<i>Mail consolidation</i>	17 March 2003	Postwatch	16 April 2003	Following discussions with the Postal Services Commission as to the regulatory position the OFT decided that no further action was necessary
<i>Care homes</i>	5 December 2003	Which? (known at the time as the Consumers' Association)	3 March 2004	OFT market study
<i>Home credit</i>	14 June 2004	National Consumer Council	10 September 2004	Market investigation reference to the CC
<i>Northern Ireland banking</i>	15 November 2004	Which? in conjunction with the General Consumer Council for Northern Ireland	11 February 2005	Market investigation reference to the CC
<i>Payment Protection insurance</i>	13 September 2005	Citizens Advice	8 December 2005	OFT market study followed by market investigation reference to the CC

<b>Title</b>	<b>Date of super-complaint</b>	<b>Super-complainant</b>	<b>Date of announcement of result by OFT</b>	<b>Outcome</b>
<i>Credit card interest rate</i>	2 April 2007	Which?	26 June 2007	OFT to carry out a programme of work with the credit card industry and consumer bodies to make the cost of credit cards easier for consumers to understand
<i>Scottish legal profession</i>	9 May 2007	Which?	31 July 2007	OFT made recommendations to the Scottish Government and the legal profession to lift restrictions that could be causing harm to consumers
<i>Supply of beer in UK pubs</i>	24 July 2009	The Campaign for Real Ale	22 October 2009	No further action needed <b>Appeal by CAMRA to the CAT challenging OFT's decision not to make an MIR; appeal was subsequently withdrawn<sup>1</sup></b>
<i>Cash ISAs</i>	31 March 2010	Consumer Focus	29 June 2010	OFT made various recommendations to Cash ISA providers; also ISA providers voluntarily agreed to alter their behaviour so as to improve the performance of the market
<i>Sub-prime credit brokerage and debt management</i>	3 March 2011	Citizens Advice	1 June 2011	Series of measures including asking the Government to consider the introduction of new legislation in the relevant market
<i>Credit and debit card surcharges</i>	30 March 2011	Which?		Not yet concluded

<sup>1</sup> Case 1148/6/1/09 CAMRA v OFT, order of 7 February 2011.

## 4. OFT Market Studies

Section 5 of the Enterprise Act provides that one of the general functions of the OFT is to obtain, compile and keep under review information about matters relating to the carrying out of its functions. One of the ways in which the OFT carries out this general function is by conducting ‘market studies’ of markets which appear not to be working well for consumers but where enforcement action under competition or consumer law does not, at first sight, appear to be the most appropriate response<sup>33</sup>. The general function contained in section 5 is the only legal basis for OFT market studies; there are no further provisions, and therefore no specific legal framework. There is an obvious similarity between the OFT’s market studies and the sectoral investigations that the European Commission conducts under Article 17 of Regulation 1/2003<sup>34</sup>. As when dealing with super-complaints, the OFT can *request* information under section 5(1) of the Enterprise Act 2002; however it has formal powers to *demand* information under section 174 of the Act only where it believes it has power to make a market investigation reference<sup>35</sup>. It follows that firms, should they so wish, could decide not to cooperate with an OFT market study if they were satisfied that the conditions for a market investigation reference are not met.

The OFT sometimes publishes reports on significant matters without designating them as market studies; these tend to be investigations that involve information gathering without any expectation that one of the outcomes usually expected of market studies is anticipated<sup>36</sup>.

### (A) OFT guidance

The OFT has published *Market Studies: Guidance on the OFT approach*<sup>37</sup> on the procedure that it normally follows when selecting a market for study and when carrying out such a study. The *Guidance* explains why the OFT conducts market studies; how it chooses and manages them; what their possible outcomes might be; and its evaluation of previous studies.

### (B) Purpose of market studies

Market studies are usually carried out by the Markets and Projects division of the OFT; they are intended to enable the OFT to understand as well as possible how markets are working and whether the needs of consumers are being met. A market study is not limited to a relevant market in an economic sense; it may deal with practices across a range of goods and services<sup>38</sup>. An important feature of the OFT’s market studies is that they are a way of scrutinising the extent to which governmental behaviour and legislation

<sup>33</sup> The sectoral regulators also conduct market studies: see eg Office of Rail Regulation’s *Approach to reviewing markets* (October 2009) and *The Leasing of Rolling Stock for Franchised Passenger Services* (November 2006), both available at [www.rail-reg.gov.uk](http://www.rail-reg.gov.uk); OFGEM’s review of energy supply markets in February 2008, available at [www.ofgem.gov.uk](http://www.ofgem.gov.uk); and OFCOM’s review of *Pay TV* (March 2010), available at [www.ofcom.org.uk](http://www.ofcom.org.uk).

<sup>34</sup> See ch 7, Article 17: investigations into sectors of the economy and into types of agreements’, pp 267–268.

<sup>35</sup> See ‘powers of investigation’, p 477 below.

<sup>36</sup> See eg *Review of barriers to entry, expansion and exit in retail banking*, November 2010, OFT 1282; *Stock-take of infrastructure ownership and control*, December 2010, OFT 1290.

<sup>37</sup> OFT 519, June 2010.

<sup>38</sup> *Market studies: Guidance on the OFT approach*, OFT 519, June 2010, para 2.3.

might have a harmful effect on the way in which markets work<sup>39</sup>. The market studies into, for example, *Pharmacies*, *Taxi Services*, *Public Procurement*, *European State Aid Control* and *Public Subsidies* were all concerned with what might be termed ‘public’ as opposed to private distortions of competition<sup>40</sup>: several cases ended with the OFT providing advice to the Government, as the Table of market studies below shows. The Government has indicated that it will respond to OFT reports on public restrictions within 90 days<sup>41</sup>.

Market studies are distinct from market investigation references under Part 4 of the Enterprise Act, although it is possible that a market study might lead to a market investigation reference. This occurred, for example, in the cases of *Store Card Credit Services*, *Payment Protection Insurance*, *Airports* and *Local Buses*: the possibility that an OFT market study might be followed by a market investigation can lead to a somewhat prolonged scrutiny of some markets<sup>42</sup>. The OFT will try to consult within six months or less of the launch of a study when a market investigation reference is an outcome that is being considered at the time of the launch<sup>43</sup>. The desirability of avoiding unnecessary duplication of work is a factor that the OFT takes into account when deciding whether to launch a market study.

### (C) Procedure before the OFT

Market studies may be triggered in various ways: for example the OFT might commence one on its own initiative, trading standards officers might bring problems to the OFT’s attention, or a market study might be prompted by a super-complaint from a designated consumer body<sup>44</sup>; any other interested stakeholders may request the OFT to conduct a market study. The OFT welcomes reasoned suggestions of domestic markets to be considered for market studies, and has produced an electronic suggestions form which is available on its website<sup>45</sup>.

Chapter 4 of the OFT’s *Guidance* explains how it goes about market studies. The major stages of a study include selection of a market; applying the *OFT’s Prioritisation Principles*<sup>46</sup>; pre-launch work; the decision to launch a market study; gathering and analysis of evidence<sup>47</sup>; informal consultation on the OFT’s findings; publication of a report on the OFT’s website<sup>48</sup>; and follow-up work. The duration of a market study depends on various factors including the scale and complexity of the market; the average length of a market study from launch to publication of a report has been around 12 months, but some studies have been as short as five months<sup>49</sup>.

<sup>39</sup> Ibid, paras 2.8–2.10.

<sup>46</sup> OFT 939, October 2008.

<sup>47</sup> Enterprise Act, s 5(3) provides a statutory basis for the OFT to outsource the market study or part of it to an external consultancy; see *Market Studies: Guidance on the OFT approach*, para 4.16 and *Financial Services and Markets Act 2000*, December 2004, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>48</sup> [www.of.gov.uk](http://www.of.gov.uk); the website also contains any Government response to a market study.

<sup>49</sup> *Market Studies: Guidance on the OFT approach*, para 4.4.

Table 11.2 Table of market studies

Completed market studies	Date of OFT report	Outcome of study
<i>Extended Warranties for Electrical Goods</i>	July 2002	Complex monopoly reference made to the Competition Commission under the (now-repealed) Fair Trading Act 1973
<i>Consumer IT Goods and Services</i>	December 2002	Generally the consumer IT market works well for consumers; OFT will continue to monitor the market
<i>Pharmacies</i>	January 2003	Recommendation that the Government should take action to liberalise entry to the community pharmacy market No action was taken to implement this recommendation
<i>Private Dentistry</i> (note that this followed a super-complaint by Which? (formerly the Consumers' Association))	March 2003	Better information on prices and treatments should be given to consumers, and there should be improvements to the self-regulation of the market The Department of Trade and Industry published an action plan in June 2003 to implement the OFT's proposals <sup>1</sup>
<i>Payment Systems</i>	May 2003	OFT to examine the effectiveness of the commitment within the Banking Code to inform consumers about the length of clearing cycles; to complete the investigation of the <i>MasterCard</i> notification; to consider whether action is required on access to merchant acquiring and on debit card networks; and to monitor undertakings following the CC's report under the Fair Trading Act 1973 on banking services
<i>Liability Insurance Market</i>	June 2003	Changes recommended to certain practices and the OFT to keep the market under review
<i>Taxi Services</i>	November 2003	Recommendation that elements of the regulatory framework for taxi services should be improved: in particular the removal of <i>quantity</i> restrictions, and the encouragement of proportionate <i>quality</i> restrictions In November 2006 the Department for Transport issued guidance on quantity restrictions
<i>New Car Warranties</i>	December 2003	Manufacturers and dealers should improve their advice to consumers on their servicing options; also they should remove servicing restrictions from their new car warranties: failure to do so could lead to a formal investigation by the OFT under Article 101 TFEU. Subsequently servicing ties were removed from new car warranties and a voluntary code of conduct was adopted

<b>Completed market studies</b>	<b>Date of OFT report</b>	<b>Outcome of study</b>
<i>Debt Consolidation</i>	March 2004	Better financial awareness among consumers and provision of clear, accurate and relevant information by credit providers needed to make the use of debt consolidation fairer and clearer
<i>Store Cards</i>	March 2004	Market investigation reference to the CC
<i>Estate Agents</i>	March 2004	Recommendation that the Estate Agent Act 1979 should be amended to improve enforcement, that self-regulation should be improved, and that consumers should take further action to protect their own position; key recommendations have been implemented by the Consumers, Estate Agents and Redress Act 2007
<i>Doorstep Selling</i> (note that this followed a super-complaint by the NACAB)	May 2004	Consumers require better information as to their rights in relation to doorstep selling, and existing legislation requires amendment to extend cooling-off periods to all forms of doorstep selling; key recommendations have been implemented by the Consumers, Estate Agents and Redress Act 2007
<i>Financial Services and Markets Act 2000</i>	December 2004	No adverse effects on competition found to flow from the Act
<i>Ticket Agents</i>	January 2005	Society of Ticket Agents and Retailers to develop model terms for its members to use in consumer contracts
<i>Classified Directory Advertising Services</i>	April 2005	Market investigation reference to the CC
<i>Care Homes</i> (note that this followed a super-complaint by Which? (formerly the Consumers' Association))	May 2005	The OFT recommended that the Government should establish a central information point or 'one-stop shop' where people can get clear information about care for older people; better access to complaints procedures should be achieved; there is a need for fairer contracts. The Government announced in August 2005 that it broadly accepted the OFT recommendations <sup>2</sup>
<i>Public Sector Procurement</i>	May 2005	Preliminary research published; further research to be conducted in relation to procurement in the waste management and construction sectors; discussions to take place with the Office of Government Commerce with a view to the OFT publishing guidelines for public sector procurers on how to make the most of competition when procuring construction services

(continued)

Table 11.2 (continued)

Completed market studies	Date of OFT report	Outcome of study
<i>Liability Insurance Market Follow-up Review</i>	June 2005	The OFT identified lower increases in premiums, better communication between insurers and policyholders and a reduction in the number of businesses denied cover as key improvements in this follow-up review to its earlier market study
<i>Property Searches</i>	September 2005	Recommendation that central Government should provide clearer guidance to local authorities on how they should set prices for providing property information; also that there should be an agreement as to revised targets with local authorities to ensure that this information is made available quickly and on the same time-scale that they apply to themselves. The Government announced in December 2005 that it accepted all but one of the report's recommendations <sup>3</sup>
<i>European State Aid Control</i>	November 2005	Recommendation that the European Commission should adopt an effects-based approach to the assessment of state aid in its guidelines; most cases would be assessed in a 'Phase I' investigation; cases that do not fall within the Commission's guidelines would be subject to a 'Phase II' assessment. National competition authorities should be allowed to give formal advice as to whether a proposed aid meets the criteria of the Commission's guidelines
<i>Public Subsidies</i>	January 2006	Recommendations by OFT that guidance should be given to providers of subsidies on whether the subsidies are likely to have a significant impact on competition. The OFT recommended that the guidance should be issued as a supplement to the HM Treasury 'Green Book', which requires that all costs and benefits should be taken into account when appraising any Government programme or project
<i>School Uniforms</i>	September 2006	The OFT found that exclusive contracts between schools and retailers have an adverse effect on the prices paid by parents. The OFT passed its findings to the Department of Education and also called on school governors to eliminate exclusive agreements

<b>Completed market studies</b>	<b>Date of OFT report</b>	<b>Outcome of study</b>
<i>Commercial Use of Public Information</i>	December 2006	Recommendation that public sector information holders, such as the Met Office, the National Archives and the Ordnance Survey, should make as much public sector information available for public use as possible, ensure that businesses have access to such information at the earliest point that it is useful to them, provide such information on a non-discriminatory basis and at a reasonable price and enable better regulation by the Office of Public Sector Information The Government announced in June 2007 that it accepted all but two of OFT's recommendations <sup>4</sup>
<i>Payment Protection Insurance</i> (note that this followed a super-complaint by Citizens Advice)	October 2006	Market investigation reference to the CC
<i>UK Airports</i>	December 2006	Market investigation reference to the CC Recommendations also made to the Government in relation to airports in the north of England
<i>Pharmaceutical Price Regulation Scheme</i>	February 2007	Recommendation that the Pharmaceutical Price Regulation Scheme, whereby the Government seeks to control the prices of branded medicines through a mix of profit and price controls, should be reformed in order to make the prices paid by the National Health Service reflect the therapeutic value to patients of the drug in question The Government responded in June 2009 <sup>5</sup>
<i>Internet Shopping</i>	June 2007	The rapid growth of internet selling has been successful for both consumers and businesses; OFT to conduct further work to improve aspects of internet selling
<i>Medicines Distribution</i>	December 2007	Recommendations by the OFT that the Government should make further amendments to the Pharmaceutical Price Regulation Scheme and seek the agreement of manufacturers to adopt minimum service standards for the benefit of pharmacies. The OFT will continue monitoring the situation in the market Government responded to the OFT's recommendations in May 2008 <sup>6</sup>

*(continued)*

Table 11.2 (continued)

<b>Completed market studies</b>	<b>Date of OFT report</b>	<b>Outcome of study</b>
<i>Personal Current Accounts in the UK</i>	July 2008	OFT came to the conclusion that the market is not working well for consumers. The OFT liaised with relevant stakeholders in order to adopt appropriate measures in order to correct the problems identified. In March 2011 the OFT published a short update on progress in the PCA market <sup>7</sup>
<i>Homebuilding in the UK</i>	September 2008	Market broadly competitive; housebuilding industry to develop a code of conduct to provide redress scheme for customers who experience faults or delays. Homebuilding Industry to establish a voluntary code of conduct to address issues in the report
<i>Sale and Rent Back</i>	October 2008	There should be statutory regulation of the sector by the FSA
<i>Scottish Property Managers</i>	February 2009	Market not working well for consumers; recommendation for a self-regulatory scheme promoted by the Scottish Government and for the development of an advice and mediation service. The Scottish Government responded to the OFT's recommendations in May 2009 <sup>8</sup>
<i>Northern Rock</i>	March 2009	The study found that public-sector support for Northern Rock had no significant adverse impact on competition during the period February 2008 to February 2009
<i>Isle of Wight Ferry Services</i>	October 2009	OFT decided not to make an MIR
<i>Second-hand Cars</i>	December 2009 June 2010	Initial research published OFT published guidance for second-hand car dealers
<i>Local Bus Services</i>	January 2010	Market investigation reference to the CC
<i>Home Buying and Selling</i>	February 2010	Some updating of legislation in this sector would be beneficial

<b>Completed market studies</b>	<b>Date of OFT report</b>	<b>Outcome of study</b>
<i>Online Targeting of Advertising</i>	May 2010	Appropriate self-regulation is needed so that better information is provided to consumers about how personal data are collected and used; if industry fails to deliver, enforcement action by either the OFT, ICO or OFCOM is to address the problem
<i>Insolvency Practitioners</i>	June 2010	Fundamental changes to the regulatory system recommended
<i>Advertising of Prices</i>	December 2010	Some pricing practices have the potential to mislead customers; advice on traders to review their promotional advertising so as to stay compliant with the law
<i>Outdoor Advertising</i>	February 2011	Market broadly competitive; there is a possibility that anti-competitive agreements entered into by Clear Channel and JCDecaux with local authorities may be having an adverse effect on entry into the market, and they will therefore be investigated under Article 101 TFEU/the Chapter I prohibition: the OFT refers to their long duration and some 'potentially restrictive terms'
<i>Consumer Contracts</i>	February 2011	Study provided OFT with a better understanding of the kinds of contract terms that are most likely to harm consumers
<i>Equity Underwriting</i>	February 2011	Market lacks effective competition; fees to investment banks have been increasing. Companies and institutional investors should do more to protect themselves

### (D) Outcomes of market studies

Various outcomes may follow a market study by the OFT. The following possibilities are set out in the OFT's *Guidance*:

- a clean bill of health for the market in question
- consumer-focused action, for example to raise their awareness in such a way that they make better purchasing decisions
- making recommendations to business to change their behaviour, for example on matters such as information about after-sales services, standard terms and conditions and improving consumer redress
- making recommendations to the Government or regulators
- investigation or enforcement action under consumer or competition law
- a market investigation reference to the CC under Part 4 of the Enterprise Act<sup>50</sup>.

The OFT publishes performance monitoring arrangements for market studies and reports on success against the targets in its Annual Report<sup>51</sup>. The OFT has estimated that consumer savings as a result of its market studies and reviews from 2007 to 2010 amounted to £107 million every year<sup>52</sup>.

### (E) Examples of market studies

An account of the OFT's work in studying markets can be found in its Annual Report and Resource Accounts<sup>53</sup>, and a section of the OFT's website provides details of its completed and current market studies<sup>54</sup>. Table 11.2 above contains a list of market studies which were completed by 20 June 2011.

## 5. Market Investigation References<sup>55</sup>

Chapter 1 of Part 4 of the Enterprise Act establishes the system of market investigation references. Sections 131 to 133 deal with the making of references and sections 134 to 138 with their determination. The OFT's *Market investigation references: Guidance about the making of references under Part 4 of the Enterprise Act* ('the OFT Guidance')<sup>56</sup> and the CC's *Market Investigation References: Competition Commission Guidelines*<sup>57</sup> provide

<sup>56</sup> OFT 511, March 2006, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>57</sup> CC3, June 2003.

helpful direction on market investigation references. The market investigation regime is a notable feature of the UK system of competition law, and recognises that not every market failure can be cured through the application of the ‘conventional’ tools of competition law, Articles 101 and 102 and their domestic analogues. The market investigation regime focuses on markets rather than on the behaviour of individual firms, and enables the CC to investigate whether features of the market have an adverse effect on competition. A wide range of remedies is available to eliminate, as far as possible, such adverse effects and any detrimental effects on customers that the CC identifies.

## (A) The making of references

### (i) The power of the OFT to make a reference

The OFT (concurrently with the sectoral regulators)<sup>58</sup> may make a market investigation reference to the CC when it has ‘reasonable grounds for suspecting’<sup>59</sup> that one or more ‘features’ of a market prevent, restrict or distort competition in the supply or acquisition of goods or services in the UK or in a part thereof<sup>60</sup>. A decision to make a market investigation reference is made by the Board of the OFT. The CAT has made clear that the ‘reasonable grounds for suspecting’ test does not impose a particularly high burden on the OFT: the scheme of the Act is that the full investigation of a market is to be carried out by the CC, not the OFT<sup>61</sup>. At the same time the CAT stressed that the first-stage investigation by the OFT should not be unduly protracted<sup>62</sup>. Features of a market include the structure of the market concerned or any aspect thereof<sup>63</sup>; the conduct of persons supplying or acquiring goods or services who operate on that market, whether that conduct occurs in the same market or not<sup>64</sup>; and conduct relating to the market concerned of customers of any person who supplies or acquires goods or services<sup>65</sup>. Conduct for these purposes includes a failure to act and need not be intentional<sup>66</sup>. The OFT, when making a reference, is not required to specify whether particular features of a market are a matter of structure on the one hand or of conduct on the other<sup>67</sup>.

Section 132 of the Act allows the Secretary of State to make a reference when he is not satisfied with a decision of the OFT not to make a reference under section 131, or when he considers that the OFT will not make such a reference within a reasonable period. Section 132 sits a little oddly with Parliament’s intention that the Secretary of State should be removed from cases except where exceptional public issues arise, for which special provision is made<sup>68</sup>. The section 132 power had not been exercised by 20 June 2011. In June 2010 the Government created the Independent Commission on Banking (‘ICB’) to consider ways in which the UK banking sector could be reformed to promote financial stability and competition<sup>69</sup>; the ICB was not established under the Enterprise Act, and is not subject to any specific legal framework. Its recommendations to the Government were published on 12 September 2011.

<sup>58</sup> On the powers of the sectoral regulators in relation to market investigation references see the Enterprise Act 2002, Sch 9, Part 2.

<sup>59</sup> Note that the Government resisted a proposed amendment to the Enterprise Bill that would have required the OFT to have reasonable grounds for *believing* rather than for *suspecting* there to be a problem: see Lord Sainsbury of Turville, Hansard, 18 July 2002, col 1511, available at [www.parliament.uk](http://www.parliament.uk).

<sup>60</sup> Enterprise Act 2002, s 131(1).

<sup>61</sup> Case No 1054/6/1/05 *Association of Convenience Stores v OFT* [2005] CAT 36, [2006] CompAR 183, para 7.

<sup>62</sup> *Ibid*, para 8.

<sup>63</sup> Enterprise Act 2002, s 131(2)(a).

<sup>64</sup> *Ibid*, s 131(2)(b).

<sup>65</sup> *Ibid*, s 131(2)(c).

<sup>66</sup> *Ibid*, s 131(3).

<sup>67</sup> *OFT Guidance*, para 1.9.

<sup>68</sup> See ‘Public Interest Cases’, p 474 below.

<sup>69</sup> See [bankingcommission.independent.gov.uk](http://bankingcommission.independent.gov.uk); the ICB published an Interim Report: Consultation on Reform Options on 11 April 2011.

Section 133 specifies what the OFT must include in a market investigation reference; in particular it must provide a description of the goods or services to which the feature or combination of features that are restrictive of competition relate<sup>70</sup>. A reference may be framed so as to require the CC to confine its investigation to goods or services supplied or acquired in a particular place or to or from particular persons<sup>71</sup>. Provision is made for the variation of references<sup>72</sup>. This occurred, for example, in the case of *Store Card Credit Services* so that network cards and insurance services such as payment protection insurance could be included in the investigation; the variation was made as a result of a request from the CC<sup>73</sup>. In the case of *Classified Directory Advertising Services* the CC issued a notice clarifying the scope of the reference, although the reference itself was not varied<sup>74</sup>.

Section 169 of the Act requires the OFT to consult before making a reference and section 172 requires it to give reasons for its decision; these may be given after the date of the reference<sup>75</sup>. The Act leaves open the form and extent of the consultation process: the consultation may be a public one, though not necessarily so. The consultation provisions are important, and the OFT takes great care to ensure that it complies with them. An example of these provisions operating in practice is afforded by the reference of *Airports*: the OFT published its market study and its proposal to send the matter to the CC on 12 December 2006, and called for comments by 8 February 2007: the actual reference to the CC was made on 30 March 2007.

The OFT maintains a close relationship with the CC so that the latter body is aware of cases that might be referred to it<sup>76</sup>; this means that the process of transferring a case from the OFT to the CC can be managed as efficiently as possible.

## (ii) The discretion of the OFT whether to make a reference

The OFT has a discretion to make a market investigation reference when the statutory criteria appear to be met. The OFT rejected a submission by CAMRA that the OFT is under a duty to refer a market where it has reasonable grounds to suspect that features of a market restrict competition<sup>77</sup>. Paragraph 2.1 of the *OFT Guidance* says that it will make a reference only when the following criteria, in addition to the statutory ones, are met:

- it would not be more appropriate to deal with any competition issues under the Competition Act 1998 or by other means, for example the powers of the sectoral regulators
- it would not be more appropriate to accept undertakings in lieu of a reference<sup>78</sup>
- the scale of the suspected problem, in terms of the adverse effect on competition, is such that a reference would be appropriate
- there is a reasonable chance that appropriate remedies will be available.

The *OFT Guidance* provides further insights into each of these criteria.

<sup>70</sup> Enterprise Act 2002, s 133(1)(c).

<sup>71</sup> Ibid, s 133(2) and (3); this power was exercised in the case of *Airports*. <sup>72</sup> Ibid, s 135.

<sup>73</sup> See [www.competition-commission.org.uk](http://www.competition-commission.org.uk) and OFT Press Release 41/05, 3 March 2005; a variation was also made in the case of *Domestic Bulk Liquefied Petroleum Gas*: see [www.competition-commission.org.uk](http://www.competition-commission.org.uk) and OFT Press Release of 20 October 2004.

<sup>74</sup> See [www.competition-commission.org.uk](http://www.competition-commission.org.uk). <sup>75</sup> Enterprise Act 2002, s 172(6).

<sup>76</sup> To this end the OFT and CC have created a joint working group: OFT Press Release 41/09, 8 April 2009.

<sup>77</sup> OFT 1279, October 2010, para 9.15 and fn 215; in *Newspaper and magazine distribution*, OFT 1121, September 2009, the OFT decided that, although the criteria for making a reference to the CC were met, it should exercise its discretion not to make a reference: *ibid*, ch 5.

<sup>78</sup> See 'Undertakings in lieu of a reference to the CC', pp 475–476 below.

**(A) Relationship between the Competition Act and market investigations**

The OFT's policy is to consider first whether a suspected problem can be addressed under the Competition Act 1998; it would consider a market investigation reference only where it has reasonable grounds to believe that market features restrict competition, but not to establish a breach of the Chapter I and/or Chapter II prohibitions (or of Articles 101 and/or 102 TFEU), or when action under the Competition Act has been or is likely to be ineffective for dealing with any adverse effect on competition identified<sup>79</sup>. The *OFT Guidance* goes on to explain that a market investigation reference might be appropriate for dealing with tacit coordination in oligopolistic markets<sup>80</sup> or with problems arising from parallel networks of similar vertical agreements<sup>81</sup>. It adds that the majority of references are likely to involve industry-wide market features or multi-firm conduct, of which tacit coordination and parallel vertical agreements are examples<sup>82</sup>. The OFT will review these criteria in the light of emerging case law on the Chapter II prohibition should it appear that it is inadequate to deal with conduct by a single dominant firm which has an adverse effect on competition<sup>83</sup>; also it may make a reference where there has been an infringement of the Chapter II prohibition and it seems that a structural remedy going beyond what could be imposed under the Competition Act is necessary<sup>84</sup>.

**(B) Relationship with Regulation 1/2003**

The *OFT Guidance* discusses the relationship between Regulation 1/2003 and the market investigation provisions<sup>85</sup>. That Regulation requires national competition authorities to apply Articles 101 and 102 where agreements or abusive conduct have an effect on interstate trade; as a general proposition it is not possible to apply stricter national law than Article 101, but this is possible in the case of Article 102<sup>86</sup>. The *OFT Guidance* points out that this does not prevent investigations of agreements and conduct that infringe Articles 101 and 102, but that it does affect the remedies that can be imposed<sup>87</sup>. Where Article 101 is applicable to an agreement or agreements, it is unlikely that the OFT would make a reference<sup>88</sup>. However the OFT notes the possibility that in certain circumstances the benefit of a block exemption can be withdrawn from vertical agreements, and that this could be a recommendation of the CC<sup>89</sup>. The *OFT Guidance* also notes that the CC could impose remedies in relation to behaviour which amounted to an infringement of Article 102, in which case the OFT would take those remedies into account in the event of it carrying out its own investigation of the infringement of that provision<sup>90</sup>. In the event that the CC were, during the course of a market investigation reference, to discover an infringement of Article 101 or 102, it would not itself have the power to apply those provisions to the behaviour in question, since it has not been designated as a national competition authority for the purpose of applying the EU competition rules: only the OFT and

<sup>79</sup> *OFT Guidance*, para 2.3.

<sup>80</sup> *Ibid*, para 2.5; on this point see the OFT's decision in *Local bus services* OFT 1158, January 2010, para 5.28, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>87</sup> *OFT Guidance*, para 2.12.

<sup>88</sup> *Ibid*, para 2.14; the OFT noted this point in reaching its decision not to make a reference of the UK beer and pub market: *CAMRA's super-complaint*, OFT 1279, October 2010, para 9.41 and fn 227.

<sup>89</sup> *OFT Guidance*, paras 2.17–2.18.

<sup>90</sup> *Ibid*, para 2.15.

the sectoral regulators have been so designated.<sup>91</sup> In *Store Card Credit Services* the CC was satisfied that its proposed remedies were not in conflict with the provisions of EU law<sup>92</sup>. In *Payment Protection Insurance* the CC rejected an argument that its remedies package infringed the EU freedom of establishment<sup>93</sup>.

### (C) *Scale of the problem*

The *OFT Guidance* discusses the proposition that a reference would be made only where the scale of a suspected problem, in terms of its effect on competition, is such that a reference would be an appropriate response. It will consider whether the adverse effects on competition of features of a market are likely to have a significant detrimental effect on customers through higher prices, lower quality, less choice or less innovation; where the effect is insignificant the OFT would consider that the burden on business and the cost of a reference to the CC would be disproportionate<sup>94</sup>. The limited evidence of consumer detriment was an important factor in the OFT's decision not to refer *Isle of Wight Ferry Services*<sup>95</sup>.

The *OFT Guidance* also says that, generally speaking, the OFT would not refer a very small market; a market only a small proportion of which is affected by the features having an adverse effect on competition; or a market where the adverse effects are expected to be short-lived<sup>96</sup>. In *Newspaper and magazine distribution* the OFT decided not to make a reference where any adverse effect on competition appeared to be offset by customer benefits in the form of lower prices and wider circulation<sup>97</sup>.

### (D) *Availability of remedies*

The OFT would not refer a market if it appeared that there were unlikely to be any available remedies to deal with an adverse effect on competition, for example where a market is global and a remedy under UK law would be unlikely to have any discernible effect<sup>98</sup>.

### (iii) *Restrictions on the OFT's ability to make a reference*

The OFT cannot make a reference if it has accepted undertakings in lieu of a reference within the preceding 12 months<sup>99</sup>. This limitation does not apply where an undertaking has been breached<sup>100</sup>; nor where it was accepted on the basis of false or misleading information<sup>101</sup>.

### (iv) *The OFT's application of the reference test*

Part II of the *OFT Guidance* contains a helpful discussion of the OFT's interpretation of the reference test set out in section 131 of the Act. In chapter 4 it discusses the meaning of 'prevention, restriction or distortion of competition'. In chapter 5 it considers structural features of markets, including the concentration level within a market, vertical integration, conditions of entry, exit and expansion, regulations and government policies, informational asymmetries, switching costs and countervailing power. Chapter 6 deals with firms' conduct, in particular the conduct of oligopolies, facilitating practices, custom and

<sup>91</sup> See ch 7, 'Article 5: powers of the NCAs', p 252.

<sup>100</sup> *Ibid*, s 156(2)(a).

<sup>101</sup> *Ibid*, s 156(2)(b).

practice and networks of vertical agreements. Chapter 7 considers the conduct of customers, which section 131(2)(c) of the Act considers to be a feature of a market, and specifically considers the issue of search costs, that is to say the cost that customers may have to incur in order to make an informed choice. By 20 June 2011 the OFT had made nine market investigation references to the CC, and the Office of Rail Regulation and OFCOM had each made one: they are set out in the Table of market investigation references towards the end of this chapter with some accompanying commentary<sup>102</sup>.

## (B) The determination of references

### (i) Questions to be decided

Once a reference has been made to the CC it must decide whether any feature, or combination of features, prevents, restricts or distorts competition in the referred market(s)<sup>103</sup>. If the CC considers that there is an adverse effect on competition, it must decide three additional questions: first, whether it should take action to remedy, mitigate or prevent the adverse effect on competition or any detrimental effect on customers it has identified<sup>104</sup>; detrimental effects are defined as higher prices, lower quality, less choice of goods or services and less innovation<sup>105</sup>; secondly, whether it should recommend that anyone else should take remedial action<sup>106</sup>; and thirdly, if remedial action should be taken, what that action should be<sup>107</sup>. The CAT has stated that it is likely to be a relatively rare case in which the CC, having identified an adverse effect on competition and detrimental effects, will exercise its discretion to take no remedial action under the Act<sup>108</sup>. When considering remedial action, the CC must have regard to the need to achieve as comprehensive a solution as is reasonable and practical to the adverse effect on competition and any detrimental effects on customers<sup>109</sup>, and may in particular have regard to the effect of any action on any relevant customer benefits<sup>110</sup>. If the CC finds that there is no anti-competitive outcome, the question of remedial action does not arise.

### (ii) Investigations and reports

Section 136(1) of the Act requires the CC to prepare and publish a report; this must be done within two years<sup>111</sup>. The report must contain the decisions of the CC on the questions to be decided under section 134, its reasons for those decisions and such information as the CC considers appropriate for facilitating a proper understanding of those questions and the reasons for its decisions<sup>112</sup>. The CC's report on *Store Card Credit Services* sets out, at paragraphs 24 to 37, a summary of the features of that market that prevent, restrict or distort competition, the detrimental effects on customers, the need for remedial action and the decisions on remedies; these matters are then dealt with in more detail in sections 9 and 10 of the report<sup>113</sup>. The time limit of two years may not be extended<sup>114</sup>, but the Secretary State may reduce it by order<sup>115</sup>. In the *Tesco* case the CAT rejected a submis-

<sup>102</sup> See 'Table of market investigation references', pp 480–483 below.

<sup>103</sup> Enterprise Act 2002, s 134(1)–(3).

<sup>104</sup> *Ibid*, s 134(4)(a); the phrase 'remedy, mitigate or prevent' in sections 134 and 138 of the Act recognises that there may be cases where an AEC cannot, because of the constraints of reasonableness or practicability, be fully remedied or prevented, but only mitigated.

<sup>105</sup> Enterprise Act 2002, s 134.

<sup>106</sup> *Ibid*, s 134(4)(b).

<sup>107</sup> *Ibid*, s 134(4)(c).

<sup>109</sup> Enterprise Act 2002, s 134(6).

<sup>110</sup> *Ibid*, s 134(7); on the meaning of relevant customer benefits, see s 134(8).

<sup>111</sup> *Ibid*, s 137(1).

<sup>112</sup> *Ibid*, s 136(2).

<sup>113</sup> Available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>114</sup> Enterprise Act 2002, s 137(4).

<sup>115</sup> *Ibid*, s 137(3).

sion that the time limit applied to its power to refer a matter back to the CC following a successful review<sup>116</sup>.

Experience of the first few years of the market investigation regime shows that the CC is likely to need the full two years to complete its investigation, although it has stated that it will attempt to do so in the future in a shorter period<sup>117</sup>; and that a further period of time thereafter may be needed to implement any necessary remedies (the *implementation* phase of the CC's procedure falls outside the statutory period within which the investigation must be conducted). It is probably correct to suggest that many parties under investigation will not be in a great hurry to facilitate a quicker conclusion to cases than this, since, in the event of a finding of an adverse effect on competition, it is likely that they will be called upon to alter their behaviour in some way at the end of the process.

### (iii) Duty to remedy adverse effects

When the CC has prepared and published a report under section 136 and concluded that there is an adverse effect on competition, section 138(2) requires it to take such action as it considers to be reasonable and practicable to remedy, mitigate or prevent the adverse effect on competition and any detrimental effects on customers that have resulted from, or may result from, the adverse effect on competition<sup>118</sup>. The CC would, where it is possible to do so, prefer to address the root cause of the problem – that is to say the adverse effect on competition – than the consequences of it<sup>119</sup>. When deciding what action to take the CC must be consistent with the decisions in its report on the questions it is required to answer, unless there has been a material change of circumstances since the preparation of the report or the CC has a special reason for deciding differently<sup>120</sup>. In making its decision under section 138(2) the CC shall have regard to the need to achieve as comprehensive a solution as is reasonable and practicable to any adverse effects on competition or detrimental effects on customers<sup>121</sup>, having regard to any relevant customer benefits of the market features concerned<sup>122</sup>. The remedies phase of a market investigation reference can be quite protracted<sup>123</sup>.

### (iv) Procedure before the CC

The procedures of the CC during market investigation references are set out in the CC's *Rules of Procedure*<sup>124</sup> and the *Chairman's Guidance to Groups*<sup>125</sup>. Rule 6 of the *Rules of Procedure* requires the CC to draw up an administrative timetable for its investigation. The major stages of an investigation include the gathering and verification of evidence; providing a statement of issues; hearings; notifying provisional findings; notifying and considering possible remedies; the publication of the final report; and deciding on remedies. Each investigation has its own home page on the CC's website, and it is a simple matter to follow the progress of the investigation in this way. This accords with the CC's aim to be open and transparent in its working<sup>126</sup>. The home page sets out the core documents

<sup>116</sup> *Tesco Plc v Competition Commission* [2009] CAT 9, [2009] CompAR 359, paras 20–29.

<sup>117</sup> See the CC's *Corporate Plan 2009/10*, Table 4, point 1.1 and the CC's Note for the CBI Competition Committee, 7 July 2009, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>118</sup> Enterprise Act 2002, s 138(2). <sup>119</sup> *CC Guidance*, para 4.6.

<sup>120</sup> Enterprise Act, s 138(3); see eg the CC's Final Report of 19 July 2011 concluding that there were no material changes in circumstances that would justify amending its original decision in *Airports*; the Report of 2011 is the subject of an appeal to the CAT in Case No 1185/6/8/11 *BAA Ltd v Competition Commission*, not yet decided.

<sup>121</sup> Enterprise Act 2002, s 138(4). <sup>122</sup> *Ibid*, s 138(5).

<sup>123</sup> See 'The Market Investigation Provisions in Practice', pp 479, 483–485 below.

<sup>124</sup> CC1, March 2006.

<sup>125</sup> CC6, March 2006.

<sup>126</sup> See *Chairman's Guidance on Disclosure of Information in Merger and Market Inquiries* (CC7, July 2003), paras 1.5 and 1.6, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

of the inquiry; contains the CC's announcements, for example on its 'emerging thinking', provisional findings and final report; and makes available the submissions and the evidence provided to the CC. The home page may also contain surveys and working papers of relevance to the investigation and an account of roundtable discussions, for example with academic economists, held on particular topics: for example in *Groceries* economic roundtables were held on local competition and on buyer power and in *Local Buses* the CC appointed researchers for a study on distinguishing exclusionary conduct, tacit co-ordination and competition<sup>127</sup>.

The first completed market investigation was *Store Card Credit Services*, and the home page sets out the core documents which provide a helpful insight into the progress of that case:

- terms of reference (18 March 2004)
- members of the inquiry
- administrative timetable
- 'issues statement' (22 September 2004)
- the CC's 'emerging thinking' (11 January 2005)
- variation of terms of reference
- notice of provisional findings (14 September 2005)
- notice of possible remedies
- statement of provisional decisions on remedies
- final report (7 March 2006)
- administrative timetable for making of Order
- notice of intention to make an Order
- draft Order
- notice of making Order
- *Store Cards Market Investigation Order* (27 July 2006).

In July 2009 the CC announced that it intends to streamline its procedures so that it might be able to complete some investigations within 18 months<sup>128</sup>; subsequently the Government consulted on a proposal to reduce the time limit by statute.<sup>128a</sup>

#### (v) The CC's Guidance

The CC has published *Market Investigation References: Competition Commission Guidelines*<sup>129</sup> which explain its approach to market investigation references. They deal in turn with issues of market definition, the assessment of competition and remedial action, and contain an extremely useful guide to the competitive process and various factors that adversely affect competition.

<sup>127</sup> See [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>128</sup> See [www.competition-commission.org.uk](http://www.competition-commission.org.uk); for criticism of the length of market investigation references see Callaghan 'What Every In-house Lawyers Needs to Know About a UK Competition Commission Inquiry Before it Starts – 10 Suggestions to Help You Manage the Process' (2009) 3(9) *International In-house Counsel Journal* 1365.

<sup>128a</sup> See *A Competition Regime for Growth: a consultation on options for reform*, para 3.18–3.20, available at [www.bis.org.uk](http://www.bis.org.uk).

<sup>129</sup> CC3, June 2003.

## 6. Public Interest Cases

Chapter 2 of Part 4 of the Act provides for ‘public interest cases’. These are rare and are discussed here in outline only<sup>130</sup>. The Secretary of State may give an ‘intervention notice’ to the CC within the first four months of a market investigation reference<sup>131</sup>, provided that the reference has yet to be determined<sup>132</sup> and that he believes that one or more public interest considerations are relevant to a market investigation<sup>133</sup>. The Secretary of State may also give an intervention notice to the OFT when it is considering undertakings in lieu of a reference<sup>134</sup>. Section 140(1) specifies the information that an intervention notice must contain. The Enterprise Act specifies national security as a public interest consideration<sup>135</sup>; the Secretary of State can add a new public interest consideration by statutory instrument, but this would require the approval of Parliament<sup>136</sup>.

When an intervention notice has been given to the CC it will investigate whether features of the market are having an adverse effect on competition and, if so, consider the question of remedies; however it must prepare one set of remedies on the basis that the Secretary of State might decide the case, and a separate set of remedies in case the matter reverts to it<sup>137</sup>. The CC will then publish its report<sup>138</sup>. The Secretary of State must then decide, within 90 days of receipt of the report, whether any public interest considerations raised by the intervention notice are relevant to the remedial action proposed by the CC<sup>139</sup>; if so, the Secretary of State may take such action as he considers to be reasonable and practicable to remedy the adverse effects on competition identified by the CC in the light of the relevant public interest considerations<sup>140</sup>. If, however, the Secretary of State does not make and publish his decision within 90 days of receipt of the report, the matter reverts to the CC which will proceed on the basis of the remedies that it proposed in the eventuality of the matter reverting back to it<sup>141</sup>.

Section 150 of the Act gives the Secretary of State power to veto the acceptance by the OFT of an undertaking in lieu of a market investigation reference where any public interest considerations outweigh the considerations that led the OFT to propose accepting the undertaking<sup>142</sup>.

The OFT has a function of informing the Secretary of State of cases that might raise public interest considerations<sup>143</sup>, and the OFT and CC must bring to his attention any representations about the exercise of his powers as to what constitutes a public interest consideration<sup>144</sup>.

## 7. Enforcement

Chapter 3 of Part 4 of the Enterprise Act deals with the powers of the OFT and the CC to accept undertakings or to impose orders to ensure compliance with the Act and to monitor and enforce them. It begins with the powers of the OFT to accept undertakings in lieu of a reference to the CC; it then sets out the interim and final powers of the CC.

<sup>130</sup> The procedure in public interest cases is described in the *CC Guidance*, paras 5.1–5.11.

<sup>131</sup> Enterprise Act 2002, s 139(1)(a)–(b).

<sup>132</sup> *Ibid*, s 139(1)(c). <sup>133</sup> *Ibid*, s 139(1)(d).

<sup>134</sup> *Ibid*, s 139(2). <sup>135</sup> *Ibid*, s 153(1). <sup>136</sup> *Ibid*, s 143(3) and (4). <sup>137</sup> *Ibid*, s 141.

<sup>138</sup> *Ibid*, s 142. <sup>139</sup> *Ibid*, s 146. <sup>140</sup> *Ibid*, s 147. <sup>141</sup> *Ibid*, s 148. <sup>142</sup> *Ibid*, s 150.

<sup>143</sup> *Ibid*, s 152. <sup>144</sup> *Ibid*, s 152.

Undertakings and orders are legally binding and enforceable in the courts<sup>145</sup>. The OFT is required to maintain a register of undertakings and orders made under the market investigation provisions in the Enterprise Act; it is accessible on the OFT's website<sup>146</sup>.

## (A) Undertakings and orders

### (i) Undertakings in lieu of a reference to the CC<sup>147</sup>

Section 154(2) of the Act gives power to the OFT to accept an undertaking in lieu of a reference to the CC. It can do this only where it considers that it has the power to make a reference to the CC and otherwise intends to make such a reference<sup>148</sup>. In proceeding under section 154(2) the OFT must have regard to the need to achieve as comprehensive a solution as is reasonable and practicable to the adverse effect on competition concerned and any detrimental effects on customers<sup>149</sup>, taking into account any relevant customer benefits<sup>150</sup>. The OFT has said that it considers that undertakings in lieu are unlikely to be common<sup>151</sup>; given that the OFT does not conduct a full investigation of the market – that is the function of the CC – it may not be in possession of sufficient information to know whether undertakings in lieu would be adequate to remedy any perceived detriments to competition. This having been said, it may be that, as the system develops, more use will be made of them: some firms may decide that it would be preferable to offer undertakings in lieu than to bear the intrusion and cost of a two-year investigation; others, however, may prefer a delay of two years (or more) before potentially having to abandon the behaviour in question. If firms were to offer undertakings in lieu but the OFT were to proceed nevertheless to make a market investigation reference, they could apply to the CAT for a review of the decision. It is likely that the OFT (or a sectoral regulator) will find it easier to make use of the undertaking in lieu provisions when there are only a few firms involved (or even just one) than when a large number of firms are under investigation.

Before accepting undertakings in lieu the OFT is obliged to publish details of the proposed undertaking, to allow a period of consultation and to consider any representations received<sup>152</sup>; a further period of consultation is required should the OFT intend to modify the undertakings<sup>153</sup>. If an undertaking in lieu has been accepted it is not possible to make a market investigation reference to the CC within the following 12 months<sup>154</sup>, unless there is a breach of the undertaking or unless it was accepted on the basis of false or misleading information<sup>155</sup>.

Undertakings in lieu of a reference had been accepted in two cases by 20 June 2011, *Postal Franking Machines*<sup>156</sup>, an OFT case, and *BT*<sup>157</sup>, a case involving OFCOM. In the case of *Postal Franking Machines* the OFT accepted undertakings from the two leading suppliers of franking machines, Pitney Bowes and Neopost, together with Royal Mail; the undertakings were intended to facilitate greater customer choice and more competition in the market, for example by making better price information available and encouraging the provision of third-party maintenance services. This market had been the subject of an investigation under the now-repealed Fair Trading Act 1973 in 1988; the OFT decided

<sup>145</sup> *Ibid*, s 167; as to whether a person injured by breach of an undertaking or order could bring an action for damages, see *MidKent Holdings v General Utilities plc* [1996] 3 All ER 132, [1997] 1 WLR 14, brought under s 93 of the (now-repealed) Fair Trading Act 1973.

<sup>146</sup> Enterprise Act 2002, s 166; the OFT's website is [www.ofc.gov.uk](http://www.ofc.gov.uk).

<sup>147</sup> See generally *OFT Guidance*, paras 2.20–2.26. <sup>148</sup> Enterprise Act 2002, s 154(1).

<sup>149</sup> *Ibid*, s 154(3). <sup>150</sup> *Ibid*, s 154(4). <sup>151</sup> *OFT Guidance*, paras 2.21 and 2.25.

<sup>152</sup> Enterprise Act 2002, s 155(1)–(3). <sup>153</sup> *Ibid*, s 155(4)–(5). <sup>154</sup> *Ibid*, s 156(1).

<sup>155</sup> *Ibid*, s 156(2). <sup>156</sup> OFT, 17 June 2005, available at [www.ofc.gov.uk](http://www.ofc.gov.uk).

<sup>157</sup> OFCOM, 22 September 2005, available at [www.ofcom.org.uk](http://www.ofcom.org.uk).

to review the market since the undertakings given in 1988 appeared not to have been effective. In *BT* OFCOM accepted more than 230 separate undertakings from the Board of BT designed to achieve operational separation between BT's infrastructure, where it benefits from a 'bottleneck monopoly', and those parts of its business where it is subject to competition; the monopoly part of the BT business is now operated by 'Openreach', and 'Chinese walls' are established between it and the rest of the BT business. Openreach is required to provide wholesale services to communications providers on an equivalent basis. The intention is that this will prevent BT from discriminating in favour of its own vertically-integrated business units. OFCOM publishes a quarterly report setting out BT's progress in implementing the undertakings, and an annual report looking at their overall impact<sup>158</sup>.

### (ii) Interim undertakings and orders to prevent pre-emptive action

The CC, after a report has been published, can accept interim undertakings and make interim orders to prevent pre-emptive action which might prejudice any final remedy adopted by the CC<sup>159</sup>. The Secretary of State may exercise these powers in public interest cases<sup>160</sup>.

### (iii) Final powers

Sections 159 to 161 of the Enterprise Act deal with the final undertakings and orders that are available to the CC after it has completed its investigation and reached its conclusion on the questions contained in section 134. Section 159 provides for the acceptance of undertakings and section 160 for the making of an order where an undertaking is not being fulfilled or where false or misleading information was given to the OFT or CC prior to the acceptance of the undertaking. Section 161 empowers the CC to make a final order. The orders that can be made are set out in Schedule 8 to the Act; they include orders to restrict certain conduct on the part of firms, and also to prohibit acquisitions or even to provide for the division of a business<sup>161</sup>. The provisions that may be contained in an undertaking are not limited to those permitted by Schedule 8 in the case of orders<sup>162</sup>. The CC has a choice of whether to seek undertakings or to make an order, and will proceed on the basis of practicality such as the number of parties concerned and their willingness to negotiate and agree undertakings in the light of the CC's report<sup>163</sup>.

The first order to be made by the CC under these powers was the *Store Cards Market Investigation Order* of 27 July 2006. It made provision for full information to be made available to consumers on store card statements, including a warning as to the annual percentage rate of the interest payable; for a direct debit facility to be made available to users of store cards; and for the provision of payment protection insurance as a separate product from the store card itself<sup>164</sup>. In the case of *Classified Directory Advertising Services* the CC decided that it would accept undertakings from Yell, the publisher of Yellow Pages, rather

<sup>158</sup> Details of OFCOM's ongoing work in relation to BT's undertakings can be found at [www.ofcom.org.uk](http://www.ofcom.org.uk).

<sup>159</sup> Enterprise Act 2002, ss 157 and 158. <sup>160</sup> *Ibid*, s 157(6)(a).

<sup>161</sup> On structural remedies under the Act and its predecessors see Speech of Peter Freeman of 7 October 2010, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>162</sup> Enterprise Act 2002, s 164(1). <sup>163</sup> *CC Guidance*, paras 4.42–4.44.

<sup>164</sup> Available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk); the Order was slightly amended in 2011 by the *Store Cards market Investigation Order Variation Order 2011* to take into account the coming into force of the Directive 2008/48/EC of the European Parliament and of the Council on credit agreements for consumers, OJ [2008] L 133/66.

than make an order; the final undertakings were accepted on 3 April 2007<sup>165</sup>. As will be seen from the Table of market investigation references below, the CC had made final orders in seven cases by 28 June 2011.

## **(B) Enforcement functions of the OFT**

Section 162 of the Act requires the OFT to keep enforcement undertakings and enforcement orders under review<sup>166</sup> and to ensure that they are complied with<sup>167</sup>; it is also required to consider whether, by reason of a change of circumstances, there is a case for release, variation, supersession or revocation<sup>168</sup>. The CC may ask the OFT to assist in the negotiation of undertakings<sup>169</sup>. Section 167 provides that there is a duty to comply with orders and undertakings; this duty is owed to anyone who may be affected by a breach of that duty<sup>170</sup>. Any breach of the duty is actionable if such a person sustains loss or damage<sup>171</sup>, unless the subject of the undertaking or order took all reasonable steps and exercised all due diligence to avoid a breach of the order or undertaking<sup>172</sup>. Compliance with an order or undertaking is also enforceable by civil proceedings brought by the OFT<sup>173</sup> or the CC<sup>174</sup> for an injunction.

## **8. Supplementary Provisions**

Chapter 4 of Part 4 of the Enterprise Act contains a number of supplementary provisions.

### **(A) Regulated markets**

Section 168 provides that, where the CC or the Secretary of State consider remedies in relation to regulated markets such as telecommunications, gas and electricity, they should take into account the various sector-specific regulatory objectives that the sectoral regulators such as the Gas and Electricity Markets Authority and OFCOM have. These may go beyond preventing adverse effects on competition: for example there is a legal obligation to ensure the maintenance of a universal postal service.

### **(B) Consultation, information and publicity**

Sections 169 to 172 of the Act impose various consultation, information and publication obligations on the OFT, the CC and the Secretary of State.

### **(C) Powers of investigation**

Section 174 gives the OFT powers to require information for the purpose of market investigation references; section 175 creates criminal offences where, for example, a person intentionally and without reasonable excuse fails to comply with a notice under section 174; the

<sup>165</sup> See [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>166</sup> Enterprise Act 2002, s 162(1). <sup>167</sup> Ibid, s 162(2)(a).

<sup>168</sup> Ibid, s 162(2)(b)–(c).

<sup>169</sup> Ibid, s 162. <sup>170</sup> Ibid, s 167(2)–(3).

<sup>171</sup> Ibid, s 167(4); as to whether such a person could bring an action for damages, see ch 11 n 145 above.

<sup>172</sup> Ibid, s 167(5). <sup>173</sup> Ibid, s 167(6). <sup>174</sup> Ibid, s 167(7).

level of financial penalties depends on whether the offence is tried summarily or is serious enough to be taken on indictment to the Crown Court.

Section 176 of the Act gives the CC the same powers to require the attendance of witnesses, the production of documents and the supply of information as it has under the provisions in Part 3 of the Act on merger control. These provisions are described in chapter 22 of this book<sup>175</sup>.

#### (D) Reports

Section 177 of the Act makes provision for excisions of inappropriate matter from reports made under the provisions on public interest cases<sup>176</sup>, and section 178 allows a dissenting member of the Commission to publish his reasons for disagreeing with the majority. Dissenting opinions are possible: the only two times that this had occurred by 20 June 2011 were in the case of *Rolling Stock Leasing* where one member of the CC dissented on the comprehensiveness of the remedies package<sup>177</sup> and in *Groceries* where there was a split decision in relation to the competition test to be inserted in the planning regime<sup>178</sup>.

#### (E) Review of decisions under Part 4 of the Enterprise Act

Section 179 of the Act makes provision for review of decisions under Part 4 of the Act. Section 179(1) provides that any person aggrieved by a decision of the OFT, the Secretary of State or the CC may apply to the CAT for review of that decision: the aggrieved person could be a third party with sufficient interest. The application must be made within two months of the date on which the applicant was notified of the disputed decision or of its date of publication, whichever is earlier<sup>179</sup>. When dealing with applications under section 179(1) the CAT must apply the same principles as would be applied by a court on an application for judicial review<sup>180</sup>. The CAT's concern is therefore not with the correctness of the decision, but with the lawfulness of the decision-making process which it adopted<sup>181</sup>. The CAT may dismiss the application or quash the whole or part of the decision to which it relates<sup>182</sup>; and, in the latter situation, it may refer the matter back to the

<sup>175</sup> See ch 22, 'Investigation Powers and Penalties', p 949.

<sup>176</sup> See 'Public Interest Cases', p 474 above on public interest cases.

<sup>177</sup> See Final Report, para 9.272 and Note of dissent accompanying the report; both documents are available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>178</sup> See Final Report, paras 11.100–11.104, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>179</sup> Competition Appeal Tribunal Rules 2003, SI 2003/1372, as amended by SI 2004/2068, r 27.

<sup>180</sup> Enterprise Act 2002, s 179(4); the fact that the CAT is a specialist tribunal does not mean that it should apply judicial review principles in a different way to the ordinary courts: see Lloyd LJ in *British Sky Broadcasting Group Plc v Competition Commission* [2010] EWCA Civ 2, [2010] UKCLR 351, paras 28–41, dealing with the merger control provisions in Part 3 of the Act, but which would apply in the same way to the market investigation provisions.

<sup>181</sup> Case No 1109/6/8/09 *Barclays Bank Plc v Competition Commission* [2007] CAT 27, [2009] CompAR 381, para 22.

<sup>182</sup> Enterprise Act 2002, s 179(5)(a).

original decision-maker for further consideration<sup>183</sup>. An appeal may be brought before the Court of Appeal, with permission, against the CAT's decision on a point of law<sup>184</sup>. Part 3 of the Competition Appeal Tribunal Rules 2003 makes provision for applications under section 179 of the Act<sup>185</sup>.

Five applications for review under the market investigation provisions of the Enterprise Act had been made by 20 June 2011. In the case of *Association of Convenience Stores v OFT*, the Association was dissatisfied with a decision of the OFT not to refer the groceries market to the CC; however the OFT subsequently decided that it would reconsider the matter, with the consequence that the CAT handed down a ruling quashing the OFT's decision not to refer and referring the matter back to the OFT<sup>186</sup>. The OFT subsequently referred the groceries market to the CC in May 2006. The challenges to the CC's decisions to impose certain remedies in its *Groceries* and *Payment Protection Insurance* investigations are discussed in the section on the market investigation provisions in practice<sup>187</sup>. In *BAA v Competition Commission*<sup>188</sup> the CAT upheld a claim by BAA that the *Airports* market investigation had been tainted by apparent bias of one of the CC's members, but rejected its argument that the CC's chosen remedies were disproportionate. On appeal the Court of Appeal held the CC's final report was not tainted by apparent bias, and restored the CC's decision that BAA should divest itself of three UK airports<sup>189</sup>. One further case, *Campaign for Real Ale v OFT*, was adjourned while the OFT re-consulted on its original decision not to refer the pub industry to the CC. In October 2010 the OFT took a new decision reaching the same conclusion; the proceedings in the CAT were subsequently withdrawn with permission<sup>190</sup>.

## 9. The Market Investigation Provisions in Practice

By 20 June 2011 the OFT had made nine market investigation references to the CC, six of which had been completed; two of which were at the order-making stage and one was pending; there had also been one reference from each of the Office of Rail Regulation and OFCOM. The references to date are set out in the following Table of market investigation references.

<sup>183</sup> *Ibid*, s 179(5)(b); on which see the ruling on relief in Case No 1104/6/8/08 *Tesco Plc v Competition Commission* [2009] CAT 9, [2009] CompAR 359.

Table 11.3 Table of market investigation references

Title of report	Date of reference	Date of report	Outcome
<i>Store card credit services</i>	18 March 2004	7 March 2006	Adverse effect on competition in relation to the supply of consumer credit through store cards and associated insurance in the UK; in particular most store card holders pay higher prices for their credit than would be expected in a competitive market. The CC estimated the customer detriment to be in the region of £55 million a year since 1999, and possibly significantly more The <i>Store Cards Market Investigation Order</i> of 27 July 2006 requires full information to be made available to store card users, including as to the annual percentage rate of interest; direct debit facilities to be made available to users; and the provision of payment protection insurance as a separate product Slight variation to the <i>Store Cards Order</i> on 11 February 2011 to take into account the entry into force of the EU Consumer Credit Directive
<i>Domestic bulk liquefied petroleum gas (LPG)</i>	5 July 2004	29 June 2006	Adverse effect on competition in relation to the supply of domestic bulk liquefied petroleum gas in the UK; in particular there was very little switching by customers between suppliers for a variety of reasons leading to higher prices for the large majority of customers The <i>Domestic Bulk Liquefied Petroleum Gas Market Investigation Order</i> of 13 October 2008 and the <i>Domestic Bulk Liquefied Petroleum Market Investigation (Metered Estates) Order</i> of 6 May 2009
<i>Home credit</i> (note that this reference followed a super-complaint from the National Consumer Council)	20 December 2004	30 November 2006	Adverse effect on competition in relation to the supply of home credit; in particular the weakness of price competition led to higher prices than could be expected in a competitive market The <i>Home Credit Market Investigation Order</i> of 13 September 2007 requires home credit

Title of report	Date of reference	Date of report	Outcome
			<p>lenders to share customer repayment data with other potential lenders; to publish information, in particular price information, about the loans they offer to customers; and to provide, at most every three months, an account statement, free of charge, when any of their borrowers ask for one. The Order was slightly varied on 24 February 2011 to take into account the entry into force of the EU Consumer Credit Directive</p>
<i>Classified directory advertising services</i>	5 April 2005	21 December 2006	<p>Adverse effect on competition in relation to classified directory advertising services; Yell's prices for advertising in Yellow Pages would be higher than in a well-functioning market if it were not for the fact that it was already subject to price control as a result of an earlier monopoly investigation under the Fair Trading Act 1973</p> <p>On 3 April 2007 the CC accepted final undertakings from Yell Group plc capping its advertising prices; undertakings were also given in relation to other matters such as tying and bundling and the provision of accounts</p>
<i>Northern Ireland personal banking</i> (note that this followed a super-complaint from Which? in conjunction with the General Consumer Council for Northern Ireland)	26 May 2005	15 May 2007	<p>Adverse effect on competition in relation to personal current accounts in Northern Ireland; competition limited by banks' unduly complex charging structures and practices, their failure adequately to explain them and customers' reluctance to switch to another bank</p> <p>The <i>Northern Ireland PCA Banking Market Investigation Order</i> of 19 February 2008 requires Northern Irish banks to ensure that certain types of communications with customers are easy to understand and to inform customers that they can switch; the Order also deals with the provision of information to the OFT</p> <p>Slight variation to the <i>Northern Ireland PCA Banking Market Investigation Order</i> of 28 February 2011 to take into account the entry into force of the EU Consumer Credit Directive and Payment Services Directive</p>

(continued)

Title of report	Date of reference	Date of report	Outcome
<p><i>Groceries Market</i> On appeal the CAT found that the CC's report contained errors in relation to remedies<sup>1</sup>; in a further judgment the CAT quashed part of CC's decision and remitted the matter back to it<sup>2</sup></p>	9 May 2006	30 April 2008	<p>Grocery markets in many respects provide a good deal for consumers; however action is needed to improve competition in local markets and to address relationships between retailers and their suppliers</p> <p>On remittal, following the appeal, the CC came to substantially the same conclusion again on 2 October 2009</p> <p>The <i>Groceries Supply Code of Practice</i> came into force on 4 February 2010; legislation is proposed to create a Groceries Code Adjudicator who will enforce the <i>Code</i></p> <p>The CC adopted the <i>Controlled Land Order</i> on 10 August 2010 which addresses the issue of exclusivity agreements and restrictive covenants that could restrict entry to the groceries market</p>
<p><i>Payment Protection Insurance</i> (note that this followed a super-complaint from Citizens Advice) On appeal the CAT quashed the CC's decision to impose a 'point of sale prohibition' for PPI and remitted the matter to the CC<sup>3</sup></p>	7 February 2007	29 January 2009	<p>Serious competition problems in the PPI market; various measures proposed, including a ban on the sale of PPI during the sale of the credit product and for seven days afterwards; also informational remedies</p> <p>On remittal, following the appeal, the CC came to substantially the same conclusion again on the point of sale prohibition on 14 October 2010. This led to the <i>Payment Protection Insurance Market Investigation Order</i> of 24 March 2011</p>
<p><i>BAA Airports</i> On appeal the CAT found apparent bias<sup>4</sup>; the CC's report for the most part was quashed and the matter was remitted back to it<sup>5</sup> The Court of Appeal upheld some of the CC's appeal and restored its original report<sup>6</sup></p>	29 March 2007	19 March 2009	<p>BAA ordered to sell three airports, including Gatwick and Stansted and one of Glasgow or Edinburgh; BAA sold Gatwick Airport in November 2009 to Global Infrastructure Partners</p> <p>On 19 April 2011 the CC accepted final undertakings from BAA in relation to Aberdeen airport</p> <p>On 19 July 2011 the CC decided that there were no material changes of circumstances that would justify amending its decision to require BAA to sell Stansted Airport and one of Glasgow or Edinburgh<sup>7</sup></p>

Title of report	Date of reference	Date of report	Outcome
<i>Rolling stock leasing market investigation</i>	26 April 2007	7 April 2009	Competition in the market for rolling stock is restricted by the limited number of alternative fleets available to TOCs. <sup>6</sup> *CC v BAA* [2010] EWCA Civ 1097, [2011] UKCLR 1.

<sup>7</sup> The Report of July 2011 is now the subject of an appeal to the CAT, Case No 1185/6/8/11, *BAA v Competition Commission*, not yet decided.

As stated at the outset of the chapter the market investigation provisions (as well as the OFT's market studies) are an important supplement to the 'conventional' competition law tools of Articles 101 and 102 TFEU and the Chapter I and Chapter II prohibitions. Not all market failures are caused by cartels and abusive behaviour by dominant firms. It is important that competition authorities should have other tools at their disposal such as the powers afforded by the Enterprise Act.

A number of points can be made about the investigations that the CC has so far completed.

### (A) Meaning of 'adverse effect on competition'

The CC has had to grapple with the meaning of the terms 'features of the market' and 'adverse effect on competition' ('AEC'), which appeared in UK law for the first time in the Enterprise Act 2002. In doing so the CC has typically used economic thinking to facilitate its understanding and analysis of competition in the market under investigation. The CC has not laid down a definitive test of what constitutes an AEC, but it is possible to tell from its reports that it often sees the issue in terms of a realistic comparison between 'a well-functioning market' and the competitive conditions observed in practice<sup>191</sup>. The text that follows will briefly examine the approach that has been taken to identifying an AEC by the CC.

<sup>191</sup> See eg the Final Reports in *Home Credit*, para 8.4; *Groceries*, para 10.7; and *Rolling Stock Leasing*, paras 8.4–8.6 and 8.20.

### (i) Market definition

In its reports the CC has frequently defined the relevant market and, by doing so, identified those products or services that currently constrain the prices of those under investigation<sup>192</sup>. Market definition provides a helpful framework for the CC's evidence gathering and economic analysis. The goods or services specified in the reference may or may not correspond to the relevant market. The CC undertook considerable econometric analysis and modelling to inform its market definition in *Groceries*<sup>193</sup>.

### (ii) Counterfactual

In several reports the CC has tried to identify the appropriate 'counterfactual' against which to determine whether any feature of the market restricts competition<sup>194</sup>. A well-functioning market does not require perfect competition<sup>195</sup>, but is likely to be a market in which competition is as effective as possible given the nature of the product<sup>196</sup>.

### (iii) Theories of harm

The CC typically uses economics to frame its analysis of a particular market and consider various 'theories of competitive harm' which may arise from one or more 'features' of the market. The CC seeks to identify a plausible case that the market under scrutiny could lead to significant harmful effects on competition. The CC's *Market Investigation References Guidelines* provide detailed guidance on its assessment of competition, and include consideration of issues such as switching costs and barriers to entry, or market imperfections, such as informational asymmetries. For example in *Northern Ireland Banking*<sup>197</sup> the CC concluded that the features of the market harming competition were that banks had unduly complex charging structures and practices; that they did not fully or sufficiently explain them; and that customers generally did not actively search for alternative suppliers<sup>198</sup>. In *BAA* the CC's theory of harm was different: it was concerned that the common ownership of many airports in the UK meant that there was a lack of competition between them, resulting in problems such as a lack of responsiveness to the interests of airlines and passengers. This feature of the airports market could have an AEC in more than one market: for example if there were inadequate investment at an airport caused by lack of competition between airports, that lack of investment may adversely affect competition between airlines<sup>199</sup>. In the case of *Local Buses* the CC explicitly identified four theories of harm which it proposed to examine<sup>200</sup>.

### (iv) Performance and prices

In some cases the CC has considered the level of prices and profitability as factors indicating the lack of competitive pressure in a market<sup>201</sup>. In *Home Credit* the CC concluded that the fact that excessive profits were being earned was not in itself an adverse effect on competition, although it was indicative of features of the market, such as an incumbency

<sup>192</sup> This is consistent with the CC's *Market Investigation References Guidelines*, part 2.

<sup>193</sup> See the Final Report, paras 4.13–4.14.

<sup>194</sup> See eg the Final Report in *Home Credit*, para 8.4, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>195</sup> See the Final Report in *Rolling Stock Leasing*, para 4.28.

<sup>196</sup> Final Reports in *Home Credit*, para 8.4, *Groceries*, para 10.7 and *Rolling Stock Leasing*, para 8.20.

<sup>197</sup> See the Final Report, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk); for criticism of this investigation see Ridyard 'The Competition Commission's Northern Ireland Banking Market Investigation – Some Unanswered Questions on the Role of Market Investigations' (2008) 29 ECLR 173.

<sup>198</sup> Final Report, para 5.9.

<sup>199</sup> Final Report, para 8.2.

<sup>200</sup> Issues Statement, 4 February 2010.

advantage and a lack of customer switching, that did have an adverse effect on competition. On other occasions the CC has noted that a number of conceptual and practical difficulties have constrained its ability to conduct informative profitability analysis<sup>202</sup>.

### (B) Findings of adverse effects on competition

The CC has found an adverse effect on competition in each of the investigations so far completed. It is noticeable that in several of these cases the CC was concerned about the lack of information, or the complexity of the information, available to customers: this was true, for example, in *Store Card Credit Services*, *Home Credit* and *Northern Ireland Banking*. Another recurrent theme is problems for consumers in switching between suppliers of goods and services: this was a key feature of the investigation into *Liquefied Petroleum Gas* and was a concern of the CC in *Northern Ireland Banking* and *Payment Protection Insurance*. The impact of government policy and economic regulation has also been a concern in several investigations. An example of this is *Classified Directory Advertising Services* in which Yell's prices were already subject to a system of regulation, following an earlier investigation in 1996; nevertheless the CC concluded that features of the market did have an adverse effect on competition in that Yell's prices would be higher than in a well-functioning market but for the price regulation<sup>203</sup>. The CC was also critical of aspects of government policy in *Rolling Stock Leasing* and *BAA*.

### (C) Remedies

One of the important changes introduced by the Act was that it gave the CC responsibility for determining and implementing as full and effective a remedy for any adverse effects on competition as possible. Aspects of the remedies imposed in two investigations – *Groceries*<sup>204</sup> and *Payment Protection Insurance*<sup>205</sup> – were successfully challenged before the CAT. In both cases the CAT was critical of the CC's approach to evaluating the likely costs and benefits of its remedies. On reconsideration of the matters the CC adopted essentially the same remedies<sup>206</sup>. In February 2010 the CC published the outcome of an internal review of its remedies procedures<sup>207</sup>; the CC intends to publish more detailed guidance in due course<sup>208</sup>.

### (D) Evaluation of the system

The OFT and the CC regularly evaluate the effectiveness of market studies and market investigations<sup>209</sup>. The CC has estimated that action taken following market studies and market investigations saved consumers £317 million between April 2009 and March

<sup>202</sup> See for example the Final Reports in *Liquefied Petroleum Gas*, para 5.16 (profitability analysis was inconclusive) and *Rolling Stock Leasing market investigation*, para 8.18 (profitability analysis was not practicable).

<sup>203</sup> See the Final Report, paras 8.25–8.26, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

2010<sup>210</sup>. The OFT and CC are working together to speed up market investigation references<sup>211</sup> and share information more effectively<sup>212</sup>.

## 10. Orders and Undertakings Under the Fair Trading Act 1973

The monopoly provisions in the Fair Trading Act 1973<sup>213</sup> were superseded by the market investigation provisions in the Enterprise Act 2002. Over the years the CC (or its predecessors) published a large number of reports dealing with many sectors of the economy and numerous practices. Many of these reports led to the Secretary of State accepting undertakings or, in some cases, making orders designed to remedy any competition problems identified. Despite the repeal of the substantive provisions of the Fair Trading Act some of these undertakings and orders remain in force<sup>214</sup>.

The OFT maintains a *Register of orders and undertakings – market investigations and monopolies* containing details of orders and undertakings made under the Fair Trading Act (and the Enterprise Act): the register is accessible on the OFT's website<sup>215</sup>. The OFT has a continuing obligation to keep these orders and undertakings under review and may give advice to the Secretary of State and the CC as to whether their release, revocation, variation or termination is appropriate. The OFT has agreed a *Memorandum of Understanding* with the CC on undertakings and orders under the Fair Trading Act and Enterprise Act<sup>216</sup>.

The 'undertakings in lieu' under section 159 of the Enterprise Act 2002 in the case of *Postal Franking Machines*<sup>217</sup> followed a review by the OFT of undertakings originally given under the Fair Trading Act. The market investigation references of *Classified Directory Advertising Services* and of *Groceries* followed the review of undertakings that had been given following Fair Trading Act investigations.

<sup>210</sup> *Quantification of CC Actions 2009/10*, para 22, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

3. The Extraterritorial Application of US Competition Law	491	7. The Internationalisation of Competition Law	506
4. The Extraterritorial Application of EU Competition Law	495		

### 1. Introduction

This book so far has described the main provisions, other than those dealing with mergers<sup>1</sup>, of EU and UK competition law, and the way in which those provisions are enforced. This chapter is concerned with an issue of growing importance: the international dimension of competition law.

Dramatic changes have taken place in the world's economies in a remarkably short period of time. State-controlled economies have been exposed to the principles of the market; legal monopolies have been reduced or entirely eliminated; and domestic markets have been increasingly opened up to foreign trade and investment. The World Trade Organization ('the WTO') performs a central role in promoting international trade. These developments present significant challenges for systems of competition law. The economic effects of cartels and anti-competitive behaviour on the part of firms with market power and of mergers are not constrained by national boundaries. It is perfectly possible for a few producers to operate a cartel that has significant effects throughout the world: the OPEC oil cartel is an obvious example of this, although there are both legal and political constraints that prevent competition authorities from tackling this particular organisation<sup>2</sup>. Many of the cartels investigated in recent years by the Department of Justice in the US and the European Commission in Brussels have had a wide geographical

<sup>1</sup> On mergers see chs 20–22.

<sup>2</sup> To the extent that the actors in this cartel are sovereign States as opposed to undertakings, the doctrine of sovereign immunity prevents the application of the EU competition rules: see ch 3, 'Undertakings and Associations of undertakings', pp 83–99 on the meaning of 'undertakings' in Articles 101 and 102; on sovereign immunity in US law see the Foreign Sovereign Immunity Act 1976, 28 USC §§1602–1611 (1988) and the joint Department of Justice and Federal Trade Commission *Antitrust Enforcement Guidelines for International Operations* (April 1995), para 3.31: these *Guidelines* can be accessed on the Department of Justice's website at [www.justice.gov/atr/public/international/index.html](http://www.justice.gov/atr/public/international/index.html); note also the position in the US on foreign sovereign compulsion, *ibid*, para 3.32, and the Act of State doctrine, *ibid*, para 3.33.

reach, the *Vitamins* and *Air Cargo* cartels being good examples of this<sup>3</sup>; non-US citizens responsible for unlawful cartels face the possibility of extradition to and imprisonment in the US. Undertakings such as Microsoft produce products, such as its computer operating system, that are truly global: Microsoft has been the subject of competition law investigations in several jurisdictions, including the US and the EU. International mergers, for example between car manufacturers, aluminium producers or telecommunications companies, may produce effects in a multitude of countries, and may be subject to notification to a large number of different competition authorities<sup>4</sup>. It is now common practice for competition authorities to cooperate closely with one another when they are conducting investigations that have an international dimension<sup>5</sup>.

Until relatively recently the international component of competition law was predominantly concerned with the question of whether one country could apply its competition rules extraterritorially against an undertaking or undertakings in another country, where the latter behave in an anti-competitive manner having adverse effects in the territory of the former; and whether there should be laws (so-called 'blocking statutes') to prevent the 'excessive' assertion of extraterritorial jurisdiction. These issues are considered in sections 2 to 6 of this chapter. However the international dimension of competition law has undoubtedly evolved beyond these somewhat parochial concerns: the challenge today is to find ways in which to encourage cooperation between competition authorities and, so far as possible, foster convergence between competition policies, procedures and substantive analysis. The International Competition Network ('the ICN') was established in 2001 as an international forum for competition authorities to address these issues. The work of the ICN and other international organisations will be discussed briefly in section 7 of this chapter.

## 2. Extraterritoriality: Theory

The limits upon a State's jurisdictional competence – and therefore upon its ability to apply its competition laws to overseas undertakings – are matters of public international law<sup>6</sup>. There are two elements to a State's jurisdictional competence. First, a State has jurisdiction to make laws, that is to say to 'lay down general or individual rules through its legislative, executive or judicial bodies'<sup>7</sup>: this is known variously as a State's legislative, prescriptive or subject-matter jurisdiction. Secondly, a State has jurisdiction to enforce its laws, that is 'the power of a State to give effect to a general rule or an individual decision by means of substantive implementing measures which may include even coercion by the authorities'<sup>8</sup>: this is known as a State's enforcement jurisdiction. It is not necessarily the case that the limits of subject-matter and enforcement jurisdiction should be the same: they do not have to be coextensive. An assertion of subject-matter jurisdiction by one State over natural or legal

<sup>3</sup> See ch 13, 'The European Commission's Approach to Cartels', pp 517–521.

<sup>4</sup> See ch 20, 'The Proliferation of Systems of Merger Control', pp 812–813.

<sup>5</sup> On international cooperation see 'The Internationalisation of Competition Law', pp 506–511 below.

<sup>6</sup> For a general account of the relevant principles of public international law see Brownlie *Principles of Public International Law* (Clarendon Press, 7th ed, 2008), ch XV; see also Mann 'The Doctrine of Jurisdiction in International Law' (1964) 111 RDC 9; Akehurst 'Jurisdiction in International Law' (1972–73) 46 *British Yearbook of International Law* 145; Mann 'The Doctrine of International Jurisdiction Revisited' (1984) 186 RDC 18; Rosenthal and Knighton *National Laws and International Commerce: the Problem of Extraterritoriality* (1982); Lowe *Extraterritorial Jurisdiction* (1983); Olmstead *Extraterritorial Application of Laws and Responses Thereto* (1984).

<sup>7</sup> Per Advocate General Darmon in Cases 114/85 etc *A Ahlström Oy v Commission (Wood Pulp I)* [1988] ECR 5193, p 5217, [1988] 4 CMLR 901, p 923.

<sup>8</sup> *Ibid.*

persons in another may not lead to a conflict at all, provided that the former does not seek to enforce its law in the territory of another State. However when a State goes further and seeks enforcement – for example by serving a claim on a person located in another State or demanding the production of evidence there – the possibility of conflict is obvious. Most of the controversial conflicts between States in these matters have concerned enforcement rather than subject-matter jurisdiction, and it is essentially against enforcement measures that States have adopted blocking statutes<sup>9</sup>. An issue that has arisen in the US is whether it is possible to apply its competition law extraterritorially as a way of gaining access to foreign markets<sup>10</sup>.

### (A) Subject-matter jurisdiction

As far as subject-matter jurisdiction is concerned, it is generally accepted in public international law that a State has power to make laws affecting conduct within its territory (the ‘territoriality principle’) and to regulate the behaviour of its citizens abroad, citizens for this purpose including companies incorporated under its law (the ‘nationality principle’). The territoriality principle has been extended in a logical way so that a State is recognised as having jurisdiction not only where acts originate in its territory (known as ‘subjective territoriality’), but also where the objectionable conduct originates abroad but is completed within its territory (‘objective territoriality’). The classic textbook illustration is of a shot being fired across a national boundary: although part of the conduct happened outside the State, it will have jurisdiction as the harmful event occurred within it. A consequence of this is that more than one State may assert jurisdiction in the same matter where the conduct in question straddles national borders. What is controversial is whether, in the area of economic law, it is legitimate to apply the idea of objective territoriality to the *effects* of an agreement entered into, or an anti-competitive act committed in, another State.

For the purpose of subject-matter jurisdiction the territoriality and nationality principles are sufficient to comprehend a great number of infringements of competition law, either because the overseas undertaking will have committed some act – for example taking over a competitor or charging predatory prices – within the territory of the State concerned to apply its law, or because an agreement will have been made between a foreign undertaking and a firm established within the State in question. Alternatively it may be that an act has been committed within that State by a subsidiary company of an overseas parent. In this case the question arises whether it is legitimate to treat the two companies as being in reality one economic entity, so that the conduct of the subsidiary can be considered to be that of the parent. If so the territoriality principle will suffice to establish jurisdiction over the parent company. The single economic entity doctrine is a significant feature of EU law<sup>11</sup>.

However even the objective territoriality principle and the economic entity theory may not be sufficient to account for all cases in which a State may wish to assume jurisdiction over foreign undertakings. For example if all the producers of widgets in Japan were to agree not to export widgets to the UK, their agreement could obviously produce commercial effects in the UK; however it is hard to see how it can be meaningfully said

<sup>9</sup> See ‘Resistance to Extraterritorial Application of Competition Law’, pp 504–506 below.

<sup>10</sup> See ‘The extraterritorial application of US competition law to gain access to foreign markets’, pp 494–495 below.

<sup>11</sup> See ch 3, ‘The “single economic entity” doctrine’, pp 92–97 and ‘The economic entity doctrine’, pp 495–496 below.

that there is any conduct there. The controversial public international law question is whether a State may assert subject-matter jurisdiction simply on the basis that foreign undertakings produce commercial effects within its territory, even though they are not present there and have not committed any act there. The traditional principles of public international law are inadequate to deal with these issues, since they were developed with physical rather than economic conduct in mind. As a matter of logic, it does not seem absurd to suggest that harmful economic effects as well as physical ones emanating from another State ought in some cases to establish jurisdiction: it is not difficult to see the analogy between a shot being fired across the border of one State into a neighbouring one and a conspiracy by firms in one State to charge fixed and excessive prices or to boycott customers in another one. However some commentators reject the notion of jurisdiction based on effects alone, and the Government of the UK has consistently objected to the idea<sup>12</sup>.

## (B) Enforcement jurisdiction

Enforcement jurisdiction tends to give rise to the most acute conflicts between States<sup>13</sup>. It is generally recognised that even if subject-matter jurisdiction exists in relation to the conduct of someone in another State, it is improper to attempt to enforce the law in question within that State's territory without its permission. For these purposes enforcement does not mean only the exaction of penalties and the making of final orders such as perpetual injunctions, but refers to all authoritative acts such as the service of a summons, a demand for information or carrying out an investigation. Gathering information can be a particular problem for competition authorities: as business becomes increasingly global, the likelihood of a national authority requiring information which is located outside its jurisdiction increases correspondingly. A problem is that jurisdictional rules developed in the nineteenth century are not particularly well suited to the business context or the information technology of the twenty-first century.

Many legal systems contain provisions whereby States assist one another in relation to these matters. For example the Hague Convention on the Taking of Evidence Abroad in Civil or Commercial Matters<sup>14</sup> provides for one State to assist another in the gathering of evidence: this Convention is given effect in UK law by the Evidence (Proceedings in Other Jurisdictions) Act 1975. The recognition and enforcement of foreign judgments is an important part of private international law: most foreign judgments can be enforced in the UK<sup>15</sup>, though not where they are penal<sup>16</sup>. However cooperation on evidence and the enforcement of judgments is often not provided by one State to another where the former takes exception to an attempt by the latter to assert its law extraterritorially, and most legal systems contain restrictions on the divulging by competition authorities of confidential information. Negotiations took place between the UK and the US for relaxation of these rules in so far as this might assist the pursuit of cartels; this led to an extension

<sup>12</sup> See Jennings 'Extraterritorial Jurisdiction and the United States Antitrust Laws' (1957) 33 *British Yearbook of International Law* 146; Higgins 'The Legal Bases of Jurisdiction' in Olmstead *Extraterritorial Application of Laws and Responses Thereto* (1984); Lowe pp 138–186; on the UK's position, see further 'The Extraterritorial Application of UK Competition Law', pp 501–504 below.

<sup>13</sup> See *Brownlie*, pp 310–312.

<sup>14</sup> Cmnd 3991 (1968).

<sup>15</sup> See Dicey, Morris and Collins *The Conflict of Laws* (Sweet & Maxwell, 14th ed, 2010), ch 15 and Cheshire, North and Fawcett *Private International Law* (Oxford University Press, 14th ed, 2008), ch 15.

<sup>16</sup> Treble damage awards in the US are probably penal: *British Airways Board v Laker Airways Ltd* [1984] QB 142 at 163 and, in the Court of Appeal, at 201 see also the Protection of Trading Interests Act 1980, s 5, which introduced a statutory prohibition on the enforcement of awards of multiple damages: 'Resistance to Extraterritorial Application of Competition Law', pp 504–506 below.

of the scope of the UK/US Mutual Assistance Treaty to criminal infringements of competition law<sup>17</sup>; requests for mutual assistance in criminal matters are the responsibility of the Home Office<sup>18</sup>.

Part 9 of the Enterprise Act 2002 consolidates and codifies the powers of the Office of Fair Trading ('the OFT') to disclose information to overseas public authorities for the purpose (among other matters) of civil and criminal competition law investigations. Section 237 of the Act imposes a general restriction on the disclosure of information; however section 243 sets out circumstances in which, subject to conditions<sup>19</sup>, information can be disclosed to an overseas competition authority. Information gathered by the OFT during a merger or market investigation cannot be disclosed<sup>20</sup>, and the Secretary of State has power in certain circumstances to direct that information should not be disclosed<sup>21</sup>.

### 3. The Extraterritorial Application of US Competition Law<sup>22</sup>

#### (A) The *Alcoa* and *Hartford Fire Insurance* cases

As has been mentioned, it is not clear that public international law permits jurisdiction to be taken on the basis of effects alone. However US law has undoubtedly embraced the 'effects doctrine'. In *United States v Aluminum Co of America*<sup>23</sup> (*Alcoa*) Judge Learned Hand said that:

it is settled law... that any State may impose liabilities, even upon persons not within its allegiance, for conduct outside its borders which has consequences within its borders which the State reprehends; and these liabilities other States will ordinarily recognise<sup>24</sup>.

The US courts had not always accepted this view<sup>25</sup>; the statement may not have been necessary to the case<sup>26</sup>; and as formulated the doctrine was extremely wide. However *Alcoa* was of seminal importance and triggered off much controversy between the US and other countries. There was some disagreement between US courts as to whether the effects on US commerce had to be substantial<sup>27</sup>; this was resolved by the Foreign Trade Antitrust Amendment Act 1982, which provides that the Sherman Act 1890<sup>28</sup> does not apply to conduct involving trade or commerce with foreign nations unless such conduct

<sup>17</sup> See *UK/US Mutual Legal Assistance Treaty* Cm 5375 (2001), accessible at [www.fco.gov.uk](http://www.fco.gov.uk); the UK is in negotiation with Australia, Canada and New Zealand with a view to signing memoranda of mutual assistance in respect of competition and consumer protection enforcement: see *The overseas disclosure of information*, OFT consultation paper 507, April 2003, para 4.26.

<sup>18</sup> For further information see the *Mutual Legal Assistance Guidelines: Obtaining assistance in the UK and Overseas* (8th ed, 2010), available at [www.homeoffice.gov.uk](http://www.homeoffice.gov.uk).

<sup>19</sup> See in particular ss 243(6) and 244 of the Enterprise Act 2002.

<sup>20</sup> *Ibid*, s 243(3)(d).

<sup>21</sup> *Ibid*, s 243(4).

<sup>22</sup> See Waller *Competition Policy in the Global Economy* (Institute for Consumer Antitrust Studies: Online Case Book, 2007), ch 1, available at [www.luc.edu/law/academics/special/center/antitrust/online\\_case\\_book](http://www.luc.edu/law/academics/special/center/antitrust/online_case_book).

<sup>23</sup> 148 F 2d 416 (2nd Cir 1945).

<sup>24</sup> *Ibid* at 444.

<sup>25</sup> See eg *American Banana Co v United Fruit Co* 213 US 347 (1909) in which the Supreme Court held that the Sherman Act did not apply to activities outside the US.

<sup>26</sup> It is arguable that there was conduct within the US since one of the firms involved in the alleged conspiracy, Aluminum Ltd of Canada, had its effective business headquarters in New York and was in the same group as the Aluminum Company of America.

<sup>27</sup> See eg *Industrie Siciliana Asfalti, Bitumi, SpA v Exxon Research & Engineering Co* 1977-1 Trade Case (CCH) (SDNY 1977) (no substantial effect required) and *Todhunter-Mitchell & Co Ltd v Anheuser-Busch* 383 F Supp 586 (ED Pa 1974) (requiring proof of a substantial effect).

<sup>28</sup> 15 USC §§ 1-7.

has a ‘direct, substantial and foreseeable effect’ on trade or commerce in the US<sup>29</sup>. The most recent Supreme Court judgment on extraterritoriality is *Hartford Fire Insurance Co v California*<sup>30</sup>, where the Court repeated that jurisdiction could be taken over ‘foreign conduct that was meant to produce and did in fact produce some substantial effect in the United States’. The joint Department of Justice/Federal Trade Commission *Antitrust Enforcement Guidelines for International Operations* (‘the DoJ/FTC *International Guidelines*’) of 1995<sup>31</sup> explain, by reference to a series of illustrative examples, how those enforcement agencies interpret the jurisdictional scope of US antitrust law in the light of these, and other, judgments.

An issue that has recently been litigated is whether a foreign plaintiff can sue for damages in a US court, even though the harm it suffered occurred outside the US. For plaintiffs this is an attractive prospect, given that damages actions are well established in the US, where damages can be trebled, contingency fees can be negotiated with legal advisers and unsuccessful plaintiffs do not have to pay the costs of successful defendants<sup>32</sup>. The question of access to US courts reached the Supreme Court in a case arising from the *Vitamins* cartel, *Hoffmann-la Roche v Empagran SA*<sup>33</sup>. The Court had to consider the application of the Foreign Trade Antitrust Amendment Act 1982, and concluded that, if the plaintiffs had suffered harm not in the US but in Ukraine, Panama, Australia and Ecuador, they could not sue in the US; the Court of Appeals for the District of Columbia subsequently concluded that the foreign plaintiffs could not recover damages in the US<sup>34</sup>. The Court was sensitive to the argument that over-exposure to treble damages claims in the US on the part of non-US plaintiffs might amount to a serious deterrent to members of cartels, for example in Europe or East Asia, making a whistleblowing application to local competition authorities: Germany, Canada and the US enforcement authorities had all submitted *amicus curiae* briefs, pointing out this danger to the Court. However an important feature of the Supreme Court judgment in *Empagran* is that it left open the question of whether the foreign plaintiffs could sue in the US if the foreign injury that they had suffered was inseparable from the domestic harm caused by the cartel to customers in the US<sup>35</sup>. In 2007 the Antitrust Modernization Commission recommended that purchases made outside the US from firms outside the US should not be deemed to give rise to the

<sup>29</sup> 15 USC § 6a.

<sup>30</sup> 509 US 764 (1993); for comment on this case see Roth ‘Jurisdiction, British Public Policy and the US Supreme Court’ (1994) 110 LQR 194; Robertson and Demetriou ‘The Extraterritorial Application of US Antitrust Laws in the US Supreme Court’ (1994) 43 ICLQ 417; also, by the same authors, ‘US Extraterritorial Jurisdiction in Antitrust Matters: Recent Developments’ (1995) 16 ECLR 461; Trenor ‘Jurisdiction and the Extraterritorial Application of Antitrust Laws after *Hartford Fire*’ (1995) 62 University of Chicago Law Review 1582; Waller ‘From the Ashes of *Hartford Fire*: The Unanswered Questions of Comity’ [1998] Fordham Corporate Law Institute (ed Hawk), ch 3; see also *United States v Nippon Paper* 109 F 3d 1 (1st Cir 1997), for comment on which see Reynolds, Sicilian and Wellman ‘The Extraterritorial Application of the US Antitrust Laws to Criminal Conspiracies’ (1998) 19 ECLR 151.

requisite effects under the Foreign Trade Antitrust Amendment Act. This proposal had not been enacted as at 20 June 2011<sup>36</sup>.

## (B) Comity

Some US courts, drawing on the principle of judicial comity, have attempted to apply the effects doctrine in a relatively restrictive way, requiring not only that there should be a direct and substantial effect within the US, but also that the respective interests of the United States in asserting jurisdiction and of other States which might be offended by such assertion should be weighed against one another<sup>37</sup>. The origins of this approach can be traced back to Brewster's *Antitrust and American Business Abroad* in 1958 in which he called for a 'jurisdictional rule of reason'. The DoJ/FTC *International Guidelines* set out various factors relevant to comity analysis, including the relative significance to the alleged violation of conduct within the US, as compared to conduct abroad; the nationality of the persons involved or affected by the conduct; the presence or absence of an intention to affect US consumers, markets or exporters; and the relative significance and foreseeability of the effects on the US compared to the effects abroad<sup>38</sup>. Dealing with the problem of conflicts of jurisdiction by resort to the criterion of reasonableness has its critics, not least because a court hardly seems an appropriate forum in which to carry out such a delicate balancing process<sup>39</sup>. The principle of comity, however, is an important one which has been recognised in the EU by the General Court in *Gencor v Commission*<sup>40</sup> and in the dedicated cooperation agreements that the EU has entered into with the US, Canada, Japan and South Korea<sup>41</sup>.

## (C) Extraterritorial application of US antitrust law

The competition authorities in the US have had little compunction about enforcing their antitrust laws against overseas companies and have sometimes demanded, for example, that commercial documents located abroad should be handed over; the courts have even issued final orders requiring that foreign companies should change their commercial practices or restructure their industry<sup>42</sup>. An example of extraterritorial action in the US in relation to a foreign merger arose in the case of *Institut Mérieux*<sup>43</sup>, where the Federal Trade Commission took action in respect of the acquisition by Institut Mérieux, a

<sup>36</sup> See Recommendation 42 of the Antitrust Modernisation Commission *Report and Recommendations* (April 2007), available at [govinfo.library.unt.edu/amc](http://govinfo.library.unt.edu/amc); on international antitrust enforcement more generally see chapter II.D of the Report.

<sup>43</sup> 55 Fed Reg 1614 (1990).

French company, of Connaught BioSciences, a Canadian company, because of perceived detriments to competition in the US in the market for anti-rabies vaccines<sup>44</sup>.

The International Antitrust Enforcement Assistance Act 1994<sup>45</sup> is intended to improve the ability of the US enforcement agencies to obtain evidence located abroad by providing for reciprocal agreements to be entered between the US and other countries to facilitate the exchange of information, including confidential information. The US entered into an 'Antitrust Mutual Assistance Agreement' with Australia in 1999<sup>46</sup>. It is relevant also to note that certain violations of US antitrust law are criminal offences, and that it is possible for individuals to be sentenced to terms of imprisonment. There have been recent examples of foreign executives being required to serve terms of imprisonment in the US for violations of the antitrust rules<sup>47</sup>.

### (D) The extraterritorial application of US competition law to gain access to foreign markets

The antitrust laws in the US are applied not only to extraterritorial behaviour that affects imports into the US. Jurisdiction may also be asserted where US companies are obstructed by anti-competitive behaviour in their attempts to gain access to foreign markets. The so-called 'Structural Impediments Initiative'<sup>48</sup> in the US identified the lax enforcement of the Japanese Anti-Monopoly Act against Japanese undertakings as a contributing factor to the difficulties of US firms in expanding into Japanese markets; the Japanese Large Scale Retail Stores Act was considered to be an additional obstacle to would-be importers. The Department of Justice threatened to apply the US antitrust rules against Japanese restrictive practices having the effect of excluding US exporters from Japanese markets<sup>49</sup>. Subsequently the Japanese Government substantially increased the penalties that can be imposed for infringement of the Japanese legislation<sup>50</sup>. The first case in which the US challenged conduct abroad that denied foreign access was *US v Pilkington*<sup>51</sup>: the case was settled through a consent decree whereby Pilkington agreed not to enforce certain

provisions in technology licences against US firms. The competition authorities in the US may also take action against foreign cartels that have no effect within the US, but that raise prices in relation to transactions where the US Government contributes more than half the funding<sup>52</sup>.

#### 4. The Extraterritorial Application of EU Competition Law<sup>53</sup>

Many non-EU undertakings have been held to have infringed the EU competition rules. The Court of Justice has not yet ruled specifically whether there is an effects doctrine under EU law, since it has always been possible in cases under Articles 101 and 102 to base jurisdiction on some other ground, such as the economic entity doctrine or the fact that an agreement entered into outside the European Union was implemented within it. In both the *Dyestuffs*<sup>54</sup> and *Wood Pulp*<sup>55</sup> cases the question of whether EU law should recognise the effects doctrine was argued at length, but the Court of Justice was able to avoid a pronouncement upon the issue since jurisdiction could be taken on other bases. The EU Merger Regulation ('the EUMR') has often been applied to mergers outside the EU; the General Court has given an important judgment on the territorial application of the EUMR in *Gencor v Commission*<sup>56</sup>, but again without explicitly adopting the effects doctrine<sup>57</sup>. This section will deal with subject-matter and enforcement jurisdiction under Articles 101 and 102, and will then discuss the position under the EUMR.

##### (A) Subject-matter jurisdiction

Articles 101 and 102 apply only to the extent that an agreement or abuse has an appreciable effect upon inter-state trade. However there is no reason in principle why, for example, conduct by a US firm might not satisfy this test, particularly given the liberal way in which it has been applied<sup>58</sup>. In *Javico v Yves St Laurent*<sup>59</sup> the Court of Justice held that it was possible that an export ban imposed upon distributors in the Ukraine and Russia could infringe Article 101(1).

##### (i) The economic entity doctrine

In the *Dyestuffs* case<sup>60</sup> the Court of Justice developed the single economic entity doctrine. The Court came to the conclusion that Geigy, Sandoz and ICI, three non-EU undertakings, had participated in illegal price fixing within the EU through the medium of subsidiary companies located in the EU but under the control of non-EU parents. The Court was willing to go beyond the legal façade of the separate legal personalities of the parent and subsidiary companies, and to say that in reality each parent and subsidiary

<sup>52</sup> See the DoJ's Press Release of 18 August 2000 in relation to a construction cartel in Egypt.

<sup>59</sup> Case C-306/96 [1998] ECR I-1983, [1998] 5 CMLR 172.

<sup>60</sup> See ch 12 n 54 above.

formed one economic entity. This approach was criticised, not only because of the refusal to respect the independent legal personalities of the companies concerned, but also because the Court seemed prepared to hold that a parent controlled its subsidiary on limited evidence<sup>61</sup>; however the single economic entity doctrine is now undoubtedly a part of EU competition law. The EU Courts and the Commission have relied on the economic entity approach on a number of subsequent occasions, both in the subject-matter and enforcement jurisdiction contexts<sup>62</sup>. The crucial issue is whether the parent exercises decisive influence over the conduct of its subsidiary, for which purpose the size of the shareholding, the representation on the board of directors of the subsidiary, the ability to influence the latter's affairs and actual evidence of attempts to do so will all be relevant<sup>63</sup>. A consequence of the economic entity doctrine is that a claimant may be able to bring an action in the English courts against a UK subsidiary of a foreign parent that participated in an agreement contrary to Article 101 TFEU<sup>64</sup>.

### (ii) Does EU law recognise the effects doctrine?

Many of the Commission's decisions have involved and been addressed to non-EU undertakings<sup>65</sup>, but in every case the non-EU firm, either itself or through a subsidiary company<sup>66</sup>, entered into an agreement with an EU undertaking<sup>67</sup> or committed some act within the EU. In other words jurisdiction in these cases did not depend upon the existence in EU law of an effects doctrine, since it could be explained in more orthodox ways. The Commission has quite often asserted that EU law does indeed recognise the effects doctrine<sup>68</sup>, and this belief was supported by Advocate General Mayras in the *Dyestuffs* case<sup>69</sup> and by Advocate General Darmon in *Wood Pulp*<sup>70</sup>; other Advocates General have also appeared to support this view<sup>71</sup>. However there has been no definitive statement from the Court of Justice on this issue.

### (iii) The Court of Justice's judgment in *Wood Pulp*

Against this background the appeal to the Court of Justice against the Commission's decision in *Wood Pulp*<sup>72</sup> was eagerly awaited. The Commission, in finding that there was a concerted practice between undertakings in several non-EU countries, had held that

<sup>61</sup> On *Dyestuffs* see Mann 'The Dyestuffs Case in the Court of Justice of the European Communities' (1973) 22 ICLQ 35; Acevedo 'The EC Dyestuffs Case: Territorial Jurisdiction' (1973) 36 MLR 317.

<sup>62</sup> The doctrine may be used to overcome any perceived difficulty in sending a decision to a company in a non-EU State by serving it instead on the EU subsidiary.

<sup>69</sup> Cases 48/69 etc [1972] ECR 619, pp 687–694, [1972] CMLR 557, pp 593–609.

<sup>70</sup> Cases 114/85 etc *A Ahlström Oy v Commission* [1988] ECR 5193, p 5227, [1988] 4 CMLR 901, p 932.

<sup>71</sup> See eg Advocate General Roemer in Case 6/72 *Continental Can v Commission* [1973] ECR 215, [1972] CMLR 690; Advocate General Warner in Cases 6 and 7/73 *Commercial Solvents v Commission* [1974] ECR 223, [1974] 1 CMLR 309.

<sup>72</sup> OJ [1985] L 85/1, [1985] 3 CMLR 474.

jurisdiction could be based on the effects of the concerted practice in the EU. However the Court of Justice, no doubt keen to avoid the adoption of this controversial doctrine if possible, concluded that the case could be settled by reference to conventional public international law criteria. It held<sup>73</sup> that, on the facts of the case, the agreement had been *implemented* within the EU; it was immaterial for this purpose whether this implementation was effected by subsidiaries, agents, sub-agents or branches within the EU. Since the agreement was implemented within the EU, it was unnecessary to have recourse to the effects doctrine: the universally recognised territoriality principle was sufficient to deal with the matter. The Commission expressly cited the *Wood Pulp* judgment in *Amino Acids*, where it imposed fines on a cartel including US, Japanese and Korean companies<sup>74</sup>. The Court of Justice in *Wood Pulp* did not comment on what the position would have been if the agreement had been formed *and implemented* outside the EU, but had produced economic effects within it; an example would be a collective boycott by members of a non-EU cartel, whereby they refuse to supply customers within the EU: could one argue in such circumstances that this agreement is ‘implemented’ within the EU by the refusal to supply there? Linguistically this seems hard to sustain; however there is no doubt in this situation that the *effects* of the agreement would be felt within the EU. This issue is unresolved<sup>75</sup>. However there will be relatively few cases in which the pure effects doctrine is crucial in jurisdictional terms: in most cases the economic entity doctrine or the reasoning of the Court of Justice in *Wood Pulp* will be sufficient to establish jurisdiction. In its decision on *Gas Insulated Switchgear*<sup>76</sup> the Commission imposed fines of €750 million on a number of European and Japanese undertakings for bid-rigging and related practices in relation to switchgear: in essence, the European undertakings would stay out of the Asian market and the Japanese undertakings would not operate in Europe. The Commission reached the conclusion that Article 101(1) was infringed without resorting to the effects doctrine.

## (B) Enforcement jurisdiction

### (i) Initiating proceedings

Where proceedings are started by the Commission under Article 101 or 102, Article 2(2) of Regulation 773/2004<sup>77</sup> requires that the undertakings concerned must be informed. If the undertaking cannot be served within the EU, the question arises whether a statement of objections may be sent to it abroad. As suggested above this could be considered to contravene public international law, since it amounts to an enforcement of one State’s law in the territory of another<sup>78</sup>. However the Court of Justice has rejected the notion

<sup>73</sup> Cases 114/85 etc *Ahlström Oy v Commission* [1988] ECR 5193, [1988] 4 CMLR 901, paras 11–23; for comment see Ferry ‘Towards Completing the Charm: the *Wood Pulp* Judgment’ (1989) 11 EIPR 19; Mann ‘The Public International Law of Restrictive Trade Practices in the European Court of Justice’ (1989) 38 ICLQ 375; Lowe ‘International Law and the Effects Doctrine in the European Court of Justice’ (1989) 48 CLJ 9; Christoforou and Rockwell ‘EC Law: the Territorial Scope of Application of EC Antitrust Law – the *Wood Pulp* Judgment’ (1989) 30 Harvard International Law Journal 195; Lange and Sandage ‘The *Wood Pulp* Decision and its Implications for the Scope of EC Competition Law’ (1989) 26 CML Rev 137; Van Gerven ‘EC Jurisdiction in Antitrust Matters: the *Wood Pulp* Judgment’ [1989] Fordham Corporate Law Institute (ed Hawk), ch 21.

<sup>74</sup> OJ [2001] L 152/24, [2001] 5 CMLR 322, para 182.

<sup>75</sup> The Commission’s *Guidelines on the effect on trade concept contained in Articles [101 and 102 TFEU]* OJ [2004] C 101/81, cite the *Gencor* case, discussed under the EUMR below, as authority for the effects doctrine, but this is a questionable interpretation of that judgment.

<sup>76</sup> Commission decision of 24 January 2007.

<sup>77</sup> OJ [2004] L 123/18.

<sup>78</sup> The *initiation* of proceedings is unlikely to be an issue of enforcement, as it is not in itself a coercive act.

that service without the consent of the foreign State is invalid and vitiates the proceedings. Provided that the non-EU undertaking has received the statement of objections in circumstances which enabled it to take cognisance of the case against it, the service is valid. In *Geigy v Commission*<sup>79</sup> the Commission sent its statement of objections to Geigy's Swiss offices. Geigy returned it, acting on instructions from the Swiss authorities, claiming that the service was unlawful both under internal and public international law. The Court of Justice rejected this. It is sufficient for EU law purposes, therefore, for the Commission to send a registered letter to the non-EU undertaking concerned.

## (ii) Information and investigations

The Court of Justice has not been called upon to consider the extent to which the Commission may require information from or conduct investigations of undertakings abroad under Articles 18 and 20 respectively of Regulation 1/2003<sup>80</sup>. There would seem to be little objection to the Commission simply asking for information under Article 18(2), there being no compulsion to comply with such a request; in practice the Commission does send Article 18(2) requests to non-EU undertakings. It is less certain whether the Commission can make a demand for information under Article 18(3) of the Regulation, and the better view is that this is not possible.

