup>97</sup> *Ibid*, paras 105 and 109.

such presumptions do not reverse the burden of proof or set aside the presumption of innocence<sup>98</sup>. In subsequent judgments the CAT has stressed that the standard of proof is the balance of probabilities, laying less emphasis on the requirement that evidence should be ‘strong and compelling’<sup>99</sup>. The CAT may have felt that the latter standard was having a chilling effect on findings of infringements by the OFT and the sectoral regulators. The High Court adopts the same approach to the burden and standard of proof as the CAT<sup>100</sup>.

On a separate point, in *Toys and Games*<sup>101</sup> the OFT rejected an argument that it should, when conducting interviews with employees of Hasbro Ltd as to the possibility of an infringement of the Chapter I prohibition, have complied with the procedures required by PACE<sup>102</sup>. The OFT has indicated that it would act in accordance with PACE when investigating a possible commission of the cartel offence<sup>103</sup>.

### (G) Offences<sup>104</sup>

There are criminal sanctions for non-compliance with the powers of investigation. These offences must be indicated in section 26 notices and in warrants issued under sections 28 and 28A and must also be mentioned at the outset of voluntary interviews. Individuals as well as legal persons may commit offences; the penalties in some cases include imprisonment<sup>105</sup>. The relevant offences are set out in sections 42 to 44 of the Competition Act and fall into five main categories:

- failing to comply with a requirement imposed under sections 26, 27, 28 or 28A<sup>106</sup>
- intentionally obstructing an officer investigating without a warrant<sup>107</sup>
- intentionally obstructing an officer investigating with a warrant<sup>108</sup>
- intentionally or recklessly destroying, disposing of, falsifying or concealing documents, or causing or permitting those things to happen<sup>109</sup>
- knowingly or recklessly supplying information which is false or misleading in a material particular either directly to the OFT, or to anyone else, knowing it is for the purpose of providing information to the OFT<sup>110</sup>.

The Act allows various defences to these penal provisions. If a person is charged with not producing a document it is a defence to show that he did not have it in his possession or control and it was not reasonably practical for him to get it<sup>111</sup>. A similar statutory defence applies to failure to provide information. In relation to all requirements under sections 26 and 27 (written notice and investigation without a warrant) there is a general defence if the investigator failed to act in accordance with the section<sup>112</sup>. This shows the importance of ensuring that all the procedural steps are properly taken. There is no statutory defence in relation to investigations with a warrant, presumably because the judge asked to issue the warrant would effectively consider them anyway; furthermore it is possible to challenge

<sup>98</sup> *Ibid*, paras 110–111.

<sup>99</sup> See eg Case Nos 1021 and 1022/1/1/03 *JJB Sports plc and Allsports Ltd v OFT* [2004] CAT 17, [2005] CompAR 29, paras 195–208; also Case No 1061/1/1/06 *Makers UK Ltd v OFT* [2007] CAT 11, paras 45–52.

<sup>100</sup> See eg *Chester City Council v Arriva* [2007] EWHC 1373, [2007] UKCLR 1582, para 10; *Bookmakers’ Afternoon Greyhound Services v Amalgamated Racing* [2008] EWHC 1978, [2009] UKCLR 547, para 392.

<sup>101</sup> *Hasbro UK Ltd, Argos Ltd and Littlewoods Ltd* OFT decision of 19 February 2003, [2003] UKCLR 553.

<sup>102</sup> *Ibid*, para 186. <sup>103</sup> *Powers for investigating criminal cartels*, OFT 515, January 2004, para 4.1.

<sup>104</sup> *Powers of investigation*, para 7. <sup>105</sup> See below.

<sup>106</sup> Competition Act 1998, s 42(1). <sup>107</sup> *Ibid*, s 42(5). <sup>108</sup> *Ibid*, s 42(7).

<sup>109</sup> *Ibid*, s 43(1). <sup>110</sup> *Ibid*, s 44(1), (2). <sup>111</sup> *Ibid*, s 42(2), (3).

<sup>112</sup> *Ibid*, s 42(4).

the issue of the warrant itself. There are no statutory defences to the charges of knowingly or recklessly destroying documents or providing false or misleading information.

The penalties can be substantial and depend on whether the offence is tried summarily or is serious enough to be taken on indictment to the Crown Court<sup>113</sup>. Usually the penalties are financial but in the case of any obstruction of investigators with a warrant, destruction of documents or provision of false or misleading information imprisonment for up to two years is possible (as well as a fine in some cases)<sup>114</sup>.

As already described the powers of investigation, and the offences, are applicable to ‘persons’, which can include an undertaking<sup>115</sup>. In addition, under section 72, officers of bodies corporate are liable to punishment if they have consented to or connived at an offence or it is due to neglect on their part<sup>116</sup>. Officer means a director, manager, secretary or other similar officer, or anyone purporting to act as such<sup>117</sup>. There are similar provisions applicable to companies managed by their members (who can be liable) and, in Scotland, to partners and partnerships<sup>118</sup>. The fact that individuals themselves can be personally liable under these provisions of the Competition Act, and that there is even a possibility of imprisonment, will no doubt concentrate the minds of those responsible for ensuring compliance with the legislation<sup>119</sup>.

## (H) EU investigations

The European Commission has power, under Articles 20 and 21 of Regulation 1/2003, to conduct on-site investigations in relation to possible infringements of Articles 101 and 102 TFEU, and may seek the assistance of an NCA when doing so. Article 22(1) of the Regulation enables the Commission to ask an NCA to conduct an investigation on its behalf, and Article 22(2) gives the same power to the competition authorities of the other Member States of the EU<sup>120</sup>. Sections 61 to 65 of the Competition Act 1998 set out, in considerable detail, the rules that govern inspections by the OFT under Regulation 1/2003, and the OFT has provided guidance on their application in practice<sup>121</sup>.

## 3. Complaints and Super-Complaints

### (A) Complaints

Although the Competition Act 1998 does not establish a procedure for complaining to the OFT, complaints are an important source of information about possible infringements.

<sup>113</sup> *Powers of investigation*, para 7.5; the offence would be tried in the High Court of Justiciary in Scotland.

<sup>114</sup> Competition Act 1998, ss 42(6), (7), 43(2), 44(3); *Powers of investigation*, para 7.7 describes the penalties in detail.

<sup>115</sup> Competition Act 1998, s 59(1); see *Powers of investigation*, para 4.3.

<sup>116</sup> Competition Act 1998, s 72(2); see *Powers of investigation*, para 7.4.

<sup>117</sup> Competition Act 1998, s 72(3).

<sup>118</sup> *Ibid*, s 72(4)–(6).

<sup>119</sup> This point is even more significant given the existence of the criminal cartel offence (‘The cartel offence’, pp 425–434) and company director disqualification (‘Company director disqualification’, pp 435–436).

<sup>120</sup> The OFT conducted an investigation on behalf of the French Competition Authority in a case that resulted in fines for four oil companies that distorted competition in a tender process organised by Air France: see Press Release of 4 December 2008, available at [www.autoritedelaconurrence.fr/](http://www.autoritedelaconurrence.fr/).

<sup>121</sup> *Powers of investigation*, paras 9 and 10.

Provision is made in the OFT's *A guide to the OFT's investigation procedures*<sup>122</sup> for a 'pre-complaint discussion' as to whether a matter would be likely to be investigated if a formal complaint were to be made.

The OFT has issued a Guideline on *Involving third parties in Competition Act investigations*<sup>123</sup> which sets out the mandatory<sup>124</sup> and optional<sup>125</sup> information that should be included in a written, reasoned complaint; this may lead to the establishment of 'Formal Complainant' status. A Formal Complainant enjoys defined rights in relation to file closures<sup>126</sup>, statements of objections<sup>127</sup> and interim measures applications<sup>128</sup>. The OFT aims to inform a complainant whether it will conduct an investigation under the Act within four months of the complaint<sup>129</sup>.

Complaints raise questions of confidentiality which can be difficult. Where a complainant provides confidential information to the OFT<sup>130</sup> the OFT requires a non-confidential version of such information that can be disclosed to the complainee<sup>131</sup>. Some complainants wish to remain anonymous and this can make it difficult for the OFT to pursue the complaint. The complainant should explain to the OFT why its identity should not be disclosed; if the OFT is satisfied that this is the case it will seek to maintain the anonymity 'to the extent that this is consistent with the OFT's statutory obligations'<sup>132</sup>; this may not be sustainable once the OFT proposes to adopt an infringement decision<sup>133</sup>. Part 9 of the Enterprise Act 2002 contains rules against the disclosure of certain information about individuals or undertakings unless disclosure is permitted by one of the so-called 'gateways' set out in sections 239 to 242 of the Act. These provisions are explained in the OFT's guidelines<sup>134</sup>. The OFT's Procedural Adjudicator may resolve disputes as to confidentiality<sup>135</sup>.

The right of a complainant to challenge a rejection of a complaint is considered in section 7 below<sup>136</sup>.

## (B) Super-complaints

The Enterprise Act 2002 provides a procedure whereby nominated bodies may make a 'super-complaint' to the OFT or to a sectoral regulator: this possibility is dealt with in the chapter on market investigations under that Act<sup>137</sup>.

## 4. Opinions and Informal Advice

The Competition Act as originally enacted provided a system of notification to the OFT for guidance or a decision as to whether the Chapter I or Chapter II prohibitions were

<sup>122</sup> OFT 1263, March 2011, paras 3.17–3.21; see also *OFT's Prioritisation Principles*, OFT 953, October 2008.

<sup>123</sup> OFT 451, April 2006.

<sup>124</sup> *Ibid*, Annexe, Part B (setting out the mandatory information to be included).

<sup>125</sup> *Ibid*, Annexe, Part C (setting out the optional information to be included).

<sup>126</sup> *Ibid*, para 2. <sup>127</sup> *Ibid*, para 3. <sup>128</sup> *Ibid*, para 4.

<sup>129</sup> *A guide to the OFT's investigation procedures*, para 4.6.

<sup>130</sup> Confidential information for this purpose is defined in r 1(1) of the OFT's Rules, SI 2004/2751.

<sup>131</sup> *Involving third parties*, para 2.14.

<sup>132</sup> *Ibid*, para 2.15; see also *A guide to the OFT's investigation procedures*, para 3.22.

<sup>133</sup> *Guide on investigation procedures*, para 3.23.

<sup>134</sup> OFT 442, December 2004, para 9 and *A guide to the OFT's investigation procedures*, paras 7.6–7.11.

<sup>135</sup> On the Procedural Adjudicator see 'Procedure', p 405 below.

<sup>136</sup> See 'Appeals', pp 439–449 below.

<sup>137</sup> See ch 11, 'Super-Complaints', pp 454–455.

being infringed<sup>138</sup>. The abolition of notification under EU law<sup>139</sup> has been mirrored in domestic law: the Amendment Regulations repealed the provisions on notification with effect from 1 May 2004. This led the OFT, in its Guideline *Modernisation*<sup>140</sup>, to set out in Part 7 the circumstances in which it might provide an Opinion<sup>141</sup> or give informal advice<sup>142</sup>.

### (i) Opinions

The OFT will consider a request for an Opinion only where the following three conditions are fulfilled:

- there is no sufficient precedent in EU or UK case law
- there is a need for a published Opinion, for example because of the economic importance for consumers of the goods or services affected by the agreement or conduct in question or because of the scope of the investment related to the agreement or conduct
- it is possible to provide an Opinion without the need for substantial further fact-finding<sup>143</sup>.

Undertakings that request an Opinion may withdraw their request<sup>144</sup>. Any Opinion given by the OFT will be published on its website<sup>145</sup>. One Opinion had been issued by 20 June 2011: in October 2008 the OFT issued an Opinion providing detailed guidance to facilitate 'self-assessment' of agreements for the distribution of newspapers and magazines under the Competition Act<sup>146</sup>.

As part of the procedure on giving Opinions the OFT has introduced a trial process whereby it may give a 'Short-form Opinion' on how EU and/or UK competition law applies to a prospective collaboration between competitors that raises novel or unresolved questions<sup>147</sup>. Short-form Opinions are subject to both the criteria that apply to Opinions and the *OFT's Prioritisation Principles*. One Short-form Opinion had been issued by 20 June 2011; it concerned a joint purchasing agreement<sup>148</sup>.

### (ii) Informal advice

The OFT may provide confidential informal advice to undertakings on the application of EU and/or UK competition law on an *ad hoc* basis, but such advice is not binding<sup>149</sup>, and would not be given in a case that does not satisfy the *OFT's Prioritisation Principles*.

## 5. Enforcement

This section will explain the various possibilities that exist where the OFT or a sectoral regulator<sup>150</sup> intends to take enforcement action under the Competition Act.

<sup>138</sup> The relevant provisions were the Competition Act, ss 12–16 and Schs 5 and 6; they are described at pp 371–376 of the fifth edition of this book.

<sup>139</sup> See ch 4, 'Regulation 1/2003', pp 166–168. <sup>140</sup> OFT 442, December 2004.

<sup>141</sup> *Modernisation*, paras 7.5–7.19. <sup>142</sup> *Ibid*, para 7.20.

<sup>143</sup> *Ibid*, para 7.5. <sup>144</sup> *Ibid*, para 7.14. <sup>145</sup> *Ibid*, para 7.15.

<sup>146</sup> OFT 1025, October 2008; see Muysert and Dobson 'Split Opinion: The Office of Fair Trading Opinion on Newspaper and Magazine Distribution' [2010] *Competition Law Journal* 262.

<sup>147</sup> See OFT Press Release 44/10, 27 April 2010; an explanation of the short-form opinion process is available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>148</sup> *P&H/Makro joint purchasing agreement*, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>149</sup> *Modernisation*, para 7.20. <sup>150</sup> As defined in the Competition Act 1998, s 54 (as amended).

## (A) Procedure

Where the OFT has ‘reasonable grounds for suspecting’ an infringement of the Act or of Article 101 or 102 TFEU it will first carry out an investigation pursuant to section 25. The OFT has introduced a trial process whereby parties may ask the Procedural Adjudicator to review decisions by the case team on certain procedural matters such as confidentiality<sup>151</sup>. If, as a result of that investigation, the OFT proposes to adopt a decision that there is or has been an infringement of the Chapter I and/or Chapter II prohibition or of Articles 101 and/or 102 TFEU section 31 of the Act requires it to give ‘written notice’ – better known as a ‘statement of objections’ – to the person or persons ‘likely to be affected’<sup>152</sup> and to give that person (or persons) an opportunity to make representations<sup>153</sup>. The form of the statement of objections is set out in rules 4 and 5 of the OFT’s Rules<sup>154</sup>; rule 5 also deals with access to the file<sup>155</sup> and the right to make oral representations<sup>156</sup>. The CAT summarised the principles applicable to the statement of objections in *Apex v OFT*<sup>157</sup>; in that case it concluded that a defect in the statement of objections should not lead to the annulment of the decision since the defect had not caused Apex any prejudice<sup>158</sup>. Chapter 9 of *A guide to the OFT’s investigation procedures* explains how it goes about its assessment of evidence and arguments received in response to a statement of objections.

Various possibilities exist following the issue of a statement of objections. One is that the OFT might decide not to proceed with the case or to state that it has no grounds for action<sup>159</sup>. A different possibility is that the OFT may close a case, without a finding of infringement, by accepting legally binding ‘commitments’ that the undertaking(s) will modify their behaviour in order to resolve the competition problems that led to the initiation of the investigation (see section B below). Provision is made for the OFT to adopt interim measures during an investigation (section C). Where the OFT finds an infringement it may give directions to bring the infringement to an end (section D) and may require an infringing undertaking to pay a penalty (section E). Undertakings that ‘blow the whistle’ on infringements of the Chapter I prohibition or Article 101 may be able to claim immunity from penalties, or at least substantial reductions (section F). Some infringement decisions are adopted following discussions between the OFT and the undertakings concerned that are sometimes referred to as ‘early resolution’ or settlements (section G). Section H will consider how the provisions on penalties have been applied in practice.

## (B) Commitments

Just as Article 9 of Regulation 1/2003 introduced a procedure enabling the European Commission to adopt a decision whereby undertakings under investigation make legally-binding commitments as to their future behaviour in order to address its competition concerns, so too the Amendment Regulations introduced sections 31A to 31E into the Competition Act 1998. The OFT has published guidance on the commitments procedure in Part 4 of *Enforcement*<sup>160</sup>. Section 31(2) enables the OFT to accept commitments from

<sup>151</sup> See *A guide to the OFT’s investigation procedures*, paras 6.14, 7.11, 9.17, 12.4 and 14.2; see also *Trial of Procedural Adjudicator in Competition Act 1998 Cases: Briefing Note*, March 2011, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>152</sup> Competition Act 1998, s 31(1)(a). <sup>153</sup> *Ibid*, s 31(1)(b). <sup>154</sup> SI 2004/2751.

<sup>155</sup> *Ibid*, r 5(3). <sup>156</sup> *Ibid*, r 5(4).

<sup>157</sup> Case No 1032/1/1/04 [2005] CAT 4, [2005] CompAR 507, para 100.

<sup>158</sup> *Ibid*, paras 109–110, relying on the General Court’s judgment in Case T-48/00 *Corus UK v Commission* [2004] ECR II-2325, paras 154–158.

<sup>159</sup> On challenges to such decisions before the CAT see ‘Appealable decisions’, pp 440–443 below.

<sup>160</sup> *Enforcement*, OFT 407, December 2004; on the advantages of the commitments regime over accepting voluntary assurances see the judgments of the CAT in Case No 1017/2/1/03 *Pernod-Ricard SA v OFT* [2005]

undertakings to take such action or to refrain from taking such action as the OFT considers appropriate; provision is made for the variation<sup>161</sup>, substitution<sup>162</sup> and release<sup>163</sup> of commitments. Schedule 6A to the Act sets out the procedural requirements that are to be followed in commitments cases. Where the OFT accepts commitments it will discontinue its investigation and it cannot make a decision finding an infringement under section 31 or issue a direction under section 35<sup>164</sup>. Where an undertaking fails to adhere to its commitments the OFT may apply to the court for an order to enforce compliance<sup>165</sup>.

It is for the undertakings concerned to approach the OFT to discuss the possibility of commitments. The OFT has said that it is likely to consider accepting commitments only in limited cases where the competition concerns are readily identifiable and are fully addressed by the commitments offered and where the commitments are capable of being implemented effectively and, if necessary, within a short period of time<sup>166</sup>. The OFT would not, other than in very exceptional cases, accept commitments in the case of hard-core cartels or serious abuses of dominance<sup>167</sup>; however such cases might culminate in a settlement whereby the undertakings concerned are fined a lesser sum than they would have been in return for enabling the OFT to reach an infringement decision more quickly than would otherwise have been the case<sup>168</sup>. Commitments may be both structural and behavioural<sup>169</sup>. There is a consultation process under the commitments procedure in which third parties are given an opportunity to comment<sup>170</sup>. If accepted the OFT will publish the full text of the commitments on its website. Decisions by the OFT not to release commitments when requested by the parties that offered them to do so can be appealed to the CAT<sup>171</sup>, as can decisions where there are no longer grounds for competition concerns<sup>172</sup>; third parties can appeal to the CAT against decisions to accept or release commitments or to accept a material variation<sup>173</sup>.

By 20 June 2011 commitments had been accepted in three cases. In *TV Eye* the OFT accepted commitments from TV Eye, a company owned by four broadcasters, to modify some of the terms and conditions on which it sold airtime to media agencies, thereby placing them in a stronger bargaining position<sup>174</sup>. The OFT also accepted commitments in *Associated Newspapers* where that company agreed to modify the exclusive contracts that it had entered into with London Underground, Network Rail and several train operating companies, in order to provide for the distribution at their railway stations of competing newspapers<sup>175</sup>. In *Manweb*<sup>176</sup> the Gas and Electricity Markets Authority accepted commitments that Manweb would provide connection services to independent providers in a non-discriminatory manner and within recommended timescales<sup>177</sup>. In January 2011 the OFT announced that it may accept commitments to address concerns arising out of

the exchange of pricing information between motor car insurers using a market analysis tool<sup>178</sup>.

### (C) Interim measures

If the OFT has begun an investigation under section 25 and has not completed it, it may adopt interim measures if this is necessary as a matter of urgency to prevent serious, irreparable damage to a particular person or category of persons or to protect the public interest<sup>179</sup>; however it cannot adopt interim measures if undertakings are able to show on the balance of probabilities that the criteria in section 9 of the Competition Act or Article 101(3) TFEU are satisfied<sup>180</sup>. The OFT must give notice to the affected persons before giving directions, thus giving them an opportunity to make representations<sup>181</sup>. Such notice must indicate the nature of the proposed direction and the OFT's reasons<sup>182</sup>. The OFT has indicated that it may be willing, in some cases, to accept informal interim assurances in lieu of adopting formal interim measures decisions<sup>183</sup>; it has accepted informal assurances on a few occasions<sup>184</sup>. Decisions by the OFT to grant or refuse interim measures can be appealed to the CAT<sup>185</sup>.

The only occasion on which the OFT adopted an interim measures decision was in the case of *London Metal Exchange*<sup>186</sup> where the OFT was concerned that the LME might have been about to abuse its dominant position by extending the hours of trading on its electronic trading platform, LME Select: it was possible that this might amount to predatory conduct. The LME appealed to the CAT against this decision; subsequently the OFT, having received substantial new evidence, withdrew the decision. In a judgment awarding the LME the costs of the work done on the appeal the CAT likened the process in interim measures cases to the procedure before the High Court when a party seeks an interim injunction<sup>187</sup>. The OFT should be circumspect about relying solely on uncorroborated information not contained in response to a section 26 notice<sup>188</sup>.

### (D) Directions

Section 32(1) of the Competition Act provides that, when the OFT has made a decision that an agreement infringes the Chapter I prohibition or Article 101 TFEU, it may give to such person or persons as it considers appropriate directions to bring the infringement to an end. Section 32(3) expands on the content of these directions which may require the parties to an agreement to modify it or require them to terminate it. There are corresponding provisions in section 33 for directions in the case of infringements of

<sup>178</sup> See OFT Press Release 04/11, 13 January 2011; in September 2011 the OFT consulted on modified commitments: see OFT Press Release 108/11; the Press Releases are available, along with the consultation document and proposed commitments, at [www.of.gov.uk](http://www.of.gov.uk).

<sup>179</sup> Competition Act 1998, s 35(1) and (2); the OFT Guideline *Enforcement*, OFT 407, December 2004, explains the OFT's approach to the interim measures procedure.

<sup>180</sup> Competition Act 1998, s 35(8) and (9).

<sup>181</sup> *Ibid*, s 35(3); see also the OFT's Rules, r 9.

<sup>182</sup> Competition Act 1998, s 35(4).

<sup>183</sup> *Enforcement*, paras 3.17–3.20.

<sup>184</sup> See eg *Robert Wiseman Dairies* OFT Press Release PN 39/01, 14 September 2001; *Oakley (UK) Ltd*, case closure of February 2007; *Nationwide Independent Bodyshop Suppliers Ltd*, case closure of February 2009, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>185</sup> Competition Act 1998, ss 46(3) and 47(1)(d)–(e).

<sup>186</sup> OFT decision of 27 February 2006.

<sup>187</sup> Case No 1062/1/1/06 *London Metal Exchange v OFT* [2006] CAT 19, [2006] CompAR 781, paras 139–140, citing the *Practice Direction – Interim Injunctions* (CPR Part 25); the OFT subsequently closed the file in this case on 20 April 2007, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>188</sup> Case No 1062/1/1/06 [2006] CAT 19, [2006] CompAR 781, paras 141–142.

the Chapter II prohibition or Article 102 TFEU; in this case section 33(3) provides that the direction may require the person concerned to modify the conduct in question, or require him to cease that conduct. In either case directions may also include other provisions such as positive action and reporting obligations<sup>189</sup>. Recipients of directions must be informed in writing of the facts on which the directions are based and the reasons for them<sup>190</sup>; directions under sections 32 and 33 must be published<sup>191</sup>.

### (i) Can directions be structural?

It is not clear whether the power to give directions includes the right to impose structural remedies such as the right to require the divestiture of assets or the break-up of an undertaking; Article 7 of Regulation 1/2003 explicitly provides that the European Commission can impose structural and behavioural remedies<sup>192</sup>. Where an infringement of the Chapter I or II prohibitions or of Article 101 or 102 is itself the consequence of a structural change in the market it would seem, in principle, that a structural remedy to bring the infringement to an end would be justified: for example if undertakings were to establish, contrary to the Chapter I prohibition or Article 101, a joint venture company to act as a joint sales agency the most effective remedy would probably be a structural one, requiring the dissolution of the company. It is less obvious, however, that it is possible to impose a structural remedy, for example, to break up a dominant firm guilty of serial abusive behaviour; such a situation would appear to be more suitable for a market investigation reference under the Enterprise Act 2002, under which legislation a structural remedy is, explicitly, available<sup>193</sup>.

### (ii) The directions provisions in practice

In some cases the OFT refrains from giving directions since the infringement of the Act has ended by the time of its decision<sup>194</sup>. However in other cases the OFT has issued directions: for example in *Napp*<sup>195</sup> that company was ordered to amend its prices for certain morphine medicines to bring its abusive pricing to an end, while in *Lladró Comercial* the OFT required the porcelain producer to modify its distribution agreements to make clear that the practice of resale price maintenance would not continue<sup>196</sup>. Similarly in *Genzyme*<sup>197</sup> the OFT obliged that company to charge separately for *Cerezyme*, a drug that it produced, and for the various homecare services it provided; and to offer *Cerezyme* to competing homecare operators at a price no higher than that charged to the National Health Service<sup>198</sup>. There were protracted proceedings in the CAT as to the correct price to be charged by *Genzyme*<sup>199</sup>, during which the CAT stated that the primary responsibility

<sup>189</sup> See *Enforcement*, para 2.3. <sup>190</sup> OFT Rules, SI 2004/2751, r 8(1).

<sup>191</sup> *Ibid*, r 8(3). <sup>192</sup> See ch 7, 'Structural remedies', p 254.

<sup>193</sup> See ch 11, 'Final powers', pp 476–477 and in particular the discussion of the investigation of BAA Ltd.

<sup>194</sup> See eg *Price fixing and market sharing in stock check pads*, OFT decision of 31 March 2006 [2007] UKCLR 211, para 235; *Agreement to fix prices and share the market for aluminium double glazing bars*, OFT decision of 28 June 2006 [2006] UKCLR 921, para 535.

<sup>195</sup> *Directions given by the Director General of Fair Trading under section 33 of the Competition Act 1998 to Napp Pharmaceutical Holdings Ltd and its subsidiaries*, 4 May 2001, upheld on appeal Case No 1000/1/1/01 *Napp Pharmaceutical Holdings Ltd v Director General of Fair Trading* [2002] CAT 1, [2002] CompAR 13, [2002] ECC 177, paras 553–562.

<sup>196</sup> OFT decision of 31 March 2003, [2003] UKCLR 652, paras 117–118.

<sup>197</sup> OFT decision of 27 March 2003, substantially upheld on appeal Case No 1016/1/1/03 *Genzyme Ltd v OFT* [2004] CAT 4, [2004] CompAR 358.

<sup>198</sup> Case No 1016/1/1/03 *Genzyme Ltd v OFT* [2005] CAT 32, [2006] CompAR 195.

<sup>199</sup> Case No 1013/1/1/03 (IR) *Genzyme Ltd v OFT* [2003] CAT 8, [2003] CompAR 290.

for bringing the abuse to an end in that case rested with Genzyme, rather than with the OFT or the CAT<sup>200</sup>.

In the case of *English Welsh & Scottish Railway*<sup>201</sup> the Office of Rail Regulation ('ORR') found that EW&S was guilty of abusing a dominant position in the market for the carriage by rail of industrial coal to power stations; it gave directions to EW&S requiring it to remove or modify various terms in the coal carriage agreements it had entered into with some of its customers, including the power company E.ON<sup>202</sup>. E.ON appealed against these directions to the CAT, arguing that they were excessive in scope and too uncertain to be valid<sup>203</sup>. In the meantime the High Court held in *English Welsh & Scottish Railway v E.ON UK* that the directions of the ORR meant that the offending clauses had been void from their inception and that, since they could not be severed, the entire coal carriage agreement was void and unenforceable<sup>204</sup>. E.ON appealed against this judgment to the Court of Appeal, but the case was settled out of court; the CAT subsequently granted E.ON permission to withdraw its appeal.

In *National Grid v GEMA*<sup>205</sup> the CAT did not accept the criticism that the regulator's direction that National Grid 'refrain from engaging in conduct having the same or equivalent exclusionary effect' to its abusive contracts was unacceptably vague or inappropriate<sup>206</sup>.

### (iii) Persons who may be the subject of directions

Directions may be given to 'appropriate' persons, who will not necessarily be the parties to the agreement or perpetrators of the unlawful conduct. The purpose of this is to enable the OFT to give directions to parent companies, affiliates or private individuals with the ability to influence or procure actions by the infringing persons<sup>207</sup>. Section 34 of the Act allows the court to order an undertaking or its officers to obey a direction relating to the management of that undertaking if the person subject to the direction has failed to comply.

### (iv) Enforcement of compliance with directions

If a person subject to directions (whether interim or final) fails to comply without reasonable excuse the OFT may apply to the court<sup>208</sup> for an order requiring compliance within a specified time or, if the direction concerns the management of an undertaking, ordering another officer to carry it out<sup>209</sup>. Breach of such an order would be contempt of court, punishable by fines or imprisonment, at the court's discretion<sup>210</sup>. There is nothing in section 34 that limits the court's order-making powers to persons within the UK<sup>211</sup>.

<sup>200</sup> See the transcript of the hearing of 13 October 2004, available at [www.catribunal.org.uk](http://www.catribunal.org.uk).

<sup>201</sup> ORR decision of 17 November 2006 [2007] UKCLR 937. <sup>202</sup> *Ibid*, paras D2–D5.

<sup>203</sup> Case No 1076/2/5/07 *E.ON UK Plc v Office of Rail Regulation*.

<sup>204</sup> [2007] EWHC 599, [2007] UKCLR 1653; on the doctrine of severance in the English law of contract see *Chitty on Contracts* (Sweet & Maxwell, 30th ed, 2008), paras 16-194–16-203.

<sup>205</sup> Case No 1099/1/2/08 [2009] CAT 14, [2009] CompAR 282.

<sup>206</sup> *Ibid*, para 222; however the CAT accepted that the time limit set for compliance with the directions was unrealistic: *ibid*, para 226; see also Case No 1046/2/4/04 *Albion Water Ltd v Water Services Regulation Authority* (remedy) [2009] CAT 12, paras 37–39.

<sup>207</sup> See *Enforcement*, para 2.2.

<sup>208</sup> 'Court' for this purpose is defined in Competition Act 1998, s 59(1). <sup>209</sup> *Ibid*, s 34.

<sup>210</sup> *Enforcement*, para 2.9.

<sup>211</sup> On the territorial scope of the Act see ch 12, 'The Extraterritorial Application of UK Competition Law', pp 501–504.

## (E) Penalties

Section 36(1) of the Competition Act provides that a penalty may be imposed for an infringement of the Chapter I prohibition or Article 101 TFEU; section 36(2) provides correspondingly for an infringement of the Chapter II prohibition or Article 102 TFEU. As a prerequisite for the imposition of a penalty section 36(3) requires that the OFT must be satisfied that the infringement has been committed intentionally or negligently<sup>212</sup>; it is sufficient to decide that the infringement was *either* intentional *or* negligent, without deciding which<sup>213</sup>, and the distinction between intention and negligence goes, at most, to mitigation of the fine<sup>214</sup>. Intention may be deduced from internal documents or from deliberate concealment of the agreement or conduct in question<sup>215</sup>. The Competition Act does not specify a limitation period for the imposition or recovery of penalties. In *Quarmby v OFT*<sup>216</sup> the Tribunal held that neither the limitation period in Article 25 of Regulation 1/2003<sup>217</sup> nor the Limitation Act 1980<sup>218</sup> applies to the imposition of penalties under the Competition Act<sup>219</sup>. Penalties received by the OFT are paid into the Consolidated Fund<sup>220</sup>; that is to say they go to the Government and not, for example, to the victims of the anti-competitive behaviour. The latter may be able to obtain compensation through recourse to the courts<sup>221</sup>. Where a penalty has not been paid by the date required by the OFT it may be recovered through the courts as a civil debt<sup>222</sup>. An appeal to the CAT postpones the obligation to pay any penalty until the appeal is determined<sup>223</sup>; however the CAT normally adds interest to any penalty imposed<sup>224</sup>.

### (i) Maximum amount of a penalty

Section 36(8) provides that penalties may not exceed 10 per cent of an undertaking's worldwide turnover in the business year preceding the OFT's decision<sup>225</sup>.

<sup>212</sup> See *Enforcement*, paras 5.4–5.13.

<sup>213</sup> Case No 1000/1/1/01 *Napp Pharmaceutical Holdings Ltd v Director General of Fair Trading* [2002] CAT 1, [2002] CompAR 13, para 453; on the meaning of 'intentional' and 'negligent' see paras 456 and 457 of that judgment.

<sup>214</sup> Case No 1009/1/1/02 *Aberdeen Journals Ltd v OFT* [2003] CAT 11, [2003] CompAR 67, para 484.

<sup>215</sup> *Enforcement*, para 5.11.

<sup>216</sup> Case No 1120/1/1/09 [2011] CAT 11.

<sup>217</sup> *Ibid*, paras 43–48 (finding that there is a 'relevant difference' for the purposes of s 60 of the Competition Act), on which see ch 9, 'Governing Principles Clause': Section 60 of the Competition Act 1998, pp 369–374.

<sup>218</sup> Case No 1120/1/1/09 [2011] CAT 11, paras 54–56.

<sup>219</sup> Note however that the Limitation Act 1980 does apply to the recovery of penalties as a civil debt under s 37 of the Competition Act.

<sup>220</sup> Competition Act 1998, s 36(9).

<sup>221</sup> See ch 8, 'Actions for an Injunction and/or Damages', pp 297–306.

<sup>222</sup> Competition Act 1998, s 37.

<sup>223</sup> *Ibid*, s 46(4); there is no provision for the OFT to ask for security for the penalty (or for the costs of the appeal): it follows that, if an undertaking goes out of business in the meantime, the penalty may be irrecoverable.

<sup>224</sup> See the Competition Appeal Tribunal Rules 2003, SI 2003/1372, r 56; see eg Case No 1000/1/1/01 *Napp Pharmaceutical Holdings Ltd v Director General of Fair Trading* [2002] CAT 1, [2002] CompAR 13, paras 542–543; Case No 1099/1/2/08 *National Grid Plc v Gas and Electricity Markets Authority* [2009] CAT 14, [2009] CompAR 282, para 229(c); Case Nos 1114/1/1/09 etc *Kier Group plc & Ors v OFT* [2011] CAT 3, para 343.

<sup>225</sup> See the Competition Act 1998 (Determination of Turnover for Penalties) Order 2000, SI 2000/309, as amended with effect from 1 May 2004 by SI 2004/1259.

## (ii) The OFT's Guidance as to the appropriate amount of a penalty

The OFT has published *Guidance as to the appropriate amount of a penalty*<sup>226</sup> ('the *Guidance on penalties*') pursuant to section 38 of the Act; the *Guidance* has been approved by the Secretary of State, as required by that provision<sup>227</sup>. Section 3 of the *Guidance on penalties* dealing with 'whistleblowing' must be read in light of the new guidance the OFT has published on this subject (see section F below).

The Court of Appeal has explained that the *Guidance on penalties* is not binding on the OFT, but that it must give reasons for any significant departure from it<sup>228</sup>. The CAT is not bound by the OFT's *Guidance on penalties*<sup>229</sup>. Paragraph 1.4 of the *Guidance* sets out the OFT's policy objectives in setting the level of penalties: to reflect the seriousness of the infringement and to deter the infringing undertakings and other undertakings from engaging or continuing to engage in anti-competitive practices. In *Kier Group plc & Ors v OFT*, its first *Construction bid-rigging* judgment, the CAT held that it will consider whether the final penalty is reasonable and proportionate having regard to those policy objectives<sup>230</sup>.

Paragraph 1.15 explains that undertakings found to have infringed both UK and EU competition law will not be fined twice for the same anti-competitive effects; however paragraph 1.16 adds that there might be different levels of penalties for the EU and the domestic infringements, for example if the infringement of EU law pre-dated the entry into force of the Competition Act in March 2000.

## (iii) The OFT's five-step approach

In determining the level of the penalty the OFT adopts a five-step approach<sup>231</sup>; the OFT must give reasons for its decision, including setting out the methodology whereby it reaches its conclusion<sup>232</sup>:

- **Step 1—starting point**<sup>233</sup>: the starting point is to apply a percentage of the 'relevant turnover' of the undertaking to be fined according to the seriousness of the infringement<sup>234</sup>; this reflects not only the seriousness of the infringement but also, by applying the percentage to turnover, the scale of the undertaking in the relevant market. In determining the seriousness of an infringement the OFT will take a number of factors into consideration including the nature of the infringement and the effect of the anti-competitive behaviour on competitors, third parties and, most importantly, consumers<sup>235</sup>. In cases based on Articles 101 and/or 102 TFEU, effects in another Member State may be taken into account if that Member State expressly gives its consent<sup>236</sup>. Relevant turnover for this purpose means the turnover in the relevant product and geographic markets affected by the infringement in the

<sup>226</sup> OFT 423, December 2004; this replaced the earlier *Guidance* of March 2000.

<sup>227</sup> *Guidance on penalties*, para 1.8.

<sup>228</sup> *Argos Ltd and Littlewoods Ltd v OFT* and *JJB Sports plc v OFT* [2006] EWCA Civ 1318, [2006] UKCLR 1135, para 161; the OFT gave reasons for departing from its *Guidance on penalties* in *Independent fee-paying schools*, OFT decision of 20 November 2006 [2007] UKCLR 361, paras 1424–1432.

<sup>229</sup> *Argos Ltd and Littlewoods Ltd v OFT* and *JJB Sports plc v OFT* [2006] EWCA Civ 1318, [2006] UKCLR 1135, para 160; the CAT considered its role in penalty appeals in Case Nos 1114/1/1/09 etc *Keir Group plc v OFT* [2011] CAT 3, paras 74–77.

<sup>230</sup> See Case Nos 1114/1/1/09 etc [2011] CAT 3, para 175. <sup>231</sup> *Guidance on penalties*, para 2.1.

<sup>232</sup> Case No 1061/1/1/06 *Makers UK Ltd v OFT* [2007] CAT 11, [2007] CompAR 699, para 134.

<sup>233</sup> *Guidance on penalties*, paras 2.3–2.9. <sup>234</sup> *Ibid*, para 2.3.

<sup>235</sup> *Ibid*, paras 2.4–2.5. <sup>236</sup> *Ibid*, para 2.6.

undertaking's last business year<sup>237</sup>; the starting point cannot exceed 10 per cent of an undertaking's relevant turnover<sup>238</sup>. Where several undertakings are involved in the same infringement the starting point will be worked out for each of them individually in order to take account of each undertaking's impact on the market<sup>239</sup>. In *Kier Group plc & Ors v OFT*<sup>240</sup> the CAT indicated that 'some modification of the Step 1 range may be worthy of consideration' when the *Guidance* is reviewed<sup>241</sup>

- **Step 2—adjustment for duration**<sup>242</sup>: having established the starting point the OFT, at Step 2, may increase or, exceptionally, decrease<sup>243</sup> the penalty to take into account the duration of the infringement. Where the infringement lasts longer than one year the penalty may be increased by not more than the number of years of the infringement; the OFT may treat part of a year as a whole year, although in some cases it has decided to apply a smaller multiplier<sup>244</sup>
- **Step 3—adjustment for other factors**<sup>245</sup>: at Step 3 the OFT will take into account 'adjustments for other factors' in order to achieve the policy objectives set out in paragraph 1.4 of the *Guidance*, in particular the need for deterrence, not only of the undertakings involved in the infringement but of others that might be contemplating anti-competitive behaviour<sup>246</sup>. At this stage the OFT may take into account the gains made by the infringing undertaking from its behaviour<sup>247</sup>
- **Step 4—adjustment for aggravating and mitigating factors**<sup>248</sup>: at Step 4 the OFT will consider whether there are any aggravating and mitigating factors  
**Aggravating factors** include<sup>249</sup>:
  - an undertaking was a leader in, or the instigator of, the infringement
  - directors or senior managers were involved
  - retaliatory or coercive action was taken against other undertakings in order to continue the infringement
  - the infringement was continued after the commencement of an investigation
  - repeated infringements by the same undertaking or undertakings in the same group (recidivism)
  - intentional rather than negligent infringement
  - retaliation against a leniency applicant

<sup>237</sup> Ibid, para 2.7; in Case Nos 1114/1/1/09 etc *Kier Group plc v OFT* [2011] CAT 3 the CAT held that the last business year prior to the infringement was the appropriate year for determining relevant turnover: ibid, paras 130–139; see similarly Case Nos 1117/1/1/10 etc *GF Tomlinson Building Ltd v OFT* [2011] CAT 7, paras 82–113 and Case Nos 1125/1/1/09 etc *Barrett Estate Services Ltd v OFT* [2011] CAT 9, paras 19–25.

<sup>238</sup> *Guidance on penalties*, para 2.8.

<sup>239</sup> Ibid, para 2.9.

<sup>240</sup> See n 237 above.

<sup>241</sup> Ibid, para 109.

<sup>242</sup> *Guidance on penalties*, para 2.10.

<sup>243</sup> Note Case No 1032/1/1/04 *Apex Asphalt Paving Co v OFT* [2005] CAT 4, [2005] CompAR 507, para 278: in the case of collusive tendering, the fact that a particular tendering process might take place over a short period does not necessarily mean that there should be a reduction of the penalty.

<sup>244</sup> See eg para 323 of the OFT decision in *Hasbro UK Ltd, Argos Ltd and Littlewoods Ltd* of 19 February 2003 [2003] UKCLR 553, where the OFT applied a multiplier of 1.2, as opposed to 2, where the duration of the infringement was in the region of 14½ months.

<sup>245</sup> *Guidance on penalties*, paras 2.11–2.13.

<sup>246</sup> Ibid, para 2.11; on the application of Step 3 in the *Construction bid-rigging* decision see eg Case Nos 1114/1/1/09 etc *Kier Group plc v OFT* [2011] CAT 3, paras 164–186.