It is inconceivable that Article 20 entitles the Commission to carry out an investigation abroad unless it has the authority of the State concerned. However the fact that the Commission intends to investigate a trade association within the EU which represents non-EU undertakings does not entitle that association to refuse to submit to the investigation<sup>81</sup>; and if the Commission carries out an investigation in a new Member State of the EU and discovers information relating to infringements carried out by undertakings prior to that State's accession to the EU, the Commission is entitled to take that information into account<sup>82</sup>. The Commission will not be sympathetic to the argument that a non-EU undertaking is unable to provide it with information because of some constraint imposed upon it by its domestic law<sup>83</sup>.

## (iii) Final decisions

Two problems arise in relation to the adoption of final decisions. First, there is the problem of whether a final decision, for example finding an infringement of the competition rules and imposing penalties, may be served on non-EU undertakings. This is more an act of enforcement than merely serving a statement of objections, and so is more open to objection in terms of public international law. For this reason the Commission will often look to serve the decision on a subsidiary within the EU, as it did in the *Dyestuffs* cases, or seek the assistance of the foreign State concerned<sup>84</sup>. However the Court of Justice has held

<sup>79</sup> See Case 52/69 [1972] ECR 787, [1972] CMLR 557 (one of the *Dyestuffs* cases).

<sup>80</sup> OJ [2003] L 1/1, [2003] 4 CMLR 551: on the conduct of Commission investigations see ch 7, 'Chapter V: powers of investigation', pp 267–275; in Case 27/76 *United Brands Continental BV v Commission* [1978] ECR 207, [1978] 1 CMLR 429 the Court of Justice suggested at one point that the Commission might have obtained some information which it needed from United Brands; however United Brands had subsidiaries within the EU, so that it cannot be deduced from this remark that the Court was advocating extraterritorial requests for information under Article 11(3) of Regulation 17, the predecessor of Regulation 1/2003.

<sup>81</sup> *Ukwal* OJ [1992] L 121/45 [1993] 5 CMLR 632.

<sup>82</sup> Cases 97–99/87 *Dow Chemical Ibérica SA v Commission* [1989] ECR 3165, [1991] 4 CMLR 410, paras 61–65; this has been an issue in the course of a Commission investigation of Slovak Telekom's behaviour under Article 102: Case T-458/09 and Case T-171/10 *Slovak Telekom v Commission*, not yet decided.

<sup>83</sup> See *Centraal Stikstof Verkoopkantoor (CSV)* OJ [1976] L 192/27.

<sup>84</sup> In the *Dyestuffs* cases the Commission tried in the first place to serve the final decision on the non-EU undertakings by using diplomatic channels; only when this failed did it serve the EU subsidiaries.

that service direct upon the non-EU undertaking is valid provided that, as in the case of a statement of objections, it reaches the undertaking and enables it to take cognisance of it; it is no defence that the undertaking received the decision and sent it back without reading it<sup>85</sup>.

The second problem is whether it is possible for the final decision to include orders against and impose penalties upon a non-EU undertaking. It is clear that the Court of Justice does not object to orders being made against foreign undertakings<sup>86</sup>, although it is recognised by both the Commission and the EU Courts that it would not be possible actually to enforce the order in the territory of a foreign State. It would, however, be possible to seize any assets that were present within the EU.

## (C) EU Merger Regulation

### (i) The jurisdictional criteria in the EUMR

Under Article 1(2) of the EUMR<sup>87</sup> concentrations that have a Community dimension must be pre-notified to the Commission in Brussels. Concentrations have a Community dimension where the combined turnover of the undertakings involved exceeds €5,000 million worldwide, provided that at least two of the undertakings have a turnover within the EU of at least €250 million and that their business is not primarily within one and the same Member State<sup>88</sup>; Article 1(3) of the EUMR contains an alternative set of jurisdictional criteria in an attempt to deal with the problem of multiple notification to Member States. The jurisdictional criteria in the EUMR clearly mean that concentrations involving undertakings which conduct a substantial proportion of their business outside the EU, or which involve transactions far removed physically from the EU, may, nevertheless, have a Community dimension. Countless numbers of concentrations that have little or no effect within the EU have to be notified because of the way in which the thresholds in the EUMR operate. For example a joint venture between two substantial undertakings that brings about a merger of their widget businesses in Thailand could be notifiable under the EUMR, even though the joint venture will have no presence or effect on the EU market, if the parents exceed the turnover thresholds in Article 1. Cases such as this may, however, benefit from the simplified procedure used for the speedy disposal of some notifications under the EUMR<sup>89</sup>.

<sup>85</sup> See Case 6/72 *Europemballage and Continental Can v Commission* [1973] ECR 215, [1973] CMLR 199.

<sup>86</sup> See eg Cases 6 and 7/73 *Istituto Chemioterapico Italiano Spa and Commercial Solvents Corp v Commission* [1974] ECR 223, [1974] 1 CMLR 309 where the Court of Justice upheld the Commission's order that supplies to Zoja be resumed; this would clearly affect CSC in the US; see also *Warner-Lambert/Gillette* OJ [1993] L 116/21, [1993] 5 CMLR 559, where the Commission ordered Gillette, a US company, to reassign trade marks in third countries to Eemland Holdings NV in order to remove distortions of competition within the EU; the decision was not appealed.

<sup>87</sup> See ch 21 for a general discussion of this Regulation.

<sup>88</sup> The thresholds are considered in detail in ch 21, 'Article 1: concentrations having a Community dimension', pp 839–844.

<sup>89</sup> See the Commission's *Notice on a simplified procedure for treatment of certain concentrations under Council Regulation (EC) No 139/2004* OJ [2005] C 56/04; this procedure is explained briefly in ch 21, 'Notifications', p 857; for discussion generally of the application of the EUMR to non-EU concentrations see Ezrachi 'Limitations on the Extraterritorial Reach of the European Merger Regulation' (2001) 22 ECLR 137.

(ii) **Gencor v Commission**

In *Gencor/Lonrho*<sup>90</sup> the Commission prohibited a merger between two South African undertakings on the basis that it would have created a dominant duopoly (collective dominance) in the platinum and rhodium markets, as a result of which effective competition would be significantly impeded in the common market. Gencor appealed to the General Court, *inter alia* on the ground that the Commission did not have jurisdiction under the EUMR to prohibit activities in South Africa which, furthermore, the Government there had approved. In *Gencor v Commission*<sup>91</sup> the General Court upheld the Commission's decision, and reviewed at some length the jurisdictional position<sup>92</sup>. The Court's findings on jurisdiction were divided into two parts, first an assessment of the territorial scope of the EUMR<sup>93</sup> and second a consideration of the compatibility of the Commission's decision with public international law<sup>94</sup>. As to the former, the General Court noted that the parties to the merger exceeded the turnover thresholds in Article 1(2) of the EUMR. It acknowledged that recital 11 of the Regulation required that the parties should have substantial operations in the EU, but stated that these operations could as well consist of sales as production. The Court added that the *Wood Pulp* judgment, requiring 'implementation' within the EU, did not contradict the Commission's assertion of jurisdiction in this case: indeed the requirement in Article 1(2) of the EUMR, that the parties should have turnover in excess of €250 million within the Community, was consistent with the *Wood Pulp* judgment, since it meant that they must have acted in some way on the EU market.

On the issue of public international law, the General Court said that application of the EUMR is justified under public international law where it is foreseeable that a proposed concentration will have an immediate and substantial effect in the EU<sup>95</sup>. The Court's view was that these criteria were satisfied, but went on to consider whether the exercise of jurisdiction in this case 'violated a principle of non-interference or the principle of proportionality'<sup>96</sup>: in other words it acknowledged that comity analysis should be undertaken when applying the EUMR. The Court's view was that neither principle was violated, so that there was no jurisdictional objection to the Commission's decision.

Clearly this judgment is of considerable significance. It will be noted that the General Court did not adopt an effects doctrine as a matter of EU law, since it determined the Commission's subject-matter jurisdiction on the basis of the turnover thresholds in the EUMR and equated them to the 'implementation doctrine' in *Wood Pulp*; rather the General Court considered the effects of the merger, and the possible comity objections to jurisdiction, as a matter of public international law. As in the case of the Court of Justice's judgments in *Dyestuffs* and *Wood Pulp*, the General Court avoided the adoption of the effects doctrine. In practice, of course, the Commission could have great problems in enforcing a prohibition decision against non-EU undertakings which are unwilling to cooperate and which are protected by their national Governments. However the Commission works very closely with the competition authorities in other jurisdictions, and in particular with the Department of Justice and the Federal Trade Commission in the US, in order to try to prevent serious conflicts breaking out<sup>97</sup>.

<sup>97</sup> See further 'The EU's dedicated cooperation agreements on competition policy', p 509 below.

## 5. The Extraterritorial Application of UK Competition Law

The view has always been taken in the UK that jurisdiction cannot be based simply upon commercial effects, but that the territoriality and nationality principles alone are applicable in this area. This is clearly stated in the Aide-Memoire which the UK Government submitted to the Court of Justice following the Commission's decision in *Dyestuffs*<sup>98</sup>, and is further illustrated by the Protection of Trading Interests Act 1980 which is considered later in this chapter. The submissions of the UK Government in the *Wood Pulp* case maintained its traditional hostility to the effects doctrine. The domestic competition statutes do not always deal explicitly with jurisdictional issues, but, even where they do not do so, in practice they are not applied extraterritorially on the basis of effects.

### (A) Competition Act 1998

#### (i) Chapter I prohibition

The Chapter I prohibition in the Competition Act 1998 has been discussed in chapter 9<sup>99</sup>. On the issue of jurisdiction section 2(1), which contains the Chapter I prohibition, provides that an agreement will be caught only where it may affect trade and competition within the UK. This in itself does not answer the jurisdictional issue of whether the Act is applicable to undertakings that are located outside the UK. The answer to this question is given by section 2(3), which provides that:

Subsection (1) applies only if the agreement, decision or practice is, or is intended to be, implemented in the UK.

Section 2(3) is specifically intended to give legislative effect in the UK to the 'implementation doctrine' espoused by the Court of Justice in the *Wood Pulp* case<sup>100</sup>. This is a sensible resolution on the part of the Government: as already mentioned, the *Wood Pulp* doctrine falls short of being an 'effects doctrine', with the result that section 2(3) does not amount to a reversal of the traditional attitude of the UK described above. At the same time, the Competition Act is able to adopt a position in relation to jurisdiction which is consistent with EU law as set out in *Wood Pulp*. It follows that agreements implemented in the UK by non-UK undertakings would be caught by the Chapter I prohibition, provided that they meet all the other requirements of that prohibition. What would be interesting in the future would be a situation in which the Court of Justice extends the jurisdictional reach of the EU competition rules to include an effects doctrine. In such a situation the basic rule in section 60(2) of the Competition Act, that there should be no inconsistency between interpretation of the UK legislation and the principles laid down in the Treaty and by the EU Courts, would suggest that the UK should adopt the effects doctrine. However section 60(1) specifically provides that consistency must be achieved, 'having regard to any relevant differences between the provisions concerned'<sup>101</sup>. Presumably this would be a situation in which the explicit wording of section 2(3) would indicate a 'relevant differ-

<sup>98</sup> Cases 48/69 etc *ICILtd v Commission* [1972] ECR 619, [1972] CMLR 557. The Aide-Memoire is produced in full in *Lowe* pp 144–147; details are given there of various diplomatic exchanges between the US and UK Governments on jurisdictional conflicts and other expressions of the UK's views at pp 147–186; see also the UK Government's Amicus Curiae brief in *Washington Public Power Supply System v Western Nuclear Inc* [1983] ECC 261.

<sup>99</sup> See ch 9, 'The Chapter I Prohibition', pp 333–360.

<sup>101</sup> See ch 9, "Governing Principles Clause": Section 60 of the Competition Act 1998', pp 369–374.

ence' between the Competition Act and the new case law of the EU Courts, with the consequence that the UK competition authorities and courts would not be required under the Act to adopt the effects doctrine. An intriguing twist, following Regulation 1/2003, would arise if the OFT was investigating a case in which Article 101 (or Article 102) was involved: presumably then it would be required to apply EU law, including any newly-embraced effects doctrine.

The OFT's guidelines on the Competition Act are silent on the issue of extraterritoriality, which perhaps is itself indicative of the delicate and complex nature of this issue.

## (ii) Chapter II prohibition

The Chapter II prohibition has also been discussed in chapter 9<sup>102</sup>. There is no mention of extraterritorial application in section 18, which sets out the Chapter II prohibition, and in particular there is no equivalent of section 2(3) which limits the ambit of the Chapter I prohibition to agreements that are implemented in the UK. Section 18(3) does require that the dominant position must be within the UK. In the debate during the passage of the Bill Lord Simon explained that this would not be the case if the market in which the dominant position is held was entirely outside the UK; however there could be a case in which the dominant position extends beyond the UK, provided that it includes some part of the UK territory<sup>103</sup>.

An interesting question is whether the Chapter II prohibition would apply in a case where the dominant position is (wholly or partly) within the UK but the abuse occurs in a related market outside the UK, or its effects are felt entirely outside the UK (for example a refusal by a UK company to supply an overseas customer). Here the requirement that trade must be affected within the UK would come into play and determine whether the prohibition applies.

In *Aberdeen Journals v OFT*<sup>104</sup> the CAT held that the requirement of an effect on trade within the UK is not subject to a requirement of appreciability<sup>105</sup>, although the correctness of this conclusion has been doubted in subsequent cases<sup>106</sup>.

## (B) Enterprise Act 2002

### (i) Market investigations<sup>107</sup>

As far as subject-matter jurisdiction is concerned, the OFT (or sectoral regulator) may make a market investigation reference to the Competition Commission ('the CC') where it has reasonable grounds for suspecting that one or more features of a market in the United Kingdom for goods or services prevent, restrict or distort competition there or in a part of it. Section 131(6) provides that a 'market in the United Kingdom' includes a market which operates there and in another country or territory or in a part of another country or territory ('supra-national markets')<sup>108</sup> and any market which operates only in a part of the United Kingdom ('sub-national markets')<sup>109</sup>. Where the geographical market is wider than the UK, the reference to the CC would be concerned only with the UK part

<sup>102</sup> See ch 9, 'The Chapter II Prohibition', pp 360–369.

<sup>103</sup> HL Third Reading, 5 March 1998, col 1336 (Lord Simon of Highbury).

<sup>104</sup> Case No 1009/1/1/02 [2003] CAT 11, [2003] CompAR 67.

<sup>105</sup> *Ibid*, paras 459–461: see ch 9, 'Applicable law and territorial scope', p 345.

<sup>106</sup> See ch 9, 'Having regard to any relevant differences', pp 370–371.

<sup>107</sup> The market investigation provisions of the Enterprise Act 2002 are described in ch 11.

<sup>108</sup> Enterprise Act 2002, s 131(6)(a).

<sup>109</sup> *Ibid*, s 131(6)(b).

of it<sup>110</sup>. In determining whether to exercise its discretion to make a reference, the OFT will consider whether an effective remedy might be available to cure any competition problems: where the relevant market is global, or at least much wider than the UK, it may be that a remedy that applied only to the UK would have little discernible impact on the competition problem there, in which case a reference would not be made<sup>111</sup>.

As far as enforcement jurisdiction is concerned, the OFT has power to obtain information under section 174 of the Enterprise Act 2002, and the CC has power to do so under section 176<sup>112</sup>. The Act is silent on the territorial scope of these provisions, as is the guidance issued by each of these bodies on market investigations<sup>113</sup>. It is thought to be unlikely that either the OFT or the CC would seek to exercise these powers against persons or undertakings with no presence in the UK. As far as remedies are concerned, sections 154 to 161 set out a number of possibilities, ranging from the acceptance by the OFT of undertakings in lieu of a reference to the making by the CC of final orders, using the powers provided by Schedule 8 to the Act. Again, the Act is silent as to the territorial scope of these powers, but it is assumed that they are not available extraterritorially<sup>114</sup>.

## (ii) Mergers<sup>115</sup>

As far as subject-matter jurisdiction is concerned, sections 22(1) and 33(1) of the Enterprise Act provide that merger references may be made to the CC where a relevant merger situation has been or would be created, and where that situation has resulted or would result in 'a substantial lessening of competition within any market or markets in the United Kingdom for goods or services'. As in the case of market investigations, section 22(6) provides that a 'market in the United Kingdom' includes supra-national<sup>116</sup> and sub-national markets<sup>117</sup>. Further jurisdictional requirements for the application of domestic merger control are that the value of the turnover of the enterprise being acquired amounts to more than £70 million in the UK<sup>118</sup> or that the 25 per cent 'share of supply' test is satisfied in the UK or in a substantial part of it<sup>119</sup>. The OFT's *Jurisdictional and procedural guidance* states that these requirements apply equally to non-UK companies that sell to (or acquire from) UK customers or suppliers<sup>120</sup>.

As far as enforcement jurisdiction is concerned, section 31 of the Enterprise Act gives the OFT the power to obtain information in relation to completed mergers and the CC has investigatory powers under section 109. The Act is silent on the extraterritorial application of these provisions and, as in the case of market investigations, it is thought that they would not be used against persons or undertakings with no presence in the UK. The remedies available in merger cases are set out in sections 71 to 95 of the Act. Section 86(1) of the Act provides that an enforcement order may extend to a person's conduct outside the United Kingdom if (and only if) he is a UK national, a body incorporated under UK law or a person carrying on business within the UK; a similar limitation is found in relation to restrictions on share dealings<sup>121</sup>.

<sup>110</sup> *Market investigation references: Guidance about the making of references under Part 4 of the Enterprise Act*, OFT 511, March 2006, para 4.11.

<sup>111</sup> *Ibid*, para 2.30.

<sup>112</sup> See ch 11, 'Powers of investigation', p 477.

<sup>113</sup> *Market investigation references: Guidance about the making of references under Part 4 of the Enterprise Act*, OFT 511, March 2006; *Market Investigation References: Competition Commission Guidelines*, CC 3, June 2003.

<sup>114</sup> OFT 511, March 2006, para 2.30, seems to make this assumption.

<sup>115</sup> The merger provisions of the Enterprise Act 2002 are described in ch 22.

<sup>116</sup> Enterprise Act 2002, s 22(6)(a).

<sup>117</sup> *Ibid*, s 22(6)(b).

<sup>118</sup> *Ibid*, s 23(1).

<sup>119</sup> *Ibid*, s 23(2)–(4).

<sup>120</sup> OFT 527, June 2009, para 3.4.

<sup>121</sup> Enterprise Act 2002, ss 77(7) and 78(5).

### (iii) The cartel offence

The cartel offence in section 188 of the Enterprise Act is committed only where the agreement is implemented in whole or in part in the UK<sup>122</sup>. Subject to that, individuals guilty of the cartel offence would be liable to a fine and/or imprisonment, irrespective of their domicile or place of residence. An important additional point is that the Extradition Act 2003 makes provision for the possibility of extradition from or to the UK<sup>123</sup>.

## 6. Resistance to Extraterritorial Application of Competition Law

### (A) Introduction

The *Alcoa*<sup>124</sup> case triggered off a number of battles between the US and other States which objected to the extraterritorial application of US antitrust laws<sup>125</sup>. Apart from diplomatic protests, several countries have passed ‘blocking statutes’, whereby they attempt to thwart excessive assumptions of jurisdiction<sup>126</sup>. There are no provisions in EU law which have this effect: instead this is essentially a matter for the Governments of individual Member States. The UK has taken a consistently hostile view of US practice, which culminated in the Protection of Trading Interests Act 1980<sup>127</sup>.

The earliest attempt made by the UK Government to prevent the extraterritorial application of US law came in 1952<sup>128</sup>; thereafter it secured the passage of the Shipping Contracts and Commercial Documents Act 1964, the provisions of which were used on several occasions to prevent disclosure of information to US authorities<sup>129</sup>. The courts in the UK have also objected to US practice. In *British Nylon Spinners v ICI*<sup>130</sup> the Court of Appeal ordered ICI not to comply with a court order in the US, requiring it to reassign certain patents to Du Pont; the US court considered that the parties were dividing the market horizontally. In *Rio Tinto Zinc v Westinghouse Electric Corp*<sup>131</sup> the House of Lords declined to assist in the process of discovery in a US court, investigating an alleged uranium cartel, where it considered that the information so acquired would subsequently be used for an improper assertion of extraterritorial jurisdiction. The UK courts are obliged by the Evidence (Proceedings in Other Jurisdictions) Act 1975 to assist

<sup>122</sup> (Enterprise Act 2002, s 190(3); see ch 10, ‘The cartel offence’, pp 425–434.

<sup>123</sup> See ch 10, ‘Extradition’, p 433; note that in *Norris v Government of the USA* [2008] UKHL 16, [2008] 1 AC 920, the House of Lords concluded that ‘mere’ price fixing did not amount to criminal conspiracy to defraud at common law, with the result that he could not be extradited on that basis (his alleged infringement predated the entry into force of the provisions of the Enterprise Act); note also that Mr Norris was extradited for a different reason – that he had obstructed the course of justice – and that for this he was sentenced in the US to a term of 18 months in jail: see Department of Justice Press Release of 10 December 2010, available at [www.justice.gov/atr/index.html](http://www.justice.gov/atr/index.html).

<sup>124</sup> See ‘The *Alcoa* and *Hartford Fire Insurance* cases’, pp 491–493 above.

<sup>125</sup> See Griffin ‘Foreign Governmental Reactions to US Assertions of Extraterritorial Jurisdiction’ (1998) 19 ECLR 64, and the references in n 1 thereof.

<sup>126</sup> See *Lowe*, pp 79ff where he lists the many blocking statutes that have been passed; further blocking statutes have been passed since then.

<sup>127</sup> For similar statutes in Australia and Canada see respectively the Foreign Antitrust Judgment (Restriction of Enforcement) Act 1979 and the Foreign Extraterritorial Measures Act 1985.

<sup>128</sup> See *Lowe*, pp 138–139.

<sup>129</sup> *Ibid*, pp 139–143.

<sup>130</sup> [1955] Ch 37, [1954] 3 All ER 88 and [1953] Ch 19, [1952] 2 All ER 780.

<sup>131</sup> [1978] AC 547, [1978] 1 All ER 434.

in requests for discovery by foreign courts<sup>132</sup>. However the Act provides exceptions to this obligation, and the House of Lords (now the Supreme Court) considered that this case fell within these exceptions for two reasons: first, because the request for information was in reality a ‘fishing expedition’ without merit; and secondly, because Rio Tinto might incriminate itself under EU competition law by divulging the documents sought.

The 1975 Act did not allow a court to resist a request for information simply because the foreign court was making a claim to extraterritorial jurisdiction; this is now dealt with by section 4 of the Protection of Trading Interests Act 1980 (below). At common law a UK court has discretion to order a litigant to restrain foreign proceedings which are oppressive: in *Midland Bank plc v Laker Airways plc*<sup>133</sup> the Court of Appeal ordered Laker to discontinue proceedings against Midland Bank in the US which would have involved the extraterritorial application of US antitrust law. In *British Airways Board v Laker Airlines Ltd*<sup>134</sup>, however, the House of Lords refused British Airways’ application for a stay; in this case there was no doubt that BA was carrying on business in the US, so that it was subject to US law on conventional jurisdictional principles. If Laker were deprived of the opportunity to litigate in the US, it would have been unable to sue in the UK since it had no cause of action under UK law. In those circumstances the House of Lords was prepared to allow the US litigation to go ahead.

## (B) Protection of Trading Interests Act 1980

The Protection of Trading Interests Act 1980 contains wide-ranging provisions<sup>135</sup>. It is not limited to blocking US enforcement of antitrust laws, but may be invoked in any case in which US law is being applied in a way which could harm the commercial interests of the UK<sup>136</sup>. Section 1 enables the Secretary of State to make orders requiring UK firms to notify him of, and forbidding them to comply with, measures taken under the law of a foreign country affecting international trade and which threaten to damage the trading interests of the UK. This power has been exercised on three occasions<sup>137</sup>. The first order was not concerned with antitrust laws, but with the saga of the Siberian pipeline<sup>138</sup>. The second was concerned with competition law, but not with the specific issue of extraterritoriality; the objection to the US action in question was that it involved a breach of Treaty obligations concerning air travel between the US and the UK<sup>139</sup>. The third was adopted in response to regulations adopted by the US Government on trade with Cuba.

<sup>132</sup> The 1975 Act implements the Hague Convention in the UK, on which see ‘Enforcement jurisdiction’, pp 490–491 above.

<sup>133</sup> [1986] QB 689, [1986] 1 All ER 526.

<sup>134</sup> [1985] AC 58, [1984] 3 All ER 39.

<sup>135</sup> See generally on this Act Huntley ‘The Protection of Trading Interests Act – Some Jurisdictional Aspects of Enforcement of Antitrust Laws’ (1981) 30 ICLQ 213; Lowe ‘Blocking Extraterritorial Jurisdiction – The British Protection of Trading Interests Act 1980’ (1981) 75 American Journal of International Law 257; Jones ‘Protection of Trading Interests Act 1980’ (1981) 40 Cambridge Law Journal 41; Collins ‘Blocking and Clawback Statutes: the UK Approach’ [1986] JBL 372 and 452.

<sup>136</sup> The Shipping Contracts and Commercial Documents Act 1964 could be invoked only where there was an infringement of UK *jurisdiction*; the 1980 Act is wider, as it applies where there is harm to UK commercial interests, whether there is an infringement of jurisdiction or not.

<sup>137</sup> See the Protection of Trading Interests (US Re-export Control) Order 1982, SI 1982/885; the Protection of Trading Interests (US Antitrust Measures) Order 1983, SI 1983/900; and the Protection of Trading Interests (US Cuban Assets Control Regulations) Order 1992, SI 1992/2449.

<sup>138</sup> See Lowe, pp 197–219.

<sup>139</sup> The vires of the Order in this case were challenged, unsuccessfully, by the plaintiff in the US antitrust action: see *British Airways Board v Laker Airways Ltd* [1984] QB 142, [1983] 3 All ER 375; on appeal [1985] AC 58, [1984] 3 All ER 39; the House of Lords also reversed the Court of Appeal’s decision that Laker should

Section 2 of the Act gives the Secretary of State power to prohibit compliance with a requirement by an overseas authority to submit commercial information to it which is not within its territorial jurisdiction. This provision replaces the Shipping and Commercial Documents Act 1964. Section 3 provides for the imposition of penalties upon anyone who fails to comply with orders under the foregoing provisions, but, consistently with the UK approach to these issues, these may be imposed only in accordance with the UK's conventional interpretation of the international law principles of territoriality and nationality. Section 4 provides that a UK court should not comply with a foreign tribunal's request for assistance in the discovery process where this would infringe UK sovereignty. This is statutory reinforcement of the House of Lords' judgment in *Rio Tinto Zinc v Westinghouse Electric Corp*<sup>140</sup>.

Section 5 provides that foreign multiple damages awards shall not be enforceable in the UK. This means that a claimant in the UK could not enforce a treble damages award obtained in the US<sup>141</sup>. Section 6 goes even further and provides that, where a UK defendant has actually paid US multiple damages, he may bring an action in the UK to 'claw back' the excess of such damages over the amount actually required to compensate the claimant. This provision symbolises the degree of antipathy in the UK towards various aspects of US antitrust practice.

## 7. The Internationalisation of Competition Law<sup>142</sup>

It is clearly unsatisfactory that there should be acrimonious disputes between States over the extraterritorial application of competition law. Principles of public international law do not provide an adequate answer to the problems that arise when true conflicts occur between competition authorities, and yet the scope for such conflicts could increase as more States adopt their own codes of competition law and as business becomes increasingly international. Transnational mergers pose a particular problem where several competition authorities investigate the same transaction and have different perceptions of whether it should be permitted or not. A different, and more positive, point is that competition authorities have become increasingly aware that, since national systems of competition law are not always adequate to deal with cartels, anti-competitive practices and mergers that transcend national boundaries, international cooperation between them may increase the chances of achieving a successful solution. Many steps have been taken towards greater international cooperation between competition authorities, some of which are considered below.

discontinue its US action against British Airways as this would mean there was no forum in which it could sue: see ch 12 n 134 above.

<sup>140</sup> [1978] AC 547, [1978] 1 All ER 434; see 'Introduction', pp 487–488 above.

<sup>141</sup> At common law foreign judgments can normally be enforced in the UK but 'penal' judgments cannot be; note that under s 5 of the Act the whole sum is unenforceable, not just the penal element; one order has been made under s 5, the Protection of Trading Interests Act (Australian Trade Practices) Order 1988, SI 1988/569; s 5 of the Act was considered by the Court of Appeal in *Lewis v Eliades* [2003] EWCA Civ 1758, [2004] 1 All ER 1196, paras 40–53; leave to appeal was refused [2004] 1 WLR 1393.

<sup>142</sup> See Dabbah *The Internationalisation of Antitrust Policy* (Cambridge University Press, 2003); Gerber *Global Competition: Law, Markets and Globalization* (Oxford University Press, 2010); Papadopoulos *The International Dimension of EU Competition Law and Policy* (Cambridge University Press, 2010).

**(A) UNCTAD**<sup>143</sup>

The United Nations Conference on Trade and Development ('UNCTAD') has taken an interest in the development of competition policy for many years. In 1980 the General Assembly of the UN adopted a voluntary, non-binding code, *The Set of Multilaterally Agreed Equitable Principles and Rules for the Control of Restrictive Business Practices*<sup>144</sup>, setting out suggested core principles to be adopted in systems of competition law. UNCTAD fulfils an important role in providing technical assistance to developing countries: for example, in 2004 UNCTAD adopted a *Model Law on Competition*<sup>145</sup> which is used by countries that intend to adopt (or reform) a domestic system of competition law.

**(B) OECD**

The Organisation for Economic Co-Operation and Development ('the OECD') is active in matters of competition policy. In 1995 it published a *Revised Recommendation Concerning Cooperation between Member Countries on Restrictive Business Practices Affecting International Trade*<sup>146</sup> which provides for voluntary notification, consultation and cooperation in competition law cases involving the legitimate interests of foreign Governments; this Recommendation replaced an earlier one of 1986. The OECD has published a number of documents which are of particular interest to the issue of cartel enforcement as well as studies on aspects of competition policy, details of which can be found on its website<sup>147</sup>.

**(C) WTO**

Chapter 5 of the post-war Havana Charter for an International Trade Organization contained an antitrust code<sup>148</sup>; however this was not incorporated into the General Agreement on Tariffs and Trade of 1947, the organisation from which the WTO developed. The WTO was established on 1 January 1995, and is predominantly concerned with issues of trade, rather than with competition policy. The relationship between trade and competition policy is a major subject in its own right, as is the debate as to the institutional mechanisms needed to deal with the new economic order<sup>149</sup>. The rules of the WTO do

<sup>143</sup> See Brusick 'UNCTAD's Role in Promoting Multilateral Cooperation on Competition Law and Policy' (2001) 24 *World Competition* 23; Lianos 'The Contribution of the United Nations to the Emergence of Global Antitrust Law' (2007) 15(2) *Tulane Journal of International and Comparative Law* 145.

<sup>144</sup> Resolution 35/63 of 5 December 1980; the UN reaffirmed the code by resolution of 4 October 2000.

<sup>145</sup> Available at [www.unctad.org](http://www.unctad.org).

<sup>146</sup> OECD Doc C(95) 130 (final), 27 July 1995.

<sup>147</sup> Available at [www.oecd.org/competition](http://www.oecd.org/competition).

<sup>148</sup> The Charter is set out in Wilcox *A Charter for World Trade* (The Macmillan Company, 1949), pp 231–327; see also speech by Wood 'The Internationalisation of Antitrust Law: Options for the Future', 3 February 1995, available at [www.justice.gov/atr/public/speeches/0099.htm](http://www.justice.gov/atr/public/speeches/0099.htm).

<sup>149</sup> The literature on these matters is vast, and the subject merits a separate book. Many of the issues are captured in an interesting series of essays in the *Journal of International Economic Law* for 1999, for example by Pitofsky 'Competition Policy in a Global Economy' (1999) 3 *JIEL* 403 and Roessler 'Should Principles of Competition Policy be Incorporated into WTO Law Through Non-Violation Complaints?' *ibid*, 413; see also Matsushita 'Reflections on Competition Policy/Law in the Framework of the WTO' [1997] *Fordham Corporate Law Institute* (ed Hawk), ch 4; *New Dimensions of Market Access in a Globalising World Economy* (OECD, 1995), in particular the chapters in Part III on Trade and Competition Policies in the Global Market Place; a series of essays on the relationship between competition and trade policy will be found in [1998] *Fordham Corporate Law Institute* (ed Hawk), chs 13–19; see also Iacobucci 'The Interdependence of Trade and Competition Policies' (1997–98) 21(2) *World Competition* 5; Rodgers 'Competition Policy, Liberalism and Globalisation: A European Perspective' (2000) 6 *Columbia Journal of European Law* 289; Guzman

not impose obligations on undertakings in relation to competition. A working group has been established to examine the interaction between trade and competition policy; a helpful summary of its work can be found in the European Commission's *Annual Report on Competition Policy* for 2002<sup>150</sup>. It seems unlikely at the current stage of its development that the WTO will metamorphose into a global competition authority<sup>151</sup>, although it is possible that its system of dispute settlement could be extended to competition law matters<sup>152</sup>.

#### (D) ICN

An important contribution to the debate on the future of international competition policy was the *Final Report of the International Competition Policy Advisory Committee to the US Attorney General and Assistant Attorney General for Antitrust* (the so-called 'ICPAC Report'), published in February 2000<sup>153</sup>. The ICPAC Report led, in October 2001, to the establishment of the ICN as an international forum for competition law and policy. The ICN is an informal, virtual network that seeks to facilitate cooperation between competition authorities and to promote procedural and substantive convergence of competition laws; a Steering Group oversees the conduct of its business. The ICN's work is complementary to that of other international organisations such as UNCTAD and the OECD. Membership is open to national and multinational organisations responsible for the enforcement of competition law. The ICN seeks advice and contributions from the private sector and from non-governmental organisations involved in the application of competition law.

The first annual conference of the ICN was held in September 2002 and brought together representatives from 59 competition authorities and various non-governmental agencies; that number has grown since then and now exceeds 100: a list of members is available on the ICN website<sup>154</sup>. The ICN has established various working groups over the years of its existence: there are currently five, on mergers, cartels, unilateral conduct, advocacy, and agency effectiveness. The work plans of these groups and their output can be accessed on the ICN's website. These working groups have published a series of recommended practices, toolkits, workbooks and various other working documents, all of which provide an invaluable source of learning and guidance. In 2010 the ICN published a *Statement of Achievements* recording (*inter alia*) a remarkable degree of voluntary convergence in the handling of international mergers and the 'fight against cartels', in particular through the refinement of practical enforcement techniques. A further achievement has been the number of ICN recommendations that have led to 'soft harmonisation' in the form of legislative changes in numerous jurisdictions. In 2011 the ICN is expected to review its mission and adopt a strategy for its second decade.

'Antitrust and International Regulatory Federalism' (2001) 76 NYULR 1142; Davidow and Shapiro 'The Feasibility and Worth of a WTO Competition Agreement' (2003) 37 Journal of World Trade 49.

<sup>150</sup> See points 669–672 of the Report.

<sup>151</sup> In July 2004 the General Council of the WTO decided that the interaction between trade and competition policy would no longer form part of its work during the 'Doha Round'; further information can be found on the WTO's website, [www.wto.org](http://www.wto.org).

<sup>152</sup> See Ehlermann and Ehring 'WTO Dispute Settlement and Competition Law' (2003) 26 Fordham International Law Journal 1505.

<sup>153</sup> Copies are available from the US Government Printing Office; see also Janow and Lewis 'International Antitrust and the Global Economy' (2001) 24 World Competition 3.

<sup>154</sup> [www.internationalcompetitionnetwork.org](http://www.internationalcompetitionnetwork.org).

**(E) International cooperation agreements**<sup>155</sup>

International cooperation between competition authorities has been advanced by the adoption of several bilateral and multilateral agreements. For example the US has negotiated agreements in relation to competition law enforcement with Germany, Australia, Canada and Russia<sup>156</sup>. US–Canadian cooperation is also facilitated by the Mutual Legal Assistance Treaty which applies to criminal law enforcement generally, but which can be used in relation to criminal law prosecutions in competition law cases<sup>157</sup>. The Closer Economic Relations Agreement, which entered into force between Australia and New Zealand on 1 January 1983<sup>158</sup>, provides for close cooperation between those two countries, even allowing for one country to apply the other's law where it is appropriate to do so. Denmark, Iceland, Norway and Sweden entered into an Agreement on cooperation in competition law matters in April 2003<sup>159</sup>. Regional agreements have an important role to play in developing a cooperative approach to competition issues; the EU itself is an example of regional cooperation, and Chapter 15 of the North American Free Trade Agreement contains provisions for consultation, cooperation and coordination between the US, Canada and Mexico in matters of competition policy.

**(F) The EU's dedicated cooperation agreements on competition policy**<sup>160</sup>

The EU has entered into dedicated cooperation agreements with the US, Canada, Japan and South Korea<sup>161</sup>; the principles of the agreements with Canada, Japan and South Korea are the same as those with the US. The text that follows will examine the agreements with the US; it will then discuss cooperation in practice. The Commission has also agreed to a structured dialogue with China<sup>162</sup> and with India<sup>163</sup>. A Memorandum of Understanding was signed between DG COMP and the Brazilian competition authorities in October 2009<sup>164</sup> and with the Russian Anti-Monopoly Service in March 2011<sup>165</sup>.

**(i) The EU/US Cooperation Agreement of 23 September 1991**<sup>166</sup>

The first Cooperation Agreement was entered into on 23 September 1991<sup>167</sup>. The French Government successfully challenged the legal basis on which the Commission had proceeded, since the Council of Ministers should have been involved in the adoption of the

<sup>155</sup> A useful summary of such agreements will be found in Parisi 'Enforcement Cooperation Among Antitrust Authorities' (1999) 20 ECLR 133; Zanetti *Cooperation Between Antitrust Agencies at the International Level* (Hart Publishing, 2002).

<sup>166</sup> See Ham 'International Cooperation in the Antitrust Field and in particular the Agreement between the United States and the Commission of the European Communities' (1993) 30 CML Rev 571; Torremans 'Extraterritorial Application of EC and US Competition Law' (1996) 21 EL Rev 280.

<sup>167</sup> [1991] 4 CMLR 823.

Agreement<sup>168</sup>. The position was rectified by the adoption of a joint decision of the Council and the Commission of 10 April 1995<sup>169</sup>.

The Agreement sets out detailed rules for cooperation on various aspects of the enforcement of EU and US competition law. Article II requires the competent authorities in each jurisdiction to notify each other whenever they become aware that their enforcement activities may affect important interests of the other party. Article II(3) contains special provisions on the timing of notifications in the case of mergers. Article III deals with the exchange of information between the authorities in each jurisdiction, and provides for regular meetings between officials of the EU and the US to discuss matters of mutual interest. Article IV deals with cooperation and coordination in enforcement activities, in relation to which each agency will assist the other. Article V is a novel provision going beyond Article IV, as it embodies the idea of ‘positive comity’: one agency may ask the other to take action in order to remedy anti-competitive behaviour in the *former’s* territory<sup>170</sup>. The idea of positive comity is taken further in the second Cooperation Agreement, discussed below.

Article VI requires the parties to avoid conflicts in enforcement activities, and lays down criteria that should be taken into account when an agency is deciding whether to proceed. These criteria reflect the principle of (negative) comity discussed in the context of the US ‘jurisdictional rule of reason’<sup>171</sup>. Article VII of the Agreement requires the parties to consult with one another in relation to the matters dealt with by it. Article VIII provides that neither party to the Agreement can be required to provide information to the other where this is prohibited by the law of the party possessing it or where to do so would be incompatible with important interests of the party possessing it; furthermore each party agrees to keep the information it receives from the other confidential to the fullest extent possible. Article IX provides that neither party can be required to do anything under the Agreement that would be inconsistent with existing laws. The Agreement is terminable on 60 days’ notice by either party.

## (ii) The Positive Comity Agreement of 4 June 1998

A second EU/US Cooperation Agreement was entered into on 4 June 1998, and develops the principle of positive comity in Article V of the first Agreement. The Council and the Commission gave their approval to the Positive Comity Agreement in a joint Decision of 29 May 1998<sup>172</sup>. Article I provides that the Agreement is to apply where one party can demonstrate to the other that anti-competitive activities are occurring within the latter’s territory which are adversely affecting the interests of the former. Article II contains definitions; it is important to note that mergers do not fall within the scope of this Agreement as a result of the definition of ‘competition law(s)’ in Article II(4). Article III contains the principle of positive comity: the competition authorities of a ‘Requesting Party’ may request the authorities in the Requested Party to investigate and, if warranted, to remedy anti-competitive activities in accordance with the latter’s competition laws. Article IV provides that the Requesting Party may defer or suspend the application of its law while

the Requested Party is applying its. Article V deals with confidentiality and the use of information. Article VI provides that the Positive Comity Agreement shall be interpreted consistently with the 1991 Agreement. The Positive Comity Agreement is terminable on 60 days' notice by either party.

### (iii) The cooperation agreements in practice

The cooperation agreements have been highly successful in practice. Cooperation between the Commission and the competition authorities in the US, Canada, Japan and South Korea is now a fact of daily life: if anything the degree of cooperation has been greater than could have been imagined in the early 1990s. The Commission's annual *Report on Competition Policy* (and the Staff Working Paper that accompanies it) provide a helpful account of the cooperation agreements in practice; in particular details are given of specific cases in which the authorities worked together<sup>173</sup>; obvious examples include *Thomson Corporation/Reuters Group*<sup>174</sup>, where DG COMP's and the DoJ's investigations and negotiations of remedies were conducted in parallel and included joint meetings and discussions with the parties, and *Panasonic/Sanyo*<sup>175</sup>, where DG COMP worked closely with the FTC in the US and the Fair Trade Commission in Japan. An EU-US merger working group has been established, which led to the adoption in 2002 of guidelines on 'best practices' to be followed where the same transaction is being investigated on both sides of the Atlantic; it was revised in October 2011<sup>176</sup>.

A great deal of attention, including press coverage, is given to the few cases where there is friction between the EU and the US, as in the cases of *Boeing/McDonnell Douglas*<sup>177</sup> and *GE/Honeywell*<sup>178</sup>. In the *Boeing* case the FTC in the US reached a majority decision not to oppose the merger, while the European Commission seemed likely, at one point, to prohibit it in its entirety; in the event commitments to modify the transaction were offered to the Commission with the result that it was given conditional clearance. In *GE/Honeywell* a merger had been permitted in the US but was prohibited by the European Commission. However exceptional cases such as *Boeing/McDonnell Douglas* and *GE/Honeywell* ought not to obscure the fact that a large number of cases, particularly mergers, are successfully completed without any friction between the two jurisdictions. No matter how sophisticated the machinery for cooperation between the EU and the US, there will always be some cases in which there is disagreement as to the appropriate outcome. The success of the Cooperation Agreements should be assessed on the basis of how rare these cases are, and on this basis they have been very successful.

## Horizontal agreements (1) – cartels

1. The Hardening Attitude of Competition Authorities Worldwide Towards Cartels	513	6. Collusive Tendering	536
2. The European Commission's Approach to Cartels	517	7. Agreements Relating to Terms and Conditions	538
3. Horizontal Price Fixing	522	8. Exchanges of Information	539
4. Horizontal Market Sharing	530	9. Advertising Restrictions	547
5. Quotas and other Restrictions on Production	533	10. Anti-Competitive Horizontal Restraints	550
		11. UK Law	552

The previous chapters have described the main principles of EU and UK competition law. The focus of attention in this and the following chapters is different. Instead of looking at the individual provisions of competition law, such as Articles 101 and 102 TFEU and the Chapter I and Chapter II prohibitions in the UK Competition Act 1998, a contextual approach will be adopted and the application of the law to various types of agreements and business practices will be analysed.

There are 11 'contextual' chapters. The first three consider horizontal issues: first, cartels; then the 'problem' of tacit collusion and oligopoly; and lastly horizontal cooperation agreements that competition authorities might be willing to countenance. Chapter 16 deals with vertical agreements. Chapters 17 and 18 analyse practices that might be found to be abusive under Article 102 TFEU and/or the Chapter II prohibition in the Competition Act 1998; the possible application of the UK Enterprise Act 2002 to such practices will also be considered. Chapter 19 considers the relationship between intellectual property rights and competition law, including technology transfer agreements. Chapters 20 to 22 deal with merger control, and the book concludes with a brief discussion of how competition law impacts upon specific sectors of the economy, in particular so-called utilities such as electronic communications and energy markets.

The scheme of this chapter is as follows. Section 1 discusses the hardening attitude of competition authorities worldwide towards hard-core cartels, and gives examples of recent decisions in a variety of non-EU jurisdictions in which significant fines and sentences of imprisonment have been imposed. Section 2 looks at the European Commission's enforcement activity in relation to cartels in recent years. The chapter then considers the application of Article 101 to particular types of cartels: price fixing, market sharing, production quotas and analogous practices. The final section of this chapter reviews the record in the UK in enforcing the prohibition on cartels.

# 1. The Hardening Attitude of Competition Authorities Worldwide Towards Cartels

## (A) Introduction

The mysteries of some aspects of competition policy should never be allowed to obscure the most simple fact of all: that competitors are meant to compete with one another for the business of their customers, and not to cooperate with one another to distort the process of competition. Horizontal agreements between independent undertakings to fix prices, divide markets, to restrict output and to fix the outcome of supposedly competitive tenders are the most obvious target for any system of competition law. Hard-core cartels are prohibited by virtually all systems of competition law and are the subject of ever more draconian penalties<sup>1</sup>.

Writing in 1776 Adam Smith famously remarked in *The Wealth of Nations* that:

People of the same trade seldom meet together, even for merriment and diversion, but the conversation ends in a conspiracy against the public, or in some contrivance to raise prices.

Evidence suggests that the tendency of competitors to meet in smoke-filled rooms – or perhaps now in smoke-free Internet chat rooms – is just as strong today as it was in the eighteenth century: cartels appear to be alive and kicking throughout the world. The phenomenon described by Smith was not a new discovery in 1776: cartels were recognised – and prohibited – in the days of the Eastern Roman Empire (Byzantium). The Constitution of Zeno of 483 AD punished price fixing in relation to clothes, fishes, sea urchins and other goods with perpetual exile, usually to Britain<sup>2</sup>. Adam Smith's comment was prescient: cartels have thrived through the subsequent centuries, often with implicit or even explicit support from Governments. Even the adoption of competition laws with tough sanctions has not been sufficient to suppress cartel activity.

The members of cartels go to great lengths to suppress evidence of their illegal activity: for example the Commission's decision in *Gas Insulated Switchgear*<sup>3</sup> says that participants in the cartel used codes to conceal their companies' names and encryption software to protect the secrecy of emails and telephone conversations; made use of free email providers and the anonymous mailboxes made available by them; sent messages as password-protected documents: the passwords were regularly changed; systematically destroyed emails; downloaded attachments on to memory sticks rather than on to their computers; and made use of mobile telephones provided by a member of the cartel that contained

<sup>1</sup> For detailed texts on cartels and competition law see Jephcott and Lübigg *Law of Cartels* (Jordans, 2003); Sakkers and Ysewyn *European Cartel Digest* (Wolters Kluwer, 2005); Arbaut and Sakkers in Faull and Nikpay *The EC Law of Competition* (Oxford University Press, 2nd ed, 2007), ch 8; Gerard et al *Cartel Law*, vol III of *EU Competition Law* (Claeys and Casteels, 2007, eds Siragusa and Rizza); *European Competition Law Annual 2006: Enforcement of Prohibition of Cartels* (Hart Publishing, 2007, eds Ehlermann and Atanasio); Bellamy and Child *European Community Law of Competition* (Oxford University Press, 6th ed, 2008, eds Roth and Rose), ch 5; *Anti-Cartel Enforcement Worldwide* (Cambridge University Press, 2009, eds Dabbah and Hawk); Harding and Joshua *Regulating Cartels in Europe* (Oxford University Press, 2nd ed, 2010); see also the series of contributions on the topic in [2006] Fordham Corporate Law Institute (ed Hawk), chs 1–7.

<sup>2</sup> See Codex Iustinianus, c 4, 59, 2, p 186 (Weidmann, 1954); exile to Rome for commission of the UK criminal cartel offence under the Enterprise Act 2002 is thought unlikely to have a sufficiently deterrent effect and is therefore not an available option.

<sup>3</sup> Commission decision of 24 January 2007, substantially upheld on appeal Cases T-117/07 etc *Areva v Commission* [2011] ECR II-000, [2011] 4 CMLR 1421.

encryption options<sup>4</sup>. The cartels in *Organic peroxides*<sup>5</sup> and *Heat stabilisers*<sup>6</sup> went further and used a consultancy firm to oversee and conceal their illicit arrangements. Courts have recognised that competition authorities are at a disadvantage where members of cartels resort to these secretive practices, and that therefore they may have to prove the existence of a cartel by relying on inferences from circumstantial evidence<sup>7</sup>.

## (B) The global agenda

There is a very real sense today among the world's competition authorities that, if competition law is about one thing above all, it is the detection and punishment of hard-core cartels. In the European Union Mario Monti, the former Commissioner for Competition, once described cartels as 'cancers on the open market economy'<sup>8</sup>, and the Supreme Court in the US has referred to cartels as 'the supreme evil of antitrust'<sup>9</sup>. At both a moral and a practical level there is not a great deal of difference between price fixing and theft. US law has for many decades treated hard-core cartels as *per se* infringements of the Sherman Act and as criminal offences, punishable not only by fines but also by the imprisonment of individuals. In 2008 the House of Lords, the highest appeal court in the UK (now known as the Supreme Court) reached the conclusion that some forms of price fixing amount to the crime of conspiracy to defraud at common law: in other words some cartels could lead to the imprisonment of individuals even without the criminal cartel offence established by section 188 of the Enterprise Act 2002<sup>10</sup>.

As a separate matter, many developed and developing countries around the world are experiencing, or are expected to experience, an economic downturn. It is easy to understand that, during such a recession, firms that face uncertainty, and even the danger of bankruptcy, may find the idea of collusion to be attractive. The question arises whether such an economic crisis justifies a more lenient approach towards cartels<sup>11</sup>. It seems that competition authorities continue to root out and punish cartels with the same determination<sup>12</sup> at a time of crisis as in more prosperous times; the danger is actually in allowing them.

## (C) The position of the OECD in relation to cartels<sup>13</sup>

The Organisation for Economic Co-Operation and Development ('the OECD') has been at the forefront of policy in relation to cartels. This in itself reflects an obvious but important point, that cartels are often international in nature, whereas for the most part systems of competition law are purely national in scope. The rules of the European Union

<sup>4</sup> Commission decision of 24 January 2007, paras 170–176.

<sup>5</sup> Commission decision of 10 December 2003, upheld on appeal Case T-99/04 *AC-Treuhand AG v Commission* [2008] ECR II-1501, [2008] 5 CMLR 962; for comment see Harding 'Capturing the cartel's friends: cartel facilitation and the idea of joint criminal enterprise' (2009) 34(2) EL Rev 298.

<sup>9</sup> See *Verizon Communications Inc v Law Offices of Curtis V Trinko* 540 US 398 (2004).

<sup>10</sup> See ch 10, 'Conspiracy to defraud at common law', pp 436–437.

<sup>11</sup> See eg speech by John Fingleton of 20 January 2009, available at [www.oft.gov.uk](http://www.oft.gov.uk) and speech by Christine Varney of 12 May 2009, available at [www.justice.gov](http://www.justice.gov).

<sup>12</sup> See 'Recent cartel cases outside the EU, pp 561–517 and 'The European Commission's approach to cartels', pp 517–521 below.

<sup>13</sup> The OECD documents referred to in this section can all be found at [www.oecd.org](http://www.oecd.org).

are an important exception, since they apply throughout the 27 Member States as well as the three Contracting States of the European Economic Area. International business phenomena such as cartels necessitate an international response, and the OECD is in an important position to give a lead in this respect.

In 1998 the OECD adopted a *Recommendation of the Council concerning Effective Action Against Hard Core Cartels* in which it called upon its member countries to ensure that their laws ‘effectively halt and deter hard-core cartels’, and invited non-member countries to associate themselves with the *Recommendation* and to implement it. In particular the *Recommendation* said that countries should provide for effective sanctions of a kind and at a level to deter firms and individuals from participating in such cartels as well as effective enforcement procedures to detect and remedy hard-core cartels. The *Recommendation* defined a hard-core cartel as:

an anti-competitive agreement, anti-competitive concerted practice, or anti-competitive arrangement by competitors to fix prices, make rigged bids (collusive tenders), establish output restrictions or quotas, or share or divide markets by allocating customers, suppliers, territories, or lines of commerce.

Subsequently the OECD has published a number of further documents which are of particular interest to the issue of cartel enforcement<sup>14</sup>. The OECD has examined the harm that arises from cartels: whilst acknowledging how difficult it is to quantify such harm, it found that it amounted to billions of dollars worldwide each year. The OECD has also discussed the need to penetrate the cloak of secrecy that surrounds hard-core cartels, and the contribution that the encouragement of whistleblowers can make to this need. Whistleblowing and leniency applications were discussed in chapters 7 and 10 of this book, and are an important feature of competition authorities’ pursuit of cartels<sup>15</sup>. Strong sanctions against firms and individuals increase the effectiveness of leniency programmes. The OECD has advocated the imposition of larger penalties in cartel cases; in its view sanctions have yet to reach the optimal level for deterrence. A separate matter is whether competition authorities might decide to introduce rewards or financial incentives for informants: this has been done, for example, in South Korea<sup>16</sup> and the UK<sup>17</sup>.

The OECD has stressed the need for greater international cooperation in combating cartels which, as noted earlier, often transcend national boundaries. The increasing levels of cooperation between competition authorities is discussed in chapter 12 of this book<sup>18</sup>.

## (D) The International Competition Network

The International Competition Network (‘the ICN’) has a cartels working group: it is composed of two sub-groups, one of which looks at the general framework and principles for the fight against cartels and the other at enforcement techniques. The work plan and output of the cartels working group are available on the ICN’s website<sup>19</sup>. The

<sup>14</sup> See eg *Report on Leniency Programmes to Fight Hard Core Cartels* (2001); *Report on the Nature and Impact of Hard Core Cartels and Sanctions against Cartels under National Competition Laws* (2002); *Hard Core Cartels: Recent Progress and Challenges Ahead* (2003); *Third Report on the Implementation of the 1998 Recommendation* (2005); *Guidelines for Fighting Bid Rigging in Public Procurement* (2009), all available at [www.oecd.org](http://www.oecd.org).

<sup>15</sup> See ch 7, ‘The Commission’s *Leniency Notice*’, pp 280–282 and ch 10, ‘Whistleblowing: the leniency programme’, pp 414–418.

<sup>16</sup> See [www.ftc.go.kr/data/hwp/rewardssystem.doc](http://www.ftc.go.kr/data/hwp/rewardssystem.doc).

<sup>17</sup> OFT Press Release 31/08, 29 February 2008.

<sup>18</sup> See ch 12, ‘The Internationalisation of Competition Law’, pp 506–511.

<sup>19</sup> [www.internationalcompetitionnetwork.org](http://www.internationalcompetitionnetwork.org).

ICN produced, in 2005, a helpful series of *Anti-Cartel Enforcement Templates* which summarise anti-cartel laws in over 40 jurisdictions. The ICN has also published an *Anti-Cartel Enforcement Manual*, each chapter of which discusses enforcement techniques and identifies approaches that have proven effective and successful. The ICN holds an annual (anti-)Cartel Workshop to share learning and experience on how to address the problems raised by international cartels.

### (E) Recent cartel cases outside the EU

The commitment of competition authorities around the world to the detection and prohibition of cartels is demonstrated by the number of cases that have been decided in recent years, both in ‘mature’ systems of competition law and in new jurisdictions, and in all types of economy. A few examples of major cartel cases in recent years illustrate how active competition authorities throughout the world have been:

- in the US to date more than \$1.7 billion in criminal fines were imposed as a result of the Department of Justice’s investigation into price fixing in the air transportation industry<sup>20</sup>. In 2007 34 individuals were sentenced to imprisonment, and the total number of actual days of incarceration imposed by the courts was 31,391, the highest number in history<sup>21</sup>
- in Japan the Japanese Fair Trade Commission imposed fines in May 2011 of approximately €124 million on four manufacturers of air separation gases for price fixing<sup>22</sup>
- in South Korea the Korean Fair Trade Commission imposed fines in May 2011 of approximately €282 million on four refineries for allocating amongst themselves the gas stations to which they would sell their products<sup>23</sup>
- in Australia the Federal Court of Australia imposed fines in April 2010 of approximately €8 million on four suppliers of marine hoses for engaging in cartel conduct<sup>24</sup>
- in South Africa the South African Competition Tribunal confirmed a settlement reached between the South African Competition Commission and with one undertaking involved in a price-fixing cartel in the maize milling industry. The settlement involved, amongst other things, the payment of an administrative fine of approximately €26 million<sup>25</sup>.

Several countries have also been active in the introduction of criminal sanctions in cartel cases: in 2009 Australia adopted the Trade Practices Amendment (Cartel Conduct and Other Measures) Act and South Africa passed the Competition Amendment Act, while

<sup>20</sup> See Department of Justice’s Press Release of 30 November 2010 available at [www.justice.gov/atr/index.html](http://www.justice.gov/atr/index.html).

<sup>21</sup> Useful statistics on the enforcement activities of the Antitrust Division of the US Department of Justice in relation to cartels (and to other types of case) are available at [www.justice.gov/atr/public/workload-statistics.html](http://www.justice.gov/atr/public/workload-statistics.html). The Department of Justice in the US has adopted a policy of placing indicted individuals, accused of violating the Sherman Act, on a ‘Red Notice’ list maintained by Interpol, with the result that they might be arrested when attempting to cross a national boundary and extradited to the US for prosecution: see speech by Scott Hammond, Deputy Assistant Attorney General for Criminal Enforcement at the Department of Justice, 16 November 2005, [www.usdoj.justice/atr](http://www.usdoj.justice/atr).

<sup>22</sup> See JFTC’s press release of 26 May 2011, available at [www.jftc.go.jp/en/pressreleases/index.html](http://www.jftc.go.jp/en/pressreleases/index.html).

<sup>23</sup> See KFTC’s press release of 26 May 2011, available at [www.eng.ftc.go.kr](http://www.eng.ftc.go.kr).

<sup>24</sup> See ACCC’s press release of 14 April 2010, available at [www.accc.gov.au](http://www.accc.gov.au).

<sup>25</sup> See Consent Order of 30 November 2010 by the South African Competition Tribunal, available at [www.comptrib.co.za/cases/consent-order](http://www.comptrib.co.za/cases/consent-order).

Canada amended its competition legislation to provide for more effective criminal enforcement. New Zealand is in the process of introducing criminal sanctions.

## 2. The European Commission's Approach to Cartels

The Commission now attaches a higher priority to cartels than at any time in its history<sup>26</sup>. The most obvious expression of this was the creation in June 2005 within DG COMP of a Cartel Directorate with responsibility for prosecuting cartel cases and, in conjunction with the Directorate for Policy and Strategy, for developing policy and coordinating the Commission's contributions to international fora such as the OECD and ICN. A second manifestation of the Commission's continuing determination to combat cartels is the *Leniency Notice*, the most recent of which appeared in 2006 and is discussed in chapter 7<sup>27</sup>. The immunity or reduction of the fine for whistleblowers has been very successful in bringing cartels to light, as can be seen from the statistics below. Thirdly, the Commission revised its *Fining Guidelines* in 2006 and the level of penalties being imposed on firms is now substantial, and it can be anticipated that this trend will continue<sup>28</sup>. Fourthly, the introduction of a settlement system in 2008 is expected to lead to more decisions than has been possible to date<sup>29</sup>; by 20 June 2011 the Commission had settled three cartel cases<sup>30</sup>. Fifthly, actual evidence of the Commission's keenness to punish and eradicate cartels has been its enforcement activity in recent years.

Bearing in mind that undertakings that cartelise markets can also be sued for damages<sup>31</sup>, and that individuals in some jurisdictions also face the possibility of imprisonment<sup>32</sup>, it is hard to believe that the deterrent effect of the law on cartels in the EU is insubstantial<sup>33</sup>; and yet the Commission (and the national competition authorities) continue to discover them in significant numbers and in all kinds of markets<sup>34</sup>. In numerous cases the Commission increases the fine that would otherwise have been paid because an undertaking is a recidivist, that is to say a repeat offender<sup>35</sup>; and it often discovers a series of cartels in the same industry<sup>36</sup>. Some of these cartels were of very long duration: for example 35 years in the case of *Animal Feed Phosphates*<sup>37</sup> and 29 years in each of the car-

<sup>26</sup> See the Commission's *Report on Competition Policy* (2008), paras 5–14, available at [www.ec.europa.eu](http://www.ec.europa.eu).

<sup>27</sup> See ch 7, 'The Commission's *Leniency Notice*', pp 280–282.

<sup>28</sup> See ch 7, 'The Commission's guidelines on the method of setting fines', pp 276–280; see also Castillo de la Torre 'The 2006 Guidelines on Fines: Reflections on the Commission's Practice' (2010) 33(3) *World Competition* 359.

<sup>29</sup> See ch 7, 'A system of settlements for cartel cases?', pp 263–264

<sup>30</sup> See 'Appeals to the General Court', pp 520–521 below.

<sup>31</sup> See ch 8 generally.

<sup>32</sup> See eg ch 10, 'The cartel offence', pp 425–434 on the position in the UK.

<sup>33</sup> On the issue of deterrence and cartels generally see Wils *The Optimal Enforcement of EC Antitrust Law Essays in Law and Economics* (Kluwer Law International, 2002), ch 2 and Wils *Efficiency and Justice in European Antitrust Enforcement* (Hart Publishing, 2008), ch 3.

<sup>34</sup> DG COMP's website includes a drop-down menu on cartels which includes a 'What's new' section: it provides details of new cases in which inspections have been carried out or a statement of objections sent.

<sup>35</sup> See eg *Nitrine Butadiene Rubber*, Commission decision of 23 January 2008, where Bayer's fine was increased by 50 per cent for recidivism; see further ch 7, 'Adjustments to the basic amount', p 278.

<sup>36</sup> See eg *Nitrine Butadiene Rubber*, Commission decision of 23 January 2008; this was the fourth decision in the synthetic rubber industry in just over three years.

<sup>37</sup> Commission decision of 20 July 2010; not all of the producers were involved for the entire period.

tels in *Sorbates*<sup>38</sup> and *Organic Peroxides*<sup>39</sup>. It is also noticeable in the Commission's decisions how often cartel meetings were held during or just after trade association meetings, as for example in the cases of *Industrial bags*<sup>40</sup>, *Synthetic rubber*<sup>41</sup> and *Copper Fittings*<sup>42</sup>.

## (A) Statistics

In the years from 2001 onwards the European Commission has been particularly active in enforcing the prohibition on cartels: there have been numerous decisions and the fines have, in many cases, been enormous. 2001 was a particularly striking year, in which the fines imposed in ten decisions totalled €1,836 billion: by far the largest amount in any one year up until that point. The Commission's statistics on its enforcement activity in relation to cartels are available on its website and are regularly updated<sup>43</sup>. These statistics speak eloquently of the Commission's continuing determination to search for and eradicate cartels. Between 2006 and 2010 the total amount of penalties imposed by the Commission in 35 decisions was €12,110 billion. On appeal to the EU Courts some of the penalties were slightly reduced: after making allowance for those reductions the figure was €11,999 billion. In the calendar year 2010 the Commission adopted six decisions in which the fines totalled €2,598 billion, *DRAM*, *Prestressing Steel*, *Bathroom Equipment*, *Animal Feed Phosphates*, *Air Cargo* and *LCD Panels*. The fines are paid into the European Union budget: to that extent they benefit the treasuries of the Member States, whose contributions are proportionally reduced. A separate point is that the Commission has estimated that it saved consumers €7 billion in 2010 as a result of its anti-cartel enforcement<sup>44</sup>.

This picture of rigorous enforcement is a very clear one. Some commentators have expressed concerns about the high level of fines imposed by the Commission and, in particular, about the combination of powers vested in it and the lack of a 'fresh pair of eyes' within the system<sup>45</sup>. Others, however, note the need for severe penalties to be imposed for serious infringements and argue that the EU enforcement system satisfies the requirements of the European Convention on Human Rights<sup>46</sup>, Article 6 of which recognises the right to a fair and public hearing in matters of criminal law. It remains to be seen whether the EU Courts will respond to this debate, in particular since the Lisbon Treaty brought the Charter of Fundamental Rights into effect, by changing their practice when conducting appeals in cartel (and abuse) cases<sup>47</sup>.

<sup>38</sup> Commission decision of 1 October 2003, substantially upheld on appeal Case T-410/03 *Hoechst v Commission* [2008] ECR II-881, [2008] 5 CMLR 839.

<sup>39</sup> Commission decision of 10 December 2003, upheld on appeal Case T-99/04 *AC-Treuhand AG v Commission* [2008] ECR II-1501, [2008] 5 CMLR 962.

<sup>40</sup> Commission decision of 20 November 2005.

<sup>41</sup> Commission decision of 29 November 2006.

<sup>43</sup> [www.ec.europa.eu/comm/competition/cartels/statistics/statistics/pdf](http://www.ec.europa.eu/comm/competition/cartels/statistics/statistics/pdf).

<sup>44</sup> Speech by Alexander Italianer of 25 March 2011, available at [www.ec.europa.eu/competition/index\\_en.html](http://www.ec.europa.eu/competition/index_en.html).

<sup>45</sup> See eg Forrester 'Due Process in EC competition cases: a distinguished institution with flawed procedures' (2009) 6 EL Rev 817 and the essays in *Evaluation of Evidence and its Judicial Review in Competition Cases* (Hart Publishing, 2010, eds Ehlermann and Marquis).

<sup>46</sup> See eg Wils 'The Increased Level of EU Antitrust Fines, Judicial Review, and the European Convention on Human Rights' (2010) 33(1) World Competition 5.

<sup>47</sup> The compatibility of the Commission's procedures and the standards required by the European Convention of Human Rights has been raised before the General Court, see eg Cases T-56/09 etc *Saint-Gobain Glass France v Commission*, not yet decided.

The Commission remains committed to an extremely tough stance on cartels. However it has become more receptive to claims that too high a fine may mean that an offending firm is put out of business<sup>48</sup>; not an attractive proposition for a competition authority, since this would mean that there would be fewer competitors on the market than there were before. The Commission reduced some of the fines in *Prestressing Steel*<sup>49</sup>, *Bathroom Equipment*<sup>50</sup> and *Animal Feed Phosphates*<sup>51</sup> for this reason.

## (B) Some landmark decisions

Some of the cartel cases in recent years are of particular interest. In *Vitamins*<sup>52</sup> the Commission imposed fines on eight undertakings totalling €855.23 million (reduced to €790.50 million on appeal): of this amount, Roche was fined €462 million for its participation in each of the 12 different vitamin cartels; the next largest fine was on BASF, of €296.16 million<sup>53</sup>; Aventis would have been fined €114.4 million, but it paid only €5.04 million as it had blown the whistle on most of the cartels. This cartel was investigated not only under EU law: the Commission's decision followed fines in the US on the major participants of US\$862 million and in Canada of Canadian \$84.5 million<sup>54</sup>; fines of Australian \$26 million were imposed on Roche, BASF and Aventis Animal Nutrition under the Australian Trade Practices Act 1974 on 28 February 2001<sup>55</sup>. Senior executives of Roche and BASF also served terms of imprisonment in the US for their roles in this cartel<sup>56</sup>. Fines were also imposed in South Korea<sup>57</sup>. There have also been a series of actions for damages arising from the vitamins cartel<sup>58</sup>.

Other notable decisions in recent years include, in 2007, *Elevators and escalators*<sup>59</sup> and *Gas Insulated Switchgear*<sup>60</sup> for the sheer size of the fines, €992.31 million in the case of the former and €750.71 in the latter. In 2008 fines of €676 million were imposed in the case

<sup>57</sup> Press Release of 25 April 2003, available at [www.ftc.go.kr](http://www.ftc.go.kr).

<sup>58</sup> See eg in the US *Empagran SA v Hoffmann-La Roche Ltd* 315 F 3d 338 (DC Cir 2003) (see ch 12, 'The *Alcoa* and *Hartford Fire Insurance* cases', pp 491–493); in the UK see *Provimi Ltd v Aventis Animal Nutrition SA* [2003] EWHC 961; Case No 1028/5/7/04 *BCL Old Co Ltd v Aventis* (which was settled out of court), order of the CAT of 7 April 2005; *Devenish v Sanofi-Aventis* [2007] EWHC 2394, [2008] UKCLR 28, upheld on appeal *Devenish Nutrition Ltd v Sanofi-Aventis SA (France)* [2008] EWCA Civ 1086, [2008] UKCLR 783; Case Nos 1098/5/7/08 etc *BCL Old Co Ltd v BASF SE* [2008] CAT 24, [2008] CompAR 210, reversed on appeal *BCL Old Co Ltd v BASF SE* [2009] EWCA Civ 434, [2009] UKCLR 789 (the claims were found to have been brought out of time); the CAT refused to extend time: [2009] CAT 29, [2010] CompAR 1, upheld on appeal [2010] EWCA Civ 1258; the case is on appeal to the Supreme Court, and is due to be heard in June 2012.

<sup>59</sup> Commission decision of 21 February 2007, substantially on appeal Cases T-145/07 etc *OTIS v Commission*, [2011] ECR II-000.

<sup>60</sup> Commission decision of 24 January 2007, substantially upheld on appeal Cases T-110/07 etc *Siemens v Commission* [2011] ECR II-000, [2011] 4 CMLR 1421.

of *Paraffin Wax*<sup>61</sup>, and of €1.383 billion in the case of *Car Glass*<sup>62</sup>; a point of particular interest about this decision is that the fine imposed on Saint-Gobain, of €896 million, was the largest ever to have been imposed on one undertaking in an Article 101 decision. In 2009 the Commission fined E.ON and GDF a total of €1,106 billion for sharing the German and French gas markets<sup>63</sup>. In 2010 fines of €799 million were imposed on 11 air cargo carriers for fixing fuel and security surcharges<sup>64</sup>; this case involved extensive cooperation with competition authorities in other jurisdictions such as the US. It is also of interest to note that, whereas a few years ago several of the Commission's decisions followed earlier enforcement by the Department of Justice in the US in relation to the same cartel<sup>65</sup>, in recent years the Commission has prosecuted a number of cases where the cartels were purely European: examples are a series of decisions imposing fines on cartels in the beer sector<sup>66</sup>, haberdashery products<sup>67</sup>, flat glass<sup>68</sup> and bathroom equipment<sup>69</sup>.

### (C) Appeals to the General Court

Undertakings found to have infringed Article 101 have a right of appeal to the General Court, which has an unlimited jurisdiction in relation to the level of fines<sup>70</sup>; this includes the right to increase as well as to decrease them, which may act as a disincentive to appeal in some cases<sup>71</sup>. Some of these cases have run for a very long time; in particular, the litigation

<sup>68</sup> Commission decision of 28 November 2007, on appeal Case T-82/03 *Guardian Industries and Guardian Europe v Commission*, not yet decided.

<sup>69</sup> Commission decision of 23 June 2010, on appeal Cases T-364/10 etc *Duravit v Commission*, not yet decided.

<sup>70</sup> Article 261 TFEU; see ch 7, 'Judicial Review', pp 290–294 on appeals to the General Court.

<sup>71</sup> See eg Cases T-101/05 etc *BASF v Commission* [2007] ECR II-4949, [2008] 4 CMLR 347.

arising from the *PVC* decision of 1988 did not end until the Court of Justice's judgment in 2002<sup>72</sup>.

Where the Commission is guilty of factual errors the General Court will, of course, reduce the level of fines; it will also do so, for example, where it considers that one member of a cartel has been treated unequally compared with others in the same cartel. However the Court is fairly reluctant to interfere with the Commission's margin of appreciation in relation to the level of fines, and, as already noted, the Commission's statistics show that, overall, the level of reductions by the Court is not great<sup>73</sup>. No doubt many undertakings that are fined substantial sums will feel that it is worthwhile appealing in the hope of some reduction; and clearly law firms have an interest in their doing so, since this is lucrative work. However appeals consume public resources – of both the Commission and the Courts themselves. This is one of the reasons why a settlements procedure is attractive: not only can quicker decisions be expected under such a regime, but there should be considerably fewer appeals in the future, if the settlement procedure is frequently used, than is currently the case. There were no appeals in the first case to be settled under the Commission's settlements procedure<sup>74</sup>, *DRAM*<sup>75</sup>; the only appeal in the second case, *Animal Feed Phosphates*<sup>76</sup> was made by the one undertaking that did not participate in the settlement procedure.

In some cases points have been won on appeal where the Commission had made a procedural error in its administrative procedure, for example failing to address a statement of objections to the legal entity that was subsequently fined. On two occasions in 2006 the Commission, having lost on appeal before the EU Courts on procedural grounds such as these, decided to reopen its administrative procedure in order to correct the error: this happened both in *Alloy Surcharge*<sup>77</sup> and in *Steel Beams*<sup>78</sup>. The General Court mostly affirmed the readopted decisions in both cases<sup>79</sup>; the General Court's judgments were upheld by the Court of Justice<sup>80</sup>. Clearly the Commission intends, by adopting decisions such as these<sup>81</sup>, to suggest to the legal and business communities that appeals of a technical nature are unlikely to be successful in the end, since the technicality is something that can, in the long run, be corrected.

### 3. Horizontal Price Fixing

Horizontal price fixing would be regarded by most people as the most blatant and undesirable of restrictive trade practices.

It is interesting in passing to note that price fixing has not always attracted the opprobrium that it does today. In the UK, for example, it was characteristic of most industries during the first half of the twentieth century that prices were set at an agreed level; this was thought to provide stability, to protect firms against cyclical recession and overseas competition, and to facilitate orderly and rational marketing from which purchasers too would benefit<sup>82</sup>. The introduction of power to inhibit price fixing in the Monopolies and Restrictive Practices (Inquiry and Control) Act 1948 was resented and even now resistance to price competition remains deep-rooted in some parts of the economy.

It might be assumed that in the absence of competition laws – or at any rate in the absence of any significant prospect of being detected and punished for breaking them – all competitors would find the urge to cartelise and to maximise profits an irresistible one. However participation in a cartel itself has its price and membership will be more profitable to some firms than others<sup>83</sup>. Costs will be incurred in negotiating to fix the price at which the product is to be sold and these costs will inevitably increase as more firms are brought into the agreement and the range of products to be comprehended by it is extended. Firms may find it difficult both to agree a price and to remain faithful to the level set. It will be to the advantage of more efficient firms to fix a lower price, since output (and so their revenue) will then be greater; the producer of strongly differentiated goods will want a higher price, which will cover the cost of promoting its brand image. Having fixed prices, further expense will have to be incurred in monitoring the agreement. Meetings will be necessary to reappraise matters from time to time, resources will need to be expended in policing it to ensure that individual firms are not cheating by cutting prices secretly, offering discounts and bonuses or altering the quality of the product<sup>84</sup>. To prevent cheating, the agreement may fix quotas and provide for the imposition of fines upon firms that exceed them. Further resources may have to be devoted to arrangements such as collective boycotts, patent pooling and the offer of aggregated rebates in order to prevent new entrants coming on to the market with a view to sharing in any supra-competitive profits that are being earned. A system of collective resale price maintenance may have to be established to buttress the stability of the cartel. A trade association may have to be established to reinforce the cartel.

The problems inherent in the cartelisation process itself explain why in some industries price fixing has a tendency to break down in the long term and why the parties may attempt to limit competition in other ways than by direct limitations on pricing strategy. For example, it may be easier to prevent ‘cheating’ where each firm is given an exclusive geographical market or a particular class of customers with which to deal. Furthermore the fact that price fixing becomes more difficult as the number of participants involved in the agreement increases may be considered to signify that competition authorities ought to expend their enforcement resources on those markets where collusion is most likely to

<sup>82</sup> See eg Allen *Monopoly and Restrictive Practices* (George Allen & Unwin, 1968), ch 14.

<sup>83</sup> See Scherer and Ross *Industrial Market Structure and Economic Performance* (Houghton Mifflin, 3rd ed, 1990), chs 7 and 8; Neven, Papandropoulos and Seabright *Trawling for Minnows* (CEPR, 1998), ch 3; Bishop and Walker *The Economics of EC Competition Law* (Sweet & Maxwell, 3rd ed, 2010), paras 5.007–5.033.

<sup>84</sup> It is not uncommon for a cartel agreement to break down, or to run the risk of doing so, because of the extent of cheating indulged in by members: see eg *Zinc Producer Group* OJ [1984] L 220/27, [1985] 2 CMLR 108, paras 23–63.

be privately profitable because of the high level of concentration that exists or the homogeneity of the products sold<sup>85</sup>.

It should not be assumed from the foregoing comments that price fixing is rare. Even the existence of antitrust laws backed up by severe penalties has not dissuaded some firms from attempts to control the market. Experience shows that some industries are particularly prone to cartelisation: any review of enforcement activity in this area will quickly reveal, for example, that this is true of the cement, chemical and construction sectors. It is also important to appreciate that prices can be fixed in numerous different ways, and that a fully effective competition law must be able to comprehend not only the most blatant forms of the practice but also a whole range of more subtle collusive behaviour whose object is to limit price competition. For example, where firms agree to restrict credit to customers, to abstain from offering discounts and rebates, to refrain from advertising prices, to notify one another of the prices they charge to customers or intend to recommend their distributors to charge, or to adopt identical cost accounting methods, the object or effect of the agreement may be to diminish or totally prevent price competition. Indeed, agreements to divide markets or fix production quotas can in a sense be seen as covert price-fixing agreements, in that they limit the extent to which firms can compete with one another on price. These and other similar agreements will be dealt with separately later in this chapter.

### (A) Article 101(1)

Article 101(1) specifically provides that agreements, decisions and concerted practices which ‘directly or indirectly fix purchase or selling prices or any other trading conditions’ may be caught. Many aspects of Article 101(1) have been discussed earlier in this book. The expressions ‘agreement’ and ‘concerted practice’ are given a wide meaning<sup>86</sup>: specifically, the Commission may find a ‘single, overall agreement’<sup>87</sup>, may adopt a dual classification of an agreement ‘and/or’ a concerted practice<sup>88</sup>; and attendance at meetings at which prices are discussed between competitors is highly incriminating<sup>89</sup>. The EU Courts and the Commission regard price-fixing agreements as having as their *object* the restriction of competition for the purposes of Article 101(1), so that there is no need also to show that they have the effect of doing so<sup>90</sup>. The Commission has said that it is not obliged to engage in market definition<sup>91</sup> nor to consider the issue of countervailing buyer power<sup>92</sup> in cartel cases. However, it is necessary to show that an agreement will have an appreciable effect on competition<sup>93</sup> and on trade between Member States<sup>94</sup> for there to be an infringement of Article 101(1). Furthermore Article 101(1) is capable of being

<sup>85</sup> See Posner *Antitrust Law* (University of Chicago Press, 2nd ed, 2002), ch 4.

<sup>86</sup> See ch 3, ‘Agreements, Decisions and Concerted Practices’, pp 99ff.

<sup>87</sup> See ch 3, ‘The concept of a “single, overall agreement”’, pp 103–104.

<sup>88</sup> Ch 3, ‘Agreement “and/or” concerted practice’, pp 102–103.

<sup>89</sup> Ch 3, ‘The concept of a “single, overall agreement”’, pp 103–104.

<sup>90</sup> Ch 3, ‘Market sharing, quotas, collective exclusive dealing’, pp 122–123; note that there are some exceptional circumstances in which price fixing has been found not to restrict competition by object, but to do so by effect: *ibid*, ‘Refinement of the range of agreements within the object box’, pp 124–125.

<sup>91</sup> See eg *Candle Waxes*, Commission decision of 1 October 2008, para 279, on appeal Cases T-540/08 etc *Esso ea v Commission*, not yet decided; see however the General Court’s judgement in Case T-199/08 *Ziegler v Commission* [2011] ECR II-000, [2011] 5 CMLR 261, paras 41–45.

<sup>92</sup> *Candle Waxes*, para 322; see also *Bananas*, Commission decision of 15 October 2008, para 282, on appeal Cases T-587/08 etc *Fresh Del Monte Produce v Commission*, not yet decided.

<sup>94</sup> Ch 3, ‘The Effect on Trade between Member States’, pp 144–149.

applied extraterritorially to agreements entered into outside but implemented within the EU<sup>95</sup>. This section examines more closely the application of Article 101(1) to price-fixing agreements.

### (i) Price fixing in any form is caught

It is clear from the decisions of the Commission and the judgments of the EU Courts that it is not just blatant price fixing that is caught, but that Article 101(1) will catch any agreement that might directly or indirectly suppress price competition. In *IFTRA Rules on Glass Containers*<sup>96</sup> the Commission condemned rules of a glass manufacturers' association which might reduce price competition by including an obligation not to offer discounts, an open information scheme, the adoption of a common accounting procedure and a term providing for the charging of uniform delivered prices. In this decision the Commission pointed out that in the particular product market the potential for non-price competition was weak, the corollary being that maintenance of price competition was particularly important. An agreement not to discount off published prices was held to infringe Article 101(1) in *FETTCSA*<sup>97</sup>, even though the parties had not expressly agreed on the level of their published prices. In *Vimpoltu*<sup>98</sup> an agreement to observe maximum discounts and to offer the same credit terms was caught. In *Italian Flat Glass*<sup>99</sup> the participants in the cartel had agreed not only to fix prices, but also to offer identical discounts and to ensure that these were applied downstream in the market.

Many other decisions have condemned agreements which might directly or indirectly facilitate level pricing. Prior consultation on price lists, with a commitment not to submit quotations before such consultation, is prohibited<sup>100</sup>. A substantial body of material on information agreements now exists<sup>101</sup>, restrictions upon advertising may be caught<sup>102</sup>, as are agreements on terms and conditions which limit price competition<sup>103</sup>, agreements on recommended prices<sup>104</sup>, maximum pricing<sup>105</sup> and collective resale price maintenance<sup>106</sup>. Objection has been taken to a scheme whereby members of a cartel at times refused to sell and at others themselves purchased zinc on the London Metal Exchange in order to

<sup>95</sup> This jurisdictional issue has been raised by some of the appeals to the General Court in *Air Cargo*: see eg Case T-38/11 *Cathay Pacific Airways v Commission*, not yet decided; see further ch 12, 'The Extraterritorial Application of EU Competition Law', pp 495–499.

maintain its price<sup>107</sup>. Where an industry considers that cooperation is necessary because of the depressed state of the market, this is a matter which should be weighed at the stage of considering whether the terms of Article 101(3) are met.

Price fixing as part of a strategy to isolate national markets is caught<sup>108</sup>, and agreements between distributors are caught as well as between producers<sup>109</sup>. An agreement the effect of which is to maintain a traditional price differential between two geographical markets will infringe Article 101(1)<sup>110</sup>. Fixing the price of imports into the EU has been caught<sup>111</sup>, as has manipulating the price of exports within the EU<sup>112</sup>.

In the case of *British Sugar*<sup>113</sup> the Commission did not find that the prices for sugar had actually been fixed, but that the parties to the agreement/concerted practice could rely on the other participants to pursue a collaborative strategy of higher pricing in ‘an atmosphere of mutual certainty’<sup>114</sup>. In *Fenex*<sup>115</sup> the Commission considered that the regular and consistent practice of drawing up and circulating recommended tariffs to members of a trade association infringed Article 101(1)<sup>116</sup>. In *Bananas*<sup>117</sup> the Commission imposed a fine of €60.3 million on three producers of bananas for holding bilateral phone calls to discuss or disclose their pricing intentions. The Commission’s view was that these discussions reduced uncertainty as to the quotation prices set by the producers and concerned the fixing of prices<sup>118</sup>. Where undertakings agree to increase prices, and announce to their customers what those increases will be, it is irrelevant to a finding of infringement of Article 101 that prices are subsequently negotiated with individual customers that differ from what was agreed: the General Court has stated that price announcements always have an impact on the final outcome even if the final price is negotiated with the customer<sup>119</sup>.

The fact that an undertaking is not active on the cartelised market does not preclude a finding that it participated in the cartel<sup>120</sup>. It is no defence that a participant in a cartel sometimes does not respect the agreed price increases<sup>121</sup>. Likewise undertakings cannot justify price fixing by claiming that it did not have a direct effect on the prices paid by

consumers<sup>122</sup>. The Commission may reduce the fine where an undertaking's involvement in a cartel is limited, as happened in the cases of *DRAM*<sup>123</sup> and *Prestressing Steel*<sup>124</sup>.

## (ii) Joint selling agencies

The Commission is wary of joint selling agencies, which it regards as horizontal cartels and generally unlikely to benefit from Article 101(3)<sup>125</sup>, unless they are established pursuant to some other permissible form of cooperation, such as a research and development agreement or a specialisation agreement<sup>126</sup>.

Joint selling by sporting associations such as UEFA (a European association of national football associations) may infringe Article 101(1): the Commission will consider both the horizontal effects of joint selling, for example in so far as it prevents the individual sale of broadcasting rights by particular football clubs, as well as any vertical foreclosure effects<sup>127</sup>.

## (iii) Horizontal price fixing in conjunction with other infringements of Article 101(1)

In many cases undertakings have been found guilty of price fixing in conjunction with other types of horizontal collusion. In *Polypropylene*<sup>128</sup> the Commission found price fixing and market sharing; in *Belgian Roofing Felt*<sup>129</sup> the parties were found guilty of price fixing, establishing production quotas and taking collective action to prevent imports into Belgium; in *Italian Flat Glass*<sup>130</sup> the Commission condemned firms for the apportionment of quotas and agreements to exchange products as well as for fixing prices. In *Pre-Insulated Pipes*<sup>131</sup> the Commission identified infringements of virtually every kind, including market sharing, systematic price fixing, collective tendering, exchanging sensitive sales information and attempts to eliminate the only substantial non-member of the cartel. As Karel Van Miert, the former Commissioner for Competition, said: 'it is difficult to imagine a worse cartel'<sup>132</sup>. In *Amino Acids*<sup>133</sup> the Commission found agreements to fix prices, to determine quotas and to exchange information. In *Methylglucamine*<sup>134</sup> the Commission imposed a fine on Aventis and Rhône-Poulenc for both price fixing and

<sup>134</sup> OJ [2004] L 38/18, [2004] 4 CMLR 1062.

market sharing. In *Plasterboard*<sup>135</sup> the Commission found market sharing combined with the exchange of information on future prices and sales volumes; the decision on this point was affirmed by the General Court<sup>136</sup>. In *Industrial Bags*<sup>137</sup> the Commission imposed fines of €290.71 million on 16 firms for agreeing on prices and sales quotas by geographical area, sharing the orders of large customers, organised collusive bidding and the exchange of information on sales volumes. In *Candle Waxes* the Commission condemned the division of markets and exchange of information by certain firms to support fixing prices in that industry<sup>138</sup>.

#### (iv) Price fixing in the services sector

Price fixing in the services sector is also subject to Article 101(1)<sup>139</sup>. In *Eurocheque: Helsinki Agreement*<sup>140</sup> the Commission imposed a fine of €6 million where French banks had agreed between themselves on the commissions they would charge to customers and on their amount<sup>141</sup>; the decision was partially annulled and the fines reduced on appeal<sup>142</sup>. In *Bank charges for exchanging euro-zone currencies – Germany* the Commission fined five banks a total of €120.8 million for fixing the charges for exchanging currencies in the euro zone<sup>143</sup>; however the decision was annulled on appeal for lack of evidence<sup>144</sup>. In *Austrian Banks – ‘Lombard Club’* the Commission imposed fines of €124.26 million on eight Austrian banks for their participation in a wide-ranging price cartel<sup>145</sup>; the substance of this decision was upheld on appeal but one of the fines was slightly reduced<sup>146</sup>. A fine of €1 million was imposed in *Distribution of Railway Tickets by Travel Agents*<sup>147</sup> where the Commission found that the International Union of Railways was responsible for price fixing in the sale of railway tickets; the decision was annulled on appeal, as the Commission had proceeded under the wrong procedural regulation<sup>148</sup>. In 1999, in the *Greek Ferries* decision, fines were imposed in the case of price fixing in ferry services between Italy and Greece<sup>149</sup>. The *Air Cargo* case in 2010 has already been referred to above.

<sup>147</sup> OJ [1992] L 366/47.

<sup>148</sup> Case T-14/93 *Union Internationale des Chemin de Fer* [1995] ECR II-1503, [1996] 5 CMLR 40.

<sup>149</sup> OJ [1999] L 109/24, [1999] 5 CMLR 47, upheld on appeal Cases T-56/99 etc *Marlines v Commission* [2003] ECR II-5225, [2005] 5 CMLR 28.

The Commission is concerned about restrictions of competition in the professional services sector<sup>150</sup>. In *Belgian Architects*<sup>151</sup> it imposed a fine of €100,000 on the Belgian Architects' Association for adopting a minimum fee scale for the provision of architectural services in Belgium. In *ONP*<sup>152</sup> the Commission imposed a fine of €5 million on the National Pharmaceutical Society for stipulating minimum prices for clinical laboratory tests in France.

#### (v) Price fixing in regulated markets

The Commission will examine particularly carefully markets in which price competition is already limited by extraneous factors, in order to ensure that the parties themselves do nothing further to limit competition<sup>153</sup>, and its decision will not be affected by the fact that the state itself sanctioned or extended the effect of a price-fixing agreement<sup>154</sup>.

#### (vi) Buyers' cartels

In some cases buyers, rather than sellers, are accused of cartel activity. In *Spanish raw tobacco*<sup>155</sup> and *Italian Raw Tobacco*<sup>156</sup> the Commission found tobacco processors had colluded on the prices and other trading conditions that they would offer to tobacco growers and other intermediaries; on the allocation of suppliers and quantities; on the exchange of information in order to coordinate their purchasing behaviour; and on the coordination of bids for public auctions. The Commission considered that competition was restricted by object rather than effect<sup>157</sup>, even though an agreement to pay lower prices than might have been paid in the absence of the agreement might have been expected to lead to lower prices for consumers. In the Commission's view an agreement on purchasing eliminates the autonomy of strategic decision-making and competitive conduct, preventing the undertakings concerned from competing on the merits and enhancing their position vis-à-vis less efficient firms<sup>158</sup>.

<sup>150</sup> See *European Competition Law Annual: The Relationship Between Competition Law and the Liberal Professions* (Hart Publishing, 2006, eds Ehlermann and Atanasiu); *Overview of National Competition Authorities' Advocacy and Enforcement Activities in the Area of Professional Services* (October 2006), available at [www.ec.europa.eu/competition/sectors/professional\\_services/overview\\_en.html](http://www.ec.europa.eu/competition/sectors/professional_services/overview_en.html).

<sup>151</sup> Commission decision of 24 June 2004; see de Waele 'Liberal professions and recommended prices: the Belgian architects case' (2004) (Autumn) *Competition Policy Newsletter* 44.

<sup>152</sup> Commission decision of 8 December 2010, on appeal Case T-90/11 *ONP v Commission*, not yet decided; the General Court dismissed an appeal by the associations against an inspection in this case: Case T-23/09 *CNOP and CCG v Commission* [2010] ECR II-000.

<sup>153</sup> Cases 209/78 etc *Van Landewyck v Commission* [1980] ECR 3125, [1981] 3 CMLR 134; similarly see Case 85/76 *Hoffmann-La Roche v Commission* [1979] ECR 461, [1979] 3 CMLR 211, para 123; *British Sugar plc* OJ [1999] L 76/1, [1999] 4 CMLR 1316, para 87, upheld on appeal Case T-202/98 *Tate & Lyle v Commission* [2001] ECR II-2035, [2001] 5 CMLR 859.

<sup>155</sup> OJ [2007] L 102/14, [2006] 4 CMLR 866, substantially upheld on appeal Case T-24/05 *Alliance One International v Commission* [2010] ECR II-000, [2011] 4 CMLR 545; Case T-29/05 *Deltafina SpA v Commission* [2010] ECR II-000, [2011] 4 CMLR 467, and Case T-37/05 *World Wide Tobacco España v Commission* [2011] ECR II-000; on appeal Cases C-537/10 P etc, not yet decided.

<sup>156</sup> OJ [2006] L 353/45, [2006] 4 CMLR 1766, upheld on appeal Case T-12/06 *Deltafina SpA v Commission*, [2011] ECR II-000.

<sup>157</sup> See ch 3, 'The "object or effect" of preventing, restricting or distorting competition', pp 117ff on the 'object or effect' distinction in Article 101(1).

<sup>158</sup> See *Italian Raw Tobacco*, para 285.

**(B) Article 101(3)**

As would be expected the Commission has stated that price-fixing agreements are unlikely to satisfy Article 101(3)<sup>159</sup>. This attitude is manifested in Regulation 1217/2010<sup>160</sup> on research and development agreements and Regulation 1218/2010<sup>161</sup> on specialisation agreements: neither block exemption is available to agreements containing obvious restrictions of competition, such as the fixing of prices, the limitation of output or the allocation of markets or customers.

However it should be recalled that, as a matter of law, it is always open to the parties to an agreement to argue that the terms of Article 101(3) are satisfied<sup>162</sup>. On a few occasions the Commission has permitted arrangements which could limit price competition. For example in *Uniform Eurocheques*<sup>163</sup> the Commission considered that the criteria of Article 101(3) were satisfied in the case of an agreement whereby commissions for the cashing of Eurocheques were fixed: this meant that consumers using such cheques knew that they would be charged a common amount throughout the EU. In *Insurance Intermediaries*<sup>164</sup> the Commission indicated its intention to authorise agreements between non-life insurers to fix maximum discounts. These and other<sup>165</sup> decisions suggest that the Commission might take a slightly more indulgent approach towards agreements that limit price competition in the services sector than in the goods sector.

The Commission's decision in *Reims II*<sup>166</sup>, which authorised an agreement fixing the level of cross-border mail charges between 17 postal operators, was discussed in chapter 4<sup>167</sup>. In *Visa International – Multilateral Interchange Fee*<sup>168</sup> the Commission stated that it is not the case that an agreement concerning prices is always to be classified as a restriction by object or incapable of satisfying Article 101(3)<sup>169</sup>: in that decision it authorised the multilateral interchange fee ('MIF') agreed upon between 'acquiring' and 'issuing' banks within the Visa system until the end of 2007. In 2010 the Commission accepted commitments from Visa Europe under Article 9 of Regulation 1/2003<sup>170</sup> in respect of the MIF for its debit cards<sup>171</sup>. In *MasterCard*<sup>172</sup> the Commission decided in December 2007 that the

<sup>165</sup> See also *Nuovo CEGAM* OJ [1984] L 99/29, [1984] 2 CMLR 484; *P and I Clubs* OJ [1985] L 376/2, [1989] CMLR 178; *Associazione Bancaria Italiana* OJ [1987] L 43/51, [1989] 4 CMLR 238; *Tariff Structures in the Combined Transport of Goods* OJ [1993] L 73/38.

<sup>166</sup> OJ [1999] L 275/17, [2000] 4 CMLR 704; the Commission extended the application of Article 101(3) to this agreement until 2006: OJ [2004] L 56/76; see also Commission Press Release IP/03/1438, 23 October 2003.

<sup>167</sup> See ch 4, '*Matra Hachette v Commission*', pp 153–155.

<sup>168</sup> OJ [2002] L 318/17, [2003] 4 CMLR 283; for comment see Gyselen 'Multilateral Interchange Fees under EU Antitrust Law: A One-Sided View on a Two-Sided Market' (2005) *Columbia Business Law Review* 703.

<sup>169</sup> *Ibid*, para 79.

<sup>170</sup> See ch 7, 'Article 9: commitments', pp 255–261 on Article 9 of Regulation 1/2003.

<sup>171</sup> Commission decision of 8 December 2010; the commitments do not cover Visa Europe's MIFs for consumer credit and deferred debit card transactions, which remain under investigation by the Commission.

<sup>172</sup> Commission decision of 19 December 2007; see Repa, Malczewska, Teixeira and Martinez Rivero 'Commission prohibits MasterCard's multilateral interchange fees for cross-border card payments in the EEA' (2008) 1 *Competition Policy Newsletter* 1.

MIF imposed in that card system infringed Article 101 because its level raised the cost of accepting payments with MasterCard without increasing efficiencies. The decision has been appealed<sup>173</sup>. In the meantime the level of the MIFs of both Visa and MasterCard are under scrutiny under many other systems of competition law, including in the UK<sup>174</sup>.

In *AuA/LH*<sup>175</sup> the Commission considered that a ‘lasting alliance’ between Austrian Airlines and Lufthansa which entailed joint pricing and market sharing<sup>176</sup> satisfied the criteria of Article 101(3) as the alliance would result in ‘important synergistic effects and attractive connections for consumers’: the Commission could foresee cost savings, improved network connection, better planning of frequencies, a higher load factor, improved organisation of sales systems and groundhandling services, potential for new sales channels such as e-ticketing and access, on Austrian Airlines’s part, to a superior airmiles scheme<sup>177</sup>. In *IFPI ‘Simulcasting’*<sup>178</sup> the Commission concluded that an agreement that facilitated the grant of international licences of copyright to ‘simulcast’ music on the Internet involved price restrictions<sup>179</sup> but that the terms of Article 101(3) were satisfied since it led to efficiencies in the field of collective management of copyright and neighbouring rights<sup>180</sup>.

### (C) Collective dominance

The extent to which parallel pricing might amount to an infringement of Article 102 is considered in chapter 14<sup>181</sup>.

## 4. Horizontal Market Sharing

Competition may be eliminated between independent undertakings in other ways than through direct or indirect price fixing. One way of doing so is for firms to agree to apportion particular markets between themselves. For example, three firms in the UK might agree that each will have exclusivity in a particular geographical area and that none will poach on the others’ territories; a similar device is division of the market according to classes of customers, for example that one firm will supply trade customers only, another retailers and another public institutions. Geographical market-sharing agreements may be more effective than price fixing from the cartel’s point of view, because the expense and difficulties of fixing common prices are avoided: the agreement means that there will be no price competition anyway. Policing the agreement is also relatively simple, because the mere presence of a competitor’s goods on one’s own ‘patch’ reveals cheating. Geographical market sharing is particularly restrictive from the consumer’s point of view since it diminishes choice: at least where the parties fix prices a choice of product remains and it is possible that the restriction of price competition will force the parties to compete in other ways. Market-sharing agreements in the EU context may be viewed particularly seriously because, apart from the obviously anti-competitive effects already

<sup>173</sup> Case T-111/08 *MasterCard v Commission*, not yet decided.

<sup>174</sup> See ‘Horizontal Price Fixing’, pp 554–555 below.

<sup>175</sup> OJ [2002] L 242/25, [2002] 4 CMLR 487; for legal and regulatory reasons these undertakings were unable to merge in the sense of the EU Merger Regulation which is why this case was conducted under Article 101.

<sup>176</sup> OJ [2002] L 242/25, [2002] 4 CMLR 487, para 76.

<sup>177</sup> *Ibid*, paras 87–88.

<sup>178</sup> OJ [2003] L 107/58.

<sup>179</sup> *Ibid*, paras 61–80.

<sup>180</sup> *Ibid*, paras 84–123.

<sup>181</sup> See ch 14, ‘Abuse of collective dominance under Article 102’, pp 579–582.

described, they serve to perpetuate the isolation of geographical markets and to retard the process of single market integration which is a prime aim of the EU.

It is sometimes argued in favour of geographical market-sharing agreements that they should be permitted since they reduce the distribution costs of producers, who are relieved of the need to supply outside their exclusive geographical territories or to categories of customers other than those allotted to them. This is unconvincing, as it does not explain why the benefit claimed is dependent upon the horizontal agreement. If a producer found it profitable to do so, it would want to sell outside its allotted territory or class of customer and in determining the profitability of doing so it would take distribution costs into account. All the agreement does is to foreclose this possibility. Potential competition is removed with the same adverse effect upon consumer welfare that other hard-core restrictions may produce: a reduction in output and an increase in price.

It is not inconceivable that in some cases market sharing might be beneficial: in other words that restrictions accepted might enhance efficiency, in particular by enabling firms to compete more effectively with large undertakings. For example, a number of small retailers may decide to combine to promote their own 'house-label' in order to try to match other multiple chains<sup>182</sup>. Individually they may be weak and unable to undertake the enormous costs involved in advertising and promotion, but in combination they may be able to do so. It could be argued that each retailer should be able to claim an exclusive sales territory so that it will be encouraged to take its full part in the campaign in the knowledge that it will reap the benefit in its area. The corollary is that without this incentive it will not promote the brand label so actively and enthusiastically. The argument is similar to that applicable to many vertical restraints<sup>183</sup>. The conclusion ought therefore to be that in some exceptional cases horizontal market sharing should be permitted.

### (A) Article 101(1)

There have been many decisions under Article 101 on market sharing, which is specifically mentioned in Article 101(1)(c)<sup>184</sup>. There are two obvious reasons for this. First, geographical market sharing can be achieved relatively easily in the EU context, since there are many ways of segregating national markets from one another. Until a truly internal market is established, the factual, legal and economic disparities between national markets will continue to act as an obstacle to inter-state trade. Secondly, one of the priorities of the Commission is to take action to prevent anything which might inhibit market penetration. It can be anticipated that horizontal market sharing will be punished severely. In *Peroxygen Products*<sup>185</sup> fines totalling €9 million were imposed on five producers which, from 1961 until at least 1980, operated a 'home market' agreement which covered most of the EU. A consequence of this was that prices for consumers varied widely between different geographical markets. In *Soda-ash – Solvay/ICI*<sup>186</sup> the Commission imposed fines on Solvay and ICI for geographical market sharing.

<sup>182</sup> See eg Commission's *Guidelines on Horizontal Cooperation Agreements* OJ [2011] C 11/1, para 252.

<sup>183</sup> See ch 16, 'Vertical agreements: possible benefits to competition', pp 626–628.

<sup>184</sup> See ch 3, 'Market sharing, quotas, collective exclusive dealing', pp 122–123.

<sup>185</sup> OJ [1985] L 35/1, [1985] 1 CMLR 481.

<sup>186</sup> OJ [1991] L 152/1, [1994] 4 CMLR 454: this investigation resulted in three other decisions imposing fines on ICI and Solvay for breaches of Article 102: *Soda-ash – Solvay* OJ [1991] L 152/21, *Soda-ash – ICI* OJ [1991] L 152/40, both reported at [1994] 4 CMLR 645 and on Solvay and CFK for market sharing: *Soda ash – Solvay, CFK* OJ [1991] L 152/16, [1994] 4 CMLR 482; the decisions were annulled for procedural reasons in Cases T-30/91 etc *Solvay v Commission* [1995] ECR II-1775, [1996] 5 CMLR 57, and the General Court's judgment was upheld in Cases C-286/95 P etc *Commission v ICI* [2000] ECR I-2341, [2000] 5 CMLR 413 and 454; the Commission readopted the decisions against Solvay and ICI in December 2000: OJ [2003] L 10/1,

In *Quinine*<sup>187</sup> the Court of Justice upheld the Commission's decision<sup>188</sup> to fine the members of the quinine cartel who had indulged in price fixing, the allocation of quotas and market division, and there have been many other similar cases since<sup>189</sup>. The infringements in the *Pre-Insulated Pipes*<sup>190</sup> decision were wide-ranging. The Commission accused the parties of dividing national markets and, ultimately, the whole European market amongst themselves; of price fixing; and of taking measures to hinder the one substantial competitor outside the cartel and to drive it out of the market. The fines amounted to €92 million. In some cases there have been elements both of vertical and horizontal market division; distributors must refrain from market division as well as producers<sup>191</sup>. In *Cement*<sup>192</sup> the Commission found that cement producers had agreed on the 'non-transshipment of cement to home markets', which prohibited any export of cement within Europe which could threaten neighbouring markets. In *Seamless Steel Tubes*<sup>193</sup> the Commission found that eight producers of stainless steel tubes had colluded to protect their respective domestic markets; the fines imposed totalled €99 million<sup>194</sup>, reduced on appeal to the General Court to €86 million because the Commission had failed to establish the entire duration of the infringement<sup>195</sup>.

In *Gas Insulated Switchgear*<sup>196</sup> fines of €750 million were imposed on a cartel which, amongst other things, divided the world market for switchgear apparatus with the result that Japanese undertakings did not compete for contracts in Europe and vice versa<sup>197</sup>; there was also an agreement among the European participants to respect each other's home market rights<sup>198</sup>. In *PO/Needles*<sup>199</sup> the Commission imposed fines of €60 million on a 'pure' product and geographic market-sharing agreement between Coats and Prym; on appeal the fines were reduced from €60 million to €47 million<sup>200</sup>.

An unusual feature of the cartel in *Luxembourg Brewers* is that this case concerned a written cooperation agreement between five brewers, which sought to defend the

<sup>197</sup> Commission decision of 24 January 2007, para 114.

<sup>198</sup> *Ibid*, para 115.

<sup>199</sup> Commission decision of 26 October 2004.

<sup>200</sup> Cases T-30/05 etc [2007] ECR II-107.

Luxembourg market against imports from other Member States. The Commission considered that the agreement had as its object the restriction of competition. The Commission concluded that the parties could not avail themselves of the *de minimis* Notice<sup>201</sup>, since ‘hard-core’ restrictions can infringe Article 101(1) even below the thresholds in that Notice<sup>202</sup>, and even where a participant is a small or medium-sized undertaking<sup>203</sup>.

In the *Gas*<sup>204</sup> case the Commission condemned an agreement between E.ON and GDF to refrain from selling gas transported from Russia over a jointly-owned pipeline into each other’s home markets. The Commission found that the agreement helped E.ON and GDF to maintain strong positions at a time of market liberalisation; each firm was fined €533 million. In *Power Transformers* fines totalling €67.6 million were imposed on seven producers which operated a ‘gentleman’s agreement’ to share the Japanese and European markets<sup>205</sup>.

Article 101(1) has also been applied to horizontal agreements involving customer restrictions<sup>206</sup>.

### (B) Article 101(3)

A horizontal geographical market-sharing agreement is unlikely to satisfy the criteria of Article 101(3), in view of the overriding goal of achieving single market integration. However in exceptional circumstances Article 101(3) may be applicable to market sharing that is indispensable for improvements in efficiency<sup>207</sup>.

## 5. Quotas and Other Restrictions on Production

A further way in which a cartel might be able to earn supra-competitive profits is by agreeing to restrict its members’ output. If output is reduced, price will rise; the oil cartel operated by OPEC does not fix prices as such, but instead determines how much oil each member country will export. Horizontal agreements to limit production need to be carefully monitored, because over-production by some members of the cartel would result in the market price falling, unless the scheme is run in conjunction with a price-fixing system, as often happens. In the absence of price fixing, the cartel members will often agree on a quota system whereby they will each supply a specified proportion of the entire industry output within any given period. As in the case of price fixing there will be costs involved in negotiating these quotas, because some firms will be larger or more efficient or expanding more rapidly than others so that there may have to be hard and protracted bargaining. The quotas having been fixed, some mechanism will have to be established to

<sup>201</sup> OJ [1997] C 372/13, [1998] 4 CMLR 192.

<sup>202</sup> *Ibid*, para 11; the same conclusion would be reached under the current Notice: see OJ [2001] C 368/13, [2002] 4 CMLR 699, para 11(1)(c); on the current Notice see ch 3, ‘the Commission’s *Notice on Agreements of Minor Importance*’, pp 140–144.

<sup>203</sup> *Notice on Agreements of Minor Importance* OJ [2001] C 368/13, [2002] 4 CMLR 699, para 3.

<sup>204</sup> Commission decision of 8 July 2009, on appeal Cases T-360/09 etc *E.ON Ruhrgas and E.ON v Commission*, not yet decided.

<sup>205</sup> Commission decision of 7 October 2009, on appeal Cases T-517/09 etc *Alstom v Commission*, not yet decided.

<sup>206</sup> See eg *Re William Prym-Werke and Beka Agreement* OJ [1973] L 296/24, [1973] CMLR D250 where the Commission required the deletion of a customer restriction clause; *Atka Al S v BP Kemi A/S* OJ [1979] L 286/32, [1979] 3 CMLR 684 where BP was to supply customers with consumption of at least 100,000 gallons; *Belgian Roofing Felt* OJ [1986] L 232/15, [1991] 4 CMLR 130.

<sup>207</sup> See *Transocean Marine Paint Association* JO [1967] L 163/10, [1967] CMLR D9.

prevent cheating. This may be done, for example, by requiring detailed information about production and sales to be supplied to a trade association or ‘cartel consultancy’. The agreement will also commonly provide a system whereby those that exceed their allocated quotas have to make compensating payments to those who, as a necessary corollary, fail to dispose of theirs. Complicated rules may have to be settled on how such payments are to be made. A firm which ‘over-produces’ will have to sell its products on the market at a higher price than it would wish if it is to make a profit and make a payment to the other cartel members; the loss to the consumer of such schemes is clear.

Some agreements which involve restrictions of production may be beneficial: specialisation agreements, joint production, research and development agreements, restructuring cartels and standardisation agreements may in some circumstances be considered desirable. This chapter is concerned with hard-core restrictions on production which limit output without producing any compensating benefits; agreements involving restrictions of production which may be ancillary to some legitimate objective will be discussed in chapter 15.

### (A) Article 101(1)

Article 101(1)(b) specifically applies to ‘limit or control production, markets, technical development, or investment’ and has been applied to agreements to limit production on many occasions. Straightforward quota systems have often been condemned<sup>208</sup>.

In *Peroxygen Products*<sup>209</sup> the Commission found that, as well as sharing markets geographically, members of the cartel had entered into a series of detailed national agreements dividing markets in agreed percentages. In *MELDOC*<sup>210</sup> a quota and compensation scheme in the dairy sector in the Netherlands was held to infringe Article 101, and the Commission imposed fines totalling €6,565,000. An exacerbating fact in this decision was the fact that the Dutch milk producers also agreed to a coordinated response to the threat posed to their market position by imports from other Member States. An agreement not to expand production without the approval of rival firms infringes Article 101(1)<sup>211</sup> and the Commission will not easily be persuaded that a quota scheme will bring about beneficial specialisation<sup>212</sup>. It is not permissible to establish a joint venture to apportion orders between competitors<sup>213</sup>, nor will the Commission allow joint production which simply limits competition without producing any compensating benefits<sup>214</sup>. Not infrequently quota agreements confer on particular undertakings exclusive or priority rights in supplying their own domestic markets: they will certainly not be tolerated<sup>215</sup>.

An interesting example of a quota scheme condemned by the Commission is *Associated Lead Manufacturers Ltd (White Lead)*<sup>216</sup>. Firms producing white lead in the UK, Germany and the Netherlands agreed that each would supply one-third of the white lead to be

<sup>208</sup> See eg *Zinc Producer Group* OJ [1984] L 220/27, [1985] 2 CMLR 108; *Benelux Flat Glass* OJ [1984] L 212/13, [1985] 2 CMLR 350; also the various cement cases decided by the Commission involving quota arrangements: see *Re Cementregeling voor Nederland* JO [1972] L 303/7, [1973] CMLR D149; *Re Cimbel* JO [1972] L 303/24, [1973] CMLR D167; *Re Nederlandse Cement-Handelmaatschappij NV* JO [1972] L 22/16, [1973] CMLR D257; see also *Belgian Roofing Felt* OJ [1986] L 232/15, [1991] 4 CMLR 130; *Welded Steel Mesh* OJ [1989] L 260/1, [1991] 4 CMLR 13.

<sup>213</sup> *Air Forge* Commission’s XIIth Report on Competition Policy (1982), point 85.

<sup>214</sup> *Re WANO Schwarzpulver GmbH* OJ [1978] L 322/26, [1979] 1 CMLR 403.

<sup>215</sup> Case 41/69 *ACF Chemiefarma NV v Commission* [1970] ECR 661.

<sup>216</sup> OJ [1979] L 21/16, [1979] 1 CMLR 464.

exported to non-EU countries. A central office was established which gathered information from them on their deliveries of white lead. The producers supplied this office with details of *all* deliveries, including exports to other EU countries. The Commission held that in practice the quota scheme related to all exports, that is to say to intra-EU as well as extra-EU trade, and that it clearly amounted to an attempt to limit and control markets within the terms of Article 101(1)(b). Furthermore the Commission held that it was irrelevant that the quotas were not always meticulously observed: an agreement did not cease to be anti-competitive because it was temporarily or even repeatedly circumvented by one of the parties to it<sup>217</sup>.

In *Compagnie Royale Asturienne des Mines SA and Rheinzink GmbH v Commission*<sup>218</sup> the Court of Justice held that it was an infringement of Article 101(1) for competitors to supply products to each other on a continuing basis. Whereas this might be acceptable to deal with certain emergencies, it was not permissible for competitors to enter into agreements of indeterminate length and for considerable quantities. The effect of doing so was to institutionalise mutual aid in lieu of competition, producing conditions on the market analogous to those brought about by quota arrangements. In *Soda-ash – Solvay/CFK*<sup>219</sup> the Commission condemned an agreement whereby Solvay agreed to allow CFK a guaranteed minimum sales tonnage and to purchase from it any shortfall in order to compensate it. In *Italian Flat Glass*<sup>220</sup> the Commission condemned an agreement between manufacturers to exchange products and agree quantities sold to particular customers. The General Court overturned this aspect of the decision for lack of evidence<sup>221</sup>, but it did not question the principle that such an agreement restricts competition. The first fine for a substantive infringement of Article 101 in the maritime transport sector was imposed in *French-West African Shipowners' Committees*<sup>222</sup> upon shipowners which had agreed to a cargo-sharing system in respect of traffic between France and various west African countries.

An elaborate 'price before tonnage scheme' was found to be anti-competitive by the Commission in *Cartonboard*<sup>223</sup> which involved the 'freezing' of market shares, the constant monitoring and analysis of them, and the coordination of 'machine downtime' in an effort to sustain prices and control supply. In *Europe Asia Trades Agreement*<sup>224</sup> the Commission concluded that an agreement for 'capacity non-utilisation' coupled with the exchange of information in relation to maritime transport infringed Article 101(1); in its view the agreement artificially limited liner shipping capacity, thereby reducing price competition<sup>225</sup>. In *Danish Association of Pharmaceutical Producers and the Danish Ministry for Health*<sup>226</sup> the Commission investigated a quota arrangement aimed at controlling public spending on price subsidies for pharmaceuticals, but closed the file after the parties agreed not to renew the arrangement. In *Zinc Phosphate*<sup>227</sup> the Commission considered that the 'cornerstone' of the cartel was the allocation of sales quotas, although

<sup>217</sup> Similarly see *Re Cast Iron and Steel Rolls* OJ [1983] L 317/1, [1984] 1 CMLR 694 where the Commission fined various French undertakings which operated a quota scheme in respect of deliveries to the Saarland in Germany.

<sup>227</sup> OJ [2003] L 153/1.

it also found that there was an agreement on the fixing of ‘bottom’ or recommended prices and some allocation of customers<sup>228</sup>.

In *Gas Insulated Switchgear*<sup>229</sup> the Commission found that not only were the members of the cartel dividing the global market along geographical lines, but that they had also agreed worldwide quotas; and that the agreed European quota had itself been divided between the European undertakings in the cartel<sup>230</sup>. In *Heat Stabilisers* the Commission found agreements to establish quotas, to fix prices and to exchange information which had been supervised by a consultancy firm<sup>231</sup>.

## (B) Article 101(3)

It is unlikely that the type of agreements discussed in this section would satisfy the criteria of Article 101(3), although agreements on capacity and production volume may be permitted when indispensable to efficiencies brought about by a specialisation agreement<sup>232</sup>.

## 6. Collusive Tendering

Collusive tendering is a practice whereby firms agree amongst themselves to collaborate over their response to invitations to tender. It is particularly likely to be encountered in the engineering and construction industries where firms compete for very large contracts; often the tenderer will have a powerful bargaining position and the contractors feel the need to concert their bargaining power. From a contractor’s point of view collusion over tendering has other benefits apart from the fact that it can lead to higher prices: it may mean that fewer contractors actually bother to price any particular deal (tendering itself can be a costly business) so that overheads are kept lower; it may mean that a contractor can make a tender which it knows will not be accepted (because it has been agreed that another firm will tender at a lower price) and yet which indicates that it is still interested in doing business, so that it will not be crossed off the tenderer’s list; and it may mean that a contractor can retain the business of its established, favoured customers without worrying that they will be poached by its competitors.

Collusive tendering takes many forms. At its simplest, the firms in question simply agree to quote identical prices, the hope being that in the end each will receive its fair share of orders. Level tendering, however, is extremely suspicious and is likely to attract the attention of the competition authorities, so that more subtle arrangements are normally made. The more complicated these are, the greater will be the cost to the tenderers themselves. One system is to notify intended quotes to each other, or more likely to a central secretariat, which will then cost the order and eliminate those quotes which it considers would result in a loss to some or all of the association’s members. Another system is to rotate orders, in which case the firm whose turn it is to receive an order will ensure

<sup>228</sup> Ibid, paras 64–72.

<sup>229</sup> Commission decision of 24 January 2007, substantially upheld on appeal Cases T-117/07 *Areva v Commission* [2011] ECR II-000, [2011] 4 CMLR 1421.

<sup>230</sup> Commission decision of 24 January 2007, paras 116–120.

<sup>231</sup> Commission decision of 11 November 2009, paras 380–387, on appeal Cases T-27/10 etc *Arkema v Commission*, not yet decided.

<sup>232</sup> See the Commission’s *Guidelines on Horizontal Cooperation Agreements* OJ [2011] C 11/1, paras 183–186; on specialisation agreements, see ch 15, ‘The block exemption for specialisation agreements: Regulation 1218/2010’, pp 601–603.

that its quote is lower than everyone else's. Again it may be that orders are allocated by the relevant trade association which will advise each member how it should proceed.

There is no doubt that collusive tendering is caught by Article 101(1)<sup>233</sup>. The Commission condemned the practice in *Re European Sugar Cartel*<sup>234</sup>. In *Building and Construction Industry in the Netherlands*<sup>235</sup> the Commission imposed a fine of €22.5 million for regulating prices and tendering in the Dutch building and construction industry. Twenty-eight associations of firms had established an organisation, the SPO, which established a system of uniform price-regulating rules which were binding on all members. The rules restricted competition, as members exchanged information with one another prior to tendering, concerted their behaviour in relation to the prices for tenders and operated a system whereby the 'entitled' undertaking could be certain of winning a particular contract. The fact that the Dutch Government approved of the system did not provide a defence under Article 101(1): rather it led to the Commission threatening proceedings against the Netherlands under Article 258 for having encouraged this anti-competitive behaviour. The Commission rejected arguments in favour of application of Article 101(3) in this decision<sup>236</sup>. In *Pre-Insulated Pipes*<sup>237</sup> the Commission concluded that the allocation of contracts on the basis of 'respect for existing "traditional" customer relationships', as well as various measures to support the bid-rigging, infringed Article 101(1)<sup>238</sup>.

The Commission found undertakings guilty of bid-rigging in *Gas Insulated Switchgear*<sup>239</sup> and *Elevators and Escalators*<sup>240</sup>. In the former the Commission imposed fines of €750 million for bid-rigging, price fixing, allocation of projects, market sharing and the exchange of information. In *Elevators and Escalators* the Commission imposed fines of €992 million on a series of undertakings for bid-rigging, price fixing, allocation of projects, market sharing and the exchange of information in relation to the installation and maintenance of lifts and escalators in Belgium, Germany, Luxembourg and the Netherlands<sup>241</sup>. The Commission said that the undertakings concerned informed each other of calls for tender and coordinated their bids according to pre-agreed cartel quotas. In *Car Glass*<sup>242</sup> the Commission imposed fines of €1.3 billion – the largest set of fines for one decision in the history of Article 101. The Commission objected to, amongst other illicit practices, cover pricing: that is to say bids that gave the pretence of competition, but that were deliberately set at a higher price than that of the member of the cartel whose turn it was to be awarded a contract<sup>243</sup>. Updated project lists were circulated among the members of the cartel, and there was an understanding that, where a member of the cartel

<sup>233</sup> Note that collusive tendering is also illegal in some countries, for example under a specific law in Germany and under the cartel offence in the UK where the agreement involves dishonesty: on the latter offence see ch 10, 'The cartel offence', pp 425–434.

had a long-standing or good relationship with a particular customer, it would get most of its business. In *Marine Hoses*<sup>244</sup> the parties were found guilty of allocating tenders, as well as price fixing, determining quotas, market sharing and exchanging sensitive information; and one of the infringements in *International Removal Services*<sup>245</sup> was cover pricing.

## 7. Agreements Relating to Terms and Conditions

We have seen above that apart from agreements directly fixing prices, supra-competitive profits can also be earned in other ways, for example by limiting production, fixing quotas and dividing markets geographically. Similarly restrictive agreements which limit competition in the terms and conditions offered to customers can have this effect. An agreement not to offer discounts is in effect a price restriction, as would be an agreement not to offer credit; it may well exist to buttress a price-fixing agreement. In some market conditions it might be that non-price competition is particularly significant because of the limited opportunities that exist for price cutting; for example, in an oligopolistic market one oligopolist might be able to attract custom because it can offer a better after-sales service or guarantees or a free delivery service<sup>246</sup>.

Although competition in terms and conditions is an important part of the competitive process, it is also true to say that in some circumstances standardisation of terms and conditions can be beneficial. This might have the effect of enhancing price transparency: that is to say a customer might be able more easily to compare the ‘real’ cost of goods or services on offer if he or she does not have to make some (possibly intuitive) allowances for the disparity in two sets of terms and conditions on offer. Again a trade association may have the knowledge and expertise (and legal resources) to draft appropriate standard form contracts which suit the needs of individual members whereas, acting individually, they would be unable to negotiate and conclude a set of terms and conditions suitable for their purpose. Competition law monitors the activities of trade associations carefully in order to ensure that they do not act as a medium for the restriction of competition, but will usually tolerate this function. Industry-based codes of practice may fall within the ambit of competition legislation, although they may be desirable and may be encouraged or even required by consumer legislation<sup>247</sup>.

Article 101 is capable of catching agreements which limit competition on terms and conditions, and to the extent that this is effected through the medium of trade associations the application of that Article to ‘decisions by associations of undertakings’ will be particularly apposite. The Commission has condemned agreements only to supply on prescribed general conditions of sale<sup>248</sup> and it has also objected to them where they formed part of wider reciprocal exclusive dealing arrangements<sup>249</sup>. In *Vimpoltu*<sup>250</sup> the Commission condemned an agreement on terms and conditions which limited important ‘secondary aspects of competition’. In *Publishers’ Association: Net Book Agreements*<sup>251</sup>

<sup>244</sup> Commission decision of 28 November 2009, on appeal Cases T-146/09 etc *Parker ITR and Parker Hannifin v Commission*, not yet decided.

<sup>251</sup> OJ [1989] L 22/12, [1989] 4 CMLR 825.

agreements to impose on resellers standard conditions of sale and measures taken to implement this were condemned, as they deprived retailers of the ability to deviate from fixed retail prices. In *TACA*<sup>252</sup> the Commission concluded that an agreement that prohibited members of a liner conference from entering into individual service contracts at rates negotiated between a shipper and an individual line infringed Article 101(1); under the agreement members were permitted to offer standard service contracts only on the terms negotiated by the TACA secretariat, which constituted a serious fetter on their ability to compete with one another. In *Marine Hoses*<sup>253</sup> the parties agreed sales conditions as part of a plan to control rival bids for marine hoses tenders.

The Commission has recognised the advantages for undertakings in having accessible and non-binding standard terms and conditions for the sale of consumer goods or services and has indicated that their use will not infringe Article 101(1) unless their application in practice seriously limits customer choice<sup>254</sup>. Also the Commission applied Article 101(3) in the fire insurance sector to an agreement whereby insurance companies would be likely (though not obliged) to adopt the standard terms and conditions of Concordato, a non-profit-making trade association<sup>255</sup>.

## 8. Exchanges of Information<sup>256</sup>

### (A) Introduction

An important competition law issue is whether undertakings run the risk of infringing Article 101 when they exchange information with one another. This is an issue that the Commission has given consideration to over many years, from as early as 1968 in its *Notice on Cooperation Agreements*<sup>257</sup> and in numerous decisions from the 1970s onwards. At the end of 2010 the Commission adopted new *Guidelines on the applicability of Article 101 [TFEU] to horizontal co-operation agreements* ('*Guidelines on Horizontal Cooperation Agreements*' or '*the Guidelines*')<sup>258</sup>. The *Guidelines* provide helpful guidance on exchanges of information and draw substantially on the case law of the EU Courts<sup>259</sup>, in particular *John Deere v Commission*<sup>260</sup>, *Asnef-Equifax v Ausbanc*<sup>261</sup> and *T-Mobile v NMa*<sup>262</sup>. Reference

will be made to the *Guidelines on Horizontal Cooperation Agreements* below, although the reader is reminded that this document is not legally binding; however it explains in a helpful way the Commission's thinking on how Article 101 should apply to the exchange of information. The *Guidelines* do not apply to the extent that sector-specific rules, for example on agreements in the transport sector and insurance sectors, are in place<sup>263</sup>. The *Horizontal Cooperation Guidelines* begin by describing the arguments in favour of and against exchanges of information; they then explain the different types of exchange of information; thereafter the concept of a concerted practice and exchanges of information that have as their object or effect the restriction of competition are dealt with. This is followed by a short discussion of the criteria in Article 101(3). This sequence will broadly be retained in the text that follows.

### **(B) Arguments in favour of and against exchanges of information**

It is important to understand that information – including, therefore, the exchange of information – may be highly beneficial, to competitors, consumers and to the competitive process. The *Guidelines on Horizontal Cooperation Agreements* acknowledge that exchanging information is a common feature of many competitive markets<sup>264</sup>. Competitors cannot compete in a statistical vacuum: the more information they have about market conditions, the volume of demand, the level of capacity that exists in an industry and the investment plans of rivals, the easier it is for them to make rational and effective decisions on their production and marketing strategies. Competitors may benefit, without harming their customers, by exchanging information on matters such as methods of accounting, stock control, book-keeping or the draftsmanship of standard-form contracts.

However there are, of course, dangers to the competitive process if certain types of information are exchanged in certain market conditions. In most cases the question is whether the exchange of information is likely to have significant anti-competitive effects, although some types of information agreement may have the object of restricting competition. The *Guidelines on Horizontal Cooperation Agreements* identify two main competition concerns arising from an exchange of information: first, it may enable undertakings to predict each other's future behaviour and to coordinate their behaviour on the market; and secondly, it may result in anti-competitive foreclosure of access to the market in which the exchange of information takes place or to a related market. The Commission says that it does not claim that these concerns are exclusive or exhaustive<sup>265</sup>.

### **(C) Types of exchange of information**

Information is exchanged in various contexts. It is therefore necessary to characterise the exchange of information in order to ascertain whether competition is likely to be harmed. Two situations should be noted.

#### **(i) Information exchange in support of a horizontal cooperation agreement**

Where an exchange of information forms part of another type of horizontal cooperation agreement its assessment should be carried out in combination with the assessment of that agreement; an obvious example would be the parties to a production agreement sharing information about costs. Exchanges of information which are necessary for the

<sup>263</sup> *Guidelines on Horizontal Cooperation Agreements*, para 18; on information exchange in the maritime transport sector see ch 23, 'Transport', p 971; see also ch 15, 'Insurance sector', pp 613–614.

<sup>264</sup> *Guidelines on Horizontal Cooperation Agreements*, para 57. <sup>265</sup> *Ibid*, section 2.2.1, fn 1.

implementation of research and development or specialisation agreements may benefit from the block exemption available for those agreements<sup>266</sup>.

## (ii) Information exchange in support of a cartel

There have been many cases in which the Commission has held that the exchange of information was unlawful where it was part of a mechanism for monitoring and/or enforcing compliance with some other agreement that was itself unlawful. For example where undertakings establish a cartel they will invariably put in place mechanisms that enable them to be sure that each participant is complying with the agreed rules, and the exchange of information is an important part of this policing function. Sometimes there will be a simple exchange of information between the members of the cartel; in other situations the collection, processing and dissemination of the information may be achieved through a trade association or cartel consultancy. If one looks at almost any of the Commission's decisions on hard-core cartels in the last few years, it will be seen that the unlawful agreement(s) in question – for example to fix prices, share out geographical markets, allocate quotas or to restrict competition in some other way – included the exchange of commercially sensitive business information.

In the case of *Gas Insulated Switchgear*<sup>267</sup> the Commission imposed fines of €750.7 million on a cartel involving European and Japanese firms that divided the market geographically and allocated quotas. A feature of this case was that cartel secretaries were appointed in Europe and Japan whose function was to receive and disseminate among the members information about forthcoming projects in the sector; this led to discussions about who was interested in winning the contract, whether some members of the cartel would make cover bids to give the (false) impression of competition, and to a final report as to who had actually won the contest<sup>268</sup>. The illegality of information exchanges of this kind is established by virtue of the fact that it is a mechanism for supporting behaviour that is illegal anyway<sup>269</sup>. Just as ancillary restrictions supportive of a legitimate agreement are legal<sup>270</sup>, the exchange of information pursuant to an illegal agreement is itself illegal.

## (D) Agreement and/or concerted practice to exchange information

Information exchange can take various forms: data can be directly shared between competitors or indirectly exchanged through a trade association or a third party, such as a common supplier. To infringe Article 101(1) there must be an agreement and/or concerted practice between undertakings to exchange information or a decision by an association of undertakings to the same effect. In *Asnef-Equifax v Ausbanc*<sup>271</sup> the Court of Justice held that, where credit institutions participated in the creation of a register of information about the solvency of customers, it was not important to decide whether this happened as a result of an agreement, a concerted practice or a decision of an association of undertakings<sup>272</sup>. Paragraphs 60 to 63 of the *Guidelines on Horizontal Cooperation Agreements*

<sup>266</sup> See *Guidelines on Horizontal Cooperation Agreements*, para 88, fn 1; see generally ch 15 on block exemption Regulations 1217/2010 and 1218/2010.

<sup>267</sup> Commission decision of 24 January 2007, substantially upheld on appeal Cases T-117/07 etc *Areva v Commission* [2011] ECR II-000, [2011] 4 CMLR 1421.

<sup>268</sup> Commission decision of 24 January 2007, paras 121–123.

<sup>269</sup> *Guidelines on Horizontal Cooperation Agreements*, para 59.

<sup>270</sup> See ch 3, 'Cases in which agreements containing contractual restrictions were found not to have anti-competitive effects', pp 128–129.

<sup>271</sup> Case C-238/05 [2006] ECR I-11125, [2007] 4 CMLR 224.

<sup>272</sup> *Ibid*, paras 30–32.

provide useful guidance on the concept of concerted practice in the context of exchange of information. The case law on this concept is discussed in chapter 3 of this book<sup>273</sup>. The *Guidelines* say that Article 101(1) applies to sharing of ‘strategic data’, that is to say data that reduces strategic uncertainty in the market<sup>274</sup>, between competitors. The *Guidelines* also explain that a unilateral disclosure of strategic information can give rise to a concerted practice<sup>275</sup>; there is a presumption that, by receiving such information from a competitor, a firm accepts it and adapts its future conduct on the market<sup>276</sup>. Where a firm makes a unilateral announcement that is genuinely public, for example in the press, a concerted practice is unlikely<sup>277</sup>. In *Wood Pulp*<sup>278</sup> the Court of Justice ruled that the fact that pulp producers publicly announced price rises to users before those rises came into effect was not, in itself, sufficient to constitute an infringement of Article 101(1)<sup>279</sup>.

### (E) Assessment under Article 101(1)

The *Guidelines* recognise that the exchange of information can have positive effects, in particular when they enable firms to become more efficient. However, there are also situations where the exchange of information can be harmful to competition. The problem for competition law is to distinguish those exchanges of information which have a neutral or beneficial effect upon efficiency from those which seriously threaten the competitive process by facilitating collusive behaviour. This section will consider the application of Article 101(1) to exchanges of information<sup>280</sup>.

#### (i) Restrictions of competition by object

The case law of the EU Courts has established that any discussion among competitors about their prices is likely to be regarded as giving rise to an anti-competitive price-fixing agreement. Paragraph 74 of the *Guidelines* suggests that the exchange of information between competitors which identify the future intended prices or quantities of individual firms has as its object the restriction of competition and is unlikely to satisfy the criteria of Article 101(3). The *Guidelines* do not say, but it is the case, that there does not need to be a direct effect on prices paid by end-consumers<sup>281</sup>. Nor is it necessary for A and B to have explicitly *agreed* that they will increase their prices: the mere fact of providing information to one another about future pricing behaviour – or even for one to provide such information to the other – is likely to be sufficient for a finding of an agreement on prices. In *Bananas*<sup>282</sup> the Commission considered that three producers of bananas were party to a concerted practice that restricted competition by object where they regularly

<sup>273</sup> See ch 3, ‘Concerted practices’, pp 112–115.

<sup>274</sup> *Guidelines on Horizontal Cooperation Agreements*, para 86, which explains that ‘strategic data’ includes information relating to prices, customer lists, production costs, quantities, turnovers, sales, capacities, qualities, marketing plans, risks, investments, technologies, research and development programmes and their results.

<sup>275</sup> *Guidelines on Horizontal Cooperation Agreements*, para 62.

<sup>276</sup> *Ibid*, para 62; for discussion of the case law establishing this presumption see ch 3, ‘Concerted practices’, pp 113–114.

<sup>277</sup> *Guidelines on Horizontal Cooperation Agreements*, para 63; the possibility cannot be entirely ruled out in cases where competitors make public announcements to signal future strategic behaviour to one another.

<sup>278</sup> Cases C-89/85 etc *Ahlström Oy v Commission* [1993] ECR I-1307, [1993] 4 CMLR 407.

<sup>279</sup> *Ibid*, paras 59–65.

<sup>280</sup> See *Guidelines on Horizontal Cooperation Agreements*, paras 105–110 for helpful examples of the Commission’s thinking on a number of hypothetical situations.

<sup>281</sup> See eg Case C-8/08 *T-Mobile Netherlands BV v Raad van Bestuur van de Nederlandse Mededingingsautoriteit* [2009] ECR I-4529, [2009] 5 CMLR 1701, paras 36–39.

<sup>282</sup> Commission decision of 15 October 2008, on appeal Cases T-587/08 etc *Fresh Del Monte Produce v Commission*, not yet decided.

communicated with one another, before setting the prices that they quoted to their customers on a weekly basis, as to the factors that they considered were relevant for setting quotation prices for the week ahead, including their views on prices trends: in the Commission's view this enabled them to coordinate the setting of quotation prices instead of deciding on them independently<sup>283</sup>.

It is not a defence for an undertaking to argue that it attended a meeting at which prices were discussed, but that it maintained silence throughout the meeting, and gave no indication of its own intentions. Attendance is sufficient to implicate the undertaking in the price fixing unless it left the meeting and took positive action to 'publicly distance' itself from any unlawful behaviour<sup>284</sup>. In *T-Mobile v NMA*<sup>285</sup> the Court of Justice confirmed that an exchange of price information between competitors at a single meeting could give rise to a concerted practice that has as its object the restriction of competition<sup>286</sup>. The message could hardly be clearer: do not remain at a meeting at which competitors discuss prices or quantities.

### (ii) Restrictions of competition by effect<sup>287</sup>

Exchanges of information that do not support an agreement that is itself anti-competitive, and that do not concern future prices or quantities, do not restrict competition by object, but may do so by effect. This section will consider when such 'pure' exchanges of information can infringe Article 101(1) in their own right. The analysis of information agreements of the kind under discussion in this section requires effects analysis – that is to say a full review of the context in which the exchange of information is taking place is required<sup>288</sup>. The point is made clearly in the Court of Justice's judgment in *Asnef-Equifax*<sup>289</sup>:

[t]he compatibility of an information exchange system ... with the [EU] competition rules cannot be assessed in the abstract. It depends on the economic conditions on the relevant markets and on the specific characteristics of the system concerned, such as, in particular, its purpose and the conditions of access to it and participation in it, as well as the type of information exchanged – be that, for example, public or confidential, aggregated or detailed, historical or current – the periodicity of such information and its importance for the fixing of prices, volumes or conditions of service<sup>290</sup>.

In the *T-Mobile* case the Court of Justice explained that the purpose of this analysis is to determine whether the exchange could 'reduce or remove' uncertainty between undertakings so that competition is restricted<sup>291</sup>. The Commission's *Guidelines on Horizontal Cooperation Agreements* explain how it approaches 'pure' exchanges of information; the crucial question always is whether it could enable undertakings to achieve and/or sustain coordination. The *Guidelines* examine two issues, each of which accords with economic theory: the economic conditions on the relevant markets and the characteristics of information exchanged.

<sup>283</sup> Ibid, para 263.

<sup>284</sup> See ch 3, 'The concept of a "single, overall agreement"', pp 103–104.

<sup>285</sup> Case C-8/08 [2009] ECR I-4529, [2009] 5 CMLR 1701, paras 58–61.

<sup>286</sup> Ibid, paras 58–61.

<sup>287</sup> See Grassani 'Oligopolies and "Pure" Information Exchanges in the EU: New Crops are Growing on the Soils Plowed by "UK Tractors"' [2007] Fordham Corporate Law Institute (ed Hawk); this article helpfully reviews – and expresses some concerns about – recent decisions by the national competition authorities of France, Italy, Spain and the UK, where it perceives possible inconsistencies in enforcement activities.

<sup>288</sup> See ch 3, "The 'object or effect' of preventing, restricting or distorting competition", p 117, for a discussion of the distinction between object and effect analysis under Article 101.

<sup>289</sup> Case C-238/05 [2006] ECR I-11125, [2007] 4 CMLR 224.

<sup>290</sup> Ibid, para 54.

<sup>291</sup> Case C-8/08 *T-Mobile Netherlands BV v Raad van Bestuur van de Nederlandse Mededingingsautoriteit* [2009] ECR I-4529, [2009] 5 CMLR 1701; para 35 and the case law cited therein.

### (iii) The economic conditions on the relevant markets

In the first place it is important to consider the characteristics of the market. Paragraph 76 of the *Guidelines* explains that exchanges of information are more likely to have anti-competitive effects in markets where conditions for coordination are propitious. The *Guidelines* say that coordination is more likely on markets which are sufficiently transparent, concentrated, non-complex, stable and symmetric. Each of these factors is explored further in succeeding paragraphs of the *Guidelines*. They point out that exchanges of information are not likely to be anti-competitive in very fragmented markets, unless the information exchanged increases transparency or changes the market situation in another way that is conducive for coordination<sup>292</sup>. This illustrates a more general point made by the *Guidelines*: whether an exchange of information facilitates collusive behaviour depends on not only the initial market conditions but also how the exchange of information may change those conditions. In deciding whether coordination will be sustainable the Commission will consider whether there is a credible threat of retaliation to prevent other firms from cheating<sup>293</sup>.

The Commission's concern with the economic conditions of the market when considering whether an exchange of information could be caught by Article 101(1) can be seen in its practice over many years<sup>294</sup>. In *UK Agricultural Tractor Registration Exchange*<sup>295</sup> the Commission condemned an information-exchange system, placing considerable emphasis on the fact that the UK tractor market was oligopolistic: in particular it took into account that four firms on the UK market had a combined market share of approximately 80 per cent and that in some geographical areas the concentration was higher; that barriers to entry were high, especially as extensive distribution and servicing networks were necessary; that the market was stagnant or in decline and there was considerable brand loyalty; and that there was an absence of significant imports<sup>296</sup>. The Commission published a Press Release after this decision in which it said that the same result would not necessarily arise in the car market, which is much more competitive<sup>297</sup>. In *Eudim*<sup>298</sup> the Commission was more relaxed about the exchange of information between wholesalers of plumbing, heating and sanitary materials since the affected markets were sufficiently competitive.

In *Asnef-Equifax*<sup>299</sup> the question arose of whether agreements between credit institutions in Spain for the exchange of information about the creditworthiness of borrowers were restrictive of competition. As this was an Article 267 TFEU reference the Court of Justice did not make a finding on the facts of the case. However it did set out the criteria that would be relevant to an assessment of whether the exchange of such information restricted competition by effect<sup>300</sup>. The Court specifically noted that the market in question was a fragmented one: that is to say that it was not concentrated, which would have

<sup>292</sup> *Guidelines on Horizontal Cooperation Agreements*, para 79; on this point see the judgment of the Court of Justice in *Steel Beams*, Case C-194/99 P *Thyssen Stahl AG v Commission* [2003] ECR I-10821, para 86.

<sup>293</sup> *Ibid*, para 85.

<sup>300</sup> The Court held that the exchange of such information did not restrict competition by object: *ibid*, para 48.

been a factor conducive to coordinated behaviour<sup>301</sup>. The Court's judgment in this case is a most interesting one, in which it took an economic approach to the question of whether competition was likely to be restricted. It seems fairly clear that its view was that the exchange in question did not infringe Article 101(1).

#### (iv) Characteristics of the information exchanged

A very important consideration is the type or quality of information which is exchanged. The Commission's *Guidelines on Horizontal Cooperation Agreements* explain that the exchange between competitors of strategic data is more likely to fall within the mischief of Article 101<sup>302</sup>. The *Guidelines* point out that information on prices and quantities is the most strategic in nature, followed by information about costs and demand<sup>303</sup>. The exchange of investment plans may also be strategic<sup>304</sup>. The *Guidelines* explain that the strategic usefulness of data also depends on its market coverage, aggregation, age and frequency of exchange. The exchange must affect a sufficiently large part of the relevant market in order for it to be capable of having a restrictive effect on competition<sup>305</sup>. The exchange of individual data about particular undertakings is more problematic than aggregated data<sup>306</sup>. The age of the data is relevant<sup>307</sup>: the question is whether the information facilitates collusive behaviour, so that historic data are less significant than future ones<sup>308</sup>. The Commission tends to regard information that is more than one year old as historic<sup>309</sup>. The frequency of any information exchange is also a relevant factor<sup>310</sup>.

The *Guidelines* point out that the exchange of 'genuinely public information' is unlikely to infringe Article 101(1)<sup>311</sup>; information is genuinely public in nature if the costs of obtaining it are the same for all competitors and customers. If the information exchanged is in the public domain, but is not equally accessible to competitors and customers, the Commission considers that Article 101(1) may apply as it would do to any other agreement. A further consideration is whether the information exchanged is shared with customers or not: the Commission states in the *Guidelines on Horizontal Cooperation Agreements* that the more the information is shared with customers, the less likely it is to be problematic<sup>312</sup>.

Some Commission decisions illustrate its past decisional practice in relation to the type of information exchanged. For obvious reasons it has always been concerned about price information, but other concerns can be seen. In *Re Cimbel*<sup>313</sup> it condemned the obligation upon members of a trade association that they should inform each other of projected increases in industrial capacity: such an obligation could prevent one firm from gaining an advantage over competitors by expanding in time to meet an increase in demand. In *Steel Beams*<sup>314</sup> the Commission found an information exchange on orders and deliveries of beams by individual companies in each Member State to go 'beyond what is admissible'<sup>315</sup>, since the figures exchanged showed the deliveries and orders received by each individual

<sup>301</sup> *Ibid*, para 58.

<sup>315</sup> OJ [1994] L 116/1, [1994] 5 CMLR 353, para 267.

company for delivery to their respective markets; this information was updated every week and circulated rapidly among the participants. The Commission added that the exchange was not limited to figures ‘of a merely historical value with no possible impact on competition’<sup>316</sup>. The General Court confirmed the Commission’s assessment, since the exchange of confidential information undermined the principle that every trader must determine its market strategy independently. In *Wirtschaftsvereinigung Stahl* the Commission decided that an exchange of information on deliveries and market shares in relation to various steel products infringed Article 65(1) ECSC; on appeal the General Court annulled this decision because the Commission had erred in its findings of fact<sup>317</sup>.

### (F) Assessment under Article 101(3)

This provision has been discussed at length in chapter 4, and the Commission discusses its application to exchanges of information in paragraphs 95 to 104 of its *Guidelines*. They should be read in conjunction with the Commission’s *Article 101(3) Guidelines*<sup>318</sup>. The Commission explains in paragraph 95 that benchmarking, whereby undertakings measure their performance against ‘best practice’ in their industry, may enable them to improve their efficiency<sup>319</sup>. In certain situations information may be exchanged to ensure an optimal allocation of resources, thereby reducing any mismatch between supply and demand. By spreading technological know-how, information agreements can help to increase the number of firms capable of operating on the market<sup>320</sup>. The exchange of consumer data in markets characterised by asymmetric information about consumers may bring about efficiencies; an example would be the exchange of information between credit institutions about the solvency and default record of their customers<sup>321</sup>.

Consumers too can benefit from an increase in public information: the more they know about the products available and their prices, the easier it will be for them to make satisfactory choices. Indeed perfect competition is dependent on consumers having perfect information about the market<sup>322</sup>: market transparency is, in general, to be encouraged. Quite often the reason why a market does not work well for consumers is that the information available to them is too sparse or confusing; in some markets there may actually be too much information for consumers to be able to digest. The Commission says that consumers are less likely to benefit from exchanges of future pricing intentions than exchanges of present and past data<sup>323</sup>. Further, the parties must show that the subject-matter, aggregation, age, confidentiality, frequency and coverage of their exchange of information carries the lowest risks of facilitating collusion indispensable for creating the claimed efficiencies<sup>324</sup>.

<sup>316</sup> Ibid, para 268.

<sup>317</sup> OJ [1998] L 1/10, [1998] 4 CMLR 450, annulled on appeal Case T-16/98 *Wirtschaftsvereinigung Stahl v Commission* [2001] ECR II-1217 (see fn 296, above), [2001] 5 CMLR 310.

<sup>318</sup> OJ [2004] C 101/97; see ch 4, ‘The Commission’s approach in the *Article 101(3) Guidelines*’, pp 160–162.

<sup>319</sup> *Guidelines on Horizontal Cooperation Agreements*, para 95; see Henry ‘Benchmarking and Antitrust’ (1993) 62 Antitrust LJ 483; on benchmarking and EC law see Carle and Johnsson ‘Benchmarking and EC Competition Law’ (1998) 19 ECLR 74; Boulter ‘Competition Risks in Benchmarking’ (1999) 20 ECLR 434.

<sup>320</sup> See Teece ‘Information Sharing, Innovation and Antitrust’ (1993) 62 Antitrust LJ 465.

<sup>321</sup> In *Asnef-Equifax*, ch 13 n 261 above, the Court of Justice suggested that such an exchange of information might satisfy the criteria of Article 101(3).

<sup>322</sup> See ch 1, ‘The model of perfect competition is based on assumptions unlikely to be observed in practice’, pp 7–8.

<sup>323</sup> *Guidelines on Horizontal Cooperation Agreements*, paras 99–100.

<sup>324</sup> Ibid, para 101.

The Commission rejected arguments that the exchange of information in *UK Agricultural Tractor Registration Exchange*<sup>325</sup> would generate efficiencies in terse terms.

Some exchanges of information in the insurance sector are given block exemption by Articles 2(a) and 3 of Regulation 267/2010<sup>326</sup>.

### (G) Fines

On one occasion, in *Fatty Acids*<sup>327</sup>, the Commission imposed a fine of €50,000 on undertakings which entered into an agreement to exchange information which enabled each to identify the individual business of its two main rivals on a quarterly basis, thereby removing an important element of uncertainty on the part of each as to the activities of the others. It is not clear whether the Commission would today impose a fine in a case such as this: certainly this would be unusual in the case of a restriction by effect rather than object.

### (H) B2B markets<sup>328</sup>

A specific issue in relation to the exchange of information is whether the establishment of 'B2B' electronic markets may give rise to competition law problems, in particular by facilitating collusion and/or foreclosing access to the market. Clearly competition authorities would not be happy if Internet chat rooms were to become the twenty-first century equivalent of the 'smoke-filled rooms' of the nineteenth and twentieth centuries. In a B2B market undertakings establish an electronic marketplace where it is possible, for example, to sell and purchase goods and services. Typically electronic marketplaces result in a considerable exchange of information, both between sellers and purchasers but also between competitors themselves, on both the selling and purchasing side of the market. Universal access to the Internet means that this information is instantly accessible to everyone involved in the electronic market. The Commission has not adopted any formal decisions on B2B markets under Article 101; however it has settled several cases informally<sup>329</sup>. The Commission does not discuss B2Bs markets in the *Guidelines*. However, it is not unreasonable to suppose that it will analyse the exchange of information by analogy to the principles contained in the *Guidelines*.

## 9. Advertising Restrictions

The function of advertising in competition policy raises important and controversial issues which can be dealt with only briefly here<sup>330</sup>. Advertising is an essential part of the

competitive process. Unless the consumer knows what goods and services are on offer and what their price is he or she will be unable to choose what to buy and competition between suppliers will be diminished.

Competition is about attracting business and a vital part of the process is to advertise one's products. Therefore competition policy should ensure that advertising is not restricted<sup>331</sup>. Indeed it may be thought appropriate to impose upon businesses a duty to advertise prices, terms and conditions or details of quality in order to provide the consumer with the information needed to enable him or her to make a rational choice; however it should be noted that a perverse consequence of forcing undertakings to publicise their prices could be to facilitate tacit collusion between them. A separate point is that the significance of advertising means that steps should be taken to ensure the truth of advertisements and, perhaps, to prevent the appropriation of innovative advertising ideas by competitive rivals; comparative advertising, whereby a competitor's products are unfavourably compared with one's own, might also be objected to<sup>332</sup>.

In some circumstances collaboration between undertakings in their advertising activities may not be harmful. For example, a group of small producers may decide to sell a product under a common label and agree on the specifications and publicity of the product in question; they will all contribute to the advertising costs of this product. By doing this they may be able to present a strong brand image which will enhance their ability to compete with other firms on the market. Such schemes may be pro-competitive, although it will be necessary to ensure that nothing in the agreement limits competition unnecessarily, such as direct price fixing or market sharing. Again there may be a case for some collaboration on advertising – for example by agreeing to limit the number of industrial exhibitions visited in a year – if this will have the effect of rationalising advertising efforts and reducing advertising costs.

The importance of advertising in competition policy has an important side effect: namely that the advertising media themselves should function efficiently and be free from restrictive trade practices which might reduce the availability of advertising space. Various cases in the US have endeavoured to maintain an open advertising market<sup>333</sup>.

Against the above line of reasoning there runs a quite different argument. This is that advertising costs are a serious barrier to entry to new firms wishing to enter a market as well as being a wasteful use of resources<sup>334</sup>. In some markets, such as lager, detergents and breakfast cereals, enormous amounts of money are spent in building up a brand image and it is argued that new entrants would be unable to expend the money on advertising necessary to match this. The problem, it is said, is accentuated by the fact that established firms have the accumulated advantage of past advertising and also that they have the capacity to indulge in 'predatory' advertising, that is short-term expensive campaigns designed to prevent the new entrant establishing a toe-hold in the market. Opinion on the barrier-raising effect of advertising is divided. Bork and other commentators have argued forcefully that it should not be treated as a barrier and there is empirical evidence which sheds doubt on the argument<sup>335</sup>.

A separate objection to advertising comes from a quite different quarter, namely the liberal professions. They have argued that advertising is inimical to their ethical

<sup>331</sup> Restrictions on advertising in the US are regarded as an indirect form of price fixing and are accordingly *per se* illegal; cf *California Dental Association v Federal Trade Commission* 526 US 756 (1999).

<sup>332</sup> Note that there is an EU directive on misleading, including comparative, advertising: Directive 97/55/EC, OJ [1997] L 290/18.

standards and that consumer protection in their spheres of activity is best served by maintaining professional standards through self-regulation, codes of practice and professional ethics.

### (A) Article 101(1)

Article 101(1) applies to agreements to restrict advertising which have anti-competitive effects. In several decisions the Commission has stated that it considers that such restrictions limit an important aspect of competitive behaviour<sup>336</sup>. In the case of trade fairs, it has often held that the rules for participation infringe Article 101(1), although it has gone on to permit exemption subject to conditions (see below). Trade fair rules may affect competition in various ways: participants may be required not to take part in other fairs, thus limiting their competitive opportunities; other organisers of such fairs will lose business as a result of such exclusivity rules; and potential participants might be excluded from a trade fair by its rules, thus limiting their impact on the market. In 1988 the Commission, for the first time in a trade fair case, imposed a fine of €100,000 on the *British Dental Trade Association*<sup>337</sup> for anti-competitive exclusion of would-be exhibitors.

In a number of decisions<sup>338</sup> the Commission has revealed a benevolence towards advertising restrictions which might promote a particular brand image without seriously impairing competition in other ways. However in *Belgian Roofing Felt*<sup>339</sup> the Commission condemned joint advertising of roofing felt under the Belasco trade mark where this led to the uniform image of products in a sector in which individual advertising may facilitate differentiation and therefore competition. The Commission's *Guidelines on Horizontal Cooperation Agreements* provide guidance on the application of Article 101 to so-called 'commercialisation agreements'<sup>340</sup>, which may involve joint advertising. The *Guidelines* state that joint advertising might lead to anti-competitive effects if it entails a significant commonality of costs which might increase the risk of collusive behaviour<sup>341</sup>.

Restrictions on comparative advertising by patent agents practising at the European Patent Office in Munich were held to infringe Article 101(1) in *EPI Code of Conduct*<sup>342</sup> but to benefit from Article 101(3) for a short period whilst new rules were adopted<sup>343</sup>.

### (B) Article 101(3)

The Commission has accepted that in appropriate circumstances it can be advantageous to rationalise and coordinate advertising efforts. In a series of cases on trade fairs the Commission has authorised agreements which contain rules requiring participants to limit the number of occasions on which they exhibit elsewhere and restricting the extent

<sup>336</sup> See eg *Re Vimpoltu* OJ [1983] L 200/44, [1983] 3 CMLR 619.

<sup>337</sup> OJ [1988] L 233/15, [1989] 4 CMLR 1021; the Commission decided that, for a period of ten years, Article 101(3) applied to the Association's rules as modified to satisfy the Commission.

<sup>338</sup> *Re VVVF* OJ [1969] L 168/22, [1970] CMLR D1; *Re Association pour la Promotion du Tube d'Acier Soude Electriquement* JO [1970] L 153/14, [1970] CMLR D31; *Re Industrieverband Solnhofener Natursteinplatten* OJ [1980] L 318/32.

<sup>339</sup> OJ [1986] L 232/15, [1991] 4 CMLR 130, upheld on appeal Case 246/86 *Belasco v Commission* [1989] ECR 2117, [1991] 4 CMLR 96.

<sup>340</sup> OJ [2011] C 11/1.

<sup>343</sup> OJ [1999] L 106/14, [1999] 5 CMLR 540, paras 46–48.

to which they are allowed to advertise in other ways<sup>344</sup>. The Commission has often applied conditions to such authorisations. For example in *UNIDI*<sup>345</sup> the Commission required the introduction of an arbitration procedure to deal with complaints by exhibitors excluded from an exhibition. In *VIFKA*<sup>346</sup> it required the removal of a provision requiring exhibitors of office equipment not to exhibit elsewhere for a period of two years, as this was too long.

## 10. Anti-Competitive Horizontal Restraints

The agreements so far considered have been concerned with cartels limiting competition and raising prices to earn supra-competitive profits. It is likely however that, in the absence of barriers to entry, this in itself will attract new entrants into the market. It is because of this that the members of a cartel will frequently take further action designed to fend off the possibility of new competition in just the same way that a monopolist might. For example, a collective reciprocal exclusive dealing arrangement might be negotiated whereby a group of suppliers agree with a group of dealers to deal only with one another. The effect may be to exclude other producers from the market if they cannot find retail outlets for their products. This is not an inevitable result however: to have an anti-competitive foreclosing effect there would have to be a lack of alternative retail outlets, for example due to barriers to entry at the retail level. A common pricing system may be supported by an aggregated rebates cartel, whereby purchasers are offered rebates calculated according to their purchases from all the members of the cartel; the disincentive to buy elsewhere is obvious<sup>347</sup>. Again it may be decided to boycott any dealer who handles the products of producers outside the cartel. As one would expect, exclusionary devices such as these which can cause serious harm to the competitive process are *per se* illegal in the US<sup>348</sup>, although it has been argued that the breadth of the rule against collective boycotts is inappropriate<sup>349</sup>. The pejorative label given to group boycotts conceals the fact that in some cases independent firms will inevitably decide to refuse to deal with certain people, for example by refusing inadequately trained people entrance to a profession or inefficient dealers access to a branded product. A distinction should be made between naked restraints which are clearly intended to be exclusionary on the one hand and agreements which promote efficiency and which therefore may be permitted.

The Commission and the EU Courts have had to deal with a great number of collective exclusive dealing arrangements and other potentially exclusionary practices. Often such

<sup>344</sup> *Re CECIMO* OJ [1969] L 69/13, [1969] CMLR D1, renewed OJ [1979] L 11/16, [1979] 1 CMLR 419 and again OJ [1989] L 37/11; *Re BPICA* OJ [1977] L 299/18, [1977] 2 CMLR D43, renewed OJ [1982] L 156/16, [1983] 2 CMLR 40; *Re Cematex* JO [1971] L 227/26, [1973] CMLR D135, renewed OJ [1983] L 140/27, [1984] 3 CMLR 69; *Re UNIDI* OJ [1975] L 228/14, [1975] 2 CMLR D51, renewed OJ [1984] L 322/10, [1985] 2 CMLR 38; *Re Society of Motor Manufacturers and Traders Ltd* OJ [1983] L 376/1, [1984] 1 CMLR 611; *VIFKA* OJ [1986] L 291/46; *Internationale Dentschbau* OJ [1987] L 293/58; *Sippa* OJ [1991] L 60/19, [1992] 5 CMLR 529.

<sup>346</sup> OJ [1986] L 291/46.

<sup>347</sup> Aggregated rebates cartels are unlikely where prices are *not* fixed, because they would discriminate against those offering lower prices.

<sup>348</sup> See eg *Klor's Inc v Broadway-Hale Stores Inc* 359 US 207 at 212 (1959): for a review of US case law see Glazer 'Concerted Refusals to Deal under Section 1 of the Sherman Act' (2002) 70 *Antitrust LJ* 1; see also the UK Competition Appeal Tribunal in Case No 1003/2/1/01 *Institute of Independent Insurance Brokers v Director General of Fair Trading* [2001] CAT 4, [2001] CompAR 62, para 189.

<sup>349</sup> See eg Bork *The Antitrust Paradox* (The Free Press, 1993), ch 17.

agreements are entered into by a national association which is keen to keep imports out of the domestic market. A more obvious target for the Commission it is hard to imagine and the EU Courts have usually upheld its findings. A scheme designed to keep washing machines out of the Belgian market was found by the Court of Justice to infringe Article 101(1)<sup>350</sup>, as was a marketing system which could prevent imports of fruit into Holland<sup>351</sup>. The Court agreed with the Commission that an exclusive purchasing agreement which obliged members of an association to acquire rennet solely from a Dutch cooperative was unlawful<sup>352</sup>. The Court also held that practices designed to buttress the collective resale price maintenance of Dutch and Belgian books infringed Article 101<sup>353</sup>.

The Court of Justice upheld the Commission's decision to condemn rigid collective exclusive dealing systems in two cigarette cases, affecting the Belgian and Dutch markets respectively<sup>354</sup>. The Commission has dealt with many other similar situations, always striking such agreements down<sup>355</sup>. In *Hudson's Bay – Dansk Pelsdyravlerforening*<sup>356</sup> the Commission imposed a fine of €500,000 on a Danish trade association for imposing an obligation on its members that they should sell their entire production to a subsidiary of the association, thereby preventing them from selling their products to other Member States. In *Dutch Mobile Cranes*<sup>357</sup> the Commission imposed fines on a trade association found to have operated a price-fixing system whereby its members were obliged to charge 'recommended' rates for the hiring of mobile cranes; it also condemned the rules of a second association that effectively prohibited members from hiring cranes from firms not affiliated to it.

In *Dutch Electrotechnical Equipment*<sup>358</sup> the Commission imposed fines of €4.4 million on FEG and €2.15 million on TU for entering into collective exclusive dealing arrangements intended to prevent supplies to non-members of the associations by directly and indirectly restricting the freedom of members to determine their selling prices independently. The facts of this case resemble many of the decisions of the Commission on collective exclusive dealing from the 1970s and 1980s<sup>359</sup>: the fact that there are still arrangements like this in existence is perhaps a vindication of the Commission's desire to focus its resources on the elimination of practices that one might have assumed had long since been discontinued. In this decision, the Commission reduced the fine it would otherwise

<sup>350</sup> Cases 96/82 etc *NV IAZ International Belgium v Commission* [1983] ECR 3369, [1984] 3 CMLR 276; note the additional fine subsequently imposed by the Commission in this case: *Re IPTC Belgium SA* OJ [1983] L 376/7, [1984] 2 CMLR 131.

<sup>359</sup> See ch 13 n 355 above.

have imposed due to the prolonged period of the proceedings, which had begun in 1991, for which it was partly to blame<sup>360</sup>.

In *Road Bitumen*<sup>361</sup> the Commission imposed fines of €266.71 million for price fixing on the part of eight suppliers and six purchasers of road bitumen in the Netherlands. An interesting feature of the case is that the large construction companies that were in the cartel were not particularly concerned that the suppliers were fixing prices: road building in the Netherlands is paid for, ultimately, by the taxpayer. The large construction companies were simply concerned to win as many orders as possible, and there were price rebates on offer from the suppliers that discriminated in favour of them, and against smaller competitors: in other words the pricing system in this case operated to exclude third parties from the market.

In *Morgan Stanley/Visa*<sup>362</sup> the Commission imposed a fine of €10.2 million on Visa for refusing to admit Morgan Stanley to the Visa system without objective justification. This is an example of an anti-competitive horizontal restraint in that Visa consists of a number of undertakings that determine who may become a Visa member. There was a rule that said that membership was not available to a bank that issued a card that would compete with the Visa card. The rule did not restrict competition by object; however the Commission considered that the way it had been applied in relation to Morgan Stanley had an appreciable anti-competitive effect: first, it did not issue a card that competed with Visa *within the EU*: Morgan Stanley's Discover Card had a presence only in the US; and, secondly, Visa had, in practice, allowed other banks to join that did have cards in Europe, so that the rules had been applied in a discriminatory manner. The Commission's decision was upheld on appeal<sup>363</sup>. In another decision on payment systems, *Groupement des Cartes Bancaires*<sup>364</sup>, the Commission decided that the way in which the rules of the 'Cartes Bancaires' systems were applied in France infringed Article 101 because they operated in favour of the major banks in France and to the detriment, for example, of banks established by retailers such as Carrefour and Auchan and Internet banks.

In *ONP*<sup>365</sup> the Commission found that, as well as prescribing minimum prices, the National Pharmaceutical Society had taken decisions to hinder the development of certain groups of laboratories in France.

## 11. UK Law<sup>366</sup>

The UK competition authorities share the European Commission's determination to eliminate cartels. The Competition Act 1998 gives to the Office of Fair Trading ('the OFT') and sectoral regulators substantial powers of investigation and enforcement<sup>367</sup>, resembling those of the Commission, to enforce Article 101 TFEU and the Chapter I

<sup>360</sup> See paras 151–153 of the decision: the Commission was applying the judgment of the Court of Justice in Case C-185/95 P *Baustahlgewebe v Commission* [1998] ECR I-8417, [1999] 4 CMLR 1203, reducing (very slightly) a fine due to the protracted hearing of the appeal to the General Court.

<sup>361</sup> Commission decision of 13 September 2006, on appeal Cases T-343/06 etc *Shell Petroleum v Commission*, not yet decided.

<sup>362</sup> Commission decision of 3 October 2007.

<sup>363</sup> Case T-461/07 *Visa Europe v Commission* [2011] ECR II-000.

<sup>364</sup> Commission decision of 17 October 2007, on appeal Case T-491/07 *CB v Commission*, not yet decided.

<sup>365</sup> Commission decision of 8 December 2010, on appeal Case T-90/11 *ONP v Commission*, not yet decided.

<sup>366</sup> See generally chs 9 and 10 on the substantive and procedural rules of the Competition Act 1998.

<sup>367</sup> See ch 10, 'Inquiries and Investigations', pp 394–402 and 'Enforcement', 404–424.

prohibition. Some introductory points can be made in respect of the OFT's approach to the eradication of cartels in the UK. First, the OFT has published a number of Guidelines on the Competition Act<sup>368</sup>; paragraphs 3.3 to 3.27 of the Guideline on *Agreements and Concerted Practices*<sup>369</sup> provide guidance on a number of types of agreement that might infringe Article 101 or the Chapter I prohibition. A second introductory point is that the OFT has published a booklet designed to enable purchasers to identify cartel activity and to encourage them to bring their suspicions to the attention of the OFT<sup>370</sup>; it has also published an empirical study into the economic and structural factors that contribute to the formation, maintenance and detection of cartels<sup>371</sup>. Thirdly, the OFT has a dedicated cartels and criminal enforcement group<sup>372</sup>. Fourthly, the OFT's policy is to encourage whistleblowers, and it has received a large number of applications for immunity and leniency from fines since the Act entered into force<sup>373</sup>. Finally, the Enterprise Act 2002 establishes a criminal 'cartel offence' which can result in the fining or imprisonment of individuals responsible for dishonest cartel activity<sup>374</sup>.

The OFT's enforcement activity in relation to cartels was somewhat limited in the early years of the Competition Act. The position began to change from 2004 onwards, as the OFT began to adopt a series of decisions imposing fines for collusive tendering in the construction sector<sup>375</sup>. However a significant change occurred in 2007 when, in the case of *British Airways*<sup>376</sup>, the OFT announced that British Airways had admitted colluding with Virgin Atlantic over the price of long-haul passenger fuel surcharges between August 2004 and January 2006; BA agreed to pay a fine of £121.5 million. A formal decision against BA recording the decision will be taken in due course. There was no fine on Virgin Atlantic as it had blown the whistle. The criminal proceedings brought against individuals involved in the cases of *British Airways* and *Marine Hoses* were discussed in chapter 10 of this book<sup>377</sup>.

Other notable decisions in recent years include, in 2009, *Construction bid-rigging*<sup>378</sup> and *Construction Recruitment Forum*<sup>379</sup>. In the former the OFT imposed fines of £129.2 million on 103 undertakings involved in unlawful cover pricing and other bid-rigging activities. In the latter the OFT condemned a collective boycott and price fixing and imposed fines totalling £39.27 million. *Construction bid-rigging* is of interest as it was the largest investigation ever undertaken by the OFT and one in which the OFT made a 'fast-track offer', whereby it reduced fines for 45 undertakings implicated in bid-rigging (that had not already applied for leniency) in return for cooperation. In both *Construction bid-rigging*<sup>380</sup> and *Construction Recruitment Forum*<sup>381</sup> the Competition Appeal Tribunal ('the CAT') reduced the penalties imposed by the OFT, which, in its view, were excessive and insufficiently tailored to the circumstances of individual firms.

<sup>368</sup> See ch 9, 'OFT guidance', pp 332–333.

<sup>380</sup> See Case Nos 1114/1/1/09 etc *Kier Group plc v OFT* [2011] CAT 3; Case Nos 1117/1/1/10 etc *GF; Tomlinson Building Ltd v OFT* [2011] CAT 7; and Case Nos 1125/1/1/09 etc *Barrett Estate Services Ltd v OFT* [2011] CAT 9.

<sup>381</sup> Case Nos 1140/1/1/09 etc *Eden Brown Ltd v OFT* [2011] CAT 8.

In the case *Dairy Products* the OFT imposed fines of £49.51 million<sup>382</sup> for price-fixing practices, of both a horizontal and a vertical nature; Arla was given 100 percent immunity as it had blown the whistle. The fines on all other firms, except Tesco, were reduced for agreeing to early resolution of the case<sup>383</sup>.

It is known that the OFT is investigating suspected cartel activity in a number of sectors, including outdoor advertising, the supply of e-books and hotel online booking<sup>384</sup>.

### (A) Horizontal price fixing<sup>385</sup>

The *British Airways*, *Dairy Products* and *Construction Recruitment Forum* cases have already been referred to above. The OFT's decisions to date in relation to collusive tendering are discussed further in section D below. The OFT's decisions in *Football Shirts* and *Toys and Games*, which involved horizontal and vertical price fixing, were discussed in detail in chapter 9<sup>386</sup>.

The OFT has dealt with price fixing in a few other cases, some of which were settled informally in the early years of the legislation. In a Press Release in January 2001 the OFT warned that allegations of price fixing, even between small businesses such as private cab firms, would be investigated under the Competition Act 1998<sup>387</sup>. In *Northern Ireland Livestock and Auctioneers' Association*<sup>388</sup> the OFT concluded that a recommendation by the Association as to the commission that its members should charge for the purchase of livestock in Northern Ireland cattle marts infringed the Chapter I prohibition, but it decided not to impose a fine, not least because the infringement occurred at a time when the beef sector was suffering as a result of so-called 'mad cow' disease<sup>389</sup>. The OFT closed its investigation into the fee guidance provided by the Royal Institute of British Architects to its members after RIBA varied the guidance so that it could no longer facilitate collusion on prices<sup>390</sup>. In *Stock Check Pads*<sup>391</sup> the OFT imposed fines of £2,184,767, reduced to £168,318 for leniency, on undertakings found to have fixed prices (and shared markets) for stock check pads, used by staff in cafes and restaurants to record customers' orders. In *Aluminium Spacer Bars*<sup>392</sup> fines of £1,384,050, reduced to £898,470 for leniency, were imposed for price fixing, customer allocation and market sharing for aluminium spacer bars used in double glazing. The OFT closed its file on joint selling arrangements between suppliers of car paint and ancillary equipment, against assurances that its members would be free to set prices<sup>393</sup>.

In *LINK Interchange Network Ltd*<sup>394</sup> the OFT granted individual exemption to the multi-lateral interchange fee collectively agreed between banks whose customers withdraw cash from cash points. The OFT's decision that MasterCard's interchange fees infringed the

<sup>392</sup> OFT decision of 29 June 2006 [2006] UKCLR 921, upheld on appeal in Case No 1072/1/1/06 *Sepia Logistics Ltd v OFT* [2007] CAT 13, [2007] CompAR 747.

<sup>393</sup> Case closure of February 2009, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>394</sup> OFT decision of 16 October 2001.

Chapter I prohibition was subsequently withdrawn<sup>395</sup>; the OFT continues to investigate MasterCard's current fees.

### (B) **Agreements relating to terms and conditions**<sup>396</sup>

Agreements on terms and conditions and codes of practice may be caught by the Chapter I prohibition.

### (C) **Horizontal market sharing**<sup>397</sup>

The first fine to be imposed under the Competition Act in a cartel case occurred in *Market Sharing by Arriva plc and FirstGroup plc*<sup>398</sup>, where those two companies were found to have shared bus routes in the Leeds area. The *Stock Check Pads*<sup>399</sup> decision involved market sharing as well as price fixing, and the *Aluminium Spacer Bars*<sup>400</sup> decision included findings of customer allocation and market sharing.

A market-sharing agreement was terminated following investigation by the OFT in the case of *Suppliers of Laboratory Materials*<sup>401</sup>.

### (D) **Quotas and other restriction on production**<sup>402</sup>

The OFT decided to permit an agreement in *Memorandum of Understanding on the supply of oil fuels in an emergency*<sup>403</sup> which would enable the Government to direct supplies of fuel to 'essential users' such as providers of emergency services in the event of a fuel shortage: the OFT's view was that the agreement satisfied the criteria of section 9 of the Competition Act for a period of ten years<sup>404</sup>.

### (E) **Collusive tendering**<sup>405</sup>

Beginning with *West Midland Roofing Contractors* in 2004 the OFT has adopted a number of decisions involving collusive tendering. The fines imposed (before and after allowances for leniency and appeals) in these cases were as follows:

- *West Midland Roofing Contractors*<sup>406</sup>: £971,186, reduced to £297,625 after leniency and to £288,625 after appeal<sup>407</sup>
- *Mastic Asphalt Flat-roofing Contracts in Scotland*<sup>408</sup>: £231,445, reduced to £87,353 after leniency

<sup>408</sup> OFT decision of 7 April 2005 [2005] UKCLR 638.

- *Felt and Single Ply Roofing Contracts in Western-Central Scotland*<sup>409</sup>: £238,576, reduced to £138,515 after leniency
- *Flat Roof and Car Park Surfacing Contracts in England and Scotland*<sup>410</sup>: £1.852 million, reduced to £1.557 million after leniency
- *Bid rigging in the construction industry in England*<sup>411</sup>: £194.1 million, reduced to £129.2 million after leniency and the ‘fast-track offer’ and to £63.992 million after appeals.

In January 2007 the OFT, in conjunction with the Office of Government Commerce, published a joint guide for public-sector procurers of construction services on achieving value through the competitive process; it also highlights practical steps to avoid falling victim to collusive tendering<sup>412</sup>.

The judgment of the Competition Appeal Tribunal in *Apex Asphalt and Paving Co Ltd v OFT*<sup>413</sup> is particularly useful on the legal analysis of collusive tendering. The OFT had concluded that various roofing contractors, including Apex, were guilty of colluding in relation to the making of tender bids for flat roofing contracts in the West Midlands. Having set out the principles of relevance to determining whether undertakings are party to a concerted practice<sup>414</sup>, the CAT proceeded to apply them to a tendering process in which some of the participating undertakings make ‘cover bids’, that is to say that they submit a price for a contract that is not intended to win the contract (the reason for doing this is that it maintains the appearance of competition, and indicates that the person offering the cover bid wishes to continue participating in future invitations to tender). In the CAT’s view:

- a tendering process is designed to produce competition in a very structured way
- bidders are sometimes required to certify that they have not had contact with competitors in the preparation of their bids
- where the tendering is selective rather than open to all potential bidders the loss of independence through knowledge of the intentions of other selected bidders is particularly likely to distort competition<sup>415</sup>.

The CAT was satisfied on the facts of the case that Apex was party to a concerted practice. The CAT applied the same reasoning in *Makers UK Ltd v OFT*<sup>416</sup>, an unsuccessful appeal against the OFT’s decision in *Flat Roof and Car Park Surfacing Contracts in England and Scotland*. The OFT’s decision in *Construction bid-rigging* was discussed above. A report in June 2010 found that there had been significant improvements in awareness of competition law and changes in behaviour since the OFT’s decision<sup>417</sup>. On appeal the CAT

upheld the decision in four cases<sup>418</sup>, partially annulled the decision in four cases<sup>419</sup>, and reduced the fines in 20 cases<sup>420</sup>.

## (F) Information agreements<sup>421</sup>

In *Exchange of Information on Future Fees by Certain Independent Fee-Paying Schools*<sup>422</sup> the participant schools submitted details of their current fee levels, proposed fee increases (expressed as a percentage) and the resulting intended fee levels to the bursar of one of the schools, who then circulated the information to all the other participants in a tabular form. The OFT concluded that this agreement restricted competition by object; it made no finding as to the effect of the agreement<sup>423</sup>. The OFT declined to accept commitments from the schools under section 31A of the Competition Act since the infringement was a serious one<sup>424</sup>. Each school agreed to pay a nominal fine of £10,000, and they agreed to make *ex gratia* payments of £3 million into a trust fund to benefit pupils who attended the schools during the period of the information exchange<sup>425</sup>. In *Loan pricing*<sup>426</sup> the OFT found that Royal Bank of Scotland had unlawfully disclosed generic and specific confidential future pricing information for loan products to Barclays; RBS admitted the infringement and agreed to pay a fine of £28.59 million. There was no fine on Barclays as it had blown the whistle.

In *Motor Car Insurers* the OFT was concerned that private motor insurers were exchanging price information through an IT product, possibly with the object of restricting competition. In January 2011 the OFT announced that it intends to accept commitments under section 31A of the Act, whereby the parties would agree only to exchange pricing information that is anonymous and averaged across at least five insurers; in the OFT's view this should prevent the possibility of coordination from arising<sup>427</sup>.

## (G) Advertising restrictions<sup>428</sup>

The OFT accepts that the restriction of advertising may diminish competition; however, attempts to curb misleading advertising, or to ensure that advertising is legal, truthful and decent, are unlikely to have an appreciable effect on competition<sup>429</sup>.

<sup>418</sup> Case No 1121/1/1/09 *Durkan Holdings Ltd v OFT* [2011] CAT 6, paras 13–92; Case No 1126/1/1/09 *ISG Pearce Ltd v OFT* [2011] CAT 10, paras 11–36; Case No 1120/1/1/09 *Quarby Construction Co Ltd v OFT* [2011] CAT 11, paras 8–140; Case No 1124/1/1/09 *North Midland Construction plc v OFT* [2011] CAT 14, paras 35–63.

## (H) Anti-competitive horizontal restraints

Other anti-competitive agreements may also be subject to the Chapter I prohibition. In the *General Insurance Standards Council* decision<sup>430</sup> the OFT concluded that the rules of that association did not appreciably restrict competition. On appeal the CAT held that a rule that meant that intermediaries could not sell the general insurance products of GISC's members unless they (the intermediaries) were also members of GISC amounted to a collective boycott and therefore a restriction of competition contrary to the Chapter I prohibition; in the Tribunal's view, the rules could be upheld, if at all, only by recourse to the criteria in section 9 of the Act<sup>431</sup>. In the event the offending rule was dropped, so that the OFT was able to adopt a fresh non-infringement decision<sup>432</sup>. The OFT has closed its files on several other cases concerning allegedly exclusionary rules of sports and professional associations, often following amendments to ensure open, non-discriminatory access to those associations<sup>433</sup>.

In the case of *Construction Recruitment Forum*<sup>434</sup> the OFT considered a collective boycott of a new entrant was among the most serious kind of infringement; the OFT's decision on this point was affirmed by the CAT<sup>435</sup>.

## Horizontal agreements (2) – oligopoly, tacit collusion and collective dominance

1. Introduction	559	4. Article 102 and Collective Dominance	571
2. The Theory of Oligopolistic Interdependence	560	5. UK Law	582
3. Article 101	567		

### 1. Introduction

This chapter is concerned with the related topics of oligopoly, tacit collusion and collective dominance. Put at its simplest, a problem for competition policy arises in markets in which there are only a few operators who are able, by virtue of the characteristics of the market, to behave in a parallel manner and to derive benefits from their collective market power, without, or without necessarily, entering into an agreement or concerted practice to do so in the sense of Article 101 TFEU or the Chapter I prohibition of the Competition Act 1998. This phenomenon is known in economics as ‘tacit collusion’, an expression which jars with lawyers, who associate the notion of collusion with actively conspiratorial behaviour of the kind captured by the expressions ‘agreement’ and ‘concerted practice’ in Article 101 and the Chapter I prohibition. The terms ‘tacit coordination’ and ‘coordinated effects’ may be preferable to tacit collusion, in that they connote the idea of parallel behaviour without attaching the opprobrious term ‘collusion’<sup>1</sup>. Nevertheless ‘tacit collusion’ is included in the title of this chapter in deference to the weight of the economics literature which uses it.

The issue for competition policy is to determine, assuming that the problem just described does indeed exist, how to deal with it: is the ‘oligopoly problem’ one of behaviour, in which case is it possible to deal with it through the application of Articles 101 and 102 and their domestic equivalents; or is it one that arises from the structure of the industry in question, in which case structural solutions, most obviously through the system of merger control but also, in the UK, through the market investigation provisions of the Enterprise Act 2002, may be needed to address it?

This chapter will begin with discussion of oligopolistic interdependence. Sections 3 and 4 will consider the extent to which Articles 101 and 102 can be used to address it. Section 5 of the chapter discusses UK law and, in particular, the possible use of the market investigation provisions of the Enterprise Act or the system of merger control established

<sup>1</sup> See ‘Terminology: “tacit collusion”; “conscious parallelism”; “tacit coordination”; “coordinated effects”’, p 562 below.

by it. The extent to which the problem of coordinated behaviour on the part of oligopolists can be addressed in the investigation of mergers is discussed further in chapters 20 to 22 of this book.

## 2. The Theory of Oligopolistic Interdependence

### (A) Outline of the theory

The basic objection to monopoly is that a monopolist is able to restrict output and thereby increase the price of its goods or services. As a result it earns supra-competitive profits and society is deprived of the output it has suppressed. In perfect competition no firm has sufficient power over the market to affect prices by an alteration in its output; each firm 'takes' the price from the market and that price will coincide with the cost of producing the product in question<sup>2</sup>. Competition law typically seeks to prevent independent undertakings from coordinating their marketing behaviour and appreciably restricting competition: horizontal price-fixing agreements and analogous cartels are subject to Article 101 TFEU and the Chapter I prohibition<sup>3</sup>.

#### (i) The meaning of oligopoly and a warning about the term

In reality few markets are perfectly competitive and many are oligopolistic; the general trend in recent years has undoubtedly been towards an increase in industrial concentration. There is a vast literature on the 'problem' of oligopoly<sup>4</sup>. Oligopoly is a phenomenon that exists somewhere on the continuum that begins at monopoly and ends at perfect competition, or 'polypoly', where 'mono' means one, 'oligo' a few and the first 'poly' in polypoly means many.

The expression oligopoly is not entirely helpful in describing the situation of concern for competition policy, since there are many markets in which there are only a few sellers and yet which are highly competitive; and there are others in which there may be many firms and yet a failure of the competitive process. Economic models of oligopolists competing on price or output are supportive of this point<sup>5</sup>: some oligopolies are 'benign' in

<sup>2</sup> See ch 1, 'The benefits of perfect competition', pp 4–6.

<sup>3</sup> See ch 13 generally.

<sup>4</sup> See eg Turner 'The Definition of Agreement under the Sherman Act: Conscious Parallelism and Refusals to Deal' (1962) 75 *Harvard Law Review* 655; Posner 'Oligopoly and the Antitrust Laws: A Suggested Approach' (1969) 21 *Stanford Law Review* 1562; Tirole *The Theory of Industrial Organisation* (MIT Press, 1988), ch 6; Scherer and Ross *Industrial Market Structure and Economic Performance* (Houghton Mifflin, 3rd ed, 1990), chs 6–8; Stevens 'Covert Collusion and Conscious Parallelism in Oligopolistic Markets: A Comparison of EC and US Competition Law' (1995) *Yearbook of European Law* 47; Monti 'Oligopoly: Conspiracy? Joint Monopoly? Or Enforceable Competition?' (1996) 19(3) *World Competition* 59; Lopatka 'Solving the Oligopoly Problem: Turner's Try' (1996) 41 *Antitrust Bulletin* 843; National Economic Research Associates *Merger Appraisal in Oligopolistic Markets* (OFT Research Paper 19, 1999); Europe Economics *Study on Assessment Criteria for Distinguishing between Competitive and Dominant Oligopolies in Merger Control* (DG Enterprise, May 2001); Bishop and Walker *The Economics of EC Competition Law* (Sweet & Maxwell, 3rd ed, 2010), paras 7.049–7.075; Ivaldi, Jullien, Rey, Seabright and Tirole 'The Economics of Tacit Collusion' Final Report for DG Competition, March 2003; Stroux *US and EC Oligopoly Control* (Kluwer, 2004); Werden 'Economic Evidence on the Existence of Collusion: Reconciling Antitrust Law with Oligopoly' (2004) 71 *Antitrust Law Journal* 719; Brock 'Antitrust Policy and the Oligopoly Problem' (2006) 51 *Antitrust Bulletin* 227; Lipsey and Chrystal *Principles of Economics* (Oxford University Press, 11th ed, 2007), pp 185–199; see also some of the earlier economics literature, eg Hall and Hitch 'Price Theory and Business Behaviour' (1939) 2 *Oxford Economic Papers* 12–45; Sweezy 'Demand under Conditions of Oligopoly' (1937) 47 *J Pol Ec* 568–575; Stigler 'The Kinky Oligopoly Demand Curve' (1947) 55 *J Pol Ec* 431.

<sup>5</sup> For a general discussion of these models see Carlton and Perloff *Modern Industrial Organisation* (Longman, 4th ed, 2004), ch 6; Church and Ware *Industrial Organisation: A Strategic Approach*

terms of competition; others may be malign where they are particularly conducive to uncompetitive outcomes. For this reason it is increasingly recognised that to address the problem of 'oligopoly', as if the problem were purely numerical, is to miss the correct target. The expression oligopoly means 'sale by a few sellers', but it is not the fact of 'fewness', in itself, that is the problem. To depict the problem as a matter of numbers does not do full justice to economists' concept of 'market power'; it is market power, whether individual or collective, that confers the ability to suppress output and to raise price to the detriment of consumers. It is true that the fewer the number of players in a market, the more likely it is that market power will exist; however, the identification of market power is not simply a matter of counting heads. There is, nevertheless, a certain catchiness in talking of 'the oligopoly problem', and there is no harm in using the expression provided that the caveat just entered is kept in mind.

### (ii) The oligopoly problem

The main argument against oligopoly is that the characteristics of the market in which oligopolists operate are such that they will not compete with one another on price and will have little incentive to compete in other ways; furthermore they will be able to earn supra-competitive profits without entering into an agreement or concerted practice generally proscribed by competition law. In a perfectly competitive market a firm which cuts its price will have an imperceptible effect on its competitors, so that they will not need to respond. In an oligopoly a reduction in price would swiftly attract the customers of the other two or three rivals, the effect upon whom would be so devastating that they would have to react by matching the cut. Similarly an oligopolist could not increase its price unilaterally, because it would be deserted by its customers if it did so. Thus the theory runs that in an oligopolistic market rivals are interdependent: they are acutely aware of each other's presence and are bound to match one another's marketing strategy. The result is that price competition between them will be minimal or non-existent; oligopoly produces non-competitive stability. The literature on so-called 'game theory' and 'the Prisoner's Dilemma', which recognises that firms take into account the likely actions (and reactions) of competitors when deciding how to behave, is supportive of this view of oligopoly<sup>6</sup>.

The argument can be taken further. All firms have a will to maximise profits: profits are greater in monopolistic markets in which output is suppressed. Oligopolists recognise their interdependence as well as their own self-interest. By matching each other's conduct they will be able to achieve and charge a profit-maximising price which will be set at a supra-competitive level, without actually communicating with one another. There does not need to be any communication: the structure of the market is such that, through interdependence and mutual self-awareness, prices will rise towards the monopolistic level. Also the non-competitive environment in which oligopolists function will enable them to act in an inefficient and wasteful manner.

(McGraw-Hill/Irwin, 2000), ch 8; Bishop and Walker *The Economics of EC Competition Law* (Sweet & Maxwell, 3rd ed, 2010), paras 2.020–2.033.

<sup>6</sup> See Tirole pp 205–208; Scherer and Ross pp 208–215; Bishop and Walker paras 2.28–2.30; Lipsey and Chrystal pp 188–192; Franzosi 'Oligopoly and the Prisoner's Dilemma: Concerted Practices and "As If" Behaviour' (1988) 9 ECLR 385; Carlton and Perloff ch 6; Church and Ware chs 3 and 4; Cabral *Introduction to Industrial Organization* (MIT Press, 2000); Van den Bergh and Camesasca *European Competition Law and Economics: A Comparative Perspective* (Sweet & Maxwell, 2nd ed, 2006), pp 156–159; Motta *Competition Policy: Theory and Practice* (Cambridge University Press, 2004), ch 8; see generally Philips *Competition Policy: A Game Theoretic Perspective* (Cambridge University Press, 1995).

These theoretical arguments have been buttressed by empirical research which purports to show that there is a direct correlation between industrial structure and profit levels, which are said to increase in line with the concentration ratio of the industry in question<sup>7</sup>, although the soundness of much of this evidence has been called into question<sup>8</sup>. The logical conclusion of the case against oligopoly is that, since it is the market structure itself which produces the problem, structural measures should be taken to remedy it by deconcentrating the market. Unless this is done, there will be an area of consciously parallel action in pricing strategies which is beyond the reach of laws against cartels and yet which has serious implications for consumer welfare.

**(iii) Terminology: ‘tacit collusion’; ‘conscious parallelism’; ‘tacit coordination’; ‘coordinated effects’**

There is little doubt that there are markets in which it is possible for firms to coordinate their behaviour without entering into an agreement or being party to a concerted practice in the sense of Article 101(1) or the Chapter I prohibition; such behaviour will be to their own self-advantage and to the disadvantage of customers and ultimately consumers. This situation is often described by economists as ‘tacit collusion’: enjoying the benefits of a particular market structure without actually entering into an agreement to do so. If the firms in question had achieved the same end through explicit collusion, economists would have the same objection – that prices would be higher than they would be without coordination. Economists have no particular interest in whether collusion is ‘tacit’ or ‘explicit’: it is the effects of the collusion that matter.

Lawyers, however, are considerably less comfortable with the expression tacit collusion. ‘Collusion’ is the evil at which Article 101 and the Chapter I prohibition are directed (‘any agreement or concerted practice which has as its object or effect the prevention, restriction or distortion of competition’); in the same way section 1 of the US Sherman Act forbids ‘every contract or conspiracy in restraint of trade’, where the notion of collusiveness is inherent in the ideas of contract and conspiracy. For many lawyers, to ask whether tacit collusion could be caught, for example, by the concept of collective dominance under Article 102 or the Chapter II prohibition in the UK is bizarre, since any behaviour that could be called collusive in a legal sense would be caught by Article 101 or the Chapter I prohibition anyway. If behaviour is not collusive under Article 101, lawyers not unnaturally feel uncomfortable at characterising the same behaviour as tacitly collusive and abusive under Article 102. An alternative expression for the conduct in question, ‘conscious parallelism’, may cause lawyers slightly less discomfort, the opprobrious word ‘collusive’ being avoided; but even ‘consciousness’ seems to move the inquiry back to a search for something sufficiently conspiratorial that it should really be investigated, if at all, under Article 101. In the interests of finding terminology which is meaningful and tolerable both to economists and to lawyers when considering the application of Article 102 it might be better to use the expression ‘tacit coordination’, since this at least eliminates the pejorative word ‘collusion’ whilst retaining the notion of parallel behaviour which is beneficial to the collectively dominant operators on the market and disadvantageous to customers and consumers. In the context of merger control, competition authorities often ask whether a merger would make it more likely that there would be ‘coordinated effects’ on the market, which again has the benefit of avoiding reference to the idea of collusion.

<sup>7</sup> See eg Bain ‘Relation of Profit Rate to Industry Concentration’ (1951) 65 Qu J Ec 293–324.

<sup>8</sup> See eg Weiss ‘The Concentration and Profits Issue’ in *Industrial Concentration: The New Learning* (Little Brown, 1974); Brozen ‘The Concentration-Collusion Doctrine’ (1977) 46 Antitrust Law Journal 826.

**(iv) 'Non-collusive oligopoly'**

An additional complication is the recognition that certain mergers might give rise to competition problems where they would result in 'non-collusive oligopoly', that is to say a situation in which one or more members of an oligopoly, without being individually dominant, would be able to derive benefits from their market power without being dependent on the coordinated response of the other oligopolists. The existence of this possibility is now broadly accepted, albeit that it is fairly rare, and is something that can be addressed under the EU Merger Regulation ('the EUMR')<sup>9</sup>.

**(v) The conditions needed for the successful exercise of collective market power**

For tacit coordination to occur it is necessary for firms to indulge in a common form of behaviour<sup>10</sup>. Typically this would involve the charging of similar prices; however it might also involve parallel decisions to reduce production or not to expand capacity: such decisions would, through the suppression of output, in themselves have an impact on prices in the industry in question. Tacit coordination also requires that each firm will be able to monitor quickly and easily how the others are behaving on the market: successful parallel behaviour requires that no one should deviate from the common conduct; transparency is therefore vital to each economic operator to enable it to know what the others are doing, both in terms of their prices and their output. Finally it is important that discipline among the firms with collective market power can be maintained. The benefits to the few of tacit coordination will be lost if one or more firms depart from the appropriate behavioural standard; in order to prevent this from happening, it is necessary that some retaliatory mechanism should be in place to impose sanctions on deviant firms. The most obvious sanction would be a sharp price war which would be harmful to everyone, and would send a severe warning that abandonment of tacit coordination will be to everyone's disadvantage. Finally, the reactions of competitors, customers and consumers should not be such as to jeopardise the results expected from the tacit coordination<sup>11</sup>.

**(B) Criticisms of the theory**

The theory of oligopolistic interdependence has attracted criticism<sup>12</sup>. Four particular problems have been pointed out.

The first is that the theory tends to overstate the interdependence of oligopolists. Even in a symmetrical three-firm oligopoly one firm might be able to steal a march on its rivals by cutting its price if, for example, there would be a delay before the others discovered what it had done: in the meantime the price-cutter may make sufficient profit to offset the cost of any subsequent retaliation. It may also be that the rivals will be unable to expand their capacity in order to meet the increased demand that could be expected to follow a price cut. Anyway, an expansion in output may simply mean that the price-cutter attracts new customers, not that existing ones switch from its rivals.

A second problem is that the theory of oligopoly presents too simplistic a picture of real-life markets. In a symmetrical, stable oligopoly where producers produce identical

<sup>9</sup> See ch 21, 'The non-collusive oligopoly gap', pp 864–866.

<sup>10</sup> The indicia of tacit coordination have been particularly well explained in the European Commission's *Guidelines on the assessment of horizontal mergers* OJ [2004] C 31/3; they are discussed in ch 21, 'Coordinated effects', pp 871–873.

<sup>11</sup> As will be seen, the Court of Justice's judgment in *Sony/BMG* (see ch 14 n 119 below) defines collective dominance under the EUMR consistently with the conditions set out in this paragraph: see 'The judgments of the Court of Justice in *Compagnie Maritime Belge Transports v Commission*', p 578 below.

<sup>12</sup> See eg Bork *The Antitrust Paradox* (Free Press, 1993), ch 8.

goods at the same costs interdependence may be strong, but in reality market conditions are usually more complex. The oligopolists themselves will almost inevitably have different cost levels; they may be producing differentiated goods and will usually benefit from at least some consumer loyalty; and their market shares will often not be equal. Furthermore there may be a fringe of smaller sellers which may be a competitive constraint on the oligopolists and, depending on barriers to entry, other firms not operating on the market may enter if and when it becomes clear that supra-competitive profits are available. Many other factors affect the competitive environment in which oligopolists operate. The concentration of the market on the buying side is also important: the more concentrated it is, the less the oligopolists might compete with one another since it will be relatively easy to detect attempts to attract the custom of particular customers. The transparency of price information is significant: the easier it is to conceal the price of goods from competitors, the less will be the interdependence or mutual awareness of the oligopolists. Similarly oligopolists may be able, through secret rebates, to charge prices lower than those in their published price lists. These and many other factors mean that oligopolistic markets differ considerably from one another and this in turn makes it difficult to provide a convincing theoretical explanation of how such markets function and how they should be dealt with.

A third problem with the theory of interdependence is that it fails to explain why in some oligopolistic markets competition is intense. Firms quite clearly do compete with one another in some oligopolies. Such competition may take various forms. Open price competition may be limited, although price wars do break out periodically in some oligopolistic markets, for example between supermarkets or petrol companies. Where open price competition is restricted, this does not mean that secret price cutting does not occur. Non-price competition may be particularly strong in oligopolistic markets. This may manifest itself in various ways: offering better quality products and after-sales service; striving for a lead in technical innovation and research and development (sometimes described as the 'grass-roots' of competition in oligopoly); by introducing loyalty schemes of the kinds offered by airlines and supermarkets; and by making large investments in advertising to promote brand image<sup>13</sup>. Whilst expenditure on advertising has been objected to because it is wasteful of resources and amounts to a barrier to entry to new entrants, it is inconsistent with the theory that oligopolists do not compete with one another<sup>14</sup>.

A fourth objection to the theory of oligopolistic interdependence is that it does not explain satisfactorily its central proposition, which is that oligopolists can earn supra-competitive profits without explicitly colluding. The interdependence theory says they cannot increase price unilaterally because they will lose custom to their rivals and yet, to earn supra-competitive profits, prices must have been increased from time to time: how could this have been achieved without explicit collusion? A possible answer to this is that a pattern of price leadership develops whereby one firm raises its price and this acts as a signal to the others to follow suit. Prices therefore remain parallel without conspiracy amongst the oligopolists, although this is not particularly convincing<sup>15</sup>. Economists have suggested that price leadership may take three forms<sup>16</sup>. Dominant price leadership exists

<sup>13</sup> This is a particular feature of certain retail markets such as breakfast cereals, household detergents and alcoholic drinks such as lagers.

<sup>14</sup> See *Scherer and Ross* pp 592–610.

<sup>15</sup> See Posner *Antitrust Law* (University of Chicago Press, 1976), p 59.

<sup>16</sup> See Markham 'The Nature and Significance of Price Leadership' (1951) 41 *Am Ec Rev* 891–905; the classification suggested there was adopted in the former Monopolies and Mergers Commission's report *Parallel Pricing* Cmnd 5330 (1973).

where a dominant firm raises its price and other firms in the industry follow suit because it is in their best interests to do so. This is not what happens in an oligopoly, where no firm is dominant. Secondly, barometric price leadership occurs where one firm raises its price because increased costs (for example, in wages or raw materials) force it to do so: other firms faced with the same increase in costs then follow suit. It would be unreasonable to condemn parallel increases in price if they are explicable on an objective basis in this way. The third type of price leadership is termed collusive: here there is an understanding that firms in an industry will follow the signal emitted from time to time by the price leader. However in this case it would seem to be perfectly reasonable to brand their action as an agreement or a concerted practice under competition law.

Besides these criticisms, there are other objections to the theory of interdependence. One is that it concentrates solely on the tendency to non-collusive price fixing without asking other questions such as why a market is oligopolistic in the first place: this might be because of the superior efficiency associated with economies of scale. In this case, it is necessary to consider at what point the advantages arising from these economies are offset by the adverse effects of a loss of price competition. Others would argue that, even if oligopolists earn supra-competitive profits over a short period, that would attract new entrants to the market and increase competition in the long run unless there are significant barriers to entry to the market. In this case the ‘problem’ of oligopoly is ephemeral: the market could be left to self-correct the problem.

### (C) Possible ways of dealing with oligopoly

Having considered this theoretical debate, the pertinent question is what, if anything, should be done about oligopoly in competition law, assuming that a problem exists.

#### (i) A structural approach

If economic theory were to demonstrate convincingly that oligopoly inevitably leads to non-collusive parallelism of price and an absence of non-price competition, and also that there are no redeeming features of oligopolistic markets, this would suggest that the problem should be seen as a structural one and dealt with as such. In this case it would be necessary to establish a system capable of preventing the structure of the market from becoming conducive to tacit coordination in the first place. As will be seen in chapters 20 to 22, this is a key consideration in merger control. An important question however is whether further structural powers are needed to deconcentrate industries that become oligopolistic other than through the process of mergers: should competition law include powers to dismantle oligopolistic markets, or at least to inject competitiveness into a sleepy, uncompetitive, market? Where an infringement of Article 101 or 102 is the consequence of the structural conditions of the market and there is no effective behavioural remedy, Article 7 of Regulation 1/2003 provides for the possibility of structural remedies to bring that infringement to an end<sup>17</sup>. UK competition law does not explicitly provide such a power under the Competition Act. However a structural solution to the problem of oligopolistic markets is possible under the market investigation regime of the Enterprise Act<sup>18</sup>. It goes without saying that it would require an exceptional case for these draconian remedies to be used, but it is important to be aware of the fact that the possibility does exist.

<sup>17</sup> See ch 7, ‘Structural remedies’, p 254.

<sup>18</sup> See ‘Market investigations under the Enterprise Act 2002’, pp 568–569 below and ch 11, ‘Final powers’, pp 476–477.

### (ii) A behavioural approach

An alternative approach is to see the problem as essentially behavioural in nature, in which case control is necessary to prevent oligopolists behaving in a way that is uncompetitive. Some would favour making any parallelism in price between oligopolists illegal. This however would be quite inappropriate: it would be absurd to forbid firms from behaving in a parallel manner if this is a rational response to the structure of the market. To put the point another way, it would be strange indeed if competition law were to mandate that firms should behave irrationally, by not acting in parallel, in order to avoid being found to have infringed competition law.

Where oligopolists really do collude, for example to fix prices or to share markets, there is no reason why they – like firms in less concentrated markets – should not be subject to the provisions of Article 101 and the Chapter I prohibition of the Competition Act 1998. The term ‘concerted practice’ catches any situation in which firms knowingly substitute practical cooperation for the risks of competition. However when this concept is applied to oligopolists a different problem arises: it can be difficult to distinguish conduct which is collusive in the sense of Article 101 and the Chapter I prohibition from parallel conduct which is attributable to the oligopolistic structure of a market. This problem is compounded by the fact that in many cases there is little or no evidence of unlawful contact between firms, such as the minutes of a meeting: firms that really do intend to rig the market are wise enough usually to destroy incriminating evidence. The danger is that a competition authority or court will too readily reach the conclusion that parallel conduct means that there is collusion; this can be avoided only by considering the alternative explanations for such conduct, including an economic analysis of the market in question. An understanding of the economics of oligopoly is vital when trying to decide whether parallel conduct is collusive (in the legal sense) or not<sup>19</sup>.

As a separate matter, it may be appropriate in oligopolistic markets to prohibit ‘facilitating practices’ that encourage parallel behaviour: an obvious example is the exchange of information between oligopolists that makes it easier for them to behave in the same way. As we have seen, the structure of the market is one of the factors taken into account when analysing information agreements under Article 101 and the Chapter I prohibition<sup>20</sup>. The possibility that an agreement might facilitate parallel behaviour may also be taken into account when considering whether an agreement satisfies the criteria of Article 101(3)<sup>21</sup>. Finally, it may be sensible to prevent exclusionary abuses of a collective dominant position which have the effect of eliminating actual or potential competitors from oligopolistic markets; as will be seen, there have been a few cases in which Article 102 has been used to deal with behaviour of this sort.

### (iii) A regulatory approach

A different possibility would be to regulate the prices of undertakings that operate in an oligopolistic environment. This, however, would be a counsel of despair. As a matter of policy direct regulation should be a remedy of last resort. Competition authorities should not be price regulators; they should be the guardians of the competitive process. Where markets are oligopolistic and entry is limited, competition authorities should be concerned with the question of whether there are barriers to entry and whether the

<sup>19</sup> See further the discussion in ch 3, ‘Concerted practices’ pp 112–115.

<sup>20</sup> See ch 13, ‘Exchanges of Information’, pp 539–547 and ‘Article 101(1), the exchange of information and other facilitating practices’, pp 569–570 below.

<sup>21</sup> See ‘Article 101(3)’, p 571 below.

state itself, for example through restrictive licensing rules, regulation or legislation, is responsible for a lack of competition.

#### (iv) An investigatory approach

A problem of market failure of the kind described above may be tackled by conducting an investigation; this may enable the competition authority to understand better why a market is not functioning well, and what steps should be taken to improve the situation. Sectoral inquiries in the EU<sup>22</sup> and market investigations in the UK<sup>23</sup> are examples of this approach.

### 3. Article 101

#### (A) Does parallel behaviour amount to a concerted practice under Article 101?

Both the Commission and the EU Courts appreciate that price competition in an oligopoly may be muted and that oligopolists react to one another's conduct, so that parallel behaviour does not, in itself, amount to a concerted practice under Article 101(1)<sup>24</sup>. In *Dyestuffs*<sup>25</sup> the Court of Justice said at paragraphs 65 and 66 that:

By its very nature, then, the concerted practice does not have all the elements of a contract but may *inter alia* arise out of coordination which becomes apparent from the behaviour of the participants. *Although parallel behaviour may not itself be identified with a concerted practice*, it may however amount to strong evidence of such a practice if it leads to conditions of competition which do not respond to the normal conditions of the market, having regard to the nature of the products, the size and number of the undertakings, and the volume of the said market. Such is the case especially where the parallel behaviour is such as to permit the parties to seek price equilibrium at a different level from that which would have resulted from competition, and to crystallise the status quo to the detriment of effective freedom of movement of the products in the [internal] market and free choice by consumers of their suppliers (emphasis added).

The Court added at paragraph 68 that the existence of a concerted practice could be appraised correctly only:

if the evidence upon which the contested decision is based is considered, not in isolation, but as a whole, account being taken of the specific features of the products in question.

In *Dyestuffs* the parties argued that they had acted in a similar manner only because of the oligopolistic market structure. The Court rejected this assertion since the market was not a pure oligopoly: rather it was one in which firms could realistically be expected to adopt their own pricing strategies, particularly in view of the compartmentalisation of the markets along national boundaries. The Court recognised that there might be situations in which a firm must take into account a rival's likely responses, but said that this did not entitle them actually to coordinate their behaviour:

<sup>22</sup> On sectoral inquiries see ch 7, 'Article 17: investigations into sectors of the economy and into types of agreements', pp 267–268.

<sup>23</sup> On market investigations see ch 11, 'Overview of the Provisions on Market Investigation References', pp 452–454.

<sup>24</sup> On concerted practices generally see ch 3, 'Concerted practices' pp 112–115.

<sup>25</sup> Cases 48/69 etc [1972] ECR 619, [1972] CMLR 557.

Although every producer is free to change his prices, taking into account in so doing the present or foreseeable conduct of his competitors, nevertheless it is contrary to the rules on competition contained in the Treaty for a producer to cooperate with his competitors, in any way whatsoever, in order to determine a coordinated course of action relating to a price increase and to ensure its success by prior elimination of all uncertainty as to each other's conduct regarding the essential elements of that action, such as the amount, subject-matter, date and place of the increases<sup>26</sup>.

In *Züchner v Bayerische Vereinsbank AG*<sup>27</sup> the Court of Justice repeated that intelligent responses to a competitor's behaviour would not bring firms within the scope of Article 101(1). In *Zinc Producer Group*<sup>28</sup> the Commission said that it did not intend to condemn parallel action between 1977 and 1979 which might be explicable in terms of 'barometric price leadership'<sup>29</sup>, saying that in such circumstances 'parallel pricing behaviour in an oligopoly producing homogeneous goods will not in itself be sufficient evidence of a concerted practice'<sup>30</sup>. In *Peroxygen Products*,<sup>31</sup> however, the Commission rejected an argument that an agreement between oligopolists fell outside Article 101(1) since, even without the agreement, the structure of the market would have meant that they would have behaved in the same way. In the Commission's view, the very fact that the firms had entered into an agreement at all indicated that the risks of competition might have led to different market behaviour.

In *Wood Pulp*<sup>32</sup> the Commission held that producers of wood pulp were guilty of a concerted practice to fix prices in the EU. There had been parallel conduct on the market from 1975 until 1981, but there was no evidence of explicit agreements to fix prices. However the Commission concluded that there was a concerted practice, basing its finding on two factors. The first was that there had been direct and indirect exchanges of price information which had created an artificial transparency on the market. The second was that, in the Commission's view, an economic analysis of the market demonstrated that it was not a narrow oligopoly in which parallel pricing might be expected. On appeal, the Court of Justice substantially annulled the Commission's findings<sup>33</sup>. The fact that pulp producers announced price rises to users in advance on a quarterly basis did not in itself involve an infringement of Article 101(1): making information available to third parties did not eliminate the producers' uncertainty as to what each other would do<sup>34</sup>. Furthermore, there were alternative explanations for the system of and simultaneity of price announcements, and the parallelism of prices could be explained other than by the existence of a concerted practice. Information was widely available on the market as buyers informed each other of the prices available, some agents acted for several producers and so were well informed about prices and the trade press was dynamic. As to parallelism, the evidence of experts appointed by the Court was that the market was more oligopolistic (on both sides of the market) than the Commission had supposed, and that economic problems had discouraged producers from engaging in price cutting which their competitors would inevitably follow; the experts also considered that there was evidence to suggest that there could not have been concertation: for example, market shares had varied from

<sup>33</sup> Cases C-89/85 etc *Ahlström Oy v Commission* [1993] ECR I-1307, [1993] 4 CMLR 407; see Jones 'Wood Pulp: Concerted Practice and/or Conscious Parallelism?' (1993) 14 ECLR 273; Van Gerven and Varano 'The Wood Pulp Case and the Future of Concerted Practices' (1994) 31 CML Rev 575.

<sup>34</sup> [1993] ECR I-1307, [1993] 4 CMLR 407, paras 59–65.

time to time, which would be unlikely if there had been a concerted practice; and the alleged cartel members had not tried to establish production quotas, which they could be expected to have done if they wished to control the market<sup>35</sup>.

This important judgment demonstrates that the burden is on the Commission to prove the existence of a concerted practice and, when it relies solely on the conduct of the firms in question<sup>36</sup>, to deal with any alternative explanations advanced by the parties of parallel behaviour on the market. The judgment does acknowledge, however, that, in an appropriate case, parallelism could be evidence of a concerted practice where there is no plausible alternative explanation<sup>37</sup>.

In *British Sugar*<sup>38</sup> British Sugar deployed the argument that the oligopolistic nature of the market meant that price competition was limited, and that its price leadership should not be regarded as evidence of a concerted practice. The Commission's reply to this was that, where competition in a market is already restricted, it should be particularly vigilant to ensure that the competition which does exist is not restricted<sup>39</sup>; the General Court upheld this finding on appeal<sup>40</sup>. This is consistent with the judgment in *Steel Beams*<sup>41</sup>.

In *CISAC* the Commission prohibited a number of collecting societies from restricting competition by limiting their ability to offer services outside their domestic territory; the Commission found that the only possible explanation for the societies' parallel behaviour was a concerted practice<sup>42</sup>.

## **(B) Article 101(1), the exchange of information and other facilitating practices**

The previous section has discussed the difficulties in determining whether parallel behaviour may be attributable to a concerted practice. A competition authority must avoid reaching a conclusion that a concerted practice exists if there is an alternative explanation of any parallel behaviour. However this is not to say that Article 101(1) cannot be deployed in other ways to deal with the problem of parallel behaviour: in particular it can be applied to what are often referred to as 'facilitating practices', that is to say practices that make it easier for firms to achieve the benefits of tacit coordination. The most obvious of these is the exchange of information which increases the transparency of the market and so makes parallel behaviour easier. It is for this reason that the application of Article 101(1) to information agreements focuses, amongst other things, on the structure of the market<sup>43</sup>: it was the oligopolistic structure of the market in *UK Agricultural Tractor*

<sup>41</sup> Case T-141/94 *Thyssen Stahl AG v Commission* [1999] ECR II-347, [1999] 4 CMLR 810, para 302.

<sup>42</sup> Commission decision of 16 July 2008 [2009] 4 CMLR 577, paras 156–223, on appeal in Cases T-398/08 etc *Stowarzyszenie Autorów v Commission*, not yet decided; an application for interim measures was dismissed in Case T-411/08 R *Artisjus v Commission*, order of 14 November 2008, upheld on appeal in Case C-32/09 R, order of 31 August 2010.

<sup>43</sup> See ch 13, 'Exchanges of Information', pp 539–547.

*Registration Exchange*<sup>44</sup> that led the Commission to conclude that Article 101(1) had been infringed; and the more competitive nature of the cars' market that led it to the opposite conclusion in relation to it<sup>45</sup>. In *Thyssen Stahl v Commission*<sup>46</sup> the General Court held that, where the structure of a market is oligopolistic, it is all the more important to ensure the decision-making independence of undertakings and residual competition, and that therefore the exchange of recent data on market shares could infringe Article 101(1)<sup>47</sup>. The Commission applied this principle in *Bananas* when condemning three banana producers for coordinating their quotation prices<sup>48</sup>.

The Commission will look for other facilitating practices. For example at paragraph 20 of its *Guidelines on Vertical Restraints*<sup>49</sup> it says that it will examine agency agreements, even where the principal bears all the financial and commercial risks, if they could facilitate collusion<sup>50</sup>. This could happen, in the Commission's view, if a number of principals use the same agents whilst collectively preventing others from doing so, or where they use agents to collude on marketing strategy or to exchange sensitive information between themselves. Similar concerns are expressed throughout the *Guidelines* as to the possibility of vertical agreements facilitating collusion<sup>51</sup>.

The Commission's *Guidelines on Horizontal Cooperation Agreements*<sup>52</sup> state that, in assessing horizontal cooperation agreements other than 'hard-core' cartels of the kind that almost always fall within Article 101(1)<sup>53</sup>, the characteristics of the market will be taken into account<sup>54</sup>: some agreements may be found not to be anti-competitive where the market is reasonably competitive, but to be problematic where it is oligopolistic. The application of these *Guidelines* is considered in some detail in chapter 15<sup>55</sup>.

The Commission has applied the *de minimis* doctrine narrowly in the case of an oligopoly<sup>56</sup> and has more readily found an appreciable effect on inter-state trade of an agreement where the market was oligopolistic<sup>57</sup>.

<sup>44</sup> OJ [1992] L 68/19, [1993] 4 CMLR 358, para 16, upheld on appeal to the General Court in Cases T-34/92 and T-35/92 *Fiatagri UK Ltd v Commission* [1994] ECR II-905 and 957 and on appeal to the Court of Justice in Cases C-7/95 and C-8/95 P *John Deere v Commission* [1998] ECR I-3111, and 3175, [1998] 5 CMLR 311.