<sup>247</sup> *Guidance on penalties*, para 2.11.

<sup>248</sup> Ibid, paras 2.14–2.16.

<sup>249</sup> Ibid, para 2.15.

Mitigating factors include<sup>250</sup>:

- an undertaking acted under severe duress or pressure
  - genuine uncertainty on the part of an undertaking as to whether its agreement or conduct constituted an infringement
  - adequate steps having been taken with a view to ensuring compliance with competition law
  - termination of the infringement as soon as the OFT intervenes
  - cooperation which enables the OFT's enforcement process to be concluded more effectively and/or speedily
- **Step 5—adjustment to prevent the maximum penalty being exceeded and to avoid double jeopardy<sup>251</sup>**: at Step 5 the OFT will make any necessary adjustments to ensure that the statutory maximum penalty of 10 per cent of worldwide turnover is not exceeded<sup>252</sup>. If a fine has been imposed by the European Commission or by a court or competition authority in another Member State this must also be taken into account at Step 5 in order to avoid double jeopardy<sup>253</sup>.

#### (iv) Immunity for small agreements and conduct of minor significance

Section 39, in conjunction with section 36(4), of the Competition Act confers immunity from penalties for infringing the Chapter I prohibition in the case of 'small agreements', other than price-fixing agreements<sup>254</sup>, where the OFT is satisfied that an undertaking acted on the reasonable assumption that section 39 gave it immunity. A small agreement is one where the combined turnover of the parties in the preceding calendar year was £20 million or less<sup>255</sup>. Provision is made by section 39(3)–(8) for the OFT to withdraw this immunity, subject to the observation of some basic procedures<sup>256</sup>. There is no immunity from penalties for agreements that infringe Article 101 TFEU, which is why section 39 refers only to 'partial' immunity in its heading.

Section 40 provides similar partial immunity for 'conduct of minor significance'. Conduct is of minor significance where the perpetrator's worldwide turnover in the preceding calendar year was £50 million or less<sup>257</sup>. Section 40(3)–(8) provides power for withdrawal of the immunity. There is no immunity from penalties for infringements of Article 102 TFEU.

As the OFT points out in its guidance on *Enforcement* the immunity provided by sections 39 and 40 does not prevent it from taking other enforcement action, and the immunity does not prevent third parties from bringing damages actions<sup>258</sup>. This point

<sup>250</sup> Ibid, para 2.16.

<sup>251</sup> Ibid, paras 2.17–2.20.

<sup>252</sup> See 'Maximum amount of a penalty', p 410 above; note that, prior to 1 May 2004, the maximum penalty under s 36(8) was calculated by reference to UK turnover rather than worldwide turnover, and that this may, in some cases, require a further adjustment of the penalty: see *Guidance on penalties*, para 2.18 and *Bid-rigging in the construction industry in England*, OFT decision of 21 September 2009, para VI.370 (p 1711).

<sup>253</sup> *Guidance on penalties*, para 2.20.

<sup>254</sup> A price-fixing agreement for this purpose is defined in s 39(9) of the Act.

<sup>255</sup> See the Competition Act 1998 (Small Agreements and Conduct of Minor Significance) Regulations 2000, SI 2000/262, reg 3.

<sup>256</sup> The OFT must give the parties or persons in respect of which the immunity is withdrawn written notice of its decision and must specify a date which gives them time to adjust (ss 39(5), (8), 40(5), (8) Competition Act 1998).

<sup>257</sup> See the Competition Act 1998 (Small Agreements and Conduct of Minor Significance) Regulations 2000, SI 2000/262, reg 4.

<sup>258</sup> *Enforcement*, para 5.20.

is nicely illustrated by the case of *Burgess v OFT*. In its judgment in this case the CAT found that Austin had abused a dominant position by refusing one of its competitors, Burgess, access to its crematorium<sup>259</sup>. The CAT noted that Austin would not be subject to a penalty since its conduct was of minor significance under section 40 of the Act<sup>260</sup>. Subsequently, however, Burgess brought a ‘follow-on’ action for damages before the CAT<sup>261</sup>; the case was settled out of court<sup>262</sup>. Similarly in *Cardiff Bus* the OFT concluded that Cardiff Bus was guilty of abusive predatory conduct but, due to its turnover, it benefited from immunity under section 40<sup>263</sup>; subsequently four damages claims were brought before the CAT<sup>264</sup>.

## (F) Whistleblowing: the leniency programme

The OFT encourages whistleblowing. Decisions establishing an infringement of the Chapter I prohibition (and Article 101 TFEU) very often originate from an application for leniency<sup>265</sup>. A parent company may make a leniency application on behalf of a subsidiary<sup>266</sup>. The OFT has published three sets of guidance on its leniency policy: the OFT’s *Guidance as to the appropriate amount of a penalty*<sup>267</sup> deals with civil cases under the Competition Act 1998; *The cartel offence – Guidance on the issue of no-action letters for individuals*<sup>268</sup> deals with criminal cases under the Enterprise Act 2002 and *Leniency and no-action guidance*<sup>269</sup> deals with both civil and criminal cases. The *Leniency and no-action guidance* supplements, but does not replace, the earlier guidelines; it provides a comprehensive view of the current position and is the suggested starting point for anyone needing guidance on the subject. A pro-forma corporate leniency agreement and pro-forma no-action letters as well as a helpful ‘leniency flow-chart’ are included in the Annexes to the *Leniency and no-action guidance*. The aim of the *Leniency and no-action guidance* is to make those policies more attractive and more transparent to undertakings or individuals considering whether to blow the whistle.

### (i) Terminology

Paragraph 1.6 of the *Leniency and no-action guidance* sets out the terminology of the subject, including the following:

- ‘**leniency**’: this is a ‘catch all’ term that refers to all the types of immunity and reduced fines that are available under the *Guidance*
- ‘**civil immunity**’: this refers to immunity granted to undertakings from penalties for infringing the Chapter I prohibition or Article 101 TFEU
- ‘**criminal immunity**’: this refers to immunity granted to individuals from prosecution for the cartel offence in the Enterprise Act 2002
- ‘**Type A immunity**’: this refers to a situation where an undertaking is granted *automatic* civil immunity and all of its current and former employees and directors who cooperate with the OFT are granted automatic criminal immunity for cartel activity;

<sup>259</sup> Case No 1044/2/1/04 *JJ Burgess & Sons v OFT* [2005] CAT 25, [2005] CompAR 1151.

<sup>260</sup> *Ibid*, paras 117–118. <sup>261</sup> Case No 1088/5/7/07.

<sup>262</sup> See the CAT’s order of 18 February 2008.

<sup>263</sup> *Abuse of a dominant position by Cardiff Bus*, OFT decision of 18 November 2008 [2009] UKCLR 332.

<sup>264</sup> Case Nos 1175–1178/5/7/11 etc *DH Francis v Cardiff City Transport Services Ltd*, not yet decided.

<sup>265</sup> See below.

<sup>266</sup> *Collusive tendering for mastic asphalt flat-roofing contracts in Scotland*, OFT decision of 15 March 2005 [2005] UKCLR 638, para 396.

<sup>267</sup> OFT 423, December 2004.

<sup>268</sup> OFT 513, April 2003. <sup>269</sup> OFT 803, December 2008.

Type A immunity is available where the undertaking was the first to apply and there was no pre-existing civil and/or criminal investigation into such activity

- **‘Type B immunity’**: this refers to a situation where the type of immunity available under Type A is granted on a *discretionary* rather than an automatic basis. Type B immunity is available where the undertaking was the first to apply but there was already a pre-existing civil and/or criminal investigation into the cartel activity
- **‘Type B leniency’**: this refers to a situation where an undertaking is granted any level of reduction of, but not immunity from, a financial penalty in a cartel case. As in the case of Type B immunity, Type B leniency arises where the undertaking was the first to apply but there was already an investigation under way into the cartel in question
- **‘Type C leniency’**: this refers to a situation in which a reduction in the penalty of up to 50 per cent is granted where the undertaking was not the first to apply whether or not there was already a pre-existing civil and/or criminal investigation into the cartel.

## (ii) Key features of the UK leniency system

Paragraph 1.7 of the *Leniency and no-action guidance* sets out the key features of the UK leniency system, including:

- **informal guidance**: the OFT will provide informal guidance on a no-names basis about ‘hypothetical’ cases when asked
- **the ‘marker system’**: markers will be available while the application is perfected (a marker system is also available under the EU leniency system)<sup>270</sup>, thereby enabling an undertaking to preserve its position in a queue of leniency applicants
- **oral applications**: applications do not always have to be in writing (oral applications are also available under the EU system)<sup>271</sup>
- **guarantees of criminal immunity**: criminal immunity is available for all cooperating current and former employees and directors in Type A or Type B immunity cases
- **ready availability of Type B immunity**: Type B immunity will be common, rather than exceptional, where an undertaking is the first to approach the OFT, even if there is a pre-existing investigation into the cartel in question
- **a ‘high bar for coercion’**: the OFT will impose a high bar, both as to the circumstances and standard of proof, in which an undertaking will be found to be a coercer and therefore ineligible for civil and/or criminal immunity.

## (iii) Confidential guidance

Part 2 of the *Leniency and no-action guidance* explains that, at the outset, individuals or undertakings may approach the OFT for confidential guidance on any aspect of the OFT’s leniency and no-action programmes. An important feature of this procedure is that the OFT will consider itself to be bound by confidential guidance provided that it is followed by an application in a reasonable time, the information given was not misleading and there has not been a material change in circumstances.

<sup>270</sup> See ch 7, ‘Section II: immunity from fines’, pp 281–282.

<sup>271</sup> See ch 7, ‘Section IV: corporate statements’, p 282.

#### (iv) Type A immunity

The *Leniency and no-action guidance* explains the procedure when applying for Type A immunity. To qualify, the undertaking must be the first to provide the OFT with all information available to it regarding the cartel<sup>272</sup>; this information should enable the OFT to use its powers of investigation<sup>273</sup>. The OFT must also be satisfied that the other conditions for the grant of immunity are, and continue to be, met<sup>274</sup>: the applicant must:

- maintain continuous and complete cooperation throughout the OFT's investigation
- refrain from partaking any further in the cartel once it has blown the whistle (unless the OFT directs otherwise) and
- not have 'coerced' another undertaking to participate in the cartel.

There is a 'marker' system whereby an undertaking can fix its position as the first applicant for Type A immunity pending the submission of all the information, documents and evidence of the activities of a cartel available to it<sup>275</sup>. Generally the OFT will not accept joint approaches made simultaneously by, or on behalf of, two or more undertakings; in other words it is not possible to share Type A immunity<sup>276</sup>. Where an undertaking is also making a leniency application to the European Commission a marker will be allowed on a 'no-names' basis while the Commission is considering its position<sup>277</sup>.

#### (v) Type B immunity

The *Leniency and no-action guidance* also sets out the position in relation to Type B immunity. Although Type B immunity is discretionary, it is expected to be common rather than exceptional in cases where an undertaking satisfies the conditions set out above on eligibility for Type A immunity<sup>278</sup>. The sooner an undertaking approaches the OFT for Type B immunity, the more likely it is to be available and to be granted. Type B applications often arise as a result of the OFT conducting an inspection at an undertaking's premises: markers can be granted only by the OFT's Senior Director of Cartels and his deputies, not by the officials present at the inspection<sup>279</sup>. Paragraphs 4.10 to 4.13 explain how an applicant for Type B immunity should go about perfecting its marker.

#### (vi) Type B and Type C leniency

The *Leniency and no-action guidance* discusses Type B and Type C leniency. In determining the amount of any discount available to the applicant the OFT will take into account the overall added value of the material provided by the applicant<sup>280</sup>, the time at which the undertaking came forward, the evidence the OFT already has, the probative value of the evidence provided and the overall level of cooperation. The applicant must also comply with the other conditions set out in paragraph 3.15 of the *Guidance*. The OFT has insufficient experience in granting Type B leniency to give guidance about the percentage reductions that might be available, but it expects reductions in the range of 25 to 50 per cent in Type C cases<sup>281</sup>.

<sup>272</sup> *Leniency and no-action guidance*, para 3.11.

<sup>273</sup> *Ibid*, para 3.14.

<sup>274</sup> *Ibid*, para 3.15; see also *Guidance on penalties*, OFT 423, para 3.9 and *Guidance on issue of no-action letters*, OFT 513, April 2003, para 3.3; see further 'No-action letters', pp 422–423 below.

<sup>275</sup> *Leniency and no-action guidance*, paras 3.11–3.17.

<sup>276</sup> *Ibid*, para 3.19.

<sup>277</sup> *Ibid*, paras 3.20–3.22.

<sup>278</sup> *Ibid*, paras 4.1 and 4.9–4.11.

<sup>279</sup> *Ibid*, para 4.8.

<sup>280</sup> *Ibid*, para 5.5.

<sup>281</sup> *Ibid*, para 5.6.

**(vii) The coercer test**

Type A and Type B immunity are not available to an undertaking that has coerced another firm or firms into taking part in cartel activity. Part 6 of *Leniency and no-action guidance* does not provide a definition of coercion, but indicates that there must be clear evidence of an undertaking taking steps to force another to join the cartel. Physical violence or threats of physical violence and strong economic pressure such as the organisation of a collective trade boycott of a small firm that might cause it to exit the market might be examples of coercion<sup>282</sup>.

**(viii) The grant of criminal immunity: no-action letters**

This part of the OFT's guidance will be discussed below in the context of the cartel offence under the Enterprise Act 2002<sup>283</sup>.

**(ix) Other issues in relation to civil leniency and no-action letters**

A leniency applicant is expected to maintain continuous and complete cooperation throughout the OFT's investigation. This duty implies that an applicant must genuinely assist the OFT and not, for example, seek to deny involvement in the cartel<sup>284</sup>. Normally a whistleblower must terminate its involvement in the cartel. In rare cases, however, it is possible that the OFT might direct an applicant to continue to participate, for example so that the other members of the cartel will not suspect that it has been in contact with the OFT<sup>285</sup>. Paragraphs 8.7 to 8.10 explain the circumstances in which a leniency application might fail due to a failure to cooperate with the OFT, and paragraphs 8.11 to 8.17 discuss the idea of bad faith – that is to say an applicant taking positive steps to hinder an investigation going beyond non-cooperation – which can even lead to prosecution of individuals under sections 43 and 44 of the Competition Act and section 201 of the Enterprise Act. The *Guidance* also discusses the way in which undertakings and their advisers conduct their internal investigations both prior to and following an approach to the OFT for leniency<sup>286</sup>; and the use and transfer to third parties, the Serious Fraud Office and to the European Commission and the NCAs of the Member States of information received by the OFT as a result of a leniency application<sup>287</sup>.

**(x) Leniency plus**

Paragraphs 3.16 and 3.17 of the OFT's *Guidance on penalties*<sup>288</sup> provide for an 'amnesty-plus' or 'two for one' policy: if a firm is already cooperating with an investigation in respect of one cartel, and comes forward with information that entitles it to total immunity in relation to a second cartel, it may receive an additional reduction in the penalty to be applied in relation to the first cartel<sup>289</sup>. The *Leniency and no-action guidance* indicates that reductions under this policy are not likely to be high and will depend on factors such as the effort by the applicant to uncover the second cartel<sup>290</sup>.

<sup>282</sup> Ibid, para 6.5.      <sup>283</sup> See 'No-action letters', pp 432–433 below.

<sup>284</sup> *Leniency and no-action guidance*, paras 8.2–8.3; the OFT does not exclude the making of certain limited representations commenting on specific elements of its case.

<sup>285</sup> Ibid, para 8.4.

<sup>286</sup> Ibid, paras 8.19–8.31.

<sup>287</sup> Ibid, paras 8.32–8.53.

<sup>288</sup> OFT 423, December 2004.

<sup>289</sup> Leniency was provided on this basis in *Collusive tendering for mastic asphalt flat-roofing contracts in Scotland*, OFT decision of 15 March 2005 [2005] UKCLR 638, para 410.

<sup>290</sup> *Leniency and no-action guidance*, para 9.9.

### (xi) Resale price maintenance

The OFT's *Guidance as to the appropriate amount of a penalty*<sup>291</sup> allows for leniency in respect of resale price maintenance<sup>292</sup>. The *Leniency and no-action guidance* adds that leniency might be available where vertical behaviour might be said to facilitate horizontal cartel activity<sup>293</sup>.

### (G) Settlements and early resolution of cases<sup>294</sup>

One of the mitigating factors mentioned in Step 3 of the OFT's *Guidance on penalties* is co-operation which enables the OFT's enforcement process to be concluded more effectively and/or speedily. On seven occasions the OFT (in *Independent fee paying schools*, *British Airways*, *Dairy products*, *Tobacco*, *Professional Loans* and *Reckitt Benckiser*) and the ORR (in *English Welsh & Scottish Railway*) have adopted, or are in the process of adopting, decisions in which all or some of the parties to the investigation entered into a settlement agreement in which they admitted the infringement and agreed to pay a reduced penalty, with the discount reflecting the time and administrative resource savings as a result of the agreement not to contest the case<sup>295</sup>. This process is sometimes referred to as one of 'settlement' or 'early resolution'; it should be distinguished from applications for leniency whereby full immunity or a reduced penalty are allowed in return for the provision of information to the OFT that enables it to investigate a case<sup>296</sup>. The OFT intends to publish a statement on its experience of the early resolution process<sup>297</sup>.

### (H) The penalty provisions in practice

By 20 June 2011 penalties had been imposed in 26 cases under the Chapter I and Chapter II prohibitions and Articles 101 and 102 TFEU.

#### (i) Statistical analysis

The total amount of the penalties imposed under the Competition Act (and Articles 101 and 102) by 20 June 2011 was £956.6 million before reductions for leniency and £733.3 million after leniency. On appeal to the CAT (and the Court of Appeal) some of the penalties were reduced: after making allowance for those reductions the figure should be reduced to £598.5 million. Clearly the penalty in the case of *Tobacco*, of £225 million, represents a major landmark in the competition policy in the UK since it is considerably higher than in any previous case. The *British Airways* case is also of interest as BA agreed to pay a fine of £121.5 million, which will be the largest ever fine imposed by the OFT for a single infringement of the Chapter I prohibition and Article 101(1) TFEU<sup>298</sup>.

## (ii) Appeals against decisions imposing penalties

There have been numerous appeals to the CAT in relation to the penalties imposed by the OFT for infringements of the Competition Act. On appeal the CAT may impose, revoke or vary the fines imposed<sup>299</sup>. The CAT's practice has been to review the OFT's application of the *Guidance on penalties* and then to set out its own views on the seriousness of the infringement and to make its own assessment of the level of the penalty on the basis of a 'broad brush' approach, taking the case as a whole. The Court of Appeal has said that it thinks that this is an appropriate approach for the CAT to take. The CAT has emphasised that, other than in matters of legal principle, there is limited precedent value in decisions relating to penalties<sup>300</sup>.

<sup>299</sup> Competition Act 1998, Sch 8, para 3(2)(b).

<sup>300</sup> Case Nos 1114/1/1/09 etc *Kier Group plc & Ors v OFT* [2011] CAT 3, para 116; Case Nos 1140/1/1/09 etc *Eden Brown Ltd v OFT* [2011] CAT 8, paras 78 and 97.

In some cases the CAT decided not to interfere with the OFT's determination<sup>301</sup>; however the CAT has amended the OFT's decisions on penalties on several occasions, usually downwards<sup>302</sup> but on one occasion upwards<sup>303</sup>. The CAT's approach can be seen, for example, in *Construction Bid-rigging*<sup>304</sup> in which the penalty of £129.2 million imposed by the OFT was reduced by the CAT to £63.9 million. The CAT held that the penalties imposed by the OFT for 'simple' cover pricing were excessive given, in particular, the nature of the infringement and the harm it was likely to cause, and the general mitigation resulting from the perceptions of legitimacy in the construction industry<sup>305</sup>. The CAT further held that the OFT had used the wrong financial year to arrive at the starting figure for the penalties<sup>306</sup>. The CAT also disagreed with the method the OFT had used to secure deterrence<sup>307</sup>.

In *National Grid* the CAT reduced the penalty from £41.6 million to £30 million to reflect the fact that the Gas and Electricity Markets Authority had been closely involved in discussions with National Grid that had led to the infringing agreements<sup>308</sup>; the Court of Appeal further reduced the fine to £15 million for the same reason<sup>309</sup>. The reduced fine is still the highest imposed in the UK for an abuse of a dominant position.

### (iii) Aggravating factors

In *Genzyme Ltd* the OFT considered that the fact that Genzyme had committed a further infringement after the OFT had begun its investigation into Genzyme's pricing practices was an aggravating factor<sup>310</sup>. In the first *Hasbro* case<sup>311</sup> the OFT increased Hasbro's fine by 10 per cent at Step 4 because senior management were aware of the infringement and because the resale price maintenance took place on Hasbro's initiative<sup>312</sup>. In *Construction Bid-rigging*<sup>313</sup> and *Construction Recruitment Forum*<sup>314</sup> the OFT increased the fines by between 5 and 15 per cent on undertakings whose directors had been involved in the infringements; and in *Construction Bid-rigging* the OFT increased Wildgoose Construction's fine by 15 per cent because it had paid an individual to engage in cover pricing<sup>315</sup>.