<sup>57</sup> *Cast Iron and Steel Rolls* OJ [1983] L 317/1, [1984] 1 CMLR 694, upheld on appeal Cases 29 and 30/83 *Compagnie Royale Asturienne des Mines SA and Rheinzink GmbH v Commission* [1984] ECR 1679, [1985] 1 CMLR 688.

### (C) Article 101(3)

The structure of the market will be relevant to the analysis of agreements under Article 101(3), in particular since that provision requires that there should be no substantial elimination of competition<sup>58</sup>. The fact that the Commission's block exemptions contain market share caps in itself means that firms in an oligopoly will often not be able to avail themselves of these legal instruments<sup>59</sup>. In *P&O Stena Line*<sup>60</sup> the Commission decided that the criteria of Article 101(3) were satisfied in the case of a joint venture for cross-channel ferry services for a limited period of three years; the decision considered at length whether there was a risk that the joint venture would create a duopoly on the 'short sea tourist market', but concluded that the joint venture and Eurotunnel, the operator of the Channel Tunnel, could be expected to compete with each other rather than to act in parallel to raise prices<sup>61</sup>.

An agreement might be found to satisfy Article 101(3) where it would have the effect of introducing more competition into an oligopolistic market<sup>62</sup>.

## 4. Article 102 and Collective Dominance<sup>63</sup>

One of the most complex and controversial issues in EU competition law has been the application – or non-application – of Article 102 TFEU (and the EUMR) to so-called 'collective dominance'<sup>64</sup>. Discussion of this question in relation to Article 102 can be traced back at least to the early 1970s<sup>65</sup>; an enormous body of literature has developed<sup>66</sup>. The law

<sup>58</sup> See ch 4, 'Determining whether competition will be substantially eliminated', pp 164–165.

<sup>59</sup> On the market share caps in the block exemptions see ch 4, 'The format of block exemptions', pp 171–172.

<sup>60</sup> OJ [1999] L 163/61, [2000] 5 CMLR 682. <sup>61</sup> *Ibid*, para 127.

<sup>62</sup> See eg *Carlsberg* OJ [1984] L 207/26, [1985] 1 CMLR 735.

<sup>63</sup> The text that follows is based, in part, on 'Collective Dominance', in the *Liber Amicorum in Honour of Lord Slynn of Hadley Judicial Review in European Union Law* (Kluwer Law International, 2000, eds O'Keefe and Bavasso), ch 37.

<sup>64</sup> At various times the expressions 'collective dominance', 'joint dominance' and 'oligopolistic dominance' have been used interchangeably. In Cases C-395/96 P etc *Compagnie Maritime Belge Transports SA v Commission* [2000] ECR I-1365, [2000] 4 CMLR 1076 Advocate General Fennelly indicated that he saw no meaningful distinction between these terms, but used the expression 'collective dominance' as this was the one that the Court itself usually employed; in its judgment in the same case the Court of Justice used the expression 'collective dominance' throughout: see in particular para 36; it also did so in Case C-413/06 P *Bertelsmann AG v Impala* [2008] ECR I-4951, [2008] 5 CMLR 1073, a case under the EUMR.

<sup>65</sup> See ch 14 n 79 below.

<sup>66</sup> See eg Whish and Sufrin 'Oligopolistic Markets and EC Competition Law' (1992) 12 Oxford Yearbook of European Law 59; Winkler and Hansen 'Collective Dominance under the EC Merger Control Regulation' (1993) 30 CML Rev 787; Ridyard 'Economic Analysis of Single Firm and Oligopolistic Dominance under the European Merger Regulation' (1994) 15 ECLR 255; Rodger 'Market Integration and the Development of European Competition Policy to Meet New Demands: A Study of Oligopolistic Markets and the Concept of a Collective Dominant Position under Article 86 of the Treaty' [1994(2)] Legal Issues of European Integration 1; Rodger 'Oligopolistic Market Failure: Collective Dominance versus Complex Monopoly' (1995) 16 ECLR 21; Briones 'Oligopolistic Dominance: is there a Common Approach in Different Jurisdictions?' (1995) 16 ECLR 334; Soames 'An Analysis of the Principles of Concerted Practice and Collective Dominance: a Distinction without a Difference' (1996) 17 ECLR 24; Morgan 'The Treatment of Oligopoly under the European Merger Control Regulation' (1996) 41 Antitrust Bulletin 203; Tillotson and MacCulloch 'EC Competition Rules, Collective Dominance and Maritime Transport' (1997) 21(1) World Competition 51; Venit 'Two Steps Forward and No Steps Back: Economic Analysis and Oligopolistic Dominance after *Kali und Salz*' (1998) 35 CML Rev 1101; Elliott 'The Gencor Judgment: Collective Dominance, Remedies and Extraterritoriality under the Merger Regulation' (1999) 24 EL Rev 638; Korah '*Gencor v Commission*: Collective Dominance' (1999) 20 ECLR 337; Stroux 'Is EC Oligopoly Control Outgrowing Its Infancy?' (2000) 23(1) World Competition 3; Fernandez 'Increasing Powers and Increasing Uncertainty: Collective Dominance and Pricing Abuses' (2000)

and decisional practice on collective dominance, under both legal instruments, developed considerably in the years from 1998 to 2002; of particular importance are the Court of Justice's judgments in *France v Commission* (the so-called *Kali und Salz* case)<sup>67</sup>, a case decided under the EUMR, and *Compagnie Maritime Belge Transports v Commission*<sup>68</sup> and two judgments under the EUMR of the General Court, *Gencor v Commission*<sup>69</sup> and *Airtours v Commission*<sup>70</sup>. A further judgment of the Court of Justice, in the *Sony/BMG* case<sup>71</sup>, followed in 2008. This section will consider in particular the development of the law under Article 102; it would appear to be the case that the expression 'collective dominance' has the same meaning under Article 102 as it has under the EUMR.

### (A) The linguistic background

There is a linguistic background to the issue of collective dominance. Article 102 applies to '[a]ny abuse *by one or more undertakings* of a dominant position within the common market' (emphasis added). The same wording has been adopted in numerous domestic systems of competition law<sup>72</sup>. The fact that Article 102 is capable of application to dominance held on the part of more than one undertaking clearly envisages the possibility, though not the inevitability, of 'collective' dominance being enjoyed by legally and economically separate undertakings; a narrow reading would be that the reference to more than one undertaking refers to different legal entities within the same corporate group<sup>73</sup>. In contradistinction to Article 102, Article 2(3) of the EUMR as it was originally drafted in 1989<sup>74</sup> provided that a concentration that creates or strengthens a dominant position as a result of which competition would be significantly impeded in the common market or a substantial part of it may be declared incompatible with the common market; however this provision does not refer specifically to a dominant position *enjoyed by one or more undertakings*. Linguistically, therefore, it could be argued – as indeed it was by France (among others) in the *Kali und Salz* case<sup>75</sup> – that the EUMR applies only to single firm dominance, even if Article 102 is capable of application to collective dominance. It took many years for the EU Courts to determine the proper scope of Article 102 and the EUMR: in each case in favour of the application of the measure in question to collective dominance.

<sup>72</sup> See eg s 18 of the UK Competition Act 1998.

<sup>73</sup> See 'The definition of collective dominance under Article 102', p 573 below.

<sup>74</sup> Note that Article 2(3) of Regulation 139/2004, OJ [2004] L 24/1, places emphasis on the question of whether a merger would significantly impede effective competition in the common market, 'in particular as a result of the creation or strengthening of a dominant position'.

<sup>75</sup> See ch 14 n 67 above.

## (B) The definition of collective dominance under Article 102

### (i) 'One or more undertakings': the narrow view of Article 102

Article 102 prohibits the abuse of a dominant position 'by one or more undertakings'. The 'narrow' view of the reference to more than one undertaking was that it meant that the market power and behaviour of undertakings within the same corporate group could be aggregated and dealt with under Article 102. In several of the cases on Article 102 a dominant position was found to exist among the members of a group forming a single economic entity. For example in *Continental Can*<sup>76</sup> three different companies in the same group were involved in the Commission's analysis: Continental Can (a US company), SLW (its German subsidiary) which held a dominant position in Germany and Europemballage (also its subsidiary) which acquired a competitor, TDV. It was the overall effect of these companies' position and behaviour which led to a finding of abuse of dominance. Similarly in *Commercial Solvents v Commission*<sup>77</sup> there were two legal entities within the same corporate group, the US parent, Commercial Solvents, and its Italian subsidiary, ICI. It is easy enough to see that the reference in Article 102 to an abuse *by one or more undertakings* might be thought to refer to an abuse that could be attributed to separate legal entities within the same corporate group; it should be added, however, that if those entities are to be regarded as *one* undertaking – as they should be – the approach set out above fails to explain what is meant by an abuse by more than one undertaking<sup>78</sup>.

### (ii) 'One or more undertakings': the wide view of Article 102

An alternative approach to the reference in Article 102 to one or more undertakings is that it has a wider meaning, so that legally and economically independent firms might be considered to hold a 'collective dominant position'. It would follow that abusive market behaviour on the part of collectively dominant firms could be controlled under Article 102 (and, after the adoption of the EUMR, that the Commission would have control over a larger number of concentrations if the same approach could be taken in relation to that legal instrument). The Commission dabbled with the idea of collective dominance under Article 102 in the early 1970s<sup>79</sup>, but the Court of Justice appeared to have rejected it in *Hoffmann-La Roche v Commission*<sup>80</sup>. There the Court seemed to suggest that problems of tacit coordination could not be controlled under Article 102:

A dominant position must also be distinguished from parallel courses of conduct which are peculiar to oligopolies in that in an oligopoly the courses of conduct interact, whilst in the case of an undertaking occupying a dominant position the conduct of the undertaking which derives profits from that position is to a great extent determined unilaterally<sup>81</sup>.

<sup>76</sup> JO [1972] L 7/25, [1972] CMLR D11, the decision was annulled on appeal due to the Commission's failure to define the relevant product market in Case 6/72 *Europemballage Corp and Continental Can Co Inc v Commission* [1973] ECR 215, [1973] CMLR 199.

<sup>77</sup> JO [1972] L 299/51, [1973] CMLR D50, upheld on appeal Cases 6/73 etc [1974] ECR 223, [1974] 1 CMLR 309.

<sup>78</sup> See ch 3, 'The "single economic entity" doctrine', pp 92–97.

<sup>79</sup> See eg the *Report on the Behaviour of the Oil Companies during the period from October 1973 to March 1974*: COM(75) 675, 10 December 1975; *Sugar Cartel* OJ [1973] L 140/17, [1973] CMLR D65 where the Commission held that two Dutch producers held a collective dominant position: the Court of Justice said nothing about this because it considered there was no abuse by the companies anyway, Cases 40/73 etc *Suiker Unie v Commission* [1975] ECR 1663, [1976] 1 CMLR 295.

<sup>80</sup> Case 85/76 [1979] ECR 461, [1979] 3 CMLR 211.

<sup>81</sup> *Ibid*, para 39; similarly see Case 172/80 *Gerhard Züchner v Bayerische Vereinsbank* [1981] ECR 2021, [1982] 1 CMLR 313, para 10.

This apparent rejection of Article 102 as a tool for controlling oligopolistic behaviour was understandable. Oligopolists that participate in agreements or concerted practices would be caught by Article 101(1) anyway. The Court of Justice appears to have taken the view that where oligopolists behave in an identical fashion because of the structure of the market on which they operate, rather than because of participation in an agreement or concerted practice, they should not be condemned for abusing their position if their conduct is rational – even inevitable – behaviour. An approach to the ‘oligopoly problem’ which is based on the concept of abuse in Article 102 seemed inappropriate: or to put it another way, where there was no explicit collusion contrary to Article 101, the Court was not prepared to characterise the economist’s notion of tacit collusion as abusive under Article 102. After *Hoffmann-La Roche* a period of relative inactivity followed. For example in *Alcatel v NOVASAM*<sup>82</sup> the Commission invited the Court of Justice to adopt a theory of collective dominance in an Article 267 reference, but the Court declined to comment on the point in its judgment. In *Magill*<sup>83</sup> the Commission took objection to the refusal of three television companies to grant licences of copyright in their TV schedules to a third party wishing to produce a TV listings magazine. The Commission could have tried a collective dominance approach to the case, holding that the companies had collectively abused a collective dominant position in the TV schedules market; instead it found three individual dominant positions on the part of each company, and three individual abuses.

### (iii) Confirmation of the wide view

Any suggestion that the concept of collective dominance had been laid to rest was subsequently shown to be wrong. In *Italian Flat Glass*<sup>84</sup> the Commission held that three Italian producers of flat glass had a collective dominant position and that they had abused it. As participants in a tight oligopolistic market they enjoyed a degree of independence from competitive pressures that enabled them to impede the maintenance of effective competition, notably by not having to take into account the behaviour of other market participants. The conduct held to fall within Article 102 had already been condemned earlier in the decision as a concerted practice under Article 101. However the decision opened up the possibility that in other situations the conduct of oligopolists, *though not within Article 101*, might be attacked under Article 102. On appeal the General Court overturned the Commission’s decision on collective dominance on the ground that the Commission had simply ‘recycled’ the facts relied on as constituting an infringement of Article 101, instead of properly defining the relevant product and geographic markets in order to weigh up the undertakings’ economic power, as is necessary in Article 102 cases.

Nevertheless, the General Court confirmed the principle of collective dominance at paragraph 358 of its judgment:

There is nothing, in principle, to prevent two or more independent economic entities from being, on a specific market, united by such economic links that, by virtue of that fact, together they hold a dominant position vis-à-vis the other operators on the same market. This could be the case, for example, where two or more independent undertakings jointly have, through agreements or licences, a technological lead affording them the power to behave to an appreciable extent independently of their competitors, their customers and

<sup>82</sup> Case 247/86 [1988] ECR 5987.

<sup>83</sup> *Magill TV Guide* OJ [1989] L 78/43, [1989] 4 CMLR 757, upheld on appeal Cases T-69/89 etc *RTE v Commission* [1991] ECR II-485, [1991] 4 CMLR 586 and on appeal to the Court of Justice, Case C-241/91 P [1995] ECR I-743, [1995] 4 CMLR 718.

<sup>84</sup> OJ [1989] L 33/44, [1990] 4 CMLR 535.

ultimately of their consumers (judgment of the Court in *Hoffmann-La Roche*, cited above, paragraphs 38 and 48)<sup>85</sup>.

The judgment in *Italian Flat Glass* was exciting and frustrating in equal measure. Collective dominance on the part of ‘two or more independent entities’ could exist under Article 102, although the Commission had failed to demonstrate that it existed in this particular case. Clearly, the General Court considered that infringements of Articles 101 and 102 were conceptually independent of one another: this is why the Commission was not permitted simply to ‘recycle the facts’ used to find an infringement of Article 101 in order to determine an abuse of collective dominance<sup>86</sup>. Each Article must be applied according to its own terms. Behaviour that amounts to a concerted practice is not automatically also abusive; and vice versa<sup>87</sup>. However, what is frustrating about the judgment is that it did not advance our understanding of what collective dominance or abuse of collective dominance consists of. Given that we now have the benefit of the judgments in *Compagnie Maritime Belge Transports v Commission* under Article 102 and *France v Commission*, *Gencor v Commission*, *Airtours v Commission* and *Impala v Commission* under the EUMR it is not necessary to spend time in trying to understand what was meant by paragraph 358 of *Italian Flat Glass*. It is sufficient to say that an important landmark had been reached in this judgment, but that later case law has shed much more light on the concept of collective dominance.

#### (iv) Further judgments and decisions on collective dominance under Article 102

In the years after *Italian Flat Glass* there were several more judgments and decisions in which collective dominance was referred to, but not until *France v Commission* and *Gencor v Commission* under the EUMR and *Compagnie Maritime Belge Transports v Commission* under Article 102 did a true picture begin to emerge of what was meant by the concept. In *Almelo*<sup>88</sup> the Court of Justice said that:

42 However, in order for such a collective dominant position to exist, the undertakings in the group must be linked in such a way that they adopt the same conduct on the market.

43 It is for the national court to consider whether there exist between the regional electricity distributors in the Netherlands links which are sufficiently strong for there to be a collective dominant position in a substantial part of the common market.

This formulation suggested that the Court of Justice was looking at what economists would look at: the adoption of the same conduct on the market or, in other words, tacit coordination. This was an improvement on *Italian Flat Glass*, in that it provided an economic rationale for collective dominance, but it still failed to explain what could amount to collective dominance.

<sup>85</sup> Cases T-68/89 etc *Società Italiano Vetro SpA v Commission* [1992] ECR II-1403, [1992] 5 CMLR 302; note that the reference to *Hoffmann-La Roche* in this paragraph is a reference to the meaning of market power as defined in that judgment, not to the meaning of collective dominance which, as mentioned earlier, the Court appeared to reject.

<sup>86</sup> The differences between Articles 101 and 102 are very clearly stated in the judgment of the General Court in Case T-41/96 *Bayer v Commission* [2000] ECR II-3383, [2001] 4 CMLR 126, paras 174–180 and by the Court of Justice in the appeal to it from that judgment, Cases C-2 and 3/01 P *Commission v Bayer* [2004] ECR I-23, [2004] 4 CMLR 653, para 70.

<sup>87</sup> This point is specifically confirmed at paras 43 and 44 of the Court of Justice’s judgment in Cases C-395/96 and C-396/96 P *Compagnie Maritime Belge Transports v Commission* [2000] ECR I-1365, [2000] 4 CMLR 1076: see ‘The judgment of the Court of Justice in *Compagnie Maritime Belge Transports v Commission*’, pp 577–579 below.

<sup>88</sup> Case C-393/92 *Almelo v NV Energiebedrijf Ijsselmij* [1994] ECR I-1477.

In *Spediporto*<sup>89</sup>, *DIP*<sup>90</sup> and *Sodemare*<sup>91</sup> the Court of Justice repeated the *Almelo* formulation, but did not advance its notion of collective dominance. In the *Bosman case*<sup>92</sup> Advocate General Lenz assumed that football clubs in a professional football league could be ‘united by such economic links’ as to be regarded as collectively dominant; the Court did not address the issue. In the meantime the Commission began to reach findings of collective dominance in a number of decisions, both under Article 102 and under the EUMR. The decisions under Article 102 did not greatly add to the notion of collective dominance, since they involved undertakings which unmistakably were linked in some way. For example in three decisions in the maritime transport sector the undertakings were members of liner conferences. In *French-West African Shipowners’ Committees*<sup>93</sup> the Commission concluded that members of the shipowners’ committees had abused a collective dominant position by taking action designed to prevent other shipping lines establishing themselves as competitors on routes between France and 11 west African states<sup>94</sup>. This decision was adopted after the General Court’s judgment in the *Italian Flat Glass* case, and the Commission specifically imposed a fine for the infringement of Article 102 as well as the agreements that were caught by Article 101. In its decision on *Cewal*<sup>95</sup> the Commission found collective dominance between shipping lines that were members of a liner conference. The Commission’s finding of collective dominance was upheld on appeal to the General Court<sup>96</sup> and to the Court of Justice: the latter judgment is of major importance on collective dominance under Article 102 and is considered in some detail below<sup>97</sup>.

In *TACA*<sup>98</sup> the Commission imposed fines totalling €273 million on the members of a liner conference for abuses of collective dominance. On appeal to the General Court the Commission’s finding of collective dominance was upheld<sup>99</sup>; the Court stated specifically that, although competition between undertakings in a collectively dominant position was necessarily restricted, this did not imply that competition between them should be entirely eliminated<sup>100</sup>. The Commission’s finding that members of TACA had abused their collective dominant position by inducing competitors to join their shipping conference, thereby harming the competitive structure of the market, was annulled, as were the fines<sup>101</sup>.

The Commission also reached a finding of collective dominance in *Port of Rødby*<sup>102</sup>, where it considered that two ferry undertakings that fixed common rates, coordinated timetables and marketed their services jointly were collectively dominant. In *Irish*

<sup>89</sup> Case C-96/94 *Centro Servizi Spediporto Sri v Spedizioni Marittime del Golfo Sri* [1995] ECR I-2883, [1996] 4 CMLR 613, para 33.

<sup>100</sup> *Ibid*, paras 653–655.

<sup>101</sup> *Ibid*, paras 1192–1369 and paras 1597–1634.

<sup>102</sup> OJ [1994] L 55/52, [1994] 5 CMLR 457.

*Sugar*<sup>103</sup> the Commission found ‘vertical’ collective dominance between Irish Sugar and a distributor of sugar, Sugar Distributors Ltd (SDL). Without finding legal or *de facto* control of SDL, the Commission concluded that the combination of Irish Sugar’s equity holding, the structure of policy-making of the two companies and the communication process established to facilitate it, led to direct economic ties between them which created a clear parallelism of interest which amounted to collective dominance of the markets for industrial and retail sugar in Ireland<sup>104</sup>. On appeal the General Court upheld this finding of vertical collective dominance, without shedding any particular light on what this concept consists of<sup>105</sup>.

These judgments and decisions under Article 102 after the General Court’s judgment in *Italian Flat Glass* see the concept of collective dominance being quite regularly applied, and thereby becoming more familiar to officials, courts and practitioners. However, they did relatively little to answer any of the questions raised by that judgment, other than to affirm the idea of the adoption of common conduct on the market as a significant feature of collective dominance. An interesting glimpse of the way in which the Commission’s view of collective dominance was developing was provided by its *Notice on Access Agreements in the Telecommunications Sector*<sup>106</sup>. At paragraph 79 it said that:

In addition, for two or more companies to be jointly dominant it is necessary, though not sufficient, for there to be no effective competition between the companies on the relevant market. This lack of competition may in practice be due to the fact that the companies have links such as agreements for cooperation, or interconnection agreements. *The Commission does not, however, consider that either economic theory or [EU] law implies that such links are legally necessary for a joint dominant position to exist.* It is a sufficient economic link if there is the kind of interdependence which often comes about in oligopolistic situations. *There does not seem to be any reason in law or in economic theory to require any other economic link between jointly dominant companies.* This having been said, in practice such links will often exist in the telecommunications sector where national [Telecommunications Operators] nearly inevitably have links of various kinds with one another (emphasis added).

#### (v) The judgment of the Court of Justice in *Compagnie Maritime Belge Transports v Commission*

Important light was shed on the meaning of collective dominance by the judgment of the Court of Justice in *Compagnie Maritime Belge Transports v Commission*<sup>107</sup>, an appeal from the General Court’s judgment<sup>108</sup> upholding the Commission’s decision in *Cewal*<sup>109</sup> that there had been an infringement of Article 102. The Court deals with collective dominance at paragraphs 28 to 59 of its judgment. At paragraph 36 it states that collective dominance implies that a dominant position may be held by two or more economic entities legally independent of each other provided that from an economic point of view ‘they present themselves or act together on a particular market as a collective entity’. The Court says that this is how the expression ‘collective dominant position’ should be

<sup>103</sup> OJ [1997] L 258/1, [1997] 5 CMLR 666.

<sup>104</sup> *Ibid*, paras 111–113.

<sup>105</sup> Case T-228/97 [1999] ECR II-2969, [1999] 5 CMLR 1300, paras 61–64; the Commission applied this judgment in *Coca-Cola*, decision of 22 June 2005, paras 23–25, a decision under Article 9 of Regulation 1/2003, on which see ch 7, ‘Acts’, pp 291–292.

<sup>106</sup> OJ [1998] C 265/2, [1998] 5 CMLR 521.

<sup>107</sup> Case C-396/96 P [2000] ECR I-1365, [2000] 4 CMLR 1076; for commentary on this judgment, see Stroux (2000) 37 CML Rev 1249.

<sup>108</sup> Case T-24/93 [1996] ECR II-1201, [1997] 4 CMLR 273.

<sup>109</sup> OJ [1993] L 34/20, [1995] 5 CMLR 198.

understood in the judgment. It will be noted that this definition of collective dominance focuses on the notion of a collective entity, and not on the links between the undertakings in question. The Court then states that, in order to establish collective dominance, it is necessary to examine ‘the economic links or factors which give rise to a connection between the undertakings concerned’<sup>110</sup>, citing its earlier judgments in *Almelo*<sup>111</sup> under Article 102 and *France v Commission*<sup>112</sup> under the EUMR: the Court does not appear to consider that collective dominance has a different meaning under these two provisions. It continues that ‘in particular’ it must be asked whether economic links exist which enable them to act independently of their competitors<sup>113</sup>. However it then says that the fact that undertakings have entered into agreements does not in itself mean that they are collectively dominant<sup>114</sup>; but they might be if it caused them to appear as a collective entity<sup>115</sup>. Importantly, the Court of Justice then says that:

the existence of an agreement or of other links in law is not indispensable to a finding of a collective dominant position; such a finding may be based on other connecting factors and would depend on an economic assessment and, in particular, on an assessment of the structure of the market in question<sup>116</sup>.

This passage is consistent with the Court of Justice’s judgment in *France v Commission* on collective dominance under the EUMR, where it had placed emphasis on ‘connecting factors’ rather than on economic links in determining whether there was collective dominance<sup>117</sup>, and it is explicit that the existence of an agreement or concerted practice is not a pre-requisite to a finding of collective dominance. On the actual facts of the case the Court was satisfied that the members of the liner conference in question were collectively dominant<sup>118</sup>.

This is clearly a very important judgment on collective dominance under Article 102: specifically, it would appear that the Court of Justice considers that the test of collective dominance is the same under Article 102 and the EUMR; and the Court specifically states that there is no legal requirement of an agreement or other links in law for there to be a finding of collective dominance. It is therefore possible that firms could be held to be collectively dominant where the oligopolistic nature of the market is such that they behave in a parallel manner, thereby appearing to the market as a collective entity. The judgment of the Court of Justice in *Impala v Commission*<sup>119</sup> is consistent with this interpretation: the essence of collective dominance is parallel behaviour within an oligopoly, that is to say tacit collusion or tacit coordination, depending on linguistic preference, as described earlier in this chapter<sup>120</sup>. The General Court’s judgment in *Laurent Piau v Commission*<sup>121</sup> states that legally independent economic entities may be collectively dominant where

<sup>120</sup> See “Terminology: “tacit collusion”; “conscious parallelism”; “tacit coordination”; “coordinated effects””, p 562 above.

<sup>121</sup> Case T-193/02 [2005] ECR II-209, [2005] 5 CMLR 42; note that paras 43–50 of the DG COMP’s *Discussion Paper on the application of Article [102 TFEU] to exclusionary abuses* summarises the concept of collective dominance in the same terms.

‘they present themselves or act together on a particular market as a collective entity’<sup>122</sup>. The General Court went on to say that there were three cumulative conditions for a finding of collective dominance:

- each member of the dominant oligopoly must have the ability to know how the other members are behaving in order to monitor whether or not they are adopting the common policy
- the situation of tacit coordination must be sustainable over time, meaning that there must be an incentive not to depart from the common policy on the market
- the foreseeable reaction of current and future competitors, as well as of consumers, must not jeopardise the results expected from the common policy<sup>123</sup>.

In *Laurent Piau* the General Court concluded that FIFA, national football associations and the football clubs forming them were collectively dominant on the market for the provision of players’ agents’ services, but that there was no abusive behaviour on their part<sup>124</sup>.

One final point is that the Court of Justice has said that, where a market is highly heterogeneous and characterised by a high degree of internal competition, such as the market for legal services in the Netherlands, collective dominance would not be found in the absence of structural links<sup>125</sup>.

### (C) Abuse of collective dominance under Article 102

Having established that Article 102 is applicable to collective as well as single firm dominance, it is necessary to consider what kind of conduct would constitute an abuse of a collective dominant position under that provision: it is important to recall that it is not unlawful, in itself, under Article 102 to have a dominant position (whether individual or collective); for there to be an infringement of Article 102 there must be conduct which amounts to an abuse<sup>126</sup>. What qualifies as an abuse of collective dominance is underdeveloped in the case law<sup>127</sup>. The economic theory around which the doctrine of collective dominance has developed under the EUMR is that in certain market conditions firms may be able to derive benefits from tacit coordination; and the very reason why the Commission might prohibit under the EUMR a concentration that would create or strengthen a collective dominant position is that it would make it easier for firms to benefit from this phenomenon<sup>128</sup>. Does it follow from this that tacit coordination, when actually practised, should be condemned as an abuse of a collective dominant position under Article 102? Is price parallelism in itself an abuse? To put the point another way, does symmetry require that, since predicted tacit coordination can be prevented through the prohibition of a concentration under the EUMR, actual coordination should be

<sup>122</sup> Case T-193/02 [2005] ECR II-209, [2005] 5 CMLR 42, para 110.

<sup>123</sup> *Ibid*, para 111.

<sup>124</sup> *Ibid*, paras 117–121.

<sup>125</sup> Case C-309/99 *Wouters v Algemene Raad van de Nederlandsche Orde van Advocaten* [2002] ECR I-1577, [2002] 4 CMLR 913, para 114.

<sup>126</sup> See ch 5, ‘The “special responsibility” of dominant firms’, pp 192–193; the point is made specifically in relation to collective dominance by the Court of Justice in its judgment in *CMBT v Commission* at paras 37–38.

<sup>127</sup> Paragraphs 74–76 of the DG COMP’s *Discussion Paper on the application of Article [102 TFEU] to exclusionary abuses* had virtually nothing to say about the idea of the abuse of a collective dominant position, and paragraph 4 of the Commission’s subsequent *Guidance on the Commission’s Enforcement Priorities in Applying Article [102 TFEU] to Abusive Exclusionary Conduct by Dominant Undertakings* OJ [2009] C45/7 is explicitly limited to single dominant firms; both documents are available at [www.europa.eu](http://www.europa.eu).

<sup>128</sup> See ch 21, ‘Coordinated effects’, pp 871–873.

condemned under Article 102? If the answer to this question is no, what types of behaviour ought to be condemned under Article 102?

**(i) Exploitative abuse of a collective dominant position**

Commentators on Article 102 habitually make a distinction between those abuses that are ‘exploitative’ and those that are ‘exclusionary’, whilst recognising that this is not a watertight distinction<sup>129</sup>. It could be argued that tacit coordination by collectively dominant undertakings is exploitative, since prices are charged which are higher than they would be in a competitive market, albeit without the need to enter into an explicit agreement. However the Commission has not attempted to condemn tacit coordination itself under Article 102, and it is submitted that, as a matter of law, it should not be able to do so. As explained earlier in this chapter<sup>130</sup>, parallel behaviour *per se* is not caught by Article 101(1) if it does not arise from an agreement or a concerted practice in the sense of that provision. Tacit coordination comes about in certain market conditions, not because of an agreement or concerted practice between the collectively dominant firms in the legal sense of those terms, but because they react rationally according to the conditions of the market on which they operate. To condemn their parallel behaviour as abusive in itself would be a nonsense: if Article 102 were to mandate that firms must behave *irrationally* in order to comply with the law, it would be a very odd provision. This explains the position taken by the Court of Justice as long ago as *Hoffmann-La Roche*: parallel behaviour should be condemned where it is attributable to an agreement or concerted practice contrary to Article 101(1); it is not, in itself, abusive under Article 102<sup>131</sup>. It might seem that this shows an inconsistency between the law under Article 102 and the EUMR: how can it be that the prospect of tacit coordination can be avoided under the Merger Regulation and yet the actuality of the same behaviour cannot be condemned under Article 102? The truth is that the difference makes perfect sense: it is precisely because of the difficulty that competition law has in addressing the problem of tacit coordination when it does occur that systems of merger control seek to prevent a market structure that will be conducive to this phenomenon from arising in the first place.

A distinct issue is whether collectively dominant firms could be held to have abused their position by charging *excessively high* prices: here the abuse would lie not in the *parallelism* of the prices, but in their level. Article 102(2)(a) explicitly condemns unfairly high prices, and it is not obvious that collectively dominant firms should enjoy an immunity from this offence which an individually dominant firm would not enjoy. In principle, therefore, it would seem that action could be taken against excessive and unfair pricing in an oligopoly. Such actions are likely to be rare, however, since the Commission does not want to establish itself as a price regulator: there have been very few investigations of high prices under Article 102, and those that have been conducted were often motivated by different considerations, for example that the excessive prices amounted to an obstacle to parallel imports<sup>132</sup>. The Commission contemplated a finding of an exploitative abuse of a collective dominant position of a different nature in its *P&I* decision<sup>133</sup>. The P & I clubs were members of the International Group, and were found to be collectively dominant. They had limited the level of insurance cover available to customers: this was considered

<sup>129</sup> See ch 5, ‘Exploitative, exclusionary and single market abuses’, pp 201–202; the Commission itself made this distinction in its decision on *P&I Clubs* OJ [1999] L 125/12, [1999] 5 CMLR 646, paras 127–136.

<sup>130</sup> See ‘Does parallel behaviour amount to a concerted practice under Article 101?’, pp 567–569 above.

<sup>131</sup> See ‘The definition of collective dominance under Article 102’, pp 573–579 above.

<sup>132</sup> See ch 18, ‘Exploitative Pricing Practices’ pp 718–728 and ‘Pricing Practices That are Harmful to the Single Market’, pp 764–766.

<sup>133</sup> OJ [1999] L 125/12, [1999] 5 CMLR 646.

by the Commission to be contrary to Article 102(2)(b), since it ‘left a very substantial share of the demand unsatisfied’; however an alteration in the rules of the Group meant that the Commission did not reach a formal finding to this effect<sup>134</sup>.

### (ii) Anti-competitive abuse of a collective dominant position

Article 102 has been applied by the Commission to anti-competitive abuses of collective dominance on several occasions. Exclusionary abuses are considered in some detail in chapters 17 and 18. It seems reasonable in principle that Article 102 should be applicable to the exclusionary behaviour not only of individually but also of collectively dominant undertakings. Given that tacit coordination is likely to arise where a few firms, without explicit collusion, are able to set prices above the competitive level, the ‘subversive’ effect of new entrants into markets conducive to this phenomenon is likely to be welcomed by competition authorities: their entry may make tacit coordination less easy to achieve. In *Cewal*<sup>135</sup> the Commission held that Article 102 had been infringed where collectively-dominant members of a liner conference were found to have engaged in various practices with the intention of eliminating competitors from the market, such as selective price cutting and the grant of loyalty rebates. The findings of abuse were upheld on appeal to the General Court<sup>136</sup> and the Court of Justice<sup>137</sup>, although the fines were annulled by the Court of Justice since the Commission had not referred to the possibility that they might be imposed in the statements of objections sent to the individual members of the conference<sup>138</sup>. The Commission’s findings of abuse in *TACA*<sup>139</sup> – refusal by members of a liner conference to offer individual service contracts to customers and the abusive alteration of the competitive structure of the market by acting to eliminate potential competition – were annulled on appeal to the General Court for lack of evidence<sup>140</sup>.

It can be anticipated that the Commission will investigate closely allegations of abusive behaviour by collectively dominant firms where the complainants are actual or potential competitors which might be able to subvert tacit coordination on the market.

### (iii) Individual abuse of a collective dominant position

The final question under Article 102 is whether a collective dominant position can be abused only by all of the undertakings which hold that position, or whether it is possible for one or some of them to commit an abuse. To put the matter another way, must there be ‘collective’ abuse of collective dominance; or can there also be ‘individual’ abuse? This has been clearly answered by the General Court in the *Irish Sugar* appeal<sup>141</sup>: ‘undertakings occupying a joint dominant position may engage in joint or individual abusive conduct’, although that was a case on vertical, as opposed to horizontal, collective dominance, and it would have been helpful if the judgment had explained in more detail how the Court arrived at its conclusion: it does not fit well with the idea that collectively

<sup>140</sup> Cases T-191/98 etc *Atlantic Container Line v Commission* [2003] ECR II-3275, [2005] 4 CMLR 1283.

<sup>141</sup> Case T-228/97 [1999] ECR II-2969, [1999] 5 CMLR 1300, para 66.

dominant undertakings should present themselves to the market as a single entity, which implies that they are bound to behave collectively rather than individually. However, if one of several collectively dominant undertakings resorts to anti-competitive behaviour in order to foreclose competitors, it could be argued that this is done to protect the oligopoly generally, and not just that one firm; perhaps this could explain why, at least in some cases, it may be possible for there to be an individual abuse of a collective dominant position.

## 5. UK Law

### (A) Competition Act 1998

The Chapter I and Chapter II prohibitions in the Competition Act 1998 are based on Articles 101 and 102 TFEU, and section 60 of that Act requires that consistency should be maintained with the jurisprudence of the EU Courts and that account should be taken of the decisional practice of the Commission<sup>142</sup>. It follows that the discussion in the earlier part of this chapter of the application of Articles 101 and 102 to tacit coordination and oligopolistic markets is directly relevant under the Competition Act. However two additional points should be made about the domestic law of the UK in relation to this issue. First, the market investigation provisions of the Enterprise Act 2002 provide an alternative mechanism whereby oligopolistic markets may be investigated<sup>143</sup>. Secondly, the domestic system of merger control requires the Competition Commission ('the CC') to determine whether a merger may be expected to result in a substantial lessening of competition. The following two sections will briefly examine the extent to which these provisions could be deployed to deal with the problem of tacit coordination.

### (B) Market investigations under the Enterprise Act 2002

The market investigation provisions of the Enterprise Act 2002 have been described in chapter 11. The Office of Fair Trading ('the OFT') has said that it would not make a reference to the CC if it was more appropriate to proceed under the Competition Act; other factors, such as the scale of any competition problem and the likelihood of appropriate remedies being available, would also influence the exercise of its discretion<sup>144</sup>. However the OFT specifically notes that there could be problems associated with oligopolistic markets that are not capable of being addressed under the Competition Act, not least because of the uncertainty as to what constitutes an abuse of a collective dominant position under Article 102 TFEU and therefore, by extension, under the Chapter II prohibition<sup>145</sup>. The possibility exists, therefore, of market investigation references, in particular where problems arise that are industry-wide or that involve multi-firm conduct<sup>146</sup>.

The OFT's guidance goes on to refer to the possibility that firms in an oligopoly may be able to coordinate their behaviour for mutual advantage or, at least, lack an incentive to compete, and sets out various factors of a market, such as high barriers to entry, the homogeneity of products and the symmetry of firms' market shares that might be con-

<sup>142</sup> On s 60 of the Act see ch 9, "Governing Principles Clause": Section 60 of the Competition Act 1998', pp 369–374.

<sup>143</sup> An OFT market study, which may or may not lead to a market investigation reference, may also fulfil this function: see ch 11, 'OFT Market Studies', pp 455–466.

<sup>144</sup> *Market investigation references*, OFT 511, March 2006, para 2.1, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>145</sup> OFT 511, para 2.5. <sup>146</sup> *Ibid*, para 2.7.

ductive to parallel behaviour<sup>147</sup>. It says that many of the markets that the OFT is likely to be interested in will be oligopolistic<sup>148</sup>; in such markets, price competition may be limited, and firms instead may compete through advertising, loyalty-inducing schemes and similar practices: though these practices may be pro-competitive, they could also be harmful to competition where they raise barriers to entry to new competitors<sup>149</sup>. The OFT also notes that tacit coordination can have a severe effect on competition<sup>150</sup>. In such a case the OFT would look at the pattern of price changes over time, price inertia and the oligopolists' rates of return compared to returns in comparable markets or to the cost of capital<sup>151</sup>. Switching costs and informational inadequacies may be relevant to the state of competition in a market<sup>152</sup>, and the OFT will consider whether there are any facilitating practices that make it easier for firms to act in a coordinated manner<sup>153</sup>. The CC's Guidelines also note the same characteristics of oligopolistic markets<sup>154</sup>.

The market investigation provisions are an important part of the overall structure of UK competition law. Many competition law problems will be addressed under the Competition Act 1998. However, as the discussion in the early part of this chapter has shown, the 'problem' of oligopoly is a complex one, and the tools provided by Articles 101 and 102 and their domestic analogues are not always suitable for this purpose. The possibility of a market investigation by the CC, as a 'safety net' for those situations in which there is a failure of the competitive market mechanism that cannot be dealt with under the Competition Act, is in principle desirable; this is not to deny, however, that there are some people in business and legal circles who view these powers with a certain scepticism, since a market investigation can be time-consuming, expensive and intrusive.

The operation of the market investigation provisions in practice was discussed in chapter 11, in several of which the CC was concerned with switching costs and imperfect information for consumers in concentrated markets<sup>155</sup>.

A separate point is that there may be some circumstances in which the OFT might find that the lack of competition in an oligopolistic market may be attributable to a 'public' restriction of competition – for example legislation or regulatory rules – in which case it could play an advocacy role in trying to remove the problem<sup>156</sup>.

### (C) Merger investigations under the Enterprise Act 2002

The Enterprise Act 2002 subjects 'relevant merger situations' to a 'substantial lessening of competition' test<sup>157</sup>. Prior to the entry into force of the Enterprise Act mergers were subject to a public interest test which, for many years, had been applied according to the

<sup>147</sup> Ibid, paras 5.5–5.7; the OFT has investigated whether market conditions were conducive to parallel behaviour on several occasions: see eg *CAMRA super-complaint*, OFT 1279, October 2010, paras 5.42–5.67.

<sup>148</sup> Ibid, para 6.4.      <sup>149</sup> Ibid, para 6.5.      <sup>150</sup> Ibid, para 6.6.      <sup>151</sup> Ibid, para 6.7.

<sup>152</sup> Ibid, para 6.8; on switching costs see OFT Economic Discussion Paper 5 (OFT 655) *Switching Costs* (National Economic Research Associates, April 2003), available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>153</sup> OFT 511, paras 6.9–6.11.

<sup>154</sup> *Market Investigation References: Competition Commission Guidelines* (CC 3, June 2003), paras 3.58–3.71, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk); note that the Commission published various reports on oligopolistic markets under the now-repealed provisions of the Fair Trading Act 1973, including *Parallel Pricing* Cmnd 5330 (1973); *Credit Card Services* Cm 718 (1989); *White Salt* Cmnd 9778 (1986); *The Supply of Petrol* Cm 972 (1990); *Supermarkets* Cm 4842 (2000); *The Supply of banking services by clearing banks to small and medium-sized enterprises* Cm 5319 (2002); and (under the Enterprise Act 2002) *Groceries*, Final Report of 30 April 2008, section 8.

<sup>155</sup> See ch 11, 'Findings of adverse effects on competition', p 485.

<sup>156</sup> See ch 11, 'OFT Market Studies', pp 455–466.

<sup>157</sup> See ch 22 generally, and on the SLC test specifically 'The "substantial lessening of competition" test', pp 932–940 thereof.

‘substantial lessening of competition’ standard anyway. UK merger law, therefore, has not had to suffer the growing pains of the concept of collective dominance, examined at length earlier in this chapter in the context of EU law. The competition authorities in the UK have for many years been concerned with the possibility of tacit coordination in merger cases<sup>158</sup>.

Under the Enterprise Act the OFT and the CC have given clear guidance as to the way in which they will approach this issue in merger investigations: the economic considerations are, of course, the same as for market investigation references, although a prospective analysis must be carried out in the case of mergers. The OFT/CC *Merger Assessment Guidelines* discuss the ways in which a merger may adversely affect competition in an oligopoly: either through ‘unilateral effects’<sup>159</sup>, through ‘coordinated effects’<sup>160</sup> or through a combination thereof<sup>161</sup>. The *Guidelines* explains that a merger giving rise to unilateral effects may lead to a market being less competitive than it was, either through a loss of existing competition or the elimination of potential competition, irrespective of the way other competitors behave; the authorities will examine high market concentration and weak competitive constraints in a market where products are undifferentiated and the closeness of substitution between the parties’ products in mergers with differentiated products<sup>162</sup>. On the problem of coordinated effects the OFT and the CC adopt essentially the same approach as that taken by the Court of Justice in *Sony/BMG*<sup>163</sup>.

The ‘SLC’ test is well suited to the ‘problem’ of oligopoly, since it asks a straightforward question: will there be substantially less competition in the market after a merger than there was before: a merger that makes a market more conducive to tacit coordination will clearly be less competitive. There have not been a large number of cases on coordinated effects under the Enterprise Act: those that have arisen are discussed in chapter 22<sup>164</sup>.

## Horizontal agreements (3) – cooperation agreements

1. Introduction	585	7. Purchasing Agreements	603
2. Full-Function Joint Ventures	585	8. Commercialisation Agreements	605
3. The Application of Article 101 to Horizontal Cooperation Agreements and the Commission's <i>Guidelines on Horizontal Cooperation Agreements</i>	586	9. Standardisation Agreements	607
4. Information Agreements	592	10. Other Cases of Permissible Horizontal Cooperation	611
5. Research and Development Agreements	592	11. The Application of the Chapter I Prohibition in the UK Competition Act 1998 to Horizontal Cooperation Agreements	615
6. Production Agreements	599		

### 1. Introduction

The previous two chapters have considered the law on hard-core cartels and the phenomenon of tacit collusion in oligopolistic markets. However it is important to appreciate that there may be circumstances in which horizontal competitors enter into cooperation agreements with one another that produce economic benefits for consumers: the Commission acknowledges this in paragraph 2 of its *Guidelines on the Applicability of Article 101 of the Treaty on the Functioning of the European Union to Horizontal Cooperation Agreements*<sup>1</sup> ('the *Guidelines on Horizontal Cooperation Agreements*' or 'the *Guidelines*'), noting that horizontal cooperation 'can be a means to share risk, save costs, increase investments, pool know-how, enhance product quality and variety, and launch innovation faster'. It follows that competition law cannot simply prohibit all horizontal agreements: efficiency gains may follow from cooperation that are sufficient to outweigh any restriction of competition that it might entail. This chapter is concerned with horizontal cooperation agreements which the competition authorities in the EU and the UK may be prepared to countenance.

### 2. Full-Function Joint Ventures

Where firms decide to cooperate, the medium for their collaboration can vary widely from one case to another. For example firms that cooperate in research and development

<sup>1</sup> OJ [2011] C 11/1.

(‘R&D’) may simply meet on a periodic basis to discuss matters of common interest; they may share out research work and pool the results; they may establish a committee to oversee the R&D programme; or they may go further and establish a joint venture company to conduct their R&D, while maintaining their independence as producers and suppliers to the market. The same range of possibilities exists in relation to other types of cooperation, for example on production and commercialisation. As a matter of competition law the medium chosen for the horizontal cooperation will not normally affect the legal analysis of an agreement, with one very important exception: where the parties to an agreement establish a joint venture to carry out their objectives, this may amount to a concentration (to use the language of the EU Merger Regulation (‘the EUMR’)) or a merger (the term used in the UK Enterprise Act 2002); if so, the joint venture will be considered not under Article 101 or the Chapter I prohibition of the Competition Act 1998, but under the EUMR or the relevant domestic merger control provisions of the Member States<sup>2</sup>. It follows that it is necessary in any particular case to begin by considering whether parties intend to create a full-function joint venture amounting to a concentration or a merger: the meaning of a concentration under the EUMR is dealt with in chapter 21<sup>3</sup>; and chapter 22 considers what is meant by a merger in UK law<sup>4</sup>. It may even be the case that contractual integration, without the establishment of a joint venture company, will amount to a full-function joint venture under the EUMR<sup>5</sup>. Only where it is clear that there is no concentration or merger will it be relevant to consider the possible application of Article 101 and the Chapter I prohibition to horizontal cooperation agreements. Paragraph 21 of the *Guidelines on Horizontal Cooperation Agreements* notes that cooperation that falls to be analysed under Article 101 may have similar effects to those of a horizontal merger, suggesting, without actually saying so, that a similar approach ought to be taken to both phenomena.

### 3. The Application of Article 101 to Horizontal Cooperation Agreements and the Commission’s *Guidelines on Horizontal Cooperation Agreements*<sup>6</sup>

#### (A) Introduction

The general principles involved in the application of Article 101(1) and Article 101(3) have been described in chapters 3 and 4 of this book; this chapter assumes a knowledge of those principles and focuses specifically on the jurisprudence of the EU Courts and the decisional practice and the *Guidelines* of the Commission in relation to horizontal cooperation agreements under Article 101<sup>7</sup>.

<sup>2</sup> The European Commission explicitly makes this point at para 6 of its *Guidelines on Horizontal Cooperation Agreements*.

<sup>3</sup> See ch 21, ‘Article 3: meaning of a concentration’, pp 834–839.

<sup>4</sup> See ch 22, ‘Enterprises ceasing to be distinct’, pp 919–921.

<sup>5</sup> See ch 21, ‘Joint ventures - the concept of full functionality’, pp 837–838.

<sup>6</sup> For a helpful analysis of the Commission’s approach to the application of Article 101 to horizontal cooperation agreements see González Díaz in Faull and Nikpay *The EC Law of Competition* (Oxford University Press, 2nd ed, 2007), ch 7.

<sup>7</sup> For discussion of the position in the US see the Department of Justice and Federal Trade Commission *Antitrust Guidelines for Collaborations Among Competitors*, April 2000, available at [www.justice.gov/atr/public/guidelines/jointindex.html](http://www.justice.gov/atr/public/guidelines/jointindex.html); see also Brodley ‘Joint Ventures and Antitrust Policy’ (1982) 95 *Harvard Law Review* 1523; McFalls ‘The Role and Assessment of Classical Market Power in Joint Venture Analysis’ (1997–98)

## (B) The EU Courts and horizontal cooperation agreements

There is very little caselaw of the EU Courts specifically on the application of Article 101 to horizontal cooperation agreements. A few cases have reached the Court of Justice from national courts under the procedure in Article 267 TFEU<sup>8</sup>, such as *Gottrup-Klim Grovwareforeninger v Dansk Landburgs Grovvareselskab AmbA*<sup>9</sup>. As for Commission decisions, since the entry into force of Regulation 1/2003 in May 2004 the Commission could formally decide that the criteria of Article 101(3) were satisfied in relation to a particular agreement only by adopting a declaration of inapplicability under Article 10 of that Regulation, something which, to date, it has declined to do<sup>10</sup>; nor has it provided informal guidance on any such agreement<sup>11</sup>. Prior to Regulation 1/2003 the Commission could grant an ‘individual exemption’ stating that the criteria of Article 101(3) were satisfied in the case of a horizontal cooperation agreement<sup>12</sup>; where it did so there was usually little incentive for the parties to appeal against the finding that the agreement infringed Article 101(1) in the first place. A notable exception to this was the judgment of the General Court in *European Night Services v Commission*<sup>13</sup> where an appeal was successfully launched against the Commission’s decision, in which it had attached conditions and obligations to an individual exemption which the parties considered to be unduly onerous. The Court concluded that the Commission had failed to demonstrate that the agreement would appreciably restrict competition, as a result of which the decision was annulled. Another exception to the proposition that undertakings authorised by the Commission to go ahead with a horizontal cooperation agreement under Article 101(3) would be unlikely to appeal was *O2 (Germany) GmbH & Co OHG v Commission*<sup>14</sup>, where O2 was successful in persuading the General Court that national roaming agreements in the mobile telephony sector did not restrict competition in the sense of Article 101(1), and therefore did not need authorisation under Article 101(3)<sup>15</sup>.

There have been some other cases in which a third party has challenged the Commission’s decision that Article 101(3) was satisfied, but these have usually been unsuccessful<sup>16</sup>. Significant exceptions to this include *Métropole télévision SA v Commission*<sup>17</sup> and *M6 v Commission*<sup>18</sup>, where the General Court upheld two consecutive appeals by a third

<sup>13</sup> Cases T-374/94 etc [1998] ECR II-3141, [1998] 5 CMLR 718: see ch 3, ‘Actual and potential competition’, pp 127–128; see similarly Cases T-79/85 and 80/95 *SNCF v Commission* [1996] ECR II-1491, [1997] 4 CMLR 334; the recipients of an individual exemption in *TPS OJ* [1999] L 90/6, [1999] 5 CMLR 168 appealed unsuccessfully to the General Court in Case T-112/99 *Métropole v Commission* [2001] ECR II-2459, [2001] 5 CMLR 1236; on the *TPS* decision see Nikolinakos ‘Strategic Alliances in the Pay TV Market: The *TPS* case’ (2000) 21 *ECLR* 334.

<sup>14</sup> Case T-328/03 [2006] ECR II-1231, [2006] 5 CMLR 258.

<sup>15</sup> The case is discussed in ch 3, ‘The need to establish a “counter-factual”’, p 127.

<sup>16</sup> See eg Case 43/85 *ANCIDES v Commission* [1987] ECR 3131, [1988] 4 CMLR 821; Case T-17/93 *Matra Hachette SA v Commission* [1994] ECR II-595.

<sup>17</sup> Cases T-528/93 etc [1996] ECR II-649, [1996] 5 CMLR 386.

<sup>18</sup> Cases T-185/00 etc [2002] ECR II-3805, [2003] 4 CMLR 707.

party that the Commission had erred in law in concluding that the rules of the European Broadcasting Union satisfied Article 101(3)<sup>19</sup>.

### (C) The Commission's Guidelines on Horizontal Cooperation Agreements

The Commission published its latest *Guidelines on Horizontal Cooperation Agreements* early in 2011<sup>20</sup>; they replaced earlier guidelines of 2001<sup>21</sup>. The 2011 *Guidelines* are less formalistic and adopt a more dynamic view of markets than their predecessor of 2001; in particular the 2011 *Guidelines* make no use of the Herfindahl-Hirschmann Index, which the 2001 version did, and de-emphasise market shares as a way of identifying agreements that might produce anti-competitive effects. The *Guidelines* consist of seven chapters. In the first, the Commission explains the purpose and scope of the *Guidelines* and sets out basic principles for the assessment of horizontal cooperation agreements under Article 101. Chapters then follow on agreements relating to each of the following matters: information exchange; R&D; production; purchasing; commercialisation; and standardisation<sup>22</sup>. This chapter will follow the pattern of the *Guidelines*, with the exception that the exchange of information, which in some circumstances may be tantamount to a cartel, has already been discussed in chapter 13<sup>23</sup>; the chapter will conclude with a discussion of various other types of agreement that are not discussed in the *Guidelines* but which may be permissible and with a brief review of the position under UK law.

Paragraph 19 of the *Guidelines* says that they should be read in conjunction with the Commission's *Guidelines on the application of Article [101(3)] of the Treaty*<sup>24</sup> which provide important insights into its approach generally to the application of both Article 101(1) and Article 101(3) and, in particular, to the evidence needed to mount a successful argument based on the latter provision<sup>25</sup>.

#### (i) Purpose and scope of the Guidelines on Horizontal Cooperation Agreements

Paragraph 1 of the *Guidelines* explains that they are concerned with cooperation agreements between actual or potential competitors. Undertakings are actual competitors if they are active on the same market<sup>26</sup>; potential competitors are those that, in response to a small but significant non-transitory increase in price ('SSNIP')<sup>27</sup>, would undertake the necessary investments to enter the market 'within a short period of time'<sup>28</sup>. What constitutes a short period of time depends on the particular facts of any case<sup>29</sup>; paragraph 10 of the *Guidelines* concludes by saying that the assessment of potential competition must

<sup>19</sup> See ch 4, 'Judicial review by the General Court', pp 165–166.

<sup>20</sup> For a helpful discussion of the Commission's intentions when adopting the new *Guidelines* see the speech of the Director General of DG COMP, Alexander Italianer, 'Doing Business in Europe: the Review of the Rules on Co-operation Agreements Between Competitors', 1 March 2011, available at [www.ec.europa.eu](http://www.ec.europa.eu); see also a series of articles in the February 2011 edition of *Competition Policy International*, available at [www.competitionpolicyinternational.com](http://www.competitionpolicyinternational.com).

<sup>21</sup> OJ [2001] C 3/2.

<sup>22</sup> Note that, whereas the 2001 *Guidelines* contained a separate chapter on environmental agreements, this is not true of the 2011 *Guidelines*; however agreements setting out standards on environmental performance are covered by ch 7: see 'Standardisation Agreements', pp 607–611 below.

<sup>23</sup> See ch 13, 'Exchanges of Information', pp 539–547.

<sup>24</sup> OJ [2004] C 101/8.

<sup>25</sup> The *Article [101(3)] Guidelines* are discussed in ch 4, 'The Article 101(3) Criteria', pp 155 ff.

<sup>26</sup> *Guidelines on Horizontal Cooperation Agreements*, para 10.

<sup>27</sup> See ch 1, 'Demand-side substitutability', pp 31–32.

<sup>28</sup> *Guidelines on Horizontal Cooperation Agreements*, para 10.

<sup>29</sup> The Commission says in fn 3 to para 10 that a longer period might be considered to be 'short' in the case of a party to the agreement than when asking whether a third party might be a competitive constraint on the parties to the agreement.

be based on realistic grounds, and that a theoretical possibility is not sufficient<sup>30</sup>. In this formulation of potential competition the Commission refers to a policy statement that it made at point 55 of its XIIIth *Report on Competition Policy* in 1983<sup>31</sup>, and to its decision in *Elopak/Metal Box-Odin*<sup>32</sup>, where it concluded that a joint venture between those two undertakings to design a new kind of carton did not infringe Article 101(1) since they were not actual or potential competitors<sup>33</sup>. Paragraph 1 of the *Guidelines* says that they also apply to agreements between undertakings that are active in the same product market but in different geographic markets but without being potential competitors. The *Guidelines* are a complement to the block exemptions for R&D agreements<sup>34</sup> and for specialisation agreements<sup>35</sup>. They do not purport to provide guidance on cartels (although they do contain some discussion of the meaning of a ‘concerted practice’ in the context of information exchange)<sup>36</sup>. The *Guidelines* do not apply to ‘pure’ vertical agreements, which are the subject of the *Guidelines on Vertical Restraints* and which may benefit from Regulation 330/2010 on vertical agreements<sup>37</sup>; however the *Guidelines on Horizontal Cooperation Agreements* do apply to vertical agreements entered into between competitors<sup>38</sup>.

As mentioned above, the *Guidelines* apply to six types of agreements: information exchange, R&D, production, purchasing, commercialisation and standardisation. In any particular case it is therefore necessary to characterise the agreement in order to be able to determine whether it falls into any of these six categories and, if so, which one. Not surprisingly, agreements in commercial practice do not divide themselves neatly in this way: for example undertakings that agree to conduct R&D together will often decide to produce and commercialise the product if the R&D is successful, while the parties to a joint production agreement might agree to some joint R&D as a by-product of their cooperation. Paragraphs 13 and 14 of the *Guidelines* attempt to provide a basis for allocating agreements to the appropriate category by introducing the notion of an agreement’s ‘centre of gravity’.

The Commission states that account should be taken of two factors: the first is the starting point of the cooperation and the second is the degree of integration of the different functions that are being combined. Two examples are given. In the first, the parties enter into an R&D agreement and envisage the possibility of proceeding, if successful, to joint production: here, the cooperation originates as an R&D agreement and is characterised as such. In the second, the parties agree to integrate their production facilities, but

<sup>30</sup> One of the criticisms of the Commission by the General Court in *European Night Services v Commission* (ch 15 n 13, p 587 above) was that it had failed convincingly to demonstrate that the agreement was entered into between potential competitors: see ch 3, ‘Actual and potential competition’, pp 127–128.

<sup>38</sup> *Guidelines on Horizontal Cooperation Agreements*, para 12.

only partially to integrate their R&D: here, the agreement is essentially concerned with production and should be analysed as such.

Paragraph 18 of the *Guidelines* says that they do not apply to the extent that sector-specific rules apply, as in the case of certain agreements in the agriculture<sup>39</sup>, transport<sup>40</sup> and insurance sectors<sup>41</sup>.

## (ii) Basic principles for the assessment of horizontal cooperation agreements under Article 101

Chapter 1.2 of the *Guidelines* begins, at paragraph 20, by explaining that agreements are analysed under Article 101 in two stages: the first is to determine whether the agreement has as its object or effect a restriction of competition in the sense of Article 101(1); if so any pro-competitive effects are then analysed in the context of Article 101(3)<sup>42</sup>. Paragraph 20 also points out that, in the event that the pro-competitive effects do not outweigh any restriction of competition, Article 101(2) stipulates that the agreement is automatically void.

### (A) Article 101(1)

Paragraphs 23 to 31 discuss agreements that restrict competition by object and those that may restrict by effect: these ideas were explored in detail in chapter 3 of this book<sup>43</sup>. In relation to anti-competitive effects, paragraph 28 says that they are likely to occur where it can be expected that, due to the agreement, the parties would be able to profitably raise prices or reduce output, product quality, product variety or innovation; and that this depends on various factors such as the nature and content of the agreement, the parties' individual or joint market power and the extent to which the agreement contributes to the creation, maintenance, strengthening or exploitation of that market power. Without using the term, paragraph 29 says that, when determining whether an agreement has or could have anti-competitive effects, it is necessary to consider the 'counter-factual', that is to say the competitive position in the absence of the agreement<sup>44</sup>.

The *Guidelines* then discuss, in turn, the *nature and content of the agreement* and *market power and other market characteristics*. These paragraphs are not among the finest to be found in the various guidance documents of the Commission: however, in essence, what they purport to do is to set out various theories of harm – the expression actually used in paragraph 32 is 'types of possible competition concerns' – in the section on the nature and content of the agreement, and to explain aspects of market power in the following section.

Paragraph 32 says that the *nature and content of the agreement* relate to factors such as the area and objective of the cooperation, the competitive relationship between the parties and the extent to which they combine their activities. These determine the types of competition concerns that can arise from horizontal cooperation agreements. Paragraph 33 notes that such agreements may result in exclusivity, because the parties cease to compete with one another or with third parties; or in reduced independence of decision-making, because the parties contribute assets to the cooperation or alter their

<sup>39</sup> See ch 23, 'Agriculture', pp 963–967.

<sup>40</sup> See ch 23, 'Transport', pp 967–977.

<sup>41</sup> See 'Insurance sector', pp 613–614 below.

<sup>42</sup> See ch 4, 'The Article 101[3] Criteria', pp 115ff, for discussion of the nature and scope of the provisions of Article 101(3).

<sup>43</sup> See ch 3, 'The object or effect of preventing, restricting or distorting competition', pp 117ff.

<sup>44</sup> For discussion of the counter-factual see ch 3, 'The need to establish a "counter-factual"', p 127.

financial interests as a result of it. The following paragraphs set out competition concerns that may follow as a result:

- **higher prices:** paragraph 34 discusses the possibility that the loss of competition between the parties may lead to them – and potentially to their competitors – raising prices: in the parlance of the *Horizontal Merger Guidelines*, the concern is about non-coordinated effects<sup>45</sup>
- **coordination:** paragraphs 35 to 37 discuss the possibility that horizontal cooperation agreements may facilitate coordination between the parties, within or outside the field of cooperation, for example as a result of the disclosure of strategic information to each other or the achievement of a significant commonality of costs (for example where they jointly produce an input that represents a high proportion of the value of a product that they sell in competition with one another)
- **foreclosure:** agreements such as production and standardisation agreements might give rise to concerns about anti-competitive foreclosure of third parties from the market.

Paragraphs 39 to 47 discuss market power, a topic that has been considered in some detail in chapter 1 of this book<sup>46</sup>. Paragraph 43 refers to the need to define the relevant market(s) according to the Commission's *Notice on Market Definition*<sup>46a</sup>: it adds that the *Guidelines* provide additional guidance, where needed, on matters such as purchasing markets and technology markets. Paragraph 44 makes the obvious point that, where the parties have a low combined market share, their agreement is unlikely to give rise to restrictive effects on competition. It adds that what amounts to a 'low' market share is sometimes discussed in specific chapters of the *Guidelines* which sometimes provide 'safe harbour' thresholds<sup>47</sup>; and that the Commission's *De Minimis* Notice also provides guidance on this<sup>48</sup>. Paragraph 44 adds an important point, that if one of just two parties has only an insignificant market share and if it does not possess important resources, even a high combined market share normally cannot be seen as indicating a likely restrictive effect on competition.

### (B) Article 101(3)

Paragraph 48 of the *Guidelines* refers to Article 2 of Regulation 1/2003, which states that the burden of proving that an agreement will result in economic efficiencies in accordance with Article 101(3) rests on the undertaking(s) seeking to defend the agreement<sup>49</sup>. Paragraph 50 explains that, just as the block exemptions for R&D and specialisation agreements are premised upon the idea that the combination of complementary skills can be a source of substantial efficiencies, so too the analysis of agreements on an individual basis under Article 101(3) will to a large extent focus on identifying complementary skills and assets. Paragraph 52 says that agreements that do not involve the combination of complementary skills are less likely to lead to efficiency gains that benefit consumers. Paragraph 53 of the *Guidelines* cross-refers the reader to the Commission's *Article [101(3)] Guidelines*.

<sup>46</sup> See ch 1, 'Market power', pp 42–45.

<sup>46a</sup> OJ [1997] C 372/5.

<sup>47</sup> See eg para 208 which provides a safe harbour for joint purchasing agreements where the parties have a market share not exceeding 15 per cent of their purchasing or selling markets: see 'Restrictions by effect', p 604.

<sup>48</sup> See ch 3, 'The *De Minimis* Doctrine', pp 140–144.

<sup>49</sup> See on this point ch 4, 'The burden of proving that the conditions of Article 101(3) are satisfied', pp 152–153.

## 4. Information Agreements

Chapter 4 of the *Guidelines on Horizontal Cooperation Agreements* discusses the exchange of information. Paragraph 57 points out that information exchange may generate efficiency gains; whereas paragraph 58 notes that it can also lead to restrictions of competition. The subject is complex, and careful analysis is required. We have chosen to deal with this subject in the chapter on cartels<sup>50</sup>, but this is not intended to suggest that the exchange of information is by its nature cartel-like behaviour. There is a long and complicated continuum: at one end can be found exchanges of information which are, in truth, pure cartels, or mechanisms for monitoring and enforcing cartels; at the other are exchanges that make markets more efficient. We do not wish to pretend that a clear line can be drawn that separates ‘bad’ from ‘good’ exchanges of information, by allocating some to the chapter on cartels and others to this chapter; this is why they are dealt with in one place only.

## 5. Research and Development Agreements<sup>51</sup>

Chapter 3 of the *Guidelines on Horizontal Cooperation Agreements* deals with agreements that have as their centre of gravity R&D. Chapter 3.2 deals with market definition in R&D cases, first in relation to existing product and technology markets and then in relation to markets for innovation, also referred to as ‘R&D efforts’; chapter 3.3 considers the assessment of R&D agreements under Article 101(1) and chapter 3.4 discusses the application of Article 101(3). Chapter 3.5 provides five examples of how Article 101 would apply to various types of agreement. Block exemption is conferred on some R&D agreements by Regulation 1217/2010<sup>52</sup>.

### (A) Market definition

Paragraph 112 of the *Guidelines* states that the key to defining markets in R&D cases is to identify those products, technologies or R&D efforts that act as a constraint on the parties to the agreement. In some cases innovation leads to the creation of a new product which is merely a slight improvement on an existing one; at the other end of the spectrum an entirely new product may be created that forms a new market. Some innovation falls between these two extremes.

#### (i) Existing product and technology markets

Where an agreement concerns improvements to existing products, they and their close substitutes form the relevant market<sup>53</sup>. Where R&D is aimed at a significant change of existing products, or even the creation of a new one to replace them, the old and the potentially new products do not belong to the same market; however in this situation the possibility exists that cooperation in the new market could lead to coordination

<sup>50</sup> See ch 13, ‘Exchanges of information’, pp 539–547.

<sup>51</sup> For a useful discussion of research and development agreements see *Faull and Nikpay*, paras 7.107–7.212.

<sup>52</sup> OJ [2010] L 335/36; see ‘The block exemption for research and development agreements: Regulation 1217/2010’, pp 595–599 below.

<sup>53</sup> *Guidelines*, para 113.

in the old one<sup>54</sup>. Where the R&D concerns an important component in a final product the market for the component may be relevant to the competition assessment, but the existing market for the final product may also be relevant if the component is technically or economically a key element in the final product and if the parties have market power with respect to that product<sup>55</sup>. In some cases the market may be one for technology rather than products, and paragraphs 116 to 118 explain how the market should be defined and market share calculated in those circumstances; paragraph 117 cross-refers to the Commission's *Technology Transfer Guidelines* which also discuss this topic<sup>56</sup>.

### (ii) Competition in innovation (R&D efforts)

Where the parties conduct R&D in relation to innovation and the creation of entirely new products the position is more complex, and the *Guidelines* say at paragraph 119 that it may not be sufficient in such cases to look only at existing product and/or technology markets<sup>57</sup>. Paragraph 120 says that it may be possible to identify competing 'poles' of R&D, in which case it is necessary to consider whether, if two competing undertakings were to enter into an R&D agreement, there would be a 'sufficient number of remaining R&D poles'. The remaining poles must be 'credible': the credibility of an R&D pole is assessed according to the nature, scope and size of other R&D efforts, their access to financial and human resources, know-how, patents and other specialised assets and their capability to exploit the results. Where it is not possible to identify R&D poles, the Commission would limit its assessment to related product and/or technology markets<sup>58</sup>.

### (iii) Market shares

Paragraphs 123 to 126 of the *Guidelines* discuss how market shares should be calculated in the case of R&D agreements, and in particular the different approaches to be taken when dealing with innovation and entirely new products as opposed to the improvement of existing ones. Since market shares are particularly important when considering the application of the R&D block exemption, this issue will be discussed in section D below on Regulation 1217/2010<sup>59</sup>.

## (B) The application of Article 101(1) to R&D agreements

### (i) Main competition concerns

Paragraphs 127 to 140 of the *Guidelines* discuss the assessment of R&D agreements under Article 101(1). Three possible anti-competitive effects are noted: a reduction or slowing down of innovation; a restriction of competition or the facilitation of coordination between the parties in markets outside the scope of the agreement; and foreclosure, although this would be a problem only if at least one of the parties to the agreement has significant market power (though not necessarily dominance)<sup>60</sup>.

<sup>54</sup> Ibid, para 114.

<sup>55</sup> Ibid, para 115.

<sup>56</sup> See ch 19, 'Technology markets', p 785.

<sup>57</sup> For discussion on competition in innovation see OFT Economic Discussion Paper 3 (OFT 377) *Innovation and Competition Policy* (Charles River Associates, 2002), available at [www.oft.gov.uk](http://www.oft.gov.uk).

<sup>58</sup> *Guidelines*, para 122.

<sup>59</sup> See 'The block exemption for research and development agreements: Regulation 1217/2010', pp 595–599 below.

<sup>60</sup> *Guidelines*, para 127.

**(ii) Restrictions by object**

Paragraph 128 says that an R&D agreement would restrict competition by object if it is in reality a tool to engage in a disguised cartel; however it adds that an R&D agreement which includes the joint exploitation of future results is not necessarily restrictive of competition<sup>61</sup>.

**(iii) Restrictions by effect**

Paragraphs 129 to 140 consider when R&D agreements might infringe Article 101(1) because of their anti-competitive effects. R&D agreements that relate to cooperation ‘at an early stage, far removed from the exploitation of possible results’, fall outside Article 101(1)<sup>62</sup>. So too would agreements between non-competitors<sup>63</sup>, unless there is a possibility of a foreclosure effect and one of the parties has significant market power with respect to key technology<sup>64</sup>. The outsourcing of R&D to research institutes and academic bodies which are not active in the exploitation of the results would normally not be caught by Article 101(1)<sup>65</sup>; and ‘pure’ R&D agreements, that do not extend to joint exploitation of the results, would rarely do so: they would do so only where they appreciably reduce effective competition in innovation<sup>66</sup>.

Paragraph 133 states that an R&D agreement is likely to infringe Article 101(1) only where the parties have market power on the existing markets or where competition with respect to innovation is appreciably reduced; no market share figure is given for the application of Article 101(1) to R&D agreements<sup>67</sup>, although the Commission points out that a safe haven is provided by Article 4 of Regulation 1217/2010, the block exemption for R&D agreements, where the parties’ market share is below 25 per cent<sup>68</sup>. The *Guidelines* say that where the parties have a market share of more than 25 per cent it does not necessarily follow that Article 101(1) is infringed, but they continue by saying that an infringement becomes more likely as the parties’ position on the market becomes stronger<sup>69</sup>. Paragraph 137 explains that an R&D agreement that extends to joint production and/or marketing would need to be scrutinised for competition concerns more carefully than one that relates purely to R&D. The *Guidelines* then provide guidance on R&D agreements in relation to entirely new products or technologies<sup>70</sup> and on agreements that lie between the improvement of existing products or technologies and the development of entirely new ones<sup>71</sup>.

**(C) The application of Article 101(3) to R&D agreements<sup>72</sup>**

Paragraphs 141 to 146 discuss the assessment of R&D agreements under Article 101(3). Paragraph 142 states that the hard-core restrictions that are listed in Article 5 of Regulation 1217/2010, and which prevent the application of the block exemption, would be unlikely to be regarded as indispensable in the case of the individual assessment of an agreement under Article 101(3). Paragraphs 145 and 146 deal with the date for assessing the application of Article 101(3): they explain that it is necessary to take into account any sunk costs that the parties incur when investing in the R&D project and the time that they may need to be able to recoup their investment<sup>73</sup>; and also that different aspects of an agreement

<sup>61</sup> Ibid, para 128.<sup>62</sup> Ibid, para 129.<sup>63</sup> Ibid, para 130.<sup>64</sup> Ibid, fn 1 to para 130.<sup>65</sup> Ibid, para 131.<sup>66</sup> Ibid, para 132.<sup>67</sup> Ibid, para 133.<sup>68</sup> Ibid, para 134; on the block exemption see below.<sup>69</sup> *Guidelines*, para 135.<sup>70</sup> Ibid, para 138.<sup>71</sup> Ibid, para 139.<sup>72</sup> For examples of R&D agreements that the Commission considered satisfied the criteria of Article 101(3) see *Asahi/St Gobain* OJ [1994] L 354/87; *Philips/Osram* OJ [1994] L 378/34, [1996] 4 CMLR 48.<sup>73</sup> *Guidelines*, para 145.

may need to be assessed at different times: for example the effects of cooperation in R&D should be considered at the date of the original agreement, but joint production may give rise to issues at a later date, if and when the agreement leads to the development of successful products<sup>74</sup>.

### (D) The block exemption for R&D agreements: Regulation 1217/2010

Acting under powers conferred upon it by Council Regulation 2821/71<sup>75</sup> the Commission adopted a block exemption for R&D agreements on 14 December 2010<sup>76</sup>. Regulation 1217/2010, which replaced Regulation 2659/2000<sup>77</sup>, entered into force on 1 January 2011 and will expire on 31 December 2022<sup>78</sup>. Article 8 provides transitional relief until 31 December 2012 for agreements which were in force on 31 December 2010 and which satisfied the conditions for exemption in the old Regulation.

The Regulation consists of 22 recitals and 9 Articles. Recital 2 refers specifically to Article 179(2) TFEU, which calls upon the Union to encourage undertakings, including small and medium-sized ones, in their R&D activities and to support efforts on their part to cooperate with one another. Article 1 defines key terms such as ‘research and development agreement’, ‘exploitation of the results’, ‘actual competitor’ and ‘potential competitor’. Article 2 confers block exemption on R&D agreements subject to the provisions of the Regulation. Article 3 sets out conditions for application of the block exemption. Article 4 imposes a market share cap and deals with the duration of the exemption. Article 5 sets out a list of ‘hard-core’ restrictions the inclusion of which prevents an agreement from benefiting from block exemption. Article 6 provides that certain ‘excluded restrictions’ do not benefit from block exemption, although their inclusion in an agreement does not prevent application of the Regulation to the rest of it. Article 7 contains provisions on the application of the market share threshold. Withdrawal of the block exemption by the Commission or by the national competition authorities of a Member State is possible by virtue of Article 29 of Regulation 1/2003.

#### (i) Article 1: definitions

Article 1 contains definitions of expressions used in Regulation 1217/2010. Of particular importance is Article 1(1)(a) which defines an R&D<sup>79</sup> agreement as one between two or more parties relating to the conditions under which they pursue:

- (a) joint research and development of contract products or contract technologies and joint exploitation of the results of that research and development;
- (b) joint exploitation of the results of research and development of contract products or contract technologies jointly carried out pursuant to a prior agreement between the same parties; or
- (c) joint research and development of contract products or contract technologies.

Article 1(1) also includes within the definition of an R&D agreement those where one party merely finances the R&D activities of another party<sup>80</sup>.

Recital 9 of the Regulation states that joint exploitation can be considered as the natural consequence of joint R&D: exploitation is defined in Article 1(1)(g) to include:

<sup>74</sup> Ibid, para 146. <sup>75</sup> OJ [1971] L 285/46.

<sup>76</sup> Regulation 1217/2010, OJ [2010] L 335/36. <sup>77</sup> OJ [2000] L 304/7.

<sup>78</sup> Regulation 1217/2010, Article 9; note also recital 22.

<sup>79</sup> The term R&D itself is defined in Article 1(1)(c) of the Regulation.

<sup>80</sup> Regulation 1217/2010, recital 8 and Article 1(1)(a)(iv)–(vi).

the production or distribution of the contract products or the application of the contract technologies or the assignment or licensing of intellectual property rights or the communication of know-how required for such manufacture or application.

R&D and exploitation are ‘joint’ where the work is carried out by a joint team, organisation or undertaking, is jointly entrusted to a third party or is allocated between the parties by way of specialisation in research and development or exploitation<sup>81</sup>.

**(ii) Article 2: exemption**

Article 2(1) confers block exemption on R&D agreements, subject to the provisions of the Regulation. Article 2(2) provides that the block exemption also applies to provisions in R&D agreements which relate to the assignment or licensing of intellectual property rights:

provided that those provisions do not constitute the primary object of such agreements, but are directly related to and necessary for their implementation.

**(iii) Article 3: conditions for exemption**

Article 3(1) provides that block exemption is available subject to the conditions set out in paragraphs 2 to 5 thereof; Article 3 should be read in conjunction with recitals 11 and 12. It should be stressed that these conditions are applicable only where an agreement infringes Article 101(1) so that the parties wish to avail themselves of the block exemption; if an agreement is not restrictive in the sense of Article 101(1), there is no need to comply with Article 3 of the Regulation.

Article 3(2) provides that all the parties must have full access to the final results of the joint R&D for the purposes of further research or exploitation; however if they limit their rights of exploitation in accordance with the Regulation, for example by agreeing to specialise in the context of exploitation, access to the rights may be limited accordingly. The third sentence of Article 3(2) specifically provides that research institutes, academic bodies or undertakings which supply R&D as a commercial service but are not normally active in exploitation of the results may agree to confine their use of the results to conducting further research. This means, for example, that a pharmaceutical company that enters into an R&D agreement with a research institute or a university can require its partner not to exploit the results commercially but to limit itself only to further research; if this restriction were not possible, the pharmaceutical company might refrain from beneficial joint R&D with the undertaking in question for fear that it would extend its activities beyond research into commercialisation.

Article 3(3) provides that, subject to Article 3(2), where an agreement provides only for joint R&D, each party must be granted access to pre-existing know-how of the other parties if it is indispensable for the purposes of its exploitation of the results; the agreement can provide for compensation to be paid for such access, but the rate must not be so high as to impede such access.

Article 3(4) provides that joint exploitation is permissible only where it relates to results of cooperation in R&D which are protected by intellectual property rights or constitute know-how and which are indispensable for the manufacture of the contract products or the application of the contract technologies. The reason for this condition is that cooperation at the level of exploitation should be limited to those cases in which joint R&D has led to economic benefits; where this is not the case, the rationale for granting block exemption to joint exploitation is not satisfied.

<sup>81</sup> *Ibid*, Article 1(1)(m).

Article 3(5) provides that undertakings charged with manufacture by way of specialisation in production must be required to fulfil orders for supplies from all the parties, except where the R&D also provides for joint distribution or where the parties have agreed that only the party manufacturing the contract products may distribute them. The explanation for this is that where, for example, one party agrees to produce widgets and the other blodgets, each should have access to the products produced by the other and be able to compete in the relevant market; this is not necessary, however, where the parties carry out their distribution jointly.

#### (iv) Article 4: duration of exemption and the market share threshold

Article 4 deals with the duration of the exemption and the market share threshold; Article 4 should be read in conjunction with recitals 13 to 16. A distinction is made between the treatment of agreements between non-competing undertakings and an agreement between competing ones. Paragraphs 123 and 124 of the *Guidelines on Horizontal Cooperation Agreements* explain that, where existing products or technologies are being improved or replaced, market shares can be based on the existing ones; paragraph 125 specifically discusses the calculation of market shares for technology markets. Paragraph 126 says that, where the agreement relates to innovation, market shares cannot be calculated, in which case the agreement is treated as one between non-competing undertakings and Articles 4(1) and 4(3) of the Regulation apply.

Article 4(1) provides that, where the parties are not competing undertakings<sup>82</sup>, the exemption shall apply for the duration of the R&D; where the results are jointly exploited the exemption shall continue to apply for seven years from the time the contract products or contract technologies are first put on the market within the internal market. These rules apply irrespective of the parties' market share; in case, in exceptional circumstances, it proves necessary to take action in relation to an agreement between non-competing undertakings, this would be done by withdrawal of the block exemption<sup>83</sup>. Article 4(3) provides that, at the end of the seven-year period, the exemption will continue as long as the parties' combined market share does not exceed 25 per cent.

Article 4(2) deals with the position where the parties are competing undertakings. In that case the block exemption applies only if, at the time the parties entered into the agreement, their share of the market for the contract products or contract technologies did not exceed 25 per cent; in the case of paid-for R&D the financing party's market share is also to be taken into account for the purposes of this rule<sup>84</sup>. Article 7 contains rules on how to apply the market share threshold; it contains specific rules to deal with the situation where the undertakings outgrow the market share cap<sup>85</sup>.

#### (v) Article 5: hard-core restrictions

Article 5(1), which is shorter and less restrictive than its predecessor, prevents the block exemption from applying where agreements contain 'severe restrictions of competition'<sup>86</sup>

<sup>82</sup> For the definition of this term see Regulation 1217/2010, Article 1(1)(r)–(t); note in particular that a potential competitor is an undertaking that might enter within *three* years in response to a SSNIP (as to which see ch 1, 'Demand-side substitutability', pp 31–32), rather than a period of *one* year that is the usual test when determining whether a potential competitor produces an effective competitive constraint on undertakings already in the market, a different question from the one under consideration here.

<sup>83</sup> Regulation 1217/2010, recital 18; on withdrawal of the block exemption see 'Withdrawal of the block exemption by the Commission and national competition authorities', p 599 below.

<sup>84</sup> Regulation 1217/2010, Article 4(2)(b).

<sup>85</sup> *Ibid*, Article 7(d)–(f).

<sup>86</sup> *Ibid*, recital 15.

which ‘directly or indirectly, in isolation or in combination with other factors under the control of the parties, have as their object’ any of the following:

- a restriction of the freedom of the parties to carry out R&D in a field unconnected to the agreement
- a limitation on output or sales. There are exceptions to this: the setting of production or sales targets in the event of joint exploitation or joint distribution; specialisation in the context of exploitation<sup>87</sup>; and a non-competition clause during the period of joint exploitation. Recital 15 of Regulation 1217/2010 also states that field-of-use restrictions will not be regarded as constituting limitations of output or sales (nor as restrictions on territories or customers)
- the fixing of prices when selling the contract products or licensing the contract technologies to third parties, with the exception of fixing the prices or royalties charged to immediate customers in the event of joint exploitation or distribution
- a restriction of the territories to which or the customers to whom the parties may passively sell the contract products or license the contract technologies, with the exception of the requirement exclusively to license the results to another party
- a requirement not to make any, or to limit, active sales in territories or to customers which have not been exclusively allocated to one of the parties by way of specialisation in the context of exploitation
- a requirement to refuse to meet demand from customers in the parties’ respective territories or from customers otherwise allocated between the parties by way of specialisation in the context of exploitation, who would market them in other territories within the internal market
- a requirement to make it difficult for users or resellers to obtain the contract products from other resellers within the internal market.

The inclusion of any of these provisions excludes the entire agreement, not just the offensive provisions, from the block exemption. Where such provisions fall within Article 101(1), which is likely to be the case<sup>88</sup>, paragraph 142 of the *Guidelines* states that they are less likely to satisfy the terms of Article 101(3) on an individual basis, but continues that undertakings may be able to demonstrate that such restrictions are indispensable to an R&D agreement.

#### (vi) Article 6: excluded restrictions

Article 6 lists two ‘excluded restrictions’ which are not block exempted, but the inclusion of which does not prevent the application of the Regulation to the remaining parts of the agreement if they are severable from the excluded restrictions. The first is an obligation not to challenge the validity of intellectual property rights relevant to, or arising from, the R&D, without prejudice to the right to terminate the agreement in the event of such a challenge. No-challenge clauses were treated as hard-core restrictions in Regulation 2659/2000, the predecessor to Regulation 1217/2010. The second excluded restriction is an obligation not to grant licences to third parties to manufacture the contract products or to apply the contract technologies unless the agreement provides for exploitation of the results of the R&D by at least one of the parties to the agreement. Again, such an obligation was regarded as hard-core by Regulation 2659/2000.

<sup>87</sup> Note that Regulation 2659/2000 did *not* apply to specialisation in exploitation.

<sup>88</sup> Note that even hard-core restrictions might, as a matter of law, fall outside Article 101(1) where they could not have an appreciable effect on competition or on inter-state trade: see ch 3, ‘The *De Minimis* Doctrine’, pp 140–144 and ‘The concept of appreciability’, p 147.

**(vii) Article 7: application of the market share threshold**

Article 7 was referred to above in the context of the market share cap in Article 4<sup>89</sup>.

**(viii) Article 8: transitional period**

The transitional relief for agreements that benefited from the exemption provided for in Regulation 2659/2000 was explained above<sup>90</sup>.

**(ix) Article 9: period of validity**

The Regulation entered into force on 1 January 2011 and will expire on 31 December 2022.

**(x) Withdrawal of the block exemption by the Commission and national competition authorities**

As explained in chapter 4 of this book, Article 29 of Regulation 1/2003 enables the Commission and the national competition authorities of the Member States to withdraw the benefit of a block exemption from agreements which have effects which are incompatible with Article 101(3). As noted above, recital 18 of Regulation 1217/2010 says that this might be done in the exceptional circumstance that an agreement between non-competing undertakings is harmful to competition. Recital 21 gives some further examples of when this might happen, for example where the R&D agreement substantially restricts the scope for third parties to carry out R&D or where the contract products or technologies do not face effective competition in the internal market.

## 6. Production Agreements<sup>91</sup>

Chapter 4 of the *Guidelines on Horizontal Cooperation Agreements* deals with production agreements. Paragraph 150 notes that such agreements vary in form and scope, from production carried out by a jointly-controlled company to sub-contracting agreements. The *Guidelines* apply to all forms of joint production agreements, including horizontal sub-contracting agreements, that is to say agreements between undertakings operating in the same market irrespective of whether they are actual or potential competitors<sup>92</sup>. Vertical sub-contracting agreements between undertakings operating at different levels of the market are not covered by the *Guidelines on Horizontal Cooperation Agreements*; however they may be covered by the Commission's *Guidelines on Vertical Restraints*, by the block exemption for vertical agreements, Regulation 330/2010, or by the Commission's *Notice on Sub-contracting Agreements*<sup>93</sup>.

In determining whether Article 101(1) applies to production agreements, the relevant product and geographic markets must be defined; it may also be necessary to consider the possibility that there may be a 'spillover effect' in an upstream, downstream or neighbouring market<sup>94</sup>.

<sup>89</sup> See 'Article 4: the market share threshold and duration of exemption', p 597 above.

<sup>90</sup> See 'Article 6: excluded restrictions', p 598 above.

<sup>91</sup> See further *Faull and Nikpay*, paras 7.213–7.251.

<sup>92</sup> *Guidelines on Horizontal Cooperation Agreements*, para 151.

<sup>93</sup> *Ibid*, para 154; see ch 16, 'Sub-Contracting Agreements', pp 676–677.

<sup>94</sup> *Guidelines on Horizontal Cooperation Agreements*, para 156; note that spillover effects must also be considered in the case of a joint venture that amounts to a concentration under the EUMR: see ch 21, 'Articles 2(4) and 2(5) of the EUMR: full-function joint ventures and "spillover effects"', pp 880–882.

## (A) The application of Article 101(1) to production agreements

### (i) Main competition concerns

The Commission expresses three main concerns about production agreements. First, that they may lead to a direct restriction of competition between the parties, even if they market the products independently<sup>95</sup>. Secondly that they may lead to a coordination of the parties' competitive behaviour, in particular when the production agreement leads to a high commonality of their variable costs<sup>96</sup>. The Commission's third concern is that production agreements may lead to third parties being foreclosed from a related market; however it notes that a foreclosure effect is likely only if at least one of the parties has a 'strong market position' in the market where the risks of foreclosure are assessed<sup>97</sup>.

### (ii) Restrictions by object

Paragraph 160 of the *Guidelines* notes that agreements to fix prices, limit output or to share markets or customers restrict competition by object. However it goes on to explain that in two situations restrictions concerning output and prices in the context of joint production would not amount to restrictions by object. The first is where the parties agree on the level of output that is the subject-matter of the production agreement; the second is an agreement on the prices at which the jointly-produced products (and only those products) will be sold, provided that this is necessary for joint production.

### (iii) Restrictions by effect

Paragraphs 162 to 182 deal with production agreements that may have the effect of restricting competition. Paragraph 163 explains that it is necessary to consider what the situation would have been in the absence of the agreement – that is to say to identify the 'counter-factual'; if the production agreement enables the parties to enter a market that they would otherwise have been unable to, the agreement will not be found to have as its effect the restriction of competition. Paragraph 165 says that none of the competition concerns discussed in paragraphs 157 to 159 would arise where the parties to a production agreement lack market power. Market power is discussed in paragraphs 168 to 173: the *Guidelines* do not provide a 'safe harbour' for agreements below a specific threshold<sup>98</sup>, although the Commission draws attention to the 20 per cent threshold below which agreements may benefit from the block exemption for specialisation agreements<sup>99</sup>. Even where the parties have high market shares, a production agreement may not have the effect of restricting competition where the market is dynamic, that is to say it is one in which entry occurs and market positions change frequently<sup>100</sup>. The *Guidelines* make the point that a production agreement is more likely to restrict competition by effect where it extends to commercialisation of the products rather than being limited purely to production: the nearer the parties' agreement brings them to the consumer, the higher the risk to competition<sup>101</sup>.

<sup>95</sup> *Guidelines on Horizontal Cooperation Agreements*, para 157; see also para 174.

<sup>96</sup> *Ibid*, para 158; see also paras 175–182. <sup>97</sup> *Ibid*, para 159.

<sup>98</sup> It should be recalled, however, that the Commission's *De Minimis* Notice provides a safe harbour for agreements between competitors that do not contain hard-core restrictions where the parties' combined market share is below 10 per cent: see ch 3, 'The *De Minimis* Doctrine', pp 140–144.

<sup>99</sup> See 'Article 3: the market share threshold', p 602 below; the Commission also provides a 'safe harbour' for horizontal sub-contracting agreements with a view to expanding production, where the parties' market share is below 20 per cent: *Guidelines on Horizontal Cooperation Agreements*, para 169.

<sup>100</sup> *Guidelines on Horizontal Cooperation Agreements*, para 171. <sup>101</sup> *Ibid*, para 167.

## (B) The application of Article 101(3) to production agreements

Paragraphs 183 to 186 discuss the criteria in Article 101(3) and their application to production agreements<sup>102</sup>.

## (C) The block exemption for specialisation agreements: Regulation 1218/2010

Acting under powers conferred upon it by Council Regulation 2821/71<sup>103</sup> the Commission adopted a new block exemption for specialisation agreements on 14 December 2010<sup>104</sup>. The Regulation entered into force on 1 January 2011 and will expire on 31 December 2022<sup>105</sup>. The new Regulation replaces Regulation 2658/2000<sup>106</sup>. Article 6 provides transitional relief for agreements which were in force on 31 December 2010 and which satisfied the conditions for exemption in the old Regulation: they are exempt until 31 December 2012.

The Regulation consists of 16 recitals and 7 Articles. Article 1 contains definitions. Article 2 confers block exemption on specialisation agreements subject to the provisions of the Regulation. Article 3 imposes a market share cap of 20 per cent. Article 4 sets out a list of ‘hard-core’ restrictions the inclusion of which prevents an agreement from benefiting from block exemption. Article 5 contains provisions on the application of the market share threshold.

### (i) Article 1: definitions

Article 1 of Regulation 1218/2010 contains definitions of expressions used in the Regulation. Of particular importance is Article 1(2)(a) which defines ‘specialisation agreement’<sup>107</sup>: this term covers unilateral specialisation agreements, reciprocal specialisation agreements and joint production agreements. Each of these terms is then defined.

A unilateral specialisation agreement means an agreement between two parties:

which are active on the same product market by virtue of which one party agrees to fully or partly<sup>108</sup> cease production of certain products or to refrain from producing those products and to purchase them from the other party, who agrees to produce and supply those products<sup>109</sup>.

A reciprocal specialisation agreement means an agreement between two or more parties:

which are active on the same product market, by virtue of which two or more parties on a reciprocal basis agree fully or partly<sup>110</sup> to cease or refrain from producing certain but different products and to purchase these products from the other parties, who agree to produce and supply them<sup>111</sup>.

A joint production agreement means an agreement between two or more parties:

by virtue of which two or more parties agree to produce certain products jointly<sup>112</sup>.

<sup>102</sup> For examples of ‘individual exemptions’ granted by the Commission under Regulation 17 of 1962 to production agreements that satisfied the terms of Article 101(3) see eg *Fiat/Hitachi* OJ [1993] L 20/10, [1994] 4 CMLR 571; *Ford/Volkswagen* OJ [1993] L 20/14, [1993] 5 CMLR 617; *Exxon/Mobil* OJ [1994] L 144/20: see Commission’s XXIVth Report on Competition Policy (1994), pp 169–171; *Fujitsu/AMD* OJ [1994] L 341/66.

<sup>103</sup> OJ [1971] L 285/46.

<sup>104</sup> OJ [2010] L 335/43.

<sup>105</sup> Regulation 1218/2010, Article 7.

<sup>106</sup> OJ [2000] L 304/3.

<sup>107</sup> See also recitals 7 and 8 of the Regulation.

<sup>108</sup> An important change in Regulation 1218/2010 is that it can apply to partial cessation of production; its predecessor applied only in the case of a total cessation.

<sup>109</sup> Regulation 1218/2010, Article 1(1)(b).

<sup>110</sup> See ch 15 n 108 above.

<sup>111</sup> Regulation 1218/2010, Article 1(1)(c).

<sup>112</sup> *Ibid*, Article 1(1)(d).

**(ii) Article 2: exemption**

Article 2(1) of Regulation 1218/2010 confers block exemption on specialisation agreements as defined in Article 1. Article 2 adds that block exemption extends to specialisation agreements:

containing provisions which relate to the assignment or licensing of intellectual property rights to one or more of the parties, provided that those provisions do not constitute the primary object of such agreements, but are directly related to and necessary for their implementation.

Article 2(3) provides that the exemption also applies to specialisation agreements whereby the parties accept an exclusive purchase or supply obligation, each of which expression is defined in Article 1; and to agreements whereby the parties jointly distribute the products that are the subject of the agreement, rather than selling them independently. Recital 9 of the Regulation explains that, in order to ensure that the benefits of specialisation materialise without one party leaving the market downstream of production entirely, unilateral and reciprocal specialisation agreements must provide for supply and purchase obligations between the parties or for joint distribution; the supply and purchase obligations do not have to be exclusive, but if they are, they are block exempted by virtue of Article 2(3).

**(iii) Article 3: the market share threshold**

Article 3 provides that the block exemption applies on condition that the combined market share of the participating undertakings does not exceed 20 per cent. The expression ‘parties’ includes ‘connected undertakings’, as defined in Article 2(2). Article 5 contains rules on how to apply the market share threshold; it contains specific rules to deal with the situation where the undertakings outgrow the market share cap<sup>113</sup>. Recital 10 of the Regulation says that, where the 20 per cent market share threshold is exceeded, there is no presumption that an agreement infringes Article 101(1) or that it fails to satisfy Article 101(3): rather an individual assessment of the agreement would have to be conducted.

**(iv) Article 4: hard-core restrictions**

Article 4(1) prevents the block exemption from applying where agreements contain the following ‘severe restrictions of competition’<sup>114</sup>, that is to say agreements which:

directly or indirectly, in isolation or in combination with other factors under the control of the parties, have as their object any of the following:

- (a) the fixing of prices when selling the products to third parties with the exception of the fixing of prices charged to immediate customers in the context of joint distribution;
- (b) the limitation of output or sales with the exception of:
  - (i) provisions on the agreed amount of products in the context of unilateral or reciprocal specialisation agreements or the setting of the capacity and production volume in the context of a joint production agreement; and
  - (ii) the setting of sales targets in the context of joint distribution;
- (c) the allocation of markets or customers.

The inclusion of any of these provisions excludes the entire agreement, not just the offensive provisions, from the block exemption<sup>115</sup>.

<sup>113</sup> Ibid, Article 5(d) and (e).

<sup>114</sup> Ibid, recital 11. <sup>115</sup> *Guidelines*, para 37.

**(v) Article 5: application of the market share threshold**

Article 5 was referred to above in the context of the market share cap in Article 4<sup>116</sup>.

**(vi) Article 6: transitional period**

The transitional relief for agreements that benefit from the exemption provided for in Regulation 2658/2000 was explained above<sup>117</sup>.

**(vii) Article 7: period of validity**

The Regulation entered into force on 1 January 2011 and will expire on 31 December 2022.

**(viii) Withdrawal of the block exemption by the Commission and national competition authorities**

As noted in chapter 4 of this book, Article 29 of Regulation 1/2003 enables the Commission and the national competition authorities of the Member States to withdraw the benefit of a block exemption from agreements which have effects which are incompatible with Article 101(3). Recital 15 of Regulation 1218/2010 says that this might happen, for example, where the relevant market is very concentrated and competition is already weak, in particular because of the individual market positions of other market participants or links between other market participants created by parallel specialisation agreements.

**7. Purchasing Agreements<sup>118</sup>**

Chapter 5 of the *Guidelines on Horizontal Cooperation Agreements* deals with joint purchasing agreements. Surprisingly the *Guidelines* do not refer to the judgment of the Court of Justice on joint purchasing organisations in *Gøttrup-Klim Grovwareforeninger v Dansk Landburs Grovvarereselskab AmbA*<sup>119</sup>. The *Guidelines* point out that joint purchasing usually aims at the creation of buyer power: for example an alliance of retailers who group together to negotiate lower prices with their suppliers; it may be that this enables them in turn to offer lower prices to consumers<sup>120</sup>. The *Guidelines* consider the horizontal relationship between the members of the group purchasing organisation; the vertical relationships, between it and its suppliers and between it and its members, fall to be considered under the rules on vertical agreements<sup>121</sup>.

Joint purchasing must be considered in the context of the relevant procurement market<sup>122</sup>; in some cases it may also be necessary to look at the selling market, if the parties to the joint purchasing agreement also actively compete in that market<sup>123</sup>.

<sup>116</sup> See above.

<sup>121</sup> *Ibid*, para 194; see ch 16, 'Article 2(2): associations of retailers', pp 655–656, on the application of Article 2(2) of Regulation 330/2010, the block exemption for vertical agreements, to agreements between associations of retailers and their suppliers and their members.

<sup>122</sup> *Guidelines on Horizontal Cooperation Agreements*, para 198; see also ch 1, 'Procurement markets', p 38.

<sup>123</sup> *Guidelines on Horizontal Cooperation Agreements*, para 199.

## (A) Application of Article 101(1) to joint purchasing agreements

### (i) Main competition concerns

The *Guidelines* set out three possible concerns raised by joint purchasing agreements. The first arises in the purchasers' *selling* market: if they have a significant degree of market power (not necessarily amounting to dominance) in that market, it may be that they will have no incentive to pass on to consumers any lower prices that they extract from their suppliers<sup>124</sup>; the possibility of a collusive outcome in the selling market is discussed further in paragraphs 213 to 216 of the *Guidelines*. The second concern is that, if the parties have significant market power in their *purchasing* market, they may force their suppliers to reduce the range or quality of the products they produce<sup>125</sup>. The third concern is that purchasers with buyer power may be able to foreclose competing purchasers by limiting their access to efficient suppliers<sup>126</sup>.

### (ii) Restrictions by object

Joint purchasing agreements restrict competition by object if they do not truly concern joint purchasing, but serve instead as a disguised cartel<sup>127</sup>; however where the parties agree the price to be paid for the products that are the subject of the joint purchasing agreement, this would not amount to a restriction by object: rather an effects analysis would have to be conducted to determine whether any of the concerns expressed above might arise<sup>128</sup>.

### (iii) Restrictions by effect

In determining whether joint purchasing could have the effect of restricting competition it is necessary to look both at the purchasing and the selling markets<sup>129</sup>. The extent of the parties' market power is obviously relevant to any assessment of possible restrictive effects. There is no threshold *above* which such effects can be presumed; however 'in most cases it is unlikely' that Article 101(1) would be infringed where the market shares in both the purchasing and selling markets are below 15 per cent, and anyway the conditions of Article 101(3) would be likely to be fulfilled<sup>130</sup>. Where these market share thresholds are exceeded a detailed assessment of the effects of an agreement would be required involving, but not limited to, factors such as market concentration and any possible countervailing power of strong suppliers<sup>131</sup>.

The application of Article 101 to 'B2B' joint purchasing, that is to say joint procurement through an electronic marketplace, was considered by the Commission in the case of *Covisint*, leading to the closure of the file by comfort letter<sup>132</sup>.

## (B) Application of Article 101(3) to joint purchasing agreements<sup>133</sup>

Paragraphs 217 to 220 of the *Guidelines* discuss Article 101(3) and joint purchasing agreements. Paragraph 217 notes that joint purchasing can give rise to significant efficiency

<sup>124</sup> *Ibid*, para 201.

<sup>125</sup> *Ibid*, para 202.

<sup>126</sup> *Ibid*, para 203.

<sup>127</sup> *Ibid*, para 205.

<sup>128</sup> *Ibid*, para 206.

<sup>129</sup> *Ibid*, para 207.

<sup>130</sup> *Ibid*, para 208.

<sup>131</sup> *Ibid*, para 209.

<sup>132</sup> Commission Press Release IP/01/1155, 31 July 2001; see further Vollebregt 'E-Hubs, Syndication and Competition Concerns' (2000) 10 ECLR 437; ch 13, 'B2B markets', p 547; Commission's XXXIst *Report on Competition Policy* (2001), pp 58–60.

<sup>133</sup> For examples of joint purchasing agreements that the Commission authorised under Article 101(3) see *National Sulphuric Acid Association* OJ [1980] L 260/24, [1980] 3 CMLR 429; *National Sulphuric Acid Association (No 2)* OJ [1989] L 190/22, [1991] 4 CMLR 612; *ARD/MGM* OJ [1989] L 284/36, [1991] 4 CMLR 841; *European Broadcasting Union* OJ [1993] L 179/23, [1995] 4 CMLR 56, annulled on appeal Cases T-528/93 etc *Métropole télévision SA v Commission* [1996] ECR II-649, [1996] 5 CMLR 386 and readopted

gains, leading to lower prices, reduced transaction, transportation and storage costs, and innovation on the part of suppliers. Paragraph 218 notes that an obligation to purchase exclusively through the joint purchasing organisation may be regarded as indispensable to achieve the necessary volume for the realisation of economies of scale, but says that this must be assessed in the context of each case. In *Rennet*<sup>134</sup> the Commission considered that an exclusive purchasing requirement that members of a cooperative should purchase all their rennet from the cooperative was a restriction of competition and that it did not satisfy the criteria of Article 101(3).

Paragraph 219 stresses that, for Article 101(3) to apply to a joint purchasing agreement, there must be a passing-on of a fair share of the benefit to consumers: savings or efficiencies that benefit only the parties to the agreement would not be permitted; a critical issue is whether the parties to the joint purchasing agreement have market power in their selling market(s).

## 8. Commercialisation Agreements<sup>135</sup>

Chapter 6 of the *Guidelines on Horizontal Cooperation Agreements* deals with commercialisation agreements, that is to say cooperation between competitors in the selling, distribution or promotion of their products<sup>136</sup>. Distribution agreements generally are covered by the regime for vertical agreements, including some non-reciprocal agreements entered into between competitors<sup>137</sup>. Where competitors agree on a reciprocal basis to distribute one another's products, horizontal issues arise as well, and they should be analysed in accordance with the *Guidelines*; the same may be true of non-reciprocal agreements<sup>138</sup>. Where joint commercialisation is agreed upon pursuant to some other cooperation, for example on R&D or joint production, the agreement should be analysed under the corresponding chapter of the *Guidelines*<sup>139</sup>.

### (A) The application of Article 101(1) to commercialisation agreements

#### (i) Main competition concerns

The *Guidelines* concern about commercialisation agreements is that they may lead to cartel behaviour: price fixing<sup>140</sup>, output limitation<sup>141</sup>, market division<sup>142</sup> and parallel behaviour through the exchange of strategic information<sup>143</sup>. Further concerns about collusive outcomes are expressed in paragraphs 242 to 245 of the *Guidelines*.

as *Eurovision* OJ [2000] L 151/18, [2000] 5 CMLR 650, annulled on appeal Cases T-185/00 etc *Métropole télévision SA v Commission* [2002] ECR II-3805, [2003] 4 CMLR 707; the Commission decided that Article 101(3) did not apply in the case of *Rennet* OJ [1980] L 51/19, [1980] 2 CMLR 402, upheld on appeal Case 61/80 *Coöperatieve Stremsel-en Kleursel-fabriek v Commission* [1981] ECR 851, [1982] 1 CMLR 240, and *Screensport/EBU Members* OJ [1991] L 63/32, [1992] 5 CMLR 273.

<sup>134</sup> See ch 15 n 133 above.

<sup>135</sup> See further *Faull and Nikpay*, paras 7.252–7.300.

<sup>136</sup> *Guidelines on Horizontal Cooperation Agreements*, para 225.

<sup>137</sup> *Ibid*, para 226; see ch 16, 'Article 2(4): agreements between competing undertakings', pp 658–659 on Article 2(4) of Regulation 330/2010.

<sup>138</sup> *Guidelines*, para 227.

<sup>139</sup> *Ibid*, para 228.

<sup>140</sup> *Ibid*, para 230.

<sup>141</sup> *Ibid*, para 231.

<sup>142</sup> *Ibid*, para 232.

<sup>143</sup> *Ibid*, para 233.

### (ii) Restrictions by object

The commercialisation agreements most likely to give rise to concern under Article 101(1) are those that give rise to price fixing. The *Guidelines* say that joint selling is likely to have as its object the restriction of competition, since it eliminates price competition between the parties on substitute products and may also restrict the total volume of products to be delivered by the parties within the framework of a system for allocating orders<sup>144</sup>. There have been several examples of the Commission finding that joint sales agencies infringed Article 101(1)<sup>145</sup>; in some of these cases the Commission found the conditions of Article 101(3) were fulfilled<sup>146</sup>.