<sup>301</sup> See eg Case Nos 1032 and 1033/1/1/04 *Apex Asphalt and Paving Co Ltd v OFT* [2005] CAT 4, [2005] CompAR 507 and Case No 1067/1/1/06 *Achilles Paper Group Ltd v OFT* [2006] CAT 24.

<sup>302</sup> Case No 1000/1/1/01 *Napp Pharmaceutical Holdings Ltd v Director General of Fair Trading* [2002] CAT 1, [2002] CompAR 13, paras 533–534; Case No 1009/1/1/02 *Aberdeen Journals Ltd v OFT* [2003] CAT 11, [2003] CompAR 67, paras 491–499; Case No 1016/1/1/03 *Genzyme Ltd v OFT* [2005] CAT 32, [2006] CompAR 195, paras 700–708; Case Nos 1014 and 1015/1/1/03 *Argos Ltd v OFT* [2005] CAT 13, [2005] CompAR 834; Case Nos 1019–1022/1/1/03 *JJB Sports Plc v OFT* [2005] CAT 22, [2005] CompAR 1060

<sup>303</sup> See 'The CAT can increase penalties', p 424 below.

<sup>312</sup> *Ibid*, paras 89–92.

<sup>313</sup> OFT decision of 21 September 2009 [2010] UKCLR 322, paras VI.301–VI.314 (pp 1696–1698).

<sup>314</sup> OFT decision of 29 September 2009 [2010] UKCLR 14, paras 5.311–5.334.

<sup>315</sup> OFT decision of 21 September 2009 [2010] UKCLR 322, paras VI.295–VI.299 (p 1695); see similarly para IV.4424 (p 1197).

#### (iv) The CAT can increase penalties

The CAT has power to increase as well as to decrease a penalty<sup>316</sup>. In *Football Shirts* the CAT increased the penalty on one of the appellants, Allsports, by £170,000<sup>317</sup>. The OFT had allowed a 5 per cent decrease of the penalty that would otherwise have been imposed on Allsports in recognition of its cooperation. In the proceedings before the CAT it became clear, when witnesses were subjected to cross-examination, that Allsports had been less co-operative than the OFT had thought, and the reduction was therefore revoked.

#### (v) Decisions in which no penalty was imposed

There have been occasions when the OFT has found an infringement but decided not to impose a penalty. In *Northern Ireland Livestock and Auctioneers' Association*<sup>318</sup> the OFT decided not to impose a penalty on the Association which had recommended to its members a standard commission that should be paid by purchasers of livestock at Northern Ireland cattle marts, since the recommendation was publicised, there was no attempt to conceal it and since the beef industry in Northern Ireland had been badly hit by the unfortunate combination of 'mad cow' disease and foot and mouth disease<sup>319</sup>. In *Lladró Comercial*<sup>320</sup> no penalty was imposed on Lladró, despite a finding that it had fixed the retail selling price of its merchandise, since the European Commission had sent a comfort letter to Lladró which it could reasonably have interpreted as suggesting that its agreements did not infringe the Competition Act<sup>321</sup>.

## 6. The Cartel Offence and Company Director Disqualification

The Enterprise Act 2002 introduced two provisions designed to encourage individuals to ensure compliance with competition law. First, Part 6 of the Act established the 'cartel offence', the commission of which can lead, on indictment, to a term of imprisonment of up to five years and/or an unlimited fine<sup>322</sup>. Secondly, the Act introduced the possibility of company directors being disbarred from office for a period of up to 15 years where they knew, or ought to have known, that their company was guilty of an infringement of EU or UK competition law<sup>323</sup>. These important provisions attempt to address the problem that the imposition of fines – even very substantial ones – on undertakings may not have a sufficiently deterrent effect, especially where the cost of the fines is simply transferred to customers through higher prices; and that if a fine is so large that it results in the insolvency and liquidation of an undertaking, this will result in the loss of a competitor from the market, a somewhat perverse achievement for a system of competition law<sup>324</sup>. The

<sup>321</sup> *Ibid*, para 124.

<sup>322</sup> Enterprise Act 2002, s 190(1).

<sup>323</sup> *Ibid*, s 204.

<sup>324</sup> For discussion of criminalisation, both generally and as a matter of UK law, see Hammond and Penrose 'Proposed criminalisation of cartels in the UK' OFT 365, November 2001; Pickford 'The Introduction of a New Economic Crime' (2002) 1 Competition Law Journal 35; Harding 'Business Cartels as a Criminal Activity: Reconciling North American and European Models of Regulation' (2002) 9 Maastricht Journal of European and Comparative Law 393; Harding and Joshua 'Breaking up the Hard Core: Prospects for

criminal sanction is a very important feature of US law on cartels: there have been many high-profile cases in recent years in which senior executives of major companies have had to serve terms of imprisonment<sup>325</sup>. At least 13 Member States of the EU, including the UK, have some form of criminal sanction against individuals for infringements of substantive competition law<sup>326</sup>. Other countries have also been active in recent times in this area: in 2009 Australia adopted the Trade Practices Amendment (Cartel Conduct and Other Measures) Act and South Africa passed the Competition Amendment Act, each introducing criminal sanctions for the first time, while Canada adopted the Budget Implementation Act, amending the Competition Act, to provide for more effective criminal enforcement.

As a separate matter the House of Lords has held, in *Ian Norris v Government of the USA*<sup>327</sup>, that 'mere' price fixing, without aggravating features, does not amount to conspiracy to defraud, a criminal offence at common law; this matter is discussed in section C below<sup>328</sup>. It is at least arguable that some types of cartel activity might infringe section 4 of the Fraud Act 2006<sup>329</sup>.

## (A) The cartel offence

### (i) Definition of the cartel offence

Section 188 of the Enterprise Act 2002 established the criminal 'cartel offence'. The cartel offence is quite distinct from Article 101 TFEU and the Chapter I prohibition in the Competition Act: this means that where a price-fixing agreement is detected the possibility exists that the undertakings involved may be the subject of proceedings under Article 101 or the Chapter I prohibition, leading to the imposition of fines, and that the individuals responsible for setting up the agreement may be prosecuted criminally under the cartel offence. An example of this occurred in the *Marine Hoses* case, where

<sup>328</sup> See 'Conspiracy to defraud at common law', pp 436–437 below.

<sup>329</sup> See Corker and Smith, arguing against the application of the Fraud Act to price fixing, in 'Cartels: who's liable?' (2007) 157 *New Law Journal* 1593.

the European Commission imposed fines of €131 million on various undertakings engaged in allocating tenders, market sharing and price fixing<sup>330</sup>, while three individuals were imprisoned in the UK for infringing section 188<sup>331</sup>. The criminal prosecution of individuals is likely to precede the proceedings against the undertakings, as happened in the *Marine Hoses* case<sup>332</sup>, to ensure that the more rigorous evidential standards in criminal cases affecting individuals whose personal liberty is at stake are observed.

The Court of Appeal has held in *IB v The Queen* that the cartel offence is not a 'national competition law' in the sense of Article 3 of Regulation 1/2003; had it decided to the contrary it was arguable that the Crown Court, which is not a designated competition authority for the purposes of that Regulation, would have had no jurisdiction to impose a penalty under section 188 of the Enterprise Act<sup>333</sup>.

Section 188 of the Enterprise Act provides (in formalistic, indeed tortuous, terms) that an individual is guilty of an offence if he or she dishonestly agrees with one or more other persons that undertakings<sup>334</sup> will engage in one or more of the following cartel activities, namely direct and indirect price fixing<sup>335</sup>; limitation of supply<sup>336</sup> or production<sup>337</sup>; market sharing<sup>338</sup>; or bid-rigging<sup>339</sup>. The Act specifically provides that, in relation to price fixing and the limitation of supply or production, the parties must have entered into a reciprocal agreement<sup>340</sup>; this is not specified in relation to market sharing and bid-rigging, since these actions are, by their nature, reciprocal. The fact that there must be a reciprocal agreement does not mean that there must be mutual dishonesty: it is sufficient that one individual acted dishonestly, without having to show that other individuals also did so<sup>341</sup>.

A key feature of the criminal offence is that there must have been dishonesty on the part of the individuals concerned. In *R v Ghosh*<sup>342</sup> the Court of Appeal established a two-part test for determining dishonesty: the first part asks, as an objective matter, whether the defendant was acting dishonestly according to the standards of reasonable and honest people; the second asks, as a subjective matter, whether the defendant must have realised that what he was doing was dishonest by those standards. To be found guilty the jury must decide beyond reasonable doubt that the answer to both of these questions is yes. The trial judge in the case against four employees of British Airways<sup>343</sup> said that the test in *Ghosh* is the correct one to apply to the meaning of dishonesty in section 188 of the Enterprise Act, a view that was accepted by the Court of Appeal<sup>344</sup>. The Court of Appeal has said that the question of whether the conduct of an individual is dishonest is a matter of fact to be decided in each case<sup>345</sup>. The offence applies

<sup>330</sup> Commission decision of 28 January 2009.

<sup>331</sup> See 'The cartel offence in practice', p 434 below. <sup>332</sup> *Ibid*.

only in respect of horizontal agreements<sup>346</sup>; vertical agreements, including resale price maintenance, are not covered by the cartel offence. The cartel offence will have been committed irrespective of whether the agreement reached between the individuals is implemented by the undertakings, and irrespective of whether or not they have authority to act on behalf of the undertaking at the time of the agreement<sup>347</sup>. Individuals could also be prosecuted for the inchoate offences of attempting to commit the criminal offence<sup>348</sup> and conspiracy to do so<sup>349</sup>. If the agreement is entered into outside the UK, proceedings may be brought only where the agreement has been implemented in whole or in part in the UK<sup>350</sup>.

## (ii) Powers of investigation and search

The OFT may conduct an investigation if there are reasonable grounds for suspecting that the cartel offence has been committed<sup>351</sup>, and the Enterprise Act gives it powers to require information and documents<sup>352</sup> and to enter and search premises under a warrant<sup>353</sup>. The OFT has published guidance on how it intends to exercise the powers conferred upon it for this purpose<sup>354</sup>. There are criminal sanctions for non-compliance with the powers of investigation: for example the intentional destruction of documents could lead to a maximum prison sentence of five years<sup>355</sup>. The OFT may also obtain information about the cartel offence through informal inquiries: it will make clear to individuals and undertakings that there is no compulsion to respond to informal inquiries<sup>356</sup>.

### (A) Powers to require information and documents

The OFT can, by written notice, require a person to answer questions, provide information or produce documents for the purposes of a criminal investigation<sup>357</sup>; the term ‘document’ includes information recorded in any form and includes information that may be held electronically<sup>358</sup>. The OFT can exercise this power against any person it has reason to believe has relevant information<sup>359</sup>, who must provide the information or documents required other than communications protected by professional privilege<sup>360</sup> or confidential information between a bank and its client<sup>361</sup>. In urgent cases the OFT may require immediate compliance with a notice<sup>362</sup>. The OFT can also require, in writing, a person to attend a ‘compulsory interview’ to answer questions on any matter relevant to the investigation<sup>363</sup>. Section 197 of the Act imposes restrictions on the use of statements (but not of documents) obtained under section 193 (and section 194, dealt with below)<sup>364</sup> in order to protect against self-incrimination<sup>365</sup>. There are also restrictions on the disclosure of confidential information<sup>366</sup>. The OFT issued 14 notices under section 193 in the period to which the 2006–2007 Annual Report relates, one to a business and 13 to individuals

<sup>346</sup> Enterprise Act 2002, ss 188(4) and 189.

relating to two separate cases<sup>367</sup>; the corresponding figures for the next three years (not broken down as to businesses and individuals) were 99, 14 and just two in 2009–2010<sup>368</sup>.

**(B) Power to enter premises under a warrant**

The OFT may apply to the High Court (or in Scotland the procurator fiscal may apply to the sheriff) for a warrant authorising a named officer of the OFT, or any other authorised person such as a forensic IT expert, to enter premises<sup>369</sup>. This power permits forcible entry into and a search of the premises<sup>370</sup>; explanations of documents can be required<sup>371</sup> and the OFT can require that information stored in an electronic form can be taken away in a visible and legible form<sup>372</sup>. The OFT's officers may take away original documents<sup>373</sup>; a copy of documents removed will be provided as soon as is reasonably practicable after the execution of the warrant<sup>374</sup>. Privileged information cannot be insisted upon<sup>375</sup>. A warrant may be issued, first, if there are reasonable grounds for believing that there are documents on any premises that the OFT could require by written notice<sup>376</sup> and, secondly, if a person has failed to comply with a written notice<sup>377</sup>; or if it is not practicable to serve such a notice<sup>378</sup>; or if the service of such a notice might seriously prejudice the investigation<sup>379</sup>.

Entry under a warrant will be conducted in accordance with the requirements of Code B of the PACE Codes of Practice<sup>380</sup>. Although PACE does not apply in Scotland, the OFT may follow its procedures there<sup>381</sup>.

The investigating officer will not wait for a legal adviser to be present before commencing a search, though he will normally ensure that the search is witnessed by a third party<sup>382</sup>. A person under investigation will, however, be entitled to seek legal advice in the event that he or she is required to attend an interview or if the OFT intends to exercise its 'seize and sift' powers<sup>383</sup>. The OFT may exercise seize and sift powers that enable its officers pre-emptively to seize material when it is not reasonably practicable to determine on the premises whether the material is seizeable or not<sup>384</sup>. It is an offence to obstruct a search<sup>385</sup>.

The exercise of these powers is subject to strict safeguards such as a requirement to give a written notice of what material has been seized<sup>386</sup>, and an obligation to return any material which is subject to legal privilege<sup>387</sup>. The OFT visited four business premises under the authority of section 194 criminal search warrants in the period covered by the 2006–2007 Annual Report, relating to two separate cases<sup>388</sup>; there were four inspections in relation to three different cases (two of them of domestic premises) in 2007–2008<sup>389</sup>, none in 2008–2009 and one in 2009–2010<sup>390</sup>.

<sup>390</sup> 2009–2010 Annual Report and Resource Accounts of the Office of Fair Trading Annex C, p 3.

### (iii) Powers of surveillance

#### (A) *Enterprise Act: intrusive surveillance and property interference*

The Enterprise Act gives powers of ‘intrusive surveillance’ and ‘property interference’ to the OFT for the purpose of investigating the commission of the cartel offence: these powers are not available for investigations under the Competition Act<sup>391</sup>. In certain circumstances the Chairman of the OFT, with prior approval from the Office of the Surveillance Commissioners<sup>392</sup>, may issue an authorisation for the presence of an individual or the planting of surveillance devices in residential premises, including hotels, and in private vehicles in order to hear or see what is happening there (‘intrusive surveillance’)<sup>393</sup>. The criteria for the grant of an authorisation are contained in section 32(3) of the Regulation of Investigatory Powers Act 2000 and include situations in which the use of intrusive surveillance is necessary for the prevention or detection of a serious crime, such as the cartel offence, and where it is necessary to act in the interests of the economic well-being of the UK. The OFT could use these powers, for example, to obtain a recording of a meeting of cartel members in a hotel room following a ‘tip-off’ from one of their employees or a disaffected member of the cartel. An authorisation by the Chairman of the OFT under section 93 of the Police Act 1997, as amended by section 200 of the Enterprise Act, allows for the covert installation of a surveillance device: if it were not for this section the installation would involve some element of trespass.

#### (B) *Further powers: directed surveillance, covert human intelligence sources and access to communications data*<sup>394</sup>

The OFT has been given further powers that are regulated by the Regulation of Investigatory Powers Act 2000. The Regulation of Investigatory Powers (Directed Surveillance and Covert Human Intelligence Sources) Order 2003<sup>395</sup> adds the OFT to the list of public authorities that are able to authorise ‘directed surveillance’: this would allow it, for example, to carry out covert surveillance of a person’s office<sup>396</sup>; the OFT may also use ‘covert human intelligence sources’, for example by asking informants to attend cartel meetings and to report back to it<sup>397</sup>. The Regulation of Investigatory Powers (Communications Data) Order 2003<sup>398</sup> provides that the OFT may be given access to communications data such as the times, duration and recipients of telephone calls, though not their content. The first two of these powers are available in both civil and criminal investigations: the last only for a criminal case.

#### (C) *OFT Codes of Practice*

The OFT has published two Codes of Practice explaining how it will exercise the additional powers described in the preceding paragraph, *Covert surveillance in cartel*

<sup>391</sup> Enterprise Act 2002, s 199 amending Regulation of Investigatory Powers Act 2000, ss 32ff and Enterprise Act 2002, s 200 amending Police Act 1997, ss 93–94.

<sup>392</sup> Note that the Office of Surveillance Commissioners has a website, [www.surveillancecommissioners.gov.uk](http://www.surveillancecommissioners.gov.uk), containing relevant information and links to recent judgments.

<sup>393</sup> *Powers for investigating criminal cartels*, paras 5.2–5.3; in situations of urgency, the Chairman of the OFT may authorise the use of intrusive surveillance and give notice to the Surveillance Commissioner, who will be the ultimate arbiter in such cases: *ibid*, para 5.3.

<sup>394</sup> See *Powers for investigating criminal cartels*, paras 5.4–5.5.

<sup>395</sup> SI 2003/3171; since 1 February 2010 written authorisations to use a covert human intelligence source have effect for only three months: Regulation of Investigatory Powers (Covert Human Intelligence Sources: Matters Subject to Legal Privilege) Order 2010, SI 2010/123.

<sup>396</sup> See Regulation of Investigatory Powers Act 2000, s 28.

<sup>397</sup> *Ibid*, s 29.

<sup>398</sup> SI 2003/3171.

*investigations*<sup>399</sup> and *Covert human intelligence sources in cartel investigations*<sup>400</sup>. The codes follow closely best practice guidelines issued by the Home Office.

#### (iv) Prosecution and penalty

The cartel offence is triable on indictment before a jury in the Crown Court, where a term of imprisonment of up to five years may be imposed<sup>401</sup> or an unlimited fine<sup>402</sup>, or in a magistrates' court, where the maximum prison sentence would be six months and where a fine may also be imposed<sup>403</sup>. The two cases to have been brought so far under the Act were both dealt with by Southwark Crown Court in London<sup>404</sup>. Prosecutions may be brought by the Serious Fraud Office (SFO) or the OFT<sup>405</sup>; the SFO may undertake this function in England, Wales and Northern Ireland where serious or complex fraud is involved<sup>406</sup>. The factors that the SFO will take into account in defining a serious or complex fraud case include whether the value of the alleged fraud exceeds £1 million<sup>407</sup>; whether the case is likely to give rise to national publicity and widespread public concern; and whether legal, accounting and investigative skills need to be brought together<sup>408</sup>. If the SFO agrees to accept a case it may carry out additional inquiries using its powers under section 2 of the Criminal Justice Act 1987, which are broadly the same as the powers of the OFT under the Enterprise Act<sup>409</sup>. The SFO is bound by the Code for Crown Prosecutors<sup>410</sup>. Prosecutions in Scotland are brought by the Lord Advocate<sup>411</sup>. The OFT can decide to prosecute a case itself where it unearths a hard-core cartel that does not amount to a serious fraud for the SFO's purposes; it conducted the prosecutions in *Marine Hoses* and *British Airways*, discussed below.

The OFT has agreed a *Memorandum of Understanding* with the SFO which records the basis on which they will cooperate to investigate and/or prosecute individuals in respect of the cartel offence where 'serious or complex fraud' is suspected; a similar *Memorandum* of June 2009, revising an earlier one of 2003, has been agreed with the National Casework Division of the Crown Office in Scotland: both *Memoranda* are available on the OFT's website<sup>412</sup>. Initial inquiries into possible cartel activity will be undertaken by the OFT; if it considers that the SFO's 'acceptance' criteria are satisfied – that is to say that serious or complex fraud may be involved – the OFT will refer the matter to the SFO, the Director of which will endeavour to decide whether to accept the case, or to require the OFT to make

<sup>399</sup> OFT 738, August 2004, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>400</sup> OFT 739, August 2004, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>401</sup> A custodial sentence can be imposed only where the court is of the opinion that the offence is so serious that only such a sentence can be justified: Powers of Criminal Courts (Sentencing) Act 2000, s 79.

<sup>402</sup> Enterprise Act 2002, s 190(1)(a).

<sup>403</sup> *Ibid*, s 190(1)(b); the maximum fine in the magistrates' court would be £5,000: Magistrates Courts' Act 1980, s 32(9).

<sup>404</sup> See 'The cartel offence in practice', p 434 below.

<sup>405</sup> Enterprise Act 2002, s 190(2)(a).

<sup>406</sup> *The cartel offence: Guidance on the issue of no-action letters for individuals*, OFT 513, para 2.7.

<sup>407</sup> See the *Background note to the Memorandum of Understanding*, available at [www.of.gov.uk](http://www.of.gov.uk); the value of the fraud presumably relates to the loss caused to the victims or to the profit made by the fraudsters.

<sup>408</sup> *Powers for investigating criminal cartels*, para 3.18.

<sup>409</sup> *Ibid*, paras 3.20–3.23.

<sup>410</sup> Available on the website of the Crown Prosecution Service: [www.cps.gov.uk/Home/CodeForCrownProsecutors](http://www.cps.gov.uk/Home/CodeForCrownProsecutors).

<sup>411</sup> In Scotland the Lord Advocate exercises the same powers as the SFO under the Criminal Law (Consolidation) (Scotland) Act 1995.

<sup>412</sup> See OFT 547, October 2003 (SFO) and OFT 546, June 2009 (NCD), available at [www.of.gov.uk](http://www.of.gov.uk).

further inquiries, within 28 days<sup>413</sup>. Where the SFO accepts an OFT referral the case team will consist of both SFO and OFT staff, under the direction of an SFO case controller<sup>414</sup>.

Both the OFT and the SFO are bound by the disclosure provisions of the Criminal Procedure and Investigations Act 1996 which require them to disclose to the defendant any prosecution material which, in the prosecutor's opinion, might undermine the case for the prosecution against the accused.

The OFT is responsible for the grant of leniency and the issue of no-action letters, but where this could affect the outcome of an SFO investigation the OFT will consult with it<sup>415</sup>. The SFO would not prosecute a cartel as a conspiracy to defraud or under the Fraud Act 2006 where the OFT has granted immunity under the Enterprise Act. There is no system in the UK of 'plea bargaining' of the kind that operates under the criminal provisions in US law<sup>416</sup>.

#### (v) Parallel OFT criminal and administrative investigations

When the OFT first receives information about alleged cartel activity it may not immediately be clear whether the case will involve a criminal prosecution of individuals, or whether it will 'merely' lead to an administrative procedure against the undertakings concerned under the Competition Act. In order not to compromise any criminal prosecution the OFT will, where appropriate, follow the procedures required by PACE and its associated Codes of Practice from the outset; this will include giving individuals the standard criminal caution before being questioned, and allowing the presence of a legal adviser<sup>417</sup>. If the OFT decides to conduct a 'compulsory' interview, the difference between this and a 'voluntary' interview must be explained, as well as the restrictions on the use of information obtained in a voluntary interview<sup>418</sup>.

Where there is a possibility of both criminal and administrative proceedings, and where the SFO is conducting the criminal case, the OFT and the SFO will consult on timing; the OFT will not institute an administrative procedure without prior consultation with the SFO<sup>419</sup>. Where the OFT and SFO are proceeding simultaneously the two investigating teams will maintain an 'on-going dialogue' in order to ensure that the administrative procedure does not prejudice the parallel criminal investigation<sup>420</sup>. If the OFT conducts both the criminal and administrative proceedings, different case teams are established for each investigation.

Statements obtained under the Competition Act will usually not be available for the purpose of a criminal prosecution if they have not been obtained according to criminal law standards; it may therefore be necessary to conduct a further interview in accordance with PACE procedures<sup>421</sup>. It is possible that a civil claim for damages might be stayed until a criminal trial has been held<sup>422</sup>.

<sup>413</sup> *Memorandum of Understanding*, paras 3 and 4.

<sup>420</sup> *Ibid*, para 4.7.

<sup>421</sup> *Ibid*, para 4.8.

<sup>422</sup> See *Secretary of State for Health v Norton Healthcare Ltd* [2004] Eu LR 12, para 40.

(vi) **No-action letters**

Section 190(4) of the Enterprise Act provides for the issue by the OFT of so-called ‘no-action letters’ whereby individuals who provide information about cartels to the OFT will be granted immunity from prosecution. This is a further example of encouraging whistle-blowers to provide information about cartels in return for leniency<sup>423</sup>. The OFT has published two sets of guidance on the issue of no-action letters, *The cartel offence: Guidance on the issue of no-action letters for individuals*<sup>424</sup> and *Leniency and no-action guidance*<sup>425</sup>, in particular Part 7 thereof. The latter document does not replace the former one, but it does make some significant amendments to it; it is therefore the suggested starting point for anyone needing guidance on the subject: a pro-forma no-action letter for individuals is set out at Annex B of the *Leniency and no-action guidance*. The OFT cannot offer leniency from prosecution in Scotland since that is a matter for the Lord Advocate; however the Lord Advocate will accord serious weight to any recommendation from the OFT as to leniency in a case falling to be prosecuted in Scotland when deciding whether to prosecute<sup>426</sup>.

The OFT will not reach a final decision on whether an individual will be required to admit participation in the criminal offence until the investigation is at or near its conclusion and until specialist criminal counsel has had the opportunity to advise the OFT on this issue<sup>427</sup>. If the OFT decides that it is appropriate that an individual who qualifies for criminal immunity should make an admission of participation in it, including dishonesty, that individual will be offered immunity only on condition that such an admission is made<sup>428</sup>; if such an admission is deemed not to be appropriate, the individual will be offered a ‘comfort letter’ stating that the OFT does not consider that there is sufficient evidence for it to prosecute<sup>429</sup>. If an individual works for an undertaking that is not itself a coercer<sup>430</sup>, the individual will not be refused criminal immunity unless he or she enjoyed a position of power independent of their position within the undertaking and used that power for the purpose of coercion<sup>431</sup>.

Where an undertaking is granted Type A immunity<sup>432</sup> all current and former employees and directors will gain automatic criminal immunity<sup>433</sup>; the same is true where Type B immunity is granted<sup>434</sup>; the *Leniency and no-action guidance* refers to this as ‘blanket’ immunity. Blanket immunity is not available in Type B leniency and Type C leniency cases: in those cases immunity is considered by the OFT on an individual-by-individual basis<sup>435</sup>. Immunity may also be granted to individuals on their own account, that is to say irrespective of any approach to the OFT by an undertaking<sup>436</sup>. There will be automatic criminal immunity where an individual tells the OFT about cartel activity before any other individual or undertaking and where there is no pre-existing criminal or civil investigation<sup>437</sup>. In other cases criminal immunity may be available on a discretionary basis<sup>438</sup>. Guidance is provided on the process of interviewing individuals who apply for criminal immunity<sup>439</sup>. The *Leniency and no-action guidance* also examines the relationship between the cartel

<sup>433</sup> *Leniency and no-action guidance*, para 7.13.

<sup>434</sup> *Ibid*, para 7.15.

<sup>435</sup> *Ibid*, paras 7.19–7.21.

<sup>436</sup> *Ibid*, para 7.22.

<sup>437</sup> *Ibid*, para 7.24.

<sup>438</sup> *Ibid*, paras 7.25–7.29.

<sup>439</sup> *Ibid*, paras 7.30–7.33.

offence and leniency applications to the European Commission<sup>440</sup>, in particular in light of the concern that exposure to criminal action in the UK might deter undertakings from applying for leniency to the Commission. One way of addressing this is to allow an undertaking that applies to the Commission also to put down a ‘marker’ for Type A blanket immunity on a no-names basis with the OFT<sup>441</sup>.

### (vii) Extradition

The Extradition Act 2003 makes provision for the extradition of individuals who commit the cartel offence or who conspire to or attempt to commit it. This means that, in so far as another country, such as the US, has a criminal offence that corresponds with the cartel offence under the Enterprise Act, it can apply to the UK for the extradition of an individual or individuals and vice versa. This provision, of course, is not retrospective, so that there is no possibility of anyone being extradited under the Extradition Act in respect of conduct occurring before section 188 of the Enterprise Act entered into force on 20 June 2003.

The process of extradition as between the UK and ‘designated territories’<sup>442</sup> is governed by the Extradition Act 2003. The extradition arrangements differ according to whether the partner country is a ‘Category 1’ or a ‘Category 2’ country. The US falls into Category 2. The Act provides that where a Category 2 country seeks extradition it does not have to prove a prima facie case that extradition should be allowed: indeed section 84(7) of the Act forbids a court from considering the sufficiency of the evidence of the requesting State<sup>443</sup>. Instead the requesting State simply has to prove ‘double criminality’, that is to say it must show that:

- the conduct complained of occurred in the territory of the requesting State
- the conduct would constitute a criminal offence under UK law punishable by a term of imprisonment of at least 12 months if it had occurred in the UK
- the conduct is subject to the same punishment under the law of the requesting State<sup>444</sup>.

The House of Lords (now the Supreme Court) has said that it is not necessary to show that the US offence of price fixing includes a dishonesty element as in the case of section 188 of the Enterprise Act<sup>445</sup>. Extradition may be denied where it would be unjust or oppressive by reason of passage of time since the extradition offence occurred<sup>446</sup>.

### (viii) Relationship between the cartel offence and proceedings against cartels under EU competition law

Where a European Commission cartel investigation involves a potential criminal cartel offence under the Enterprise Act the OFT will cooperate with the Commission to coordinate the progress of the two investigations<sup>447</sup>.

<sup>440</sup> Ibid, paras 7.34–7.46.

<sup>441</sup> Ibid, paras 3.15–3.16 and 7.38.

<sup>442</sup> See the Extradition Act 2003 (Designation of Part 1 Territories) Order 2003, SI 2003/3333 and the Extradition Act 2003 (Designation of Part 2 Territories) Order 2003, SI 2003/3334.

<sup>443</sup> On this point, and on the controversy over a lack of reciprocity over extradition between the US and the UK, see the related case of *R (Norris) v Secretary of State for the Home Department*, High Court [2006] EWHC 280 (Admin).

<sup>444</sup> Extradition Act 2003, s 64(2) (for part 1 territories) and Extradition Act 2003, s 137(2) (for part 2 territories).

<sup>446</sup> Extradition Act 2003, s 82.

<sup>447</sup> *Powers for investigating criminal cartels*, para 4.10.

**(ix) The cartel offence in practice**

The first case under section 188 of the Enterprise Act arose from a cartel in the supply of marine hoses, and resulted in terms of imprisonment on three individuals between two and a half and three years<sup>448</sup>, reduced slightly on appeal to the Court of Appeal<sup>449</sup>; it declined, because of the circumstances of that case<sup>450</sup>, to lay down any general guidance as to the terms of imprisonment to be imposed in other cases. The OFT's investigation in the *Marine Hoses* case was closely coordinated with those of the competition authorities in other jurisdictions, including the European Commission, which imposed fines of €131 million on the undertakings involved in this case<sup>451</sup>, and the US Department of Justice, where the same individuals pleaded guilty to illegal price fixing and agreed to terms of imprisonment there<sup>452</sup>.

The OFT commenced proceedings in August 2008 against four employees of British Airways under section 188 of the Enterprise Act in connection with the fixing of prices of fuel surcharges for long-haul passenger flights; each of them pleaded not guilty<sup>453</sup>. At their trial in the spring of 2010 at Southwark Crown Court the OFT decided to withdraw the proceedings, and the defendants were formally acquitted. This was because, at a very late stage in the proceedings, after the commencement of the trial, a substantial volume of electronic material was discovered which neither the OFT nor the defence had been able to review; the OFT's opinion was that it would not have been fair to seek an adjournment of the trial while the fresh evidence was analysed<sup>454</sup>. Three non-executive directors of the OFT conducted a review of what had occurred in this case, and made a number of recommendations to the Board as to steps to be taken to ensure that appropriate lessons were learned from the experience<sup>455</sup>.

As at 17 October 2011 there was one pending criminal case, in the commercial vehicle sector<sup>456</sup>.

**(x) Reform of the cartel offence**

In March 2011 the Government published a consultation document, *A Competition Regime for Growth: a consultation on options for reform*<sup>457</sup>. One of the proposals in this document is the removal of the requirement of 'dishonesty' in the cartel offence<sup>458</sup>; another is that the offence would not apply to agreements made openly.

<sup>448</sup> See OFT Press Release 72/08, 11 June 2008.

<sup>449</sup> See *R v Whittle and others* [2008] EWCA Crim 2560.

<sup>450</sup> See ch 10 n 452 below.

<sup>451</sup> See ch 10 n 330 above.

<sup>452</sup> See the US Department of Justice Press Release of 12 December 2007, available at [www.justice.gov](http://www.justice.gov); as part of the US plea agreement in this case the defendants had agreed not to seek from the UK court a shorter term of imprisonment than the one agreed to in the US proceedings: the Court of Appeal expressed its 'doubts' as to the propriety of the US prosecutor seeking to inhibit the way in which the proceedings in the UK could be conducted: *ibid*, para 28.

<sup>453</sup> OFT Press Release 93/08, 7 August 2008; British Airways agreed to pay a penalty of £121.5 million for its admitted participation in this cartel: see 'Statistical analysis', p 418 above.

## (B) Company director disqualification

The Enterprise Act 2002 introduced a second provision designed to encourage individuals to ensure compliance with competition law: under section 204, which inserted new sections into the Company Directors Disqualification Act 1986 (the ‘CDDA 1986’), company directors can be disqualified for up to 15 years where their companies are guilty of a competition law infringement: it is important to understand that disqualification of individuals is *not* limited to circumstances in which the cartel offence has been committed, but applies to any infringement of Articles 101 and 102 TFEU and of the Chapter I and Chapter II prohibitions<sup>459</sup>. It is for the High Court (or the Court of Session in Scotland) to make a competition disqualification order (‘a CDO’), not the OFT or the sectoral regulators<sup>460</sup>: their function is to determine whether to seek such an order, which the CDDA 1986 gives them power to do<sup>461</sup>, and whether to accept an undertaking in lieu of an order, for which provision is also made<sup>462</sup>. The OFT originally published guidance on these powers in May 2003, but that document was replaced in June 2010 by a revised one indicating a greater preparedness on its part to make use of them<sup>463</sup>.

Three company directors were disqualified for periods of between five and seven years as a result of their participation in the *Marine Hose* cartel<sup>464</sup>; as a matter of technical law, however, these disqualifications were based on the fact that they had committed the criminal cartel offence, and were disqualified under the CDDA 1986: the court did not need to invoke the additional power conferred by section 204 of the Enterprise Act. To put the point another way, the power in section 204 has yet to be used to disqualify a director.

### (i) Grounds for disqualification

Under section 9A of the CDDA 1986 the court must make a CDO against a person if a company of which he is a director commits an infringement of EU and/or UK competition law<sup>465</sup> and the court considers that his conduct as a director makes him unfit to be concerned in the management of a company<sup>466</sup>; the OFT considers that the term ‘director’, for this purpose, includes a *de facto* director<sup>467</sup>. In deciding whether the conduct of a director makes him unfit, the court must have regard to whether his conduct contributed to the breach of competition law; or, where this is not the case, whether he had reasonable grounds to suspect a breach and took no steps to prevent it; or, if he did not know of the breach, he ought to have done<sup>468</sup>. Furthermore the court may have regard to his conduct as a director of a company in connection with any other breach of competition law<sup>469</sup>. The maximum period of disqualification is 15 years<sup>470</sup>, and during that time it is a criminal offence to be a director of a company, to act as a receiver of a company’s property, to promote, form or manage a company or to act as an insolvency practitioner<sup>471</sup>. Any person involved in the management of a company in contravention of a CDO is personally liable for the debts of the company<sup>472</sup> and may be placed on a public register maintained by the Secretary of State for Business, Innovation and Skills<sup>473</sup>.

<sup>459</sup> CDDA 1986, s 9A(4).

<sup>460</sup> *Ibid*, s 9E(3).

<sup>461</sup> *Ibid*, s 9A(10): s 9D provides that the Secretary of State may make regulations as to the concurrent functions of the OFT and the sectoral regulators in relation to CDOs; in the text that follows the term OFT is used to include the powers of the sectoral regulators.

<sup>462</sup> CDDA 1986, s 9B.

<sup>465</sup> CDDA 1986, s 9A(2).

<sup>466</sup> *Ibid*, s 9A(3).

<sup>467</sup> *Director disqualification orders*, para 2.3; see also para 4.5.

<sup>468</sup> CDDA 1986, s 9A(5)(a) and (6).

<sup>469</sup> *Ibid*, s 9A(5)(b).

<sup>470</sup> *Ibid*, s 9A(9).

<sup>471</sup> *Ibid*, ss 1(1) and 13.

<sup>472</sup> *Ibid*, s 15(1)(a).

<sup>473</sup> *Ibid*, s 18.

**(ii) Procedure**

The OFT has power to make inquiries and investigations under sections 26 to 30 of the Competition Act for the purpose of deciding whether to apply for a disqualification order<sup>474</sup>. The OFT may accept undertakings in lieu of seeking a CDO<sup>475</sup>. When deciding whether to apply for an order the OFT will take into account the factors set out in its guidance<sup>476</sup>. It will follow a five-step process in which it will consider:

- whether there has been a breach of competition law
- the nature of the breach and whether a financial penalty has been imposed
- whether the company in question benefited from leniency
- the extent of the director's responsibility for the breach of competition law and
- whether there are any aggravating and mitigating factors<sup>477</sup>.

The OFT guidance then provides more detail on each of these five factors. The OFT will not seek a CDO in respect of any current director whose company has benefited from leniency in relation to the activities to which the leniency relates<sup>478</sup>; this largesse would not extend to a director who has been removed as a director as a result of his role in the breach of competition law or for opposing the relevant application for leniency, nor to a director who fails to cooperate with the leniency process<sup>479</sup>. The extent of the director's responsibility for the breach of competition law will be relevant to the decision whether to apply to the court, and the 2010 guidance adopts a stricter approach in this respect than its 2003 predecessor: in particular the OFT will ask whether the director's conduct contributed to the breach<sup>480</sup>; whether he had reasonable grounds to suspect breach but took no steps to prevent it<sup>481</sup>; and whether he ought to have known of the breach<sup>482</sup>. The guidance sets out various aggravating and mitigating factors<sup>483</sup>. The OFT would not seek a CDO if an individual is being prosecuted under the cartel offence, since the court dealing with that matter would have the right to make a CDO anyway<sup>484</sup>; nor would it proceed against anyone who is the beneficiary of a no-action letter<sup>485</sup>. The OFT must send a notice to anyone in relation to whom it applies for a CDO: the information that will be contained in this notice is set out in the OFT's guidance<sup>486</sup>.

**(C) Conspiracy to defraud at common law<sup>487</sup>**

In *Norris v Government of the United States of America*<sup>488</sup> the US Government was seeking extradition of Mr Norris under the terms of the Extradition Act 2003. The conduct complained of by the US authorities was price fixing contrary to section 1 of the Sherman Act 1890. Under the Extradition Act the US had to demonstrate 'double criminality', that is to say that price fixing was illegal under US law and that the same conduct, if it

<sup>485</sup> Ibid, para 4.29; on no-action letters see 'No-action letters', pp 432–433 above.

<sup>486</sup> *Director disqualification orders*, paras 5.1–5.2.

<sup>487</sup> See Lever and Pike 'Cartel Agreements, Criminal Conspiracy and the Statutory "Cartel Offence"' (2005) 26 ECLR 90 and (2005) 26 ECLR 164; Lester 'Prosecuting Cartels for Conspiracy to Defraud' [2008] 7 Competition Law Journal 134.

<sup>488</sup> [2008] UKHL 16, [2008] 1 AC 920, reversing the judgment of the High Court on this point in *Ian Norris v The Government of the USA* [2007] EWHC 71 (Admin), [2007] UKCLR 1487.

had occurred in the UK, would have been punishable there by a term of imprisonment of at least 12 months. At the relevant time the cartel offence under the Enterprise Act 2002 did not exist. The Administrative Court had held that price fixing could amount to conspiracy to defraud, a criminal offence at common law pre-dating the Enterprise Act, where there is an agreement 'between two or more persons dishonestly to prejudice or to risk prejudicing another's right, knowing that they have no right to do so'<sup>489</sup>. On appeal the House of Lords held that 'mere' price fixing did not amount to conspiracy to defraud: it followed that there was no double criminality and that Norris could not be extradited on this ground<sup>490</sup>. A price-fixing agreement could be conspiracy to defraud only where there were aggravating features: fraud, misrepresentation, violence and intimidation were referred to as examples<sup>491</sup>. *Norris* was subsequently followed by the Court of Final Appeal in Hong Kong<sup>492</sup>.

## 7. Concurrency

An interesting feature of the 1998 Act is that concurrent powers are given to the OFT and the sectoral regulators to enforce the Chapter I and Chapter II prohibitions and Articles 101 and 102 TFEU. In their respective spheres of activity the Office of Communications, the Gas and Electricity Markets Authority, the Water Services Regulation Authority, the Civil Aviation Authority<sup>493</sup>, the Office for the Regulation of Gas and Electricity (Northern Ireland) and the Office of Rail Regulation enjoy concurrent powers. The Government is proposing to give Monitor concurrent powers in respect of providers of health or adult social care<sup>494</sup>. The availability of these competition law powers raises the interesting dilemma for the sectoral regulators of whether they should use competition law when they suspect there to be anti-competitive behaviour or whether they should use the sector-specific regulatory powers available to them under their governing legislation<sup>495</sup>.

### (i) The Concurrency Regulations and the Concurrency Guideline

As far as the Competition Act itself is concerned provisions have been put in place in order to ensure that concurrency operates in a satisfactory manner; the Act deals with this issue in section 54 and Schedule 10. Acting under section 54 of the Competition Act the Secretary of State has adopted the Competition Act (Concurrency) Regulations 2004<sup>496</sup>. The OFT, in conjunction with the regulators, has published a Guideline on

<sup>489</sup> *Ibid*, para 56.

<sup>490</sup> Mr Norris was subsequently extradited to the US on the different ground of perverting the course of justice; he was convicted and sentenced to 18 months imprisonment: see US Department of Justice Press Release, 10 December 2010, available at [www.justice.gov/otr](http://www.justice.gov/otr).