The *Guidelines* also express the concern that reciprocal distribution agreements between undertakings that are active in different geographical markets may be an instrument for market partitioning if they do so in order to eliminate competition between them: such agreements restrict competition by object; while it would be necessary to consider whether a non-reciprocal agreement constitutes the basis for a mutual understanding to avoid entering each other's territory<sup>147</sup>.

### (iii) Restrictions by effect

Paragraph 237 of the *Guidelines* says that a commercialisation agreement would not normally restrict competition if it is objectively necessary to allow one party to enter a market it could not have entered individually; it gives an example of consortia projects in which a number of parties participate, where no one firm could compete for the project individually<sup>148</sup>. Paragraph 240 provides a safe harbour for commercialisation agreements where the parties' market share is below 15 per cent; above that figure an individual assessment would be required.

## (B) The application of Article 101(3) to commercialisation agreements

Paragraphs 246 to 251 discuss Article 101(3). Paragraph 246 says that commercialisation agreements can give rise to significant efficiencies; however price fixing can generally not be justified 'unless it is indispensable for the integration of other marketing functions, and this integration will generate substantial efficiencies'. Any efficiencies must result from the integration of economic activities<sup>149</sup>, and must be clearly demonstrated<sup>150</sup>. Paragraph 250 stresses the need to show that any efficiencies will be passed on to consumers, and says that the greater the parties' market power, the less likely this is to be the case; the paragraph suggests that a pass-on is likely where the parties' market share is less than 15 per cent (although it is questionable in that case whether the agreement would infringe Article 101(1) in the first place).

The Commission has, on a few occasions, concluded that joint selling arrangements satisfied the criteria of Article 101(3). In *Cekanan*<sup>151</sup> the Commission authorised a joint venture that would enable the parties, based in Sweden and Germany, to enter new markets in the EU with new types of packaging. In the case of *UIP*<sup>152</sup> the Commission decided that a joint venture for the distribution and licensing of the films of Paramount,

<sup>144</sup> Ibid, paras 234–235; on joint selling see *Faull and Nikpay*, paras 6.259–6.292.

<sup>145</sup> See eg *Floral* OJ [1980] L 39/51, [1980] 2 CMLR 285; *UIP* OJ [1989] L 226/25, [1990] 4 CMLR 749; *Cekanan* OJ [1990] L 299/64, [1992] 4 CMLR 406; *Ansac* OJ [1991] L 152/54.

<sup>146</sup> See below. <sup>147</sup> *Guidelines on Horizontal Cooperation Agreements*, para 236.

<sup>148</sup> See similarly *ibid*, para 30. <sup>149</sup> *Ibid*, para 247. <sup>150</sup> *Ibid*, para 248.

<sup>151</sup> OJ [1990] L 299/64, [1992] 4 CMLR 406.

<sup>152</sup> OJ [1989] L 226/25, [1990] 4 CMLR 749, renewed by comfort letter OJ [1999] C 205/6, [1999] 5 CMLR 732; see the Commission's XXIXth *Report on Competition Policy* (1999), pp 148–149.

Universal Studios and MGM satisfied Article 101(3). An issue of particular interest in recent years has been the collective selling of broadcasting rights to sporting events<sup>153</sup>. The Commission authorised the rules of UEFA for selling such rights<sup>154</sup>; and it accepted commitments under Article 9 of Regulation 1/2003 in the case of the German Bundesliga and the English Premier League<sup>155</sup>.

## 9. Standardisation Agreements

Chapter 7 of the *Guidelines on Horizontal Cooperation Agreements* deals with standardisation agreements and standard terms. Standardisation agreements have as their primary objective the definition of technical or quality requirements with which current or future products, production processes or methods may comply<sup>156</sup>, including agreements setting out standards on environmental performance<sup>157</sup>. Standard terms are covered by the *Guidelines* to the extent that they establish standard conditions of sale or purchase between competitors and consumers for competing products<sup>158</sup>. The *Guidelines* do not apply to standards set as part of the execution of public powers<sup>159</sup>; nor to professional rules<sup>160</sup>. The *Guidelines* take into account the Commission's practice and case law since the earlier guidelines of 2001<sup>161</sup>, in particular as regards the use of intellectual property rights in standardisation<sup>162</sup>. They also incorporate insights from the best practice of standard-setting organisations and the body of literature that has developed<sup>163</sup>. The

*Guidelines* are considerably more sophisticated than their predecessor. This section will consider the application of Articles 101(1) and 101(3) to standardisation agreements; it will then briefly discuss the position in relation to standard terms.

## (A) The application of Article 101(1) to standardisation agreements<sup>164</sup>

### (i) Main competition concerns

Standardisation agreements may have effects in four markets:

- in the market for the product itself
- in the technology market where the standard involves the selection of technology
- in the service market for the setting of standards, and
- in the market for testing and certification<sup>165</sup>.

Paragraph 263 of the *Guidelines* acknowledges that standardisation agreements ‘usually produce significant positive economic effects’<sup>166</sup>, in particular by promoting innovation and ensuring interoperability. However paragraph 264 notes that standard-setting may harm competition in three ways: a reduction in price competition following anti-competitive discussions; foreclosure of innovative technologies; and the prevention of effective access to the standard. Standards that involve intellectual property rights may in particular lead to foreclosure effects<sup>167</sup>. Each of these negative effects is discussed in the subsequent paragraphs of the *Guidelines*<sup>168</sup>.

### (ii) Restrictions by object

Agreements that use a standard as part of a broader restrictive agreement aimed at excluding actual or potential competitors restrict competition by object<sup>169</sup>. The Commission gives as an example of this its decision in *Pre-insulated Pipe Cartel*<sup>170</sup>, where part of the infringement of Article 101(1) was the use of norms and standards to prevent or delay the introduction of new technology to the market that would have led to price reductions. Agreements to reduce competition by using the disclosure of most restrictive licensing terms prior to the adoption of a standard as a cover for jointly fixing prices are also treated as restrictions by object<sup>171</sup>. Agreements requiring members of a standard-setting

<sup>165</sup> *Ibid*, para 261. <sup>166</sup> *Ibid*, paras 263 and 308.

<sup>167</sup> *Ibid*, paras 267–269; see also *European Telecommunications Standards Institute* OJ [1995] C 76/6, [1995] 5 CMLR 352; Commission’s XXVth *Report on Competition Policy* (1995), pp 131–132 and the cases cited in ch 15 n 161 above.

<sup>168</sup> *Guidelines on Horizontal Cooperation Agreements*, paras 265–268.

<sup>169</sup> *Ibid*, para 273.

<sup>170</sup> OJ [1999] L 24/1, para 147.

<sup>171</sup> *Guidelines on Horizontal Cooperation Agreements*, para 274; note that this does not prevent *ex ante* unilateral disclosure of most restrictive licensing terms, as described in para 299 of the *Guidelines*; nor does it

organisation to sell products only that comply with a standard may, in certain circumstances, restrict competition by object<sup>172</sup>: this is consistent with the Commission's past practice<sup>173</sup>.

### (iii) A (fairly) safe harbour

Paragraphs 277 to 291 of the *Guidelines* are headed 'Agreements normally not restrictive of competition': in other words they produce a safe harbour, although the use of the word 'normally' means that this harbour is fairly safe rather than entirely so. To begin with the *Guidelines* say that standardisation agreements may have the effect of restricting competition only where the parties have market power<sup>174</sup>: however they do not provide a market share threshold for this purpose. The *Guidelines* say that there is no presumption that an undertaking holding or exercising intellectual property rights essential to a standard has market power<sup>175</sup>. Where there is effective competition between several voluntary standards, standardisation agreements do not restrict competition<sup>176</sup>.

Paragraphs 280 to 286 of the *Guidelines* set out four principles, and state that standard-setting agreements that comply with them normally fall outside Article 101(1). The principles are that<sup>177</sup>:

- participation in the standard-setting is unrestricted
- the procedure for adopting the standard is transparent
- there is no obligation to comply with the standard
- there is effective access to the standard on fair, reasonable and non-discriminatory ('FRAND') terms.

These four principles are consistent with the General Court's judgment in *EMC v Commission*<sup>178</sup> where it held that the adoption of a non-binding standard following an open, non-discriminatory and transparent procedure does not restrict competition<sup>179</sup>. In cases involving intellectual property rights, effective access to the standard involves good faith disclosure of rights that might be essential for its implementation and a commitment to license on FRAND terms<sup>180</sup>. The *Guidelines* provide guidance on methods to assess the level of FRAND in the event of a dispute<sup>181</sup>, but there is clearly a limit to how far one can define inherently imprecise words. This may explain why agreements may instead provide for disclosure of the most restrictive terms that firms would charge if their technology were incorporated in a standard: the *Guidelines* say that 'unilateral ex ante disclosures' of this kind do not restrict competition<sup>182</sup>.

prevent the creation of patent pools that comply with the principles in the Commission's *Technology Transfer Guidelines* OJ [2004] C 101/2; for discussion of patent pools see ch 19, 'Technology pools', pp 791–794.

<sup>172</sup> *Guidelines on Horizontal Cooperation Agreements*, para 293.

<sup>173</sup> See eg *Video Cassette Recorders* OJ [1977] L 47/42, para 23.

<sup>174</sup> *Guidelines on Horizontal Cooperation Agreements*, para 277. <sup>175</sup> *Ibid*, para 277.

<sup>176</sup> *Ibid*, para 277.

<sup>177</sup> *Ibid*, paras 280–283.

<sup>178</sup> Case T-432/05 *EMC Development v Commission* [2010] ECR II-000, [2010] 5 CMLR 757, upheld on appeal to the Court of Justice Case C-367/10 P, order of 31 March 2011.

<sup>179</sup> *Ibid*, paras 79–104 and 113–130.

<sup>180</sup> *Guidelines on Horizontal Cooperation Agreements*, paras 284–286; see also Commission MEMO/09/549, 10 December 2009 on ICom agreeing to take over Robert Bosch GmbH's commitment to grant irrevocable patent licences on FRAND terms following its acquisition of Bosch's mobile telephony patent portfolio.

<sup>181</sup> *Guidelines on Horizontal Cooperation Agreements*, para 299. <sup>182</sup> *Ibid*, para 299.

#### (iv) Restrictions by effect

Paragraph 279 of the *Guidelines* says that there is no presumption that, where the four principles are not satisfied, an agreement infringes Article 101(1) or that it will fail to satisfy Article 101(3). Rather an effects-based assessment will be required, as set out in paragraphs 292 to 299. A standardisation agreement that departs from the principles may be caught by Article 101(1) where the members of a standard-setting organisation are not free to develop alternative standards or products<sup>183</sup>, or where access to a standard or to the standard-setting process is limited<sup>184</sup>. In *Ship Classification*<sup>185</sup> the Commission was concerned that the rules of the International Association of Classification Societies foreclosed third parties; the case was closed on the parties giving commitments under Article 9 of Regulation 1/2003<sup>186</sup> that ensured access to a standard-setting body and its information.

The market shares of the goods or services based on the standard are also relevant to the application of Article 101(1), although the *Guidelines* acknowledge that a high market share will not necessarily lead to a competition problem<sup>187</sup>. A standard-setting agreement that clearly discriminates against any of the participating or potential members could lead to a restriction of competition<sup>188</sup>.

### (B) The application of Article 101(3) to standardisation agreements

The Commission states at paragraph 308 that standardisation agreements frequently give rise to significant efficiency gains. Different standards have different beneficial effects: EU-wide standards facilitate market integration; compatibility standards promote technical interoperability between complementary products; while standards on quality, safety and environmental aspects of a product facilitate customer choice. Standards may also reduce transaction costs and promote innovation. For the benefits of standardisation agreements to be realised, the necessary information to apply the standard must be available to those wishing to enter the market<sup>189</sup>. All competitors in the markets affected should have the possibility of being involved in discussions on the standards, unless it can be shown that this would give rise to significant inefficiencies or unless there are recognised procedures for the collective representation of interests, as happens in the case of standards bodies<sup>190</sup>. Standards that are binding on an industry are in principle not indispensable<sup>191</sup>. Standards that facilitate interoperability or encourage competition between new and existing products are presumed to benefit consumers<sup>192</sup>. Where the result of a standardisation agreement is the establishment of a *de facto* industry standard, foreclosure of third parties must be avoided<sup>193</sup>.

<sup>183</sup> Ibid, para 293.      <sup>184</sup> Ibid, paras 294 and 295.

<sup>185</sup> Commission decision of 14 October 2009; see Dohms and Rieder 'Commitment Decision in the Ship Classification Case: Paving the way for more competition' (2010) 1 *Competition Policy Newsletter*, p 41.

<sup>186</sup> On commitments decisions under Article 9 see ch 7, 'Article 9: commitments', pp 255–261.

<sup>187</sup> *Guidelines on Horizontal Cooperation Agreements*, para 296.      <sup>188</sup> Ibid, para 297.

<sup>189</sup> Ibid, para 309.

<sup>190</sup> Ibid, para 316.

<sup>191</sup> Ibid, para 318.

<sup>192</sup> Ibid, para 321.

<sup>193</sup> Ibid, para 324; see eg *Canon/Kodak* Commission's XXVIIIth Report on Competition Policy (1998), p 147.

**(C) The application of Article 101(1) to standard terms**<sup>194</sup>

Standard terms may have three negative effects on the downstream market where the undertakings using the terms compete by selling their products to consumers<sup>195</sup>: a limitation of choice and innovation in cases where the standard terms define the scope of the product sold; a distortion in the conditions of sale; and, where standard terms become industry practice, foreclosure of access to the market<sup>196</sup>.

**(i) Restrictions by object**

Standard terms may have the object of restricting competition where they are really a disguised cartel or contain provisions that directly affect price<sup>197</sup>.

**(ii) Restrictions by effect**

Effectively accessible and non-binding standard terms for the sale of consumer goods or services generally do not restrict competition<sup>198</sup>. Paragraphs 303 to 305 of the *Guidelines* describe two situations in which a more detailed assessment of such terms is required. The first is where the widespread use of standard terms that define the scope of the product limits product variety and innovation. The second is where the standard terms are a decisive part of the transaction with the customer. Individual assessment is most likely to be necessary where the standard terms are binding<sup>199</sup>.

**(D) The application of Article 101(3) to standard terms**

Possible improvements in efficiency attributable to standard terms are considered at paragraphs 312 to 313: in particular standard terms can facilitate switching by making it easier to compare products. However, the use of binding standard terms is unlikely to be indispensable<sup>200</sup>. Paragraphs 322 to 323 consider the extent to which standard terms yield a fair share of any benefits to consumers.

**(E) Article 102 and standards**

The Commission may proceed under Article 102 where it believes that a dominant firm may be guilty of abusing a standard-setting procedure, for example through 'patent ambush'<sup>201</sup>.

**10. Other Cases of Permissible Horizontal Cooperation**

As the General Court stated in *Matra Hachette v Commission*<sup>202</sup>, there is no type of agreement which, by its nature, is incapable of satisfying the criteria of Article 101(3). For

<sup>194</sup> See *Guidelines on Horizontal Cooperation Agreements*, paras 333–335 for examples of the Commission's approach to the application of Article 101 to standard terms.

<sup>195</sup> *Ibid*, para 262.

<sup>196</sup> *Ibid*, paras 270–272.

<sup>197</sup> *Ibid*, paras 275–276; for examples of agreements relating to terms and conditions condemned by the European Commission under Article 101(1) see ch 13, 'Agreements Relating to Terms and Conditions', pp 538–539.

<sup>198</sup> *Guidelines on Horizontal Cooperation Agreements*, paras 301–302.

<sup>199</sup> *Ibid*, para 306. <sup>200</sup> *Ibid*, para 320.

<sup>201</sup> See ch 19, 'Vexatious behaviour and abuse of process', pp 805–806.

<sup>202</sup> Case T-17/93 [1994] ECR II-595.

example in the case of *REIMS II*<sup>203</sup> the Commission considered that Article 101(3) was applicable to a price-fixing agreement ‘with unusual characteristics’ in the postal services sector. The fact that a horizontal cooperation agreement does not fit into one of the categories discussed in the *Guidelines* does not mean that it falls within Article 101(1) or cannot satisfy the terms of Article 101(3). In each case, the question is whether the parties can demonstrate either that there is no restriction of competition or that the agreement will bring about efficiencies of the type envisaged in Article 101(3).

### (A) Restructuring agreements

There may be circumstances in which an industry faces severe problems – perhaps because of recession or because of over-capacity within it – where the competition authorities may be prepared to countenance some degree of cooperation to overcome this. As a general proposition, each operator on the market should make its own independent decision as to what and how much to produce. However making rational decisions about how to ‘slim down’ production in some economic sectors, perhaps where capital investment is high or where there is extensive vertical integration, may be difficult in the absence of an intelligent understanding of what competitors are going to do. There is a danger that each competitor may slim down so much that the market goes from a position of over-capacity to under-capacity; it may be difficult to put the process into reverse. A different consideration is that the restructuring of industry has a social cost involving loss of employment and harm to the fabric of local communities; there is therefore a political component as well as an economic one to this issue<sup>204</sup>.

Restructuring agreements, whereby undertakings agree on their respective levels of output, are likely to infringe Article 101(1): output limitation has as its object the restriction of competition<sup>205</sup>. In *The Competition Authority v Beef Industry Development Society Ltd*<sup>206</sup> the Court of Justice had no doubt that an agreement between processors of beef in Ireland to reduce their beef-processing capacity there – those that would remain in the market would pay those that would leave it to do so – had as its object the restriction of competition: any arguments that the agreement would lead to economic efficiencies were required to be raised under Article 101(3)<sup>207</sup>. The matter was referred back to the Irish High Court, but no decision was ever reached on the application of Article 101(3) as the BIDS withdrew its defence<sup>208</sup>; it is known that the Commission wrote an amicus curiae brief in this case under Article 15(3) of Regulation 1/2003, but unfortunately it has not entered the public domain. Insights into the Commission’s thinking can be found in its contribution to the OECD’s Global Forum on Competition in February 2011, available at [www.oecd.org](http://www.oecd.org).

The fact that an industry faces a crisis does not mean that undertakings can enter into agreements that restrict competition and claim immunity from Article 101(1); the fact that an industry is in crisis may help to mitigate a fine<sup>209</sup>. However where a restructuring agreement is entered into pursuant to state aid authorised by the Commission, it may not

<sup>203</sup> OJ [1999] L 275/17, [2000] 4 CMLR 704; the Commission extended the application of Article 101(3) to this agreement until 2006: OJ [2003] C 94/3, [2003] 4 CMLR 1176; see also Commission Press Release IP/03/557, 23 April 2003.

<sup>204</sup> See ch 4, ‘The Article 101(3) Criteria’, pp 155–166 for a discussion of the issues which can legitimately be taken into account under Article 101(3).

<sup>205</sup> See ch 3, ‘Market sharing, quotas, collective exclusive dealing’, pp 122–123.

<sup>206</sup> Case C-209/07 [2008] ECR I-8637, [2009] 4 CMLR 310. <sup>207</sup> *Ibid*, paras 39–40.

<sup>208</sup> See Press Release by the Irish Competition Authority of 25 January 2011, available at [www.tca.ie](http://www.tca.ie).

<sup>209</sup> See eg Case T-145/89 *Baustahlgewebe v Commission* [1995] ECR II-987, para 122.

infringe Article 101(1) where it is so indissolubly linked to the purpose of the aid that it cannot be separately evaluated<sup>210</sup>.

The Commission has on a few occasions allowed restructuring agreements under Article 101(3). It first did so in 1984, having indicated in its Annual Reports that it might be inclined to do so<sup>211</sup>. In *Synthetic Fibres*<sup>212</sup> the Commission permitted an agreement which was to last for three years and which would involve the closure of 18 per cent of production capacity. The parties agreed to supply information to each other about their reductions of capacity, to consult one another in the event of important changes in the market, not to increase capacity and to compensate each other if they failed to implement the reductions. The Commission held that this agreement would lead to improved production which would be slimmed down in a socially acceptable way; consumers would get a fair share of the resulting benefit as in due course they would be able to purchase from a healthier industry.

The Commission has permitted several restructuring agreements in the petrochemical and thermoplastics sectors. In *BPCL/ICI*<sup>213</sup> it allowed an agreement achieved by specialisation and the reciprocal sale of plant, assets and goodwill. A similar 'swap' deal was granted exemption in *ENI/Montedison*<sup>214</sup> and again in *Enichem/ICI*<sup>215</sup>. The decision in *BPCL/ICI* was followed by *Bayer/BP Chemicals*<sup>216</sup> in the same sector. Formal comfort letters were sent by the Commission in *Shell/AKZO*<sup>217</sup> and *EMC/DSM (LVM)*<sup>218</sup>. In *Stichting Baksteen*<sup>219</sup> the Commission granted individual exemption to plans for restructuring the Dutch brick industry, which involved agreed action to close plants and to cut capacity.

## (B) Insurance sector<sup>220</sup>

In the insurance sector the Commission has authorised a number of horizontal cooperation agreements, for example in *Nuovo CEGAM*<sup>221</sup>, *Concordato Incendio*<sup>222</sup>, *Teko*<sup>223</sup>, *P & I Clubs*<sup>224</sup>, *Assurpool*<sup>225</sup> and again in *P & I Clubs*<sup>226</sup>.

Council Regulation 1534/91 granted to the Commission the power to adopt a block exemption in the insurance sector<sup>227</sup>; in March 2010 the Commission adopted Regulation 267/2010<sup>228</sup>, which replaced Regulation 358/2003 and which is narrower in scope<sup>229</sup>. The new block exemption should be read in conjunction with the Commission's *Communication on the application of Article 101(3) of the TFEU to certain categories of agreements, decisions*

<sup>210</sup> Case T-197/97 *Weyl Beef Products v Commission* [2001] ECR II-303, [2001] 2 CMLR 459, para 83.

<sup>225</sup> OJ [1992] L 37/16, [1993] 4 CMLR 338.

<sup>226</sup> OJ [1999] L 125/12, [1999] 4 CMLR 646; some other cases have been settled informally: see eg Commission's XXVth *Report on Competition Policy* (1996), pp 131–132; XXVIIIth *Report on Competition Policy* (1998), points 111–115.

<sup>227</sup> OJ [1991] L 143/1.

<sup>228</sup> OJ [2010] L 83/1; see McCarthy and Stefanescu 'The New Block Exemption for the Insurance Sector' (2010) 2 *Competition Policy Newsletter* 6.

<sup>229</sup> OJ [2003] L 53/8.

and concerted practices in the insurance sector<sup>230</sup>. The *Communication* explains that some types of agreement – on standard policy conditions and security devices – that were block exempted under the previous Regulation are not covered by the new one since they are not specific to the insurance sector, and so should be the subject of self-assessment<sup>231</sup>; however the *Communication* specifically points out that agreements on standards would be addressed in the Commission's *Guidelines on Horizontal Cooperation Agreements*, which it subsequently adopted<sup>232</sup>.

Regulation 267/2010 grants block exemption to two categories of agreements.

### (i) Joint compilations, tables and studies

Article 2 of Regulation 267/2010, which entered into force on 1 April 2010, grants block exemption to agreements in the insurance sector with respect to:

- the joint compilation and distribution of information necessary for the following purposes:
  - calculation of the average cost of covering a specified risk in the past
  - construction of mortality tables, and tables showing the frequency of illness, accident and invalidity in connection with insurance involving an element of capitalisation
- the joint carrying-out of studies on the probable impact of general circumstances external to the interested undertakings, either on the frequency or scale of future claims for a given risk or risk category or on the profitability of different types of investment, and the distribution of the results of such studies.

Article 3 of Regulation 267/2010 sets out a series of conditions that must be satisfied for the block exemption in Article 2 to apply. Article 4 of the Regulation deals with agreements that are not covered by the block exemption.

### (ii) Common coverage of certain types of risks

Article 5 of Regulation 267/2010 grants block exemption to agreements in the insurance sector with respect to the setting-up and operation of pools of insurance undertakings or reinsurance undertakings for the common coverage of a specific category of risks in the form of co-insurance or co-reinsurance. Article 6 of the Regulation contains market share thresholds for its application.

Regulation 267/2010 will expire on 31 March 2017<sup>233</sup>.

## (C) Banking sector<sup>234</sup>

The Commission has dealt with many horizontal cooperation agreements in the banking sector. Such agreements might be found not to affect trade between Member States, as the Court of Justice concluded in *Bagnasco*<sup>235</sup> and the Commission in *Dutch Banks*<sup>236</sup>. The Commission has published a *Notice on Cross-border Credit Transfers*<sup>237</sup> on the extent

<sup>230</sup> OJ [2010] C 82/20.

<sup>231</sup> *Communication*, paras 19–28.

<sup>232</sup> See 'The Commission's *Guidelines on Horizontal Cooperation Agreements*', pp 588–591 above.

<sup>233</sup> Regulation 267/2010, Article 9.

<sup>234</sup> Commission Press Release IP/08/596, 17 April 2008. See *Faull and Nikpay*, paras 11.09–11.64.

<sup>235</sup> Cases C-215 and 216/96 [1999] ECR I-135, [1999] 4 CMLR 624.

<sup>236</sup> OJ [1999] L 271/28, [2000] 4 CMLR 137.

<sup>237</sup> OJ [1995] C 251/3; see Commission's XXVth *Report on Competition Policy* (1995), points 45–48; XVIth *Report on Competition Policy* (1996), point 109 and pp 128–130.

to which cooperation between banks is permissible under the competition rules in order to improve cross-border credit transfers. In its decision in *Uniform Eurocheques*<sup>238</sup> the Commission permitted an agreement which fixed standard terms and conditions in relation to the cashing of Eurocheques. The Commission also permitted a second agreement relating to the production and finishing of the actual Eurocheques and cheque cards<sup>239</sup>. A cooperation agreement was authorised for ten years in *Banque Nationale de Paris/Dresdner Bank*<sup>240</sup> between two major banks operating in neighbouring Member States.

The Commission decided in *Visa International – Multilateral Interchange Fee* that Visa International's 'multilateral interchange fee' ('MIF') agreed upon between banks participating within the Visa system satisfied the criteria of Article 101(3)<sup>241</sup>; subsequently the Commission accepted commitments from Visa under Article 9 of Regulation 1/2003 as to the future level of the MIF for its debit cards<sup>242</sup>. In *MasterCard*<sup>243</sup>, a decision taken in December 2007, the Commission concluded that the MasterCard's MIF infringed Article 10(1) and did not satisfy Article 101(3); that decision is on appeal to the General Court<sup>244</sup>; it is possible that the Commission will accept Article 9 commitments from MasterCard as to the future level of its MIF<sup>245</sup>.

## (D) Transport

Several horizontal cooperation agreements have been allowed in the transport sector. Some of these are discussed in chapter 23<sup>246</sup>.

# 11. The Application of the Chapter I Prohibition in the UK Competition Act 1998 to Horizontal Cooperation Agreements

## (A) Introduction

The general principles involved in the application of the Chapter I prohibition in the Competition Act 1998 have been described in chapter 9<sup>247</sup>; the procedural aspects of Chapter I were dealt with in chapter 10<sup>248</sup>. Agreements that benefit from block exemption under EU law, or that would do so if they were to affect trade between Member States, enjoy parallel exemption under UK law; it follows, for example, that research and development agreements, horizontal technology transfer agreements, and specialisation agreements might benefit from this facility<sup>249</sup>.

<sup>238</sup> OJ [1985] L 35/43, [1985] 3 CMLR 434.

<sup>239</sup> OJ [1989] L 36/16; most of this agreement was cleared under Article 101(1) rather than exempted under Article 101(3); for other exemptions on banking see *Belgian Banks* OJ [1986] L 7/27, [1989] 4 CMLR 141; *Associazione Bancaria Italiana* OJ [1986] L 43/51, [1989] 4 CMLR 238.

<sup>240</sup> OJ [1996] L 188/37, [1996] 5 CMLR 582; Commission's XXVth *Report on Competition Policy* (1996), point 108.

<sup>241</sup> OJ [2002] L 318/17.

<sup>242</sup> Commission decision of 8 December 2010; the commitments do not cover Visa Europe's MIFs for consumer credit and deferred debit card transactions, which remain under investigation by the Commission; on commitments decisions under Article 9 see ch 7, 'Article 9: Commitments', pp 255–261.

<sup>243</sup> Commission decision of 19 December 2007.

<sup>244</sup> Case T-111/08 *MasterCard Inc v Commission*, not yet decided.

<sup>245</sup> For the latest position in this case see Commission Press Release IP/09/515, 1 April 2009 and Commission MEMO/09/143, 1 April 2009.

<sup>246</sup> See ch 23, 'Transport', pp 967–977.

<sup>247</sup> See ch 9, 'The Chapter I Prohibition', pp 333–360.

<sup>248</sup> See ch 10 generally.

<sup>249</sup> Competition Act 1998, s 10; on parallel exemptions see ch 9, 'Parallel exemptions', pp 359–360.

## (B) Decisions under the Competition Act

There have been few decisions and little case law on horizontal cooperation agreements in the UK since the Competition Act entered into force. The Office of Fair Trading (‘the OFT’) has examined – and in some cases authorised – horizontal cooperation agreements in a few cases, such as *LINK Interchange Network Ltd*<sup>250</sup>, *Memorandum of Understanding on the Supply of Oil Fuels in an Emergency*<sup>251</sup> and *Pool Reinsurance Company Ltd*<sup>252</sup>. They have already been discussed in chapter 9, in the context of the exemption criteria in section 9 of the Competition Act, and the reader is referred to those pages<sup>253</sup>. The OFT issued its first ‘Short-form Opinion’ in the case of *Makro-Self Service/Palmer & Harvey* on a joint purchasing agreement indicating that, following some modifications to prevent inappropriate exchanges of information, the agreement would be unlikely to raise competition concerns<sup>254</sup>. In *Sel-Imperial v British Standards Institution*<sup>255</sup> an application to strike out a claim alleging breach of EU and UK competition law in relation to the application of a standard for car parts was partially rejected<sup>256</sup>.

## (C) Block exemption for ticketing agreements

The Secretary of State has adopted a block exemption for public transport ticketing schemes: it is discussed in chapter 9<sup>257</sup>.

<sup>250</sup> OFT decision of 16 October 2001 [2002] UKCLR 59.

<sup>251</sup> OFT decision of 25 October 2001 [2002] UKCLR 74.

<sup>252</sup> OFT decision of 15 April 2004 [2004] UKCLR 893.

<sup>253</sup> See ch 9, ‘Exemption criteria’, pp 357–359.

<sup>254</sup> Opinion of 27 April 2010, available at [www.offt.gov.uk](http://www.offt.gov.uk).

<sup>255</sup> [2010] EWHC 854, [2010] UKCLR 493.

<sup>256</sup> *Ibid*, paras 23–35 and 42–46 (referring in para 33 to the Commission’s 2001 *Guidelines*); a settlement was subsequently reached so that case did not go to trial.

<sup>257</sup> See ch 9, ‘Block exemptions’, p 359.

## Vertical agreements<sup>1</sup>

1. Introduction	617	8. The Application of Article 101(3) to Agreements that do not Satisfy the Block Exemption	672
2. The Distribution Chain	618	9. Regulation 461/2010 on Motor Vehicle Distribution	674
3. Vertical Integration	619	10. Sub-Contracting Agreements	676
4. Commercial Agents	621	11. UK Law	677
5. Vertical Agreements: Competition Policy Considerations	623		
6. Vertical Agreements: Article 101(1)	628		
7. Vertical Agreements: Regulation 330/2010	649		

### 1. Introduction

The previous three chapters have been concerned with horizontal relationships between undertakings. This chapter deals with the application of Article 101 TFEU and Chapter I of the Competition Act 1998 to vertical agreements, and assumes a knowledge of the contents of chapters 3, 4 and 9. The chapter begins with a brief description of the distribution chain, and then contains sections on how the law applies to vertical integration and to agency agreements. Section 5 discusses the competition policy considerations raised by vertical agreements. Section 6 explains the application of Article 101 to various vertical agreements in the light of the case law of the EU Courts and the position of the Commission in its *Guidelines on Vertical Restraints*<sup>2</sup> ('the *Vertical guidelines*' or 'the *Guidelines*'). This will be followed by a section on the provisions of Regulation 330/2010, the block exemption for vertical agreements. Section 8 deals with the application of Article 101(3) to vertical agreements. The chapter then contains sections on Regulation 461/2010 on motor vehicle distribution and on sub-contracting agreements. Section 11 will look at the position in UK law. To the extent that vertical agreements might result in the abuse of a dominant position, contrary to Article 102 TFEU and the Chapter II prohibition in the Competition Act 1998, they are dealt with in chapters 17 and 18.

<sup>1</sup> For further reading on Article 101 and vertical agreements see Faull and Nikpay *The EC Law of Competition* (Oxford University Press, 2nd ed, 2007), ch 9; Bellamy and Child *European Community Law of Competition* (Oxford University Press, 6th ed, 2008, eds Roth and Rose), ch 6; Wijckmans and Tuytschaever *Vertical Agreements in EU Competition Law* (Oxford University Press, 2nd ed, 2011); Goyder *EU Distribution Law* (Hart Publishing, 5th ed, 2011).

<sup>2</sup> OJ [2010] C 130/1, replacing earlier guidelines of 2000, OJ [2000] C 291/1; the *Guidelines* are without prejudice to the case law of the EU Courts: *ibid*, para 4.

## 2. The Distribution Chain

A producer of goods or a supplier of services will either require them for its own consumption or will want to supply them to the market. A firm wishing to sell its products must decide how to do so. There are various possibilities: it may carry out both the production and the sales and distribution functions itself: this is often referred to as vertical integration; it may use the services of a commercial agent to find customers; or it may supply its products to an independent distributor whose function is to resell them to other persons, who may or may not be the final consumer.

For many products it is possible to depict a fairly simple distribution chain: for example a producer may sell goods to a retailer, who deals with the final consumer:

Fig.16.1

In other markets a wholesaler may carry out an important intermediate function, standing between the producer and the retailer:

Fig.16.2

A vertically-integrated producer might deal directly with the consumer, for example by mail order, by establishing its own retail outlets or by selling through the Internet. An example of vertical integration is Apple supplying music from its 'iTunes' music website direct to the consumer<sup>3</sup>:

<sup>3</sup> See 'Vertical Integration', pp 619–620 below.

Fig.16.3

There can, of course, be many other configurations, in which quite different relationships are involved in the delivery of goods or services to their final consumer. For example a brand owner in the food industry might sub-contract manufacture to a sub-contractor; the brand owner may then negotiate sales directly with supermarkets, and engage a transport company to arrange for the physical distribution of the products from the sub-contractor to the supermarket, in which case the diagram would look quite different:

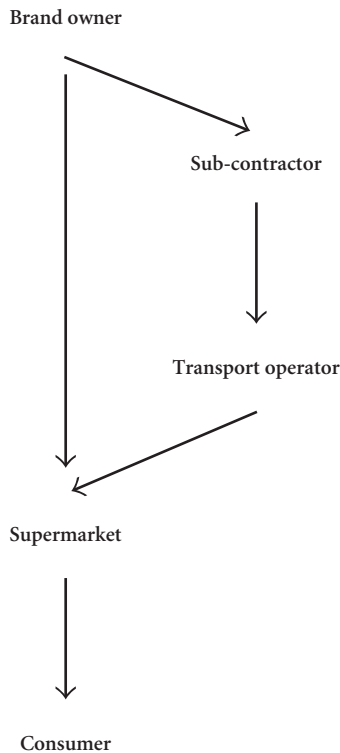

Fig.16.4

It will be appreciated that many other vertical relationships are possible in the manufacture and supply of goods and services. The following sections of this chapter will provide some guidance on how competition law impacts upon each of these vertical relationships.

### 3. Vertical Integration

One option available for firms is vertical integration. This can be achieved internally by setting up retail outlets or by establishing subsidiary companies to which the task of distribution is entrusted. Some firms may be able to sell their products through the Internet, thereby

eliminating the need to appoint distributors: this process is known as disintermediation. Alternatively vertical integration may be achieved through external growth, by taking over distribution networks downstream in the market. Various considerations will influence a producer in its decision whether or not to integrate vertically<sup>4</sup>. On the one hand it may be costly to set up or take over one's own distribution channels; also it may be more efficient to appoint another undertaking with knowledge of and expertise in the distributive trade than to attempt to break into this area oneself. On the other hand vertical integration may mean that a high degree of efficiency and coordination can be achieved in a way that would not occur where products are distributed by third parties.

### **(A) Non-application of Article 101 to agreements within a single economic entity**

One reason for achieving vertical integration might be that this will result in some immunity from Article 101. The Court of Justice confirmed in *Viho v Commission*<sup>5</sup> that Article 101(1) does not apply to parent–subsidiary agreements: this means that an intra-group agreement forbidding a subsidiary from exporting or selling below a minimum price would not infringe Article 101(1)<sup>6</sup>. Vertical growth may not be the most efficient use of resources in terms of allocative efficiency and yet it may be the logical defensive response of firms fearful of transgressing Article 101<sup>7</sup>. Agreements entered into between members of the group and third parties are subject to Article 101 in the same way as any other.

### **(B) Application of Article 102 to firms within the same corporate group**

Vertical integration may be relevant for the purpose of deciding whether an undertaking holds a dominant position within the meaning of Article 102<sup>8</sup>, and the group may be guilty of an abuse of a dominant position in the way in which it behaves on the market<sup>9</sup>.

### **(C) Application of the EU Merger Regulation to vertical integration**

Vertical mergers are notifiable to the Commission under the EU Merger Regulation where the Community dimension thresholds are satisfied<sup>10</sup>. As a general proposition vertical integration is likely to increase economic efficiency, a fact that is explicitly recognised in the Commission's *Guidelines on the assessment non-horizontal mergers*<sup>11</sup>. However there have been occasions on which the Commission has required modifications to, or even the abandonment of, vertical mergers<sup>12</sup>. An obvious example of this is *Time-Warner/AOL*<sup>13</sup>, which required the approval of the Commission: this was granted subject to a severance of the structural links between AOL and Bertelsmann, a competitor of Time-Warner.

<sup>10</sup> See ch 21, 'Article 1: concentrations having a Community dimension', pp 839–844 on these turnover thresholds.

<sup>11</sup> See ch 21, 'Non-horizontal mergers', pp 876–880.

<sup>12</sup> See ch 21, 'Recent cases on non-horizontal mergers', pp 879–880.

<sup>13</sup> Case COMP/M 1845 OJ [2001] L 268/28, [2002] 4 *CMLR* 454.

## 4. Commercial Agents

Some producers choose to sell through commercial agents. The function of a sales agent is to negotiate business and to enter into contracts on the producer's behalf<sup>14</sup>. In this case the agent may be paid a commission for the business it transacts or it may be paid a salary. The essential point about its position is that it does not bear any risk itself; no property passes to it under the agreement; and it does not directly share in the profits (or losses) of its principal's business. The agent's position is analogous to that of an employee.

### (A) Non-application of Article 101 to agency agreements

Where an agent is appointed which simply negotiates on behalf of a principal it is treated by EU competition law as forming part of the business organisation of the principal, so that the agreement between the parties is an internal matter of that economic entity rather than an agreement between undertakings. The consequence is that the agreement will normally fall outside Article 101(1). Commercial agency is a more common feature of distribution in continental Europe than in the UK. The Council of the European Union has adopted a Directive on the treatment of commercial agents<sup>15</sup>, which provides them with protection against wrongful dismissal and with compensation where this occurs.

### (B) The application of the Commission's *Vertical guidelines* to agency agreements

As early as 1962 the Commission published a Notice on agency agreements<sup>16</sup> stating that they were not subject to Article 101(1). It became necessary to amend this Notice, in particular since subsequent case law of the Court of Justice, for example in *Suiker Unie v Commission*<sup>17</sup> and *Vlaamse Reisbureaus*<sup>18</sup>, made clear that it was not entirely reliable. The successor to the 1962 Notice is now Section II (paragraphs 12 to 21) of the Commission's *Vertical guidelines*<sup>19</sup>. The *Vertical guidelines* draw on the decisional practice of the Commission and the jurisprudence of the EU Courts, in particular *DaimlerChrysler v Commission*<sup>20</sup> and *Confederación Española de Empresarios de Estaciones de Servicio v Compañía de Petróleos*<sup>21</sup>.

Paragraph 12 of the *Vertical guidelines* defines agency agreements as those that cover a situation where one person negotiates and/or concludes contracts on behalf of another for the purchase or sale of goods or services, by or from the principal<sup>22</sup>. Paragraph 13 provides that the determining factor in assessing whether Article 101(1) is applicable is 'the financial or

<sup>14</sup> Agents are sometimes appointed simply to canvass potential customers or to introduce them to the producer rather than to negotiate contracts.

<sup>15</sup> Council Directive on the Coordination of the Laws of Member States relating to Self-Employed Commercial Agents 86/653, OJ [1986] L 382/17; the Directive was implemented in the UK by the Commercial Agents (Council Directive) Regulations 1993, SI 1993/3053, as amended by SI 1993/3173.

<sup>16</sup> Notice on exclusive dealing contracts with commercial agents [1962] OJ 139/2921.

<sup>17</sup> Cases 40/73 etc [1975] ECR 1663, [1976] 1 CMLR 295.

<sup>18</sup> Case 311/85 *Vereniging van Vlaamse Reisbureaus v Sociale Dienst van de Plaatselijke en Gewestelijke Overheidsdiensten* [1987] ECR 3801, [1989] 4 CMLR 213.

<sup>19</sup> OJ [2010] C 130/1, replacing the previous Guidelines OJ [2000] C 291/1, paras 12–20.

<sup>20</sup> Case T-325/01 [2005] ECR II-3319, [2007] 4 CMLR 559; the General Court upheld a finding of agency in Case T-66/99 *Minoan Lines v Commission* [2003] ECR II-5515, [2005] 5 CMLR 1597, paras 121–130.

<sup>21</sup> Case C-217/05 [2006] ECR I-11997, [2007] 4 CMLR 181.

<sup>22</sup> The *Vertical guidelines* do not use the language of 'genuine agency agreements' and 'non genuine agent agreements' which had been used in their predecessor: see OJ [2000] C 291/1, para 13.

commercial risk borne by the agent in relation to the activities for which it has been appointed as an agent by the principal'; paragraph 13 states that it is immaterial whether the agent acts for one or several principals, a view that is difficult to reconcile with the judgment of the Court of Justice in *Vlaamse Reisbureaus*<sup>23</sup>; the parties' views and the position under domestic commercial law are similarly irrelevant. Paragraphs 14 to 17 examine the meaning of risk for this purpose. Paragraphs 18 to 21 consider the application of Article 101(1) to agency agreements.

### (i) The criterion of risk

#### (A) Paragraphs 14 to 17 of the Vertical guidelines

Paragraph 14 states that there are three types of financial or commercial risk that are material to the definition of an agency agreement: first, 'contract-specific risks' that are directly related to the contracts concluded and/or negotiated by the agent on behalf of the principal, such as the financing of stocks; secondly, those risks that are related to 'market-specific investments', meaning risks that the agent undertakes in order to be appointed; thirdly, those risks that are related to other activities that the principal requires the agent to perform on the same product market, such as risks relating to after-sales or repair services<sup>24</sup>. Paragraph 15 states that, where the agent bears no or only insignificant risks in relation to these matters, the agency agreement falls outside Article 101(1): in such a case the selling or purchasing function forms an integral part of the principal's activities, despite the fact that the agent is a separate legal entity. Paragraph 15 states that it is immaterial whether the agent bears risks that are related to the activity of providing agency services in general, such as the risk of the agent's income being dependent upon its success as an agent.

Paragraph 16 provides that an agency agreement exists and Article 101(1) would not normally be applicable where the title to the goods does not vest in the agent; nor where the agent does not supply services itself and where the agent does not:

- contribute to the costs relating to the supply/purchase of the contract goods or services, including the cost of transport
- maintain at its own cost or risk stocks of the contracts goods
- undertake responsibility towards third parties for damage caused by the products sold
- take responsibility for customers' non-performance of the contract
- have to invest in sales promotion
- make market-specific investments in equipment, premises or training of personnel
- undertake other activities within the same product market required by the principal, unless these activities are fully reimbursed by the principal.

Paragraph 17 provides that the list in paragraph 16 is not exhaustive and that, where the agent does incur one or more of the costs or risks listed, Article 101(1) may apply as it would do to any other vertical agreement. Paragraph 17 states that the question of risk must be assessed on a case-by-case basis and with regard to economic reality rather than legal form. The Commission explains that, for practical reasons, the analysis may start

<sup>23</sup> See ch 16 n 18 above; on this point see Korah and O'Sullivan *Distribution Agreements under the EC Competition Rules* (Hart Publishing, 2002), pp 101–103.

<sup>24</sup> See eg Case T-325/01 *DaimlerChrysler AG v Commission* [2005] ECR II-3319, [2007] 4 CMLR 559, paras 110–111; the General Court held that the obligations imposed on German dealers of Mercedes-Benz cars to provide after-sales servicing and to acquire and stock spare parts did not give rise to 'meaningful economic risks'.

with the assessment of the contract-specific risks since, if they are incurred by the agent, it will be sufficient to conclude that the agent is an independent distributor.

## (ii) Application of Article 101(1) to agency agreements

Paragraph 18 of the *Vertical guidelines* provides that, where an agency agreement does not fall within Article 101(1), all obligations on the agent will fall outside that provision, including limitations on the territory in which or the customers to which the agent may sell the goods or services and the prices and conditions at which the goods or services will be sold or purchased. The *Guidelines* indicate, in paragraphs 19 and 20, two situations in which there could be an infringement of Article 101(1) in the case of an agency agreement. The first is where there are exclusivity provisions: either that the principal will not appoint other agents or that the agent will not act for other principals. The Commission says that the former are unlikely to infringe Article 101(1), but that single branding provisions and post-term non-compete provisions, which concern inter-brand competition<sup>25</sup>, could infringe Article 101(1) if they lead to foreclosure of the market: the Commission refers to the later provisions of the *Guidelines* in Section VI.2.1 (paragraphs 129 to 150) on this. The idea that non-compete provisions in an agency agreement could infringe Article 101(1) was noted with approval by the Court of Justice in the *CEPSA* case<sup>26</sup>, although they may be block exempted where they satisfy the terms of Regulation 330/2010; and otherwise they may satisfy Article 101(3) on an individual basis.

Paragraph 20 deals with the second situation in which Article 101(1) might be infringed, which is where the agency agreement facilitates collusion: this could occur where a number of principals use the same agents whilst collectively excluding others from using these agents; or where they use agents for collusion on marketing strategy or to exchange sensitive market information between the principals.

Paragraph 21 states that, where the agent bears one or more of the risks described in paragraph 16, the agreement between agent and principal does not constitute an agency agreement. Instead the agent will be treated as an independent dealer, and the agreement with it is capable of infringing Article 101(1)<sup>27</sup>.

## 5. Vertical Agreements: Competition Policy Considerations

### (A) Introduction

In this section the competition policy considerations raised by vertical agreements will be examined. Section 6 of this chapter will consider the application of Article 101(1) to vertical agreements in the light of the jurisprudence of the EU Courts and the Commission's *Guidelines*. Section 7 will examine the provisions of the block exemption for vertical agreements under Regulation 330/2010. Section 8 will consider the possibility that a vertical agreement that falls outside the block exemption might nevertheless satisfy the criteria of Article 101(3). Regulation 461/2010 on the distribution of motor cars will be considered in section 9.

<sup>25</sup> This expression is explained at 'Inter-brand and intra-brand competition', pp 624–625 below.

<sup>26</sup> Case C-217/05 *Confederación Española de Empresarios de Estaciones de Servicio v Compañía de Petróleos SA* [2006] ECR I-11997, [2007] 4 CMLR 181, para 62; see also the Commission's decision of 12 April 2006 under Article 9 of Regulation 1/2003 in the case of *Repsol CPP*, paras 20–24 identifying a possible foreclosure effect which was addressed by accepting legally-binding commitments offered by Repsol.

<sup>27</sup> See eg *Souris/Toppis* Commission decision of 26 May 2004, paras 97–104.

## (B) Vertical agreements: possible detriments to competition<sup>28</sup>

### (i) Inter-brand and intra-brand competition

The application of Article 101 to vertical agreements has long been controversial. It is fairly obvious that horizontal agreements, for example to fix prices or to limit output, should be prohibited: in this situation firms combine their market power to their own advantage<sup>29</sup>; vertical agreements do not involve a *combination* of market power<sup>30</sup>. Vertical agreements are likely to raise competition concerns only where there is a degree of market power at the level of the supplier or the buyer or at both levels. Where this is the case competition with other firms' products – 'inter-brand competition' – may be limited; as a result it may be desirable to ensure that there is competition between distributors and retailers in relation to the products of the firm with market power – so-called 'intra-brand competition'<sup>31</sup>.

Suppose that A is the brand owner of Wonder Widgets and B is the brand owner of Beautiful Blodgets.

A requires its retailers to purchase Wonder Widgets only from it and not to buy the competing products of M, N and O – a so-called 'single branding agreement' also known as an exclusive purchasing agreement<sup>32</sup>. The diagonal line means that the retailers and M, N and O have no access to each other.

Fig.16.5

The question in this case would be whether the single branding agreement has an effect on inter-brand competition, that is to say on competition between the brands of A and those of its competitors, M, N and O; this will depend on how much market power A has.

Suppose now that B requires its retailers X, Y and Z not to sell Beautiful Blodgets at less than the recommended price of €100, and not to sell to customers who live in an area allotted to one of the other retailers.

Fig.16.6

<sup>28</sup> For further discussion of the arguments in favour of and against vertical agreements see Motta *Competition Policy: Theory and Practice* (Cambridge University Press, 2004), part VI; Van den Bergh and Camesasca *European Competition Law and Economics: A Comparative Perspective* (Sweet & Maxwell, 2nd ed, 2006), ch 6; Bishop and Walker *The Economics of EC Competition Law* (Sweet & Maxwell, 3rd ed, 2010), paras 5.034–5.054.

<sup>29</sup> *Vertical guidelines*, para 98.

<sup>30</sup> *Ibid*, para 98.

<sup>31</sup> *Ibid*, para 102.

<sup>32</sup> See 'Single branding agreements', pp 637–639 below.

The question in this case is whether the agreements have a significant effect on intra-brand competition between the three retailers X, Y and Z. They do not restrict competition between B and its competitors; however the extent of inter-brand competition in the relevant market will affect the extent to which a restriction of intra-brand competition is a cause for concern.

### (ii) *Consten and Grundig v Commission*

It was argued in *Consten and Grundig v Commission*<sup>33</sup> that Article 101(1) should not apply to vertical agreements at all as that provision was simply concerned with horizontal arrangements between undertakings. The Court of Justice rejected this argument<sup>34</sup> and concluded that the exclusive agreement in that case which conferred absolute territorial protection upon a distributor was caught by Article 101(1) and did not satisfy the criteria of Article 101(3)<sup>35</sup>.

### (iii) The single market imperative and intra-brand competition

As a general proposition competition law has less concern with restrictions of intra-brand competition than with restrictions of inter-brand competition: a restriction of intra-brand competition is likely to raise concerns only where inter-brand competition is weak. However to this must be added a further concern of EU competition law, which has been mentioned several times in this book already: the integrity of the single market. The EU Courts and the Commission have, from the earliest days, been concerned about vertical agreements that lead to a division of national markets, even where the restrictions relate to intra-brand rather than to inter-brand competition. The strict treatment of export bans, the determination to maintain parallel imports and the reluctance to allow distributors to enjoy absolute territorial protection are all issues affecting intra-brand rather than inter-brand competition. The law on vertical agreements in the EU therefore has a component – single market integration – that will not be found in other (domestic) systems of competition law<sup>36</sup>. Two judgments in 2011 demonstrate that the single market imperative remains in place<sup>36a</sup>.

### (iv) The commentary in the *Vertical guidelines* on the negative effects of vertical restraints

In determining whether a vertical agreement has a restrictive effect on competition, it is necessary to consider what the market situation would have been in the absence of the vertical restraints in the agreement<sup>37</sup>. Useful guidance on analysing the anti-competitive effects of an agreement can be found in the Commission's *Guidelines on the application of Article [101(3)] of the Treaty* ('the *Article [101(3)] Guidelines*')<sup>38</sup>. Those guidelines make clear that negative effects are likely to occur when at least one of the parties has or obtains some degree of market power and the agreement contributes to the creation, maintenance

<sup>33</sup> Cases 56 and 58/64 [1966] ECR 299, [1966] CMLR 418.

<sup>34</sup> [1966] ECR 299, pp 339–340 and [1966] CMLR 418, p 470; see further ch 3, 'Horizontal and vertical agreements', p 117.

<sup>35</sup> Absolute territorial protection may be permitted in exceptional circumstances, as in Case 262/81 *Coditel II* [1982] ECR 3381, [1983] 1 CMLR 49: see ch 3, 'Cases in which agreements containing contractual restrictions were found not to have anti-competitive effects', pp 128–129.

<sup>36</sup> See the *Vertical guidelines*, para 7.

<sup>36a</sup> See Cases C-403/08 and C-429/08 *Football Association Premier League Ltd v QC Leisure*, [2011] ECR I-000 and Case C-439/09 *Pierre Fabre Dermo-Cosmétique SAS v Président de l'Autorité de la Concurrence*, [2011] ECR I-000.

<sup>37</sup> *Ibid*, para 97.

<sup>38</sup> OJ [2004] C 101/97, paras 24–27; on agreements that have as their effect the restriction of competition see ch 3, 'Agreements that have as their effect the prevention, restriction or distortion of competition', pp 125–137 of this book.

or strengthening of that market power or allows the parties to exploit it, a point repeated in paragraph 97 of the *Vertical guidelines*. Paragraph 100 of the Commission's *Vertical guidelines* notes four possible negative effects arising from vertical restraints which EU competition law aims at preventing:

- anti-competitive foreclosure of other suppliers or buyers by raising barriers to entry
- softening of competition between the supplier and its competitors and/or facilitation of both explicit and tacit collusion, often referred to as a reduction of inter-brand competition<sup>39</sup>
- softening of competition between the buyer and its competitors and/or facilitation of collusion, commonly referred to as a reduction of intra-brand competition between distributors of the same brand
- the creation of obstacles to market integration.

Paragraph 101 of the *Guidelines* explains that foreclosure, softening of competition and collusion in the upstream or downstream market may harm consumers in particular by raising wholesale prices, depriving consumers of choice, lowering quality or reducing the level of innovation. Paragraphs 103 to 105 consider the circumstances in which vertical restraints are more likely to have negative effects: for example exclusive arrangements are generally more anti-competitive than non-exclusive arrangements since they result in one firm sourcing all or practically all of its demand from another. Paragraph 105 states that a combination of vertical restraints will usually increase their individual negative effects; however certain combinations may have the reverse effect: for example a maximum resale price used to prevent an exclusive distributor from raising price beyond a certain level. Paragraph 105 also points out that the negative effects arising from vertical restraints are reinforced when several suppliers and their respective buyers organise their trade in a similar way, leading to so-called 'cumulative effects' within the market leading to a restriction of competition.

### (C) Vertical agreements: possible benefits to competition

Having set out the Commission's views as to the possible detriments to competition arising from vertical agreements, it is important to stress that there are also significant arguments in their favour. Some theorists argue that vertical restraints are not a suitable target for competition authorities at all<sup>40</sup>; a more realistic view is that they should be investigated only where at least one of the parties has market power<sup>41</sup>. Paragraph 106 of the *Vertical guidelines* states that vertical restraints often have positive effects, in particular by promoting non-price competition and improved quality of service. Paragraph 107 sets out nine situations in which vertical restraints may help to realise efficiencies and the development of new markets; the Commission says that it does not claim that the list is complete or exhaustive<sup>42</sup>.

<sup>39</sup> On practices, including vertical agreements, that may facilitate tacit collusion see ch 14, 'Article 101(1), the exchange of information and other facilitating practices', pp 569–570.

<sup>40</sup> See eg Bork *The Antitrust Paradox* (The Free Press, 1993), chs 14 and 15.

<sup>42</sup> See further *Vertical guidelines*, paras 108–109.

**(i) The free-rider problem**

One distributor may take a free ride on the investment of another. For example a retailer may invest in a particular brand and create a demand for it: it has an obvious interest in preventing another retailer from making sales in circumstances where it made no contribution to the creation of that demand. The Commission states that free-riding between buyers can occur only on pre-sales services and not on after-sales services; it adds that free-riding is usually only a problem where the product is relatively new or complex and of reasonably high value. Exclusive distribution agreements may be used to prevent the problem of free-riding; for example if A appoints B as the exclusive distributor for France, this will provide some degree of immunity from intra-brand competition. Absolute territorial protection will not usually be countenanced in vertical agreements, because of the wider EU objective of achieving an integrated internal market. A term conferring exclusivity on a distributor might not infringe Article 101(1), in particular where parallel imports into the exclusive territory are possible<sup>43</sup>. A free-rider issue can arise where a supplier invests in promotion at a retailer's premises which a competing supplier takes advantage of: a non-compete provision may be justified to prevent this type of free-riding.

**(ii) Opening up and entering new markets**

A 'special case of the free-rider problem' is where a manufacturer wants to enter a new geographic market and this requires its distributor to make 'first time investments'. It may be necessary to protect the distributor from competition so that it can recoup its investment by temporarily charging a higher price; this may mean that distributors in other markets should be restrained for a limited period from selling in the new market.

**(iii) The certification free-rider issue**

In some sectors certain retailers have a reputation for stocking only 'quality' products. In such a case a manufacturer must limit its sales to such retailers, since otherwise its products may be delisted. Exclusive or selective distribution may be justified for a period of time in these circumstances.

**(iv) The hold-up problem**

This refers to a situation in which a supplier or buyer needs to make client-specific investments, and will not commit to these until supply agreements have been concluded. It may be that an undertaking making an investment will require a long-term supply agreement, so that it knows that it will recoup its costs. Where the supplier makes the investment, it may wish the buyer to agree to a non-compete, or to an analogous, provision; a buyer may seek the benefit of an exclusive distribution, customer allocation or exclusive supply provision<sup>44</sup>.

**(v) The hold-up problem where know-how is transferred**

Where know-how is supplied by one firm to another it may be necessary to impose a non-compete provision on the recipient of the know-how to ensure that it is not used by competitors of the owner of it.

<sup>43</sup> See further 'The single market imperative and intra-brand competition', p 625 above and 'Article 4(b): territorial and customer restrictions', pp 665–668 below.

<sup>44</sup> For an example of the 'hold-up problem' under UK law see *Lucite International (UK) Ltd and BASF plc* OFT decision of 29 November 2002 [2003] UKCLR 176, paras 44–46.

#### (vi) The 'vertical externality issue'

Vertical restraints can be used to align the incentives of the parties so that one party does not act in a way that would harm the interests of the other. There may be situations where the manufacturer needs the retailer to improve sales levels or not to price too high in order to obtain benefits. The negative externality of too high pricing by a retailer can be avoided by imposing a maximum resale price on the retailer<sup>45</sup>.

#### (vii) Economies of scale in distribution<sup>46</sup>

Economies of scale on the part of distributors may lead to lower retail prices. Various vertical agreements might contribute to this, including exclusive distribution and exclusive purchasing.

#### (viii) Capital market imperfections

In some cases banks or equity markets may be unwilling to provide sufficient capital for the needs of the business of a supplier or a buyer. In such cases the supplier may lend to the buyer or vice versa. An obvious example is a brewer which makes a loan available to the operator of a public house or a café. A supplier in such a case may wish to impose a non-compete, or an analogous, provision; and a buyer may insist, for example, on exclusive supply.

#### (ix) Uniformity and quality standardisation

Vertical restraints may help to promote the brand image of a product and increase its attractiveness to consumers by bringing about uniformity and quality standardisation. This is typical of selective distribution and franchising systems.

## 6. Vertical Agreements: Article 101(1)<sup>47</sup>

### (A) Introduction

This section will consider the application of Article 101(1) to vertical agreements. Given the breadth of the new block exemption for vertical agreements, in many cases it is not necessary, in practical terms, to decide whether an agreement infringes Article 101(1) in the first place: if an agreement is within the 'safe haven' of Regulation 330/2010 and therefore satisfies the criteria of Article 101(3) the parties may have little interest in arguing, or even knowing, that the agreement did not infringe Article 101(1) in the first place. Paragraph 110 of the Commission's *Vertical guidelines* suggests, at indents (1) and (2), that there is no need to consider the application of Article 101(1) to agreements that are within the safe haven of the block exemption. This is a sensible and pragmatic point, and one with which the Court of Justice agrees<sup>48</sup>. However it would be intellectually incorrect to conclude that, *because* an agreement benefits from block exemption, it *therefore* infringes Article 101(1); and in some cases an agreement may not benefit from the block exemption, for example because the market share of one of the parties exceeds 30 per cent,

<sup>45</sup> This is sometimes known as the 'double marginalisation problem', see *Vertical guidelines*, para 107(f).

<sup>46</sup> On economies of scale see ch 1, 'Economies of scale and scope and natural monopolies', p 10.

<sup>47</sup> For more detailed discussion of this topic readers are referred to Filipponi, Peepkorn and Woods in Faul and Nikpay *The EC Law of Competition* (Oxford University Press, 2nd ed, 2007), ch 9 and Robertson *Distribution Agreements Under EC Competition Law: An Analytical Review* (m-press, 2008).

<sup>48</sup> See Case C-260/07 *Pedro IV Servicios SL v Total España SA* [2009] ECR I-2437, [2009] 5 CMLR 1291, para 36.

in which case the parties may wish to argue that Article 101(1) is not infringed. This is exemplified by the Commission's finding that Interbrew's agreements, which imposed a single branding provision on cafés and bars in Belgium, did not infringe Article 101(1), once they had been modified to its satisfaction<sup>49</sup>.

### (B) The *de minimis* doctrine

Paragraphs 8 to 11 of the Commission's *Vertical guidelines* point out that agreements of minor importance usually fall outside Article 101(1) altogether. These paragraphs refer to the Commission's 2001 *Notice on Agreements of Minor Importance*<sup>50</sup>; it is described in chapter 3 of this book<sup>51</sup>. Vertical agreements entered into by non-competing undertakings whose individual market share does not exceed 15 per cent are usually regarded as *de minimis*, although a 'hard-core' restriction such as an export ban might infringe Article 101(1) even below this threshold<sup>52</sup>.

### (C) The combined effect of the *de minimis* doctrine and the block exemption

The combined effect of the *de minimis* doctrine and the block exemption is that most vertical agreements where the market share of each of the parties is below 15 per cent fall outside Article 101(1) altogether; and that most vertical agreements, even if they are caught by Article 101(1), will be block exempted under Regulation 330/2010, provided that the supplier's and the buyer's market share is below 30 per cent and that the agreement does not contain any of the 'hard-core' restrictions in Article 4 of that Regulation<sup>53</sup>. As a consequence a very large number of vertical agreements will enjoy the benefit of one of these two 'safe havens'. Individual examination of vertical agreements will be necessary only where none of the safe havens is available, for example because the supplier's market share exceeds 30 per cent or because the parties wish to include a blacklisted provision in their agreement. Where the market share of one of the parties exceeds 30 per cent it may be that it has a dominant position, in which case restrictions in its vertical agreements may amount to an abuse of a dominant position contrary to Article 102 TFEU: firms have been found to be dominant where they had a market share in the region of 40 per cent, and they are presumed to be dominant at 50 per cent<sup>54</sup>. However in the case of Interbrew's single branding agreements the Commission concluded that, even though Interbrew had a market share of around 56 per cent, the agreements did not appreciably restrict competition once the extent of the exclusivity had been reduced<sup>55</sup>. Agreements containing hard-core restrictions are unlikely to satisfy the criteria of Article 101(3), since these are restrictions to which the Commission generally takes exception. It follows that individual examination of vertical agreements under Article 101(1) and Article 101(3) is likely to be relatively rare: it is most likely to be necessary where the supplier or the buyer

<sup>49</sup> See Commission Press Release IP/03/545, 15 April 2003.

<sup>50</sup> OJ [2001] C 368/13, [2002] 4 CMLR 699.

<sup>51</sup> See ch 3, 'The *De Minimis* Doctrine', pp 140–144.

<sup>52</sup> *Vertical guidelines*, para 10 states that the applicable case law of the EU Courts is relevant in this respect, referring in particular to Case 5/69 *Völk v Vervaecke* [1969] ECR 295, [1969] CMLR 273; see further ch 3, 'Part II of the Notice: the threshold', pp 141–142.

<sup>53</sup> See 'Article 4: hard-core restrictions', pp 663–669 below.

<sup>54</sup> See ch 5, 'The AKZO presumption of dominance where an undertaking has a market share of 50 per cent or more', pp 182–183.

<sup>55</sup> See ch 16 n 49 above.

has a market share in excess of 30 per cent but does not have a dominant position in the sense of Article 102.

---

#### Market shares and vertical agreements

---

50%	An undertaking with a market share of more than 50% is presumed to be dominant
40%	An undertaking with a market share of more than 40% may be dominant
30%	An undertaking with a market share of more than 30% will not benefit from the block exemption. If an agreement is caught by Article 101(1) it will benefit from block exemption if the supplier's and the buyer's market share is below 30% and the agreement does not contain Article 4 hard-core restrictions
15%	An agreement will benefit from the <i>de minimis</i> doctrine where the market share of each of the parties is below 15% and the agreement does not contain any Article 4 hard-core restrictions

---

#### (D) The case law of the EU Courts on vertical agreements

The Court of Justice and the General Court have repeatedly made clear that, except in those cases where the *object*<sup>56</sup> of an agreement is plainly anti-competitive, for example because of the imposition of an export ban, the application of Article 101(1) to an agreement cannot be ascertained simply by taking into account its formal terms; rather it has to be assessed in its economic context in order to determine whether it could have an effect on competition in the relevant market. This case law is discussed in chapter 3 of this book<sup>57</sup>. Of particular importance in the context of vertical agreements are the judgments in *Société Technique Minière v Maschinenbau Ulm*<sup>58</sup>, *Brasserie de Haecht v Wilkin*<sup>59</sup>, *Pronuptia de Paris v Schilligalis*<sup>60</sup> and *Delimitis v Henninger Bräu*<sup>61</sup>, each of which makes clear that, in 'effect' rather than 'object' cases under Article 101(1), a detailed examination of all the relevant facts is required before a conclusion can be reached as to whether competition is restricted by a vertical agreement.

Notwithstanding these important judgments there was a tendency on the part of the Commission over many years to adopt a formalistic approach to the application of Article 101(1) to vertical agreements, and a reluctance to follow the lead suggested by the EU Courts; the result was that large numbers of vertical agreements required exemption under Article 101(3) and, in particular, under the block exemptions adopted by the Commission. However it is clear from the *Vertical guidelines* that the Commission now adopts a flexible and economics-oriented approach to the application of Article 101(1). Paragraphs 110 to 127 of the *Guidelines* establish the methodology of analysis for determining whether vertical agreements infringe Article 101(1) and whether they might satisfy the terms of Article 101(3). The footnotes in the *Guidelines* contain helpful references to the case law of the Courts: due to constraints of space not all of these judgments are mentioned in the text that follows, but the reader should be aware of this useful reference point.

## (E) The methodology for the analysis of vertical agreements in the Commission's *Vertical guidelines*

### (i) The four steps involved in assessing vertical agreements under Article 101

Paragraph 110 of the *Vertical guidelines* suggests that four steps should be taken when assessing vertical agreements under Article 101. First, the relevant market should be defined in order to determine the supplier's and the buyer's market share; secondly, where the market share of each of the parties is below 30 per cent the block exemption will usually be applicable, provided that there are no hard-core restrictions contrary to Article 4 of Regulation 330/2010<sup>62</sup>; the third step is that, where the market share of 30 per cent is exceeded at the level of the supplier or the buyer, it will be necessary to consider whether the agreement falls within Article 101(1); lastly, where Article 101(1) is infringed, it will be necessary to consider whether the agreement benefits from the exception conferred by Article 101(3).

### (ii) Relevant factors for the assessment under Article 101(1)

Paragraphs 111 to 121 set out the factors that are relevant to the analysis of agreements under Article 101(1). Paragraph 111 refers to nine particular factors that are relevant to this assessment:

- the nature of the agreement
- the market position of the parties
- the market position of competitors
- the position of the buyers of the contract products
- entry barriers
- the maturity of the market
- the level of trade affected by the agreement
- the nature of the product
- 'other factors'.

Each of these factors is expanded upon in the succeeding paragraphs. Paragraph 117 discusses the issue of entry barriers and emphasises the significance of sunk costs in determining how high the entry barriers are in a particular industry<sup>63</sup>. Paragraph 121 deals with 'other factors' that may be relevant to the analysis: these include whether there is a 'cumulative effect' within the market of similar vertical agreements leading to a restriction of competition, the regulatory environment and behaviour that may indicate or facilitate horizontal collusion.

### (iii) Relevant factors for the assessment under Article 101(3)

Paragraphs 122 to 127 discuss the application of Article 101(3) to vertical agreements. They should be read in conjunction with the Commission's *Article [101(3)] Guidelines*<sup>64</sup>. Paragraph 123 states that it is necessary to take into account the investments made by any of the parties and the time needed and the restraints required to commit and recoup an efficiency-enhancing investment. Paragraphs 124 to 127 rehearse the conditions of Article 101(3). Paragraph 127 states that, in the absence of rivalry between undertakings, a dominant undertaking will lack adequate incentives to continue to create and pass on efficiency gains to consumers: in other words that such agreements are unlikely to satisfy Article 101(3).

<sup>62</sup> See 'Article 4: hard-core restrictions', pp 663–669 below.

<sup>63</sup> On barriers to entry see ch 1, 'Potential Competitors', pp 44–45.

<sup>64</sup> OJ [2004] C 101/97; for discussion of the *Article [101(3)] Guidelines* see ch 4, 'The Article 101(3) Criteria', p 151ff.

#### (iv) Application of the methodology to particular types of agreement

Having set out this methodology the Commission's *Vertical guidelines* proceed to consider the application of Article 101 to a series of particular types of vertical agreement: these are considered in section G below<sup>65</sup>. The *Vertical guidelines* do not contain a specific section dealing with the application of Article 101(1) to direct and indirect export bans, other than the commentary on Article 4(b) of the block exemption<sup>66</sup>. However there is a wealth of precedent on this subject and, as has been stressed throughout this book, the single market imperative is a dominant feature of EU competition law. For this reason section F below will consider the approach of the EU Courts and the Commission to direct and indirect export bans before the discussion in the *Vertical guidelines* of other types of vertical agreement is considered in section G.

### (F) Direct and indirect export bans

#### (i) Direct export bans

Export bans in vertical agreements will be held to infringe Article 101(1), and will not be permitted under Article 101(3) except in exceptional circumstances. Such agreements will be found to have as their object the restriction of competition; anti-competitive effects do not need to be demonstrated. In *General Motors BV v Commission*<sup>67</sup> the Court of Justice held that this was so even if an agreement does not have the restriction of competition as its sole aim but also pursues other legitimate objectives<sup>68</sup>, adding that the same was true if the restriction of exports happened as a result of indirect rather than direct measures<sup>69</sup>. In *GlaxoSmithKline v Commission* the General Court rejected the Commission's view that Glaxo's dual pricing system involved an indirect export ban that had as its object the restriction of competition<sup>70</sup>. On appeal the Court of Justice reaffirmed its case law that agreements aimed at prohibiting or limiting parallel trade have as their object the restriction of competition; that this applies to the pharmaceutical sector as to any other; that, for an agreement to restrict competition by object, it was not necessary that final consumers be deprived of advantages; and that Article 101 protects 'competition as such'<sup>71</sup>. However the Court of Justice agreed with the General Court that the Commission had failed to deal appropriately with Glaxo's arguments and evidence under Article 101(3)<sup>72</sup>. The Court of Justice's judgements in *Football Association Premier League*<sup>72a</sup> and *Pierre Fabre Dermo-Cosmétique SAS*<sup>72b</sup> are also emphatic that agreements that impede single market integration are prohibited unless there are exceptional circumstances.

Export bans are blacklisted by Article 4(b) of Regulation 330/2010, and their inclusion prevents the application of the block exemption to the agreement in question<sup>73</sup>. Examples

<sup>65</sup> See 'Application of Article 101(1) to other types of vertical agreements', pp 637–649 below.

<sup>66</sup> See 'Article 4(b): territorial and customer restrictions', pp 665–668 below.

<sup>67</sup> Case C-551/03 P [2006] ECR I-3173, [2006] 5 CMLR 9. <sup>68</sup> *Ibid*, para 64.

<sup>69</sup> *Ibid*, para 68.

<sup>70</sup> Case T-168/01 *GlaxoSmithKline Services Unlimited v Commission* [2006] ECR II-2969, [2006] 5 CMLR 29, paras 114–147.

<sup>71</sup> Cases C-501/06 P etc *GlaxoSmithKline Services Unlimited v Commission* [2009] ECR I-9291, [2010] 4 CMLR 50, paras 54–67.

<sup>72</sup> Case T-168/01 *GlaxoSmithKline Services Unlimited v Commission* [2006] ECR II-2969, [2006] 5 CMLR 29, paras 214–316; and Cases C-501/06 P etc *GlaxoSmithKline Services Unlimited v Commission* [2009] ECR I-9291, [2010] 4 CMLR 50, paras 68–118.

<sup>72a</sup> Cases C-403/08 and C-429/08 [2011] ECR I-000, paras 134–146.

<sup>72b</sup> Case C-439/09 [2011] ECR 000, paras 37–47.

<sup>73</sup> See 'Article 4(b): territorial and customer restrictions', pp 665–668 below.

of export bans which the Commission and the EU Courts have objected to are legion<sup>74</sup>, and the competition authorities of the Member States ('NCAs') have been equally opposed to them<sup>75</sup>. It is highly likely that the Commission or an NCA will impose a fine where it discovers an export ban, although reluctant distributors which accepted the ban under duress may not themselves be fined<sup>76</sup>; alternatively it may be that the fine on unwilling participants will be reduced<sup>77</sup>. In a serious case the fine for imposing export bans could be very substantial: in *VW*<sup>78</sup> the fine on Volkswagen amounted to €102 million, at the time one of the largest penalties to have been imposed by the Commission on one undertaking for infringing the competition rules; the fine was reduced to €90 million on appeal<sup>79</sup>. When determining the level of fines, and in particular ensuring that they have a sufficiently deterrent effect, the Commission is entitled to take into account the central position within a distribution system of the manufacturer, which must display special vigilance and ensure that it observes the competition rules when concluding distribution agreements<sup>80</sup>.

All of the vertical cases that the Commission prosecuted to the stage of adopting an infringement decision<sup>81</sup> in the 2000s, with the exception of *VW II*<sup>82</sup> which concerned resale price maintenance, involved direct or indirect export bans<sup>83</sup>. For example in *Nintendo*<sup>84</sup> the Commission condemned the prevention of parallel trade in video games and their consoles and imposed a fine of €167.8 million on the manufacturer and its dis-

<sup>74</sup> See ch 16 n 83 below for examples of such cases since 2000; for a list of cases in the preceding 20 years or so see p 623 n 102 of the sixth edition of this book and the online Resource Centre that accompanies this book, [www.oxfordtextbooks.co.uk/orc/whish7e/](http://www.oxfordtextbooks.co.uk/orc/whish7e/).

<sup>75</sup> See eg the UK *Tobacco*, OFT decision of 15 April 2010, on which see 'Decisional practice of the OFT', pp 679–680 below; *Consumer Electronics*, decision of the French Conseil de la Concurrence of 5 December 2005 (imposing total fines of €34.4 million for resale price maintenance): the decision has been annulled twice on appeal by the Cour de Cassation, judgments of 3 June 2008 and 7 January 2011, available at [www.autoritedelaconcurrence.fr](http://www.autoritedelaconcurrence.fr); *Witt Hvidevarer*, decision of the Danish Competition Council of 24 November 2010, available at [www.kfst.dk](http://www.kfst.dk).

<sup>76</sup> See eg *Kawasaki* OJ [1979] L 16/9, [1979] 1 CMLR 448; *Johnson and Johnson* OJ [1980] L 377/16, [1981] 2 CMLR 287; *John Deere* OJ [1985] L 35/58, [1985] 2 CMLR 554.

<sup>77</sup> See eg *BMW Belgium* OJ [1978] L 46/33, [1978] 2 CMLR 126; *Hasselblad* OJ [1982] L 161/18, [1982] 2 CMLR 233.

<sup>78</sup> OJ [1998] L 124/60, [1998] 5 CMLR 33.

<sup>79</sup> Case T-62/98 *Volkswagen AG v Commission* [2000] ECR II-2707, [2000] 5 CMLR 853, upheld on appeal to the Court of Justice in Case C-338/00 *Volkswagen AG v Commission* [2003] ECR I-9189, [2004] 4 CMLR 351.

<sup>80</sup> Case T-13/03 *Nintendo Co Ltd v Commission* [2009] ECR II-947, [2009] 5 CMLR 1421, paras 79–80.

<sup>81</sup> The Commission also settled some vertical cases informally: see eg *OMV/Gazprom* Commission Press Release IP/05/195, 17 February 2005 (involving gas supply contracts which prevented OMV from reselling the gas outside Austria: however the offending provisions were dropped, and OMV agreed to increase capacity in the gas pipeline that transports Russian gas through Austria).

<sup>82</sup> OJ [2001] L 262/14, annulled on appeal in Case T-208/01 *Volkswagen v Commission* [2003] ECR II-5141, [2004] 4 CMLR 727; on appeal to the Court of Justice the Court agreed that the Commission's decision should be annulled, but on different grounds from those of the General Court: Case C-74/04 P *Commission v Volkswagen AG* [2006] ECR I-6585, [2008] 4 CMLR 1297.

<sup>83</sup> See *Nathan-Bricolux* OJ [2001] L 54/1; *Opel* OJ [2001] L 59/1, [2001] 4 CMLR 1441, substantially upheld on appeal to the General Court Case T-368/00 *General Motors Nederland BV v Commission* [2003] ECR II-4491, [2004] 4 CMLR 1302 and on appeal to the Court of Justice Case C-551/03 P *General Motors BV v Commission* [2006] ECR I-3173, [2006] 5 CMLR 9; *JCB* OJ [2002] L 69/1, upheld in part on appeal to the General Court Case T-67/01 *JCB Service v Commission* [2004] ECR II-49, [2004] 4 CMLR 1346 and on appeal to the Court of Justice Case C-167/04 P *JCB Service v Commission* [2006] ECR I-8935, [2006] 5 CMLR 1337; *GlaxoSmithKline* OJ [2001] L 302/1: see ch 16 n 72 above; *DaimlerChrysler* OJ [2002] L 257/1, annulled on appeal Case T-325/01 *DaimlerChrysler AG v Commission* [2005] ECR II-3319, [2007] 4 CMLR 559; *Yamaha*, Commission decision of 16 July 2003 (fine of €2.56 million); *Souris/Topps*, Commission decision of 26 May 2004 (fine of €1.59 million).

<sup>84</sup> OJ [2003] L 255/33, [2004] 4 CMLR 421.

tributors; this was the largest fine ever to have been imposed by the Commission for an unlawful vertical agreement under Article 101; on appeal to the General Court two of the fines<sup>85</sup> were slightly reduced, but the substance of the Commission's decision was upheld. What is noticeable is the dearth of cases brought by the Commission in relation to vertical agreements in recent years: indeed there has not been one Commission decision finding an infringement of Article 101 in the case of a vertical agreement since *Peugeot* in October 2005<sup>86</sup>. The Commission's enforcement activities in recent years have been overwhelmingly geared to detecting and penalising hard-core horizontal cartels and to enforcing Article 102<sup>87</sup>.

The lack of enforcement action on the Commission's part in relation to vertical agreements ought not, however, to be interpreted as a downgrading, on its part, of the importance of the internal market, nor of an increased tolerance of restrictions of parallel trade<sup>88</sup>. One explanation for the reduced enforcement action on the part of the Commission against vertical restraints under Article 101 in recent years is that there have been numerous cases at national level, both on the part of the NCAs and the national courts<sup>89</sup>. This is hardly surprising: while the Commission grapples with large, often EU-wide (or even global), cartels and major cases of abuse of dominance, problems in relation to distribution systems, which are often arranged along national lines, are resolved at the level of the Member States. A further explanation for the lack of enforcement action on the part of the European Commission – which cannot be proven empirically, but which is plausible – is that the EU regime for vertical agreements is well understood by undertakings and their legal advisers and has worked well in practice.

## (ii) Indirect export bans

The EU Courts, the Commission, the NCAs and national courts will condemn indirect measures that might have the same effect as an export ban. Indirect export bans are blacklisted by Article 4(b) of Regulation 330/2010, and their inclusion in an agreement would prevent the application of the block exemption<sup>90</sup>. An example of an indirect export ban would arise if a producer provides that its guarantees are available to consumers in a particular Member State only if they buy the product from a distributor in that State; this obviously acts as a strong disincentive to purchase elsewhere. In *Zanussi*<sup>91</sup> the Commission condemned such an arrangement, and it has taken similar action on several occasions since<sup>92</sup>. As a general

<sup>85</sup> See Case T-13/03 *Nintendo Co Ltd v Commission* [2009] ECR II-947, [2009] 5 CMLR 1421 and Case T-18/03 *CD-Contact Data GmbH v Commission* [2009] ECR II-1021, [2009] 5 CMLR 1469, upheld on appeal in Case C-260/09 P *Activision Blizzard Germany GmbH (formerly CD-Contact Data GmbH) v Commission* [2011] ECR I-000, [2011] 4 CMLR 964; see also Case T-12/03 *Itochu Corp v Commission* [2009] ECR II-883, [2009] 5 CMLR 1375, where the appeal was dismissed in its entirety.

<sup>86</sup> Decision of 5 October 2005, upheld as to substance on appeal Case T-450/05 *Peugeot v Commission* [2009] ECR II-2533; the fine was reduced from €49.5 million to €44.55 million as the Commission had failed sufficiently to take into account the impact of currency fluctuations on the volume of parallel trade.

<sup>87</sup> See eg Communication from the Commission to the European Parliament and the Council *Report on the functioning of Regulation 1/2003* COM(2009) 206 final, paras 3 and 13, available at [www.ec.europa.eu](http://www.ec.europa.eu)

<sup>88</sup> On the continuing importance of the 'single market imperative' see *Vertical guidelines*, para 7 and Commission Press Release IP/10/1175, 25 September 2010 in which the Commission announced that, following a preliminary assessment, Apple had taken action to make it easier for consumers to exercise their warranty rights in relation to iPhones purchased in a Member State other than their home country.

<sup>89</sup> For examples of cases brought by NCAs see ch 16 n 75 above.

<sup>90</sup> See 'Article 4(b): territorial and customer restrictions', pp 665–668 below.

<sup>91</sup> OJ [1978] L 322/26, [1979] 1 CMLR 81.

<sup>92</sup> See *Matsushita Electrical Trading Company* Commission's XIIth Report on Competition Policy (1982), point 77; *Ford Garantie Deutschland* XIIIth Report on Competition Policy (1983), points 104–106; *Fiat* XIVth Report on Competition Policy (1984), point 70; XVth Report on Competition Policy (1986), point 56; *Sony* XVIIth Report on

proposition customer guarantees should be available for products no matter where they are marketed in the single market. The Commission's approach was endorsed by the Court of Justice in *ETA Fabriques d'Ebauches v DK Investments SA*<sup>93</sup>, in which it held that the partitioning of national markets by denying the benefit of guarantees to imported goods infringed Article 101(1). However it may be legitimate to provide that the guarantee should extend only to services that a local representative is bound to provide in accordance with local safety and technical standards<sup>94</sup>, and it is permissible to withhold the guarantee from products sold by a dealer who is not an authorised member of a selective distribution system<sup>95</sup>. A requirement that a distributor that exports goods into the territory of another distributor should pay a service fee to the latter as compensation for the after-sales service that it is required to provide may be treated as an export ban where the fee does not relate to the value of the service to be provided; so may the provision to distributors of financial support conditional on products supplied being used only within a distributor's allotted territory<sup>96</sup>.

Another way of indirectly affecting exports is through the use of monitoring clauses in contracts, whereby a producer requires information as to the destination of its products, and by the imposition on products of serial numbers which enable their movement from one territory to another to be traced. While these practices are not objectionable in themselves, they will be condemned where they are used by a producer in order to prevent or control parallel importing<sup>97</sup>.

Exports may be impeded in numerous other ways. Price discrimination devised to prevent exports would be caught<sup>98</sup>; the withdrawal of discounts previously granted to a French dealer in so far as it exported the products in question to Italy attracted fines in *Gosmé/Martell*<sup>99</sup>. In *Konica*<sup>100</sup> Konica's policy of buying up supplies of its film imported from the UK into Germany in order to protect its German distributors from cheap imports was condemned under Article 101(1): this did not prevent parallel imports in itself, but it did deprive consumers in Germany of the possibility of buying cheaper film. Restrictions on cross-supplies between distributors would be caught, as they may prevent parallel imports

<sup>96</sup> *JCB* OJ [2002] L 69/1, [2002] 4 CMLR 1458, paras 155–167, on appeal the General Court confirmed the Commission's approach on this point but annulled its finding of infringement for lack of evidence: Case T-67/01 *JCB Service v Commission* [2004] ECR II-49, [2004] 4 CMLR 1346, paras 136–145.

<sup>97</sup> See eg *Victor Hasselblad AB* OJ [1982] L 161/18, [1982] 2 CMLR 233: its cameras had serial numbers on them and the Commission considered that this afforded an opportunity to Hasselblad to discover whether there had been any parallel importing; *Sperry New Holland* OJ [1985] L 376/21, [1988] 4 CMLR 306; *Newitt/Dunlop Slazenger International* OJ [1992] L 131/32, [1993] 5 CMLR 352, paras 59–60.

<sup>98</sup> See eg *Pittsburgh Corning Europe* JO [1972] L 272/35, [1973] CMLR D2; *Kodak* JO [1970] L 147/24, [1970] CMLR D19; Case 30/78 *Distillers v Commission* [1980] ECR 2229, [1980] 3 CMLR 121; the Commission considered that Glaxo had failed to demonstrate that its dual pricing policy satisfied the requirements of Article 101(3) in *GlaxoSmithKline* OJ [2001] L 302/1, [2002] 4 CMLR 335: the Commission's decision was annulled on this point in Case T-168/01 *GlaxoSmithKline Services v Commission* [2006] ECR II-2969, [2006] 5 CMLR 29, paras 233–317, and that aspect of the General Court's judgment was upheld on appeal to the Court of Justice in Cases C-501/06 P etc *GlaxoSmithKline Services Unlimited v Commission* [2009] ECR I-9291, [2010] 4 CMLR 50, paras 68–168; see ch 3, 'Refinement of the range of agreements within the object box', pp 124–125.

<sup>99</sup> OJ [1991] L 185/23, [1992] 5 CMLR 586; see similarly *Newitt/Dunlop Slazenger International* OJ [1992] L 131/32, [1993] 5 CMLR 352, paras 54–57; *Ford Agricultural* OJ [1993] L 20/1, [1995] 5 CMLR 89, paras 13–14 (discounts dependent on non-export and penalties for exporting infringed Article 101(1)).

<sup>100</sup> OJ [1988] L 78/34, [1988] 4 CMLR 848; see similarly *Newitt/Dunlop Slazenger International* OJ [1992] L 131/32, [1993] 5 CMLR 352, para 58.

between Member States<sup>101</sup>. A requirement that coffee beans be resold only in a roasted form could affect exports: the Commission required agreements to be amended so that the beans could also be sold in their raw form<sup>102</sup>. Reducing supplies to a distributor in a particular territory so that there are none available for export could be caught, provided that this is done by agreement or concerted practice<sup>103</sup>. In *Bayo-n-ox*<sup>104</sup> the supply of a product for a customer's own use was held to entail an export ban contrary to Article 101(1) and in *Bayer Dental*<sup>105</sup> the Commission condemned a clause forbidding the resale of Bayer's dental products in a repackaged form since it regarded this as an indirect ban on exports.

In *Zera/Montedison*<sup>106</sup> the Commission concluded that an agreement to differentiate agrochemical products between one national market and another, with the consequence that a German distributor enjoyed absolute territorial protection, infringed Article 101(1)<sup>107</sup>. In *DaimlerChrysler*<sup>108</sup> the Commission considered that the requirement that only foreign customers should pay a 15 per cent deposit for a new vehicle unjustifiably hindered cross-border car sales<sup>109</sup>.

An important point to bear in mind is that the Commission will take a wide view of the term 'agreement' for the purpose of establishing whether an export ban infringes Article 101(1) and, in particular, that conduct that may appear to be unilateral may be characterised as sufficiently consensual to be caught by that provision<sup>110</sup>. Furthermore in some cases it may be relatively easy to establish a concerted practice between a supplier and its distributors to divide up the internal market<sup>111</sup>. However, as pointed out in chapter 3, there have been several occasions on which Commission findings of a vertical agreement have been overturned on appeal<sup>112</sup>. A different point to note is that in *Activision Blizzard*<sup>113</sup>, an appeal in the *Nintendo* case, the Court of Justice held that the standard of proof for demonstrating the existence of a vertical agreement is not higher than in the case of a horizontal agreement<sup>114</sup>.

### (iii) Export bans falling outside Article 101(1) or satisfying Article 101(3)

There have been several occasions on which the Court of Justice has concluded that an export ban, in the context of a specific type of agreement, did not have as its object the restriction of competition and could fall outside Article 101<sup>115</sup>. An example can be found in

<sup>101</sup> *German Spectacle Frames* [1985] 1 CMLR 574; *JCB OJ* [2002] L 69/1, [2002] 4 CMLR 1458, paras 174–178.

<sup>102</sup> *Colombian Coffee OJ* [1982] L 360/31, [1983] 1 CMLR 703; see similarly the 'green banana' clause in *Case 27/76 United Brands Co v Commission* [1978] ECR 207, [1978] 1 CMLR 429.

<sup>103</sup> *Sandoz OJ* [1987] L 222/28, [1989] 4 CMLR 628, para 30, upheld on appeal *Case C-277/87 Sandoz Prodotti Farmaceutici SpA v Commission* [1990] ECR I-45; see also *Chanelle Veterinary Ltd v Pfizer Ltd (No 2)* [1999] Eu LR 723 (Irish Supreme Court): delisting not attributable to an agreement; see further ch 16 n 281 below.

<sup>104</sup> *OJ* [1990] L 21/71, [1990] 4 CMLR 930, upheld on appeal to the General Court in *Case T-12/90* [1991] ECR II-219, [1993] 4 CMLR 30, and to the Court of Justice in *Case C-195/91 P Bayer v Commission* [1994] ECR I-5619.

<sup>105</sup> *OJ* [1990] L 351/46, [1992] 4 CMLR 61.

<sup>106</sup> *OJ* [1993] L 272/28, [1995] 5 CMLR 320.

<sup>107</sup> *Ibid*, paras 96–126.

<sup>108</sup> *OJ* [2002] L 257/1, [2003] 4 CMLR 95.

<sup>109</sup> *Ibid*, paras 173–175, upheld in part on appeal *Case T-325/01 DaimlerChrysler AG v Commission* [2005] ECR II-3319, [2007] 4 CMLR 559.

<sup>110</sup> See ch 3, 'Unilateral' conduct and Article 101(1) in vertical cases', pp 105–110.

<sup>111</sup> See in particular *Cases 100–103/80 Musique Diffusion Française SA v Commission* [1983] ECR 1825, [1983] 3 CMLR 221.

<sup>112</sup> See ch 3, 'Judgments since *Bayer v Commission* annulling Commission findings of an agreement', pp 109–110.

<sup>113</sup> *Case C-260/09 P Activision Blizzard Germany GmbH (formerly CD-Contact Data GmbH) v Commission* [2011] ECR I-000, [2011] 4 CMRL 964.

<sup>114</sup> *Ibid*, paras 71–72.

<sup>115</sup> See eg *Case 27/87 Erauw-Jacquery Sprl v La Hesbignonne Société Coopérative* [1988] ECR 1919, [1988] 4 CMLR 576.

*Javico v Yves St Laurent*<sup>116</sup>, where an export ban was imposed on distributors *outside*, rather than within, the EU: obviously such cases do not trigger the same concerns about single market integration in the way that export bans imposed upon EU distributors do<sup>117</sup>.

Paragraphs 60 to 64 of the *Vertical guidelines* state that there may be circumstances in which hard-core sales restrictions do not infringe Article 101(1) at all or may in an individual case satisfy Article 101(3):

- a prohibition on resale may fall outside Article 101(1) where there is an objective justification, for example, on grounds of health or safety<sup>118</sup>
- where a distributor makes substantial investments to enter a new market, restrictions of passive sales into its territory by other distributors during the first two years of it operating on the market do not infringe Article 101(1)<sup>119</sup>
- where a new product is genuinely being tested in a limited territory, restrictions of active sales outside that test area will not be caught by Article 101(1) for the period of the testing or introduction of the product<sup>120</sup>
- wholesalers within a selective distribution system may be prevented from actively selling to retailers in other territories, where this is necessary to protect the investment of wholesalers obliged to invest in particular promotional activities within their territories<sup>121</sup>
- a dual pricing policy, under which products intended for export are priced at a premium to equivalent products intended for the domestic market, may satisfy Article 101(3), in particular where higher prices correspond to substantially higher costs for the manufacturer<sup>122</sup>.

These paragraphs demonstrate the extent to which the Commission has moved away from a prescriptive, formalistic approach to the application of Article 101 and towards a more effects-based approach.

## (G) Application of Article 101(1) to other types of vertical agreements

Paragraphs 128 to 229 of the *Guidelines* provide guidance on the application of Article 101 to ten types of vertical agreements: single branding, exclusive distribution, exclusive customer allocation, selective distribution, franchising, exclusive supply, up-front access payments, category management agreements, tying and resale price restrictions. Each of these categories will be examined in this section; relevant cross-references to Regulation 330/2010 will be provided.

### (i) Single branding agreements<sup>123</sup>

#### (A) Possible detriments to inter-brand competition

Single branding agreements have as their main element that the buyer is obliged or induced to concentrate its orders for a particular product on one supplier<sup>124</sup>. Exclusive purchasing and non-compete obligations are obvious examples of single branding agreements.

<sup>116</sup> Case C-306/96 [1998] ECR I-1983, [1998] 5 CMLR 172; on *Javico* see ch 3, 'Refinement of the range of agreements within the object box', pp 124–125.

<sup>117</sup> The Commission specifically refers to *Javico* in fn 5 of its *Vertical guidelines*.

<sup>118</sup> *Vertical guidelines*, para 60; see eg *Kathon/Biocide* OJ [1984] C 59/6, [1984] 1 CMLR 476.

<sup>119</sup> *Vertical guidelines*, para 61. <sup>120</sup> *Ibid*, para 62. <sup>121</sup> *Ibid*, para 63.

<sup>122</sup> *Ibid*, para 64; in such cases the Commission would investigate the extent to which such a pricing policy is likely to limit sales and hinder the distributor in reaching more and different customers.

<sup>123</sup> *Vertical guidelines*, paras 129–150. <sup>124</sup> *Ibid*, para 129.

In the Commission's view such agreements may restrict inter-brand competition; this could happen by foreclosing access on the part of other suppliers to the market, by softening competition, by facilitating collusion and by limiting in-store inter-brand competition<sup>125</sup>.

**(B) Application of the block exemption to single branding agreements**

Regulation 330/2010 will apply to single branding agreements, provided that the market share of each of the parties is less than 30 per cent<sup>126</sup> and provided that the duration of the non-compete obligation is limited to five years or less<sup>127</sup>. Where the block exemption applies, it will not be necessary to consider further whether Article 101(1) is infringed or whether the requirements of Article 101(3) are satisfied on an individual basis; however the *Guidelines* provide guidance for those cases in which 'self-assessment' of agreements is necessary because the block exemption is not applicable<sup>128</sup>.

**(C) Factors to be considered in determining whether single branding agreements infringe Article 101(1)**

The Commission sets out the factors that are to be considered in determining whether Article 101(1) is infringed in paragraphs 132 to 143 of the *Vertical guidelines*. The approach taken by the Commission is an economic one, and is consistent with the many judgments of the EU Courts (not referred to in the *Guidelines*) which have held that such agreements must be assessed in their economic context in order to determine whether they have an anti-competitive effect: single branding agreements do not have the *object* of restricting competition<sup>129</sup>. Judgments of particular note on this issue include *Brasserie de Haecht v Wilkin*<sup>130</sup>, *Delimitis v Henninger Bräu*<sup>131</sup>, *BPB Industries v Commission*<sup>132</sup> and *Neste Markkinointi v Yötuuli*<sup>133</sup>. Decisions in which the Commission has concluded that single branding agreements infringed Article 101(1) and did not satisfy Article 101(3) include *Spices*<sup>134</sup>, *Bloemenveilingen Aalsmeer*<sup>135</sup> and *Langnese/Schöller*<sup>136</sup>.

<sup>125</sup> *Ibid*, para 130.

<sup>126</sup> See 'Article 3: the market share cap', pp 660–662 below.

<sup>127</sup> See 'Article 5(1)(a): non-compete obligations', pp 669–670 below on Article 5(1)(a) of Regulation 330/10; as will be explained there, in certain, limited, circumstances a period of more than five years may be permitted.

<sup>128</sup> *Vertical guidelines*, para 139.

<sup>129</sup> See eg Case T-65/98 *Van den Bergh Foods v Commission* [2003] ECR II-4653, [2004] 4 CMLR 14, para 80.

<sup>132</sup> Case T-65/89 [1993] ECR II-389, [1993] 5 CMLR 32, para 66.

<sup>133</sup> Case C-214/99 [2000] ECR I-11121, [2001] 4 CMLR 993; the UK Competition Appeal Tribunal considered the application of the judgment in *Neste* to an exclusive purchasing agreement in Case No 1087/2/3/07 *Independent Media Support Ltd v Office of Communications* [2008] CAT 13, [2008] CompAR 161, paras 108–123, agreeing with the conclusion of OFCOM that the agreement in question did not infringe the Chapter I prohibition in the Competition Act 1998 or Article 101 TFEU; the Court of Appeal refused permission to appeal, [2008] EWCA Civ 1402.

<sup>134</sup> OJ [1978] L 53/20, [1978] 2 CMLR 116.

<sup>135</sup> OJ [1988] L 262/27, [1989] 4 CMLR 500.

<sup>136</sup> OJ [1993] L 183/19, [1994] 4 CMLR 51, substantially upheld on appeal Cases T-7/93 and T-9/93 *Langnese-Iglo GmbH etc v Commission* [1995] ECR II-1533, [1995] 5 CMLR 602 and [1995] ECR II-1611, [1995] 5 CMLR 659 and Case C-279/95 P [1998] ECR I-5609, [1998] 5 CMLR 933; see also the Commission's decision on Article 101 in *Van den Bergh Foods Ltd* OJ [1998] L 246/1, [1998] 5 CMLR 530, upheld on appeal Case T-65/98 *Van den Bergh Foods Ltd v Commission* [2003] ECR II-4653, [2004] 4 CMLR 14: the same dispute was the subject of an Article 267 reference by the Irish Supreme Court to the Court of Justice in Case C-344/98 *Masterfoods Ltd v HB Ice Cream Ltd* [2000] ECR I-11369, [2001] 4 CMLR 449.

As far as Article 101(1) is concerned the *Guidelines* explain that single branding agreements with one supplier may result in anti-competitive foreclosure where they prevent an important competitive constraint from being exercised by existing and future competitors; this may be the case in particular where the supplier is an unavoidable trading partner, for example because its brand is a ‘must stock item’. It follows that the market position of the supplier is particularly important for the analysis of single branding agreements<sup>137</sup>. The duration of a single branding agreement will also be relevant<sup>138</sup>. The higher the market share and the longer the duration, the more likely it is that there will be a significant foreclosure of the market<sup>139</sup>. Paragraph 133 of the *Vertical guidelines* states that agreements on the part of non-dominant undertakings of less than a year are unlikely to infringe Article 101(1)<sup>140</sup>; between one and five years they may do; and agreements of more than five years would normally be caught. Single branding agreements are more likely to result in anti-competitive foreclosure when entered into by dominant undertakings<sup>141</sup>.

Where there are parallel networks of single branding agreements, their cumulative effect may be to foreclose access to the market<sup>142</sup>; this would be unlikely where the largest supplier in the market has a market share of less than 30 per cent and the market share of the five largest suppliers is below 50 per cent<sup>143</sup>. Other relevant factors are the level of entry barriers<sup>144</sup>, countervailing power<sup>145</sup> and the level of trade affected<sup>146</sup>.

#### (D) *The application of Article 101(3)*

Article 101(3) issues are discussed in paragraphs 144 to 148 of the *Vertical guidelines*: this is considered below<sup>147</sup>.

#### (ii) *Exclusive distribution agreements*<sup>148</sup>

##### (A) *Possible detriments to intra-brand competition and to market integration*

A supplier will often grant exclusive distribution rights to a distributor for a particular territory: for example it might appoint X as the exclusive distributor for France and Y as the exclusive distributor for Germany. The supplier may also agree that it will not sell its products directly into the territories granted to X and Y. The Commission’s main concern in relation to exclusive distribution agreements is that intra-brand competition will be reduced and that the market will be partitioned<sup>149</sup>. A separate concern arises when most or all suppliers in a particular market adopt exclusive distribution systems since this may soften competition and facilitate collusion, both at the suppliers’ and the distributors’ level of the market; this would entail harm to inter-brand competition. The Commission

<sup>137</sup> *Vertical guidelines*, para 132; see similarly *DSD* OJ [2001] L 319/1, [2002] 4 CMLR 405, paras 121–140, upheld on appeal in Case T-289/01 *Duales System Deutschland GmbH v Commission* [2007] ECR II-1691, [2007] 5 CMLR 356.

<sup>138</sup> *Ibid*, para 133.

<sup>139</sup> *Ibid*.

<sup>140</sup> See Case C-214/99 *Neste Markkinointi Oy v Yötuuli* [2000] ECR I-11121, [2000] 4 CMLR 993, where the Court of Justice concluded that exclusive purchasing agreements for petrol of not more than one year’s duration did not infringe Article 101(1); see also Case E-7/01 *Hegelstad Eiendomsselskap Arvid B Hegelstad v Hydro Texaco AS* [2003] 4 CMLR 236, where the EFTA Court held that a 15-year fixed term exclusive purchasing agreement for petrol was permissible where it only made an insignificant contribution to the foreclosure of the market.

<sup>141</sup> See ch 17, ‘Could the tie have an anti-competitive foreclosure effect?’, pp 649–695.

<sup>142</sup> *Vertical guidelines*, para 134.

<sup>143</sup> *Ibid*, para 135.

<sup>144</sup> *Ibid*, para 136.

<sup>145</sup> *Ibid*, para 137.

<sup>146</sup> *Ibid*, paras 138–141.

<sup>147</sup> See ‘The Application of Article 101(3) to Agreements that do not Satisfy the Block Exemption’, pp 672–674 below.

<sup>148</sup> *Vertical guidelines*, paras 151–167.

<sup>149</sup> *Ibid*, para 151.

also notes that exclusive distribution may lead to foreclosure of other distributors and thereby reduce competition at that level.

**(B) Application of the block exemption to exclusive distribution agreements**

The block exemption for vertical agreements will apply to exclusive distribution agreements, provided that the market share of the supplier and the buyer is less than 30 per cent and that there are no ‘hard-core’ restrictions contrary to Article 4<sup>150</sup>. In particular there should be no restrictions on passive sales (sales in response to unsolicited orders)<sup>151</sup> to other territories; where there is a combination of exclusive distribution and selective distribution, there must be no restrictions even of active sales by retailers to end users<sup>152</sup>, and there must be no restrictions on sales between authorised distributors<sup>153</sup>. The *Guidelines* provide guidance for those cases in which individual assessment of agreements is necessary because the block exemption is not applicable<sup>154</sup>.

**(C) Factors to be considered in determining whether exclusive distribution agreements infringe Article 101(1)**

The Commission sets out the factors that are to be considered in determining whether Article 101(1) is infringed in paragraphs 153 to 160 of the *Vertical guidelines*. There is no reference to the judgment of the Court of Justice in *Société Technique Minière v Maschinenbau Ulm*<sup>155</sup>, where the Court held that an exclusive distribution agreement does not have as its object the restriction of competition, but must be considered in its market context to determine whether it has this effect. The reason that the Court of Justice took a stricter line in *Consten and Grundig v Commission*<sup>156</sup> was that in that case the distributor, Consten, was given absolute territorial protection against parallel imports<sup>157</sup>: because of the single market imperative in EU competition law, absolute territorial protection almost always infringes Article 101(1) and only rarely would benefit from Article 101(3)<sup>158</sup>. It is important however to bear in mind that an exclusive distribution agreement may not infringe Article 101(1) at all where there is not the additional element of absolute territorial protection.

As far as Article 101(1) is concerned the Commission states that the market position of the supplier and its competitors is of ‘major importance’, since the loss of intra-brand competition is problematic only if inter-brand competition is limited<sup>159</sup>. The stronger the position of the supplier, the more serious is the loss of intra-brand competition<sup>160</sup>. Where there are strong competitors, the restriction of intra-brand competition will generally be outweighed by inter-brand competition<sup>161</sup>, although there may be a risk of collusion and/or softening of competition where the number of competitors is ‘rather small’<sup>162</sup>. The *Guidelines* also discuss the possibility of exclusive distribution agreements having a foreclosure effect, which is considered unlikely unless the exclusive distributor has buyer

<sup>162</sup> *Ibid*, para 154.

power in the downstream market<sup>163</sup>; the *Guidelines* also discuss the relevance of the maturity of the market<sup>164</sup> and of the level of trade affected<sup>165</sup>.

#### (D) *The application of Article 101(3)*

Article 101(3) issues are discussed in paragraphs 161 to 164 of the *Vertical guidelines*; this is considered below<sup>166</sup>.

#### (iii) *Exclusive customer allocation agreements*<sup>167</sup>

Exclusive customer allocation refers to the situation in which a supplier agrees to sell its products to a distributor who will resell only to a particular class of customers. Exclusive customer allocation is discussed in paragraphs 168 to 173 of the *Vertical guidelines*, and is treated in much the same way as exclusive distribution, although the Commission makes a few specific comments on this particular type of vertical restraint<sup>168</sup>; in particular it says that the allocation of final consumers is unlikely to satisfy the criteria of Article 101(3)<sup>169</sup>.

#### (iv) *Selective distribution agreements*<sup>170</sup>

Selective distribution agreements are often deployed by producers of branded products. The producer establishes a system in which the products can be bought and resold only by authorised distributors and retailers. Non-authorised dealers will not be able to obtain the products, and the authorised dealers will be told that they can resell only to other members of the system or to the final consumer<sup>171</sup>. The *Vertical guidelines* state that selective distribution systems may restrict intra-brand competition, may foreclose access to the market, and may soften competition and/or facilitate collusion between suppliers or buyers<sup>172</sup>. In determining the application of Article 101 to selective distribution agreements, a distinction must be made between a 'purely qualitative' system and a 'quantitative' system; a purely qualitative selective distribution system will not infringe Article 101(1) at all even though, by its very nature, it may involve the restrictions just mentioned.

#### (A) *Purely qualitative selective distribution systems*<sup>173</sup>

The Court of Justice held in *Metro v Commission*<sup>174</sup> that:

the Commission was justified in recognising that selective distribution systems constituted, together with others, an aspect of competition which accords with Article [101(1)], provided that resellers are chosen on the basis of objective criteria of a qualitative nature relating to the technical qualifications of the reseller and its staff and the suitability of its trading premises and that such conditions are laid down uniformly for all potential resellers and are not applied in a discriminatory fashion. It is true that in such systems of distribution price competition is not generally emphasised either as an exclusive or indeed as a principal factor... However, although price competition is so important that it can never be eliminated it does not constitute the only effective form of competition or that to which absolute priority must in all circumstances be afforded<sup>175</sup>.

<sup>168</sup> Ibid, paras 169–172.

<sup>169</sup> Ibid, para 172.

<sup>170</sup> Ibid, paras 174–188.

<sup>171</sup> Ibid, para 174.

<sup>172</sup> Ibid, para 175.

<sup>173</sup> Ibid, para 175.

<sup>174</sup> Case 26/16 [1977] ECR 1875, [1978] 2 CMLR 44.

<sup>175</sup> Ibid, para 21.

The judgment in *Metro* confirmed that the Commission's approach in earlier decisions had been correct<sup>176</sup> and provided the basis for subsequent cases. The Court of Justice has itself repeated the *Metro* test on several occasions<sup>177</sup>, as has the General Court<sup>178</sup>; the Commission has relied on the *Metro* doctrine on various occasions<sup>179</sup>. Three criteria must be satisfied for a system to be treated as purely qualitative and therefore outside Article 101(1).

First, the product in question must be of a type that necessitates selective distribution. It is only in the case of such goods that the suppression of price competition – inherent in selective distribution – in favour of non-price competition is objectively justifiable. It is not only complex equipment such as cars and electronic equipment that has benefited from the *Metro* doctrine. From the judgments of the EU Courts and the decisions of the Commission it is possible to identify three categories of goods that may come within it, although it should be pointed out that this is not a formal classification that they themselves have adopted. The most obvious category consists of products that are technically complex, so that specialist sales staff and a suitable after-sales service are needed. In this category may be placed cars<sup>180</sup>, cameras<sup>181</sup>, electronic equipment such as hi-fis<sup>182</sup>, consumer durables<sup>183</sup>, clocks and watches<sup>184</sup> and computers<sup>185</sup>. The second category consists of products the brand image of which is particularly important, such as perfumes and

<sup>176</sup> The Commission had Concluded to various aspects of the selective distribution networks in *Kodak* JO [1970] L 147/24, [1970] CMLR D19 and *Omega Watches* JO [1970] L 242/22, [1970] CMLR D49, did not infringe Article 101(1) and found that Article 101(3) applied to other terms.

<sup>177</sup> See eg Case 99/79 *Lancôme SA v Etos BV* [1980] ECR 2511, [1981] 2 CMLR 164, paras 20–26; Case 31/80 *L'Oréal NV v de Nieuwe AMCK* [1980] ECR 3775, [1981] 2 CMLR 235, paras 15–21; Case 126/80 *Maria Salonia v Giorgio Poidomani* [1981] ECR 1563, [1982] 1 CMLR 64; Case 210/81 *Demo-Studio Schmidt v Commission* [1983] ECR 3045, [1984] 1 CMLR 63; Case 107/82 *AEG-Telefunken v Commission* [1983] ECR 3151, [1984] 2 CMLR 325; Case 75/84 *Metro v Commission (No 2)* [1986] ECR 3021, [1987] 1 CMLR 118.

<sup>179</sup> *Junghans* OJ [1977] L 30/10, [1977] 1 CMLR D82; *Murat* OJ [1983] L 348/20, [1984] 1 CMLR 219; *SABA (No 2)* OJ [1983] L 376/41, [1984] 1 CMLR 676; *IBM Personal Computers* OJ [1984] L 118/24, [1984] 2 CMLR 342; *Villeroy Boch* OJ [1985] L 376/15, [1988] 4 CMLR 461; *Grundig* OJ [1985] L 233/1, [1988] 4 CMLR 865; *Yves Saint Laurent Parfums SA* OJ [1992] L 12/24, [1993] 4 CMLR 120, mostly upheld on appeal Case T-19/92 *Groupement d'Achat Édouard Leclerc v Commission* [1996] ECR II-1851, [1997] 4 CMLR 995, and given further approval in 2001, Commission Press Release IP/01/713, 17 May 2001; *Parfums Givenchy System of Selective Distribution* OJ [1992] L 236/11, [1993] 5 CMLR 579, mostly upheld on appeal Case T-88/92 *Groupement d'Achat Édouard Leclerc v Commission* [1996] ECR II-1961, [1997] 4 CMLR 995; *Kenwood Electronics Deutschland GmbH* OJ [1993] C 67/9, [1993] 4 CMLR 389; *Schott-Zwiesel-Glaswerke* OJ [1993] C 111/4, [1993] 5 CMLR 85; *Grundig* OJ [1994] L 20/15, [1995] 4 CMLR 658; *Sony España SA* OJ [1993] C 275/3, [1994] 4 CMLR 581; Case C-439/09 *Pierre fabre Dermo-cosmétique SAS* [2011] ECR I-000, paras 40–41; the Commission's decision of 3 October 2007 in *Morgan Stanley/Visa International and Visa Europe* provides an interesting application of the *Metro* doctrine by analogy to a horizontal agreement: the decision was upheld on appeal to the General Court in Case T-461/07 *Visa Europe v Commission* [2011] ECR II-000.

<sup>180</sup> *BMW* OJ [1975] L 29/1, [1975] 1 CMLR D44; note that there is a specific block exemption for the distribution of cars: see 'Regulation 461/2010 on Motor Vehicle Distribution', pp 674–669 below.

<sup>181</sup> *Kodak* JO [1970] L 147/24, [1970] CMLR D19.

<sup>182</sup> *Grundig* OJ [1985] L 223/1, [1988] 4 CMLR 865 and again OJ [1994] L 20/15, [1995] 4 CMLR 658.

<sup>183</sup> Case 107/82 *AEG-Telefunken v Commission* [1983] ECR 3151, [1984] 3 CMLR 325; it was only when AEG's system was applied in a discriminatory way that it came within Article 101(1).

<sup>184</sup> *Omega Watches* JO [1970] L 242/22, [1970] CMLR D49; *Junghans* OJ [1977] L 30/10, [1977] 1 CMLR D82; note however that the Court of Justice in Case 31/85 *ETA Fabriques d'Ebauches SA v DK Investment SA* [1985] ECR 3933, [1986] 2 CMLR 674 doubted that mass-produced Swatch watches would qualify for selective distribution under the *Metro* doctrine: *ibid*, para 16.

<sup>185</sup> *IBM Personal Computers* OJ [1984] L 118/24, [1984] 2 CMLR 342.

luxury cosmetic products<sup>186</sup>, ceramic tableware<sup>187</sup> and gold and silver jewellery<sup>188</sup>. A third category is newspapers, the special characteristic of which is their extremely short shelf-life which necessitates particularly careful distribution<sup>189</sup>. The Commission has doubted whether plumbing fittings qualify for such treatment<sup>190</sup>.

The second requirement for the *Metro* doctrine to apply is that the criteria by which a producer may limit the retail outlets through which its products are resold must be purely qualitative in nature, laid down uniformly for all potential resellers and applied in a non-discriminatory manner<sup>191</sup>. Where this is the case, any dealer that can satisfy the qualitative criteria should be able to obtain the products in question: there is no restriction on the number of dealers in the system. A producer may require that its goods be sold only to retail outlets which employ suitably trained staff, have suitable premises in an appropriate area, use a suitable shop name consistent with the status of the brand, and provide a proper after-sales service; also a restriction on sales to non-authorized distributors and retailers is permitted, as is a restriction not to advertise products at 'cash-and-carry prices'. A problem is that it is not always obvious whether a particular requirement is 'qualitative' or not. Criteria that do not relate to the technical proficiency of outlets<sup>192</sup> but extend to such matters as the holding of minimum stocks, stocking the complete range of products, the achievement of a minimum turnover or a minimum percentage of turnover<sup>193</sup> in the products in question and the promotion of products have sometimes been treated as quantitative, although they have often been found to satisfy the criteria of Article 101(3)<sup>194</sup>.

The third requirement of the *Metro* doctrine is that any restrictions that are imposed on appointed distributors and retailers must go no further than is objectively necessary to protect the quality of the product in question<sup>195</sup>: this is a manifestation of the principle

<sup>186</sup> Case 99/79 *Lancôme SA etc v Etos BV* [1980] ECR 2511, [1981] 2 CMLR 164; Case T-19/92 *Groupement d'Achat Édouard Leclerc v Commission* [1996] ECR II-1851, [1997] 4 CMLR 995, paras 113–123; Case T-88/92 *Groupement d'Achat Édouard Leclerc v Commission* [1996] ECR II-1961, [1997] 4 CMLR 995, paras 105–117.

<sup>191</sup> For an example of the discriminatory application of a purely qualitative selective distribution system see Case 107/82 *AEG-Telefunken v Commission* [1983] ECR 3151, [1984] 3 CMLR 325, in particular at para 39; where a producer refuses to supply to certain distributors or retailers, the problem arises of whether this refusal is attributable to an agreement or concerted practice, or whether it is a unilateral act and therefore outside Article 101(1): see ch 3, "Unilateral" conduct and Article 101(1) in vertical cases', pp 105–110.

<sup>192</sup> *Vichy* OJ [1991] L 75/57, upheld on appeal Case T-19/91 [1992] ECR II-415 (restriction on the sale of Vichy products except to officially appointed pharmacists was quantitative).

<sup>193</sup> *Yves St Laurent* OJ [1992] L 12/24, [1993] 4 CMLR 120, mostly upheld on appeal Case T-19/92 *Groupement d'Achat Édouard Leclerc v Commission* [1996] ECR II-1851, [1997] 4 CMLR 995, paras 148–155; Case T-88/92 *Groupement d'Achat Édouard Leclerc v Commission* [1996] ECR II-1961, [1997] 4 CMLR 995, paras 141–148.

<sup>194</sup> See eg *Parfums Givenchy* OJ [1992] L 236/11, [1993] 5 CMLR 579; *Grundig* OJ [1994] L 20/15, [1995] 4 CMLR 658; in *Sony Pan-European Dealer Agreement (PEDA)*, Commission's XXVth Report on Competition Policy (1995), pp 135–136 the Commission approved a selective distribution system which contained a formal procedure for determining whether a particular undertaking qualifies for admission.

<sup>195</sup> See eg *Grohe* OJ [1985] L 19/17, [1988] 4 CMLR 612; *Ideal Standard* OJ [1985] L 20/38, [1988] 4 CMLR 627.

of proportionality. In *Hasselblad*<sup>196</sup> objection was taken by the Commission to provisions which enabled the producer to exercise supervision of the advertising of its distributors and retailers, as this would mean that control could be exercised over advertisements indicating cuts in prices. In *AEG-Telefunken v Commission*<sup>197</sup> the Court of Justice made clear that restrictions would not be permitted simply in order to guarantee dealers a minimum profit margin. In *Pierre Fabre*<sup>197a</sup> the Court of Justice held that a restriction on Internet selling of non-prescription cosmetic products could not be justified by the need to provide individual advice to the customer or by the protection of brand image.

**(B) Selective distribution systems that are not purely qualitative**

Where a selective distribution system is not purely qualitative in the sense of the *Metro* doctrine it may be caught by Article 101(1), although it may also benefit from the block exemption conferred by Regulation 330/2010<sup>198</sup> or satisfy Article 101(3) on an individual basis<sup>199</sup>. In determining whether Article 101(1) is infringed the Commission will look at the market position of the supplier and its competitors, since the loss of intra-brand competition is problematic only where inter-brand competition is weak<sup>200</sup>. A further issue is whether, in a particular market, there is a number of selective distribution systems in operation: where this is the case the Commission is anxious that there may be a lack of intra-brand competition, a foreclosure of certain types of distributors and retailers (for example those that sell only online) and that collusion may be facilitated<sup>201</sup>. In *Metro v Commission (No 2)*<sup>202</sup> the Court of Justice held that where, in a particular market, the existence of a number of selective distribution systems leaves no room for other methods of distribution or results in a rigidity in price structure which is not balanced by other types of competition, Article 101(1) may apply after all<sup>203</sup>.

**(C) Application of the block exemption to selective distribution systems**

Selective distribution agreements may benefit from the block exemption conferred by Regulation 330/2010. To do so the market share held by each of the parties must be below 30 per cent<sup>204</sup>, and the requirements of Articles 4(a), 4(c), 4(d) and 5(c)<sup>205</sup> must be respected. Where a selective distribution system benefits from the block exemption, but there are minimal efficiency-enhancing effects, for example because the product is not suitable for this form of distribution, the block exemption could be withdrawn where appreciable anti-competitive effects occur<sup>206</sup>. The Commission has indicated that the benefit of the block exemption may be withdrawn from selective distribution systems where there is a 'cumulative effect' problem; however it says that such a problem is unlikely to arise when the share of the market covered by selective distribution is below 50 per cent, or

<sup>206</sup> *Vertical guidelines*, para 176.

where this figure is exceeded but the aggregate market share of the five largest suppliers is below 50 per cent<sup>207</sup>. An individual supplier with a market share of less than 5 per cent is unlikely to be considered as making a contribution to the cumulative effect<sup>208</sup>.

In its decision in *Yamaha*<sup>209</sup> the Commission imposed a fine of €2.56 million on Yamaha for operating a selective distribution system in a way that led to the partitioning of the single market and to the fixing of resale prices. The Commission objected to a series of restrictions imposed on its dealers<sup>210</sup>, including obligations on official distributors to sell only to final customers, since this amounted to a restriction on cross-supplies within the network; obligations on official distributors to purchase exclusively from the Yamaha national subsidiary, as this could inhibit cross-border trade; and obligations on official distributors to contact Yamaha before exporting via the Internet, in relation to which sales there should have been no restriction. Yamaha's selective distribution system failed to benefit from the block exemption partly because in several markets its market share exceeded 30 per cent<sup>211</sup> and partly because there were violations of Article 4(a), (b) and (d)<sup>212</sup>. In *Pierre Fabre*<sup>212a</sup> the Court of Justice held that a clause prohibiting, de facto, Internet selling in a selective distribution agreement will cause the agreement to lose the benefit of the block exemption under Article 4(c)<sup>212b</sup>.

In some systems of domestic law a selective distribution system is binding on unauthorised third parties, who can be sued for unfair competition if they obtain and attempt to sell the products; in German law there is a requirement on the producer which uses such a system to ensure that it is 'impervious', that is to say that its products are kept within the system; however the imperviousness ('lückenlosigkeit') of the system is not a requirement for its validity under EU competition law<sup>213</sup>.

#### (v) Franchising agreements<sup>214</sup>

##### (A) *Pronuptia v Schillgalis*

The application to franchising agreements of Article 101 was explored by the Court of Justice in *Pronuptia de Paris v Schillgalis*<sup>215</sup>. Mrs Schillgalis, the franchisee for Hamburg, Oldenburg and Hanover, was in dispute with Pronuptia, the franchisor, over her royalty payments and in the course of litigation pleaded that the agreement was void as it contravened Article 101. The Court identified the crux of a franchise system: that it enables a franchisee to operate as an independent business whilst using the name and know-how of the franchisor. The transfer of intellectual property rights from the franchisor to the franchisee is the feature of franchises that distinguishes them from more conventional distribution systems. In a franchise, the franchisee pays a fee to the franchisor for the right to use the know-how, trade marks, designs, logos and other intellectual property rights ('IPRs') of the franchisor. In order for the franchise system to work effectively it is essential that each franchisee should conform with the uniform commercial methods

<sup>214</sup> *Vertical guidelines*, paras 189–191.

<sup>215</sup> Case 161/84 [1986] ECR 353, [1986] 1 CMLR 414; see Dubois 'Franchising Under EC Competition Law: Implications of the *Pronuptia* Judgment and the Proposed Block Exemption' [1986] Fordham Corporate Law Institute ch 6; Waelbroeck 'The *Pronuptia* Judgment – A Critical Appraisal' [1986] Fordham Corporate Law Institute ch 9; Venit '*Pronuptia*: Ancillary Restraints or Unholy Alliances' (1986) 11 EL Rev 213.

laid down by the franchisor: from the consumer's point of view, it is important that all franchised outlets should achieve the same standard. Therefore it is essential that the franchisor should be able to impose common standards on all franchisees. Also, as the transfer of IPRs is vital to the whole exercise, it is legitimate for the franchisor to impose terms on the franchisee to protect these rights. The Court concluded that restrictions in these two categories, that is to maintain common standards and to protect IPRs, did not infringe Article 101(1). However restrictions that could divide the market territorially or which imposed resale price maintenance would be within Article 101(1), although they might satisfy Article 101(3) in certain circumstances<sup>216</sup>.

**(B) Application of the block exemption to franchising**

Regulation 330/2010 will apply to franchising agreements, provided that the market share of each of the parties is below 30 per cent and that there are no Article 4 hard-core restrictions. Paragraph 190 of the *Vertical guidelines* refers to paragraphs 24 to 46, which deal specifically with the meaning of vertical agreements in the block exemption and the extent to which the licensing of IPRs, including franchise agreements, are covered by it<sup>217</sup>.

**(vi) Exclusive supply agreements<sup>218</sup>**

Exclusive supply agreements have as their main element that the supplier is obliged or induced to sell the contract products only to one buyer, in general or for a particular use<sup>219</sup>. Exclusive supply agreements may benefit from the block exemption, provided that the supplier's and the buyer's market shares satisfy the 30 per cent cap<sup>220</sup>. Paragraphs 194 to 199 discuss the application of Article 101(1) to exclusive supply agreements that are not covered by the block exemption; paragraphs 200 to 201 consider the application of Article 101(3)<sup>221</sup>. In considering whether Article 101(1) applies to such agreements the buyer's market share in its downstream market will be of particular importance: the greater its market share there, the more likely there is to be an anti-competitive effect<sup>222</sup>; the duration of the supply obligation will also be of relevance<sup>223</sup>. Other matters, such as entry barriers<sup>224</sup>, the countervailing power of suppliers<sup>225</sup> and the level of trade affected<sup>226</sup>, are also discussed.

**(vii) Up-front access payments<sup>227</sup>**

Up-front access payments are fees paid by a supplier to a buyer to remunerate the latter for services supplied: for example 'slotting allowances' may be paid to a supermarket in return for access to shelf space, and pay-to-stay fees may be paid to ensure the continued presence of a product on the shelf for a longer period. Paragraph 203 of the *Guidelines* explains that, where the supplier's and buyer's market shares do not exceed 30 per cent, up-front access payments are block exempted. The *Guidelines* then explain the

<sup>216</sup> See *Vertical guidelines*, para 47.

<sup>217</sup> On Article 2(3) of Regulation 330/10 see 'Article 2(3) is applicable only where there is a vertical agreement', pp 659–657 below.

<sup>218</sup> *Vertical guidelines*, paras 192–202.

<sup>219</sup> *Ibid*, para 192.                      <sup>220</sup> *Ibid*, para 193.

<sup>221</sup> See 'The Application of Article 101(3) to Agreements that do not Satisfy the Block Exemption', pp 672–674 below.

<sup>222</sup> *Vertical guidelines*, para 194.

<sup>223</sup> *Ibid*, para 195; the Commission considers that exclusive supply agreements of more than five years are unlikely to fulfil the criteria of Article 101(3).

<sup>224</sup> *Ibid*, para 197.                      <sup>225</sup> *Ibid*, para 198.

<sup>226</sup> *Ibid*, para 199.

<sup>227</sup> *Ibid*, paras 203–208.

extent to which such payments might infringe Article 101(1), either by foreclosure of the downstream<sup>228</sup> or the upstream<sup>229</sup> market or by the facilitation of collusion<sup>230</sup>; the possibility that up-front access payments might lead to efficiencies is discussed in paragraphs 207 and 208, for example by improving the use of shelf space or by ensuring that the supplier shares the risk that the introduction of a new product might fail.

**(viii) Category management agreements<sup>231</sup>**

A category management agreement is an agreement between a supplier and a distributor whereby the latter entrusts the supplier with the marketing of a category of products, not only the marketing of the supplier's own products: for example a supplier might be appointed the 'category captain' for breakfast cereals or for non-alcoholic beverages within a chain of supermarkets. Paragraph 209 states that such agreements will benefit from the block exemption where both parties' market shares do not exceed 30 per cent. Paragraph 210 acknowledges that in most cases category management agreements do not raise competition concerns; however the possibility that they might have a foreclosure effect upstream in the market is noted in that paragraph, and the Commission suggests that any analysis should be conducted as it would be in the case of single branding agreements<sup>232</sup>. The possibility that category management might facilitate collusion between distributors or between suppliers is discussed in paragraphs 211 and 212 respectively, and their scope for improving efficiency in paragraph 213.

**(ix) Tying agreements<sup>233</sup>**

A tying agreement arises where a supplier makes the supply of one product (the 'tying product') conditional upon the buyer also buying a separate product (the 'tied product'). Tying may constitute an abuse of a dominant position contrary to Article 102<sup>234</sup>; however, a vertical agreement imposing a tie may also infringe Article 101(1) where it has a 'single branding' effect in relation to the tied product<sup>235</sup>. Tying agreements benefit from the block exemption when the market share of the supplier, on the markets both for the tying and for the tied products, and the market share of the buyer on the relevant upstream markets are below the 30 per cent cap<sup>236</sup>. Where the market share threshold is exceeded paragraphs 219 to 221 discuss the application of Article 101(1) to tying agreements: the market position of the supplier is the most important issue<sup>237</sup>; the position of its competitors and the entry barriers to the market for the tying product must also be considered<sup>238</sup>. Tying is less likely to be problematic where customers possess significant buyer power<sup>239</sup>. Paragraph 222 considers the possibility of tying practices benefiting from the exception conferred by Article 101(3)<sup>240</sup>.

**(x) Resale price restrictions<sup>241</sup>**

**(A) Minimum and fixed resale prices infringe Article 101(1)**

The imposition upon distributors and retailers of minimum or fixed resale prices will be held to infringe Article 101(1): such agreements are considered to have as their object the

<sup>241</sup> *Vertical guidelines*, paras 223–229.

restriction of competition<sup>242</sup>. The Commission has condemned resale price maintenance on various occasions<sup>243</sup>. Furthermore this practice amounts to a hard-core restriction contrary to Article 4(a) of the block exemption<sup>244</sup>; paragraph 48 of the *Guidelines* considers a range of practices that might be considered as having as their ‘direct or indirect object’, to use the words of Article 4, the imposition of minimum or fixed resale prices<sup>245</sup>.

### (B) *Minimum and fixed prices under Article 101(3)*

In recent years there has been a growing recognition that, in some cases, there may be efficiency arguments in favour of resale price maintenance<sup>246</sup>. On one occasion the Commission appeared to be sympathetic to the idea that a newspaper publisher should be allowed to impose a cover price on newspapers<sup>247</sup>. It should be recalled that the General Court in *Matra Hachette v Commission*<sup>248</sup> has ruled that the parties to any kind of agreement are entitled to defend it under Article 101(3)<sup>249</sup>, and that the Commission has set out, in its *Article [101(3)] Guidelines*<sup>250</sup>, the type of evidence that is required in support of a defence. Paragraph 225 of the *Vertical guidelines* acknowledges that resale price main-

<sup>242</sup> See ch 3, ‘Agreements that have as their object the prevention, restriction or distortion of competition’, p 119; minimum and fixed resale prices will also infringe the Chapter I prohibition in the UK Competition Act 1998: see ‘UK Law’, pp 677–680 below; in the US the maintenance of minimum resale prices was for many years illegal *per se* as a result of the Supreme Court decision in *Dr Miles Medical Co v John D Park & Sons Co* 220 US 373 (1911); however in *Leegin Creative Leather Products, Inc v PSKS, Inc* 551 US 877 (2007), the Supreme Court explicitly overruled *Dr Miles*, holding that resale price maintenance should be subject to a rule of reason standard henceforth; for discussion of *Leegin*, supportive of the majority approach, see Klein ‘Competitive Resale Price Maintenance in the Absence of Free Riding’ (2009) 76(2) *Antitrust Law Journal* 431; and for criticism see Brunell ‘Overruling *Dr Miles*: The Supreme Trade Commission In Action’ (2007) 52 *Antitrust Bulletin* 475.

For criticism see Gippini-Fournier (ch 16 n 244 above) and Lao ‘Free Riding: An Overstated, and Unconvincing, Explanation for Resale Price Maintenance’ in Pitofsky (ed) *How the Chicago School Overshot the Mark* (Oxford University Press, 2008), pp 196–232.

<sup>247</sup> See the Commission’s XXIXth *Report on Competition Policy* (1999), pp 161–162 (although the Commission never revealed publicly what conclusion it reached on the matter); the Commission’s Notice in *Agence et Messageries de la Presse OJ* [1987] C 164/2 had suggested that it might countenance resale price maintenance for newspapers and periodicals; see also Case 243/85 *Binon & Cie v SA Agence et Messageries de la Presse* [1985] ECR 2015, [1985] 3 CMLR 800, para 46.

<sup>248</sup> Case T-17/93 [1994] ECR II-595.

<sup>249</sup> See ch 4, ‘The Article 101(3) Criteria’, pp 155–166.

<sup>250</sup> OJ [2004] C 101/97.

tenance might lead to efficiencies in the sense of Article 101(3). Paragraph 225 gives, as a ‘most notable’ example, resale price maintenance imposed by a manufacturer that introduces a new product to the market, where this induces the distributor to increase its sales efforts for the new product, thereby expanding overall demand and making the launch a success, itself a benefit to consumers.

### (C) *Recommended and maximum resale prices*

Paragraphs 226 to 229 of the *Vertical guidelines* consider the extent to which it is lawful to recommend a resale price to a distributor or retailer or to impose a *maximum* rather than a minimum price<sup>251</sup>. Article 4(a) of the block exemption provides that these practices are not ‘hard-core’ restrictions, ‘provided that they do not amount to a fixed or minimum sale price as a result of pressure from, or incentives offered by, any of the parties’. Agreements containing recommendations or maximum prices would therefore be exempt, provided that the market share of each of the parties does not exceed the cap of 30 per cent<sup>252</sup>. Where the block exemption is not applicable the Commission states at paragraph 227 of the *Guidelines* that it will consider whether recommended or maximum prices might work ‘as a focal point for the resellers and might be followed by most or all of them’<sup>253</sup>; it will also examine whether these practices could soften competition or facilitate collusion between suppliers<sup>254</sup>. The market power of the supplier is an important factor to be taken into consideration<sup>255</sup>; the stronger its power over the market, the greater the risk that a maximum or recommended price will lead to uniform pricing<sup>256</sup>. Paragraph 229 considers the possible application of Article 101(3) to maximum or recommended prices. In *Repsol CPP* the Commission accepted commitments from Repsol to modify its long-term exclusive supply agreements with service stations selling its fuel, but which explicitly allowed it to impose maximum or recommended prices<sup>257</sup>.

## 7. Vertical Agreements: Regulation 330/2010<sup>258</sup>

### (A) Introduction

It was explained above that the Commission over many years tended to adopt a formalistic (insufficiently economics-oriented) approach to the application of Article 101(1); as a result it was necessary for many agreements to be brought within the ‘safe haven’ of one of the Commission’s block . It adopted Regulation 1983/83 for exclusive distribution agreements<sup>259</sup>, Regulation 1984/83 for exclusive purchasing agreements<sup>260</sup> and Regulation

<sup>251</sup> In *Albrecht v Herald Co* 390 US 145 (1968) the US Supreme Court condemned *per se* the imposition of maximum resale prices; however it overruled itself in *State Oil v Khan*, substituting a rule of reason approach to this particular phenomenon: 522 US 3 (1997); see Steuer ‘*Khan* and the Issue of Dealer Power – Overview’ (1997–98) 66 Antitrust Law Journal 531; Blair and Lopatka ‘*Albrecht* Overruled – At Last’ *ibid.*, 537; Grimes ‘Making Sense of *State Oil Co v Khan*: Vertical Maximum Price Fixing under a Rule of Reason’ *ibid.*, 567.

<sup>260</sup> OJ [1983] L 173/5.

4087/88 for franchise agreements<sup>261</sup>. However dissatisfaction with the over-application of Article 101(1) and the formalistic nature of the block exemptions became widespread, and led to the publication in 1997 of the Commission's *Green Paper on Vertical Restraints in [EU] Competition Policy*<sup>262</sup> suggesting a range of possible options for reform. This document paved the way for the adoption in 1999 of Commission Regulation 2790/99<sup>263</sup>. The new block exemption was radical in various ways<sup>264</sup>: it was much broader in scope than its predecessors, applying to virtually all vertical agreements in both the goods and services sector; it was more economics-based, in particular by including a market share cap for determining which agreements would benefit from the block exemption; and it was less prescriptive than its predecessors, containing a relatively limited list of 'hard-core' restrictions that could not be included in an agreement. Regulation 2790/99 was a considerable improvement on the system it replaced and entered into force on 1 June 2000. The Regulation was accompanied by extensive *Guidelines on Vertical Restraints* and appears to have worked well in practice<sup>265</sup>.

The Commission published in July 2009 a draft revised block exemption for vertical agreements together with draft guidelines and asked for comments within two months, noting when it did so that the main suggestions for amendment were prompted by the increased buyer power of retailers and the evolution of online sales on the Internet<sup>266</sup>. The two matters identified by the Commission generated the most extensive debate<sup>267</sup>, and the issues involved, and the outcome, will be discussed in the context of the new Regulation below. With the exception of the change in the operation of the rules on market shares, the new Regulation represents a mild evolution of the law, as opposed to the revolution of Regulation 2790/99.

## (B) Brief description of the provisions of the block exemption

The Commission adopted the block exemption on Vertical Agreements and Concerted Practices on 20 April 2010<sup>268</sup>. Regulation 330/2010 entered fully into force on 1 June 2010<sup>269</sup>. Article 9 provided transitional relief for agreements already in force on 31 May 2010 and which satisfy the terms of Regulation 2790/99, but not the new one, until 31 May 2011. The Regulation is without prejudice to the application of Article 102<sup>270</sup>. The Regulation should be read in conjunction with the accompanying *Vertical guidelines* which were published in the Official Journal in May 2010<sup>271</sup>.

<sup>271</sup> OJ [2010] C 130/1.

The Regulation consists of 16 recitals and 10 Articles. Article 1 defines certain key terms such as ‘vertical agreements’, ‘vertical restraints’, ‘competing undertakings’ and ‘non-compete obligation’. Article 2 is the provision that actually confers block exemption upon certain vertical agreements pursuant to Article 101(3) TFEU; Article 3 imposes a market share cap of 30 per cent on both the supplier and the buyer. Article 4 sets out a list of hard-core restrictions that will prevent the block exemption from applying to an agreement. Article 5 sets out a list of ‘excluded restrictions’ that fail to benefit from the block exemption: it is important to note however that the inclusion of Article 5 obligations does not prevent the block exemption from applying to the remainder of the agreement.

Recital 15 of Regulation 330/2010 refers to Article 29 of Regulation 1/2003 which provides for the possibility of the Commission or the competent authority of a Member State to withdraw the benefit of the block exemption in certain circumstances. Article 6 gives the power to the Commission by regulation to disapply the block exemption to vertical agreements containing specific restraints in a relevant market more than 50 per cent of which is covered by parallel networks of similar vertical restraints. Articles 7 and 8 contain provisions on the application of market share and turnover thresholds. Articles 9 and 10 deal respectively with transitional matters and entry into force of the Regulation.

### (C) Article 1: definitions

Article 1 contains important definitions. These will be explained below, in the specific context in which they are used in the Regulation. Of particular importance is Article 1(1) (a) which defines a ‘vertical agreement’ as:

an agreement or concerted practice entered into between two or more undertakings each of which operates, for the purposes of the agreement or the concerted practice, at a different level of the production or distribution chain, and relating to the conditions under which the parties may purchase, sell or resell certain goods or services.

The Regulation applies to vertical agreements to the extent that they contain ‘vertical restraints’. Article 1(1)(b) provides that ‘vertical restraint’ means a restriction of competition in a vertical agreement falling within Article 101(1). These key expressions will be discussed in the context of Article 2 below.

Article 1(2) of Regulation 330/2010 contains rules extending the expressions ‘undertaking’, ‘supplier’ and ‘buyer’ to include connected undertakings.

### (D) Article 2: scope of the block exemption

#### (i) Article 2(1): block exemption for vertical agreements<sup>272</sup>

Article 2(1) confers block exemption on vertical agreements to the extent that they contain vertical restraints pursuant to Article 101(3) of the Treaty. Several points should be noted about Article 2(1).

#### (ii) Many vertical agreements do not infringe Article 101(1)

It is worth repeating that many vertical agreements do not infringe Article 101(1)<sup>273</sup>; where an agreement does not infringe Article 101(1) it follows that, no matter how generous and flexible the Regulation is, it will not be necessary to bring the agreement in

<sup>272</sup> *Vertical guidelines*, paras 23–25.

<sup>273</sup> See ‘Vertical Agreements: Article 101(1)’, pp 628–649 above.

question within its terms. Despite this, however, many undertakings endeavour to satisfy the block exemption, which provides a ‘safe haven’ for many vertical agreements: as explained earlier, most firms will have no interest in knowing whether their agreement infringes Article 101(1) if they know that they benefit from block exemption under Article 101(3) anyway<sup>274</sup>. Recital 9 of the Regulation states that there is no presumption that agreements infringe Article 101(1) or that it will fail to satisfy Article 101(3) where either of the parties’ market shares exceeds the prescribed threshold in Article 3, a point repeated in paragraphs 23 and 96 of the *Guidelines*. Where the thresholds are exceeded an agreement requires individual analysis<sup>275</sup>. An example of a vertical agreement not infringing Article 101(1) would be a purely qualitative selective distribution system<sup>276</sup>; only to the extent that it is not purely qualitative – for example because the product is not of the type that necessitates selective distribution<sup>277</sup> or because quantitative as well as qualitative criteria are applied<sup>278</sup> – is it necessary to have resort to the block exemption.

### (iii) If it is not forbidden, it is permitted

A second point to stress about the Regulation is that, in relation to a vertical agreement as defined in Article 1(1)(a), if the Regulation does not prohibit something, it is permitted. This is the consequence of not stating what must be included in a vertical agreement, but only stating the hard-core restrictions which must not be in it, and is an essential feature of the Regulation. Block exemption is available under Regulation 330/2010 to all vertical agreements, as defined, subject to Articles 2(2), 2(4) and 2(5) on agreements made by associations of retailers, agreements between competing undertakings and agreements subject to other block exemptions, Article 3 on market share, and to Articles 4 and 5 which deal with particular vertical restraints that the Commission has concerns about.

### (iv) The definition of a vertical agreement

Paragraph 25 of the *Vertical guidelines* discusses the meaning of ‘vertical agreement’<sup>279</sup>. Indent (a) of that paragraph explains the distinction between an agreement and/or concerted practice on the one hand and unilateral conduct, which is not caught by Article 101 but could be by Article 102, on the other. In particular, drawing on the judgments of the Court of Justice in *Commission v Volkswagen*<sup>280</sup> and the General Court in *Bayer v Commission*<sup>281</sup>, the Commission sets out the circumstances in which an apparently unilateral act on the part of one party might, in fact, be characterised as an agreement and/or concerted practice due to the explicit or tacit acquiescence of the other<sup>282</sup>.

<sup>274</sup> See ‘Introduction’, p 617 above.

<sup>275</sup> On the burden of proof in this situation see Article 2 of Regulation 1/2003, OJ [2003] L 1/1 and ch 4, ‘The burden of proving that the conditions of Article 101(3) are satisfied’, pp 152–153.

<sup>276</sup> See ‘Selective distribution agreements’, pp 641–645 above.

<sup>277</sup> See eg *Grohe* OJ [1985] L 19/17, [1988] 4 CMLR 612; note that, where it is necessary to apply the Regulation to a selective distribution system, the definition of this term in Article 1(1)(e) does not bring into account the nature of the product; this consideration is relevant only to the question of whether the system falls outside Article 101(1) altogether.

<sup>278</sup> See ‘Purely qualitative selective distribution systems’, p 641–644 above.

<sup>279</sup> The definition of a vertical agreement is identical to that in Council Regulation 1215/99, OJ [1999] L 148/1.

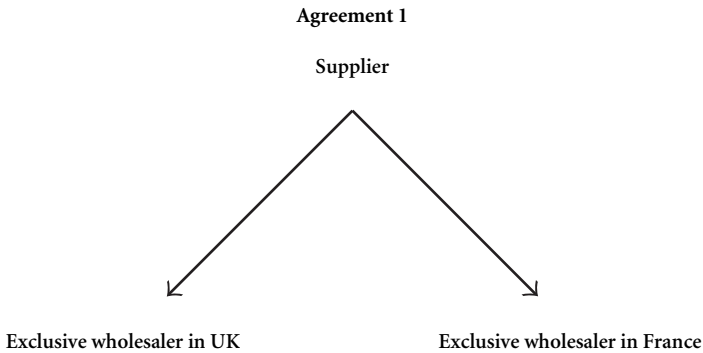

<sup>280</sup> Case C-74/04 P [2006] ECR I-6585, [2008] 4 CMLR 1297.

<sup>281</sup> Case T-41/96 [2000] ECR II-3383, [2001] 4 CMLR 126 upheld on appeal in Cases C-2/01 P etc *BAI and Commission v Bayer* [2004] ECR I-26, [2004] 4 CMLR 653.

<sup>282</sup> On the meaning of agreements and concerted practices see ch 3, ‘Agreements, Decisions and Concerted Practices’, pp 99–115.

**(v) The exempted agreement may be multilateral**

Article 2(1) confers block exemption on agreements between two *or more* undertakings<sup>283</sup>. However the Regulation applies only where each of the undertakings operates, for the purposes of the agreement, at a different level of the market<sup>284</sup>. Some illustrations may help:

**Fig. 16.7**

- (a) The agreement is trilateral
- (b) The supplier supplies goods to each wholesaler
- (c) It is agreed that neither wholesaler will sell into the other's territory

The agreement is not vertical since there are two parties, the wholesalers, at the same level of the production and distribution chain.

**Agreement 2**

**Fig. 16.8**

- (a) The agreement is trilateral
- (b) The agreement sets out the mutual rights and obligations of each party

The agreement is vertical since each party operates at a different level of the production and distribution chain.

Where the agreement is in the form of Agreement 2, Article 3(2) provides that the market shares of the supplier and the wholesaler on their respective downstream markets and the market share of the wholesaler and the retailer on their respective purchase markets would have to be considered for the purpose of the market share cap in Article 3(1)<sup>285</sup>.

<sup>283</sup> Pursuant to the power conferred on the Commission by Article 1(a) of Council Regulation 19/65, OJ [1965] L 36/533, as amended by Council Regulation 1215/99, OJ [1999] L 148/1.

<sup>284</sup> *Vertical guidelines*, para 25(c).

<sup>285</sup> *Ibid*, para 90.

**(vi) 'For the purposes of the agreement'**

The definition of a vertical agreement in Article 1(1)(a) refers to undertakings which operate, '*for the purposes of the agreement or concerted practice*, at a different level of the production or distribution chain' (emphasis added). It follows that the fact that two firms that are both manufacturers enter into an agreement does not in itself mean that the agreement is horizontal rather than vertical. If a manufacturer of a chemical were to supply the chemical to another chemical manufacturer, the relationship would still be vertical since, for the purposes of that agreement, each undertaking would be operating at a different level of the market. The expression 'for the purposes of the agreement' is essential to this analysis since, without it, it would not be possible to say that the two chemical companies operate 'at a different level of the production or distribution chain'. However Article 2(4) of the Regulation guards against the risk that vertical agreements as defined could be used as a cloak for horizontal restrictions by denying block exemption to certain agreements between competing undertakings<sup>286</sup>.

**(vii) Agreements with final consumers would not normally be vertical agreements**

Agreements entered into with final consumers would not normally be vertical agreements, since they would not be entered into 'between two or more undertakings': a final consumer in the sense of a member of the public buying goods or services would not be carrying on an economic activity<sup>287</sup>. For the same reason, however, such agreements would not infringe Article 101(1) in the first place, and therefore would not need to be block exempted.

**(viii) 'Relating to the conditions under which the parties may purchase, sell or resell certain goods or services'**

To qualify as a vertical agreement it must relate to the conditions under which the parties may purchase, sell or resell certain goods or services. It appears, therefore, that rental and leasing agreements would not be covered<sup>288</sup>; nor would bartering agreements. Provisions in vertical agreements which do not themselves relate to purchase, sale or resale would not be covered: an example would be a covenant not to compete in research and development<sup>289</sup>.

**(ix) Interconnection agreements**

In many industries undertakings require access to an infrastructure owned by someone else in order to be able to operate on the market: for example in the electronic communications sector access to, and interconnection of, all forms of communications networks may be crucial; in electricity access will be needed to the national grid. Where access is provided there will be an 'interconnection agreement' between the owner of the infrastructure and the service provider. It would seem that such an agreement would be vertical in the sense of Article 2(1), since it would relate to the 'conditions under which the parties may purchase, sell or resell... services'<sup>290</sup>. However in many (most?) such cases

<sup>286</sup> See 'Article 2(4): agreements between competing undertakings', p 658–659 below.

<sup>287</sup> *Vertical guidelines*, para 25(b): on the meaning of the term 'undertaking' see ch 3, 'Undertakings', pp 83–99; however the supplier would be an undertaking, and would infringe Article 102 if it held a dominant position and acted in an abusive manner and the other terms of that provision were satisfied: on Article 102 generally see ch 5.

<sup>288</sup> *Vertical guidelines*, para 26.

<sup>289</sup> *Ibid*, para 26.

<sup>290</sup> Note however that the agreement would not be vertical in so far as it is a rental or leasing arrangement: see above.

the owner of the infrastructure would have a market share in excess of 30 per cent, so that Article 3(1) of the Regulation would prevent the application of the block exemption<sup>291</sup>.

### (x) Agency

Many agency agreements fall outside Article 101(1); paragraphs 12 to 21 of the *Vertical guidelines* deal with this<sup>292</sup>. However those paragraphs suggest that some agency agreements could fall within Article 101(1), if they could foreclose access to the market or if they might facilitate collusion. It is necessary to consider whether an agency agreement that does fall within Article 101(1) would be eligible for block exemption. In such a situation the agent is operating at a different level of the market from the principal in the sense of Article 1(1)(a) of the Regulation. Therefore, to the extent that the agreement relates to the conditions under which the principal or the agent may purchase, sell or resell goods or services, the Regulation could apply: a point specifically noted in paragraph 19 of the *Vertical guidelines*. In such cases it will be necessary to avoid the inclusion of hard-core restrictions of the kind listed in Article 4<sup>293</sup>; paragraph 49 of the *Guidelines* states that an obligation on an agent preventing it from sharing its commission with its customers would be a 'hard-core' restriction under Article 4(a). Also it will be necessary to avoid non-compete provisions of the kind set out in Article 5<sup>294</sup>.

### (xi) Article 2(2): associations of retailers<sup>295</sup>

A common business phenomenon is that small retailers establish an association for the purchase of goods, which they then resell to final consumers<sup>296</sup>. This is necessary to enable the retailers to achieve some bargaining power in their dealings with large manufacturers and/or intermediaries. Consumers will benefit if the retailers are enabled to obtain lower prices which are transmitted on to them. Article 2(2) provides that *vertical* agreements entered into between such an association and (a) its suppliers or (b) its members can benefit from block exemption, provided that all its members are retailers of goods and provided that no individual member of the association, together with its connected undertakings<sup>297</sup>, has a total annual turnover in excess of €50 million<sup>298</sup>. The Regulation does not define the term retailer, but paragraph 29 of the *Vertical guidelines* says that '[r]etailers are distributors reselling goods to final consumers'<sup>299</sup>. The concluding words of Article 2(2) provide that the block exemption for such vertical agreements is without prejudice to the application of Article 101 to the horizontal agreement between the members of the association

<sup>291</sup> Where the infrastructure is indispensable for a firm to operate on a downstream market Article 102 may be applicable: see ch 17, 'Refusal to supply a new customer', pp 697–711.

<sup>292</sup> See 'The application of the Commission's *Vertical guidelines* to agency agreements', pp 621–623 above.

<sup>293</sup> On Article 4 generally see 'Article 4: hard-core restrictions', pp 663–669 below.

<sup>294</sup> On Article 5 generally see 'Article 5: obligations in vertical agreements that are not exempt', pp 669–670 below.

<sup>295</sup> *Vertical guidelines*, paras 28 and 29.

<sup>296</sup> See ch 15, 'Purchasing Agreements', pp 603–605.

<sup>297</sup> Articles 1(2) and 8 deal of Regulation 330/2010 respectively with connected undertakings and the calculation of turnover.

<sup>298</sup> The final sentence of para 29 of the *Guidelines* states that where only a limited number of the members of the association have a turnover exceeding €50 million and where those members together represent less than 15 per cent of the aggregate turnover of all the members, 'the assessment under Article 101 will normally not be affected'; this presumably refers to the *individual* assessment under Article 101; if this is intended to mean that the block exemption would still be applicable, it does not provide any legal justification for this view.

<sup>299</sup> It presumably follows that if the association purchases for its own use, as for example a group of National Health Service hospitals in the UK, Article 2(2) would not be applicable since the group does not purchase in order to *sell* to final consumers.

or decisions of the association itself<sup>300</sup>. Paragraph 30 of the *Guidelines* explains that the lawfulness of a vertical agreement entered into by an association of retailers under Article 2(2) can be determined only after it has been concluded that any underlying horizontal agreement between the members of the association is itself lawful.

**(xii) Article 2(3): ancillary provisions in relation to intellectual property rights<sup>301</sup>**

Article 2(3) deals with the important question of the extent to which vertical agreements which contain provisions on intellectual property rights can benefit from Regulation 330/2010. The first sentence of Article 2(3) provides that the exemption shall apply to vertical agreements:

containing provisions which relate to the assignment to the buyer or use by the buyer of intellectual property rights<sup>302</sup>, provided that those provisions do not constitute the primary object of such agreements and are directly related to the use, sale or resale of goods or services by the buyer or its customers.

Essentially the policy is that Regulation 330/2010 will apply where any provisions relating to intellectual property rights are ancillary to the main purpose of the vertical agreement<sup>303</sup>; although the Regulation itself does not use the term, it is helpful to call such provisions ‘IPR provisions’. The policy of Article 2(3) is simple to state; however the actual application of Article 2(3) is not without its difficulties. A number of points should be noted: the five headings (xiii–xvii) used below are based upon paragraph 31 of the Commission’s *Guidelines*.

**(xiii) Article 2(3) is applicable only where there is a vertical agreement**

First, for Article 2(3) to apply to the IPR provisions – that is to say if they are to benefit from block exemption – there must be a vertical agreement; Article 1(1)(a) defines this as an agreement relating to the conditions under which the parties may purchase, sell or resell goods or services. It follows that ‘pure’ licences – for example of know-how or of a trade mark – would not be covered, since they would not relate to the conditions under which the parties purchase, sell or resell goods or services: rather, they would authorise the use of the know-how or of the trade mark. Pure know-how licences, however, would be able to benefit from the block exemption under Regulation 772/2004<sup>304</sup> on technology transfer agreements<sup>305</sup>. Paragraph 33 of the *Guidelines* gives five examples of agreements that would not benefit from block exemption:

- the provision of a recipe for the production of a drink under licence
- the production and distribution of copies from a mould or master copy
- a pure licence of a trade mark or sign for the purposes of merchandising

<sup>300</sup> On such agreements see ch 15, ‘Purchasing Agreements’, pp 603–605.

<sup>301</sup> *Vertical guidelines*, paras 31–45.

<sup>302</sup> Intellectual property rights are defined in Article 1(1)(f) to include ‘industrial property rights, know-how, copyright and neighbouring rights’; know-how is defined in Article 1(1)(g) as ‘a package of non-patented practical information, resulting from experience and testing by the supplier, which is secret, substantial and identified’.

<sup>303</sup> Although the term ‘ancillary’ does not feature in Article 2(3) itself, recital 3 states that the Regulation ‘includes vertical agreements containing ancillary provisions on the assignment or use of intellectual property rights’.

<sup>304</sup> OJ [2004] L 123/11.

<sup>305</sup> See ch 19, ‘Technology Transfer Agreements: Regulation 772/2004’, pp 781–791.

- sponsorship contracts<sup>306</sup>
- copyright licensing such as broadcasting contracts concerning the right to record and/or the right to broadcast an event<sup>307</sup>.

**(xiv) The IPR provisions must be for the use of the buyer**

Secondly, Article 2(3) applies only where the supplier transfers IPRs to the buyer; it does not apply where the buyer transfers IPRs to the supplier. It follows that a sub-contracting agreement, whereby one undertaking asks another to manufacture goods on its behalf, often with the use of its IPRs, would not be covered by the block exemption<sup>308</sup>, since the IPRs are supplied by the buyer to the supplier, rather than the other way around. However many sub-contracting agreements do not infringe Article 101(1) at all, so that block exemption is unnecessary<sup>309</sup>; and the *Vertical guidelines* state that, where the buyer simply provides specifications to the supplier as to the goods or services to be supplied, the block exemption remains applicable<sup>310</sup>: in that case there are no IPR provisions, and Article 2(3) is irrelevant.

**(xv) The IPR provisions must not be the object of the agreement**

Thirdly, for Article 2(3) to apply the IPR provisions must not be the ‘primary’ object of the agreement: in the language of the *Guidelines*, ‘[t]he primary object must be the purchase, sale or resale of goods or services and the IPR provisions must serve the implementation of the vertical agreement’<sup>311</sup>.

**(xvi) The IPR provisions must be directly related to the use, sale or resale of goods or services by the buyer or its customers**

A trade mark licence to a distributor is generally necessary for and ancillary to the distribution of goods or services, so that an exclusive licence would benefit from the block exemption, provided that it satisfies the other rules in the Regulation<sup>312</sup>. A sale of hard copies of software, where the reseller does not acquire a licence to any rights over the software, is regarded as an agreement for the supply of goods for resale<sup>313</sup>. Paragraphs 43 to 45 of the *Vertical guidelines* examine the application of the block exemption to franchise agreements. The Commission’s view is that Regulation 330/2010 is capable in principle of application to franchise agreements, other than industrial franchise agreements: the latter would be subject, if at all, to Regulation 772/2004 on technology transfer agreements<sup>314</sup>. Paragraph 44 of the *Guidelines* states that most franchise agreements would be covered by Article 2(3), since the IPR provisions in them are directly related to the use,

<sup>306</sup> On sponsorship contracts see *Danish Tennis Federation Commission* OJ [1996] C 138/6, [1996] 4 CMLR 885, Commission’s XXVIIIth *Report on Competition Policy* (1998), p 160 (comfort letter issued).

<sup>307</sup> See *Telenor/Canal+/Canal Digital* Commission decision of 29 December 2003, a case concerning the licensing of premium content channels, protected by copyright, to a pay-TV platform, where the Commission decided that Regulation 2790/99 was not applicable: see in particular para 196 of the Commission’s decision.

<sup>308</sup> *Vertical guidelines*, para 34.

<sup>309</sup> *Ibid*, para 22 and the Commission’s *Notice on Sub-contracting Agreements* OJ [1979] C 1/2, discussed at ‘Sub-Contracting Agreements’, pp 676–677 below.

<sup>310</sup> *Vertical guidelines*, para 34.

<sup>311</sup> *Ibid*, para 35.

<sup>312</sup> *Ibid*, para 39.

<sup>313</sup> *Ibid*, para 41; this would cover the sale of software subject to a ‘shrink-wrap’ licence, the conditions in which the end user is deemed to accept by opening the package.

<sup>314</sup> The Commission notes the difference between industrial franchise and non-industrial franchise agreements at para 43 of the *Vertical guidelines*; see ch 19, ‘Technology Transfer Agreements: Regulation 772/2004’, pp 781–791.

sale or resale of goods or services by the franchisee. It adds that, where a franchise agreement ‘only or primarily concerns licensing of IPRs’, it would not be covered by the block exemption; however the Commission will normally analyse such an agreement by analogy to the principles contained in the Regulation and *Guidelines*.

Where the franchisor franchises a business method, the franchisor must calculate its market share on the market where the business method is to be exploited for the purpose of the market share cap in Article 3 (see below)<sup>315</sup>.

Paragraph 45 of the *Vertical guidelines* sets out a series of typical IPR-related obligations that are found in franchise agreements and which, if restrictive of competition, would be regarded as ancillary and therefore would benefit from block exemption. These are obligations on the franchisee:

- (a) not to engage, directly or indirectly, in any similar business
- (b) not to acquire financial interests in competing undertakings
- (c) not to disclose secret know-how to third parties
- (d) to grant a non-exclusive licence to the franchisor of know-how obtained from exploitation of the franchise
- (e) to assist the franchisor in action to protect the IPRs
- (f) only to use the franchisor’s know-how for the purpose of the franchise
- (g) not to assign the rights and obligations under the franchise agreement without the consent of the franchisor.

**(xvii) The IPR provisions must not have an illegitimate object or effect**<sup>316</sup>

The final sentence of Article 2(3) provides that the IPR provisions will be exempt only in so far as they ‘do not contain restrictions of competition having the same object or effect as vertical restraints which are not exempted under this Regulation.’ Thus it is not possible to avoid the provisions of Articles 4 and 5 of the Regulation (see below) by attaching the vertical restraints which they seek to prevent to the IPR provisions rather than to the vertical agreement itself.

Article 2(3) should also be understood in conjunction with Article 2(5), which prevents the application of the Regulation where another block exemption is applicable (below).

**(xviii) Article 2(4): agreements between competing undertakings**<sup>317</sup>

Article 2(4) provides that the block exemption does not apply to vertical agreements entered into between competing undertakings as defined in Article 1(1)(c) of the Regulation; this applies to agreements at any level of the market: for example the undertakings may be competing as manufacturers, wholesalers or as retailers. Article 1(1)(c) provides that undertakings compete where they are active on the same relevant market (actual competitors) and where, in the absence of the vertical agreement, they would realistically be able to enter and compete on the market ‘within a short period of time’ in response to a small but permanent increase in relative prices<sup>318</sup> (potential competitors). Paragraph 27 of the *Vertical guidelines* says that a ‘short time’ would normally not be longer than a year. The *Guidelines* also state that, where a distributor provides specifications to a manufacturer to produce particular

<sup>315</sup> *Vertical guidelines*, para 92.

<sup>316</sup> *Ibid*, para 37.

<sup>317</sup> *Ibid*, paras 27–28.

<sup>318</sup> The *Guidelines* do not state that the potential suppliers’ response must have been triggered by a price rise by ‘competing undertakings’, but presumably this is what the spirit of Article 1(1)(c) is envisaging.

goods under the distributor's brand name, it is not to be considered a manufacturer of such own-brand goods.

Non-reciprocal vertical agreements between competing undertakings are permitted subject to conditions. Article 2(4) allows a non-reciprocal vertical agreement between competing undertakings where<sup>319</sup>:

- the supplier is a manufacturer and a distributor of goods, whilst the buyer is a distributor not manufacturing goods competing with the contract goods<sup>320</sup>. In this case the manufacturer conducts its own distribution, but also appoints other distributors which are, according to the definition in Article 1(1)(c), 'competing undertakings'. Paragraph 28 of the *Guidelines* describes this phenomenon as 'dual distribution' or
- the supplier is a provider of services at several levels of trade, whilst the buyer does not provide competing services at the level of trade where it purchases the contract services. This is the analogue of the previous situation, adjusted for the purposes of an agreement in the services sector.

Where a vertical agreement between competitors falls outside Article 2(4), it should be considered under the Commission's *Guidelines on Horizontal Cooperation Agreements*<sup>321</sup>.

(xix) **Article 2(5): agreements within the scope of another block exemption**<sup>322</sup>

Article 2(5) of the Regulation provides that 'This Regulation shall not apply to vertical agreements *the subject matter of which* falls within the scope of any other block exemption regulation, unless otherwise provided for in such a regulation' (emphasis added). The italicised words are important: Article 2(5) does not say that the Regulation shall not apply to an agreement which is exempt under another regulation; rather, it says that it does not apply to agreements which, generically, are of a kind covered by another regulation. It follows that vertical agreements covered by the block exemptions for technology transfer agreements<sup>323</sup>, the distribution of motor vehicles<sup>324</sup>, R&D agreements<sup>325</sup> and specialisation agreements<sup>326</sup> would not be covered by Regulation 330/2010 except to the extent provided for in those specific Regulations. If an agreement fails to satisfy the criteria for exemption in any of these Regulations, Article 2(5) prevents the agreement from being exempted by Regulation 330/2010. Article 2(5) would also prevent Regulation 330/2010 from applying to any agreement within the scope of any future block exemption<sup>327</sup>.

<sup>319</sup> Article 2(4)(a) of Regulation 2790/99 contained a further exception to the non-application of the block exemption to vertical agreements between competing undertakings, namely the situation where the buyer has a total annual turnover not exceeding €100 million; this was removed from Regulation 330/2010 as a company with a turnover of €100 million or less may be the main local or national producer, and thus a major competitor of the seller, in certain markets.

<sup>320</sup> At para 27 of the *Vertical guidelines* the Commission states that an 'own-brand' retailer would not be treated as a manufacturer for this purpose.

<sup>321</sup> The Commission specifically makes this point at para 12 of its *Guidelines on Horizontal Cooperation Agreements* OJ [2011] C 11/1; see ch 15, 'Purpose and scope of the *Guidelines on Horizontal Cooperation Agreements*', pp 588–590.

<sup>322</sup> *Vertical guidelines*, para 45.

<sup>323</sup> Regulation 772/2004, OJ [2004] L 123/11; see ch 19, 'Technology Transfer Agreements: Regulation 772/2004', pp 781–791.

<sup>324</sup> Regulation 461/2010, OJ [2010] L 129/52; see 'Regulation 461/2010 on Motor Vehicle Distribution', pp 674–676 below.

<sup>325</sup> Regulation 1217/2010, OJ [2010] L 335/36; see ch 15, 'The block exemption for research and development agreements: Regulation 1217/2020', pp 595–599.

<sup>326</sup> Regulation 1218/2010, OJ [2010] L 335/43; see ch 15, 'The block exemption for specialisation agreements: Regulation 1218/2010', pp 601–603.

<sup>327</sup> The Commission specifically says this in para 46 of the *Vertical guidelines*.

### (E) Article 3: the market share cap<sup>328</sup>

#### (i) Why a market share test?

One of the key features of Regulation 2790/99 was the inclusion of a market share cap for determining which agreements would benefit from block exemption: at the time of the adoption of that Regulation concern was expressed as to the uncertainty that this would introduce. However the inclusion in the block exemption regulations of market share thresholds as proxies for the non-existence of market power is no longer controversial. If market power is at the heart of sensible analysis of such agreements (whether under Article 101(1) or 101(3)), the Commission can hardly be criticised for using a principled, economics-based approach in order to escape from the discredited and formalistic Regulations of the past. The inclusion of market share thresholds in Regulation 330/2010 was therefore not, in itself, controversial; what did cause considerable debate, however, was the Commission's decision to require, in all cases, that the buyer's as well as the supplier's market share should be below 30 per cent.

Recitals 8 and 9 of the Regulation discuss market share. Recital 8 states that it can be presumed that vertical agreements that do not contain hard-core restrictions of the kind listed in Article 4 will lead to an improvement in the production or distribution of products and allow consumers a fair share of the resulting benefits, provided that the parties' market shares do not exceed the prescribed threshold of 30 per cent: in other words that such agreements will satisfy Article 101(3). Recital 9 goes on to make two different, and important, points: first, that no such presumption can be made where either of the parties' market shares exceed 30 per cent; but, secondly, that there is no presumption that, where the thresholds are exceeded, an agreement infringes Article 101(1) or that it will fail to satisfy Article 101(3)<sup>329</sup>. Where the thresholds are exceeded an agreement requires individual analysis.

#### (ii) What market share?

Of course it is possible to argue about what the market share cap should be. The predecessor to Regulation 330/2010 set the fairly generous market share threshold of 30 per cent<sup>330</sup>: thousands, if not hundreds of thousands, of agreements will have benefited from the safe harbour provided by this figure. However some commentators would have liked the Commission in the new Regulation to raise the market share threshold, perhaps to 40 per cent, but the Commission resisted calls to do so. A market share cap of 40 per cent would have come close to saying that only vertical restraints, other than the hard-core restrictions set out in Article 4, imposed by dominant undertakings are problematic: perhaps it is not surprising that the Commission was unwilling to diminish the role of Article 101 to this extent.

In *JCB* the Commission held that block exemption was unavailable to JCB's distribution agreements since its market share was in the region of 40 to 45 per cent<sup>331</sup>. The 30 per cent cap prevented the application of the block exemption in *Telenor/Canal+/Canal Digital*<sup>332</sup>.

<sup>328</sup> Section V of the *Vertical guidelines* deals with market definition and market share calculation issues. See generally ch 1, 'Market definition', pp 27–42.

<sup>329</sup> See similarly paras 23 and 96 of the *Guidelines*.

<sup>330</sup> See Article 3 of Regulation 2790/99, OJ [1991] L 336/21.

<sup>331</sup> OJ [2002] L 69/1, [2002] 4 CMLR 1458, para 198; the Commission also considered that block exemption was unavailable as a result of the presence of hard-core restrictions in the agreements: *ibid*, para 199; on hard-core restrictions see 'Article 4: hard-core restrictions', pp 663–669 below.

<sup>332</sup> Commission decision of 29 December 2003, para 196.

In the case of Interbrew's single branding agreements for bars and cafés in Belgium the Commission concluded that, notwithstanding Interbrew's market share of around 56 per cent, the agreements did not appreciably restrict competition once the extent of the exclusivity had been limited only to pils lager<sup>333</sup>.

### (iii) Whose market share?

Article 3(1) of Regulation 330/2010 requires that the market share of each of the parties must not exceed 30 per cent. Article 3(1) provides that the block exemption shall apply:

on condition that the market share held by the supplier does not exceed 30% of the relevant market on which it sells the contract goods or services and the market share held by the buyer does not exceed 30% of the relevant market on which it purchases the contract goods or services.

Regulation 2790/99, the predecessor to Regulation 330/2010, applied only to vertical agreements that did not exceed a supplier's market share cap; apart from the case of an exclusive supply obligation<sup>334</sup>, the buyer's market share was irrelevant under the old regime. When it was proposed in 2009, the extension of the market share cap to that of the buyer in all cases was controversial. Concerns were expressed at the complexity that might be involved in its application<sup>335</sup>, in particular because of the inherent difficulty in assessing how the relevant market should be defined. However, a buyer's market share cap was included in Regulation 330/2010 for two reasons in particular. First, the Commission took into account the increase in large distributors' market power since the adoption of Regulation 2790/99<sup>336</sup>. Secondly, the new rule on the buyer's market share recognises that vertical restraints are not necessarily imposed by a supplier on a buyer: it is also possible that the restraint is 'buyer-led'<sup>337</sup>; the inclusion in the *Guidelines* of sections on up-front access payments and category management agreements can also be attributed to this fact.

Article 3(1) states that the relevant market share is that of the buyer on the market 'on which it purchases the contract goods or services'; block exemption does not depend on the (potentially) much larger number of market(s) in which a distributor sells or resells products<sup>338</sup>. The market on which a buyer buys will usually be wider than the market(s) on which it sells: for example it may procure internationally but sell nationally; or purchase nationally and sell regionally or locally<sup>339</sup>. However there is likely to be some relationship between the buyer's power in the purchasing and the selling markets, and the test adopted in Regulation 330/2010 may be seen as a compromise between the avoidance of undue complexity on the one hand and the desire of the Commission not to ignore the power of buyers on the other.

<sup>333</sup> Commission Press Release IP/03/545, 15 April 2003.

<sup>334</sup> See Article 3(2) of Regulation 2790/99 in conjunction with Article 1(c).

<sup>335</sup> For criticism of the new downstream threshold see RBB Economics 'Comments on Proposed Changes to EC Commission Guidelines on Vertical Restraints', September 2009, available at [www.ec.europa.eu/competition/index\\_en.html](http://www.ec.europa.eu/competition/index_en.html).

<sup>336</sup> See speech by Commissioner Almunia, SPEECH/10/172, 20 April 2010; for further reading on the anti-competitive effects of buyer power see the OECD's Policy Roundtable *Monopsony and Buyer Power* (2008), available at [www.oecd.org](http://www.oecd.org) and the OFT Economic Discussion Paper (OFT 863) *The competitive effects of buyer groups* (RBB Economics, January 2007) and the literature there cited.

<sup>337</sup> On these vertical restraints see 'Up-front access payments' and 'Category management agreements', pp 646–647 above.

<sup>338</sup> The position would have been much more complex if the Commission had maintained the position it had adopted in its draft Regulation of 28 July 2009, which did depend on the buyer's market share in the market(s) in which it sold or resold the products acquired under the agreement.

<sup>339</sup> *Vertical guidelines*, para 89.

The application of the market share cap to include that of the buyer in all cases gives rise to obvious compliance issues for the parties to vertical agreements. The supplier will need to ask each buyer for information about, and assurances as to, its market share in its purchasing markets; obviously these may fluctuate over time; their veracity will need to be checked; the market share figure may be exceeded in the case of some buyers but not others; and different agreements may need to be used in the case of those that exceed the market share from those of others. Furthermore the supplier will need to negotiate with each of its buyers individually in order to avoid any possibility of being accused of participating in a ‘hub and spoke’ conspiracy of the kind that various competition authorities have been looking at in recent years<sup>340</sup>.

Article 3(2) of Regulation 330/2010 deals with the position where there is a multipartite agreement. Article 3(2) provides that, where an undertaking that is party to an agreement both buys and sells the contract goods or services, it must respect both the seller’s and the buyer’s market share threshold. Paragraph 90 of the *Guidelines* gives the obvious example of an agreement between a manufacturer, a wholesaler and a retailer, where the wholesaler would have to have a market share of 30 per cent or less both in its buying and selling markets.

#### (iv) The vertical guidelines

Paragraph 23 of the *Guidelines* explains that competition concerns will arise for most vertical restraints only if there is market power at the level of the supplier or the buyer or at both levels. It then rehearses the terms of Article 3(1). Paragraphs 72 and 73 of the *Guidelines* deal with the situation where a supplier uses the same distribution agreement to distribute a portfolio of goods and/or services, and has a market share of more than 30 per cent for some of those products and less than 30 per cent for others: the Commission states that the block exemption will not apply in the former case but would in the latter.

Section V of the *Guidelines* (paragraphs 86 to 95) discusses various issues concerning market definition and market share calculation. Paragraph 89 examines questions concerning the relevant product market; the Commission states that in most cases the relevant market will be defined by examining the market from the buyer’s perspective. Paragraph 90 deals with the position where there are more than two parties to the agreement<sup>341</sup>. Paragraph 91 discusses the position of original equipment manufacturer (‘OEM’) suppliers; and paragraph 92 deals with market shares in the context of franchising agreements. Paragraphs 93 to 95 deal specifically with the calculation of market shares under the Regulation.

#### (v) Article 6

It is worth noting in passing that the Regulation has a further market share test in Article 6, albeit one that will have only rare application. This provides that the Commission may disapply the block exemption where 50 per cent of a relevant market is covered by a network of similar vertical agreements. This is dealt with below<sup>342</sup>.

<sup>340</sup> See eg, in the UK, *Argos Ltd v OFT* (the *Toys and Games* appeal) and *JJB Sports plc v OFT* (the *Football Shirts* appeal), [2006] EWCA Civ 1318, [2006] UKCLR 1135.

<sup>341</sup> See ‘The exempted agreement may be multilateral’, p 653

<sup>342</sup> See ‘Article 6: disapplication of the block exemption by Commission Regulation’, pp 671–672.

**(F) Article 4: hard-core restrictions**<sup>343</sup>

Recital 10 of the Regulation states that vertical agreements ‘containing certain types of severe restrictions of competition such as minimum and fixed resale-prices, as well as certain types of territorial protection, should be excluded from the benefit of the block exemption established by this Regulation irrespective of the market share of the undertakings concerned’. Article 4 contains the list of ‘hard-core’ restrictions which lead to the exclusion of the entire vertical agreement – not just the provision in question – from the block exemption<sup>344</sup>. Article 4 is to be contrasted with Article 5, which denies block exemption to certain specific obligations, but which does not deprive the rest of the agreement of the benefit of the block exemption<sup>345</sup>. The Commission states specifically at paragraph 70 of the *Guidelines* that there is no severability for hard-core restrictions.

Each of the hard-core restrictions in Article 4 relates to a restriction of intra-brand competition<sup>346</sup>, although the Commission’s view is that in some cases restrictions of intra-brand competition can affect inter-brand competition by softening competition and/or facilitating collusion<sup>347</sup>. Paragraph 47 of the *Guidelines* states that an agreement that contains a hard-core restriction of the kind listed in Article 4 ‘is presumed to fall within Article 101(1)’. This is a reference to agreements that, in the terms of Article 101 TFEU, have the ‘object’ of restricting competition: paragraphs 23 and 96 of the *Guidelines* specifically refer to hard-core restrictions as restrictions of competition by object. Even hard-core restrictions might, as a matter of law, fall outside Article 101(1) where they could not have an appreciable effect on competition or on inter-state trade<sup>348</sup>. However the Commission’s *Notice on Agreements of Minor Importance*<sup>349</sup> provides that, even below the 15 per cent market share threshold, it cannot be ruled out that vertical agreements that have as their object or effect to fix resale prices or to confer absolute territorial protection on the undertakings or third undertakings might infringe Article 101(1)<sup>350</sup>. Separately, paragraphs 60 to 64 of the *Vertical guidelines* acknowledge that there are situations in which hard-core restrictions may be objectively necessary for an agreement of a particular type and therefore fall outside Article 101(1) altogether, or fulfil the conditions of Article 101(3)<sup>351</sup>. Paragraph 47 of the *Guidelines* states that it is presumed that agreements containing hard-core restrictions are unlikely to satisfy Article 101(3), but continues that undertakings may be able to demonstrate pro-competitive effects in a particular case, and refers to paragraphs 106 to 109 of the *Guidelines* which discuss possible efficiencies related to vertical restraints generally and to Section VI.2.10 (paragraphs 223 to 229) which consider arguments against, but also possible justifications for, resale price maintenance specifically.

<sup>343</sup> See *Vertical guidelines*, paras 47–59.

<sup>344</sup> *Ibid*, para 47.

<sup>345</sup> See ‘Article 5: obligations in vertical agreements that are not exempt’, pp 669–670 below.

<sup>346</sup> Restrictions of inter-brand competition, or situations in which inter-brand competition is weak, are specifically dealt with in other parts of the Regulation, for example Article 2(4); Article 3; Article 5; and the provisions for withdrawal of the block exemption, as to which see ‘Withdrawal of the block exemption by the Commission or by a Member State’, p 671 below.

<sup>347</sup> For an example of a situation where the Commission was concerned that ‘most-favoured nation’ clauses might be causing price parallelism see its investigations of Hollywood studios, Commission Press Release IP/04/1314, 26 October 2004 and Commission Press Release IP/11/257, 4 March 2011.

<sup>349</sup> OJ [2001] C 368/13, para 11.

<sup>350</sup> See similarly *Vertical guidelines*, para 10.

<sup>351</sup> See ‘Export bans falling outside Article 101(1) or satisfying Article 101(3)’, pp 636–637 above.

Article 4 provides that block exemption will not be available to agreements which ‘directly or indirectly, in isolation or in combination with other factors under the control of the parties, have as their object’ the matters dealt with below, such as resale price maintenance and excessive territorial protection. Article 4 applies only according to the object, and *not* the effect, of an agreement. The word ‘object’ in Article 4 of the Regulation, and in Article 101(1) of the Treaty, does not refer to the subjective intention of the parties; rather to the aim of the agreement judged by objective standards<sup>352</sup>. The scope of the exclusion of the block exemption is nonetheless quite extensive as it will prevent the block exemption from applying where the agreement ‘directly or indirectly, in isolation or in combination with other factors’ has one of the forbidden objects.

(i) **Article 4(a): resale price maintenance**<sup>353</sup>

Block exemption will not be available where the object of the agreement is:

- (a) the restriction of the buyer’s ability to determine its sale price, without prejudice to the possibility of the supplier imposing a maximum sale price or recommending a sale price, provided that they do not amount to a fixed or minimum sale price as a result of pressure from, or incentives offered by, any of the parties.

This formulation explicitly recognises that the imposition of maximum<sup>354</sup> resale prices and the recommendation<sup>355</sup> of prices is permitted; this, however, is subject to the proviso that follows, which itself must be read in conjunction with the words ‘directly or indirectly’ in the opening part of Article 4. Paragraph 48 of the *Vertical guidelines* picks up on the idea that the agreement may have the direct *or indirect* object of resale price maintenance. A contractual restriction establishing a minimum price would be a simple example of an agreement the *direct* object of which is to fix prices. Paragraph 48 gives examples of price maintenance through indirect means:

fixing the distribution margin, fixing the maximum level of discount the distributor can grant from a prescribed price level, making the grant of rebates or reimbursement of promotional costs by the supplier subject to the observance of a given price level, linking the prescribed resale price to the resale prices of competitors, threats, intimidation, warnings, penalties, delay or suspension of deliveries or contract terminations in relation to the observance of a given price level.

Measures taken to identify price-cutting distributors might also amount to ‘indirect pressure’ to fix prices; paragraph 48 suggests that printing a recommended resale price or an obligation to apply a most favoured customer clause would reduce the incentive to cut price and so could be within the mischief of Article 4. The paragraph acknowledges that the use of a particular ‘supportive’ measure or the recommendation of prices is not, in itself, a hard-core restriction. In the case of domestic litigation, it is for the national court to determine, on the basis of the evidence before it, whether a resale price is recommended, fixed or a minimum one<sup>356</sup>.

<sup>352</sup> See ch 3, ‘Object’, pp 118–120.

<sup>353</sup> See *Guidelines*, paras 48 and 49 and ‘Recommended and maximum resale prices’, p 649 above.

<sup>354</sup> The Court of Justice has never ruled on the imposition of maximum prices; for the position in the US see *State Oil Co v Khan* 522 US 3 (1997), see ch 16 n 251, p 638 above.

<sup>355</sup> The Court of Justice held in Case 161/84 *Pronuptia de Paris v Pronuptia de Paris Irmgard Schillgalis* [1986] ECR 353, [1986] 1 CMLR 414 that the recommendation of prices would not, in itself, infringe Article 101(1): see para 25.

<sup>356</sup> See Case C-260/07 *Pedro IV Servicios SL v Total España SA* [2009] ECR I-2437, [2009] 5 CMLR 1291, paras 79 and 80, citing Case C-279/06 *CEPSA Estaciones de Servicio SA v LV Tobar e Hijos SL* [2008] ECR I-6681, [2008] 5 CMLR 1327, paras 67, 70 and 71.

In the case of agency agreements Article 101(1) would normally not be applicable<sup>357</sup>. However where such an agreement falls within Article 101(1), paragraph 49 of the *Guidelines* states that a restriction on the agent preventing or restricting the sharing of commission with its customers, whether fixed or variable, would amount to a hard-core restriction. The agent should be left free to lower the effective price paid by the customer without reducing the income for the principal<sup>358</sup>.

**(ii) Article 4(b): territorial and customer restrictions**<sup>359</sup>

This important provision deals with the extent to which it is possible to grant territorial or customer exclusivity. The opening words of Article 4(b) provide that the block exemption will not be available where the object of the agreement is:

the restriction of the territory into which, or of the customers to whom, a buyer party to the agreement, without prejudice to a restriction on its place of establishment, may sell the contract goods or services.

Several points should be noted about Article 4(b). First, subject to Article 4(e) of the Regulation (below), Article 4(b) is concerned only with restrictions on the *buyer's* right to sell, and not to restrictions on the supplier's sales, which are not to be treated as hard-core. Secondly, paragraph 50 of the *Guidelines* explains that the expression 'without prejudice to a restriction on its place of establishment' in Article 4(b) means that the benefit of the block exemption will not be lost if it is agreed that the buyer will restrict its distribution outlet(s) and warehouse(s) to a particular address, place or territory. The same expression recurs in Article 4(c) in the context of selective distribution (below). Thirdly, paragraph 50 of the *Guidelines* picks up on the 'direct/indirect object' dichotomy in the opening words of Article 4. Indirect measures to restrict the buyer could include:

refusal or reduction of bonuses or discounts, termination of supply, reduction of supplied volumes or limitation of supplied volumes to the demand within the allocated territory or customer group, threat of contract termination, requiring a higher price for products to be exported, limiting the proportion of sales that can be exported or profit pass-over obligations.

The withholding of a guarantee service could also amount to indirect means. These practices would be more likely to be considered indirect measures to restrict the buyer's freedom when operated in conjunction with a monitoring system for detecting parallel trade. Clearly this paragraph of the *Vertical guidelines* is based on the Commission's decisional practice, upheld by the EU Courts, over many years<sup>360</sup>.

Paragraph 50 of the *Guidelines* specifically points out that an obligation on the reseller relating to the display of the supplier's brand names is not regarded as hard-core under Article 4(b)<sup>361</sup>.

Four exceptions to the basic prohibition in Article 4(b) are set out; the first is particularly important, since it deals with the distinction between active and passive sales.

<sup>357</sup> See 'Commercial Agents', pp 621–623 above.

<sup>358</sup> See Case 311/85 *Vereniging van Vlaamse Reislebureaus v Sociale Dienst van de Plaatselijke en Gewestelijke Overheidsdiensten* [1987] ECR 3801, [1989] 4 CMLR 213, para 24.

<sup>359</sup> *Vertical guidelines*, paras 49–52.

<sup>360</sup> See 'Direct and indirect export bans', pp 632–637 above.

<sup>361</sup> This is presumably based on the judgment of the Court of Justice in Case 161/84 *Pronuptia de Paris v Pronuptia de Paris Irmgard Schillgalis* [1986] ECR 353, [1986] 1 CMLR 414.

**Exception 1:** it is permissible to have a restriction:

of active sales into the exclusive territory or to an exclusive customer group reserved to the supplier or allocated by the supplier to another buyer, where such a restriction does not limit sales by the customers of the buyer.

The first point to note here is that, although a restriction of active sales to other territories or customers is permitted, there must remain the possibility of passive sales to them. This is not stated specifically in the Regulation; it is stated explicitly, however, in paragraph 51 of the *Vertical guidelines*. The second point is that the restriction must be on active sales into the territory or customer group ‘reserved to the supplier or allocated by the supplier to another buyer’. Paragraph 51 explains that this means that the buyer must be protected against sales by all other buyers of the supplier within the EU, ‘irrespective of sales by the supplier’. It follows that protection against active selling will not be lost because a vertical agreement does not impose a restriction on the supplier, but only on its buyers; to put the point another way, *sole* distributorships (which leave the supplier free to supply in the distributor’s territory) can benefit from block exemption as well as *exclusive* distributorships, where the supplier agrees that it will not supply to customers in the latter’s territory. It is apparently not possible to restrict active sales into an area reserved to a licensee of know-how or of a patent, although no explanation is given of why this should be so. Thirdly, exclusive distribution may be combined with exclusive customer allocation under Article 4(b), provided that passive selling is not restricted.

Paragraph 51 of the *Guidelines* deals with the distinction between active and passive sales and differs in certain respects from its predecessor. Active selling includes establishing a warehouse or distribution outlet in another’s exclusive territory, approaching individual customers by sending unsolicited emails, and advertising to a specific customer group or customers in a particular territory through advertisements on the Internet. It adds that advertisement or promotion that is attractive for the buyer only if it reaches a specific group of customers or customers in a specific territory is active selling.

As to passive selling, paragraph 51 explains that this means responding to unsolicited requests from individual customers, including delivery of goods or services to such customers. ‘General advertising or promotion’ amounts to passive selling; paragraph 51 states that advertising that reaches customers in other territories or customer groups will be regarded as general if it would make sense for the buyer to invest in that advertising or promotion even if it would only reach customers in its own territory or customer group.

Paragraphs 52 to 54 of the *Guidelines* explain the Commission’s thinking in relation to online sales on the Internet; as would be expected, given the exponential growth of e-commerce, they are much richer in detail than their predecessor. Paragraph 52 states that, in principle, every distributor must be allowed to use the Internet to sell products, and that, in general, the use of a website to sell products amounts to passive selling. It follows that, if a customer visits the website of a distributor and if such contact leads to a sale, that is treated as a passive sale. Paragraph 52 adds that offering different language options on the website does not, of itself, change the passive character of such selling. The Commission then gives four examples of hard-core restrictions of passive selling:

- an agreement that a distributor in one territory will prevent customers in another distributor’s territory from viewing its website or will automatically re-route customers to other distributors’ websites: however it is permissible for a website to have links to those of other distributors and/or the supplier
- an agreement that a distributor will terminate customers’ transactions over the Internet if their credit card data reveal an address that is not within the distributor’s territory

- an agreement that a distributor will limit its proportion of overall sales made over the Internet. However it is permitted to require that the distributor will sell at least a certain absolute amount (in value or volume) offline so as to ensure an efficient operation of its 'brick and mortar' shop, that is to say, its physical point of sale: the absolute amount may be the same for all distributors, or may be determined individually for each buyer on the basis of objective criteria
- an agreement that the distributor will pay a higher price for products intended to be resold by the distributor online rather than offline. However paragraph 64 of the *Guidelines* acknowledges that there may be circumstances in which dual pricing, though treated as hard-core under Article 4(b), may satisfy Article 101(3) on an individual basis. Such circumstances may be present where sales online lead to substantially higher costs for the supplier than offline sales.

Paragraph 53 of the *Guidelines* discusses the circumstances in which Internet sales might be regarded as active rather than passive, with the result that it would be permissible under the block exemption to restrict them. Advertising specifically addressed to certain customers would be considered to be active, as would paying a search engine or online advertisement provider to have advertisements displayed specifically to users in a particular territory. Paragraph 54 explains that the supplier may impose quality standards for the use of the Internet site to resell its goods, just as the supplier may do for selling in shops or by catalogue. In particular the supplier may require that its distributors have one or more brick and mortar shops or showrooms as a condition for becoming a member of the distribution system.

In *Yamaha*<sup>362</sup> the Commission considered that a restriction on Internet selling infringed Article 101(1)<sup>363</sup> and was not covered by the block exemption<sup>364</sup>. In *Pierre Fabre Dermo-Cosmétique*<sup>365</sup> the Court of Justice held that a general and absolute prohibition of online selling imposed on members of a selective distribution system is a 'hard-core' restriction under Article 4(c)<sup>366</sup>.

**Exception 2:** it is permissible to have a restriction of sales – both active and passive – to end users by a buyer operating at the wholesale level of trade. Paragraph 55 of the *Guidelines* explains that this means that the supplier can keep the wholesale and retail levels of the market separate, with the result that buyers of its goods can specialise in their particular level of activity in the market; it adds that the supplier may, if it wishes, permit wholesalers to sell to some end users, for example large customers, though not to others.

**Exception 3:** it is permissible to have a restriction on sales – both active and passive – by members of a selective distribution system to unauthorised distributors in any territory where the system is currently operated or where the supplier does not yet sell the contract products<sup>367</sup>. A selective distribution system is defined in Article 1(1)(e) to mean a system where the supplier agrees to supply the contract goods or services only to distributors selected on the basis of specified criteria and those distributors agree not to sell to unauthorised distributors. It should be noted that this definition of a selective distribution system in the Regulation is not limited by reference to the nature of the goods or

<sup>362</sup> Commission decision of 16 July 2003.

<sup>363</sup> *Ibid*, paras 107–110.

<sup>364</sup> *Ibid*, para 171.

<sup>365</sup> Case C-439/09 *Pierre Fabre Dermo-Cosmétique SAS v Président de l'Autorité de la Concurrence and Ministre de l'Économie, de l'Industrie et de l'Emploi* [2011] ECR I–000.

<sup>366</sup> *Ibid*, paras 54–59.

<sup>367</sup> This is the way para 55 of the *Vertical guidelines* interprets the phrase 'within the territory reserved by the supplier to operate that system' in Article 4(b)(iii) of the Regulation.

services in question; nor does it specify that the criteria should be qualitative rather than quantitative<sup>368</sup>.

**Exception 4:** it is possible to restrict the buyer of components for use from selling them – both actively and passively – to a customer who would use them to manufacture goods that would compete with those of the supplier. Paragraph 55 of the *Guidelines* explains that the term ‘component’ includes any intermediate goods and the term ‘incorporation’ refers to the use of any input to produce the goods.

In *Souris-Topps*<sup>369</sup> the Commission concluded that Topps’s distribution arrangements for its Pokémon stickers and cards failed to benefit from the block exemption since they violated Article 4(b) of Regulation 2790/99<sup>370</sup>.

**(iii) Article 4(c): the restriction of active or passive sales to end users by members of a selective distribution system operating at the retail level of trade**<sup>371</sup>

Article 4(c) prevents the application of the block exception when there are restrictions on active or passive sales by selected distributors at the retail level of trade to end users. Paragraph 56 of the *Vertical guidelines* says that the end users may be a professional buyer or a final consumer. However there is a proviso to Article 4(c), which is that the distributor may be prohibited from operating out of an unauthorised place of establishment: without this proviso the distributor would not be complying with the ‘specified criteria’ that make the system selective, and would effectively be operating as an unauthorised distributor<sup>372</sup>. The Court of Justice has said that the Internet cannot be understood as a ‘virtual’ place of business in this context; the Internet is a method of selling and marketing goods.<sup>372a</sup>

Paragraph 56 of the *Guidelines* also explains that it is permitted to impose a restriction ‘to protect an exclusive distribution system operated elsewhere’, referring back to paragraph 51; paragraph 51 addresses Article 4(b)(i) of the Regulation, which permits restrictions on active, but not on passive sales. It presumably follows, therefore, that members of a selective distribution system can be prevented from actively selling to users in a territory or customer group allocated exclusively to another distributor, but cannot be prevented from passive selling. Paragraph 56 goes on to say that dealers within a selective distribution system should be free to sell to all end users, including with the help of the Internet. The Court of Justice agrees with this point.<sup>372b</sup> Paragraph 56 of the *Guidelines* explains that obligations which dissuade dealers from using the Internet to reach a greater number and variety of consumers by imposing criteria for online sales which are not overall equivalent to the criteria imposed for sales from the brick and mortar shop will be regarded as hard-core. This does not mean that the same criteria must be applied to online and offline sales, but that any differences in those criteria ‘should pursue the same objectives and achieve comparable results and that the difference between the criteria must be justified by the different nature of these two distribution modes’.

Paragraph 57 of the *Guidelines* explains that, within the territory in which a selective distribution system is operated, there cannot be exclusive distribution, since this would violate the rule in Article 4(c) that there must be the possibility of both active and passive sales to end users. In other words, selective distribution may be combined with exclusive distribution under the block exemption if active or passive selling is not restricted<sup>373</sup>.

<sup>368</sup> *Vertical guidelines*, para 176.

<sup>369</sup> Commission decision of 26 May 2004.

<sup>370</sup> *Ibid*, paras 136–140.

<sup>371</sup> *Vertical guidelines*, paras 56–57.

<sup>372</sup> On this point see para 57 of the *Vertical guidelines*.

<sup>372a</sup> Case C439/09 *Pierre Fabre* [2011] ECR I-000, paras 56–58.

<sup>372b</sup> *Ibid*, para 59.

<sup>373</sup> This is the way the point is expressed in para 152 of the *Vertical guidelines*.

**(iv) Article 4(d): restrictions on cross-supplies within a selective distribution system**<sup>374</sup>

Article 4(d) prevents the application of the block exemption where there is a restriction of cross-supplies between distributors within a selective distribution system, including distributors at different level of trade. Thus it is not possible to require a selected retailer to purchase solely from one source: it must be able to buy from any approved distributor<sup>375</sup>.

**(v) Article 4(e): restrictions on the supplier's ability to supply components to third parties**<sup>376</sup>

Article 4(e) designates as hard-core a restriction on the ability of a supplier of components to sell them as spare parts to end users or to repairers or service providers not entrusted by the buyer with the repair or servicing of its goods. End users and independent service providers should be free to obtain spare parts; but the buyer can insist that repairers and service providers within its system should buy the spare parts only from him<sup>377</sup>.

**(G) Article 5: obligations in vertical agreements that are not exempt**<sup>378</sup>

Recital 11 of the Regulation states that certain conditions are attached to the block exemption in order to ensure 'access to or to prevent collusion on the relevant market'. Where an agreement contains an obligation of the kind set out in Article 5, that obligation does not benefit from block exemption: this is true whether the parties' market shares are above or below the market share cap. However, as paragraph 65 of the *Vertical guidelines* states, the block exemption continues to apply to the remaining parts of the vertical agreement if they are 'severable' from the non-exempted obligation<sup>379</sup>. Neither the Regulation nor the *Guidelines* discuss the notion of 'severability' for the purpose of Article 5; whether a contractual obligation is 'severable' for the purpose of Article 101(2) is a matter for the applicable law of the contract<sup>380</sup>.

Article 5 contains three exclusions.

**(i) Article 5(1)(a): non-compete obligations**<sup>381</sup>

Article 5(1)(a) excludes from the block exemption:

any direct or indirect non-compete obligation, the duration of which is indefinite or exceeds five years.

Article 1(1)(d) provides that 'non-compete obligation' means an obligation not to manufacture, purchase, sell or resell goods or services which compete with the contract goods or services: this is what most people would understand by this expression. However Article 1(1)(d) goes on to provide that the term also includes any obligation on the buyer to purchase from the supplier or from an undertaking designated by the supplier more than 80 per cent<sup>382</sup> of the buyer's total purchases of the contract goods or services and their substitutes on the relevant market, calculated on the basis of the value or, where such is standard industry practice, the volume of its purchases in the preceding calendar year. The Commission's concern is not just that a 100 per cent requirements contract

<sup>374</sup> *Vertical guidelines*, para 58.

<sup>375</sup> *Ibid.*

<sup>376</sup> *Ibid*, para 59.

<sup>377</sup> *Ibid*, para 59.

<sup>378</sup> *Ibid*, paras 65–69.

<sup>379</sup> *Ibid*, para 71.

<sup>380</sup> See ch 8, 'Severance', pp 322–323.

<sup>381</sup> *Vertical guidelines*, paras 66–67.

<sup>382</sup> A literal interpretation would mean that an obligation to purchase 80 per cent of the buyer's total purchases would not amount to a non-compete obligation, but that an obligation to purchase 81 per cent would, since only the latter applies to 'more than 80 per cent'.

could foreclose access to the market, but that lesser commitments of ‘more than 80 per cent’ also might do so.

An agreement which is ‘tacitly renewable’ is treated as having an indefinite duration. Paragraph 66 of the *Vertical guidelines* states that non-compete obligations are block exempted where their duration is limited to five years or less and no obstacles exist that hinder the buyer from effectively terminating at the end of five years should it so wish. Article 5(2) contains a derogation from the rule contained in Article 5(1)(a): longer periods are block exempted when the contract goods or services are sold from land and premises owned by the supplier or leased from third parties: paragraph 67 of the *Guidelines* states that ‘artificial ownership constructions’ to take advantage of this derogation will not be permitted. These ‘longer periods’ mean that beer and petrol agreements in ‘tied’ houses and garages will be permissible for more than five years<sup>383</sup>.

There have been many cases in the English courts in which the validity of beer ties has been considered<sup>384</sup>.

### (ii) Article 5(1)(b): post-term non-compete obligations<sup>385</sup>

Article 5(1)(b) excludes from the block exemption:

any direct or indirect obligation causing the buyer, after termination of the agreement, not to manufacture, purchase, sell or resell goods or services.

Article 5(3) contains a derogation from Article 5(1)(b) for a post-term ban of not more than one year on sales of competing goods or services from the point of sale at which the buyer operated during the contract period where this is indispensable to protect know-how transferred from the supplier to the buyer. Article 5(3) also provides that Article 5(1)(b) is without prejudice to the possibility of imposing a restriction which is unlimited in time on the use and disclosure of know-how which has not entered the public domain. Know-how for this purpose is defined in Article 1(1)(g) of the Regulation, and must be ‘substantial’, that is to say significant and useful to the buyer for the use, sale or resale of the contract goods or services<sup>386</sup>.

### (iii) Article 5(1)(c): competing products in a selective distribution system<sup>387</sup>

Article 5(1)(c) excludes from the block exemption an obligation causing the members of a selective distribution system not to sell the brands of particular competing suppliers. It is permissible, subject to Article 5(1)(a), to require a selective distributor not to handle competing brands in general<sup>388</sup>; however Article 5(1)(c) prevents the exemption from applying where there is a boycott of particular competing suppliers. Paragraph 69 of the *Guidelines* explains that this is to prevent the exclusion of ‘a specific competitor or certain specific competitors’.

<sup>383</sup> See eg *Whitbread* OJ [1999] L 88/26, [1999] 5 CMLR 118, upheld on appeal Case T-131/99 *Shaw v Commission* [2002] ECR II-2023, [2002] 5 CMLR 81; *Bass* OJ [1999] L 186/1, [1999] 5 CMLR 782, upheld on appeal Case T-231/99 *Joyson v Commission* [2002] ECR II-2085, [2002] 5 CMLR 123; Case T-25/99 *Roberts v Commission* [2001] ECR II-1881, [2001] 5 CMLR 828.

<sup>385</sup> *Vertical guidelines*, para 68.

<sup>386</sup> It is not necessary for the know-how to be ‘indispensable’ as had been required by Article 1(f) of Regulation 2790/99.

<sup>387</sup> *Vertical guidelines*, para 69.

<sup>388</sup> *Ibid.*

## (H) **Withdrawal of the block exemption by the Commission or by a Member State**<sup>389</sup>

Regulation 330/2010 does not confer power on the Commission or Member States to withdraw the benefit of the block exemption for vertical agreements in an individual case, since this power is conferred by Article 29(1) and (2) of Regulation 1/2003<sup>390</sup>; it is worth noting in passing that this power has never been used. Recital 15 of Regulation 330/2010 refers to Article 29 of Regulation 1/2003 and states that, in determining whether the benefit of block exemption should be withdrawn pursuant to that provision, the anti-competitive effects that may derive from parallel networks of vertical agreements having similar effects and which significantly restrict access to a relevant market or competition therein are of particular importance: the recital says that selective distribution and non-compete obligations are examples of provisions that might lead to such cumulative effects. The power in Article 29 of Regulation 1/2003 is different from the power in Article 6 of Regulation 330/2010 (below), where the block exemption may be disapplied from all vertical agreements in a particular relevant market; under Article 29 the block exemption is withdrawn ‘in a particular case’<sup>391</sup>.

### (i) **Article 29(1) of Regulation 1/2003: withdrawal by the Commission**

Article 29(1) provides that the Commission may withdraw the benefit of the block exemption in an individual case where an agreement has effects that are incompatible with Article 101(3). As noted above this could be so where there is a ‘cumulative effect’ within the market of similar vertical agreements leading to a restriction of competition<sup>392</sup>. Paragraphs 74 to 78 of the *Guidelines* discuss the withdrawal procedure. Paragraph 77 states that the Commission would have the burden of proving that Article 101(1) is infringed and that the agreement does not fulfil the conditions of Article 101(3). Paragraph 77 also states that a withdrawal decision can only have *ex nunc* effect, so that block exemption will persist until the time of the withdrawal.

### (ii) **Article 29(2) of Regulation 1/2003: withdrawal by a Member State**

Article 29(2) confers power on the competition authorities of Member States to withdraw the benefit of the block exemption where agreements to which the Regulation applies have effects incompatible with Article 101(3) ‘in the territory of a Member State, or in a part thereof, which has all the characteristics of a distinct geographic market’. Paragraph 78 of the *Guidelines* states that, where the geographic market is wider than a Member State, the Commission has the sole power to withdraw the block exemption. In other cases the power is concurrent.

## (I) **Article 6: disapplication of the block exemption by Commission Regulation**<sup>393</sup>

Recital 16 of the Regulation introduces the idea of the Commission disapplying the block exemption from agreements in a given market. Article 6 provides that the Commission may by regulation declare that, where parallel networks of similar vertical restraints cover more than 50 per cent of a relevant market, the block exemption shall not apply to vertical agreements containing specific restraints in that market. Article 1a of Council Regulation 19/65 provides that such a regulation shall not become applicable earlier than

<sup>389</sup> See generally the *Verticle guidelines*, paras 74–78.

<sup>390</sup> See recitals 13 and 14 of Regulation 330/2010 and recital 10 of Regulation 1/2003.

<sup>391</sup> See recital 13 of Regulation 330/2010.

<sup>392</sup> *Ibid*, recital 15 and *Vertical guidelines*, paras 75–76.

<sup>393</sup> *Vertical guidelines*, paras 79–85.

six months following its adoption: as paragraph 84 of the *Vertical guidelines* says, time may be needed for the undertakings concerned to adapt their agreements. The Commission discusses the ‘disapplication’ of Regulation 330/2010 in paragraphs 79 to 85 of Part IV of the *Guidelines*. As it explains in paragraph 80, a regulation under Article 8 removes the benefit of the block exemption and restores the full application of Article 101(1) and (3). The Commission would have to decide how to proceed in relation to any individual agreements, and might take a decision in an individual case in order to provide guidance to undertakings in the market generally. The Commission may in some cases have a choice of whether it wishes to proceed under Article 29(1) of Regulation 1/2003 (against a particular undertaking or particular agreements) or under Article 6 of Regulation 330/2010: paragraph 82 of the *Guidelines* says that, in making this choice, the Commission would consider the number of competing undertakings contributing to the cumulative effect or the number of geographic markets within the Union that are affected. Paragraph 85 of the *Guidelines* states that a regulation under Article 8 would not affect the exempted status of the agreements in question prior to its entry into force.

### **(J) Articles 7 and 8: market share and turnover**

Article 7 deals with the calculation of market share<sup>394</sup>. Article 7(a) provides that market share shall be calculated by reference to market sales value; where market sales value data are not available, estimates based on other reliable market information, including sales volumes, may be used. Article 7(b) provides that the market share data should be calculated by reference to the preceding calendar year. Article 7(d) to (g) provide some marginal relief for up to two years where the market share rises above 30 per cent but not beyond 35 per cent.

Article 8 explains how turnover is to be calculated for the purpose of the rules in Article 2(2).

### **(K) Articles 9 and 10: transitional provisions and entry into force**

The Regulation entered into force on 1 June 2010. Transitional relief until 1 June 2011 was provided for agreements already block exempted under Regulation 2790/99. The new Regulation will expire on 31 May 2022.

## **8. The Application of Article 101(3) to Agreements that do not Satisfy the Block Exemption**

Vertical agreements which infringe Article 101(1) and which are ineligible for block exemption under Regulation 330/2010 may nevertheless satisfy the terms of Article 101(3) on an individual basis.

As we have seen Section VI of the *Vertical guidelines* discusses at length the application of Article 101(1) to a series of different types of vertical agreement<sup>395</sup>. Guidance will also be found in Section VI on the application of Article 101(3) to vertical agreements where this is needed in individual cases because the block exemption is inapplicable. The positive effects of vertical restraints are described in paragraph 107<sup>396</sup>, and some general

<sup>394</sup> See generally the *Vertical guidelines*, paras 93–95.

<sup>395</sup> See ‘Vertical Agreements: Article 101(1)’, p 628 above.

<sup>396</sup> See ‘Vertical agreements: possible benefits to competition’, pp 626–628 above.

comments on the application of Article 101(3) will be found at paragraphs 122 to 127<sup>397</sup>. There is a presumption that hard-core restrictions of the kind set out in Article 4 of the block exemption are unlikely to satisfy Article 101(3)<sup>398</sup>, although undertakings may be able to demonstrate pro-competitive effects in an individual case<sup>399</sup>; as the General Court stated in *Matra Hachette v Commission*<sup>400</sup> the parties to any kind of agreement – including, therefore, an agreement containing hard-core restrictions – are entitled to defend it under Article 101(3). Individual assessment of agreements is most likely to be necessary where the 30 per cent market share cap is exceeded. What is unclear is whether the Commission will ever adopt a decision saying that it considers that an agreement satisfies Article 101(3): it could do this only by adopting a ‘declaration of inapplicability’ under Article 10 of Regulation 1/2003, something it has never done; or by providing informal guidance, again which has never occurred<sup>401</sup>.

Specific guidance is given on the application of Article 101(3) to single branding agreements at paragraphs 144 to 148. Where a ‘client-specific investment’ is made, a non-compete obligation of more than five years may be allowed under Article 101(3)<sup>402</sup>; this is consistent with the Commission’s past practice where, for example, 15-year exclusive purchase agreements have been allowed where an investment is made in the building of new power stations<sup>403</sup>. Where a non-compete clause is included in an exclusive distribution agreement this may be permitted for the duration of the agreement, even where this is for longer than the five years permitted by the block exemption<sup>404</sup>. In *DSD*<sup>405</sup> the Commission considered that the criteria of Article 101(3) were satisfied in relation to an agreement whereby DSD, an undertaking in Germany which operated a nationwide system for the collection and recovery of sales packaging, agreed to purchase collection and sorting services exclusively from one collector in each designated district: the exclusivity made it possible for the parties to plan the provision of services on a long-term basis and to organise it reliably, and this gave practical effect to a scheme intended to provide a high level of environmental protection<sup>406</sup>.

The possible application of Article 101(3) to exclusive distribution agreements is considered at paragraphs 161 to 164 of the *Vertical guidelines*. The Commission states that, in the absence of a foreclosure effect, a non-compete obligation of more than five years may be allowed when it is part of an exclusive distribution agreement<sup>407</sup>. The Commission specifically notes that exclusive distribution is most likely to have efficiency-enhancing effects where the products involved are new, complex or have qualities that are difficult to assess prior to consumption<sup>408</sup>. Paragraph 172 of the *Guidelines* considers the possible improvements in efficiency attributable to exclusive customer allocation. Article 101(3) and selective distribution agreements are considered at paragraphs 185 and 186; exclusive supply is dealt with at paragraphs 200 to 201; up-front access payments at

paragraphs 207 and 208; category management at paragraph 213; and tying at paragraph 222. The circumstances in which, in an individual case, resale price maintenance might lead to efficiencies are discussed in paragraph 225<sup>409</sup>.

## 9. Regulation 461/2010 on Motor Vehicle Distribution<sup>410</sup>

The single market in the sale and after-sale servicing of motor vehicles has been slow to develop: differing tax regimes and methods of distribution, fluctuating exchange rates and the fact that certain Member States drive on the ‘wrong’ side of the road, have meant that this market remains much less integrated than others. The Commission has, for years, monitored price differentials between Member States<sup>411</sup>. Over the years the Commission has had cause to examine a number of anti-competitive practices in the market for motor cars, in particular the partitioning of national markets to prevent sales of vehicles from low- to high-priced Member States, and has adopted numerous decisions finding infringements both of Article 101(1)<sup>412</sup> and, on a few occasions, of Article 102<sup>413</sup>. The Commission also closed its file on the basis of informal assurances in several cases<sup>414</sup> and accepted commitments under Article 9 of Regulation 1/2003 in four cases<sup>415</sup>. As far

<sup>409</sup> See ‘Minimum and fixed prices under Article 101(3)’, pp 648–649 above.

<sup>415</sup> *DaimlerChrysler* OJ [2007] L 317/76; *Fiat* OJ [2007] L 332/77; *Opel* OJ [2007] L 330/44; *Toyota Motor Europe* OJ [2007] L 329/52.

as the system of block exemptions is concerned the distribution of motor vehicles has, since 1985, been subject to a legislative regime separate from that for vertical agreements generally<sup>416</sup>. There have been many cases brought before the General Court and the Court of Justice relating to the special regime for cars<sup>417</sup>.

In May 2008 the Commission published a Report on the operation of the old block exemption, Regulation 1400/2002<sup>418</sup>. The Report noted that the new car sales markets are highly competitive, although competition was more limited in the markets for repair and maintenance and spare parts due to their brand-specific nature. In July 2009 the Commission published a Communication, *The Future Competition Law Framework applicable to the Motor Vehicle Sector*<sup>419</sup>. In this document the Commission concluded that a more flexible approach, drawing more closely on the general regime for vertical agreements, would have adequately protected competition while involving lower compliance costs and a more efficient enforcement system. Having published a draft Regulation for comment in December 2009, the Commission adopted Regulation 461/2010 on 27 May 2010<sup>420</sup>.

Article 2 of Regulation 461/2010 provides that, from 1 June 2010 to 31 May 2013, agreements relating to the purchase, sale or resale of new motor vehicles which fulfil the requirements of Regulation 1400/2002 are block exempted. In such cases the supplier's market share must be below 30 per cent, although it is 40 per cent for quantitative selective distribution of new motor vehicles; the 'general conditions' contained in Article 3 of Regulation 1400/2002 must be met; the agreement must not contain any 'hard-core' restrictions contrary to Article 4 of Regulation 1400/2002; and specific obligations, in particular non-compete obligations and location clauses, which do not meet the conditions set out in Article 5 are not block exempted<sup>421</sup>. From 1 June 2013 vertical agreements relating to the purchase, sale or resale of new motor vehicles will come within the regime set out in Regulation 330/2010.

Article 3 of Regulation 461/2010 confers block exemption on vertical agreements relating to purchase, sale or resale of spare parts for motor vehicles or repair and maintenance services for motor vehicles, provided they satisfy the requirements of Regulation 330/2010 and do not contain any of the specified additional hard-core restrictions in Article 5 of Regulation 461/2010. In particular a supplier must be free to sell spare parts to authorised

<sup>416</sup> Prior to Regulation 461/2010 there were three earlier block exemption Regulations for motor vehicle distribution, Regulation 123/85 OJ [1985] L 15/16; it was replaced by Regulation 1475/95 OJ [1995] L 145/25 which in turn was replaced by Regulation 1400/2002 OJ [2002] L 203/30.