<sup>491</sup> [2008] UKHL 16, para 17; see also *R v GG plc* [2008] UKHL 17, a case arising out of the SFO's prosecution of a number of pharmaceutical companies for price fixing prior to the entry into force of the cartel offence in the Enterprise Act 2002: the SFO subsequently sought leave to amend the indictment in this case, but this was refused: see *R v GG plc (No 2)* [2008] EWCA Crim 3061.

<sup>492</sup> *HKSAP v Yip* FACC No 4 of 2010, judgment of 13 December 2010.

<sup>493</sup> The Government intends to extend the CAA's concurrent powers beyond the supply of air traffic services to include services provided by airport operators and third party airport service providers: see Department for Transport, *Consultation Responses and Decision on Concurrent Powers*, July 2010, available at [www.dft.gov.uk](http://www.dft.gov.uk).

<sup>494</sup> Department of Health, *Liberating the NHS: regulating healthcare providers*, July 2010, available at [www.dh.gov.uk](http://www.dh.gov.uk).

<sup>495</sup> See 'Regulated Industries', ch 23, pp 977–980.

<sup>496</sup> SI 2004/1077.

*Concurrent application to regulated industries*<sup>497</sup>. The *Guideline* provides the best picture of the operation of the concurrency provisions. It explains that the regulators have the same powers as the OFT<sup>498</sup>, save that only the latter can issue guidance on penalties and make and amend the OFT's Rules<sup>499</sup>. The *Guideline* describes the purpose of the Concurrency Regulations<sup>500</sup> and explains the role of the Concurrency Working Party ('the CWP'), which is chaired by a representative of the OFT and brings together officials from all the regulators<sup>501</sup>. The CWP discusses, among other things, general principles and information sharing, the guidelines and disagreements over who should exercise jurisdiction in a particular case<sup>502</sup>. The proceedings of the CWP are confidential, and no minutes of its meetings are made publicly available. The *Guideline* considers how cases will be allocated: in the event of a dispute on jurisdiction the matter will be referred to the Secretary of State<sup>503</sup>; this has never occurred, and it can reasonably be assumed that it will happen only exceptionally. Complaints may be made to the OFT or the relevant regulator<sup>504</sup>; the same is true for applications for interim measures<sup>505</sup>. The *Guideline* also discusses the relationship between the regulators' powers under competition law and their sector-specific powers<sup>506</sup> and explains the law on confidentiality and disclosure of information<sup>507</sup>. In *R (Cityhook Ltd) v OFT*<sup>508</sup> the Administrative Court considered the Concurrency Regulations in detail and concluded that the OFT had failed to consider whether a long-running case should be transferred to the Office of Communications ('OFCOM') before closing its file<sup>509</sup>.

## (ii) The concurrency arrangements in practice

The only infringement decisions to have been adopted by a sectoral regulator by 20 June 2011 were taken by the ORR in the case of *English Welsh & Scottish Railway Ltd* in November 2006<sup>510</sup> and by the Gas and Electricity Markets Authority in the case of *National Grid plc* in February 2008<sup>511</sup>. There is public debate in the UK as to why it has not been possible, after ten years of the Competition Act, for the regulators to have found more infringements<sup>512</sup>. There have been a number of non-infringement decisions<sup>513</sup>; several of the non-infringement decisions of OFCOM and the Water Services Regulation Authority were appealed to the CAT which, in some of its judgments, has shown frustration with both the slowness of the procedure and the substantive outcome<sup>514</sup>. In the case of *Albion Water* the

CAT set aside the non-infringement decision of the Water Services Regulation Authority and substituted its own finding that there had been an abusive margin squeeze<sup>515</sup>.

### (iii) Reviews of concurrency arrangements

The functioning of the concurrency arrangements was considered by the Government in 2006, a House of Lords Select Committee in 2007 and the National Audit Office in 2010<sup>516</sup>. Each of these bodies concluded that the concurrency arrangements should be retained, but that it might be possible to enhance the existing cooperation between the OFT and the sectoral regulators. The National Audit Office, in particular, noted that the regulators have made limited use of their concurrent powers to enforce competition law, and recommended that the Government should evaluate whether the incentives within the regime for regulators to use their concurrent powers are appropriate to establish the body of case law required for an effective system of competition law. In March 2011 the Government confirmed the retention of the regulator's concurrent competition enforcement powers, but is consulting on measures that encourage the use of competition law rather than regulation where this is possible and appropriate<sup>516a</sup>.

## 8. Appeals

The Competition Act deals with appeals in sections 46 to 49 and in Schedule 8, as amended by the Enterprise Act 2002. The powers available to the OFT and the sectoral regulators under the Act are considerable. To balance this, and to ensure compliance with the Human Rights Act 1998 which requires that decisions should be made by an independent and impartial tribunal, it was felt that a right of appeal – not merely the possibility of judicial review – should be available; furthermore that the appellate body should be one with appropriate expertise in matters of competition law. For this reason appeals are taken to the CAT<sup>517</sup>. The Court of Appeal has acknowledged that the CAT, as a specialist tribunal, is better placed to determine complex matters of competition law and economics than the 'ordinary' courts<sup>518</sup>. Once an appeal has been lodged with the CAT it can be withdrawn only with the Tribunal's permission unless the authority itself withdraws the decision under challenge: the CAT deals with cases in the public interest, and improper pressure should not be applied by one litigant upon another to withdraw an appeal<sup>519</sup>. In so far as the Act does not provide for an appeal there remains the possibility that a claim for judicial review may be brought before the Administrative Court of the Queen's Bench Division of the

<sup>515</sup> Case No 1046/2/4/04 *Albion Water Ltd v Water Services Regulation Authority* [2006] CAT 36, [2007] CompAR 420, upheld on appeal [2008] EWCA Civ 536, [2008] UKCLR 457.

<sup>517</sup> The establishment and the functions of the CAT are described in ch 2, 'Functions of the CAT', pp 72–73; appeals to the CAT are governed by Part II of the Competition Appeal Tribunal Rules 2003, SI 2003/1372 as amended by the Competition Appeal Tribunal (Amendment and Communications Act Appeals) Rules 2004, SI 2004/2068.

<sup>518</sup> *Napp Pharmaceutical Holdings Ltd v Director General of Fair Trading* [2002] EWCA Civ 796, [2002] 4 All ER 376, paras 31 and 34 and *National Grid Plc v Gas and Electricity Markets Authority* [2010] EWCA Civ 114, [2010] UKCLR 386, paras 24–26.

<sup>519</sup> SI 2003/1372, r 11; see Case No 1008/2/1/02 *Claymore Dairies Ltd v OFT* [2006] CAT 3, [2006] CompAR 360, paras 82–89.

High Court<sup>520</sup> in relation to perceived procedural irregularities<sup>521</sup> or the improper exercise of administrative discretion<sup>522</sup>. It may be that permission to apply for judicial review would be refused if the Administrative Court were to consider that a particular issue can be addressed within the statutory appeal procedure<sup>523</sup>.

### (A) 'Appealable decisions'

Section 46<sup>524</sup> of the Competition Act sets out a list of 'appealable decisions' and states that the recipients of such decisions may appeal them to the CAT; appealable decisions include, for example, decisions as to whether the Chapter I and Chapter II prohibitions or Articles 101 and 102 TFEU have been infringed<sup>525</sup>, interim measures decisions and decisions as to the imposition of, or the amount of, a penalty<sup>526</sup>. As can be seen from the Table of Competition Act decisions in chapter 9 many of the OFT's infringement decisions have been appealed to the CAT<sup>527</sup>, both as to substance and as to the level of the penalty. For the most part the OFT's infringement decisions have been upheld by the CAT: only one such decision has been annulled in its entirety<sup>528</sup>. The penalties imposed by the OFT have been reduced in some cases, as shown in the Table of penalties earlier in this chapter<sup>529</sup>.

Section 47 of the Competition Act, as substituted by section 17 of the Enterprise Act 2002<sup>530</sup>, gives third parties with a sufficient interest a right to appeal to the CAT in relation to appealable decisions. The CAT has said that there is no difference in principle between its treatment of an appeal against an infringement decision and an appeal by a third party against a non-infringement decision<sup>531</sup>. In practice, however, the CAT's role in third party appeals has been to control the adequacy of the authority's reasons and their correctness in law. There have been several appeals to the CAT by third parties disappointed that either the OFT or a sectoral regulator had failed to find an infringement of the Competition Act or of Article 101 or 102 TFEU. In some cases the OFT or regulator had explicitly decided that there was no infringement, so that there was no doubt that an appealable decision had been adopted; in some other cases, however, the OFT or regulator closed the file without explicitly or consciously deciding that there was no infringement: in these cases the CAT has had to decide whether, at least implicitly, a find-

<sup>520</sup> On the judicial review procedure, see Part 54 of the Civil Procedure Rules 1998, available at [www.justice.gov.uk](http://www.justice.gov.uk).

<sup>521</sup> See eg *Crest Nicholson Plc v OFT* [2009] EWHC 1875, [2009] UKCLR 895 and *OFCOM v Floe Telecom Ltd (in administration)* [2006] EWCA Civ 768, [2006] ECC 445, para 45.

<sup>522</sup> See eg *R (Cityhook Ltd) v OFT* [2009] EWHC 57, [2009] UKCLR 255.

<sup>523</sup> See *R (Sivasubramaniam) v Wandsworth County Court* [2002] EWCA Civ 1738, [2003] 2 All ER 160, paras 46–47 and the case law there cited; on judicial review where an appeal system is in place see Craig *Administrative Law* (Sweet & Maxwell, 6th ed, 2008), pp 912–913.

<sup>524</sup> As amended by art 10 of the Competition Act 1998 (Notification of Excluded Agreements and Appealable Decisions) Order 2000, SI 2000/263.

<sup>525</sup> Competition Act 1998, s 46(3)(a) and (b).

<sup>526</sup> *Ibid*, s 46(3)(i).

<sup>527</sup> See ch 9, 'The Competition Act 1998 in Practice', pp 374–392.

<sup>528</sup> Case No 1035/1/1/04 *The Racecourse Association and Others v OFT* [2005] CAT 29, [2006] CompAR 99.

<sup>529</sup> See 'Table of penalties', pp 419–422 above.

<sup>530</sup> The amended 47 avoids the cumbersome procedure for third parties in the Competition Act 1998 as originally drafted, of which the CAT was critical in Case No 1006/2/1/01 *BetterCare Group v Director General of Fair Trading* [2002] CAT 6, [2002] CompAR 226, paras 115–125.

<sup>531</sup> Case No 1046/2/4/04 *Albion Water Ltd v Director General of Water Services* [2005] CAT 40, [2006] CompAR 269, para 243, citing earlier judgments in Case No 1007/2/3/02 *Freeserve.com plc v Director General of Telecommunications* [2003] CAT 5, [2003] CompAR 202 and *JJ Burgess & Sons v OFT* [2005] CAT 25, [2005] CompAR 1151.

ing of non-infringement had been reached, in which case an appealable decision could be brought before the CAT. If a decision is not appealable to the CAT, at most a third party can seek a judicial review in the Administrative Court<sup>532</sup>.

### (i) Successful appeals against explicit non-infringement decisions

There have been several successful appeals<sup>533</sup> by third parties against explicit non-infringement decisions of the OFT or a sectoral regulator. The first decision of the OFT under the Competition Act, *General Insurance Standards Council*<sup>534</sup>, was taken on appeal by third parties to the CAT<sup>535</sup>. The CAT disagreed with the OFT's finding that the rules of GISC, which prevented its insurer members from dealing with insurance intermediaries unless they were themselves members of GISC, did not infringe the Chapter I prohibition and remitted the case to the OFT for further consideration. As the rule to which the appellants had taken objection was then dropped the OFT was able to adopt a second non-infringement decision<sup>536</sup>.

An appeal was brought by a third party against a decision by the OFT that there had been no infringement of the Chapter II prohibition in *Refusal to supply JJ Burgess Ltd with access to Harwood Park Crematorium*<sup>537</sup>. The case concerned a refusal on the part of W Austin, a funeral director, to provide access to a crematorium to a competitor, JJ Burgess. In *JJ Burgess & Sons v OFT*<sup>538</sup> the CAT set aside the OFT's non-infringement decision and substituted its own finding of infringement. The CAT was frustrated at the amount of time that the administrative proceedings had taken, and was concerned that a small operator such as JJ Burgess had failed to get redress from the OFT. It is of interest to note that the Consumers' Association (now known as Which?) intervened in this case in support of JJ Burgess, and that the CAT welcomed the intervention. It remains to be seen how the CAT's apparent concern that small operators should have access to justice can be reconciled with the OFT's *Prioritisation Principles*, according to which the OFT will select cases that will have the highest impact and greatest effect<sup>539</sup>.

In *Floe Telecom Ltd v Director General of Telecommunications*<sup>540</sup> the CAT annulled a non-infringement decision of the Director General of Telecommunications (now OFCOM), *Disconnection of Floe Telecom Ltd's Services by Vodafone Ltd*<sup>541</sup>. OFCOM subsequently adopted a second non-infringement decision which was upheld on appeal to the CAT, albeit on different grounds from those given by OFCOM<sup>542</sup>; the CAT's judgment was set aside on appeal to the Court of Appeal<sup>543</sup>. The CAT set aside a non-infringement decision of the Office of Water Services ('OFWAT') in *Albion Water/Thames Water*<sup>544</sup>.

<sup>532</sup> In Case No 1071/2/1/06 *Cityhook v OFT* Cityhook not only appealed to the CAT but also sought judicial review in the Administrative Court.

<sup>533</sup> For an example of an unsuccessful appeal against an explicit non-infringement decision see Case No 1073/2/1/06 *Terry Brannigan v OFT* [2007] CAT 23, [2007] CompAR 956.

<sup>534</sup> OFT decision of 26 January 2001 [2001] UKCLR 331.

<sup>535</sup> Case Nos 1002–1004/2/1/01 *Institute of Independent Insurance Brokers v Director General of Fair Trading* [2001] CAT 4, [2001] CompAR 62.

<sup>536</sup> *General Insurance Standards Council*, 13 November 2002 [2003] UKCLR 39.

<sup>537</sup> OFT decision of 12 August 2004 [2004] UKCLR 1586; there had been an earlier decision to the same effect in *Harwood Park Crematorium*, OFT decision of 6 August 2002; this decision was withdrawn by the OFT by decision of 9 April 2003 pursuant to s 47(5) of the Competition Act.

<sup>538</sup> Case No 1044/2/1/04 [2005] CAT 25, [2005] CompAR 1151.

<sup>539</sup> OFT 939, October 2008, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>540</sup> Case No 1024/2/3/04 [2004] CAT 18, [2005] CompAR 290.

<sup>541</sup> OFTEL decision of 3 November 2003 [2004] UKCLR 313.

<sup>542</sup> OFCOM decision of 28 June 2005 [2005] UKCLR 1112, upheld on appeal Case No 1024/2/3/04 *Floe Telecom Ltd v OFCOM* [2006] CAT 17, [2006] CompAR 637.

<sup>543</sup> *OFCOM v Floe Telecom Ltd* [2009] EWCA Civ 47, [2009] UKCLR 659.

<sup>544</sup> [2006] CAT 7, [2006] CompAR 451.

It also annulled OFWAT's finding of non-infringement in *Albion Water/Dŵr Cymru*<sup>545</sup> and adopted a decision that Dŵr Cymru had abused its dominant position by imposing a margin squeeze on Albion Water<sup>546</sup> and by charging unfairly high prices<sup>547</sup>.

**(ii) Successful appeals against implicit non-infringement decisions**<sup>548</sup>

On four occasions the OFT or a regulator, having received a complaint that the Competition Act or that Article 101 or 102 TFEU had been infringed, decided to close the file and to inform the complainant accordingly; the complainant then successfully appealed to the CAT that the decision was in fact one of non-infringement. In three of the cases, *BetterCare Group v Director General of Fair Trading*<sup>549</sup>, *Freeserve.com plc v Director General of Telecommunications*<sup>550</sup> and *Claymore Dairies Ltd and Express Dairies plc v Director General of Fair Trading*<sup>551</sup>, the CAT concluded that the OFT or regulator had adopted an appealable decision that there was no infringement of the Chapter II prohibition, and rejected the argument that the closure of the file was simply an administrative decision not to proceed with the matter: as a consequence the CAT had jurisdiction to deal with the substance of the appeal. In *Pernod-Ricard SA v OFT*<sup>552</sup> the CAT held that the OFT had adopted a non-infringement decision when it closed its file against voluntary assurances offered by Bacardi that it would change its distribution practices in relation to light rum.

In the *Claymore* judgment the CAT summarised the law on the meaning of an appealable decision as follows<sup>553</sup>. First, the question of whether an appealable decision has been taken is primarily a question of fact, to be decided in accordance with the particular circumstances of the case. Secondly, whether such a decision has been taken is a question of substance, not form, to be determined objectively, taking into account all the circumstances of the case: the test to be applied is whether a decision has been taken on an appealable matter, 'either expressly or by necessary implication'. Thirdly, there is a distinction between the mere exercise of an administrative discretion not to proceed to the adoption of a decision, and the actual adoption of an appealable decision. At paragraph 151 of *Claymore* the CAT gave examples of various reasons for the closure of a case file that would not amount to an appealable decision: for example, where the OFT concludes that, as a matter of priority, other cases have a higher importance<sup>554</sup>. An example not mentioned by the CAT would presumably arise where the matter complained of was the subject of private litigation in the 'ordinary' courts<sup>555</sup>.

<sup>545</sup> OFWAT decision of 26 May 2004 [2004] UKCRL 1317.

<sup>546</sup> Case No 1046/2/4/04 *Albion Water Ltd v Water Services Regulation Authority* [2006] CAT 36, [2007] CompAR 420, upheld on appeal to the Court of Appeal [2008] EWCA Civ 536, [2008] UKCLR 457.

<sup>547</sup> Case No 1046/2/4/04 [2008] CAT 31, [2009] CompAR 28.

<sup>548</sup> For comment on the issue of appealable decisions see Bailey 'When are decisions appealable under the Competition Act 1998?' [2003] 2 Competition Law Journal 41; Alese 'The Office Burden: Making a Decision Without Making a Decision for a Third Party' (2003) 24 ECLR 616; Rayment 'What is an Appealable Decision under the Competition Act 1998?' [2004] 3 Competition Law Journal 132.

<sup>549</sup> Case No 1006/2/1/01 [2002] CAT 6, [2002] CompAR 226.

<sup>550</sup> Case No 1007/2/3/02 [2002] CAT 8, [2003] CompAR 1.

<sup>551</sup> Case No 1008/2/1/02 [2003] CAT 3, [2004] CompAR 1.

<sup>552</sup> [2004] CAT 10, [2004] CompAR 707.

<sup>553</sup> [2003] CAT 3, [2004] CompAR 1, para 122.

<sup>554</sup> On this point the CAT specifically referred to the judgment of the General Court in Case T-24/90 *Automec v Commission (No 2)* [1992] ECR II-2223, [1992] 5 CMLR 431.

<sup>555</sup> Note that this was a reason for the Commission's closure of the file in the *Automec* case, ch 10 n 554 above.

### (iii) Unsuccessful appeals by third party complainants

In five cases, *Aquavitae (UK) Ltd v Director General of Water Services*<sup>556</sup>, *Independent Water Company v Director General of Water Services*<sup>557</sup>, *Casting Book Ltd v OFT*<sup>558</sup>, *Cityhook Ltd v OFT*<sup>559</sup> and *Independent Media Support Ltd v OFCOM*<sup>560</sup>, the CAT reached the conclusion that the OFT or the sectoral regulator had not adopted an appealable decision, with the consequence that the appeals were outside the jurisdiction of the CAT and inadmissible. In *Aquavitae* the CAT accepted that the regulator had not made an appealable decision that the Chapter II prohibition had not been infringed: rather he had chosen to deal with the problems raised by *Aquavitae* by introducing a scheme for retail licensing under new regulatory rules to be established by the Water Act 2003. In *Independent Water Company* the CAT concluded that the Water Services Regulation Authority had not adopted an appealable decision under the Competition Act but had instead decided to deal with the terms and prices on which Bristol Water was to supply bulk water under the regulatory provisions of the Water Industry Act 1991. In *Casting Book Ltd v OFT* the CAT was satisfied that the OFT had closed its investigation into an alleged collective boycott for reasons genuinely independent of the merits of the case and without having reached any conclusion on those merits. In *Cityhook Ltd v OFT* the CAT concluded that the OFT, when closing its file, had not adopted an appealable decision, but said that it had not found the case an easy one to decide<sup>561</sup>; the CAT also noted the ‘incongruous’ result that this meant that *Cityhook* did not have a right to appeal on the merits to the CAT<sup>562</sup>. The former President of the CAT drew attention to the position in the CAT’s Annual Report for 2006–2007, saying that the ‘invidious’ position of complainant’s having to choose whether to apply to the CAT or to the Administrative Court for a judicial review, depending on whether a decision was appealable or not, ‘should have no place in a modern legal system’<sup>563</sup>. In *Independent Media Support Ltd v OFCOM* the CAT drew attention to the same problem. In that case the CAT was satisfied that, when OFCOM decided to close its file, it had ‘genuinely abstained from expressing a firm view, one way or the other, on the question of infringement’<sup>564</sup>; however it considered that the position of the complainant was therefore an unsatisfactory one, but one that could be remedied only by legislation<sup>565</sup>.