<sup>417</sup> In addition to the cases in fn 412 above, see Case 10/86 *VAG France v Magne* [1986] ECR 4071, [1988] 4 CMLR 98; Case C-70/93 *BMW v ALD* [1995] ECR I-3439, [1996] 4 CMLR 478; Case C-266/93 *Bundeskartellamt v Volkswagen AG* [1995] ECR I-3477, [1996] 4 CMLR 505; Case C-226/94 *Grand Garage Albigeois* [1996] ECR I-651, [1996] 4 CMLR 778; Case C-309/94 *Nissan France* [1996] ECR I-677, [1996] 4 CMLR 778; Case C-128/95 *Fontaine* [1997] ECR I-967, [1997] 5 CMLR 39; Case C-41/96 *VAG-Handlerbeirat eV v SYD-Consult* [1997] ECR I-3123, [1997] 5 CMLR 537; Case C-230/96 *Cabour SA v Automobiles Peugeot SA* [1998] ECR I-2055, [1998] 5 CMLR 679; Case C-125/05 *VW-Audi Forhandlerforeningen v Skandinavisk Motor Co A/S* [2006] ECR I-7037, [2007] 4 CMLR 1071; Cases C-376/05 and C-377/05 *A Brünsteiner GmbH v BMW* [2006] ECR I-11383, [2007] 4 CMLR 259; Case C-421/05 *City Motors Groep NV v Citroën Belux NV* [2007] ECR I-653, [2007] 4 CMLR 455; cf also in the EFTA Court Case E-3/97 *Jan and Kristia Jeger AS v Opel Norge AS* [1999] 4 CMLR 147 and, in the UK courts, *Cound v BMW* [1997] Eu LR 277 and *Clover Leaf Cars v BMW* [1997] Eu LR 535.

<sup>418</sup> *Evaluation Report on the operation of Commission Regulation (EC) No 1400/2002* SEC(2008) 1946, 28 May 2008.

<sup>419</sup> COM(2009) 388 final, 22 July 2009.

<sup>420</sup> OJ [2010] L 129/52; the expiry of an old block exemption and its replacement by a new Regulation does not of itself require that existing contracts be terminated: see to that effect Case C-125/05 *Vulcan Silkeborg A/S v Skandinavisk Motor Co A/S* [2006] ECR I-7637, [2007] 4 CMLR 1071.

<sup>421</sup> For detailed guidance on these provisions see *Explanatory brochure for Commission Regulation (EC) No 1400/2002 – Distribution and Servicing of Motor Vehicles in the European Union*, 31 July 2002.

distributors or independent repairers<sup>422</sup>; this is intended to ensure effective competition on the repair and maintenance markets<sup>423</sup>. Article 29 of Regulation 1/2003 enables the Commission or the competent authority of a Member State to withdraw the benefit of the block exemption in certain circumstances<sup>424</sup>. Article 6 of Regulation 461/2010 gives the power to the Commission by regulation to disapply the block exemption to vertical agreements containing specific restraints in a relevant market more than 50 per cent of which is covered by parallel networks of similar vertical restraints. The Commission is required to monitor the operation of Regulation 461/2010 and will prepare a report on its application by 31 May 2021. Agreements relating to motor vehicle aftermarkets are subject to Regulation 461/2010 until 31 May 2023.

The Commission has published *Supplementary guidelines* which deal not only with the interpretation of the block exemption itself, but also, in Section IV, with the application of Article 101(1) to single branding and selective distribution in the motor vehicle sector<sup>425</sup>.

## 10. Sub-Contracting Agreements

Sub-contracting agreements are a common feature of the commercial world. A contractor often entrusts another undertaking – the sub-contractor – to manufacture goods, supply services or to perform work under the contractor’s instructions. Where the sub-contractor simply supplies goods or services to the contractor, the agreement would be a vertical one and the agreement would be governed by the Commission’s *Vertical guidelines* and by the block exemption for vertical agreements<sup>426</sup>. Where a sub-contracting agreement is entered into between competing undertakings it falls to be considered under the Commission’s *Guidelines on Horizontal Cooperation Agreements*<sup>427</sup>. However in some cases the contractor transfers know-how to the sub-contractor in order for it to be able to perform the tasks entrusted to it. The Commission has adopted a *Notice on Sub-contracting Agreements* to explain the application of Article 101(1) to this situation<sup>428</sup>.

The Commission’s view is that sub-contracting agreements of the kind just described do not infringe Article 101(1). Subject to the proviso explained below, clauses in such agreements which stipulate that any technology or equipment provided by the contractor to the sub-contractor may not be used except for the purpose of the agreement generally fall outside Article 101(1); so too are restrictions on making that technology or equipment available to third parties and a requirement that goods, services or work arising from the use of the technology or equipment will be supplied only to the contractor. The proviso referred to is that the technology or equipment must be necessary to enable the sub-

<sup>422</sup> See Article 5(b) of Regulation 461/2010, on which see *Supplementary guidelines on vertical restraints in agreements for the sale and repair of motor vehicles and for the distribution of spare parts for motor vehicles* OJ [2010] C 138/16, para 23.

<sup>423</sup> See recital 17 of Regulation 461/2010.

<sup>424</sup> See recitals 20 and 23 of Regulation 461/2010; on the powers to withdraw the benefit of the block exemption see ‘Withdrawal of the block exemption by the Commission or by a Member State’, p 671 above.

<sup>425</sup> OJ [2010] C 138/16.

<sup>426</sup> See the Commission’s *Guidelines on Horizontal Cooperation Agreements* OJ [2011] C 11/1, para 154.

<sup>427</sup> *Ibid*, paras 150–153; on these *Guidelines* generally see ch 15, ‘Production Agreements’, pp 599–603.

<sup>428</sup> OJ [1979] C 1/2; see also *Vertical guidelines*, para 22; for further discussion of sub-contracting see Bellamy and Child *European Community Law of Competition* (Oxford University Press, 6th ed, 2008, eds Roth and Rose), paras 6-189–6-195; note also that in some cases an agreement might amount to a technology transfer agreement that benefits from block exemption under Regulation 772/2004: see ch 19, ‘Technology Transfer Agreements: Regulation 772/2004’, pp 781–791.

contractor to manufacture the goods, supply the services or carry out the work: where this is the case, the sub-contractor is not regarded as an independent supplier in the market. This proviso is satisfied where the sub-contractor makes use of intellectual property rights or know-how belonging to the contractor. However it would not be satisfied if the sub-contractor could have obtained access to the technology or equipment in question acting on its own.

The *Sub-contracting Notice* sets out other permissible clauses. In particular the contractor can require the sub-contractor to pass on to it on a non-exclusive basis any technical improvements made during the agreement; an exclusive licence may be acceptable where any improvements or inventions on the part of the sub-contractor cannot be made without use of the contractor's intellectual property rights. The sub-contractor must be free, however, to dispose of the results of its own research and development.

## 11. UK Law

### (A) Vertical integration

It would be theoretically possible to investigate an industry in which the extent of vertical integration was considered to be problematic under the market investigation provisions of the Enterprise Act 2002<sup>429</sup>; in its guidance on these provisions<sup>430</sup> the Office of Fair Trading ('the OFT') specifically notes that vertical integration may foreclose competitors and add to entry barriers within an industry<sup>431</sup>. Under the now-repealed Fair Trading Act 1973 the Monopolies and Mergers Commission (the predecessor of the Competition Commission) recommended in the *Supply of Beer*<sup>432</sup> that the 'Big Six' brewers should not be permitted to own more than 2,000 retail outlets each: this would require them to divest themselves of 21,900 retail outlets. Radical changes to the UK beer industry were subsequently set in motion by the Supply of Beer (Loan Ties, Licensed Premises and Wholesale Prices) Order 1989<sup>433</sup> and the Supply of Beer (Tied Estate) Order 1989<sup>434</sup>. These Orders have since been revoked<sup>435</sup>.

It is possible for vertical mergers to be referred to the Competition Commission where the value of the turnover of the enterprise to be acquired is more than £70 million<sup>436</sup>.

### (B) Commercial agents

There is no specific guidance in the UK on the treatment of agency agreements under the Competition Act 1998. However, as a result of section 60(3) of the Act, the OFT, in its application of the Chapter I prohibition, will have regard to paragraphs 12 to 21 of the

<sup>429</sup> See ch 11 for a description of the market investigation provisions in the Enterprise Act 2002.

<sup>436</sup> Enterprise Act 2002, s 23(1)(b); on vertical mergers under the Act, see ch 22, 'Non-horizontal mergers', pp 937–938.

European Commission's *Vertical guidelines*<sup>437</sup>. In *Vodafone Ltd*<sup>438</sup> the Director General of Telecommunications (now OFCOM) did not accept that agreements between Vodafone and its distributors that fixed the retail prices of pre-pay mobile phone vouchers were agency agreements<sup>439</sup>; however it was concluded that Vodafone was not guilty of infringing the Chapter I prohibition since it was acting pursuant to a regulatory obligation<sup>440</sup>.

### (C) Vertical agreements under the Competition Act 1998

#### (i) The exclusion of vertical agreements from the Chapter I prohibition until 30 April 2005

Section 50(1) of the Competition Act 1998 gives a power to the Secretary of State to exclude vertical agreements from the Chapter I prohibition. The Competition Act 1998 (Land and Vertical Agreements Exclusion) Order 2000<sup>441</sup> excluded all vertical agreements, with the exception of those imposing minimum or fixed resale prices, from the Chapter I prohibition from March 2000 until 30 April 2005.

#### (ii) Repeal of the exclusion for vertical agreements

The adoption of Regulation 1/2003 meant that there was much to be said for aligning the domestic law on vertical agreements with the position under EU law. It was decided, therefore, that the exclusion from the Chapter I prohibition should be repealed, and that there should be consistency, where possible, in the application of domestic and EU competition law to vertical agreements. The statutory instrument was therefore repealed with effect from 1 May 2005 (allowing a period of one year from the entry into force of Regulation 1/2003 during which undertakings could adapt their agreements)<sup>442</sup>, since when there has been no special treatment for vertical agreements under the Competition Act. The position is now that vertical agreements that affect trade between Member States are subject to Article 101 including, when applicable, Regulation 330/2010 or Regulation 461/2010; and that agreements that do not have an effect on trade between Member States are subject to the Chapter I prohibition, which will be interpreted consistently with EU law according to the provisions of section 60 of the Competition Act<sup>443</sup>, and the EU block exemption by virtue of section 10 of the Act which provides for parallel exemption<sup>444</sup>. This means that many agreements are exempt from both EU and UK law, and that there is no need for the UK to adopt a block exemption of its own for vertical agreements.

#### (iii) The OFT's *Guidance on Vertical agreements*

The OFT has published *Guidance on Vertical agreements*<sup>445</sup>, which discusses the application of Articles 101 and 102 TFEU and the Chapter I and Chapter II prohibitions to vertical agreements. The *Guidance* also deals with the (now repealed) Exclusion Order and briefly notes the possible application of the Enterprise Act to vertical agreements.

<sup>437</sup> See 'Commercial Agents', pp 621–623 above; on s 60 Competition Act 1998 see ch 9, "Governing Principles Clause": Section 60 of the Competition Act 1998', pp 369–374.

<sup>439</sup> *Ibid*, paras 35–37.

<sup>440</sup> *Ibid*, para 47.

<sup>441</sup> SI 2000/310.

<sup>442</sup> See the Competition Act 1998 (Land Agreements Exclusion and Revocation) Order 2004, SI 2004/1260.

<sup>443</sup> For discussion of s 60 see ch 9, "Governing Principles Clause": Section 60 of the Competition Act 1998', pp 369–374.

<sup>444</sup> For discussion see ch 9, 'Parallel exemptions', pp 359–360.

<sup>445</sup> OFT 419, December 2004.

The *Guidance* concludes with some discussion of the competitive assessment of vertical agreements.

#### (iv) Decisional practice of the OFT

The OFT has investigated a number of vertical agreements under the Competition Act 1998. In *DSG Retail Ltd*<sup>446</sup> the OFT considered that the exclusive distribution agreements between Compaq and Hewlett-Packard, manufacturers of desktop computers, and Dixons did not infringe the Chapter I and Chapter II prohibitions; Dixons did not have a dominant position for the purpose of the Chapter II prohibition, and, in the absence of significant market power on Dixons' part, there were insufficient grounds for using the power that existed at that time to withdraw the exclusion from the Chapter I prohibition<sup>447</sup>. In *Lucite International UK Ltd*<sup>448</sup> the OFT concluded that a long-term supply contract for the supply of hydrogen cyanide by BASF to Lucite International was a vertical agreement and therefore, at the time, excluded from the Chapter I prohibition<sup>449</sup>; it further decided that it would not be appropriate to withdraw the exclusion as it was possible that the agreement would have been granted an exemption: it conferred individual and collective benefits on users and consumers by lessening environmental pollution<sup>450</sup>. An investigation into allegations that record companies were taking steps to impede parallel imports of compact discs into the UK was concluded, as the OFT could not find evidence of continuing agreements against which it could take action, though it stated that it would continue to monitor the market in question<sup>451</sup>.

On several occasions the OFT has found that vertical agreements involved the imposition of minimum resale prices. In *John Bruce UK Ltd, Fleet Parts Ltd and Truck and Trailer Components*<sup>452</sup> vertical price fixing between John Bruce and Fleet Parts was held to be outside the Exclusion Order and so an infringement of the Chapter I prohibition<sup>453</sup>: a relatively small fine of £33,737 was imposed in this case, for a combination of horizontal and vertical price fixing. In *Hasbro UK Ltd*<sup>454</sup> a fine of £4.95 million was imposed on Hasbro for imposing minimum resale prices on its distributors<sup>455</sup>. In *Toys and Games*<sup>456</sup> much larger fines, of £17.28 million on Argos and of £5.37 million on Littlewoods, were imposed for a mixture of horizontal and vertical price fixing<sup>457</sup>; Hasbro was given full immunity because of its cooperation with the OFT<sup>458</sup>. On appeal the findings of infringement were upheld by the Competition Appeal Tribunal ('the CAT'), although the fines were reduced to £19.50 million<sup>459</sup>. In *Lladró Comercial*<sup>460</sup> the OFT found minimum resale price maintenance provisions in *Lladró's* standard-form documentation, but refrained from imposing a fine since the European Commission had sent to *Lladró* a comfort letter

<sup>446</sup> OFT decision of 18 April 2001.

<sup>453</sup> *Ibid*, paras 35–37.

<sup>454</sup> OFT decision of 28 November 2002 [2003] UKCLR 150.

<sup>455</sup> *Ibid*, para 47.

<sup>456</sup> OFT decision of 19 February 2003 [2003] UKCLR 553.

<sup>457</sup> On the finding of a multilateral agreement in this case see ch 9, 'Agreements', pp 337–340.

<sup>458</sup> On leniency under the Competition Act 1998 see ch 10, 'Whistleblowing: the leniency programme', pp 414–418.

<sup>459</sup> Case Nos 1014 and 1015/1/1/03 *Argos Ltd and Littlewoods Ltd v OFT* [2005] CAT 13, [2005] CompAR 834, upheld on appeal [2006] EWCA Civ 1318, [2006] UKCLR 1135.

<sup>460</sup> OFT decision of 31 March 2003 [2003] UKCLR 652.

that could be interpreted to mean that this practice did not infringe competition law<sup>461</sup>. In *Football Shirts* the OFT imposed fines totalling £18.6 million for a mixture of horizontal price fixing and resale price maintenance in relation to replica football kits<sup>462</sup>. Some of the findings of infringement were annulled on appeal to the CAT<sup>463</sup>, and the fines were reduced to £14.92 million<sup>464</sup>. The OFT has closed its files on several cases concerning alleged resale price maintenance, often against assurances that the offending behaviour would be terminated<sup>465</sup>. In *Tobacco*<sup>466</sup> the OFT imposed fines totalling £225 million for a number of bilateral, vertical agreements whereby the prices of various tobacco brands were linked to those of competitors' brands. The OFT concluded that these 'price-matching' arrangements restricted each retailer's ability independently to set resale prices for cigarettes<sup>467</sup>.

## (D) Enterprise Act 2002

It is possible for vertical agreements to be investigated under the market investigation provisions in the Enterprise Act 2002: these have been described in chapter 11. They will not be used where use of the Competition Act is more appropriate<sup>468</sup>. However the OFT has recognised that in certain circumstances a market investigation reference might be appropriate, for example where vertical agreements are prevalent in a market and have the effect of preventing the entry of new competitors<sup>469</sup>. In *Movies on Pay TV*<sup>470</sup> the Office of Communications ('OFCOM') made a market investigation reference in relation to the supply of premium pay-TV movies. OFCOM was concerned that several features of the markets, in particular BSkyB's exclusive agreements with the major Hollywood studios, might restrict competition. This investigation was continuing when the book went to press.

<sup>461</sup> *Ibid*, paras 120–125.

## Abuse of dominance (1): non-pricing practices

1. Introduction	681	5. Non-Pricing Abuses that are Harmful to the Internal Market	711
2. Exclusive Dealing Agreements	682	6. Miscellaneous Other Non-Pricing Abuses	712
3. Tying	688		
4. Refusal to Supply	697		

### 1. Introduction

The previous four chapters have been concerned with the application of EU and UK competition law to horizontal and vertical agreements between undertakings. The focus of attention in this and the following chapters turns to a different issue: the extent to which the unilateral acts of dominant firms might infringe Article 102 TFEU and the Chapter II prohibition in the Competition Act 1998.

The main principles underlying Article 102 were discussed in chapter 5; the Chapter II prohibition was explained in chapter 9<sup>1</sup>. It may be helpful to recall that care must be taken in the application of Article 102 and the Chapter II prohibition not to prevent dominant firms from being able to compete ‘on the merits’<sup>2</sup>; that Article 102 has been applied to exploitative abuses, to exclusionary practices and to actions that partition the internal market<sup>3</sup>; that the dominant position, the abuse and the effects of the abuse may arise on different markets<sup>4</sup>; that a distinction should be drawn between horizontal and vertical foreclosure of the market<sup>5</sup>; and that some limited defences based on objective justification and/or economic efficiency are available to dominant undertakings accused of abusing a dominant position<sup>6</sup>.

This chapter is concerned with non-pricing practices; abusive pricing practices are considered in chapter 18. There is no legal significance in this division of the material: pricing and non-pricing practices can have the same anti-competitive effect. However analysis of pricing abuses requires an understanding of a number of cost concepts, and these are introduced at the beginning of chapter 18<sup>7</sup>. Abuses that involve the exercise, or non-exercise, of intellectual property rights are considered in chapter 19.

<sup>1</sup> See ch 9, ‘The Chapter II Prohibition’, pp 360–369.

<sup>2</sup> See ch 5, ‘Introduction’, pp 192–194.

<sup>3</sup> See ch 5, ‘Exploitative, exclusionary and single market abuses’, pp 201–210.

<sup>4</sup> See ch 5, ‘The dominant position, the abuse and the effects of the abuse may be in different markets’, pp 205–208.

<sup>5</sup> See ch 5, ‘Horizontal and vertical foreclosure’, pp 204–205.

<sup>6</sup> See ch 5, ‘Defences’, pp 210–213.

<sup>7</sup> See ch 18, ‘Cost concepts’, pp 716–718.

This chapter will deal in turn with exclusive dealing agreements; tying; refusals to supply; abusive practices that are harmful to the single market; and miscellaneous other practices which might infringe Article 102 or the Chapter II prohibition. Reference will be made where appropriate to the Commission's *Guidance on the Commission's Enforcement Priorities in Applying Article [102 TFEU] to Abusive Exclusionary Conduct by Dominant Undertakings* ('*Guidance on Article 102 Enforcement Priorities*')<sup>8</sup>. The reader is reminded that this document does not contain guidelines on the law of Article 102; however it does provide valuable insights as to why the Commission thinks that some practices are more likely than others to produce anti-competitive harm to consumers, and so to be more appropriate for enforcement action<sup>9</sup>.

## 2. Exclusive Dealing Agreements<sup>10</sup>

### (A) EU law

The application of Article 101 to vertical agreements was considered in chapter 16<sup>11</sup>. Regulation 330/2010 on vertical agreements confers block exemption on vertical agreements where the supplier and the buyer each has a market share of 30 per cent or less<sup>12</sup>, provided that the agreement contains no hard-core restrictions contrary to Article 4<sup>13</sup>. As a general proposition Article 5 of the block exemption limits the permissible duration of a non-compete clause to five years<sup>14</sup>. Where either party's market share exceeds 30 per cent, an individual assessment of a vertical agreement is necessary to determine whether it infringes Article 101(1)<sup>15</sup> and whether it satisfies the terms of Article 101(3)<sup>16</sup>. Article 101(3) cannot provide a defence to an agreement that amounts to an abuse of a dominant position<sup>17</sup>; and the Commission has also said that it is unlikely that a dominant undertaking would be able to defend an agreement under Article 101(3), even if it is not abusive, where it maintains, creates or strengthens a market position approaching monopoly<sup>18</sup>.

It is clear that exclusive dealing agreements are capable of infringing Article 102: this term can apply both to an exclusive supply obligation, whereby a supplier is restricted from supplying to anyone other than a specific downstream customer; and to an exclusive

<sup>14</sup> See ch 16, 'Article 5: obligations in vertical agreements that are no exempt', pp 669–670.

<sup>15</sup> See ch 16, 'Vertical Agreements: Article 101(1)', pp 628–649.

<sup>16</sup> See ch 16, 'The Application of Article 101(3) to Agreements that do not Satisfy the Block Exemption', pp 672–674.

<sup>17</sup> See para 127 of the Commission's *Guidelines on Vertical Restraints* OJ [2010] C 130/1, relying on Case T-51/89 *Tetra Pak Rausing SA v Commission* [1990] ECR II-309, [1991] 4 CMLR 334 and para 106 of its *Guidelines on the application of Article [101(3)] of the Treaty* OJ [2004] C 101/97.

<sup>18</sup> See para 127 of the Commission's *Guidelines on Vertical Restraints* OJ [2010] C 130/1.

purchasing obligation whereby a downstream customer is forbidden to acquire products except from a specific supplier. In practice the cases are predominantly concerned with exclusive purchasing obligations.

A difference between the application of Article 101 and Article 102 to such agreements is that, where an agreement infringes Article 101, both (or all) of the parties to the agreement will have committed an infringement and will be liable accordingly. In the case of Article 102, however, it is the dominant firm that infringes the competition rules, since Article 102 applies to a dominant firm's *unilateral* behaviour; the conclusion of an anti-competitive agreement can be an abusive unilateral act, so that the dominant firm can be fined and sued for damages, as well as being unable to enforce the offending provisions in the agreement<sup>19</sup>.

### (i) The application of Article 102 to exclusive purchasing agreements

The most obvious vertical agreement that could infringe Article 102 is one whereby a customer is required to purchase all or most<sup>20</sup> of a particular type of goods or services only from a dominant supplier. Various terminology can be used to describe such agreements – ‘exclusive purchasing’, ‘single branding’, ‘requirements contracts’ and ‘non-compete obligations’. Each of these terms connotes the same idea: that the purchaser is prevented from purchasing competing products from anyone other than the dominant firm. The Commission, in its *Guidance on Article 102 Enforcement Priorities*, uses the term exclusive purchasing agreements, and this is the one that will be used in the text that follows. The extent to which pricing practices such as the grant of rebates might have the same effect as an exclusive purchasing agreement is considered in chapter 18<sup>21</sup>.

#### (A) Judgments of the EU Courts

There is not a great deal of judicial precedent on the application of Article 102 to exclusive purchasing agreements; however it is clear that there is a strong possibility that Article 102 will be applied to such agreements when entered into by a firm in a dominant position. Once the Court of Justice had held in *Suiker Unie v Commission*<sup>22</sup> that it was contrary to Article 102 for a dominant firm to foreclose competition by offering loyalty rebates to customers that purchase only from it, it was inevitable that the same condemnation would apply to an exclusive purchasing commitment. This was confirmed in *Hoffmann-La Roche v Commission*<sup>23</sup>. The Court of Justice held that:

An undertaking which is in a dominant position on a market and ties purchasers – even if it does so at their request – by an obligation or promise on their part to obtain all or most of their requirements exclusively from the said undertaking abuses its dominant position within the meaning of Article [102] of the Treaty, whether the obligation in question is stipulated without further qualification or whether it is undertaken in consideration of the grant of a rebate<sup>24</sup>.

<sup>19</sup> On the final point see ch 8, ‘Article 102’, p 324.

<sup>20</sup> The Commission treats an agreement to purchase 80 per cent or more of a buyer’s requirements of a particular product as analogous to an exclusive purchasing commitment: see eg para 129 of the *Guidelines on Vertical Restraints*.

<sup>21</sup> See ch 18, ‘Rebates that have effects similar to single branding agreements’, pp 728–737.

<sup>22</sup> Cases 40/73 etc [1975] ECR 1663, [1976] 1 CMLR 295.

<sup>23</sup> Case 85/76 [1979] ECR 461, [1979] 3 CMLR 211; see also Case T-65/89 *BPB Industries plc and British Gypsum v Commission* [1993] ECR II-389, [1993] 5 CMLR 32, paras 65–77, upheld on appeal Case C-310/93 P [1995] ECR I-865, [1997] 4 CMLR 238.

<sup>24</sup> Case 85/76 [1979] ECR 461, [1979] 3 CMLR 211, para 89.

This language suggests a *per se* approach on the part of the Court of Justice: that any exclusive purchasing agreement on the part of a dominant undertaking is abusive, irrespective of the actual or likely impact of the agreement on competition. The General Court used similarly formalistic language in its judgments in *Solvay SA v Commission*<sup>25</sup> and in *Imperial Chemical Industries Ltd v Commission*<sup>26</sup> in 2009 and 2010 respectively. However, in the author's view, it is questionable whether it is ever appropriate to apply *per se* rules under Article 102<sup>27</sup>. In its *Guidance on Article 102 Enforcement Priorities* the Commission discusses factors that it would take into account when deciding whether it would take enforcement action in relation to exclusive purchasing agreements; these will be considered below in the context of the Commission's decisional practice.

In *BPB Industries v Commission*<sup>28</sup> the General Court held that an exclusive purchasing agreement cannot, as a matter of principle, be considered to infringe Article 101, that is to say that it does not restrict competition by object: rather it is necessary to examine the effects of such an agreement in its specific context<sup>29</sup>. However the Court went on to say that those considerations:

which apply in a normal competitive market situation, cannot be unreservedly accepted in the case of a market where, precisely because of the dominant position of one of the market operators, competition is already restricted<sup>30</sup>.

The General Court did not go so far as to say that there is a *per se* rule against exclusive purchasing agreements on the part of a dominant firm, but at the very least it suggests a very strict standard.

An important point about the statement by the Court of Justice in *Hoffmann-La Roche* quoted above is that it is no defence that the customer willingly entered into the agreement, or even that it requested exclusivity: the issue in these cases is not whether the agreement is oppressive to the customer, but whether it could horizontally foreclose competition in the relevant market. In *Almelo*<sup>31</sup> the Court of Justice considered that an exclusive purchasing clause in a supply contract for electricity could infringe Article 102 if entered into by a dominant firm, even where the clause was requested by local distributors.

### **(B) The Commission's approach to exclusive purchasing agreements**

The Commission discusses exclusive purchasing agreements at paragraphs 129 to 150 of its *Guidelines on Vertical Restraints*<sup>32</sup>: those *Guidelines* are predominantly concerned with the treatment of such agreements under Articles 101(1) and 101(3). As far as Article 102 is concerned, the Commission provides some insights into its thinking in paragraphs 33 to 36 and in paragraph 46 of its *Guidance on Article 102 Enforcement Priorities* (paragraphs 37 to 46 deal with the analogous case of conditional rebates<sup>33</sup>). At paragraph 34 of the *Guidance* the Commission acknowledges that a customer of a dominant undertaking may have no objection to an exclusive purchasing obligation, in particular if it is compensated in some way for accepting it; however this does not, in itself, mean that such obligations should be tolerated: the Commission will focus its attention on whether they are likely to

<sup>25</sup> Case T-57/01 [2009] ECR II-4621, [2011] 4 CMLR 9, paras 365–383; this judgment is on appeal to the Court of Justice, Case C-101/10 P *Solvay v Commission*, not yet decided.

<sup>32</sup> OJ [2010] C 130/1: see ch 16, 'Factors to be considered in determining whether single branding agreements infringe Article 101(1)', pp 638–639.

<sup>33</sup> See ch 18, 'The Commission's approach to conditional rebates in its *Guidance on Article 102 Enforcement Priorities*', pp 735–736.

be harmful for consumers as a whole, which may be the case where they have the effect of preventing the entry or expansion of competing undertakings.

Paragraph 35 of the *Guidance* refers back to paragraph 20, which sets out a range of factors that the Commission will take into account when deciding whether to initiate enforcement proceedings in relation to a possibly anti-competitive foreclosure of the market<sup>34</sup>. Paragraph 36 discusses some additional factors that the Commission will look at in the case of exclusive purchasing obligations. In particular it will ask whether the dominant undertaking's competitors are unable to compete for an individual customer's entire demand. If a customer is bound to purchase a certain amount of its needs from the dominant undertaking – for example because a particular brand is a 'must-stock item' or because other suppliers lack the capacity to satisfy the whole of the customer's needs – a risk arises that competitors will be excluded from the market altogether. Because of this the Commission considers that in such a situation even an exclusive purchasing obligation of short duration can lead to anti-competitive foreclosure. Where, however, suppliers can compete for the customer's entire demand, the Commission says that exclusive purchasing is unlikely to hamper effective competition unless the dominant undertaking imposes a very long period of exclusivity: the longer the duration, the greater the likely foreclosure effect.

The Commission took action in relation to exclusive purchasing agreements in *Hoffmann-La Roche*, *BPB Industries*, *Solvay* and *ICI*: the appeals to the EU Courts in these cases were discussed above<sup>35</sup>. There have been various other interventions. In *Istituto/IMC and Angus*<sup>36</sup> the Commission took action in a case where the dominant supplier of a raw material was refusing to supply a customer except on terms which would have foreclosed its competitors; the Commission persuaded IMC and Angus to offer supply contracts that would last two years with automatic renewal for one year unless terminated by six months' notice. The Commission brought an end to exclusive contracts entered into by AC Nielsen for the procurement of data in relation to fast-moving consumer goods in 1997<sup>37</sup>. The Commission proceeded against Nordiron in respect of exclusive, long-term supply clauses for Molybdenum 99, a base product for radiopharmaceuticals used in nuclear medicine; following the receipt of a statement of objections Nordiron dropped the clauses<sup>38</sup>. The Commission required Frankfurt Airport to abandon long-term contracts covering periods from three to ten years which it had entered into with airlines for the provision of ramp-handling services<sup>39</sup>; the Commission had required the termination of Frankfurt Airport's monopoly of such services and, not surprisingly, was unwilling to see this replaced by long-term exclusive terms that would have the same effect in practice of excluding third parties. Agreement was reached with the Commission that the contracts would be for a period of one year only, automatically renewable but terminable on six months' notice<sup>40</sup>.

The Commission has accepted commitments under Article 9 of Regulation 1/2003<sup>41</sup> in a number of cases that resulted in dominant undertakings abandoning or modifying exclusive purchasing obligations. The Coca-Cola Company agreed that it would refrain from entering into exclusive purchasing commitments with customers in 2004; the company also agreed not to require customers to purchase a specified minimum percentage of

<sup>41</sup> See ch 7, 'Article 9: commitments', pp 255–261 on Article 9 of Regulation 1/2003.

their requirements from it<sup>42</sup>. In the case of *Distrigas* the Commission announced in October 2007 that it had accepted Article 9 commitments from *Distrigas*, an undertaking that at one time was the only gas supplier on the Belgian wholesale market and that remained dominant on it, that it would limit the duration of future agreements for the supply of gas, and that it would reduce the volume of gas subject to long-term supply commitments<sup>43</sup>. A similar outcome was achieved in *EDF: Long-term contracts France*<sup>44</sup>. A notable feature of the decision in *Distrigas* is that the Commission recognised that long-term agreements may be justified where investments are made in the building of new power plants<sup>45</sup>.

In *De Beers*<sup>46</sup> the Commission considered that long-term exclusive supply terms for rough diamonds agreed between *Alrosa* and *De Beers* could infringe Article 102. *Alrosa* and *De Beers* were competitors in the relevant market, and the Commission's concern was that the supply arrangement led to *De Beers*, *de facto*, acting as an exclusive distributor. *De Beers* offered commitments to bring the arrangements to an end, which the Commission accepted under Article 9 of Regulation 1/2003. *Alrosa* successfully appealed to the General Court against the Commission's decision, arguing that the commitments would impact disproportionately on its own business<sup>47</sup>; however the Court of Justice overturned the General Court's judgment and reinstated the Commission's decision<sup>48</sup>.

### (ii) Article 102 applies to *de facto* as well as to contractual exclusivity

In *Van den Bergh Foods*<sup>49</sup> the Commission concluded that it was an abuse of a dominant position for *Van den Bergh* to provide freezer cabinets free of charge to retail outlets on condition that they were to be used exclusively for the storage of its ice cream products<sup>50</sup>. The consequence of this practice was that, *de facto*, *Van den Bergh* achieved outlet exclusivity, since retailers were unlikely to, and in practice did not, maintain a second freezer in their shops; in effect, therefore, the retailers would purchase ice cream exclusively from *Van den Bergh*. This decision, which was upheld on appeal to the General Court<sup>51</sup> and to the Court of Justice<sup>52</sup>, demonstrates that Article 102 can be applied to *de facto* as well as to contractual exclusivity<sup>53</sup>. The Commission notes in paragraph 33 of its *Guidance on Article 102 Enforcement Priorities* that 'stocking requirements', of which *Van den Bergh* is an example, may in practice lead to the same effect as exclusive purchasing agreements.

### (iii) Is there an objective justification for a long-term agreement?

In some circumstances long-term supply agreements may be objectively justifiable, for example where the supplier has to make a client-specific investment in order to be able to

supply<sup>54</sup>. It was noted in chapter 16 that this may result in Article 101(3) being satisfied in relation to an agreement that infringes Article 101(1); in the case of Article 102, the same reasoning may result in a finding that an agreement is not abusive. The Commission says at paragraph 46 of its *Guidance on Article 102 Enforcement Priorities* that it will consider evidence demonstrating that exclusive purchasing agreements result in advantages to particular customers if they are necessary for the dominant undertaking to make certain relationship-specific investments in order to be able to supply those customers<sup>55</sup>.

## (B) UK law

The Office of Fair Trading ('the OFT') has published a guideline on *Vertical agreements*<sup>56</sup> which sets out its thinking on the application of Article 101 TFEU and the Chapter I prohibition to vertical agreements<sup>57</sup>, but which also sets out some general thoughts on the assessment of vertical restraints, including efficiencies that may be associated with them<sup>58</sup>. Specific guidelines have been published on the application of the competition rules, including Article 102 and the Chapter II prohibition, in the telecommunications<sup>59</sup>, water and sewerage<sup>60</sup>, energy<sup>61</sup> and rail<sup>62</sup> sectors. It should be pointed out that all these guidelines predate the Commission's *Guidelines on Vertical Restraints* and *Guidance on Article 102 Enforcement Priorities*.

The OFT has intervened on a few occasions in relation to exclusive agreements that it considered to be abusive. In *Bacardi* the OFT was concerned that Bacardi's agreements foreclosed the market by requiring pubs and bars to sell exclusively its white rum and thereby infringed the Chapter II prohibition<sup>63</sup>. The case was closed on Bacardi giving (non-binding) assurances that it would not insist on exclusive purchasing<sup>64</sup>, although this was challenged on appeal before the Competition Appeal Tribunal ('the CAT') by a third party complainant<sup>65</sup>. This case was eventually settled<sup>66</sup>; the CAT suggested that in future a settlement of a case such as this should be made under the statutory procedure now set out in section 31A of the Competition Act 1998, a procedure that was not available at the time that the OFT was dealing with the case<sup>67</sup>.

In *Calor Gas Northern Ireland* the OFT investigated five-year exclusive purchasing agreements entered into in Northern Ireland between Calor Gas and various retailers; it concluded that Calor Gas was dominant and that the effect of its network of agreements was to make entry into or expansion within the market more difficult. A negotiated settlement was achieved whereby Calor Gas agreed to reduce the length of the agreements to two years<sup>68</sup>.

<sup>54</sup> See the Commission's *Guidelines on Vertical Restraints*, paras 107(d) and 146.

<sup>55</sup> See ch 17 n 45 above on the Commission's decision in *Distrigas*. <sup>56</sup> OFT 419, December 2004.

<sup>57</sup> *Ibid*, paras 5.1–5.5. <sup>58</sup> *Ibid*, paras 7.1–7.29.

<sup>59</sup> *The application of the Competition Act in the telecommunications sector*, OFT 417, February 2000.

<sup>60</sup> *The application of the Competition Act in the water and sewerage sectors*, OFT 422, March 2010.

<sup>61</sup> *Application in the energy sector*, OFT 428, January 2005.

<sup>62</sup> *Application to services relating to railways*, OFT 430, October 2005.

<sup>63</sup> OFT Press Release PN 38/02, 28 June 2002.

<sup>64</sup> OFT Press Release PN 10/03, 30 January 2003.

<sup>65</sup> Case No 1017/2/1/03 *Pernod Ricard SA and Campbell Distillers v OFT* [2004] CAT 10, [2004] CompAR 707.

<sup>66</sup> Case No 1017/2/1/03 *Pernod Ricard SA and Campbell Distillers v OFT* [2005] CAT 9, [2005] CompAR 894.

<sup>67</sup> *Ibid*, para 7; for discussion of s 31A of the Competition Act see ch 10, 'Commitments', pp 405–407.

<sup>68</sup> OFT case closure of 30 June 2003, available at [www.of.gov.uk](http://www.of.gov.uk); see also *Calor Gas Ltd v Express Fuels Ltd* [2008] CSOH 13, where the Outer House of the Court of Session in Scotland decided that exclusive purchasing agreements with a minimum duration of five years infringed Article 101 and were therefore void and unenforceable.

In *English Welsh & Scottish Railway Ltd*<sup>69</sup> the Office of Rail Regulation ('the ORR') found that EW&S had abused its dominant position in a number of ways, including by entering into exclusive agreements for the carriage of coal to various power stations: a fine of £4.1 million was imposed. In *National Grid*<sup>70</sup> the Gas and Electricity Markets Authority ('OFGEM') concluded that National Grid had abused its dominant position in the market for the provision of domestic gas meters by entering into long-term contracts with gas suppliers that rent meters from National Grid; its view was that the payment structure had the effect of preventing gas suppliers from acquiring less expensive and/or more technologically advanced meters from competing meter operators. National Grid was fined £41.6 million for this infringement. On appeal to the CAT<sup>71</sup> and the Court of Appeal OFGEM's decision on substance was upheld, though the fine was reduced to £15 million<sup>72</sup>. A consequence of the finding of infringement in this case was that National Grid's customers would be able to renegotiate their agreements with National Grid, since the existing ones would be void and unenforceable.

In *Claymore Dairies Ltd v OFT*<sup>73</sup> the Competition Appeal Tribunal was critical of the OFT's investigation into whether Robert Wiseman Dairies had entered into agreements with two customers in Scotland that, *de facto*, resulted in an exclusive purchasing arrangement<sup>74</sup> and therefore set the decision on this point aside<sup>75</sup>; no further order was made since, by the time of the CAT's judgment, the position in the market had changed.

In February 2011 the OFT announced that it had issued a statement of objections alleging that CH Jones had abused a dominant position by entering into exclusive agreements with customers in the market for bunker fuels card services<sup>76</sup>.

### 3. Tying<sup>77</sup>

This section considers the extent to which tying may infringe Article 102 TFEU and/or the Chapter II prohibition in the Competition Act 1998.

## (A) Terminology and illustrations of tying

Tying is the practice of a supplier of one product, the tying product, requiring a buyer also to buy a second product, the tied product. Tying may take various forms<sup>78</sup>:

- **contractual tying:** the tie may be the consequence of a specific contractual stipulation: for example in the *Hilti* case Hilti required users of its nail guns and nail cartridges to purchase nails exclusively from it<sup>79</sup>
- **refusal to supply:** the effect of a tie may be achieved where a dominant undertaking refuses to supply the tying product unless the customer purchases the tied product
- **withdrawal or withholding of a guarantee:** a dominant supplier may achieve the effect of a tie by withdrawing or withholding the benefit of a guarantee unless a customer uses a supplier's components as opposed to those of a third party<sup>80</sup>
- **technical tying:** this occurs where the tied product is physically integrated into the tying product, so that it is impossible to take one product without the other: this is what happened in the *Microsoft* case, discussed below<sup>81</sup>
- **bundling:** this is closely related to the idea of tying. It refers to a situation in which two products are sold as a single package at a single price. Two types of bundling should be noted:
  - **pure bundling:** this occurs where it is only possible to purchase the two products together
  - **mixed bundling:** this occurs where the two products are sold separately; however, when they are sold together they are available at a discount to the price that would be charged if they were purchased separately.

The extent to which bundling might lead to an infringement of Article 102 is discussed in chapter 18 on pricing abuses, since it is necessary to analyse the price of the bundle to determine whether this is the case<sup>82</sup>.

## (B) Policy considerations: arguments for and against tying

A simple, and simplistic, objection to tying is that it involves the dominant firm 'leveraging' its position in relation to the tying product to achieve increased sales in the market for the tied product, thereby extending its market power. This would be an example of horizontal foreclosure of the market<sup>83</sup>. So powerful was this argument that, at one time, US law took a strict standard against the practice, holding it to be a *per se* infringement. However this approach was subjected to sustained criticism, in particular by 'the Chicago School'<sup>84</sup>: the central thrust of this criticism was that a monopolist can earn its monopoly

<sup>78</sup> Some of these are described in para 48 of the Commission's *Guidance on Article 102 Enforcement Priorities*.

<sup>79</sup> See '*Hilti*', pp 692–693 below.

<sup>80</sup> The Commission required an end to this practice in *Novo Nordisk: XXVIth Report on Competition Policy* (1996), pp 142–143.

<sup>81</sup> See '*Microsoft*', pp 693–694 below.

<sup>82</sup> See ch 18, 'Bundling', pp 737–739.

<sup>83</sup> See ch 5, 'Horizontal and vertical foreclosure', pp 204–205.

<sup>84</sup> See eg Bork *The Antitrust Paradox* (Basic Books, 1978), ch 19; Bowman 'Tying Arrangements and the Leverage Problem' (1967) 67 *Yale Law Journal* 67; Turner 'The Validity of Tying Arrangements under the Antitrust Laws' (1958) 72 *Harvard Law Review* 73; Ridyard 'Tying and Bundling – Cause of Complaint?' (2005) 26(6) *ECLR* 316; for a review of the different arguments see Scherer and Ross *Industrial Market Structure and Economic Performance* (Houghton Mifflin, 3rd ed, 1990), pp 565–569.

profit only once, and that if it has monopoly power over product A, it cannot increase its profit by leveraging its position into product B. The insights of the Chicago School were persuasive, and there is now general recognition that *per se* illegality is inappropriate for tying: it is now subjected in the US to the rule of reason<sup>85</sup>, requiring a full analysis of the likelihood of competitive harm.

It is not only that tying is no longer thought to be eligible for *per se* illegality. There is now much better understanding that tying is a normal feature of commercial life, and not something that should be regarded as inherently suspicious. Tying involves the integration of components into one product and this can lead to significant economic efficiencies, resulting in lower costs of production and distribution and in improvements of quality. Manufacturing activity, by its very nature, involves the bringing together of different components, and it would be perverse to suggest that, when engaged in by a dominant firm, such behaviour should be stigmatised as presumptively unlawful: the presumption should be the other way<sup>86</sup>.

A few illustrations of the benefits of tying may assist. Tying may be used to maintain the efficiency of the tying product: for example a piece of equipment may function at its best only if a particular chemical or material is used which is available solely from the manufacturer, because it has a patent or relevant know-how. Another reason for tying may be to enable economies of scale or scope to be achieved: a manufacturer of a photocopying machine which also supplies ink, paper and spare parts will be able to reduce costs if all these items are delivered to customers at the same time; tying these products may lead to lower prices. A third reason for tying is to enable a producer to discriminate between customers: the manufacturer of a photocopying machine may wish to charge high-volume users more than low-volume ones; this it can do by tying photocopying paper: the customer which uses the machine the most will pay the most and the tie operates as a substitute for putting a meter onto the machine<sup>87</sup>. A further example of a tying practice that may promote efficiency is where X produces game consoles and computer games that operate only with those consoles: as consumers buy more consoles of a particular type, software writers produce more games that are compatible with it. This, in due course, may lead to higher sales of consoles and, therefore, lower prices overall. In this case the network effect leads to efficiencies to the benefit of consumers<sup>88</sup>.

However there may be circumstances in which tying might have a foreclosure effect on the market. Some 'post-Chicago' authors have identified some vitality in the 'leveraging' theory, for example where the firm with dominance over the tying product also has some market power in relation to the tied product and is able to raise barriers to entry in that market<sup>89</sup>.

### (C) EU law

Both Article 101(1)(e) and Article 102(2)(d) specifically state that tie-in agreements may amount to infringements. Although Article 101 may be applicable to such agreements<sup>90</sup>,

<sup>89</sup> See Whinston 'Tying, Foreclosure and Exclusion' (1980) 80 *American Economic Review* 837; *Bundling, Tying, and Portfolio Effects* (DTI Economics Paper No 1, 2003), para 4.4.2; Nalebluff 'Bundling as an Entry Barrier' (2004) 119 *Quarterly Journal of Economics* 159; Elhauge 'Tying, Bundled Discounts, and the Death of the Single Monopoly Profit Theory' (2009) 123 *Harvard Law Review* 397.

<sup>90</sup> See the Commission's *Guidelines on Vertical Restraints* OJ [2010] C 130/1, paras 214–222.

most cases have been brought under Article 102, including the landmark decision in *Microsoft*<sup>91</sup>. Article 102(2)(d) gives as an example of abuse:

making the conclusion of contracts subject to acceptance by the other parties of supplementary obligations which, by their nature or according to commercial usage, have no connection with the nature of such contracts.

The Court of Justice has established that tying practices may also be caught by Article 102 where they do not fall within the precise terms of Article 102(2)(d): in *Tetra Pak v Commission* the Court concluded that there was an unlawful tie even though the products in question were connected by commercial usage, a situation not covered by the express wording of paragraph (d)<sup>92</sup>.

Issues of tying (and bundling) have also arisen in cases under the EU Merger Regulation, most noticeably in *Tetra Laval/Sidel*<sup>93</sup> and in *GE/Honeywell*<sup>94</sup>, in each of which the Commission's findings that the merged entity would, in the future, be likely to engage in tying practices were overturned on appeal to the General Court<sup>95</sup>. The Commission's *Guidelines on the assessment of non-horizontal mergers*<sup>96</sup> explain the circumstances in which it might proceed against a merger on the basis of so-called 'conglomerate effects'<sup>97</sup>.

In determining whether there is an infringement of Article 102, five issues must be addressed:

- does the accused undertaking have a dominant position?
- is the dominant undertaking guilty of tying two distinct products?
- was the customer coerced to purchase both the tying and the tied products?
- could the tie be detrimental to competition by foreclosing access to the market?
- is there an objective justification for the tie?

Each of these requirements will be considered in turn; the Commission's views, set out in its *Guidance on Article 102 Enforcement Priorities*, as to the circumstances in which it might consider it appropriate to take enforcement action in relation to tying practices will be incorporated into the text that follows.

### (i) Does the accused undertaking have a dominant position?

Clearly there can be an infringement of Article 102 only if an undertaking has a dominant position, and this would be in the tying market; there is no need for there to be dominance in the tied market. Footnote 34 of the Commission's *Guidance on Article 102 Enforcement*

<sup>91</sup> Commission decision of 24 March 2004, upheld on appeal Case T-201/04 *Microsoft Corp v Commission* [2007] ECR II-3601, [2007] 5 CMLR 846.

<sup>92</sup> Case C-333/94 P [1996] ECR I-5951, [1997] 4 CMLR 662, para 37; the General Court makes the same point at para 861 of its judgment in Case T-201/04 *Microsoft Corp v Commission* [2007] ECR II-3601, [2007] 5 CMLR 846, although it concluded that the abuse in that case fell fully within Article 102(2)(d) anyway: *ibid*, para 862.

<sup>96</sup> OJ [2008] C 265/6, available at [www.ec.europa.eu/comm/competition/mergers/legislation/legislation.html](http://www.ec.europa.eu/comm/competition/mergers/legislation/legislation.html).

<sup>97</sup> *Ibid*, paras 91–121; see ch 21, 'Conglomerate mergers', p 879.

*Priorities* states that, in the ‘special’ case of tying in aftermarkets<sup>98</sup>, Article 102 could be infringed where an undertaking is dominant in either the tying or the tied market.

**(ii) Is the dominant undertaking guilty of tying two distinct products?<sup>99</sup>**

The notion of tying is, at first sight, simple enough; a customer is forced to purchase two distinct products that could have been bought individually. However a moment’s reflection reveals that there is a real difficulty in determining when two or more products should be regarded as distinct so that their sale together should be regarded as a tie. A car is sold with wheels and tyres: clearly this does not involve a tie; there will also be a spare wheel: presumably this is not a tie; the car may be fitted with a radio: this perhaps does amount to a tie; if the purchaser is required to insure the car with an insurance company specified by the manufacturer or dealer, this presumably would be a tie. In the same way a pair of shoes would not be regarded as a tie; nor would the sale of shoes with laces; but a requirement to purchase a particular brand of polish with the shoes presumably would be. It is necessary to determine at what point a case becomes one of tying: the burden of proving that two products are the subject of a tie is on the competition authority or the claimant in proceedings before a national court.

According to the formulation in Article 102(2)(d) products are tied when they have no connection either ‘by their nature or according to commercial usage’. The Commission says in paragraph 51 of its *Guidance on Article 102 Enforcement Priorities*<sup>100</sup>, citing the judgment of the General Court in *Microsoft*, that it considers two products to be distinct if, in the absence of tying (or bundling), a substantial number of customers would purchase or would have purchased the tying product without also buying the tied product from the same supplier. It notes that there might be direct evidence that customers, when given a choice, purchase the tying and the tied products separately; or indirect evidence, such as the presence on the market of undertakings that manufacture or sell the tied product without the tying one.

The EU Courts have examined the ‘distinct products’ requirement in three high-profile cases.

**(A) Hilti**

In *Eurofix-Bauco v Hilti*<sup>101</sup> the Commission held that the requirement that users of Hilti’s patented nail cartridges should also acquire nails from it was an abuse of a dominant position; a fine of €6 million was imposed for this and other infringements. Hilti appealed<sup>102</sup>, including on the ground that the Commission had been wrong to find that the nail guns, the cartridge strips and the nails were three distinct product markets rather than forming one indivisible whole, a ‘powder actuated fastening system’ comprising the nail guns and their consumables. The General Court held that there were three markets, and that independent producers should be free to manufacture consumables intended for use in equip-

ment manufactured by others unless in so doing they would infringe intellectual property rights<sup>103</sup>.

### (B) *Tetra Pak*

In *Tetra Pak II*<sup>104</sup> Tetra Pak required customers to whom it supplied liquid packaging machines to purchase cartons from it; it also insisted that only it should provide the services of repair and maintenance. Tetra Pak argued that it supplied an integrated distribution system for liquid and semi-liquid foods intended for human consumption and could not therefore be guilty of an abuse in tying the supply of its filling machines to the supply of its cartons. The Commission stated at paragraph 119 of its decision that it was not customary to tie cartons to machines and concluded that the cartons formed a separate market upon which the dominant firm was trying to eliminate competition.

### (C) *Microsoft*

The question of whether two distinct products were the subject of a tie was a key issue in *Microsoft*. The Commission found that Microsoft had tied its Media Player to its personal computer operating system<sup>105</sup>. On appeal to the General Court the Commission's decision was upheld<sup>106</sup>. The Court agreed that the operating software system and the media player were separate products<sup>107</sup>. The Court noted that the IT and communications industry was in constant and rapid evolution, so that what appear to be separate products may subsequently be regarded as forming a single one<sup>108</sup>; it then pointed out that its function was to consider whether the operating system and Media Player were separate products *in May 1999* when the conduct complained of was alleged to be harmful, rather than at the time of the judgment (September 2007) when a different answer might be given<sup>109</sup>. The Court said that the distinctness of the products had to be determined by reference to consumer demand<sup>110</sup>. In its view there was a functional difference between system software (the operating system itself) and applications software (word processing, media players etc)<sup>111</sup>; there were operators on the market that supplied the tied product (a media player) without the tying product (an operating system): the Court pointed out that case law had established that this was 'serious evidence' of there being separate products<sup>112</sup>; Microsoft supplied Media Player as a separate product to work with its competitors' operating systems<sup>113</sup>; it was possible to download Microsoft's media player independently

from its website<sup>114</sup>; Microsoft promoted MP as a standalone product<sup>115</sup>; it had a separate licence agreement for MP<sup>116</sup>; and customers did acquire media players from Microsoft's competitors<sup>117</sup>.

In January 2008 the Commission announced that it had initiated fresh proceedings against Microsoft in relation to alleged tying<sup>118</sup>. In this case Opera, a producer of a competing browser, complained that Microsoft's inclusion of Internet Explorer in its Windows operating system amounted to an illegal tie, in particular since Microsoft had introduced proprietary technologies in its browser that would reduce compatibility with open Internet standards. The Commission announced in December 2010 that it had accepted commitments under Article 9 of Regulation 1/2003 from Microsoft that it would offer users of Windows choice among different web browsers<sup>119</sup>.

### (iii) Was the customer coerced to purchase both the tying and the tied products?

The language of Article 102(2)(d) suggests that a component of the abuse of tying is that the customer is coerced into acquiring the tied product: 'making the conclusion of contracts subject to acceptance by the other parties of supplementary obligations' (emphasis added). A contractual stipulation obviously satisfies this test. However in *Microsoft* there was no contractual requirement to take Media Player; rather it was included in the operating software, whether customers wanted it or not: in the parlance of the subject, this was 'technical bundling'. The General Court concluded in *Microsoft* that there was coercion of customers to take Media Player because it was impossible to uninstall it from the operating software system<sup>120</sup>; the Court was unimpressed by the fact that there was no extra charge for the inclusion of Media Player<sup>121</sup>. In paragraph 53 of the Commission's *Guidance on Article 102 Enforcement Priorities* the Commission says that it considers that the anti-competitive foreclosure effect of technical tying is likely to be greater than contractual tying or bundling since it may be costly to reverse and may reduce the opportunities for resale of individual components.

### (iv) Could the tie have an anti-competitive foreclosure effect?

To amount to an abuse of a dominant position tying must have, or be capable of having, an anti-competitive foreclosure effect. The Commission discusses factors that it would take into account when deciding whether tying might lead to anti-competitive foreclosure in paragraphs 52 to 58 of its *Guidance on Article 102 Enforcement Priorities*. It refers to the general factors set out in paragraph 20 of its *Guidance*<sup>122</sup>, and then considers some additional ones of significance in tying cases. As noted above, paragraph 53 suggests that technical tying may have a greater anti-competitive foreclosure effect than contractual tying or bundling. Paragraph 55 expresses the concern that tying might result in less competition for customers interested only in buying the tied, but not the tying, product, leading to higher prices for the former. Paragraph 57 notes that, if prices for the tying product are regulated, the dominant undertaking may decide to raise prices in the tied market in order to compensate for the loss of revenue in the tying market. A further con-

<sup>119</sup> Commission decision of 16 December 2010; see Buhr, Wenzel Bulst, Foucault and Kramler 'The Commission's Decision in the Microsoft Internet Explorer Cases and Recent Developments in the Area of Interoperability' (2010) 1 *Competition Policy Newsletter* 28.

<sup>120</sup> Case T-201/04 *Microsoft Corp v Commission*, [2007] ECR II-3601, [2007] 5 CMLR 846, para 963.

<sup>121</sup> Ibid, para 967–969.

<sup>122</sup> See ch 5, 'Effects analysis', pp 208–210.

cern set out in paragraph 58 is that entry into the tying market alone may be made more difficult if there is a limited number of alternative suppliers of the tied product.

The Commission has applied Article 102 to several tying transactions because it considered that the practice could have a foreclosure effect. In *IBM*<sup>123</sup> it brought an end to IBM's practices of 'memory bundling' and 'software bundling', accepting an undertaking that IBM would offer its System/370 central processing units without a main memory or with only sufficient memory as was needed for testing<sup>124</sup>. In *London European-Sabena*<sup>125</sup> the Commission concluded that an attempt by Sabena to stipulate that access to its computer reservation system on the part of London European should be conditional upon London European using Sabena's ground-handling services was an abuse under Article 102. In *De Post/La Poste*<sup>126</sup> the Commission objected to the Belgian postal operator giving a more favourable tariff for its general letter mail service to those customers who also purchased its new business-to-business mail service.

In *Centre Belge d'Etudes de Marche-Télémarketing v CLT*<sup>127</sup> the Court of Justice held that it was an abuse of a dominant position for the Luxembourg radio and television station, which had a statutory monopoly, to insist that advertisers should channel their advertising through its advertising manager or an agency appointed by it. This amounted to an extension of its monopoly power from one market into a neighbouring one, a kind of 'tie-in' that prevented other advertising agencies from competing with it and which limited the commercial freedom of users. In *Napier Brown-British Sugar*<sup>128</sup> the Commission applied this principle when condemning British Sugar's refusal to allow customers to collect sugar at ex-factory prices, thereby reserving to itself the distribution function in respect of this product.

In *Microsoft* the General Court agreed with the Commission's finding that the tie led to a foreclosure of the market<sup>129</sup>. It considered that the inclusion of Media Player had appreciably altered the balance of competition in favour of Microsoft to the detriment of competitors<sup>130</sup>. The Court referred to the ubiquity of the Windows operating system which, in 2002, enjoyed a market share of more than 90 per cent<sup>131</sup>. It also said that users who find that Media Player is pre-installed on their operating system would be less likely to make use of an alternative media player<sup>132</sup>. The Court considered that the inclusion of Media Player created disincentives for manufacturers of computers to include the media player of a competitor in their computers<sup>133</sup>. The General Court also agreed with the Commission that the ubiquity of Windows was likely to have a strong influence upon content providers and software designers<sup>134</sup> and noted market surveys that demonstrated a trend towards the use of Media Player to the detriment of other media players<sup>135</sup>.

(v) **Is there an objective justification for the tie?**

A dominant undertaking may be able successfully to argue that tying is objectively justified or enhances efficiency: the burden of proof would be on the dominant firm<sup>136</sup>. In *Hilti* the Commission's concern was that the practice of tying would prevent producers of nails from supplying users of Hilti nail guns. Hilti argued that its behaviour was objectively justifiable as it was necessary to maintain safety standards, so that operators would not be injured by nail guns. The Commission rejected this argument, concluding that Hilti's primary concern was the protection of its commercial position rather than a disinterested wish to protect users of its products. The General Court upheld this finding, pointing out that in the UK, where the competitors were selling their nails, there were laws about product safety and authorities which enforced them. In those circumstances it was not the task of a dominant undertaking to take steps on its own initiative to eliminate products which, rightly or wrongly, it regarded as dangerous or inferior to its own products<sup>137</sup>.

The General Court concluded in *Microsoft* that Microsoft had failed to show any objective justification for tying Media Player with its operating software<sup>138</sup>.

In paragraph 62 of its *Guidance on Article 102 Enforcement Priorities* the Commission says that it will consider claims that tying (and bundling) may lead to savings in production or distribution that would benefit consumers. The Commission also notes that there might be a reduction in transaction costs if customers can save money by not having to purchase components separately; or if suppliers achieve savings in distribution or packaging. Another possibility mooted is that tying might be a way of bringing a new, integrated, product to the market to the benefit of consumers; or that it might enable the supplier to pass on efficiencies to its customers arising from the production or purchase of large quantities of the tied product.

(D) **UK law**

As in the case of Article 102(2)(d), section 18(2)(d) of the Competition Act 1998 specifically states that a tie-in agreement may constitute an abuse of a dominant position.

In *Pricing of BT Analyst*<sup>139</sup> the Office of Communications ('OFCOM') received a complaint that BT had tied a billing analysis product, BT Analyst, to the provision of business telephony services. OFCOM's conclusion was that the billing product was part of the telephony service, and that therefore there was no tie<sup>140</sup>. On two earlier occasions the Office of Telecommunications<sup>141</sup> ('OFTEL', now OFCOM) and the OFT<sup>142</sup> were asked to investigate allegations of tie-in practices, but in each case they concluded that there was one single market over which there was no dominance, rather than a dominated primary market and a separate, secondary, market<sup>143</sup>.

<sup>136</sup> See ch 5, 'Defences', pp 210–213.

<sup>137</sup> See further para 29 of the Commission's *Guidance on Article 102 Enforcement Priorities* which refers specifically to the proposition in *Hilti* discussed in the text.

## 4. Refusal to Supply<sup>144</sup>

There are some circumstances in which a refusal on the part of a dominant firm to supply goods or services can amount to an abuse of a dominant position<sup>145</sup>. Refusal to supply is a difficult and controversial topic in competition law. First, as a general proposition most legal systems in countries with a market economy adopt the view that firms should be allowed to contract with whomsoever they wish. At paragraph 56 of his Opinion in *Oscar Bronner GmbH & Co, KG v Mediaprint Zeitungs- und Zeitschriftenverlag GmbH & Co KG*<sup>146</sup> Advocate General Jacobs pointed out that:

the right to choose one's trading partners and freely to dispose of one's property are generally recognised principles in the laws of the Member States

and that:

incursions on those rights require careful justification.

The Commission begins the section on refusal to supply in its *Guidance on Article 102 Enforcement Priorities* by repeating these same points.

A second point about refusal to supply is that, irrespective of whether the law should sometimes require a dominant firm to supply to customers, there are many perfectly reasonable explanations for a refusal to do so: for example that a customer is a bad debtor, that there is a shortage of stocks or that production has been disrupted.

A third consideration is that forcing a dominant undertaking to supply may not be conducive to economic welfare if it means that 'free riders' can take advantage of investments that have been made by other firms in the market. At paragraph 57 of his Opinion in *Oscar Bronner*<sup>147</sup> Advocate General Jacobs pointed out very clearly to the Court of Justice that allowing competitors to demand access to the 'essential facilities'<sup>148</sup> of dominant firms, which might seem to be pro-competitive by enabling claimants to enter the market in the short term, might ultimately be anti-competitive, if the consequence would be to discourage the necessary investment for the creation of the facility in the first place. In the following paragraph the Advocate General stated that, in the long term, it is generally pro-competitive to allow an undertaking to retain its facilities for its own use, since granting access to a third party may remove the incentive to invest in the establishment of efficient facilities. At paragraph 58 the Advocate General stressed the importance of the fact that the primary purpose of Article 102 is to prevent distortions of competition, and not to protect the position of particular competitors<sup>149</sup>. While accepting that the case law

<sup>144</sup> For further reading on refusals to supply see Motta *Competition Policy: Theory and Practice* (Cambridge University Press, 2004), pp 66–68; O'Donoghue and Padilla *The Law and Economics of Article 82 EC* (Hart Publishing, 2006), ch 8; Van den Bergh and Camesasca *European Competition Law and Economics: A Comparative Perspective* (Sweet & Maxwell, 2nd ed, 2006), pp 276–280; section 9 of DG COMP's *Discussion paper on the application of Article [102] of the Treaty to exclusionary abuses*; Bishop and Walker *The Economics of EC Competition Law* (Sweet & Maxwell, 3rd ed, 2010), paras 6.119–6.135.

<sup>145</sup> The term 'refusal' in this context includes a constructive refusal, for example by charging unreasonable prices, by imposing unfair trading conditions for the supply in question or by unduly delaying or degrading the supply of the product in question; see para 79 of the Commission's *Guidance on Article 102 Enforcement Priorities*.

<sup>146</sup> Case C-7/97 [1998] ECR I-7791, [1999] 4 CMLR 112.

<sup>147</sup> *Ibid.*

<sup>148</sup> See 'Is the product to which access is sought indispensable to someone wishing to compete in the downstream market?', pp 701ff below for discussion of this, and related, expressions.

<sup>149</sup> See also the Order of the President of the General Court in Case T-184/01 R *IMS Health Inc v Commission* [2001] ECR II-3193, [2002] 4 CMLR 58, para 145.

did, in certain circumstances, impose a duty on dominant firms to supply, the Advocate General advised that the duty should be appropriately confined and should be invoked only where a clear detriment to competition would follow from a refusal.

The Commission notes in paragraph 75 of its *Guidance* that the existence of an obligation to supply – even for a fair remuneration – may undermine undertakings’ incentive to invest and innovate, which could be detrimental to consumers; and that, where a competitor can take a ‘free ride’ on the investment of the dominant firm, it is unlikely itself to invest and innovate, again to the detriment of consumers. However it also notes, in paragraph 82, that these considerations would not apply where an obligation to supply has already been imposed by regulation compatible with EU law, in which case a public authority will already have undertaken a balance of the parties’ incentives; or where the upstream market position of the dominant undertaking has been developed under the protection of special or exclusive rights financed by state resources<sup>150</sup>. In these circumstances the Commission would simply be concerned to identify whether a refusal to supply could result in anti-competitive foreclosure, without applying the stringent rules discussed below that would otherwise be applicable.

When considering the law of refusal to supply it is helpful to keep in mind the distinction between horizontal and vertical foreclosure of the market<sup>151</sup>. Most cases on refusal to supply involve harm to the downstream market, that is to say vertical foreclosure: this section will be primarily concerned with cases of this kind. However there have been some cases that were concerned with horizontal foreclosure, and these are noted towards the end of this section<sup>152</sup>, as are cases where the refusal was motivated by discrimination on grounds of nationality<sup>153</sup> and where the withholding of sales was a way of preventing parallel exports to a higher-priced Member State<sup>154</sup>.

EU case law will be considered first, then that of the UK.

## (A) EU law<sup>155</sup>

### (i) Vertical foreclosure: competitive harm in a downstream market

Most refusal to supply cases concern a vertically-integrated undertaking that is dominant in an upstream market and which refuses to supply an existing or a new customer in a downstream market on which it is also present. Paragraph 76 of the Commission’s *Guidance on Article 102 Enforcement Priorities* explains that the section in that document that deals specifically with refusal to supply is concerned only with cases of this kind. Paragraph 84 of the *Guidance* suggests that a refusal to supply a new customer is capable of infringing Article 102 as well as the disruption of an existing relationship: case law supports this proposition<sup>156</sup>. However the Commission adds that it is more likely that termination of an existing relationship will be found to be abusive than a *de novo* refusal to supply: for example if a

<sup>150</sup> On the meaning of special or exclusive rights see ch 6, ‘Undertakings with “special or exclusive rights”’, pp 224–226.

<sup>151</sup> See ch 5, ‘Horizontal and vertical foreclosure’, pp 204–205.

<sup>152</sup> See ‘Horizontal foreclosure’, pp 708–709 below.

<sup>153</sup> See ‘Refusal to supply on the basis of nationality’, p 708 below.

<sup>154</sup> See ‘Refusal to supply to prevent parallel imports’, p 708 below.

<sup>155</sup> Note that the Commission has given specific guidance on the application of Article 102, including on refusal to supply, in the electronic communications and postal services sectors: see ch 23, ‘Application of EU competition law’, pp 982–983 and ‘Application of EU competition law’, pp 986–988.

<sup>156</sup> For example the successful complainant in the *Magill* case was a new, rather than an existing, customer; see similarly Case T-301/04 *Clearstream v Commission* [2009] ECR II-3155, [2009] 5 CMLR 2677 and *Telekomunikacja Polska* Commission decision of 22 June 2011; in a case on margin squeeze the Court of Justice specifically stated that it should make no difference to a finding of abuse whether a customer is an existing or a new one: see Case C-52/09 *Konkurrensverket v TeliaSonera Sverige AB* [2011] ECR I-000, [2011] 4 CMLR 982 paras 90–95.

customer has made specific investment to use an input supplied by the dominant supplier, this might lead to the conclusion that the input has become indispensable<sup>157</sup>.

It was established by the Court of Justice in *Commercial Solvents v Commission*<sup>158</sup> that a refusal to supply a downstream customer could amount to an abuse of a dominant position. Zoja was an Italian producer of a drug used in the treatment of tuberculosis; it was dependent upon supplies of a raw material, amino-butanol, the dominant supplier of which was Commercial Solvents. When the latter refused to make amino-butanol available to Zoja the Commission found that it had abused its dominant position and ordered it to resume supplies. The Commission's decision was upheld on appeal to the Court of Justice. Commercial Solvents was not only a dominant supplier of amino-butanol in the upstream market for the raw material; its refusal to supply Zoja coincided with the emergence of Commercial Solvent's own subsidiary, ICI, onto the downstream market for the anti-TB drug on which Zoja was operating: the refusal to supply would eliminate Zoja from the downstream market. The Court of Justice said that:

[a]n undertaking which has a dominant position in the market in raw materials and which, with the object of reserving such raw material for manufacturing its own derivatives, refuses to supply a customer, which is itself a manufacturer of these derivatives, and therefore risks eliminating all competition on the part of this customer, is abusing its dominant position<sup>159</sup>.

There have been many cases on refusal to supply of this kind since *Commercial Solvents*; *Magill*, *Oscar Bronner* and *Microsoft* are of particular note and will be discussed below and/or in chapter 19<sup>160</sup>. The quest for the Commission and the EU Courts has been to find the correct balance between upholding the right of undertakings, whether dominant or not, to choose their trading partners freely on the one hand and ensuring that vertically-integrated dominant undertakings do not exclude competitors from downstream markets to the detriment of consumers on the other. The case law appears to establish that, in determining whether a refusal to supply a customer in a downstream market amounts to an abuse of a dominant position, four issues must be addressed<sup>161</sup>:

- does the accused undertaking have a dominant position in an upstream market?
- is the product to which access is sought indispensable to someone wishing to compete in the downstream market?
- would a refusal to grant access lead to the elimination of effective competition in the downstream market?
- is there an objective justification for the refusal to supply?

**(A) Does the accused undertaking have a dominant position in an upstream market?**

It is a statement of the obvious that, for there to be an infringement in an Article 102 case, the accused must have a dominant position; and in cases of the kind under consideration in this section the dominant position will be in an upstream market. However there are three points about this that merit consideration. The first is that the way in which the upstream market is defined will inevitably be influenced by the definition of the downstream

<sup>157</sup> This could provide an explanation for the outcome in *Commercial Solvents*, discussed below.

<sup>158</sup> Cases 6 and 7/73 [1974] ECR 223, [1974] 1 CMLR 309.

<sup>159</sup> *Ibid.*

<sup>160</sup> See ch 19, 'Compulsory licences', pp 797–802.

<sup>161</sup> But note that the Commission would not apply such strict standards where an undertaking is already subject to a regulatory duty to deal or where its position has been derived from state resources: see 'Refusal to Supply', p 698 above.

market. For example in *Sealink/B&I-Holyhead*<sup>162</sup> a ferry operator, B&I, wished to have access to the port of Holyhead in north Wales in order to operate ferry services to and from Ireland. The port at Holyhead was owned by Sealink, which was also present on the downstream market for ferry services. The Commission noted that there were three ‘corridors’ for short-sea routes between Great Britain and Ireland: the northern corridor, served, for example, by Stranraer in Scotland; the central corridor, served predominantly by Holyhead; and the southern corridor, served by Fishguard, Pembroke and Swansea in south and west Wales. The Commission defined the upstream market as the provision of port facilities for passenger and ferry services on the central corridor route; however, had it considered that the downstream market was all short-sea crossings between Great Britain and Ireland, it could not have defined the upstream market so narrowly; in this case, Holyhead Harbour (or more precisely the services available there) would not have been indispensable for B&I to be able to compete in the downstream market.

A second point about market definition in refusal to supply cases is that the dominant firm may not be operating on an upstream market at all; it may not be in the business of supplying the input to which access is sought to anyone. This does not mean that, in competition law terms, it cannot have market power over the input in question: the Court of Justice has said that it is sufficient that there is a potential, or even a hypothetical, market<sup>163</sup>. The Commission notes this point in paragraph 79 of its *Guidance on Article 102 Enforcement Priorities*.

A quite different point is that many Member States have laws that impose obligations on undertakings, *whether dominant or not*, to supply customers which are in a position of ‘economic dependency’: examples are Article L420–2, paragraph 2 of the French Commercial Code and section 20 of the German Act against Unfair Restraints of Competition of 1957<sup>164</sup>. It should be recalled that Article 3(2) of Regulation 1/2003 permits the application of national legal provisions that are stricter than Article 102 to unilateral behaviour<sup>165</sup>. It can only be a matter of conjecture whether Commission officials and judges of the EU Courts, when deciding whether refusals to supply existing customers amounted to an abuse of a dominant position under Article 102, may have been influenced by domestic laws that consider such conduct to be reprehensible even, in some cases, where the supplier is not dominant. Such a consideration might make it easier to conclude that the same conduct amounts to an abuse where the supplier is dominant. However competition policy in the EU today is predominantly concerned with consumer welfare, and the protection of economically dependent firms is not necessarily consistent with this aim<sup>166</sup>. As we shall see, case law has made it clear that a duty to deal does not arise under Article 102 from ‘mere’ dominance; rather it turns on the *indispensability* of access to an upstream product or service for someone to be able to compete in a downstream market. The criterion of indispensability limits the scope of Article 102, and is a

<sup>162</sup> [1992] 5 CMLR 255; note that this highly-influential case was an interim measures decision of the Commission that was not appealed to the EU Courts.

<sup>163</sup> See Case C-418/01 *IMS Health GmbH & Co v NDC Health GmbH & Co* [2004] ECR I-5039, [2004] 4 CMLR 1453, para 44; this point is helpfully discussed in Pitofsky, Patterson and Hooks ‘The Essential Facilities Doctrine under US Antitrust Law’ (2002) 70 Antitrust Law Journal 443, pp 458–461; see also DG COMP’s *Discussion paper*, para 227.

<sup>164</sup> A useful guide to such laws will be found in *Dominance: the regulation of dominant firm conduct in 35 jurisdictions worldwide* (Global Competition Review, 2011, eds Janssens and Wessely), which specifically addresses the question, in relation to each jurisdiction, whether there are any rules applicable to the unilateral conduct of non-dominant firms.

<sup>165</sup> See ch 2, ‘Conflicts: Article 102’, pp 77–78.

<sup>166</sup> For discussion of the aims of competition policy see ch 1, ‘Goals of competition law’, pp 19–24.

conscious attempt to link findings of abuse to anti-competitive foreclosure from downstream markets to the detriment of consumers.

**(B) Is the product to which access is sought indispensable to someone wishing to compete in the downstream market?**

Case law has established that a vertically-integrated undertaking is not required to deal with customers with which it competes in a downstream market simply because it is dominant in relation to an upstream market. It is necessary that the product or service to which a customer seeks access is ‘indispensable’ if it is to be able to compete in the downstream market. The word indispensable is the one that the EU Courts have tended to use; alternative expressions for the input to which access is sought are ‘essential facilities’ and ‘objectively necessary’. The former expression has its antecedents in US antitrust, and there is a vast amount of periodical literature on the essential facilities doctrine<sup>167</sup>; as we shall see, the Supreme Court has significantly limited the scope of the doctrine in recent years<sup>168</sup>. The term essential facilities is particularly apt where an undertaking seeks access to a physical infrastructure such as a port, airport, railway network or pipeline: it is a fairly natural use of language to regard such infrastructures as ‘facilities’, and ‘essential’ carries the same meaning as ‘indispensable’. However the case law has demonstrated that there can also be an obligation, for example, to license intellectual property rights or to provide proprietary information to a third party<sup>169</sup>, where the expression ‘essential facility’ is a less natural one. Perhaps because of this the Commission refers to inputs that are ‘objectively necessary’ in paragraphs 83 and 84 of its *Guidance on Article 102 Enforcement Priorities*. The text that follows will use the term indispensability in deference to the jurisprudence of the EU Courts, but it would seem that all three expressions can be used interchangeably.

The requirement for indispensability became clear in the judgment of the Court of Justice in *Oscar Bronner GmbH*<sup>170</sup>. Bronner was an Austrian publisher of a daily newspaper, *Der Standard*, and wished to have access to the highly developed home-delivery distribution system of its much larger competitor, Mediaprint; Bronner complained that a refusal to allow such access amounted to an infringement of the Austrian equivalent of Article 102. The Austrian court sought the opinion of the Court of Justice, under Article 267 TFEU, whether such a refusal would infringe Article 102. The entire tone of the judgment is sceptical towards Bronner’s case.

<sup>167</sup> The following articles would capture much of the writing on this subject: Areeda ‘Essential Facilities: An Epithet in Need of Limiting Principles’ (1990) 58 *Antitrust Law Journal* 841; Temple Lang ‘Defining Legitimate Competition: Companies’ Duties to Supply Competitors and Access to Essential Facilities’ (1994) 18 *Fordham International Law Journal* 439; Ridyard ‘Essential Facilities and the Obligation to Supply Competitors under UK and EC Competition Law’ (1996) 17 *ECLR* 438; Lipsky and Sidak ‘Essential Facilities’ (1999) 51 *Stanford Law Review* 1187; Korah ‘Access to Essential Facilities under the Commerce Act in the Light of Experience in Australia, the European Union and the United States’ (2000) 31 *Victoria University of Wellington Law Review* 231; Capobianco ‘The Essential Facility Doctrine: Similarities and Differences between the American and European Approaches’ (2001) 26 *EL Rev* 548; Doherty ‘Just What are Essential Facilities?’ (2001) 38 *CML Rev* 397; Pitofsky, Patterson and Hooks ‘The Essential Facilities Doctrine under US Antitrust Law’ (2002) 70 *Antitrust Law Journal* 443; Bavasso ‘Essential Facilities in EC Law: the Rise of an “Epithet” and the Consolidation of a Doctrine in the Communications Sector’ [2003] *Yearbook of European Law* (Oxford University Press, eds Eeckhout and Tridimas), ch 2.

<sup>168</sup> See below.

<sup>169</sup> See ch 19, ‘Compulsory licences’, pp 797–802 on the *Magill* and *Microsoft* cases.

<sup>170</sup> Case C-7/97 [1998] ECR I-7791, [1999] 4 *CMLR* 112; see Treacy ‘Essential Facilities – Is the Tide Turning?’ (1998) 19 *ECLR* 501; Bergman ‘The *Bronner* Case – A Turning Point for the Essential Facilities Doctrine?’ (2000) 21 *ECLR* 59.

The Court of Justice stated that the first task for the national court would be to determine whether there was a separate market for the home-delivery of newspapers in Austria, and whether there was insufficient substitutability between Mediaprint's nationwide system and other, regional, schemes. If the market was the nationwide delivery of newspapers to homes, the national court would be bound to conclude that Mediaprint had a monopoly, and, since this extended to the entire territory of Austria, that this monopoly would be held in a substantial part of the internal market<sup>171</sup>.

The Court of Justice then moved on to the question of abuse. It pointed out that in *Commercial Solvents* the effect of the refusal to supply the raw material by the dominant firm was likely to eliminate all competition in the downstream market between its own subsidiary and anyone else<sup>172</sup>. The Court of Justice then referred to the *Magill* case<sup>173</sup>, saying that the refusal by the owner of an intellectual property right to license it to a third party could, in exceptional circumstances, involve an abuse<sup>174</sup>; in the Court's view *Magill* was an exceptional case for four reasons. First, the information sought by *Magill* was *indispensable* to the publication of a comprehensive listings guide: without it *Magill* could not publish a magazine at all; secondly, there was a demonstrable potential consumer demand for the would-be product; thirdly, there were no objective justifications for the refusal to supply; and fourthly, the refusal would eliminate all competition in the secondary market for TV guides<sup>175</sup>. The Court of Justice said, therefore, that, for there to be an abuse, it would have to be shown that refusal to grant access to the home-delivery service would be likely to eliminate all competition in the daily newspaper market (the downstream market) on the part of the person requesting the service and that the home-delivery service was indispensable to carrying on business in the newspaper market<sup>176</sup>. In the Court of Justice's view, use of Mediaprint's home-delivery service was not indispensable, since there were other means of distributing daily newspapers, for example through shops, kiosks and by post<sup>177</sup>; furthermore there were no technical, legal or economic obstacles that made it impossible for other publishers of daily newspapers to establish home-delivery systems of their own<sup>178</sup>. Specifically on the question of whether access to the distribution system could be considered indispensable the Court of Justice said that:

45. It should be emphasised in that respect that, in order to demonstrate that the creation of such a system is not a realistic potential alternative and that access to the existing system is therefore indispensable, it is not enough to argue that it is not economically viable by reason of the small circulation of the daily newspaper or newspapers to be distributed.

46. For such access to be capable of being regarded as indispensable, it would be necessary at the very least to establish, as the Advocate General has pointed out at point 68 of his Opinion, that it is not economically viable to create a second home-delivery scheme for the distribution of daily newspapers with a circulation comparable to that of the daily newspapers distributed by the existing scheme.

In the Court of Justice's view, the behaviour of Mediaprint did not amount to an abuse of a dominant position.

The Court of Justice's judgment in *Oscar Bronner* established that the key to the law on refusal to supply a competitor in a downstream market is indispensability. The input to which access is sought must be something that is incapable of being duplicated, or which

<sup>171</sup> Case C-7/97 [1998] ECR I-7791, [1999] 4 CMLR 112, paras 32–36<sup>72</sup> Ibid, para 38.

<sup>173</sup> Cases C-241/91 P etc *RTE and ITP v Commission* [1995] ECR I-743, [1995] 4 CMLR 718; for an analysis of this case see ch 19, 'The *Magill* case', p 798.

<sup>174</sup> Case C-7/97 [1998] ECR I-7791, [1999] 4 CMLR 112, para 39.

<sup>175</sup> Ibid, para 40.

<sup>176</sup> Ibid, para 41.

<sup>177</sup> Ibid, para 42.

<sup>178</sup> Ibid, para 44.

could be duplicated only with great difficulty. In some cases duplication may be physically impossible: for example there may be only one point on the coastline of a country where a deep-sea port can be established; and planning or environmental reasons may make it impossible to build a competing airport, a nationwide system of gas transportation or a second rail network. The impossibility of duplication may be legal, for example where an undertaking owns intellectual property rights, such as the copyright in *Magill*. It may also be that a facility cannot be duplicated for economic reasons, although the Court of Justice was careful to point out in *Bronner* that this should be determined by reference to a competitor in the position of Mediaprint, not Bronner: that is to say that it is not sufficient for a small firm to argue that, because of its smallness, it should be entitled to have access to its larger competitor's infrastructure; rather economic non-duplicability asks whether the market is sufficiently large to sustain a second facility such as Mediaprint's distribution system. The Court repeated this idea in *IMS Health GmbH & Co v NDC Health GmbH & Co*<sup>179</sup>. It should be noted that this presages the idea of the 'as efficient competitor' test that underlies the Commission's *Guidance on Article 102 Enforcement Priorities*<sup>180</sup>.

The requirement of indispensability means that it is not sufficient that it would be *convenient* or *useful* to have access: access must be *essential*. In *Tiercé Ladbroke v Commission*<sup>181</sup> and in *European Night Services v Commission*<sup>182</sup> the General Court rejected arguments that the provision of sound and television pictures of horse races in the former case and the supply of train paths, locomotives and train crews in the latter were indispensable services. In the Commission's *Notice on the Application of the Competition Rules to Access Agreements in the Telecommunications Sector*<sup>183</sup> it states that:

It will not be sufficient that the position of the company requesting access would be more advantageous if access were granted – but refusal of access must lead to the proposed activities being made either impossible or seriously and unavoidably uneconomic<sup>184</sup>.

The Commission discusses the requirement of indispensability – or in its parlance 'objective necessity' – in paragraph 83 of its *Guidance on Article 102 Enforcement Priorities*. In paragraph 83 it refers to *Magill*, *Bronner* and *Microsoft* and says that, in determining whether an input is indispensable, it will normally make an assessment of whether it could be duplicated by competitors in the foreseeable future; duplication is taken to mean the creation of an alternative source of efficient supply capable of allowing competitors to exert a competitive constraint on the dominant undertaking in the downstream market.

It may be helpful to identify a number of facilities to which access has been mandated under Article 102:

- **ports:** the *Sealink/B&I-Holyhead* decision has been noted above; another example of access being mandated to a port is *Port of Rødby*<sup>185</sup>

<sup>179</sup> Case C-418/01 [2004] ECR I-5039, [2004] 4 CMLR 1543, paras 28–30.

<sup>180</sup> See ch 5, 'The Commission's *Guidance on Article 102 Enforcement Priorities*', pp 174–177.

<sup>181</sup> Case T-504/93 [1997] ECR II-923, [1997] 5 CMLR 309; see Korah 'The Ladbroke Saga' (1998) 19 ECLR 169; note that in this case the undertakings against which the complaint was made were not present on the downstream betting market.

<sup>182</sup> Cases T-374/94 etc [1998] ECR II-3141, [1998] 5 CMLR 718.

<sup>183</sup> OJ [1998] C 265/2, [1998] 5 CMLR 821, para 91(a).

<sup>184</sup> *Ibid.*

<sup>185</sup> OJ [1994] L 55/52, [1994] 5 CMLR 457; note that the Commission's interim measures decision in the case of *Irish Continental Group v CCI Morlaix*, reported in the Commission's XXVth *Report on Competition Policy* (1995), pp 120–121 and at [1995] 5 CMLR 177, was different from the *Sealink* case in that the port operator in the *Irish Continental* case was not active on the downstream ferry market; see also *Tariffs for Piloting in the Port of Genoa* OJ [1997] L 301/27.

- **airports:** in *Frankfurt Airport*<sup>186</sup> the Commission required that the airport authority should terminate its monopoly over ground-handling services and that it should grant access to third parties wishing to supply such services there<sup>187</sup>
- **rail networks:** in *GVG/FS*<sup>188</sup> the Commission concluded that Ferrovie dello Stato, the Italian state-owned railway company, had abused its dominant position by preventing Georg Verkehrsorganisation, a German railway operator, from providing rail transport from Germany to Milan. The abuses consisted of refusal to grant access to the Italian railway infrastructure<sup>189</sup>; a refusal to supply traction (a locomotive, driver and ancillary services)<sup>190</sup>; and a refusal to enter into an international grouping of the kind necessary for cross-border rail passenger services<sup>191</sup>
- **gas pipelines:** the Commission has taken action in relation to access to gas pipelines in a number of cases<sup>192</sup>. Of particular notice in the recent past are *Gaz de France*<sup>193</sup>, *E.ON*<sup>194</sup> and *ENI*<sup>195</sup>, in each of which the Commission was given legally-binding commitments, under Article 9 of Regulation 1/2003, some of which were structural, to address concerns about possibly abusive refusals to deal<sup>196</sup>
- **oil storage:** in *Disma* the Commission required access to equipment for storing jet fuel and transferring it to supply points at Milan's Malpensa Airport; this case was brought under Article 101 rather than Article 102, since a number of undertakings owned the infrastructure in question<sup>197</sup>
- **telecommunications wires and cables:** the essential facilities doctrine is capable of application to telecommunications networks<sup>198</sup>
- **set-top boxes:** it may be possible to invoke the essential facilities doctrine to obtain access to set-top boxes which are necessary, for example, for the provision of interactive television services<sup>199</sup>
- **computerised airline reservation system**<sup>200</sup>: the Commission has ordered that access be made available to a computerised reservation in the air transport sector

<sup>186</sup> OJ [1998] L 72/30, [1998] 4 CMLR 779; note that Council Directive 96/67/EC, OJ [1997] L 272/36 liberalises ground-handling at airports and prevents discriminatory fees.

<sup>198</sup> Commission Notice on the Application of the Competition Rules to Access Agreements in the Telecommunications Sector OJ [1998] C 265/2, [1998] 5 CMLR 821, paras 49–53 and 87–98; see Nikolinos 'Access Agreements in the Telecommunications Sector – Refusal to Supply and the Essential Facilities Doctrine Under EC Competition Law' (1999) 20 ECLR 399.

<sup>199</sup> See eg Case JV.37 *BSkyB/KirchPayTV* (under the EU Merger Regulation), Commission Press Release IP/00/279, 21 March 2000; *British Interactive Broadcasting* OJ [1999] L 312/1, [2000] 4 CMLR 901, paras 173–181 (a case under Article 101).

<sup>200</sup> *London European-Sabena* OJ [1988] L 317/47, [1989] 4 CMLR 662; see also *Lufthansa* Commission Press Release IP/99/542, 20 July 1999, where the Commission imposed a fine of €10,000 under Council Regulation 2299/89 on a code of conduct for computerised reservation systems.

- **interlining:** in *British Midland/Aer Lingus* the Commission required Aer Lingus to provide 'interlining facilities' to a competing airline, so that passengers of the latter would be able, in certain circumstances, to fly on the aeroplanes of the former<sup>201</sup>
- **cross-border payment systems:** the Commission may insist that access be granted to a cross-border payment system<sup>202</sup>. In *Society for Worldwide International Financial Telecommunications* SWIFT controlled the only international network for transferring payment messages; it also operated the only network capable of supplying connections for banking establishments anywhere in the world. The Commission considered that the network constituted a 'basic infrastructure in its own right, since to refuse any entity access to such a network is tantamount to a *de facto* exclusion from the market for international transfers'<sup>203</sup>. The Commission's view was that it was a manifest abuse of a dominant position to lay down unjustified admission criteria and to apply them in a discriminatory manner<sup>204</sup>. SWIFT agreed to grant access to any entity meeting the criteria laid down by the European Monetary Institute for admission to domestic payment systems<sup>205</sup>
- **cross-border securities clearing and settlement services:** in *Clearstream (Clearing and Settlement)*<sup>206</sup> the Commission found that Clearstream had abused its dominant position in relation to clearing and settlement services for registered services by refusing to deal with Euroclear Bank; the Commission's decision was upheld on appeal to the General Court<sup>207</sup>
- **postal network:** the Commission's view is that there can be an obligation to provide access to postal networks<sup>208</sup>
- **premium TV content:** the Commission has regarded premium TV content as an essential input for pay-TV operators<sup>209</sup>
- **intellectual property rights and or proprietary information:** it may be that access may be obtained to intellectual property rights and/or proprietary information<sup>210</sup>

<sup>201</sup> OJ [1992] L 96/34, [1993] 4 CMLR 596.

- **spare parts:** it may be that spare parts necessary for the repair of a particular product could be regarded as indispensable<sup>211</sup>, depending on how the relevant market is defined<sup>212</sup>.

Before moving on to the next requirement for a finding of an abusive refusal to supply a competitor in a downstream market, it may be worth pausing to reflect on why there have been so many cases of this kind in the EU and why the Supreme Court in the US has retreated from the essential facilities doctrine in recent years. As far as the EU is concerned, from the 1980s onwards the Commission (and many Member States) developed a policy that favoured the demonopolisation and liberalisation of sectors that for much of the twentieth century were regarded as natural monopolies, or which were considered to be inappropriate for the market mechanism; often these sectors were under state control or in state ownership. Exposing sectors such as telecommunications, energy and transport to competition was considered desirable. However competition would be slow to emerge where service providers could compete only if they had access to important infrastructures such as telecommunication wires and cables, the electricity grid, gas and oil pipelines, ports, airports and railway lines owned and operated by vertically-integrated dominant undertakings. In many Member States this problem was overcome by the establishment of specific regulatory regimes that mandate access to such infrastructures on reasonable, non-discriminatory terms<sup>213</sup>; and in some systems of competition law there are specific rules requiring undertakings in particular sectors to supply<sup>214</sup>. It may be sensible in principle that situations of natural or persistent monopoly should be dealt with by a system of *ex ante* regulation rather than by competition law: a competition authority is likely to be ill-equipped to deal with the persistent disputes in relation to access, and the appropriate price for access, that arise in relation to essential facilities. However competition law has proved to be an important adjunct to *ex ante* regulation, as the cases in this section have demonstrated<sup>215</sup>.

In the US the first case on the essential facilities doctrine is considered to have been *United States v Terminal Railroad Association of St Louis*<sup>216</sup>, although the term was not used in that case. More recently, in *Verizon Communications Inc v Law Offices of Curtis Trinko*<sup>217</sup>, the Supreme Court adopted a notably unenthusiastic approach to the essential facilities doctrine. A case was brought under section 2 of the Sherman Act asserting the right of third parties to have access to Verizon's local telecommunications network. The New York and federal telecommunications regulators had conducted investigations and

<sup>211</sup> See Case 22/78 *Hugin Kassaregister v Commission* [1979] ECR 1869, [1979] 3 CMLR 345; the Commission's decision in this case finding an abusive refusal to supply was annulled by the Court of Justice as it had failed to demonstrate an effect on trade between Member States: see ch 3, 'The Effect on Trade between Member States', pp 144–149.

<sup>212</sup> Market definition in the case of 'aftermarkets' is discussed in ch 1, 'Spare parts and the aftermarket', pp 37–38.

<sup>213</sup> See ch 23, 'Regulated Industries', pp 977ff.

<sup>216</sup> 224 US 383 (1912).

<sup>217</sup> 540 US 398 (2004); for comment see Gérardin 'Limiting the Scope of Article 82 EC: What can the EU learn from the US Supreme Court's Judgment in *Trinko* in the wake of *Microsoft*, *IMS*, and *Deutsch Telekom*?' (2004) 41 CML Rev 1519.

concluded them; the plaintiff was not satisfied with the outcome, and therefore brought a claim based on competition law. The Supreme Court reviewed the case law on essential facilities, in particular the *Aspen Skiing* case<sup>218</sup>, which it regarded as ‘at or near the outer boundary of section 2 liability’. There is little doubt that the Supreme Court was reluctant to allow the plaintiff in *Trinko* to obtain, through private antitrust litigation, what it had failed to achieve by complaining to the public institutions with sector-specific responsibility for telecommunications. The US Federal Trade Commission has urged Congress to clarify that the *Trinko* judgment ought not to apply to the *public* enforcement of the antitrust rules in regulated sectors, since the incentives of private litigants to sue, perhaps vexatiously, are different from those of a public competition authority<sup>219</sup>.

### (C) Would a refusal to grant access lead to the elimination of effective competition in the downstream market?

In the *Commercial Solvents* judgment the Court of Justice spoke of the risk of the refusal to supply ‘eliminating *all* competition’ on the downstream market (emphasis added); but in an earlier part of the judgment it had noted that the refusal to supply Zoja would result in the elimination of *one* of the principal manufacturers of the downstream product – in other words it was not correct to say that the removal of Zoja from the market would eliminate *all* competition. To limit the scope of Article 102 in refusal to supply cases to those where *all* competition downstream would be eliminated would restrict it considerably. In *Microsoft v Commission*<sup>220</sup> the General Court said, at paragraph 563, that it was not necessary for the Commission to demonstrate that ‘all’ competition on the market would be eliminated; it was sufficient to show that the refusal to supply is liable, or likely, to eliminate all *effective* competition. The Commission, in paragraph 85 of its *Guidance on Article 102 Enforcement Priorities*, says that it thinks that a refusal to supply an indispensable input is liable to eliminate *effective*, rather than *all*, competition.

In the Commission’s view, harm to competition in the downstream market is likely to be greater where the dominant undertaking has a higher rather than a lower market share in the downstream market. The Commission also discusses, in paragraphs 86 to 88 of the *Guidance*, whether any refusal to supply would be likely to have an adverse effect on consumer welfare. In paragraph 87 it specifically says that it would look to see whether the refusal would result in innovative products not being brought to the market or follow-on innovation being stifled. On this point it specifically refers to the General Court’s judgment in *Microsoft*, where this was considered to be a relevant factor in the finding of abuse, and *IMS Health*; it might also have referred to *Magill*, where this was clearly an influential matter – Magill wished to produce a composite TV listings magazine which at the time did not exist. In paragraph 88 the Commission says that it also would be concerned about harm to consumer welfare where an upstream input price is regulated, the downstream price is not regulated, and the refusal to supply might lead to the extraction of more profits in the downstream market.

### (D) Is there an objective justification for the refusal to supply?

A refusal to supply a downstream customer would not be unlawful where there is an objective justification for it<sup>221</sup>. An obvious example would be that the customer is a bad

<sup>218</sup> *Aspen Skiing Co v Aspen Highlands Skiing Corp* 472 US 585 (1985).

<sup>219</sup> See ‘Is There Life After *Trinko* and *Credit Suisse*? <sup>221</sup> See ch 5, ‘Objective justification’, pp 211–212.

debtor, has become a credit risk or has failed to observe its contractual obligations; in the UK OFCOM and the CAT have accepted that there is no obligation to supply an input to a customer who will use it for an illegal purpose<sup>222</sup>. The owner of the input might also be able to argue that there is a capacity constraint which makes it impossible for access to be provided<sup>223</sup>: for example the owner of a port might already be using it to full capacity, in which case it would not be possible for it to grant access to a third party. In paragraphs 89 and 90 of the Commission's *Guidance on Article 102 Enforcement Priorities* the Commission says that it would consider claims that a refusal is necessary to allow the dominant undertaking to realise an adequate return on investments required to develop its input business; and also that granting access might affect negatively both the dominant undertaking's incentive to innovate (why invest if I must give access to my competitors?) and that of the downstream competitor (why invest if I can take a free-ride on my upstream supplier)?

## (ii) Horizontal foreclosure

### (A) Refusal to supply a distributor as a disciplining measure

A refusal to supply may be abusive where a dominant firm does so as a disciplinary measure against a distributor who handles competitors' products: this would be an example of horizontal foreclosure, whereby the dominant supplier takes steps to exclude a competitor in the upstream market in which it is dominant. This happened in *United Brands v Commission*<sup>224</sup>, where United Brands was trying to prevent its distributor, which was not subject to an exclusive purchasing obligation, from taking part in a competitor's advertising campaign. The Court of Justice held that it was abusive to stop supplying a long-standing customer which abides by normal commercial practice, and that orders should be met which were in no way out of the ordinary. United Brand's objective was to prevent the distributor from selling competitors' products; this was not a case in which United Brands was seeking to eliminate a competitor in a downstream market.

### (B) Refusal to supply a potential competitor in the supplier's market

It may be an abuse to refuse supplies as an exclusionary tactic against a customer trying to enter an upstream market in competition with the supplier. In *BBI Boosey & Hawkes: Interim Measures*<sup>225</sup> the Commission found that Boosey & Hawkes had abused a dominant position by refusing to supply brass band instruments to a distributor which was intending to commence the manufacture of such instruments in competition with it. The Commission said that the dominant firm was entitled to take reasonable steps to protect its commercial interest, but that such measures must be fair and proportional to the threat<sup>226</sup>; in its view it was not reasonable 'to withdraw all supplies immediately or to take reprisals against that customer'<sup>227</sup>.

## (iii) Refusal to supply on the basis of nationality

Discrimination on grounds of nationality is contrary to Article 18 TFEU. In *GVL v Commission*<sup>228</sup> the Court of Justice held that it was abusive for a national copyright collecting society to refuse to admit to membership nationals of other Member States. The

(iv) **Refusal to supply to prevent parallel imports and exports**

Refusals to supply that are harmful to the internal market are discussed below<sup>230</sup>.

(B) **UK case law**<sup>231</sup>

In *JJ Burgess & Sons v OFT*<sup>232</sup> the CAT concluded that W Austin & Sons had abused a dominant position by refusing to grant access to Harwood Park Crematorium for the purpose of conducting cremations; in doing so the CAT annulled a decision of the OFT<sup>233</sup> that there had been no abuse. This was the first occasion on which the CAT made its own finding of a substantive infringement of competition law<sup>234</sup>; subsequently JJ Burgess commenced a 'follow-on' action for damages against W Austin: this case was settled between the parties in February 2008<sup>235</sup>. The CAT's judgment surveyed the relevant case law on refusal to supply<sup>236</sup> and formulated three propositions that were sufficient to reach a finding on the facts of that case, while noting that these were not intended to contain an exhaustive statement of the law on refusal to supply<sup>237</sup>:

- an abuse may occur where a dominant undertaking, without objective justification, refuses supplies to an established existing customer who abides by regular commercial practice, at least where the refusal to supply is disproportionate and operates to the detriment of consumers (*United Brands*)
- such an abuse may occur if the potential result of the refusal to supply is to eliminate a competitor in a downstream market where the dominant undertaking is itself in competition with the undertaking potentially eliminated, at least if the goods or services in question are indispensable for the activities of the latter undertaking, and there is a potential adverse effect on consumers (*Commercial Solvents*)
- it is not an abuse to refuse access to facilities that have been developed for the exclusive use of the undertaking that has developed them, at least in the absence of strong evidence that the facilities are indispensable to the service provided, and there is no realistic possibility of creating a potential alternative<sup>238</sup> (*Oscar Bronner v Mediaprint*).

Problems of refusal to supply are sometimes settled informally following investigation by the OFT<sup>239</sup>.

<sup>229</sup> OJ [2000] L 5/55, [2000] 4 CMLR 963; see Weatherill 'Fining the Organisers of the 1998 World Cup' (2000) 21 ECLR 275.

<sup>236</sup> Case No 1044/2/1/04 [2005] CAT 25, [2005] CompAR 1151, paras 291–313.

<sup>237</sup> *Ibid*, para 312.

<sup>238</sup> *Ibid*, para 311.

<sup>239</sup> See eg the 2000 *Annual Report of the Director General of Fair Trading*, p 46 (assurances by cement producers to supply bulk cement for resale).

In *Disconnection of Floe Telecom Ltd's Services by Vodafone Ltd*<sup>240</sup> Floe complained to OFCOM that Vodafone was abusively refusing to supply it with certain services necessary for it to operate in the market for mobile telephony. OFCOM decided that Vodafone had an objective justification for the refusal, since Floe would have been acting unlawfully on the market. On appeal to the CAT the decision was quashed and remitted to OFCOM<sup>241</sup> which, in a second decision<sup>242</sup>, maintained its position that there had not been an unlawful refusal to supply. Floe again appealed against OFCOM's decision; on this occasion the CAT agreed with OFCOM that there had been no infringement, albeit on different grounds from those given by OFCOM<sup>243</sup>. The CAT's judgment was set aside on appeal to the Court of Appeal<sup>244</sup>.

There have been a number of cases before the courts concerning refusals to supply by dominant firms that allegedly infringed the Chapter II prohibition; most of these were unsuccessful<sup>245</sup>. In *Network Multimedia Television Ltd v Jobserve Ltd*<sup>246</sup> the defendant operated a website on which IT recruitment agencies advertised job vacancies; it refused to accept advertisements from agencies that had an interest in a competing 'job board'. The court, with which the Court of Appeal agreed, decided that there was a serious issue to be tried, and granted an injunction in the claimant's favour pending the trial of the action. In *Intel Corp'n v VIA Technologies* Intel, a manufacturer of computer components, was alleged to have abused its dominant position by refusing to grant a patent licence to one of its competitors. Lawrence Collins J granted summary judgment in favour of Intel on the basis that the mere refusal to grant a licence of an intellectual property right was not an abuse<sup>247</sup>. The Court of Appeal disagreed. Having surveyed the relevant EU law it concluded that Intel's refusal to license might fall within the 'exceptional circumstances' found to exist in *Magill*<sup>248</sup> and thereby infringe the Chapter II prohibition. In any event, the Court of Appeal considered that the difficult questions of law and fact raised by the case were not suitable for summary judgment.

In *AAH Pharmaceuticals Ltd v Pfizer Ltd*<sup>249</sup> wholesalers of pharmaceuticals sought an interim injunction to require the defendant to maintain supplies of pharmaceutical products. The OFT had declined a request from the wholesalers for interim measures, and instead launched a market study<sup>250</sup>; the High Court decided that it was not appropriate to grant the relief sought in these circumstances. Interim relief was successfully obtained in a refusal to supply case in *Software Cellular Network Ltd v T-Mobile (UK) Ltd*<sup>251</sup>.

<sup>240</sup> OFCOM decision of 3 November 2003.

<sup>247</sup> [2002] UKCLR 576, para 173.

<sup>248</sup> *Intel Corp'n v VIA Technologies* [2002] EWCA Civ 1905, [2003] ECC 16, paras 50–51.

<sup>249</sup> [2007] EWHC 565, [2007] UKCLR 1561.

<sup>250</sup> *Medicines Distribution*, 11 December 2007.

<sup>251</sup> [2007] EWHC 1790, [2007] UKCLR 1663.

In *Purple Parking Ltd v Heathrow Airport Ltd*<sup>252</sup> the High Court was sceptical that Purple Parking would be able to demonstrate that the forecourts to various terminals at Heathrow Airport were ‘essential’ for the claimant that operated a ‘meet and greet’ service for passengers arriving there<sup>253</sup>; however the court did consider that the airport was guilty of abusive discrimination contrary to section 18(2)(c) of the Competition Act.

## 5. Non-Pricing Abuses that are Harmful to the Internal Market

As noted in chapter 5, the EU Courts and the Commission will condemn abusive practices that are harmful to the internal market<sup>254</sup>. In *BL v Commission*<sup>255</sup> the Court of Justice upheld the decision of the Commission that BL had abused a dominant position by refusing to supply type-approval certificates for Metro cars imported from the continent; this practice was part of a strategy of British Leyland aimed at discouraging parallel imports into the UK. In *United Brands v Commission*<sup>256</sup> one of the abuses committed by United Brands was to impose a restriction on its distributors against exporting green, unripened bananas: in practice this amounted to an export ban, since it would not be possible to export bananas that were already ripe. In *Amministrazione Autonoma dei Monopoli dello Stato v Commission*<sup>257</sup> the General Court confirmed the Commission’s conclusion that AAMS, which had a dominant position on the Italian market for the wholesale distribution of cigarettes, had abused its dominant position by imposing distribution agreements on foreign producers which contained terms limiting the access of foreign cigarettes to the Italian market; a fine of €6 million was imposed.

The suppression of parallel trade in the pharmaceutical sector may be treated differently. In *Syfait v GlaxoSmithKline plc*<sup>258</sup> the Court of Justice was asked by the Greek Competition Authority whether it could be an abuse of a dominant position for Glaxo to have ceased to supply wholesalers in Greece in order to prevent exports of pharmaceutical products from Greece to higher-priced Member States. Advocate General Jacobs reviewed the law on refusal to supply under Article 102<sup>259</sup>; he did not think that Glaxo’s refusal to supply amounted to a *per se* abuse and considered that, given the specific characteristics of the pharmaceuticals market – pervasive and diverse state intervention in the pricing of pharmaceuticals, regulation of distribution, the adverse effect that parallel trade might have on the incentive to innovate and the fact that end consumers may not themselves benefit from parallel trade – it was not necessarily an abuse for Glaxo to have refused to supply. However the Court of Justice held that, as the Greek Competition Authority was not a court or tribunal for the purpose of Article 267 TFEU, the reference was inadmissible; it therefore abstained from expressing an opinion on the extremely important question referred to it.