## (B) The Competition Appeal Tribunal Rules 2003

Following a Department of Trade and Industry consultation document<sup>566</sup> the Secretary of State adopted the Competition Appeal Tribunal Rules 2003<sup>567</sup>. The CAT has published

<sup>556</sup> Case No 1012/2/3/03 [2003] CAT 17, [2004] CompAR 117.

<sup>557</sup> Case No 1058/2/4/06 [2007] CAT 6, [2007] CompAR 614.

<sup>558</sup> Case No 1068/2/1/06 [2006] CAT 35, [2007] CompAR 446.

<sup>559</sup> Case No 1071/2/1/06 [2007] CAT 18, [2007] CompAR 813.

<sup>560</sup> Case No 1087/2/3/07 [2007] CAT 29, [2007] CompAR 48.

<sup>561</sup> *Ibid*, para 296.

<sup>562</sup> *Ibid*, para 299; *Cityhook* subsequently (unsuccessfully) challenged the OFT’s case closure decision by way of judicial review: *R (Cityhook Ltd) v OFT* [2009] EWHC 57, [2009] UKCLR 255.

<sup>563</sup> See the CAT’s Annual Review and Accounts 2006/2007, p 4.

<sup>564</sup> *Ibid*, para 42.

<sup>565</sup> *Ibid*, para 56.

<sup>566</sup> URN 99/1154, October 1999.

<sup>567</sup> SI 2003/1372, repealing and replacing, for cases commenced on or after 20 June 2003, the earlier Competition Commission Appeal Tribunal Rules 2000, SI 2000/261; the 2003 Rules were amended by the Competition Appeal Tribunal (Amendment and Communications Act Appeals) Rules 2004, SI 2004/2068.

*A Guide to Proceedings*<sup>568</sup>. The CAT has also created a User Group to discuss points relating to the practical operation of the Tribunal; the minutes of the meetings are available on its website<sup>569</sup>. The CAT has pointed out that, when a case reaches it, the matter ceases to be an administrative procedure, as it is when the OFT acts as investigator, prosecutor and decision-maker, and becomes, instead, a judicial proceeding<sup>570</sup>. The rules of the CAT are based on five main principles<sup>571</sup>:

- first, early disclosure of each party's case, and of the evidence relied on
- second, active case management by the CAT to identify the main issues early on and avoid delays
- third, strict timetables, with straightforward cases to be completed within nine months: for example when rejecting an application for an extension of time in which to lodge an appeal in the *Hasbro* case the CAT said that respect for the deadline in commencing proceedings is, in many ways, the 'keystone' of the whole procedure<sup>572</sup>
- fourth, effective procedures to establish contested facts
- fifth, the conduct of oral hearings within defined time limits.

### (C) Procedure before the CAT<sup>573</sup>

The rules of the CAT give the CAT broad case-management powers<sup>574</sup>; a brief perusal of the CAT's website reveals a substantial number of rulings on procedural issues which have arisen during the course of proceedings, often at case management conferences<sup>575</sup>. The procedure before the CAT is predominantly written; submissions should be kept as short as possible. Where an expert is asked to produce a report, that expert's duty is to assist the Tribunal, and this overrides its obligation to the person from whom the instructions were received and from whom payment was received<sup>576</sup>. The oral hearing should be regarded as an opportunity to debate contentious issues rather than to state a case which has already been made in writing. In cases where facts are in dispute between the OFT (or

<sup>568</sup> October 2005, available at [www.catribunal.org.uk](http://www.catribunal.org.uk); see also Rayment 'Practice and Procedure in the Competition Commission Appeal Tribunal' (2002) 1 Competition Law Journal 23.

<sup>569</sup> See [www.catribunal.org.uk/5300/User-Group.html](http://www.catribunal.org.uk/5300/User-Group.html).

<sup>570</sup> Case No 1000/1/1/01 *Napp Pharmaceutical Holdings Ltd v Director General of Fair Trading* [2002] CAT 1, [2001] CompAR 13, para 117.

<sup>571</sup> See *Guide to Proceedings*, para 3.4.

<sup>572</sup> Case No 1010/1/1/03 *Hasbro UK Ltd v Director General of Fair Trading* [2003] CAT 1, [2003] CompAR 47: this point was reiterated by the President in Case No 1143/1/1/09 *Fish Holdings Ltd v OFT* [2009] CAT 34, [2010] CompAR 169, para 16; in practice some cases before the CAT have been quite protracted: for example OFWAT's decision in the case of *Albion Water/Dŵr Cymru* of 26 May 2004 [2004] UKCLR 1317 was annulled by the CAT on 18 December 2006, Case No 1046/2/4/04 *Albion Water Ltd v Water Services Regulation Authority* [2006] CAT 36, [2007] CompAR 328.

<sup>573</sup> See further Rayment 'Practice and Procedure before the Competition Appeal Tribunal' in Ward and Smith eds *Competition Litigation in the UK* (Sweet & Maxwell, 2003), ch 4 and Green and Brealey (eds) *Competition Litigation: UK Practice and Procedure* (Oxford University Press, 2010).

<sup>575</sup> [www.catribunal.org.uk](http://www.catribunal.org.uk).

<sup>576</sup> *Guide to Proceedings*, October 2005, para 12.9 and CPR 35.3(1); see Case No 1009/1/1/02 *Aberdeen Journals Ltd v OFT* [2003] CAT 11, [2003] CompAR 67, para 288; see also Case No 1000/1/1/01 *Napp Pharmaceutical Holdings Ltd v Director General of Fair Trading* [2002] CAT 1, [2001] CompAR 13, para 254; see also (in proceedings in the High Court) *Leeds City Council v Watkins* [2003] UKCLR 467, para 88.

a regulator) and the appellants, such as *Toys and Games*<sup>577</sup>, *Football Shirts*<sup>578</sup> and *National Grid*<sup>579</sup>, the CAT's ability to probe the evidence and to provide for the cross-examination of witnesses has been an important feature of the procedure. To some extent the CAT can act in an inquisitorial capacity where complex issues of fact are involved, and this may provide a better way of discovering the true facts of a case than occurs in purely adversarial proceedings.

As a general proposition an appellant is not limited to placing before the CAT the evidence it has placed before the OFT<sup>580</sup>; however the fact an appellant did not put forward a positive case during the administrative procedure may cast doubt on the veracity of the evidence put forward during an appeal<sup>581</sup>. The OFT or regulator is normally expected to defend its decision on the basis of the material before it when it took its decision, although it may be permitted to adduce new evidence to ensure the fairness of the appeal process<sup>582</sup>. The CAT has held that the strict rules of evidence do not apply in proceedings before it, and has held that it will be guided by overall considerations of fairness, rather than technical rules<sup>583</sup>.

Where third parties appeal against a decision of the OFT or a sectoral regulator the CAT considers that the onus is on the appellant to show why the decision should be set aside on the basis of the material before the OFT<sup>584</sup>.

The CAT has been extremely meticulous in its work, producing lengthy and very detailed judgments, although the Court of Appeal in the *Toys and Games* and *Football Shirts* judgment<sup>585</sup> did wonder whether, in the future, the CAT might be able 'to express its findings of facts and its reasoning in more succinct form'<sup>586</sup>. In *Floe II* the Court of Appeal indicated that the CAT should take care to confine its judgments to 'deciding what is necessary for the adjudication of the actual disputes between the parties'<sup>587</sup>.

## (D) The powers of the CAT

The Competition Act provides for an appeal 'on the merits' and the powers of the CAT are extensive: considerably wider than those of a court exercising judicial review in the UK or the General Court when dealing with cases under Article 263 TFEU<sup>588</sup>. The CAT has held that an appeal on the merits requires it to consider whether a decision was the

<sup>577</sup> Case Nos 1014 and 1015/1/1/03 *Argos Ltd and Littlewoods Ltd v OFT* [2004] CAT 24, [2005] CompAR 588.

<sup>578</sup> Case Nos 1021 and 1022/1/1/03 *JJB Sports plc and Allsports Ltd v OFT* [2004] CAT 17, [2005] CompAR 1145.

<sup>579</sup> Case No 1099/1/2/08 *National Grid Plc v Gas and Electricity Markets Authority* [2009] CAT 14, [2009] CompAR 282.

<sup>580</sup> See Case No 1000/1/1/01 *Napp Pharmaceutical Holdings Ltd v Director General of Fair Trading* [2001] CAT 3, [2001] CompAR 33, para 76.

<sup>581</sup> See Case No 1061/1/1/06 *Makers UK Ltd v OFT* [2007] CAT 11, [2007] CompAR 699, paras 42 and 79.

<sup>582</sup> See Case Nos 1014 and 1015/1/1/03 *Argos Ltd and Littlewoods Ltd v OFT* [2003] CAT 16, para 66 (summarising the principles to be distilled from the CAT's earlier case law).

<sup>583</sup> *Ibid*, para 105.

<sup>584</sup> See Case No 1007/2/3/02 *Freeserve.com plc v Director General of Telecommunications* [2003] CAT 5, [2003] CAT 202, paras 114–115.

<sup>585</sup> *Argos Ltd and Littlewoods Ltd v OFT* and *JJB Sports plc v OFT* [2006] EWCA Civ 1318, [2006] UKCLR 1135, para 161.

<sup>586</sup> *Ibid*, paras 5 and 6, a point which it repeated in *Dŵr Cymru Cyfyngedig v Albion Water Ltd* [2008] EWCA Civ 53, [2008] UKCLR 457, paras 130–131.

<sup>587</sup> *OFCOM v Floe Telecom Ltd* [2009] EWCA Civ 47, [2009] UKCLR 659, para 20.

<sup>588</sup> See Case No 1007/2/3/02 *Freeserve.com plc v Director of Telecommunications* [2003] CAT 5, [2003] CompAR 202, para 106.

right one rather than whether a decision was within the range of reasonable responses<sup>589</sup>. The appeals process does not envisage a re-run of the administrative procedure; rather the CAT reviews a decision through the prism of the specific errors that are alleged by an appellant<sup>590</sup>. The CAT's powers are set out in paragraph 3 of Schedule 8 to the Competition Act, and include the power to adopt interim measures<sup>591</sup>, to confirm or set aside the decision that is the subject of the appeal, to remit the matter to the OFT or sectoral regulator, to impose or revoke or vary the amount of a penalty<sup>592</sup>, to give directions, for example to bring an end to an abuse of a dominant position<sup>593</sup> or to make a decision, for example finding an infringement of the Competition Act or the EU competition rules<sup>594</sup>.

The way in which the CAT exercises its jurisdiction will depend on the particular circumstances of the case. In the *Aberdeen Journals* case<sup>595</sup> the CAT was dissatisfied with the OFT's treatment of market definition in a Chapter II case but remitted the matter to the OFT for further consideration rather than substituting its finding which, as a matter of law, it was at liberty to do. Similarly in the *Freeserve* case<sup>596</sup> the CAT remitted the issue of whether BT was guilty of abusive pricing practices to OFCOM. In each of these cases the CAT was mindful of the need to avoid the risk of converting itself from an appellate tribunal into a court of first instance. However there have been some occasions when the CAT has made its own decisions on substance, as in the *JJ Burgess v OFT* and the *Albion Water Ltd v OFWAT* cases that were discussed above<sup>597</sup>. In *VIP Communications Ltd v OFCOM*<sup>598</sup> the CAT rejected an argument of T-Mobile that it should not make a decision that T-Mobile had abused a dominant position since this would be to confuse the roles of OFCOM as the administrative body charged to make decisions and the CAT as an appellate body: in the CAT's view this would fail to take into account the fact

<sup>589</sup> Case No 1083/3/3/07 *Hutchison 3G UK Ltd v OFCOM* [2008] CAT 11, para 164; this was an appeal under the Communications Act 2003, but there is no reason in principle to suppose that the CAT would have reached a different conclusion under the Competition Act 1998.

<sup>590</sup> Case No 1151/3/3/10 *British Telecommunications Plc v OFCOM* [2010] CAT 17, para 78, upheld on appeal to the Court of Appeal [2011] EWCA Civ 245.

<sup>591</sup> Competition Act 1998, Sch 8, para 3(2)(d) and SI 2003/1372, r 61; see Case No 1000/1/1/01 (IR) *Napp Pharmaceuticals Holdings Ltd v Director General of Fair Trading* [2001] CAT 1, [2001] CompAR 1, where the President of the CAT followed judgments of the EU Courts, pursuant to s 60 of the Competition Act 1998, in determining the appropriate test for the adoption of interim measures; the CAT also ordered interim measures in Case No 1013/1/1/03 (IR) *Genzyme Ltd v OFT* [2003] CAT 8, [2003] CompAR 290; Case Nos 1034/2/4/04 (IR) and 1046/2/4/04 *Albion Water Ltd v Director General of Water Services* [2005] CAT 19, [2005] CompAR 993 as varied by [2006] CAT 33, [2007] CompAR 325; the CAT rejected an application for interim measures in Case No 1074/2/3/06 (IR) *VIP Communications Ltd (in administration) v OFCOM* [2007] CAT 12, [2007] CompAR 781, which it considered to be 'manifestly unfounded': *ibid*, paras 100–103.

<sup>592</sup> The penalty is automatically suspended pending the appeal (Competition Act 1998, s 46(4)), but the CAT may order that interest is payable (*ibid*, Sch 8, para 10 and SI 2003/1372, r 56); see Case No 1099/1/2/08 *National Grid Plc v Gas and Electricity Markets Authority* [2009] CAT 14, [2009] CompAR 282, para 229(c)).

<sup>593</sup> See eg Case No 1016/1/1/03 *Genzyme Ltd v OFT* [2005] CAT 32, [2006] CompAR 195 and Case Nos 1034/2/4/04 (IR) and 1046/2/4/04 *Albion Water Ltd v Water Services Regulation Authority* [2009] CAT 12, [2009] CompAR 223.

<sup>594</sup> The Court of Appeal confirmed that the CAT had such jurisdiction in *Dŵr Cymru Cyfyngedig v Albion Water Ltd* [2008] EWCA Civ 536, [2008] UKCLR 457, paras 112–128.

<sup>595</sup> Case No 1005/1/1/01 *Aberdeen Journals v Director General of Fair Trading* [2002] CAT 4, [2002] CompAR 167.

<sup>596</sup> Case No 1007/2/3/02 *Freeserve.com plc v Director General of Telecommunications* [2003] CAT 5, [2003] CompAR 202; OFCOM subsequently adopted a second non-infringement decision on 2 November 2010.

<sup>597</sup> See 'Successful appeals against explicit non-infringement decisions', p 442 above.

<sup>598</sup> Case 1027/2/3/04 [2007] CAT 3, [2007] CompAR 666.

that an appeal to the CAT is a ‘full merits’ jurisdiction<sup>599</sup>. The CAT has on a number of occasions substituted its own finding on the level of penalties<sup>600</sup>.

In *Floe Telecom Ltd v Director General of Telecommunications*<sup>601</sup> the CAT annulled a non-infringement decision of OFTEL, *Disconnection of Floe Telecom Ltd’s Services by Vodafone Ltd*<sup>602</sup>. The CAT was concerned at the amount of time that the proceedings had taken in this case and it imposed a timetable on OFCOM for its reconsideration of the matter. OFCOM and the OFT appealed to the Court of Appeal on the question of whether the CAT had the power to set a time limit in this way and the Court of Appeal held that the CAT did not have the power to do so<sup>603</sup>. In the opinion of Lloyd LJ:

The Tribunal, as a statutory body, has the task of deciding such appeals as are brought to it in accordance with the provisions of the 1998 Act and the rules, but it does not have a more general statutory function, of supervising regulators. On that basis it seems to me that the CAT’s reasoning is based on a misconception of the relationship between the Tribunal and the regulators. When a decision is set aside and remitted to the relevant regulator, that particular matter is then to be dealt with by that regulator in accordance with its own statutory duties and functions<sup>604</sup>.

While the CAT’s concern as to the apparent slowness of proceedings may be understandable, equally the OFT and the sectoral regulators have a real problem in determining how to deploy the limited resources at their disposal. As Lloyd LJ said in the *Floe* case:

The Tribunal cannot know what are the competing demands on the resources of the particular regulator at the given time. It may well be that it cannot properly be told of this by the regulator because of issues of confidentiality as to current investigations. It cannot, therefore, form any proper view as to the relative priority of one case as compared with others<sup>605</sup>.

### (E) **Costs**<sup>606</sup>

The Competition Appeal Tribunal Rules 2003<sup>607</sup> enable the CAT to make such order as it thinks fit in relation to costs<sup>608</sup>.

The CAT rules do not apply the conventional rule in civil litigation that ‘costs follow the event’: the CAT has a wide discretion in relation to costs and has repeatedly said that ‘the only rule is that there are no rules’<sup>609</sup>. In the *Merger Action Group* judgment (dealing with a merger under the Enterprise Act rather than an enforcement decision under the Competition Act) the CAT gave the following guidance on its approach to costs (expenses in Scotland):

<sup>599</sup> Ibid, para 45.

<sup>600</sup> See ‘Table of penalties’ at pp 419–422 above.

<sup>601</sup> Case No 1024/2/3/04 [2004] CAT 18, [2005] CompAR 290.

<sup>602</sup> OFTEL decision of 3 November 2003 [2004] UKCLR 313.

<sup>603</sup> *OFCOM and OFT v Floe Telecom Ltd* [2006] EWCA Civ 768, [2006] ECC 30.

<sup>604</sup> Ibid, para 34.

<sup>605</sup> Ibid, para 37; see similarly *Crest Nicholson Plc v OFT* [2009] EWHC 1875, [2009] UKCLR 895, para 45.

<sup>606</sup> See *Guide to Proceedings*, October 2005, paras 17.1–17.9.

<sup>607</sup> SI 2003/1372.

<sup>608</sup> Ibid, r 55(2); even if the parties reach an agreement on costs, the CAT considers it has the power to make an alternative costs order: see Case Nos 1014 and 1015/1/1/03 *Argos Ltd v OFT* [2005] CAT 15, [2005] CompAR 996, paras 4–5.

<sup>609</sup> See eg Case No 1062/1/1/06 *The London Metal Exchange v OFT* [2006] CAT 19, [2006] CompAR 781, para 108 and Case Nos 1054/1/1/05 etc *MasterCard UK Members Forum Ltd v OFT* [2006] CAT 15, [2006] CompAR 607, para 46.

- the CAT must always exercise its discretion so as to deal with a case justly<sup>610</sup>
- the factors relevant to the award of costs are too many and too varied to be identified exhaustively, but the CAT will normally consider:
  - the success or failure overall or on particular issues
  - the parties' conduct in relation to the proceedings
  - the nature, purpose and subject-matter of the proceedings<sup>611</sup>
- the CAT considers that there is no inconsistency between the CAT's wide discretion, and an approach to its exercise which adopts a specific starting point<sup>612</sup>; for example the starting point in appeals under the Competition Act is that a successful party would normally (but not always) obtain a costs award in its favour<sup>613</sup>
- the CAT will take note where appropriate of the approach adopted in analogous proceedings by courts and tribunals in the various jurisdictions of the UK<sup>614</sup>.

In addition to this general guidance some more specific trends can be discerned.

First, the CAT has not wanted to deter small or medium-sized firms from appealing against cartel decisions of the OFT for fear of having to pay the OFT's costs if unsuccessful: this can be seen in *Apex Asphalt and Paving Co v OFT*<sup>615</sup>, although the CAT also noted other factors in that case that contributed to its decision to make no order for costs against the unsuccessful appellant<sup>616</sup>. However in *Sepia Logistics Ltd v OFT*<sup>617</sup> the CAT did award costs to the OFT in a case where the unsuccessful appellant was not a substantial undertaking, but where the appeal did not involve novel points of law. The CAT noted that the appellant had raised a number of points that lacked merit and that this had added significantly to the length and complexity of the case. Similarly in *National Grid* the CAT decided that the regulator 'should not have to pick up the tab' for the costs of rebutting points, in particular on market definition, which the CAT considered were 'bound to fail'<sup>618</sup>.

A second point is that the CAT does not have the same anxiety in the case of more substantial firms. In *Aberdeen Journals v OFT*<sup>619</sup> the CAT expressed concern at the significant costs to the public purse involved in competition law appeals, a point repeated in *Genzyme v OFT*<sup>620</sup> and in *Football Shirts*<sup>621</sup>. In *National Grid* the CAT specifically pointed out that the appellant was a large and well-resourced company and that an award of costs against it would be unlikely to dissuade such a company from bringing an appeal<sup>622</sup>.

<sup>610</sup> Case No 1107/4/10/08 *Merger Action Group v Secretary of State for Business, Enterprise and Regulatory Reform* [2009] CAT 19, [2009] CompAR 269, para 16.

<sup>611</sup> *Ibid*, para 19.

<sup>612</sup> *Ibid*, para 21.

<sup>613</sup> See eg Case Nos 1035/1/1/04 etc *Racecourse Association v OFT* [2006] CAT 1, [2006] CompAR 438, para 8; Case Nos 1140/1/1/09 etc *Eden Brown Ltd v OFT* [2011] CAT 29, para 18.

<sup>614</sup> Case No 1107/4/10/08 [2009] CAT 19, [2009] CompAR 269, para 22.

<sup>615</sup> Case No 1032/1/1/04 *Apex Asphalt and Paving Co Ltd v OFT* [2005] CAT 11, [2005] CompAR 825; see similarly in the context of a follow-on action for damages in Case No 1028/5/7/04 *BCL Old Co Ltd v Aventis SA* [2005] CAT 2, [2005] CompAR 485.

<sup>616</sup> *Ibid*, para 26.

<sup>617</sup> Case 1072/1/1/06 [2007] CAT 14, [2007] CompAR 779.

<sup>618</sup> Case No 1099/1/2/08 *National Grid Plc v Gas and Electricity Markets Authority* [2009] CAT 14, [2009] CompAR 282.

<sup>619</sup> [2002] CAT 21.

<sup>620</sup> Case No 1013/1/1/03 (IR) and Case No 1016/1/1/03 consent order of 14 November 2005 and Case No 1016/1/1/03 consent order of 29 November 2005.

<sup>621</sup> Case Nos 1019/1/1/03 etc *Umbro Holdings Ltd v OFT* [2005] CAT 26, [2005] CompAR 1232.

<sup>622</sup> Case No 1099/1/2/08 [2009] CAT 24, [2009] CompAR 375, para 16.

Thirdly, it is clear that the CAT has, on some occasions, felt disquiet at the level of the fees charged by City law firms for their advice; and in particular at the number of hours charged by partners as opposed to associates<sup>623</sup>.

## (F) Appeals from the CAT to the Court of Appeal

Appeals on points of law lie, with permission, from the CAT to the Court of Appeal<sup>624</sup>. The CAT has indicated that permission to appeal should be granted sparingly<sup>625</sup>; permission will usually be granted where there is a real prospect of success or there is some other compelling reason why the appeal should be heard<sup>626</sup>. A request for permission to appeal was rejected both by the CAT<sup>627</sup> and by the Court of Appeal in *Napp Pharmaceutical Holdings Ltd v Director General of Fair Trading*<sup>628</sup>. There have been several occasions on which the CAT has refused permission to appeal, but the Court of Appeal has subsequently granted it<sup>629</sup>.

## 9. Article 267 References

An important aid to the consistency of application of EU law in Member States is the preliminary ruling procedure of Article 267 TFEU, which enables the Court of Justice to rule on questions referred by national courts or tribunals<sup>630</sup>. Two questions arise: first, can an Article 267 reference be made by a court or tribunal when applying the Competition Act, as opposed to Articles 101 and/or 102 TFEU; and second, which courts or tribunals in the UK are able to make an Article 267 reference.

### (A) Can an Article 267 reference be made where a court or tribunal is applying the Competition Act 1998?

Since Regulation 1/2003 the competition authorities and courts in the UK apply Articles 101 and 102 TFEU themselves when they apply the Competition Act to agreements or conduct that has an effect on trade between Member States. However there will be some cases where the effect on trade is purely within the UK and where only the Competition Act is applicable. The question then arises of whether an Article 267 reference can be made where a court or tribunal is considering corresponding issues under Chapters I and II.

<sup>623</sup> See eg Case Nos 1035/1/1/04 etc *The Racecourse Association v OFT* [2006] CAT 1, [2006] CompAR 438, paras 30–35; Case No 1049/4/1/05 *UniChem Ltd v OFT* [2005] CAT 31, [2006] CompAR 172, paras 27–31; and Case No 1104/6/8/08 *Tesco Plc v Competition Commission* [2009] CAT 26, [2009] CompAR 429, paras 42–46.

<sup>624</sup> Competition Act 1998, s 49.

<sup>625</sup> Case No 1151/3/3/10 *British Telecommunications Plc v OFCOM* [2010] CAT 22, para 7(c).

<sup>626</sup> See eg Case No 1023/4/1/03 *IBA Health Ltd v OFT* [2003] CAT 28, paras 4–5.

<sup>627</sup> Case No 1000/1/1/01 *Napp Pharmaceutical Holdings Ltd v Director General of Fair Trading* [2002] CAT 5.

<sup>628</sup> Case No C/2002/0705 *Napp Pharmaceutical Holdings Ltd v Director General of Fair Trading* [2002] EWCA Civ 796, [2002] 4 All ER 376.

<sup>629</sup> See eg *Argos Ltd and Littlewoods Ltd v OFT* and *JJB Sports plc v OFT* [2006] EWCA Civ 1318, [2006] UKCLR 1135; *OFCOM v Floe Telecom Ltd* [2006] EWCA Civ 768, [2006] ECC 30; *Dŵr Cymru v Albion Water Ltd* [2008] EWCA Civ 536, [2008] UKCLR 457; *OFCOM v Floe Telecom Ltd and T-Mobile Ltd v Floe Telecom Ltd* [2009] EWCA Civ 47, [2009] UKCLR 659; *National Grid plc v Gas and Electricity Markets Authority* [2010] EWCA Civ 114, [2010] UKCLR 386.

<sup>630</sup> See generally Green and Braeley (eds) *Competition Litigation: UK Practice and Procedure* (Oxford University Press, 2010), ch 21; it is for the referring court or tribunal to determine the content of the questions to be put to the Court of Justice, which will not opine on questions raised by the parties to the litigation unless the referring court asks it to: Cases C-376/05 etc *A Brünsteiner GmbH v Bayerische Motorenwerke AG* [2006] ECR I-11383, [2007] 4 CMLR 259, paras 25–29.

The jurisprudence of the Court of Justice strongly suggests that references under Article 267 will be possible in such cases<sup>631</sup>. This approach helpfully avoids national laws based upon Articles 101 and 102 being interpreted in a substantially different way from the meaning given to them by EU institutions.

### **(B) Which courts or tribunals in the UK can make an Article 267 reference in a case under the Competition Act 1998?**

It is obvious that the Supreme Court, the Court of Appeal and the High Court can make Article 267 references. It is also assumed that the CAT can do so: provision is made for this in its Rules<sup>632</sup>. What is less clear is whether the OFT or the sectoral regulators could make a reference. It is a matter of EU law to determine who qualifies as courts or tribunals<sup>633</sup>. Lord Simon, in the House of Lords debate on the third reading of the Bill, thought that it would be possible for the OFT and/or the sectoral regulators to make a reference<sup>634</sup>, although he subsequently resiled from this position<sup>635</sup>. It may be that the point will not arise, since the OFT and the regulators may determine of their own volition not to attempt to make such a reference. In this connection it is of interest to note that, in the *Syfait* case, the Court of Justice reached the conclusion that the Greek Competition Authority was not a court or tribunal for the purposes of Article 267 TFEU<sup>636</sup>.

<sup>631</sup> See eg Case C-7/97 *Oscar Brönnner GmbH v Mediaprint* [1998] ECR I-7791, [1999] 4 CMLR 112, paras 17–20; Case C-238/05 *Asnef-Equifax, Servicios de Informaci sobre Solvencia y Crédito, SL v Asociación de Usuarios de Servicios Bancarios (Ausbanc)* [2006] ECR I-11125, [2007] 4 CMLR 224, paras 12–25; Case C-217/05 *Confederación Española de Empresarios de Estaciones de Servicio v Compañía Española de Petróleos SA* [2006] ECR I-11987, [2007] 4 CMLR 181, paras 13–24; Case C-280/06 *Autorità Garante della Concorrenza e del Mercato v Ente tabacchi italiani – ETI SpA* [2007] ECR I-10893, [2008] 4 CMLR 277, paras 19–29.

<sup>632</sup> Competition Appeal Tribunal Rules 2003, SI 2003/1372, r 60; the CAT considered whether to make an Article 267 reference, but declined to do so in Case No 1100/3/3/08 *Number (UK) Ltd v OFCOM* [2008] CAT 33, paras 159–173; the Court of Appeal subsequently made a reference on 15 December 2009 and the Court of Justice gave its preliminary ruling in Case C-16/10 *The Number Ltd, Conduit Enterprises Ltd v Office of Communications, British Telecommunications plc* [2011] ECR I-000.

<sup>633</sup> See eg Case C-54/96 *Dorsch Consult Ingenieurgesellschaft mbH v Bundesbaugewerkschaft Berlin mbH* [1997] ECR I-4961, [1998] 2 CMLR 237; Case C-178/99 *Re Salzman* [2001] ECR I-4421, [2003] 1 CMLR 918; on this point see Brown and Jacobs *The Court of Justice of the European Communities* (Sweet & Maxwell, 5th ed, 2000), pp 223–227; Dashwood, Dougan, Rodger, Spaventa and Wyatt (eds) *European Union Law* (Hart Publishing, 6th ed, 2011), pp 214–216.

## Enterprise Act 2002: market studies and market investigations

1. Introduction	451	7. Enforcement	474
2. Overview of the Provisions on Market Investigation References	452	8. Supplementary Provisions	477
3. Super-Complaints	454	9. The Market Investigation Provisions in Practice	479
4. OFT Market Studies	458	10. Orders and Undertakings Under the Fair Trading Act 1973	486
5. Market Investigation References	466		
6. Public Interest Cases	474		

### I. Introduction

This chapter is concerned with two, to some extent related, ways in which the domestic law of the UK addresses a problem of market failure in circumstances where Articles 101 and 102 TFEU or the Chapter I and Chapter II prohibitions in the Competition Act 1998 are inapplicable for want of evidence of an agreement or abuse. First, the Office of Fair Trading ('the OFT')<sup>1</sup> may itself conduct a 'market study'<sup>2</sup> to understand as well as possible how markets are working and whether the needs of consumers are being met; and secondly the OFT (and sectoral regulators such as the Office of Communications ('OFCOM'))<sup>3</sup> may make a 'market investigation reference' to the Competition Commission ('the CC')<sup>4</sup>. If the CC concludes that any 'feature' of the market 'prevents, restricts or distorts competition', various powers are available to rectify the situation.

Section 2 of this chapter will provide an overview of market investigations. Sections 3 and 4 discuss the ways in which the OFT obtains and analyses information about markets, in particular through the receipt and investigation of 'super-complaints' and by conducting market studies. Section 5 describes the market investigation provisions in the Enterprise Act and considers the relationship between that Act, the Competition Act 1998 and EU Regulation 1/2003<sup>5</sup>. 'Public interest cases' are briefly referred to in section

<sup>1</sup> See ch 2, 'The OFT', pp 63–68.

<sup>2</sup> In March 2010 it was estimated that 40 competition authorities that are members of the International Competition Network have the power to carry out market studies: see Draft Market Studies Good Practice Handbook (April 2010), available at [www.internationalcompetitionnetwork.org](http://www.internationalcompetitionnetwork.org).

<sup>3</sup> See ch 2, 'Sectoral regulators', pp 68–69.

<sup>4</sup> See ch 2, 'Competition Commission', pp 69–72.

<sup>5</sup> See 'Relationship between the Competition Act and market investigation', pp 469–470.

6, while sections 7 and 8 deal with the issue of enforcement and other supplementary matters. Section 9 of the chapter considers how the market investigation provisions have been working in practice since the Enterprise Act entered into force. The final section of the chapter briefly refers to the enforcement and review of undertakings and orders still in force under the monopoly provisions in the Fair Trading Act 1973.

## 2. Overview of the Provisions on Market Investigation References

### (A) Part 4 of the Enterprise Act 2002

Part 4 of the Enterprise Act 2002 entered into force on 20 June 2003. It consists of four chapters; the Government's *Explanatory Notes* to the Bill as introduced into Parliament on 26 March 2002 are a helpful adjunct to the Act itself<sup>6</sup>. Chapter 1 of Part 4 of the Act is entitled 'Market investigation references': it deals both with the making of references and their determination. Chapter 2 of Part 4 of the Act deals with 'public interest cases', which are rare in practice and are described below in brief outline. Chapter 3 contains rules on enforcement which set out the various undertakings that can be accepted by the OFT and the CC in the course of market investigations and the orders that may be made to remedy any adverse effects on competition and detrimental effects on consumers. Chapter 4 deals with supplementary matters such as investigatory powers and review by the Competition Appeal Tribunal ('the CAT').

### (B) Brief description of the system of market investigation references

The OFT (concurrently with the sectoral regulators such as the Gas and Electricity Markets Authority and OFCOM) has power to make a reference to the CC where it has reasonable grounds for suspecting that any 'feature or combination of features' of a market prevent, restrict or distort competition in the UK or a part of it; the possibility also exists for the Secretary of State, in limited circumstances, to make a reference. Provision is made for the OFT or a sectoral regulator to accept legally binding undertakings in lieu of a reference. The CC must determine whether there is an adverse effect on competition; if so it must decide on suitable remedies, bearing in mind the need to achieve as comprehensive a solution as is reasonable and practicable to any adverse effects identified. In taking remedial action the CC may also take into account any 'relevant customer benefits', as defined by the Act. A wide array of powers to change markets prospectively is available to the CC following its investigation including, where appropriate, the power to impose a structural remedy. However the market investigation system does not involve any sanctions for past behaviour, nor does it confer or impose any enforceable rights or obligations upon anyone who was harmed by or who indulged in anti-competitive behaviour. References by the OFT and reports of the CC are required to be published.

### (C) Institutional arrangements

As explained above, market investigation references can be made by the OFT and the sectoral regulators; in exceptional cases the Secretary of State can make a reference. Within

<sup>6</sup> The *Explanatory Notes* are available at [www.legislation.gov.uk](http://www.legislation.gov.uk); on their legal significance see *Westminster City Council v National Asylum Support Service* [2002] UKHL 38, [2002] 1 WLR 2956, para 5.

the OFT the Markets and Projects division is responsible for assessing markets that might be appropriate for reference; the actual decision to refer is taken by the Board of the OFT<sup>7</sup>. The CC decides whether competition is being restricted in the cases referred to it and, if so, what remedies should be adopted; the CC makes the final determination in market investigation references. The OFT has a duty to monitor remedies and to advise on whether they should be varied or revoked. Decisions of the OFT, the Secretary of State and the CC are subject to review by the CAT. Appeals on points of law lie, with permission, from the CAT to the Court of Appeal.

## (D) Guidelines, rules of procedure and other relevant publications

In addition to Part 4 of the Enterprise Act, various guidelines, rules and other publications seek to explain the operation of the UK system of market investigations.

### (i) OFT publications

The OFT has published *Market investigation references: Guidance about the making of references under Part 4 of the Enterprise Act*<sup>8</sup>, replacing earlier *Guidance* published in 2003, which explains how it intends to apply the Act.

### (ii) CC publications

Acting under Schedule 7A to the Competition Act, inserted by Schedule 12 to the Enterprise Act 2002, the CC has adopted the *Competition Commission Rules of Procedure 2006*, which superseded the earlier rules of June 2003; they are available on its website<sup>9</sup>. The CC has also published three sets of guidelines of relevance to market investigations and one document setting out best practice:

- *Market Investigation References: Competition Commission Guidelines*<sup>10</sup>
- *General Advice and Information*<sup>11</sup>
- *Statement of Policy on Penalties*<sup>12</sup>
- *Suggested best practice for submissions of technical economic analysis from parties to the CC*<sup>13</sup>

The Chairman of the CC has published three further documents of relevance to market investigations:

- *Guidance to Groups*<sup>14</sup>
- *Disclosure of Information in Merger and Market Inquiries*<sup>15</sup>
- *Disclosure of Information by the Competition Commission to Other Public Authorities*<sup>16</sup>.

<sup>7</sup> See the OFT Board's Rules of Procedure, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>8</sup> OFT 511, March 2006, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>9</sup> CC1, March 2006, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>10</sup> CC3, June 2003; in March 2010 the CC launched a public consultation on its *Guidelines*: details of the consultation and responses to it can be found at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>11</sup> CC4, March 2006. <sup>12</sup> CC5, June 2003.

<sup>13</sup> 24 February 2009, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>14</sup> CC6, March 2006. <sup>15</sup> CC7, July 2003. <sup>16</sup> CC12, April 2006.

### (iii) Department for Business, Innovation and Skills

The Secretary of State has adopted the Competition Appeal Tribunal Rules 2003<sup>17</sup> which govern the way in which the CAT deals with applications for review of decisions of the OFT, the Secretary of State and the CC in relation to market investigations. Statutory instruments have also been adopted in relation to the making of ‘super-complaints’<sup>18</sup>.

### (iv) CAT

The CAT has published a *Guide to Proceedings*, section 6B of which deals specifically with applications for review under the Enterprise Act 2002<sup>19</sup>.

## 3. Super-Complaints

Section 11 of the Enterprise Act provides for so-called ‘super-complaints’ to be made to the OFT. Super-complaints are handled within the OFT by the Markets and Projects division. The OFT has published *Super-complaints: Guidance for designated consumer bodies*<sup>20</sup> to assist those wishing to make a super-complaint. The *Guidance* describes the information that should be contained in a super-complaint, how cases will be handled and possible outcomes. Section 205 of the Act enables the Secretary of State to extend the system so that super-complaints can be made to the sectoral regulators; this was effected by statutory instrument in 2003<sup>21</sup>. The *Guidance* explains how these concurrency arrangements will work<sup>22</sup>; the terms of reference of the Concurrency Working Party in relation to super-complaint concurrent duties can be found on the OFT’s website<sup>23</sup>.

The idea of a super-complaint is that a designated consumer body can make a complaint to the OFT about features of a market for goods or services in the UK which appear to be significantly harming the interests of consumers<sup>24</sup>. This is a way of making the consumer’s voice more powerful: individual consumers often lack the knowledge, motivation or experience to complain effectively, but a designated consumer body should have the resources and ability to do so. In such a case the OFT must publish a ‘fast-track’ report on what action, if any, it intends to take within 90 days<sup>25</sup>; the Secretary of State has power to amend the 90-day period<sup>26</sup>. The OFT, when dealing with a super-complaint, can request information under section 5(1) of the Enterprise Act 2002; however it has formal powers to demand information under section 174 of the Act only where it believes it has power to make a market investigation reference.

In practice the requirement to investigate and report within 90 days imposes a considerable burden on the OFT to gather evidence, synthesise it and form a view, which in turn results in a corresponding burden on the parties that are the subject of the super-

<sup>17</sup> SI 2003/1372.      <sup>18</sup> See section 3 below.

<sup>21</sup> The Enterprise Act 2002 (Super-complaints to Regulators) Order 2003, SI 2003/1368, as amended by the Enterprise Act 2002 (Water Services Regulation Authority) Order 2006, SI 2006/522.

<sup>22</sup> *Super-complaints: Guidance for designated consumer bodies*, paras 3.1–3.4.

<sup>23</sup> OFT 548, November 2003, available at [www.of.gov.uk](http://www.of.gov.uk); the operation of the Concurrency Working Party is explained in ch 10, ‘The Concurrency Regulations and the Concurrency Guideline’, pp 437–438.

<sup>24</sup> Enterprise Act 2002, s 11(1).

<sup>25</sup> *Ibid*, s 11(2).

<sup>26</sup> *Ibid*, s 11(4).

complaint; the 90-day period leaves little time for the OFT and the parties concerned to consider possible remedies to any problems identified. As will be seen from the Table of super-complaints below, it is quite likely that a super-complaint will lead to an OFT market study or even to a market investigation reference to the CC: in other words a super-complaint may lead to a lengthy period of scrutiny of the market, and the firms that operate on the market, to which the complaint relates. The super-complaint on *Payment Protection Insurance* of September 2005 led to a lengthy market study by the OFT which was followed by a market investigation reference to the CC in February 2007, which published its final report in January 2009; following litigation the CC reconsidered one of its remedies and made an order in April 2011.

Consumer bodies are designated by the Secretary of State<sup>27</sup>, and the Department of Trade and Industry (now the Department for Business, Innovation and Skills) has issued *Guidance for bodies seeking designation as super-complainants* on the designation criteria and on how to apply for designated status<sup>28</sup>. Designations are made once yearly, in October; application must be submitted by 30 April of that year at the latest<sup>29</sup>. In 2007 the Secretary of State rejected an application by What Car? to become a super-complainant as it did not satisfy the criteria in the *Guidance*<sup>30</sup>. As of 20 June 2011 the Secretary of State has designated the following bodies as super-complainants:

- The Campaign for Real Ale (CAMRA)
- The Consumer Council for Water (formerly known as the WaterVoice Council)
- Which? (formerly known as the Consumers' Association)
- The General Consumer Council for Northern Ireland
- Citizens Advice (formerly known as the National Association of Citizens Advice Bureaux)
- The National Consumer Council (which subsumed Energywatch, the former National Consumer Council (including the Scottish and Welsh Consumer Councils) and Postwatch)
- The Scottish Association of Citizens Advice Bureaux<sup>31</sup>.

A super-complaint can lead to a number of responses, including, though not limited to, competition or consumer law enforcement, referral to a sectoral regulator, the launch of a market study by the OFT or a market investigation reference to the CC<sup>32</sup>.

By 20 June 2011, 13 super-complaints had been received by the OFT, as set out in Table 11.1 below. The first three of these were received on a non-statutory basis prior to the entry into force of section 11 of the Act, but were dealt with as though section 11 was in force.

<sup>27</sup> Ibid, s 11(5) and (6); see also the Electricity Act 2002 (Part 8 Designated Enforcers: Criteria for Designation, Designation of Public Bodies as Designated Enforcers and Transitional Provisions) Order 2003, SI 2003/1399, as amended by SI 2006/522.