<sup>252</sup> [2011] EWHC 987.

<sup>253</sup> *Ibid*, paras 143 and 144.

<sup>254</sup> See ch 5, ‘Abuses that are harmful to the single market’, p 210; see also the Commission’s XXVIIth *Report on Competition Policy* (1997), point 63.

<sup>255</sup> Case 226/84 [1986] ECR 3263 [1987] 1 CMLR 185; see also Commission Press Release IP (87) 390 *Re Volvo Italia* [1988] 4 CMLR 423.

<sup>256</sup> Case 27/76 [1978] ECR 207, [1978] 1 CMLR 429.

<sup>257</sup> OJ [1998] L 252/47, [1998] 5 CMLR 186, upheld on appeal Case T-139/98 *Amministrazione Autonoma dei Monopoli dello Stato v Commission* [2001] ECR II-3413, [2002] 4 CMLR 302.

<sup>258</sup> Case C-53/03 [2005] ECR I-4609, [2005] 5 CMLR 7.

<sup>259</sup> Opinion of 28 October 2004, paras 53ff.

Subsequently the same point was referred to the Court of Justice by the Athens Appeal Court<sup>260</sup>. On this occasion the Court of Justice held that Article 102 must be interpreted as meaning that an undertaking occupying a dominant position on the relevant market for medicinal products which, in order to put a stop to parallel exports carried out by certain wholesalers from one Member State to other Member States, refuses to meet 'ordinary' orders from those wholesalers, is abusing its dominant position. However it went on to say that it is for the national court to ascertain whether the orders are ordinary in the light of both the size of those orders in relation to the requirements of the market in the first Member State and the previous business relations between that undertaking and the wholesalers concerned. Without actually saying so, this judgment would appear to mean that Glaxo was not under any obligation to supply more of the products in question than were needed to meet domestic demand in Greece: in other words that, in the context of the pharmaceutical sector, it was legitimate to restrict supplies in such a way that parallel trade would be restricted.

## 6. Miscellaneous Other Non-Pricing Abuses<sup>261</sup>

There have been some applications of Article 102 to non-pricing practices that do not fit under any of the headings so far deployed in this chapter. Some are concerned with the exercise (or non-exercise) of intellectual property rights, and are discussed in chapter 19<sup>262</sup>. Some other cases are discussed below.

### (i) Harming the competitive structure of the market

It was established in *Continental Can*<sup>263</sup> that Article 102 could be applied to mergers in certain circumstances, and there was one other decision that condemned a merger<sup>264</sup>. However the inadequacy of Article 102 as a tool for controlling EU mergers lay behind the Commission's eagerness for a specific regulation, which finally emerged in 1989 after a gestation period of 16 years<sup>265</sup>. The application of Article 102 to mergers after the EU Merger Regulation is dealt with in chapter 21.

Even though mergers would now be dealt with under the EU Merger Regulation, the Commission considers that the *Continental Can* case is authority for the proposition that it can be an abuse to alter the competitive structure of a market where competition on that market is already weakened as a result of the very presence of the dominant undertaking on it. This is demonstrated by *Tetra Pak 1 (BTG Licence)*<sup>266</sup>, where the Commission objected to the acquisition, by merger, of an exclusive licence of patents and know-how which would prevent competitors from entering Tetra Pak's market. Another example of harming the structure of the market occurred in *Irish Sugar v Commission*<sup>267</sup>, where the

<sup>265</sup> Council Regulation 4064/89/EEC, OJ [1990] L 257/13; that Regulation has since been recast by Council Regulation 139/2004, OJ [2004] L 24/1.

<sup>266</sup> OJ [1988] L 272/27, [1988] 4 CMLR 881, upheld on appeal Case T-51/89 *Tetra Pak Rausing SA v Commission* [1990] ECR II-309, [1991] 4 CMLR 334.

<sup>267</sup> Case T-228/97 [1999] ECR II-2969, [1999] 5 CMLR 1300.

General Court upheld the decision of the Commission that it was an abuse of a dominant position for Irish Sugar, the dominant undertaking in the Irish sugar market, to purchase a competitor's sugar from a wholesaler and a retailer and to replace it with its own, a so-called 'product swap'<sup>268</sup>.

The Commission's decision in *Trans-Atlantic Conference Agreement*<sup>269</sup> that TACA had abused a dominant position by inducing undertakings to join a liner conference, thereby harming the competitive structure of the market, was annulled on appeal by the General Court<sup>270</sup>.

The Commission held in *Decca Navigator System*<sup>271</sup> that it is an abuse for an undertaking in a dominant position to enter into an agreement with an actual or potential competitor with the intention of sharing markets or stunting the efforts of competitors.

## (ii) Vexatious litigation

In the course of the *Promedia* case<sup>272</sup> the Commission stated that entering into litigation, which is the expression of the fundamental right of access to a judge, is not an abuse; however it could be abusive if a dominant firm brings an action:

- (i) which cannot reasonably be considered as an attempt to establish its rights and can therefore only serve to harass the opposite party, and (ii) which is conceived in the framework of a plan whose goal is to eliminate competition.

The General Court's judgment, in which it upheld the decision of the Commission not to proceed against Belgacom following a complaint from Promedia, appears, at paragraphs 72 and 73, to have confirmed the Commission's view that vexatious litigation could amount to an abuse in the circumstances envisaged by it. The General Court also stated in this judgment that a claim for the performance of a contractual obligation could amount to an abuse where the claim 'exceeds what the parties could reasonably expect under the contract or if the circumstances applicable at the time of the conclusion of the contract have changed in the meantime'<sup>273</sup>.

In *Compagnie Maritime Belge Transports SA v Commission*<sup>274</sup> Cewal, a liner conference, had concluded an agreement with the Zairean Maritime Freight Management Office (the so-called 'Ogefrem agreement') granting Cewal exclusive rights to the freight trade between Zaire and northern Europe. When Ogefrem allowed a third party, Grimaldi and Cobelfret, a small amount of the trade in question, Cewal repeatedly insisted that Ogefrem should strictly comply with the terms of the agreement. The Court of Justice upheld the finding of the Commission that it was abusive of Cewal to insist on its exclusive rights under the Ogefrem agreement in circumstances where the insistence was intended to remove its only competitor from the market and where Cewal had a discretion under the contract whether to insist on its performance or not<sup>275</sup>.

<sup>268</sup> Ibid, paras 226–235.

<sup>269</sup> OJ [1999] L 95/1, [1999] 4 CMLR 1415.

<sup>270</sup> Cases T-191/98 etc *Atlantic Container Line AB v Commission* [2003] ECR II-3275, [2005] 4 CMLR 1283.

<sup>271</sup> OJ [1989] L 43/27, [1990] 4 CMLR 627.

<sup>272</sup> Case T-111/96 *ITT Promedia v Commission* [1998] ECR II-2937, [1998] 5 CMLR 491; see Preece 'ITT Promedia v EC Commission: Establishing an Abuse of Predatory Litigation?' (1999) 20 ECLR 118.

<sup>273</sup> Case T-111/96 [1998] ECR II-2937, [1998] 5 CMLR 491, para 140.

## Abuse of dominance (2): pricing practices

1. Introduction	715	6. Predatory Pricing	739
2. Cost Concepts	716	7. Margin Squeezing	754
3. Exploitative Pricing Practices	718	8. Price Discrimination	759
4. Rebates that have Effects Similar to Exclusive Dealing Agreements	728	9. Pricing Practices that are Harmful to the Single Market	764
5. Bundling	737		

### 1. Introduction

This chapter will consider abusive pricing practices under Article 102 TFEU and the Chapter II prohibition in the Competition Act 1998. The chapter will begin with a discussion of various cost concepts used in determining whether a price is abusive. It will then deal in turn with exploitative pricing practices; rebates and other practices that have an effect similar to exclusive dealing agreements; bundling; predatory pricing; margin squeezing; price discrimination; and practices that are harmful to the single market. This taxonomy is over-schematic, in that the categories can blur into one another: for example discrimination may be both exploitative and exclusionary, and an excessively high price may in reality be a way of preventing parallel imports or of excluding a competitor from the market; nevertheless this division may provide helpful insights into the way in which the law is applied in practice. In each section the application of Article 102 by the European Commission and by the EU Courts will be considered first, followed by cases dealt with by the competition authorities and courts in the UK. Reference will be made where appropriate to the Commission's *Guidance on the Commission's Enforcement Priorities in Applying Article [102 TFEU] to Abusive Exclusionary Conduct by Dominant Undertakings* ('the *Guidance on Article 102 Enforcement Priorities*' or 'the *Guidance*')<sup>1</sup>. As noted in previous chapters, the *Guidance* is not an attempt to state the law of Article 102; however it does attempt to explain why the Commission would have a greater interest in prosecuting some types of alleged exclusionary abuses than others. In particular the Commission says that, as a general proposition, only undertakings that are 'as efficient' as the dominant undertaking should benefit from the rules on exclusionary pricing abuse<sup>2</sup>; this is an economics-oriented approach, and one with which the Court of Justice agrees<sup>3</sup>.

<sup>1</sup> OJ [2009] C 45/7; for a general discussion see ch 5, 'The Commission's *Guidance on Article 102 Enforcement Priorities*', pp 174–177.

<sup>2</sup> *Ibid*, paras 23 and 27.

<sup>3</sup> See eg Case C-280/08 P *Deutsche Telekom v Commission* [2010] ECR I-000, [2010] 5 CMLR 1495, para 177 and Case C-52/09 *Konkurrensverket v TeliaSonera Sverige* [2011] ECR I-000, [2011] 4 CMLR 982, para 39.

The law on abusive pricing practices is complex and controversial. Dominant firms may infringe Article 102 where they raise their prices to unacceptably high levels; they may also be found to have abused their dominant position where they cut their prices, if such cuts can be characterised not as normal, competitive responses on the merits, but as strategic behaviour intended to eliminate competitors. Not unnaturally a dominant firm, or one that is anxious that it might be found to be dominant, may feel itself to be on the horns of a dilemma where both a price rise and a price cut might be considered to be abusive; the dilemma might become a trilemma if leaving prices where they are might be considered to be evidence of a concerted practice with the other operators on the market, and if the word trilemma were to exist.

## 2. Cost Concepts

Analysis of whether a dominant undertaking's pricing practices are abusive typically requires consideration of its costs: this is acknowledged in paragraph 25 of the Commission's *Guidance on Article 102 Enforcement Priorities*. A price may infringe Article 102 where the difference between the price charged and the costs incurred is excessive; discrimination may be abusive where it lacks a cost justification; and a price may be unlawful where the price charged is below cost. However it is important to understand at the outset that the apparently simple term 'cost' in fact raises serious problems in practice; it may be helpful therefore to begin this chapter by outlining some of the cost concepts that are deployed in competition analysis<sup>4</sup>. These concepts will be referred to quite often later in this chapter.

### (A) Fixed costs and sunk costs

**Fixed costs** are costs that do not vary with the amount of goods or services that a firm produces; for example a manufacturing firm must buy or rent land on which to build a factory, and will probably incur property taxes as well: these costs are fixed, as they must be paid irrespective of the firm's output.

**Sunk costs** are a particular type of fixed cost: a sunk cost is one that a firm has already incurred and which cannot be recovered, for example if it were to exit the market. The reason that costs may be sunk is that certain assets cannot be used for more than one purpose, and so have no or very little second-hand value. A typical sunk cost is advertising expenditure (the 'asset' being the advertising campaign) incurred in promoting a new product: if the product fails, the expense involved cannot be recovered. Another example of a sunk cost would be expenditure incurred in designing and/or producing a product for a specific customer, for which no one else would have any use.

### (B) Marginal cost

Marginal cost is the cost incurred by a firm when producing an additional unit of output; it does not include any element of a firm's fixed costs, since fixed costs do not vary with

<sup>4</sup> Further definitions of various cost concepts can be found in Black *Oxford Dictionary of Economics* (Oxford University Press, 3rd ed, 2003); the European Commission's *Glossary of terms used in EU competition policy*, available at [www.ec.europa.eu](http://www.ec.europa.eu); the Commission's *Guidance on Article 102 Enforcement Priorities* OJ [2009] C 45/7, n 18; Niels, Jenkins and Kavanagh *Economics for Competition Lawyers* (Oxford University Press, 2011), pp 189–197.

output. Marginal cost usually decreases as the scale of a firm's output expands, but increases as a firm's output reaches total capacity. Marginal cost is a theoretical measure of cost: it is not used in practice<sup>5</sup>. More useful are the concepts of variable costs and avoidable costs, described below.

### (C) **Variable costs**

**Variable costs** are costs that vary with the amount of products (rather than each additional unit of output) that a firm produces: for example a firm's expenditure on items such as raw materials, fuel and maintenance will vary according to the amount of its output; variable costs do not include any element of a firm's fixed costs.

### (D) **Avoidable costs**

**Avoidable costs** refer to those costs which a firm would avoid incurring (or to put the matter another way, the savings it would make) by ceasing a particular activity over a specified period of time; for example where a firm is accused of predatory pricing over an 18-month period, it may be relevant to ask what costs it would have avoided if it had not produced the units that were the subject of the predation. Avoidable costs include some **fixed**, depending on the period of time in question, and **variable** costs, but omit **common costs**, that is to say costs that arise where two or more products are produced together even though they could be produced separately.

### (E) **Average variable cost ('AVC')**

A firm's **average variable cost** is calculated by dividing all its variable costs by the total of its actual output. This calculation indicates the average cost of each extra unit of output.

### (F) **Average avoidable cost ('AAC')**

A firm's **average avoidable cost** is calculated by dividing all its avoidable costs by its output. Because some fixed costs may be included in average avoidable cost, it may be higher than a firm's average variable cost.

### (G) **Long-run incremental cost ('LRIC')**

**Long-run incremental cost** is the sum of the fixed and variable costs that a firm incurs when deciding to produce a particular product, referred to as 'the increment'. Long-run incremental cost does not include any variable or fixed costs *other* than those of the increment.

### (H) **Long-run average incremental cost ('LRAIC')**

**Long-run average incremental cost** is calculated by dividing all its long-run incremental costs by its output. LRAIC is the same as the average total cost of a firm producing a single

<sup>5</sup> Marginal cost determines the level of output a firm will produce under conditions of perfect competition; on perfect competition see ch 1, 'The benefits of perfect competition', pp 4–6.

product. It will be lower than the average total cost of a multi-product firm enjoying economies of scope<sup>6</sup> as it excludes costs that are common to several products.

### (I) Average total cost ('ATC')

A firm's average total cost is calculated by dividing both its variable costs and its fixed costs by the total of its output. It will, of course, be higher than its average variable cost.

### (J) Stand alone cost

The stand alone cost of a firm refers to the cost that it would incur if it were to produce just a single product, so that there would be no common costs as a result of its other activities.

## 3. Exploitative Pricing Practices<sup>7</sup>

Exploitative pricing raises interesting questions for competition law. To the extent that firms form a cartel in order to restrict output, raise prices and take larger profits, EU and UK law both intervene: the price-fixing cartel is the most obvious target for any system of competition law; this has been considered in chapter 13. The position is more complicated where oligopolists indulge in tacit coordination falling short of an agreement or concerted practice; this has been considered in chapter 14. Different problems arise where a monopolist or dominant firm individually exploits its position by charging excessive (that is supra-competitive) prices.

### (A) Arguments against direct control

It might seem obvious that competition authorities should take direct steps under Article 102 and analogous provisions to control exploitative pricing<sup>8</sup>, but the case for doing so is not as clear-cut as may at first appear. There are persuasive arguments against direct control of prices under competition law.

First, if normal market forces have their way, the fact that a monopolist is able to earn large profits should, in the absence of barriers to expansion and entry, attract new entrants to the market. In this case the extraction of monopoly profits will be self-defeating in the

<sup>6</sup> Economies of scope occur where it is cheaper to produce two products together than to produce them separately; see ch 1, 'Economies of scale and scope and natural monopolies', p 10.

<sup>7</sup> For further reading on exploitative pricing see Bishop and Walker *The Economics of EC Competition Law* (Sweet & Maxwell, 3rd ed, 2010), paras 6.14–6.19; Evans and Padilla 'Excessive Prices: Using Economics to Define Administrable Legal Rules' (2005) 1 *Journal of Competition Law and Economics* 97; O'Donoghue and Padilla *The Law and Economics of Article 82 EC* (Hart Publishing, 2006), ch 12; *The Pros and Cons of High Prices* (Swedish Competition Authority, 2007); Fletcher and Jardine 'Towards an Appropriate Policy for Excessive Pricing' in *European Competition Law Annual 2007: A Reformed Approach to Article 82 EC* (Hart Publishing, 2008, eds Ehlermann and Marquis); Niels, Jenkins and Kavanagh *Economics for Competition Lawyers* (Oxford University Press, 2011), pp 268–280; the periodical literature includes Furse 'Excessive Prices, Unfair Prices and Economic Value' (2008) 4(1) *European Competition Journal* 59–83; Akman and Garrod 'When are Excessive Prices Unfair?' (2011) 7(2) *Journal of Competition Law and Economics* 403; Liyang 'Excessive Prices within EU Competition Law' (2011) 7(1) *European Competition Journal* 47.

<sup>8</sup> Note that s 2 of the Sherman Act 1890 in the US does *not* apply to exploitative excessive pricing: see Gal 'Monopoly Pricing as an Antitrust Offense in the US and the EC: Two Systems of Belief about Monopoly' (2004) 49 *Antitrust Bulletin* 343.

long run and can act as an important economic indicator to potential entrants to enter the market. If one accepts this view of the way that markets operate, one should accept with equanimity periods during which a firm earns a monopoly profit: the market will in due course correct itself, and intervention by the competition authorities will have the effect of undesirably distorting this process.

Secondly, there are formidable difficulties in telling whether a price really is exploitative: by what standards can this be assessed? To compare a monopolist's price with a hypothetical 'competitive' price is as much an intuitive as a scientific matter; alternatively to establish what would be a 'reasonable' price by adding an acceptable profit margin to the actual cost of producing goods or providing services is fraught with difficulties. One is that it is unclear what the relevant 'cost' of producing goods or services is: should one look at the historic costs involved in establishing a production line for goods or the cost that it would take to establish one at today's prices? Another problem is that it is difficult to apportion the common costs of a multi-product firm between its different products in order to determine whether it is making an unreasonable profit in one particular market. Furthermore the fact that a firm is earning a large profit may be attributable to its superior efficiency over its rivals, rather than to its market power.

A third argument against price control is that a monopolist should be permitted to charge a monopoly price so that it will be able to earn sufficiently large profits to be able to carry out expensive and risky research and development<sup>9</sup>. The Supreme Court of the US stated in its judgment in *Verizon Communications Inc v Law Offices of Curtis Trinko* that<sup>10</sup>:

The opportunity to charge monopoly prices – at least for a short period – is what attracts 'business acumen' in the first place; it induces risk taking that produces innovation and economic growth.

Another view is that there is no objection to a monopolist increasing its personal wealth at consumers' expense since this involves only a transfer of wealth from one part of the economy to another, rather than a threat to the wealth of society generally. An argument against this view is that, even if one is prepared to tolerate the accretion of wealth by monopolists, there is a welfare loss where output is restricted by a firm with market power<sup>11</sup>; further there may be a loss to consumer welfare if the prospect of making monopoly profits entails a use of resources for that very purpose which might otherwise have been better used elsewhere in the economy<sup>12</sup>.

A fourth problem is that even if it is accepted, despite these arguments, that exploitative pricing should be controlled, there is the difficulty of translating this policy into a sufficiently realistic legal test. A legal rule condemning exploitative pricing needs to be cast in sufficiently precise terms to enable a firm to know on which side of legality it stands.

A fifth problem is that, if a competition authority determines that a dominant undertaking is charging an excessive price, it will have to decide what remedial action should be taken: it can impose a fine for past abuse, but what directions should it issue as to future behaviour, and will the issue of such directions require continuous surveillance? Crafting pro-competitive remedies to deal with excessive pricing abuses is complex.

<sup>9</sup> See eg Schumpeter *Capitalism, Socialism and Democracy* (1942) and see ch 1, 'Dynamic efficiency', pp 5–6.

<sup>10</sup> 540 US 398 (2004).

<sup>11</sup> See ch 1, 'The harmful effects of monopoly', pp 6–7.

<sup>12</sup> See Posner 'The Social Costs of Monopoly and Regulation' (1975) 83 J Pol Ec 807.

A final point is that price regulation requires a competition authority to have a considerable amount of information about the market, which it may lack; it is even less easy for courts to determine what the correct level of prices should be<sup>13</sup>.

Given these problems, it is not surprising that competition authorities tend to prefer to deploy their resources by proceeding against exclusionary abuses rather than establishing themselves as price regulators.

Where there are natural monopolies that are not under the direct control of a government there is much to be said for the establishment of a system of *ex ante* regulation of prices: the sectoral regulators in the UK have such powers<sup>14</sup>. When the European Commission had concerns about the high cost of tariffs for international mobile roaming services, it dealt with the matter by legislation rather than enforcement under Article 102<sup>15</sup>. In other cases where a competition authority is concerned that prices in a particular market appear to be higher than they would be in competitive conditions it might wish to consider conducting a sectoral review, using powers, if available, in order to discover what features of the market are causing the high prices<sup>16</sup>. Such a review may enable an authority to deal with any problem of excessive pricing in ways other than through price regulation, for example by reducing problems for consumers in switching between suppliers<sup>17</sup>. Where 'public' restrictions of competition are responsible, a competition authority may be able to play an advocacy role by suggesting ways in which the market could function more competitively<sup>18</sup>.

These are some of the arguments against the direct control of high prices by competition authorities<sup>19</sup>. It is clear that neither the European Commission<sup>20</sup> nor the Office of Fair Trading ('the OFT') in the UK have an appetite for investigating high prices under Article 102 or the Chapter II prohibition. However this is not to say that such cases never arise, and, as will be seen in the discussion of EU and UK case law below, there have been investigations of excessive prices in both jurisdictions. The Commission's *Guidance on Article 102 Enforcement Priorities* indicates that it may proceed against exploitative behaviour, in particular where the protection of consumers or of the internal market cannot otherwise be adequately ensured<sup>21</sup>.

<sup>13</sup> The English Court of Appeal expressed this view in the *Attheraces* case discussed at 'Cases on excessive prices', pp 725–727 below.

<sup>14</sup> See ch 2, 'Sectoral regulators', pp 68–69 on these regulatory bodies.

<sup>15</sup> See ch 23, 'Regulatory systems in the UK for utilities', pp 978–979.

<sup>16</sup> On the powers of the European Commission under Article 17 of Regulation 1/2003 see ch 7, 'Article 17: investigations into sectors of the economy and into types of agreements', pp 267–268.

<sup>17</sup> The competition authorities in the UK have favoured this non-regulatory approach in the context of market studies and market investigations, see ch 11, 'Outcomes of market studies', pp 459–466 and 'The Market Investigation Provisions in Practice', pp 479–485.

<sup>18</sup> See ch 1, 'Competition advocacy and public restrictions of competition', pp 24–25.

<sup>19</sup> For an interesting discussion of the role of a competition authority when faced with a complaint of excessive prices see the judgment of the Competition Tribunal of South Africa in Case No 13/CR/FEB04 *Harmony Gold Mining Company Ltd v Mittal Steel South Africa Ltd*, judgment of 27 March 2007, paras 70–89, reversed on appeal in Case No 70/CAC/Apr 07, judgment of 29 May 2009, paras 30–55; for comment see Lewis 'Exploitative Abuses – A Note on the Harmony Gold v Mittal Steel Excessive Pricing Case' [2008] Fordham Corporate Law Institute (ed Hawk), ch 23 and Calagno and Walker 'Excessive Pricing: Towards Clarity and Economic Coherence' (2010) 6(4) *Journal of Competition Law and Economics* 891.

<sup>20</sup> The European Commission has often said that it has no desire to become a price regulator: see eg the Commission's 5th *Report on Competition Policy* (1975), points 3–7 and 76; XXVIIth *Report on Competition Policy* (1997), point 77.

<sup>21</sup> OJ [2009] C 45/7, para 7; for an argument in favour of giving greater attention to issues of exploitative abuse see Lyons 'The Paradox of the Exclusion of Exploitative Abuse' in *The Pros and Cons of High Prices* (Swedish Competition Authority, 2007); this paper is also available on the website of the Centre for Competition Policy, [www.ccp.uea.ac.uk](http://www.ccp.uea.ac.uk).

This concern may arise when a dominant firm fails to license its technology on FRAND (fair, reasonable, and non-discriminatory) terms<sup>22</sup>.

## (B) EU law

### (i) Determining whether prices are excessive

Article 102(2)(a) gives as an illustration of abuse:

directly or indirectly imposing unfair purchase or selling prices or other unfair trading conditions<sup>23</sup>.

A practice which is harmful to consumers can be abusive, notwithstanding that it is not harmful to the structure of competition on the relevant market<sup>24</sup>; furthermore it is not necessary to show that the firm that is guilty of the abuse derives a commercial advantage from it<sup>25</sup>.

### (A) General Motors and United Brands

In *General Motors*<sup>26</sup> the Commission adopted the first decision condemning the excessive pricing of a dominant firm and imposing a fine for that practice. There had been earlier indications from the Court of Justice, in Article 267 cases concerning the use of intellectual property rights, that such action could be taken under Article 102<sup>27</sup>. On appeal the decision in *General Motors* was quashed by the Court of Justice<sup>28</sup> because there was insufficient evidence to support it.

In *United Brands*<sup>29</sup> the Commission imposed a fine for excessive pricing, but again its decision was quashed by the Court of Justice<sup>30</sup> because the Commission had failed to make out a clear case. However the Court of Justice said that:

charging a price which is excessive because it has no reasonable relation to the economic value of the product supplied is ... an abuse<sup>31</sup>.

Clearly, therefore, excessive pricing can amount to an abuse of a dominant position. The difficulty is to know at what point a price is abusive because it bears no relation to the

<sup>22</sup> See eg *Microsoft* Commission decision of 27 February 2008 (imposing a penalty of €899 million on Microsoft for refusing to provide interoperability information on reasonable and non-discriminatory terms), on appeal Case T-167/08 *Microsoft Corpn v Commission*, not yet decided; *Rambus* Commission decision of 9 December 2009 (accepting commitments under Article 9 of Regulation 1/2003 to reduce Rambus's royalty rates for licensing its computer chips), on appeal Case T-148/10 *Hynix Semiconductor v Commission*, not yet decided.

<sup>23</sup> For examples of the imposition of unfair trading conditions, as opposed to unfair prices, see 1998 *Football World Cup* OJ [2000] L 5/55, [2000] 4 CMLR 963; *Amministrazione Autonoma dei Monopoli di Stato* OJ [1998] L 252/47, [1998] 5 CMLR 786, paras 33–46, upheld on appeal Case T-139/98 *AAMS v Commission* [2001] ECR II-3413, [2002] 4 CMLR 302, paras 73–80.

<sup>24</sup> *Football World Cup*, ch 18 n 23 above, paras 99–100, citing Case 6/72 *Continental Can v Commission* [1973] ECR 215, [1973] CMLR 199, para 26.

<sup>25</sup> *Football World Cup*, paras 101–102.

<sup>26</sup> OJ [1975] L 29/14, [1975] 1 CMLR D20.

<sup>27</sup> Case 78/70 *Deutsche Grammophon GmbH v Metro-SB-Grossmärkte GmbH* [1971] ECR 487, [1971] CMLR 631; Case 40/70 *Sirena v Eda* [1971] ECR 69, [1971] CMLR 260.

<sup>28</sup> Case 26/75 *General Motors v Commission* [1975] ECR 1367, [1976] 1 CMLR 95.

<sup>29</sup> OJ [1976] L 95/1, [1976] 1 CMLR D28.

<sup>30</sup> Case 27/76 *United Brands v Commission* [1978] ECR 207, [1978] 1 CMLR 429.

<sup>31</sup> *Ibid*, para 250; see similarly Case C-52/07 *Kanal 5 Ltd v STIM upa* [2008] ECR I-9275, [2009] 5 CMLR 2175, para 28.

‘economic value’ of the product. Various methodologies have been used, but none is free from difficulty.

The Commission in *United Brands* inferred that the price of bananas in Germany was too high by looking at the price charged in Ireland: it concluded that, since UBC could charge a low price in Ireland and still make a profit, it must follow that the higher price charged in Germany was excessive. The Court of Justice annulled the decision on the ground that it was improperly reasoned. Having stated that a price is excessive if it has no reasonable relation to its economic value, it noted that a step in the analysis of economic value can be a comparison between price and costs of production<sup>32</sup>. The Court accepted that it might be difficult to apportion costs to particular products, but concluded that there were no such difficulties in the case of the market for bananas. The Commission therefore had at least to:

require UBC to produce particulars of all the constituent elements of its production costs<sup>33</sup>.

The burden was on the Commission to prove that UBC was charging excessive and unfair prices. Having undertaken a cost analysis, the Court of Justice said that the questions to be asked are:

whether the difference between the costs actually incurred and the price actually charged is excessive, and, if the answer to this question is in the affirmative, to consider whether a price has been charged which is either unfair in itself or when compared to other competing products<sup>34</sup>.

### (B) *Deutsche Post*

In *Deutsche Post AG – Interception of cross-border mail*<sup>35</sup> the Commission considered that Deutsche Post’s prices for the onward transmission of cross-border mail were excessive. In doing so the Commission said that, as it could not make a detailed analysis of Deutsche Post’s costs, it would have to use an alternative benchmark to determine whether it was guilty of abuse<sup>36</sup>; this it did by comparing Deutsche Post’s prices for cross-border mail with its domestic tariff<sup>37</sup>, and it decided that there was indeed an abuse. It should perhaps be added that, although cost analysis may be difficult, it is certainly not impossible; many reports of the UK Competition Commission have involved complex cost analyses<sup>38</sup>.

### (C) *The Scandlines case*

In *Scandlines Sverige AB v Port of Helsingborg*<sup>39</sup> the Commission, after an extensive investigation, rejected a complaint that port charges at the port of Helsingborg were excessively high. The Commission did not simply look at the costs incurred by the port in order to determine whether the charges were excessive; its view was that a simple ‘cost-plus’ approach was insufficient to establish that the prices were abusive, since it was necessary

also to look at the economic value of the service provided<sup>40</sup>. The Commission looked to see if the charges were unfair, and attempted to compare them with prices charged for other services provided in the same port, and with prices charged to ferry operators in other ports; it concluded that, in particular given that the burden of proving an abuse was upon it, there was no infringement of Article 102<sup>41</sup>.

#### (D) *Yardstick competition*

The Court of Justice suggested in *United Brands* that there are various ways of proving that a price is excessive<sup>42</sup>. In an Article 267 reference from France, *Corinne Bodson v Pompes Funèbres*<sup>43</sup>, one question before the Court of Justice was whether Pompes Funèbres, which had been given an exclusive concession to provide ‘external services’ for funerals in a particular French town, was guilty of charging excessive prices. The Court of Justice said that, given that more than 30,000 communes in France had not granted exclusive concessions such as that enjoyed by Pompes Funèbres, but instead had left the service unregulated or operated it themselves, it must be possible to make a comparison between the prices charged by undertakings with concessions and other undertakings:

Such a comparison could provide a basis for assessing whether or not the prices charged by the concession holders are fair<sup>44</sup>.

This technique can be described as ‘yardstick competition’: comparing the performance of one undertaking with that of other ones. The idea in *Bodson* was repeated in *Lucazeau v SACEM*<sup>45</sup>, which concerned the level of royalties charged for the playing of recorded music in discotheques; the Court of Justice again suggested that a comparison should be made with the level of fees charged in other Member States. In *Standard & Poor* the Commission used a standard set by an international standard-setting body as a benchmark to investigate the prices S&P charged for using international securities identification numbers<sup>46</sup>. In May 2011 S&P proposed commitments to change its pricing policy<sup>47</sup>.

#### (E) *Excessive or disproportionate costs should be ignored*

In *Ministère Public v Tournier*<sup>48</sup>, another case concerning the level of royalties charged to discotheques by a French performing rights society, the Court of Justice said that excessive or disproportionate costs should not be taken into account in determining the reasonableness of prices. The society in question had a *de facto* monopoly and the Court of Justice suggested that it was the very lack of competition which had led to high administrative costs: the society had no incentive to keep them down.

<sup>40</sup> Note that the English Court of Appeal reached the same conclusion in the *Attheraces* case discussed at ‘Cases on excessive prices’, pp 725–727 below.

### (ii) Excessive pricing that impedes parallel imports and exports

There have been some applications of Article 102 to excessive pricing that is harmful to the single market; they are discussed below<sup>49</sup>.

### (iii) Excessive pricing that is exclusionary

Quite apart from excessive prices being exploitative and/or detrimental to the single market, they may also be exclusionary. The most obvious example would be the situation in which the owner of an essential facility charges an excessive (or discriminatory) price for granting access to it: this could be regarded as a constructive refusal to supply, and may be an abuse of a dominant position<sup>50</sup>. The Commission specifically states at paragraph 97 of the *Notice on the Application of the Competition Rules to Access Agreements in the Telecommunications Sector*<sup>51</sup> that excessive prices for access to essential facilities can be abusive<sup>52</sup>; the Commission summarises the case law set out above at paragraphs 105 to 109 of this *Notice*. In practice it is immensely complex to determine what the appropriate price for access to an essential facility should be<sup>53</sup>; a particular problem is that a firm that controls such a facility and makes use of it in a downstream market may not make an internal charge to itself for the service in question; this makes it particularly difficult to determine what price it should charge to a third party for access. For this reason the Access Directive requires separate accounting for activities related to interconnection in the electronic communications sector<sup>54</sup>.

Given the difficulties involved in access pricing, it is not surprising that a competition authority would prefer not to become too involved in what may result in a large amount of detailed regulation: this activity is better carried out by a regulator. However there have been some occasions on which the Commission has investigated access pricing issues. For example in 1997 it took action against Belgacom for charging excessive and discriminatory prices for access to data on its subscribers for voice telephony services<sup>55</sup>. In *Microsoft* the Commission imposed a periodic penalty payment of €899 million on Microsoft for charging unreasonable prices for interoperability information<sup>56</sup>.

<sup>55</sup> See the Commission's XXVIIth *Report on Competition Policy* (1997), point 67: the terms on which the case was settled are set out at pp 152–153 of the Report; see also point 77 of the same Report on the Commission's action against Deutsche Telekom for charging excessive prices for access to its infrastructure, and points 79–86 of the XXVIIIth *Report on Competition Policy* (1998) on further action in relation to excessive and discriminatory prices in the telecommunications sector.

<sup>56</sup> Commission decision of 27 February 2008, on appeal Case T-167/08 *Microsoft Corp'n v Commission*, not yet decided.

#### (iv) Excessive pricing and aftermarkets

The Court of Justice has held that a car manufacturer may refuse to grant licences to third parties to produce spare parts for its cars; however if it charges excessive prices for the spares which it produces itself, this may amount to an abuse of its dominant position<sup>57</sup>. It may be that the market will solve this problem itself. Although such customers appear to be 'locked in' to the manufacturer's spare parts, the original car will eventually need to be replaced; excessive prices for spare parts may deter buyers of new cars from buying from their existing manufacturer: this in turn may deter the manufacturer from charging excessive prices for parts in the first place<sup>58</sup>.

#### (v) Buyer power – excessively low prices

In *CICCE v Commission*<sup>59</sup> the Court of Justice rejected a complaint that the Commission had refused to condemn unfairly low prices paid by a monopsonist on the buying side of the market, as there was insufficient evidence to support the allegation. The interest of the case is that it demonstrates that, just as charging an excessively high price can be abusive, so too can the extraction of an unfairly low one demanded by an undertaking in a dominant position on the buying side of the market; on the facts of this case, however, the complainant failed.

### (C) UK law

As in the case of Article 102(2)(a), section 18(2)(a) of the Competition Act 1998 specifically states that an unfair purchase or selling price may constitute an abuse of a dominant position. Guidelines have been published on the application of the competition rules, including Article 102 and the Chapter II prohibition, in particular regulated sectors, namely telecommunications<sup>60</sup>, water and sewerage<sup>61</sup>, energy<sup>62</sup> and railways<sup>63</sup>. An OFT Economic Discussion Paper, issued in July 2003, explores the issue of how to determine profitability in competition cases<sup>64</sup>.

#### (i) Cases on excessive prices

In *Napp Pharmaceutical Holdings Ltd*<sup>65</sup> the OFT concluded that Napp had abused a dominant position contrary to the Chapter II prohibition by operating a discriminatory discount policy, by predatory price cutting and by charging excessive prices. Napp supplied sustained release morphine (referred to by its trade name of MST) to hospitals and to patients in the community. The prices for sales to the community were typically more than ten times higher than to hospitals. The OFT considered that the margin between Napp's costs and its prices was excessive: it did this by comparing the profit margin Napp earned on community sales of MST and comparing it with the margins it earned on sales of other products and on the sale of MST to other markets. The OFT also considered the actual prices of MST and

<sup>65</sup> OFT decision of 30 March 2001 [2001] UKCLR 597, paras 203–234.

compared them with what a competitive price for it would be likely to be. On appeal the Competition Appeal Tribunal ('the CAT') noted the difficulties involved in determining whether a price is excessive, and concluded that the various methods used by the OFT were 'among the approaches that may reasonably be used', adding 'there are, no doubt, other methods'<sup>66</sup>. The CAT upheld the OFT's finding of excessive pricing<sup>67</sup>, but considered that there were certain mitigating factors in favour of Napp, not least the uncertainty of the law on this issue, and it therefore reduced the fine that the OFT had imposed from £3.21 million to £2.2 million<sup>68</sup>. In June 2011 the OFT published a report indicating that since its intervention in 2001 prices for sales to the community had been reduced significantly<sup>69</sup>.

In *Thames Water Utilities Ltd/Bath House and Albion Yard*<sup>70</sup> the Office of Water Services ('OFWAT') decided that Thames Water had not abused its dominant position by charging an excessive amount for the carriage of water extracted by Enviro-Logic to the latter's customers.

The complexity of determining access prices in the case of essential facilities is vividly illustrated by *Albion Water Ltd v Water Services Regulation Authority*. The CAT handed down several judgments in an appeal against a finding by OFWAT<sup>71</sup> that Dŵr Cymru was not guilty of offering an excessive price for the transportation of water through its water pipelines. The CAT's judgment in October 2006 reviewed the position at great length; it included extensive discussion of relevant cost principles<sup>72</sup> and of the 'efficient component pricing rule' ('the ECPR') advocated by some commentators as a methodology for determining the access price to essential facilities: the ECPR deducts from the retail price of a product the cost that an undertaking would avoid if it did not provide an upstream service such as the carriage of water<sup>73</sup>. The CAT's view was that the ECPR, which has been the subject of much criticism and has actually been banned by legislation in New Zealand<sup>74</sup>, should not be accepted 'without careful scrutiny'<sup>75</sup>. Later in its judgment the CAT decided that the ECPR was not a safe methodology to use in the case before it<sup>76</sup>, and concluded that the evidence 'strongly suggested' that the price quoted by Dŵr Cymru was excessive<sup>77</sup>. Following a further investigation of the costs involved by OFWAT the CAT concluded<sup>78</sup> that Dŵr Cymru had indeed offered prices that were so excessive that they were unfair and therefore abusive: the quoted access price to the Ashgrove system materially exceeded the costs reasonably attributable to the distribution of water by Dŵr Cymru; it was exclusionary as well as exploitative.

In *SSL International plc: contraceptive sheaths*<sup>79</sup> the OFT concluded that, although it was possible that the prices of SSL's male condoms were high, a substantial amount of time and expense would be needed to reach a view as to whether they were excessive. The OFT's view was that further investigation was unlikely to be a sensible use of resources; in particular the OFT considered that there was evidence of emerging competition and that, if the outcome of the case were to be the imposition of a price cap, this might stifle such entry.

An intervention by the OFT under the Financial Services and Markets Act 2000 led to the London Stock Exchange reducing its issuing fees in 2003<sup>80</sup>.

A particularly interesting case on excessive pricing arose in *Attheraces Ltd v The British Horseracing Board Ltd*<sup>81</sup>, a 'standalone' action by Attheraces with no involvement on the part of any competition authority. Attheraces, a broadcaster, required so-called 'pre-race data' about British horse races in the possession of the British Horseracing Board ('the BHB'), the administrator and regulator of British horseracing. Attheraces wanted to make these data available to overseas bookmakers. It complained, and the judge at first instance held<sup>82</sup>, that BHB had abused a dominant position by threatening to refuse to supply Attheraces, by charging it unfair prices, and by discriminating against it. The Court of Appeal allowed the appeal by BHB. It is of interest to note that Mummery LJ stated at the outset that the nature of the issues under consideration were ones that might more satisfactorily be solved by arbitration or by a specialist body equipped with appropriate expertise and flexible powers, rather than within the adversarial procedures of an ordinary private action<sup>83</sup>. The Court of Appeal accepted the suggestion in paragraph 250 of the Court of Justice's judgment in *United Brands v Commission* that a price that significantly exceeds the economic value of the product supplied could be abusive, but pointed out that this formulation 'begs a fundamental question: what constitutes economic value?'<sup>84</sup>. The court concluded that it was not possible to conclude that a price was abusive simply on the basis of a 'cost-plus' approach: that is to say that it is not sufficient merely to show that a price exceeds cost by more than a 'reasonable' amount<sup>85</sup>. In so far as the judge had reached his conclusion on the basis of cost plus a reasonable return he had adopted too narrow an approach: in particular he was wrong to reject BHB's contention that, in considering the economic value of the data, the amount that the overseas bookmakers were willing to pay Attheraces was relevant<sup>86</sup>. The Court of Appeal specifically noted that the principal object of Article 102 was to protect consumers – in this case the ultimate punters who bet on horse races – and not competitors such as Attheraces: it said that there was little, if any, evidence of harm to competition<sup>87</sup>.

## (ii) Excessively low prices

The OFT has said that charging excessively low prices is likely to be an abuse only in exceptional circumstances<sup>88</sup>. In *The Association of British Travel Agents and British Airways plc*<sup>89</sup> the OFT concluded that BA was not guilty of paying excessively low prices to travel agencies by offering a commission that failed to cover their costs of selling tickets: in the

<sup>79</sup> OFT case closure of 11 May 2005, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>81</sup> [2007] EWCA Civ 38, [2007] UKCLR 309; the judgment was considered by the Chancellor of the High Court in *Humber Oil Terminals Trustee Ltd v Associated British Ports* [2011] EWHC 352, paras 17–21 and 33.

<sup>82</sup> *Attheraces Ltd v The British Horseracing Board Ltd* [2005] EWHC 3015, [2005] UKCLR 757.

<sup>83</sup> [2007] EWCA Civ 38, [2007] UKCLR 309, para 7.

<sup>84</sup> *Ibid*, para 204.

<sup>85</sup> *Ibid*, para 209.

<sup>86</sup> *Ibid*, para 218.

<sup>87</sup> *Ibid*, para 215.

<sup>88</sup> *BetterCare Group Ltd/North & West Belfast Health & Social Services Trust (remitted)*, OFT decision of 18 December 2003 [2004] UKCLR 455, para 56.

<sup>89</sup> OFT decision of 11 December 2002 [2003] UKCLR 136.

OFT's view it would have been possible for the agents to charge their clients a fee for the service of issuing tickets, and it was not incumbent on BA to pay them an amount that would cover their costs in doing so<sup>90</sup>.

### (iii) Section 13 of the Competition Act 1980

There is a provision in section 13 of the Competition Act 1980, which remains in force, whereby the Secretary of State may ask the OFT to investigate prices 'of major public concern': only a factual report may be made under this section, which has never been used<sup>91</sup>.

## 4. Rebates that have Effects Similar to Exclusive Dealing Agreements<sup>92</sup>

In chapter 17 the application of Article 102 to exclusive agreements, and in particular exclusive purchasing agreements<sup>93</sup>, was considered. The basic objection to such agreements is that they may horizontally foreclose competitors of the dominant firm. Article 102 may also apply to pricing practices that have the same effect as exclusive purchasing agreements. As we shall see, there have been many cases in which 'fidelity' or 'loyalty' rebates<sup>94</sup>, 'target' rebates, discounts and bonuses have been found to be abusive. The text that follows will use the expression 'rebates' to include all these practices. It is perhaps worth saying at the outset that this is one of the least satisfactory areas of EU competition law. Three particular inter-connected problems can be identified.

First, the law has developed along formalistic lines, whereas the economics that inform the way in which firms charge for their products are complex: this complexity suggests that form-based rules are not sophisticated enough to deal with the phenomena under scrutiny. A second problem – which restates the first one in the language of competition law – is that some of the case law suggests that loyalty rebates are unlawful *per se*, whereas it is arguable that actual or potential anti-competitive effects ought to be demonstrated before a rebate is condemned as unlawful<sup>95</sup>. A variant of *per se* unlawfulness is that loyalty rebates are presumed to be unlawful unless they can be objectively justified.

<sup>90</sup> Ibid, paras 28–37.

<sup>91</sup> See *Halsbury's Laws of England*, vol 47, para 505, n 21.

<sup>92</sup> For further reading on exclusive dealing agreements and rebates see the OECD reports on *Loyalty and Fidelity Discounts and Rebates* (2002) and on *Bundled and Loyalty Discounts and Rebates* (2008), both available at [www.oecd.org](http://www.oecd.org); section 7 of DG COMP's *Discussion paper on the application of Article [102] of the Treaty to exclusionary abuses*; Bishop and Walker *The Economics of EC Competition Law* (Sweet & Maxwell, 3rd ed, 2010), paras 6.28–6.59; O'Donoghue and Padilla *The Law and Economics of Article 82 EC* (Hart Publishing, 2006), pp 374–406; Van den Bergh and Camesasca *European Competition Law and Economics: A Comparative Perspective* (Sweet & Maxwell, 2nd ed, 2006), pp 254–264; Niels, Jenkins and Kavanagh *Economics for Competition Lawyers* (Oxford University Press, 2011), pp 223–238; there is also an abundance of periodical literature on this subject: see eg Ridyard 'Exclusionary Pricing and Price Discrimination Abuses Under Article 82 – An Economic Analysis' (2002) 19 ECLR 286; Temple Lang and O'Donoghue 'Defining Legitimate Competition: How to Clarify Pricing Abuses under Article 82 EC' (2002) 26 Fordham International Law Journal 83; Kallaugher and Sher 'Rebates Revisited: Anti-competitive Effects and Exclusionary Abuse Under Article 82' (2004) 21 ECLR 263; Gyselen 'Rebates, Competition on the Merits or Exclusionary Practice?' in *European Competition Law Annual 2003: What is an Abuse of a Dominant position?* (Hart Publishing, 2006, eds Ehlermann and Atanasiu), p 287; Bishop 'Loyalty Rebates, and "Merger Standards": A roadmap for the practical assessment of Article 82 investigations' in *European Competition Law Annual 2007: A Reformed Approach to Article 82 EC* (Hart Publishing, 2008, eds Ehlermann and Marquis).

<sup>93</sup> See ch 17, 'Exclusive Dealing Agreements', pp 682–688.

<sup>94</sup> These two terms can be used interchangeably.

<sup>95</sup> See ch 5, 'Are there or should there be any *per se* rules under Article 102?', pp 199–201.

Although this position is less extreme than outright *per se* unlawfulness, it is also questionable for two reasons. The first argument against this variant is that rebates are often pro-competitive, so that it makes little sense to presume the contrary. The second is that the burden of proving that a rebate is objectively justified would be on the dominant undertaking<sup>96</sup>: if it has to prove a precise cost justification for every rebate this might be impossible to achieve in practice, because some rebates are simply offered to retain customers rather than to reflect savings in costs: it follows that they could not be objectively justified, so that a presumed unlawfulness would increase the likelihood of prohibiting pro-competitive behaviour<sup>97</sup>.

The final problem, which follows from formalism, is that the law on rebates has developed with little or no reference to the cost concepts described at the beginning of this chapter. Later in this chapter we will see that the case law on predation, for example, is built upon the concepts of average variable and average total cost. The case law on rebates, which developed from the rule against dominant firms entering into exclusive purchasing agreements, does not have an explicit cost component, other than that a rebate can be defended on efficiency grounds<sup>98</sup>.

An attractive way of addressing these problems would be for the law to condemn rebates only where it can be shown that they are likely to have an exclusionary effect on competitors as efficient as the dominant undertaking<sup>99</sup>. This would be consistent with the approach taken by the Court of Justice in two cases on margin squeeze<sup>100</sup> and with the Commission's *Guidance on Article 102 Enforcement Priorities*<sup>101</sup>. Paragraph 25 of the *Guidance* says that, in determining whether a dominant firm's pricing should be condemned, it is appropriate to look at the relationship between that firm's costs and its sales prices. Should the law on rebates begin to focus more on 'as efficient' competitors it is likely that greater attention would be given to cost concepts.

## (A) EU law

The case law on rebates began by condemning them where they were explicitly linked to the loyalty of a customer. Subsequently it has been extended to target rebates which, though not explicitly linked to loyalty, are likely to have an exclusionary effect. The Court of Justice has stated that the law that forbids exclusionary rebates is based on Article 102 as a whole: it is not based solely upon the wording of Article 102(2)(b), which refers to practices that limit production, markets or technical development to the prejudice of consumers<sup>102</sup>.

### (i) The case law on loyalty rebates

#### (A) *Hoffmann-La Roche*

The obvious starting point is the Court of Justice's judgment in *Hoffmann-La Roche v Commission*<sup>103</sup>. The Court of Justice held that Hoffmann-La Roche had abused its dominant position both by entering into exclusive purchasing agreements with some of its

<sup>102</sup> Case C-95/04 P *British Airways plc v Commission* [2007] ECR I-2331, [2007] 4 CMLR 982, para 58.

<sup>103</sup> Case 85/76 [1979] ECR 461, [1979] 3 CMLR 211; loyalty rebates were condemned in an earlier case that was predominantly concerned with cartelisation of the sugar market: Cases 43/73 etc *Suiker Unie v Commission* [1975] ECR 1663, [1976] 1 CMLR 295, paras 517–528.

customers and by offering others loyalty rebates. In relation to the latter the Court of Justice said that it was unlawful for a dominant firm to tie a customer by an exclusive purchasing commitment and that:

The same applies if the [dominant] undertaking, without tying the purchasers by a formal obligation, applies, either under the terms of the agreements concluded with these purchasers or unilaterally, a system of fidelity rebates, that is to say discounts conditional on the customer's obtaining all or most of its requirements – whether the quantity of its purchases be large or small – from the undertaking in a dominant position<sup>104</sup>.

This passage makes clear that the prohibition of loyalty rebates is directly related to the law that prohibits exclusive purchasing agreements. Behaviour becomes abusive when the inducement caused by the promise of loyalty rebates to a customer to purchase all or most of its requirements from the dominant firm is so great that it has the same effect that a contractual stipulation to purchase exclusively would have done<sup>105</sup>.

The test set out in paragraph 89 of *Hoffmann-La Roche* (and in subsequent cases) is expressed as a *per se* rule; however, as has been pointed out in chapter 5<sup>106</sup>, it is highly questionable whether *per se* illegality is appropriate under Article 102: this is particularly so in the case of rebates. Most rebates are simply manifestations of the competitive process; customers obviously benefit from the lower price that a rebate necessarily results in: a point acknowledged by the Commission's *Guidance on Article 102 Enforcement Priorities*<sup>107</sup>. The *Guidance* should also mean that future cases will concern rebates which the Commission considers to have had, or to be likely to have, an anti-competitive foreclosing effect<sup>108</sup>. If this is the case, and if, for example, the Commission does consistently apply the 'as-efficient' competitor test to rebates, over time this should have a positive influence on the content of the law.

Paragraph 89 of the judgment in *Hoffmann-La Roche* states that it is abusive to offer rebates 'conditional on the customer's obtaining all or most of its requirements – whether the quantity of its purchases be large or small – from the undertaking in a dominant position'. As has been seen in chapter 16, the block exemption for vertical agreements defines a non-compete obligation as one which requires a customer to obtain 80 per cent or more of its requirements of goods or services from the supplier<sup>109</sup>; it is not unreasonable to suppose that a similar threshold applies under Article 102 when determining what is meant by 'most' of a customer's requirements.

The stipulation that loyalty rebates are unlawful even where the quantities involved are small imposes a strict standard: where the customer purchases small quantities, the anti-competitive foreclosure effect – if any – is likely to be insignificant; however the Court of Justice's formulation indicates that there would still be an abuse. The 2009 judgment of the General Court in *Solvay v Commission* points to the same conclusion, in which it rejected an argument that a rebate of 1.5 per cent on all purchases of soda-ash was

<sup>104</sup> Case 85/76 [1979] ECR 461, [1979] 3 CMLR 211, para 89; the Court of Justice also objected to the 'English clause' requiring the buyer to report any better offer it received to Hoffmann-La Roche and preventing it from accepting the offer unless Roche chose not to match it: *ibid* para 102–108.

<sup>105</sup> It should be noted that, where a dominant firm offers different rebates to different customers, this may result in an accusation of discrimination contrary to Article 102(2)(c) as well: see 'Price Discrimination', pp 759–764. *below*.

<sup>106</sup> Ch 5, 'Are there or should there be any *per se* rules under Article 102?', pp 199–201.

<sup>108</sup> *Ibid*, paras 20 and 38; note that the Commission applied the 'as efficient' competitor test in the *Intel* case see 'The *Intel* case', p 732 *below*.

<sup>109</sup> See ch 16, 'Article 5(1)(a): non-compete obligations', pp 669–670.

too small to have an anti-competitive effect<sup>110</sup>. However the Commission's *Guidance on Article 102 Enforcement Priorities* indicates that it will consider the percentage of sales affected by a rebate scheme when deciding whether to initiate proceedings<sup>111</sup>.

### (B) Further case law of the EU Courts

The strict treatment of loyalty rebates can be found in several further cases<sup>112</sup>. In the *Plasterboard* case the EU Courts substantially upheld a Commission decision<sup>113</sup> that British Gypsum Ltd and its parent, BPB Industries plc, had abused their dominant position by offering loyalty payments to builders' merchants in Great Britain who stocked only their plasterboard<sup>114</sup>. BPB and British Gypsum claimed that the payments were made in order to assist merchants with the cost of promotion and advertising. The General Court agreed with the Commission that, even if there was truth in this, the payments were also intended to induce loyalty on the part of merchants and so were abusive<sup>115</sup>.

In *Irish Sugar*<sup>116</sup> the Commission condemned fidelity and target rebates. On appeal the General Court, upholding the decision, stated that:

fidelity rebates granted by an undertaking in a dominant position are an abuse... where their aim is, by granting financial advantages, to prevent customers from obtaining their supplies from competing producers<sup>117</sup>.

In the *Soda-ash* decisions<sup>118</sup> the Commission condemned the exclusionary practices, including loyalty rebates, of Solvay and ICI. The original decisions were set aside for procedural reasons<sup>119</sup>. The Commission re-adopted the decisions, concluding again that Solvay and ICI were guilty of abusive rebates<sup>120</sup>. On appeal against the second decisions the General Court upheld the Commission's finding that rebates targeted at customers' marginal, or 'top-slice', requirements for soda-ash were abusive<sup>121</sup>, and rejected Solvay's argument that the rebates were based on an objective justification<sup>122</sup>.

In *Compagnie Maritime Belge Transports v Commission*<sup>123</sup> the Court of Justice upheld the decision of the Commission that the granting of loyalty rebates by members of a liner conference amounted to an abuse of a collective dominant position<sup>124</sup>; it was irrelevant to

the finding of abuse under Article 102 that the rebates may have benefited from the block exemption on maritime transport<sup>125</sup>.

### (C) *The Intel case*

In May 2009 the Commission imposed a fine of €1.06 billion, the largest fine ever imposed on a single undertaking, on Intel for an abuse of a dominant position in the market for computer processing units ('CPUs') by offering rebates to computer manufacturers conditional upon them purchasing all or the great majority of their CPUs from it<sup>126</sup>. The Commission considered that its decision was consistent with the case law<sup>127</sup> and its *Guidance on Article 102 Enforcement Priorities*<sup>128</sup>. The Commission found that Intel's rebates were capable of anti-competitive foreclosure as an 'as efficient' competitor would have had to price its CPUs below average avoidable cost<sup>129</sup>. Intel argued that its rebates merely responded to competition and increased efficiency. The Commission's view was that Intel had gone beyond legitimate competition for business, and had failed to substantiate any efficiencies<sup>130</sup>. The Commission also considered that Intel was guilty of 'naked restrictions' by making payments to computer manufacturers to prevent or delay the launch of competitors' products<sup>131</sup>. Intel has appealed to the General Court<sup>132</sup>.

### (ii) Individualised target rebates

The cases just discussed were concerned with rebates explicitly granted in return for loyalty. However it will take only a moment's reflection to recognise that a dominant firm may be able to achieve 'loyal' purchasing without specifically linking rebates to loyalty. One obvious method is to set customers a target, and to promise rebates – perhaps very generous ones – if the target is met. It is normal practice for firms – whether dominant or not – to want to increase sales, and there is nothing sinister in a pricing policy which is geared to the incentivisation of a customer to purchase more units in the future than in the past. The question under Article 102 is when such a practice should be condemned as abusive. It is important in such cases to distinguish two questions: first, whether a rebate could have a loyalty-inducing effect; and secondly, whether a loyalty-inducing rebate could have an anti-competitive foreclosure effect. The difference is reflected in the Commission's *Guidance on Article 102 Enforcement Priorities* which states that a rebate might have the effect of inducing loyalty without necessarily being harmful to competition<sup>133</sup>.

There have been several cases in which target rebates have been condemned because of their loyalty-inducing effects, even though there was no explicit requirement of loyalty: in most cases the targets were individualised for each customer according to its particular procurement needs.

### (A) *Michelin I and Michelin II*

In *Michelin I*<sup>134</sup> the Commission condemned rebates payable to customers for replacement tyres in the Netherlands that reached annual sales targets. The targets were set for each

<sup>132</sup> Case T-286/09 *Intel Corp v Commission*, not yet decided.

<sup>133</sup> See 'The Commission's approach to conditional rebates in its *Guidance on Article 102 Enforcement Priorities*', pp 735–736 below.

<sup>134</sup> OJ [1981] L 353/33, [1982] 1 CMLR 643.

customer individually, and were usually higher than for the preceding year. The Court of Justice upheld the Commission's finding on this point<sup>135</sup>, saying that:

any system under which discounts are granted according to the quantities sold during a relatively long reference period has the inherent effect, at the end of that period, of increasing pressure on the buyer to reach the purchase figure needed to obtain the discount or to avoid suffering the loss for the entire period<sup>136</sup>.

The case made clear that a lack of transparency in a system of rebates is an exacerbating factor, making a finding of abuse more likely<sup>137</sup>. However the opposite point should also be noted: if a rebate scheme is loyalty-inducing and otherwise abusive, it will not be saved by the fact that it is transparent<sup>138</sup>.

In *Michelin II*<sup>139</sup> the Commission condemned various practices in the French (as opposed to the Dutch) replacement tyre market, including individualised annual volume targets. The Commission said that rebates operated by reference to a period of more than three months will always be unlawful<sup>140</sup>, a statement that seems clearly to be incorrect. The General Court upheld the Commission's findings of abuse in this case<sup>141</sup>. The General Court said that the loyalty-inducing nature of a system increases in proportion to the length of the reference period: '[t]he longer the reference period, the more loyalty-inducing the quantity rebate system'<sup>142</sup>; however the General Court also said that the Court of Justice had never held that the reference point could not be for more than three months<sup>143</sup>. The General Court was satisfied that Michelin's scheme, which had a reference period of one year, and where the discount was fixed on the basis of total turnover, had an abusive loyalty-inducing effect.

#### (B) *The Virgin/British Airways case*

In *Virgin/British Airways*<sup>144</sup> the Commission imposed a fine of €6.8 million on British Airways for operating a system of commission payments<sup>145</sup> and other incentives with travel agents which it considered had the object or effect of excluding BA's competitors from UK markets for air transport, by rewarding loyalty and by discriminating between travel agents<sup>146</sup>. The level of commission payable increased as a new target was reached, and that increased amount was payable on *all* the tickets sold, not just on the *incremental* sales above the target. This meant that the loyalty-inducing effect was a powerful one which, in the Commission's view, affected the ability of other airlines to compete with BA. The

<sup>140</sup> OJ [2002] L 143/1, [2002] 5 CMLR 388, para 216.

<sup>141</sup> Case T-203/01 *Michelin v Commission* [2003] ECR II-4071, [2004] 4 CMLR 923.

<sup>142</sup> *Ibid*, para 88.

<sup>143</sup> *Ibid*, para 85.

<sup>144</sup> OJ [2000] L 30/1, [2000] 4 CMLR 999.

<sup>145</sup> BA was a purchaser of services from travel agents, to which it paid a commission for tickets sold: the 'rebates' in this case refer to the level of commissions paid.

<sup>146</sup> On BA's discriminatory treatment of different travel agents contrary to Article 102(2)(c), see 'Is the dominant undertaking guilty of applying dissimilar conditions to equivalent transactions?', pp 761–762 below.

Commission's finding that BA's reward scheme was abusive was upheld on appeal to the General Court<sup>147</sup> and to the Court of Justice<sup>148</sup>.

The Court of Justice noted that the important precedent was *Michelin* rather than *Hoffmann-La Roche*, since the BA reward scheme was not based on loyalty but rather targets<sup>149</sup>. The Court said that, in order to decide whether a scheme such as that of BA could be abusive:

it first has to be determined whether those discounts or bonuses can produce an exclusionary effect, that is to say whether they are capable, first, of making market entry very difficult or impossible for competitors of the undertaking in a dominant position and, secondly, of making it more difficult or impossible for its co-contractors to choose between various sources of supply or commercial partners<sup>150</sup>.

The Court noted that BA devised bonus schemes on an individualised basis, linked to travel agents' growth in turnover during a given period<sup>151</sup>. The Court referred to the very strong inducement effect that arose from the fact that the bonus was payable not simply by reference to the *growth* in turnover, but to the *whole* of the turnover:

It could therefore be of decisive importance for the commission income of a travel agent as a whole whether or not he sold a few extra BA tickets after achieving a certain turnover<sup>152</sup>.

The General Court was satisfied that the Commission had demonstrated exclusionary effects<sup>153</sup>; BA's appeal to the Court of Justice on this point was dismissed as inadmissible<sup>154</sup>. It is questionable whether there was convincing evidence that BA's reward schemes had anti-competitive effects on the market; indeed an appeal court in the US concluded that similar BA incentive schemes did not restrict competition<sup>155</sup>.

The Court of Justice rejected the argument that BA's reward schemes were objectively justified<sup>156</sup>.

### (C) *The Prokent-Tomra case*

In *Prokent-Tomra* the Commission imposed a fine of €24 million on Tomra for entering into exclusivity agreements, quantity commitments and loyalty-inducing rebate schemes on the market for the supply of machines for the collection of used drink containers in return for a deposit<sup>157</sup>. The Commission's findings of abuse, and the fine, were upheld on appeal to the General Court in *Tomra v Commission*<sup>158</sup>.

### (iii) The Commission's approach to conditional rebates in its *Guidance on Article 102 Enforcement Priorities*

The Commission discusses the factors which it will take into account when deciding whether to intervene in relation to conditional rebates in paragraphs 37 to 46 of its *Guidance on Article 102 Enforcement Priorities*. Conditional rebates are granted as a reward for certain purchasing behaviour, such as attaining individual sales targets, and can have foreclosure effects similar to exclusive purchasing agreements<sup>159</sup>. At paragraph 37 of the *Guidance* it draws a distinction between conditional rebates applicable to all sales ('retroactive rebates') as opposed to rebates paid only on incremental sales ('incremental rebates'). The Commission notes that retroactive rebates may foreclose the market significantly as they may make it less attractive for customers to switch even small amounts of demand to competitors<sup>160</sup>.

Paragraph 38 of the *Guidance* refers back to paragraph 20, which sets out the factors that the Commission will take into account when deciding whether to take action under Article 102<sup>161</sup>. Paragraphs 39 to 45 discuss additional factors that the Commission will consider in the case of conditional rebates. The Commission says that anti-competitive foreclosure is more likely in cases where competitors are not able to compete on equal terms for the entire demand of each individual customer<sup>162</sup>. This may be so when a customer is bound to purchase a certain amount of its needs from a dominant firm, for example because that firm is an unavoidable trading partner whose product is a 'must-stock item'. This was an important part of the reasoning of the General Court in *Tomra v Commission*<sup>163</sup> and of the Commission in *Intel*<sup>164</sup> in support of the conclusion that the loyalty-inducing rebates in those cases could have anti-competitive effects.

In order to assess whether a conditional rebate can lead to anti-competitive foreclosure the Commission intends to investigate the dominant firm's prices, rebates and costs, thereby responding to the criticism that analysis in this area is insufficiently costs-oriented. The Commission will seek to determine the 'effective price' a rival would have to offer a customer as a compensation for the loss of a conditional rebate if the latter would switch part of its demand from the dominant firm<sup>165</sup>. The Commission considers that:

- where a dominant firm is charging an effective price below AAC, the rebate is generally capable of foreclosing competitors as efficient as the dominant firm
- where a dominant firm is charging an effective price that is between AAC and LRAIC, other relevant factors, such as competitors' counterstrategies, should be taken into account to determine the possibility of anti-competitive foreclosure
- where a dominant firm is selling at an effective price above LRAIC, the rebate is normally not capable of anti-competitive foreclosure.

(2011) 32(3) ECLR 139; the judgment is on appeal to the Court of Justice, Case C-549/10 P *Tomra Systems ASA v Commission*, not yet decided.

<sup>159</sup> *Guidance on Article 102 Enforcement Priorities*, para 37; the Commission points out that conditional rebates can have foreclosure effects without the dominant undertaking having to sell at a loss.

<sup>160</sup> *Ibid*, para 40

<sup>161</sup> See ch 5, 'Effects analysis', pp 208–210.

<sup>162</sup> *Guidance on Article 102 Enforcement Priorities*, para 39.

<sup>163</sup> Case T-155/06 *Tomra Systems ASA v Commission* [2010] ECR II-000, [2011] 4 CMLR 416, paras 269–271, on appeal to the Court of Justice, Case C-549/10 P, not yet decided.

<sup>164</sup> See Commission decision of 13 May 2009, paras 870–874, 1005 and 1010, on appeal to the General Court Case T-286/09 *Intel Corp v Commission*, not yet decided.

<sup>165</sup> *Guidance on Article 102 Enforcement Priorities*, para 41; this is a specific application of the methodology for all exclusionary pricing abuses: *ibid*, paras 23–27.

Paragraphs 27 and 45 of the *Guidance* explain that the cost/price analysis will be integrated into a more general assessment of anti-competitive foreclosure, taking into account other relevant quantitative and qualitative evidence. An important consideration will be whether the rebate system is applied with an individualised or a standardised threshold since the former is more likely to create a loyalty-enhancing effect<sup>166</sup>.

#### (iv) Permissible rebates

As already noted, rebates and similar practices are a normal part of commercial life. Rebates should be condemned only where they could have a detrimental effect on competition<sup>167</sup>, for example because they operate as a surrogate for an exclusive purchasing agreement. In *Hoffmann-La Roche v Commission* the Court of Justice accepted that not all discounts should be treated as abusive: for example it said that quantity discounts linked solely to the volume of purchases, fixed objectively and applicable to all purchasers, would be permissible<sup>168</sup>. Rebates granted for prompt payment would presumably also be regarded as objectively justifiable. Payments for services rendered by a customer, such as participation in a special promotion or for providing shelf-space in a supermarket, should also be permissible, provided that they are not, in fact, loyalty payments for exclusivity<sup>169</sup>. In *British Airways v Commission*<sup>170</sup> the General Court rejected BA's argument that its travel reward scheme was objectively justified because of the contribution it made to the recovery of its fixed costs. Paragraph 46 of the *Guidance on Article 102 Enforcement Priorities* indicates that the Commission will consider whether a rebate system creates efficiencies which are passed on to customers.

#### (B) UK law<sup>171</sup>

In *Napp Pharmaceutical Holdings Ltd*<sup>172</sup> the OFT held that Napp had abused its dominant position in the market for sustained release morphine by offering very large discounts to hospitals while charging excessive prices to patients in the community; more particularly Napp had targeted particular competitors, offering larger discounts to hospitals where it faced or anticipated competition and by granting higher discounts for specific products which were under competitive threat<sup>173</sup>. The OFT considered that Napp's intention was to eliminate competitors, and rejected its argument that it was simply 'meeting competition';

<sup>166</sup> Ibid, para 45; on this point see *Coca-Cola* Commission decision of 22 June 2005 (accepting commitments under Article 9 of Regulation 1/2003 from The Coca-Cola Company to, *inter alia*, refrain from setting target rebates to customers conditional upon them reaching individually-set purchase thresholds during a prescribed reference period); on Article 9 see ch 7, 'Article 9: commitments', pp 255–261.

<sup>167</sup> For an example of a conditional rebate scheme that was found to have no anti-competitive foreclosure effects see Albaek and Claici 'The Velux case – an in-depth look at rebates and more' (2009) 2 *Competition Policy Newsletter* 44.

<sup>168</sup> Case 85/76 [1979] ECR 461, [1979] 3 CMLR 211, para 90; see similarly Case C-95/04 P *British Airways plc v Commission* [2007] ECR I-2331, [2007] 4 CMLR 982, para 84.

<sup>169</sup> *British Gypsum* OJ [1992] C 321/9–C 321/12, [1993] 4 CMLR 143, proposing to take a 'favourable view' of various rebating and pricing rebates in the plasterboard and related markets in the case of some of the rebates related to quantities purchased; others to sales promotion.

<sup>170</sup> Case T-219/99 [2003] ECR II-5917, [2004] 4 CMLR 1008, paras 279–291; the Court of Justice dismissed the appeal by British Airways on this point since, in effect, it was questioning the factual assessment of the General Court, which is not possible in appeals to the Court of Justice: see Case C-95/04 P *British Airways plc v Commission* [2007] ECR I-2331, [2007] 4 CMLR 982, paras 84–91.

<sup>173</sup> Ibid, paras 144–202.

its reaction to its competitors was held to be unreasonable and disproportionate<sup>174</sup>. On appeal the CAT found that Napp's discounts meant that it was selling at less than cost, and that they were therefore predatory<sup>175</sup>.

In *English Welsh & Scottish Railway Ltd*<sup>176</sup> the Office of Rail Regulation ('the ORR') found that EW&S had abused its dominant position in a number of ways, including by offering discounts having an exclusionary effect in relation to the carriage of coal to various power stations: a fine of £4.1 million was imposed.

The OFT closed two cases concerning discounts and rebates in 2007, deciding that they were no longer an administrative priority since significant consumer detriment was unlikely<sup>177</sup>.

## 5. Bundling<sup>178</sup>

### (A) EU law

The application of Article 102 to tie-in agreements was considered in chapter 17<sup>179</sup>. It may be possible to achieve the same effect as a tie-in agreement through pricing practices.

#### (i) Rebates having a tying effect

In *Eurofix-Bauco v Hilti*<sup>180</sup> the Commission held that it was an abuse of a dominant position to reduce discounts to customers for orders of nail cartridges without nails<sup>181</sup>; the Commission's decision was upheld on appeal<sup>182</sup>. In *Tetra Pak II*<sup>183</sup> the Commission held that Tetra Pak had adopted a pricing policy that was a means of persuading customers to use its maintenance services<sup>184</sup>. In *Michelin II*<sup>185</sup> the Commission found that Michelin had a bonus scheme that enabled it to leverage its position on the market in new tyres to preserve or improve its position on the neighbouring retreads market<sup>186</sup>.

#### (ii) 'Across-the-board' rebates

In *Hoffmann-La Roche v Commission*<sup>187</sup> the Court of Justice condemned Hoffmann-La Roche's 'across-the-board' rebates, which were offered to customers which acquired the

<sup>174</sup> *Ibid*, paras 197–202.

<sup>175</sup> Case No 1000/1/1/01 *Napp Pharmaceutical Holdings Ltd v Director General of Fair Trading* [2002] CAT 1, [2002] CompAR 13, paras 217–352.

<sup>179</sup> See ch 17, 'Tying', pp 688–696.

<sup>180</sup> OJ [1988] L 65/19, [1989] 4 CMLR 677.

<sup>181</sup> *Ibid*, para 75.

<sup>182</sup> Case T-30/89 *Hilti AG v Commission* [1990] ECR II-163, [1992] 4 CMLR 16, upheld on appeal Case C-53/92 P *Hilti AG v Commission* [1994] ECR I-667, [1994] 4 CMLR 614.

<sup>183</sup> OJ [1992] L 72/1, [1992] 4 CMLR 551, upheld on appeal Case T-83/91 *Tetra Pak International v Commission* [1994] ECR II-755, [1997] 4 CMLR 726, upheld on appeal Case C-333/94 P *Tetra Pak International v Commission* [1996] ECR I-5951, [1997] 4 CMLR 662.

<sup>184</sup> OJ [1992] L 72/1, [1992] 4 CMLR 551, paras 111–114; see also para 139.

<sup>185</sup> OJ [2002] L 143/1, [2002] 5 CMLR 388.

<sup>186</sup> *Ibid*, paras 300–311.

<sup>187</sup> Case 85/76 [1979] ECR 461, [1979] 3 CMLR 211.

whole range of its vitamins; these rebates meant that customers were dissuaded from acquiring any particular vitamin from other suppliers<sup>188</sup>. The Court of Justice noted specifically that such rebates amounted to an unlawful tie-in, contrary to Article 102(2)(d)<sup>189</sup>. The Commission's *Guidance on Article 102 Enforcement Priorities* says that it will generally compare the incremental price that customers pay for each of the dominant firm's products in a bundle to the dominant firm's LRAIC; an incremental price below LRAIC suggests that an equally efficient competitor may be foreclosed from the market<sup>190</sup>.

### (iii) Delivered pricing as a tie-in

In *Napier Brown-British Sugar*<sup>191</sup> the Commission held that British Sugar's delivered pricing system constituted an abuse of a dominant position, although it did not impose a fine in respect of this offence as it was the first decision on this particular practice. Until 1986 British Sugar had refused to allow customers to collect sugar at an ex-factory price. The Commission, relying on the Court of Justice's judgment in *Centre Belge d'Etudes de Marche Télémarketing v CLT*<sup>192</sup>, held that British Sugar had reserved to itself an ancillary market (the delivery of sugar) as part of its activity on a neighbouring but separate market (the sale of sugar). The Commission's view was that there was no objective justification for this conduct on the part of British Sugar.

### (iv) Bundling<sup>193</sup>

A firm may sell two or more products together as a bundle and charge more attractive prices for the bundle than for the constituent parts of it. Bundling may have the same effect as a tie-in agreement. In *Digital* the Commission objected to the fact that Digital offered prices which were more attractive when the customer purchased software services in a package with hardware services than when purchasing software services alone<sup>194</sup>. In *De Poste-La Poste*<sup>195</sup> the Commission imposed a fine of €2.5 million on the Belgian Post Office for, in effect, offering lower prices to customers in the market for the delivery of letters if they also made use of a separate 'B2B' ('business-to-business') service that it provided.

## (B) UK law

In *BSkyB*<sup>196</sup> the OFT was not satisfied that BSKyB's bundling of sports and film premium channels had produced an anti-competitive effect since competitors had not been foreclosed; it therefore found that the Chapter II prohibition had not been infringed<sup>197</sup>. The OFT reached a similar conclusion in respect of the discounts given by BSKyB on the rates charged to distributors of its premium television channels<sup>198</sup>. The *BSkyB* decision illustrates

<sup>188</sup> Ibid, para 110.

<sup>189</sup> Ibid, para 111; for a similar case under US law see *Le Page's v 3M* 323 F 3d 141 (3rd Cir 2003).

<sup>190</sup> OJ [2009] C 45/7, paras 59–60; in the case of competing bundles of products the Commission will investigate whether the price of the dominant firm's bundle is predatory: *ibid*, para 61.

<sup>191</sup> OJ [1988] L 284/41, [1990] 4 CMLR 196.

<sup>192</sup> Case 311/84 [1985] ECR 3261, [1986] 2 CMLR 558.

<sup>193</sup> For a detailed discussion of this topic see DTI Economics Paper No 1 *Bundling, Tying, and Portfolio Effects* (Nalebuff, 2003), available at [www.bis.gov.uk/publications](http://www.bis.gov.uk/publications).

<sup>197</sup> *Ibid*, paras 548–600.

<sup>198</sup> *Ibid*, paras 601–646.

the point that the behaviour of a dominant firm should be considered abusive only where it actually has an anti-competitive effect or where there is a realistic possibility of such an effect<sup>199</sup>.

In *Genzyme Ltd*<sup>200</sup> the OFT imposed a penalty of £6.8 million on that company for two pricing abuses, one of which was to charge a price to the National Health Service for a drug that included the price of home delivery, thereby reserving to itself the ancillary, but separate, activity of providing home care services<sup>201</sup>. This part of the OFT's decision was annulled on appeal to the CAT<sup>202</sup>.

## 6. Predatory Pricing<sup>203</sup>

This section considers the extent to which predatory price cutting – selling at a loss – can amount to an infringement of Article 102 or the Chapter II prohibition in the Competition Act; it also considers the rare circumstances in which selective price cutting to retain customers may amount to an abuse even though no loss is incurred.

### (A) Introduction

The idea of predatory price cutting is simple enough: that a dominant firm deliberately reduces prices to a loss-making level when faced with competition from an existing competitor or a new entrant to the market; the existing competitor having been disciplined, or the new entrant having been foreclosed, the dominant firm then raises its prices again, thereby causing consumer harm. Attempts to eliminate an existing competitor may be more expensive and difficult to achieve than deterring a new one from entry, especially where the existing competitor is committed to remaining in the market. Where a dominant undertaking has a reputation for acting in a predatory manner, this in itself may

<sup>199</sup> An allegation of anti-competitive bundling was rejected for this reason in *Alleged cross-subsidy of BT's discounts* OFTEL decision of 28 May 2003 [2003] UKCLR 816.

<sup>200</sup> OFT decision of 27 March 2003 [2003] UKCLR 950.

<sup>201</sup> *Ibid*, paras 294–363; the second practice condemned was a margin squeeze: see 'Findings of a margin squeeze', p 758 below.

<sup>202</sup> Case No 1016/1/1/03 *Genzyme Ltd v OFT* [2004] CAT 4, [2004] CompAR 358, paras 546–548.

<sup>203</sup> For further reading on predatory pricing see section 6 of DG COMP's *Discussion paper on the application of Article [102] of the Treaty to exclusionary abuses*; Motta *Competition Policy: Theory and Practice* (Cambridge University Press, 2004), pp 412–454; O'Donoghue and Padilla *The Law and Economics of Article 82 EC* (Hart Publishing, 2006), ch 5; Van den Bergh and Camesasca *European Competition Law and Economics: A Comparative Perspective* (Sweet & Maxwell, 2nd ed, 2006), pp 280–298; Bishop and Walker *The Economics of EC Competition Law* (Sweet & Maxwell, 3rd ed, 2010), paras 6.84–6.118; Niels, Jenkins and Kavanagh *Economics for Competition Lawyers* (Oxford University Press, 2011), pp 198–214; for literature in leading periodicals see eg Areeda and Turner 'Predatory Pricing and Related Practices under Section 2 of the Sherman Act' (1975) 88 *Harvard Law Review* 697; Scherer 'Predatory Pricing and the Sherman Act: A Comment' (1976) 89 *Harvard Law Review* 869; Williamson 'Predatory Pricing: A Strategic and Welfare Analysis' (1977) 87 *Yale Law Journal* 284; Baumol 'Quasi-Permanence of Price Reductions: A Policy for Prevention of Predatory Pricing' (1979) 89 *Yale Law Journal* 1; Brodley and Hay 'Predatory Pricing: Competing Economic Theories and the Evolution of Legal Standards' (1981) 66 *Cornell Law Review* 738; Williamson *Antitrust Economics* (Blackwell, 1987), pp 328–338; Mastromanolis 'Predatory Pricing Strategies in the European Union: a Case for Legal Reform' (1998) 19 *ECLR* 211; Edlin 'Stopping Above-cost Predatory Pricing' (2002) 111 *Yale Law Journal* 941; Elhauge 'Why above-cost price cuts to drive out entrants are not predatory – and the implications for defining costs and market power' (2003) 112 *Yale Law Journal* 681; ICN Unilateral Working Group *Report on Predatory Pricing* (2008), available at [www.internationalcompetitionnetwork.org](http://www.internationalcompetitionnetwork.org).

deter new entrants: not only predatory pricing itself but also the reputation for predation may be a barrier to entry<sup>204</sup>.

It is the essence of competition that firms should compete for custom by reducing prices. It has already been pointed out that rebates and similar practices are an essential component of the competitive process, and that the law should not condemn practices, even on the part of dominant firms, that are pro-competitive; in particular a dominant firm should not be deterred from passing on its efficiency to customers in the form of lower prices. The law on predatory price cutting has to tread a fine line between not condemning competitive responses on the part of dominant firms on the one hand and prohibiting unreasonable exclusionary conduct on the other: this takes us back to the debate on ‘false positives’ and ‘false negatives’<sup>205</sup>. It would be perverse if the effect of competition law were to be that dominant firms choose not to compete on price for fear that, by doing so, they would be found guilty of an infringement<sup>206</sup>.

There is some theoretical scepticism as to whether a monopolist would ever benefit from predatory price cutting. For example Bork argues that in practice predation is too expensive for the predator; that the predator will not earn monopoly profits until some distant future time when the new firm has disappeared; and that if it is easy to drive firms out, it will be correspondingly easy for new firms to enter when the predator begins to reap a monopoly profit in the future<sup>207</sup>; if one agrees with this view, competition authorities ought not to concern themselves at all with the issue. However that extreme position now has fairly few advocates. Economists today acknowledge that dominant firms are able to act in a predatory manner<sup>208</sup>, and game theory can help to demonstrate this<sup>209</sup>. There is no doubt that predatory price cutting can amount to an infringement of Article 102 and the Chapter II prohibition in the Competition Act 1998.

## (B) The Areeda and Turner test

Many attempts have been made to frame an economic test of when a price is predatory. Areeda and Turner<sup>210</sup> suggested that a price should be deemed predatory under US law where it was below a dominant firm’s AVC<sup>211</sup>.

The Areeda and Turner test relies exclusively on a cost/price analysis. Some commentators think that the test should be less strict, and that predation should be condemned only where it can also be demonstrated that a predator will be able to recoup any losses it has made through the exercise of its market power in the future: the Supreme Court

<sup>204</sup> On this point see para 68 of the Commission’s *Guidance on Article 102 Enforcement Priorities*; see also Bolton, Broadley and Riordan ‘Predatory Pricing: Strategic theory and legal policy’ (2000) 88 *Georgetown Law Journal* 2239.

<sup>205</sup> See ch 5, ‘False positives and false negatives’, pp 193–194.

<sup>206</sup> See eg the Supreme Court in the US in *Matsushita v Zenith Radio* 475 US 574, p 594 (1986): ‘mistaken inferences in cases such as this chill the very conduct that antitrust laws are designed to protect’.

<sup>207</sup> See eg Bork *Antitrust Paradox* (Basic Books, 1978), pp 148–155; see also Koller ‘The Myth of Predatory Pricing: An Empirical Study’ (1971) 4 *Antitrust L Ec Rev* 105; Easterbrook ‘Predatory Strategies and Counterstrategies’ (1981) 48 *University of Chicago Law Review* 263.

<sup>208</sup> For a helpful review of contemporary economic theory and empirical evidence on predatory pricing see Shapiro and Kaplow ‘Antitrust’ in *Handbook of Law and Economics*, vol 2 (Elsevier, 2008, eds Polinsky and Shavell), 1073, pp 1195–1197.

<sup>209</sup> See eg Philips *Competition Policy: A Game-Theoretic Perspective* (Cambridge University Press, 1995).

<sup>210</sup> See Areeda and Turner ‘Predatory Pricing and Related Practices under Section 2 of the Sherman Act’ (1975) 88 *Harvard Law Review* 697.

<sup>211</sup> See ‘Cost Concepts’, pp 716–718 above on the meaning of this and various other cost concepts; for case law in the US on the cost standard to be applied to predation in the airline industry see *US v American Airlines Inc* 355 F 3d 1109 (10th Cir 2003) and *Spirit Airlines Inc v Northwest Airlines Inc* 431 F 3d (6th Cir 2005).

of the US has required proof of recoupment as a key component of the offence of predation<sup>212</sup>. Others question whether the Areeda and Turner test is strict enough, arguing that pricing above AVC could be exclusionary in some circumstances, especially where there is evidence of an intention to discipline or deter competitors or where in practice it has this effect. However there are difficulties with a legal rule which requires specific proof of a predator's intention. In the ruthless process of competition any competitor that enters a race wishes to win, so that by necessary implication it must also have 'intended' that its competitors should lose; in this sense a requirement of intention is hardly meaningful<sup>213</sup>. In so far as a requirement of intention means that evidence of a 'smoking gun' should be adduced, for example in the form of written memoranda, minutes of meetings and emails documenting a settled policy of eliminating competitors, this may be difficult for a competition authority to find: well-advised companies will be perfectly aware that they should not generate incriminating documents of this kind and that they should destroy those that they do. A rule requiring evidence of intention to eliminate would make more sense where it has an objective quality based in economics, for example that a predator's conduct, by departing from short-term profit maximisation, makes commercial sense only as a way of eliminating a competitor; this variant of intention is very different from proving the subjective intention of the predator, but is extremely difficult to prove as a matter of economic analysis. This discussion demonstrates some of the problems involved in establishing a suitable test for cases on predatory price cutting.

As we shall see, proving intention is sometimes relevant to the EU law on pricing abuses. The Court of Justice in *AKZO v Commission*<sup>214</sup> decided that pricing above AVC but below ATC could be abusive where there was evidence of an intention on the part of the dominant firm to eliminate a competitor<sup>215</sup>. In *Compagnie Maritime Belge v Commission*<sup>216</sup> the Court of Justice held that a policy of selective price cutting to particular customers carried into effect with the intention of eliminating the dominant undertaking's only competitor was abusive in the particular circumstances of the market for the maritime transport of containerised cargo<sup>217</sup>. These judgments seem to be based on the 'smoking gun' variant of intention<sup>218</sup>. The Commission, in paragraph 66 of its *Guidance on Article 102 Enforcement Priorities*, says that it may rely on documentary evidence of a predatory strategy.

EU law will be considered first, then that of the UK.

<sup>212</sup> See *Brooke Group Ltd v Brown Williamson Tobacco* 509 US 209 (1993); *Weyerhaeuser Co v Ross-Simmons Hardwood Lumber Co Inc* 549 US 312 (2007) (applying a requirement of proof of recoupment to predatory bidding as well as to predatory selling cases); on recoupment in US law see Joskow and Klevorick 'A Framework for Analysing Predatory Pricing Policy' (1979) 89 *Yale Law Journal* 213; Elzinga and Mills 'Testing for Predation: Is Recoupment Feasible?' (C) **EU law**(i) **AKZO v Commission**

In *ECS/AKZO*<sup>219</sup> the Commission imposed a fine of €10 million on AKZO for predatory price cutting. ECS was a small UK firm producing benzoyl peroxide. Until 1979 it had sold this product to customers requiring it as a bleach in the treatment of flour in the UK and Eire. It then decided also to sell it to users in the polymer industry. AKZO, a Dutch company in a dominant position on the market, informed ECS that unless it withdrew from the polymer market it would reduce its prices, in particular in the flour additives market, in order to harm it. Subsequently AKZO did indeed reduce its prices. In holding that AKZO had abused its dominant position the Commission declined to adopt the Areeda and Turner test of predatory price cutting, according to which pricing above AVC should be presumed lawful<sup>220</sup>. While accepting that cost/price analysis is an element in deciding whether a price is predatory, the Commission considered that it was also relevant whether the dominant firm had adopted a strategy of eliminating competition, what the effects of its conduct would be likely to be and what a competitor's likely reaction to the conduct of the dominant firm would be. At paragraph 79 of its decision the Commission suggested that even a price above ATC might be predatory when assessed in its particular market context<sup>221</sup>.

On appeal<sup>222</sup> the Court of Justice upheld the Commission's finding of predatory pricing, saying that not all price competition can be considered legitimate<sup>223</sup>. The Court of Justice held that where prices were below AVC predation had to be presumed, since every sale would generate a loss for the dominant firm<sup>224</sup>. The Court of Justice did not say that the presumption could never be rebutted; in *France Télécom v Commission*<sup>225</sup> the Court said that prices below AVC are 'prima facie abusive'<sup>226</sup>, an important difference. It would be wrong to have a *per se* rule that selling below AVC is always illegal<sup>227</sup>. For example it is arguable that a dominant firm should sometimes be able to sell below cost: sales promotions sometimes involve below-cost selling; and the disposal of old stock at the end of the season at a price below cost would presumably not be unlawful.

The Court of Justice in *AKZO v Commission* went on to hold that where prices are above AVC but below ATC they will be regarded as abusive if they are part of a plan which is aimed at eliminating a competitor<sup>228</sup>; such a pricing policy might mean that a dominant firm drives from the market undertakings that are as efficient as it but which, because of their smaller financial resources, are incapable of withstanding the competition waged against them. The Court of Justice therefore upheld the Commission's rejection of the Areeda/Turner test.

<sup>219</sup> OJ [1985] L 374/1, [1986] 3 CMLR 273; see Merkin 'Predatory Pricing or Competitive Pricing: Establishing the Truth in English and EC Law' (1987) 7 OJLS 182.

<sup>220</sup> See 'The Areeda and Turner test', pp 740–741 above.

<sup>221</sup> See also the Commission's comments at point 82 of its XVth *Report on Competition Policy* (1985).

<sup>222</sup> Case C-62/86 *AKZO v Commission* [1991] ECR I-3359, [1993] 5 CMLR 215.

<sup>223</sup> *Ibid*, para 70.

<sup>224</sup> *Ibid*, para 71; the Court of Justice did not discuss the period of time over which the AVC should be calculated.

<sup>225</sup> Case C-202/07 [2009] ECR I-2369, [2009] 4 CMLR 1149.

<sup>226</sup> *Ibid*, para 109; Advocate General Mazák made the same point in para 95 of his Opinion in this case; cf Case C-333/94 P *Tetra Pak International SA v Commission* [1996] ECR I-5951, [1997] 4 CMLR 662, para 41, where the Court of Justice had said that prices below AVC must 'always' be considered abusive.

<sup>227</sup> In the UK the CAT considered that the presumption of abuse should be rebuttable in rare cases: see Case No 1009/1/1/02 *Aberdeen Journals Ltd v OFT* [2003] CAT 11, [2003] CompAR 67, para 357.

<sup>228</sup> Case C-62/86 *AKZO v Commission* [1991] ECR I-3359, [1993] 5 CMLR 215, para 72.

The rule in *AKZO v Commission* can be depicted as follows, where the dominant firm's prices range from 0 to 100:

---

100	Where a dominant firm is charging prices above ATC, it is not guilty of predation under the rule in <i>AKZO v Commission</i> ; however consideration must be given to the rule on selective price cutting in <i>Compagnie Maritime Belge v Commission</i> (see below)
ATC	Where a dominant firm is selling at less than ATC, but above AVC, it is guilty of predation where this is done as part of a plan to eliminate a competitor
AVC	Where a dominant firm is selling at less than AVC, it is presumed to be acting abusively; this presumption may be rebuttable where there is an objective justification for below-cost selling
0	

---

Fig. 18.1

The Commission suggests, in paragraphs 26 and 64 of its *Guidance*, that a preferable standard to AVC might be AAC because, over a period of time, a firm might have to incur not just variable costs but additional fixed ones. Suppose that a firm is accused of predating over a period of three years: during that time some of its machinery might have to be replaced, and this would normally be regarded as a fixed cost. The AAC standard includes not only the average of the variable costs incurred over that period, but also adds in any fixed costs. It follows that, in some cases, AVC and AAC might be the same; but that in others – depending on the duration of the conduct under examination – AAC could be higher than AVC due to the inclusion of some fixed costs<sup>229</sup>. The expression ‘avoidable cost’ is used because it refers to the amount of money that the dominant firm would have saved if it had not been involved in the production of widgets during the period in question. Of course, the Commission is bound by the law as laid down by the EU Courts; on the other hand, the suggestion that AAC, as a matter of economics, is a sounder standard than AVC in a case such as this seems compelling, and this is one of those areas where the EU Courts might, in future, be prepared to defer to the compelling logic of the *Guidance*.

(ii) ***Tetra Pak v Commission***

In *Tetra Pak II*<sup>230</sup> the Commission found Tetra Pak guilty of predatory pricing in relation to its non-aseptic cartons<sup>231</sup>; it considered that Tetra Pak was able to subsidise its losses from its substantial profits on the market for aseptic cartons, where it had virtually no competition<sup>232</sup>. The Commission said that in seven Member States the non-aseptic cartons had been sold at a loss<sup>233</sup>. However the Commission concentrated on the position

<sup>229</sup> *Guidance on Article 102 Enforcement Priorities*, fn 40.

<sup>230</sup> OJ [1992] L 72/1, [1992] 4 CMLR 551. <sup>231</sup> *Ibid*, paras 147–153.

<sup>232</sup> This type of intervention is envisaged by fn 39 of the Commission's *Guidance on Article 102 Enforcement Priorities*.

<sup>233</sup> *Ibid*, para 147.

in Italy, where the cartons had been sold below AVC. The Commission did not merely rely on the AKZO presumption of predation where prices are below AVC, but said that it had ‘gathered sufficiently clear and unequivocal data to be able to conclude that, in that country at least, sales at a loss were the result of a deliberate policy aimed at eliminating competition’<sup>234</sup>. The Commission continued by saying that, although it was difficult to believe that an efficient multi-national company could have indulged in behaviour so opposed to the logic of economic profitability through management error, it should be asked whether exceptional circumstances, independent of Tetra Pak’s free will, forced it to make losses. The Commission concluded that there were no such circumstances and that the prices were simply part of an ‘eviction strategy’<sup>235</sup>. The Court of Justice upheld the Commission’s finding of abuse; the judgment is of interest to the issue of recoupment, which is discussed below<sup>236</sup>.

### (iii) *Wanadoo: on appeal France Télécom v Commission*

In *Wanadoo*<sup>237</sup> the Commission applied the rule in *AKZO v Commission* and imposed a fine of €10.35 million on the subsidiary of France Télécom for having priced residential broadband internet services at levels that, until August 2001, fell considerably below AVC, and which subsequently were approximately equivalent to variable cost, but were significantly below ATC. In the Commission’s view Wanadoo’s behaviour ‘was designed to take the lion’s share of a booming market’<sup>238</sup>.

The Commission’s decision was upheld on appeal to the General Court and to the Court of Justice in *France Télécom v Commission* (by the time of the appeals France Télécom had succeeded to the rights of Wanadoo)<sup>239</sup>. The judgments deal with France Télécom’s objections to the Commission’s cost methodology and treatment of costs and its argument that the Commission had applied the wrong test of predation.

#### (A) *Errors as to costs*

The EU Courts rejected France Télécom’s appeal as to costs<sup>240</sup>. The General Court held that the analysis of costs involves a complex economic assessment, and that the Commission ‘must be afforded a broad discretion’<sup>241</sup>. The General Court noted that, since the case concerned a new product in an expanding market, the Commission had spread the costs over a period of 48 months when determining whether France Télécom was selling at a loss<sup>242</sup>; this did not amount to a manifest error of assessment<sup>243</sup>. The Court also rejected the argument that there were methodological problems with the actual calculations of the Commission<sup>244</sup>.

<sup>241</sup> Case T-340/03 [2007] ECR II-107, [2007] 4 CMLR 919, para 129.

<sup>242</sup> Ibid, para 137.

<sup>243</sup> Ibid, para 155.

<sup>244</sup> Ibid, paras 162–169.

**(B) The test of predation**

The EU Courts also rejected France Télécom's argument that the Commission had applied the wrong test of predation<sup>245</sup>. The General Court, with whom the Court of Justice agreed, held that France Télécom did not have the right to align its prices on those of its competitors where this would mean that it was selling at below cost:

It is... not possible to assert that the rights of a dominant undertaking to align its prices on those of its competitors is absolute<sup>246</sup>.

The General Court went on to say that, although a non-dominant undertaking would be allowed to match the prices of competitors, even by selling at below cost, dominant undertakings do not necessarily have the same right<sup>247</sup>.

As to the question of a plan of predation, the General Court noted that the Commission had demonstrated such a plan for the period during which France Télécom was selling above AVC but below ATC<sup>248</sup>.

The issue of recoupment is discussed in the next section.

**(iv) Is it necessary to show the possibility of recoupment?**

It was pointed out above that US law requires that an element of the offence of predatory price cutting is that it can be shown that the predator has the ability to recoup any losses incurred<sup>249</sup>. Many commentators have argued that a recoupment rule should be adopted under Article 102<sup>250</sup>, although some argue to the contrary<sup>251</sup>. It is of interest to note that the Privy Council, a court in the UK that hears appeals from some countries in the British Commonwealth, said in *Carter Holt Harvey Building Products Group Ltd v The Commerce Commission*<sup>252</sup> that:

It is the ability to recoup losses because its price-cutting has removed competition and allows it to charge supra-competitive prices that harms competitors<sup>253</sup>.

The EU Courts have not adopted a requirement of recoupment under Article 102; the most recent judgment on the point, that of the Court of Justice in *France Télécom v Commission*, states clearly that there is no such requirement in a case of pricing below AVC.

In *AKZO v Commission* the Court acknowledged the significance of recoupment in paragraph 71 of its judgment, where it noted that a dominant firm has no interest in applying prices below average variable cost:

except that of eliminating competitors so as to enable it subsequently to raise its prices by taking advantage of its monopolistic position.

However it did not expressly incorporate the need to prove recoupment as part of the abuse. In *Tetra Pak II* it was argued before the Court of Justice that the Commission should have to establish the possibility of recoupment as part of the offence of predation.

<sup>245</sup> Ibid, paras 170–230.

<sup>246</sup> Case T-340/03 [2007] ECR II-107, [2007] 4 CMLR 919, para 182, upheld on appeal Case C-202/07 P [2009] ECR I-2369, [2009] 4 CMLR 1149, paras 41–49.

<sup>252</sup> [2004] UKPC 37.

<sup>253</sup> Ibid, para 67.

The Court of Justice, upholding the finding that Tetra Pak was guilty of predatory pricing, remarked that:

it would not be appropriate, *in the circumstances of the present case*, to require in addition proof that Tetra Pak had a realistic chance of recouping its losses. It must be possible to penalise predatory pricing whenever there is a risk that competitors will be eliminated<sup>254</sup> (emphasis added).

The *Tetra Pak* case was one in which the anti-competitive intention of Tetra Pak, manifested in a series of abusive acts contrary to Article 102, was particularly clear; furthermore its market power was considerable, so that may explain why the Court felt that ‘in the circumstances of the present case’ it was not necessary to impose a requirement to prove recoupment.

In *France Télécom v Commission*<sup>255</sup> the Court of Justice was invited to introduce a recoupment requirement into the test of predation. The Court cited the *AKZO* and *Tetra Pak* cases, and concluded that:

it does not follow from the case-law of the Court that proof of the possibility of recoupment of losses suffered by the application, by an undertaking in a dominant position, of prices lower than a certain level of costs constitutes a necessary precondition to establishing that such a pricing policy is abusive<sup>256</sup>.

The Court of Justice pointed out that the Commission is not precluded from finding that the possibility of recoupment is a relevant factor in assessing whether a pricing practice is abusive. This fits well with the approach adopted by the Commission in paragraph 71 of its *Guidance on Article 102 Enforcement Priorities*.

#### (v) The Commission’s approach to predation in its *Guidance on Article 102 Enforcement Priorities*

The circumstances in which the Commission might consider it appropriate to take action in relation to predatory conduct are discussed in paragraphs 63 to 74 of the *Guidance on Article 102 Enforcement Priorities*. The Commission says that a dominant firm engages in predatory conduct when it deliberately incurs losses or forgoes profits in the short term and causes anti-competitive foreclosure<sup>257</sup>. The Commission’s view is that pricing below AAC will generally be a clear indication of sacrificing profits<sup>258</sup>, although it may also look at whether a dominant firm incurred a loss that it could have avoided<sup>259</sup>. The Commission adds that only pricing below LRAIC is capable of foreclosing as efficient competitors from the market<sup>260</sup>. Paragraph 68 of the *Guidance* then refers back to paragraph 20, which sets out a range of factors that the Commission will take into account

<sup>254</sup> Case C-333/94 P *Tetra Pak International SA v Commission* [1996] ECR I-5951, [1997] 4 CMLR 662, para 44; at paras 76–78 of his Opinion in this case Advocate General Ruiz-Colomer considered that proof of recoupment was not necessary; yet in Cases C-395 and 396/96 P *Compagnie Maritime Belge v Commission* [2000] ECR I-1365, [2000] 4 CMLR 1076 Advocate General Fennelly considered that recoupment should be part of the test for predatory pricing; *ibid*, para 136; see similarly the Opinion of Advocate General Mazák in Case C-202/07 P *France Télécom v Commission* [2009] ECR I-2369, [2009] 4 CMLR 1149, paras 68–76.

<sup>255</sup> Case C-202/07 P *France Télécom v Commission* [2009] ECR I-2369, [2009] 4 CMLR 1149.

<sup>256</sup> *Ibid*, para 110.

<sup>257</sup> *Guidance on Article 102 Enforcement Priorities*, para 63.

<sup>258</sup> *Ibid*, para 64.

<sup>259</sup> *Ibid*, para 65; fn 43 makes an important point that ‘undertakings should not be penalised for incurring ex post losses where the ex ante decision to engage in the conduct was taken in good faith, that is to say, if they can provide conclusive evidence that they could reasonably expect that the activity would be profitable’.

<sup>260</sup> *Ibid*, para 67.

when deciding whether to intervene; the Commission must be satisfied that below-cost pricing results in anti-competitive foreclosure<sup>261</sup>. It is not necessary for a competitor to have exited the market: disciplining a rival to prevent it competing may suffice<sup>262</sup>. The Commission states that consumer harm warranting intervention may arise if a dominant undertaking can reasonably expect its market power after the predatory conduct to be greater than it otherwise would have been, for example by increasing its prices or by moderating a decline in prices<sup>263</sup>. The Commission says that predatory conduct is unlikely to create efficiencies<sup>264</sup>.

**(vi) Are the standards of AVC and ATC always appropriate?**

A complicating factor in applying cost-based rules to determine whether prices are predatory is that it may not always be appropriate to apply the standards of AVC or ATC. In some industries fixed costs are very high but variable costs are low. An obvious example is telecommunications, where it is likely to have been very expensive to establish the original infrastructure of wires and cables; once they have been laid, however, the actual cost of carrying telephone calls is low, and may be as low as zero. The AVC of telephone calls is so low that there would hardly ever be predatory prices if the AVC standard were to be applied; and the ATC standard would require proof of the predator's intention to eliminate competition, following the judgment in *AKZO v Commission*, with the difficulties that this entails.

If the AVC and ATC standards in *AKZO v Commission* are inappropriate to determine whether prices are predatory in industries such as these, an alternative rule is needed. The Commission suggests, in its *Notice on the Application of the Competition Rules to Access Agreements in the Telecommunications Sector*<sup>265</sup>, that the *AKZO* standards are not appropriate in a network industry such as telecommunications<sup>266</sup> and that a standard based on LRIC might be preferable<sup>267</sup>. Indeed, even a price above LRIC could be considered predatory, if it does not recover some of the common costs that are incurred where a firm supplies a range of different products: for this reason, a 'combinatorial' approach may be taken towards the assessment of cost, whereby a firm's LRIC is combined with its 'stand alone cost', that is to say the cost that it would incur if it had no other activities at all<sup>268</sup>.

The Commission proceeded, for the first time in a formal decision, on the basis of LRIC in *Deutsche Post*<sup>269</sup>. UPS complained that Deutsche Post was using revenue from its profitable letter-post monopoly to finance a strategy of below-cost selling in the commercial parcels market, which was open to competition. The Commission's view was that Deutsche Post, in the period from 1990 to 1995, had received revenue from this business which did not cover the incremental cost of providing it<sup>270</sup>. By remaining in the market without any foreseeable improvement in revenue, Deutsche Post was considered to have restricted the activities of competitors which were in a position to provide the service at a price that would cover their costs<sup>271</sup>. The Commission therefore concluded that Deutsche

<sup>261</sup> *Ibid*, paras 67–73; para 68 describes situations in which a victim of predatory conduct may be foreclosed from the market.

<sup>271</sup> OJ [2001] L 125/27, [2001] 5 CMLR 99.

Post was guilty of predatory pricing; however it did not impose a fine for this infringement, since this was the first time that it had applied the LRIC standard<sup>272</sup>.

**(vii) Predatory price cutting and cross-subsidisation<sup>273</sup>**

An undertaking such as Deutsche Post, which enjoys a legal monopoly in relation to the basic letter service<sup>274</sup>, is able to use the profits it makes there to support low prices in other markets where it faces competition: this was the essence of UPS's complaint<sup>275</sup>. Cross-subsidisation may facilitate abusive pricing practices such as predation and selective price cutting. This raises the interesting question of whether cross-subsidisation is an abuse of a dominant position in itself. There are no decisions of the Commission or judgments of the EU Courts finding that cross-subsidy is, in itself, an abuse of a dominant position, although the Commission in its *Notice on the Application of the Competition Rules to the Postal Sector*<sup>276</sup> suggests, at paragraph 3.3, that there could be circumstances in which it could be an abuse to subsidise activities open to competition by allocating their costs to those services in relation to which the postal operator enjoys a monopoly<sup>277</sup>. Despite this statement, however, in principle it would appear that the existing rules on abusive pricing practices, described in this chapter, are sufficient to control the behaviour of dominant firms; the adoption of a rule forbidding cross-subsidy itself is unnecessary. This was the view of the General Court in *UPS Europe SA v Commission*<sup>278</sup>.

Where cross-subsidy is a problem there are other ways of dealing with it. In the case of regulated industries, specific rules are often imposed to prevent the practice<sup>279</sup>. Useful remedies that the Commission can deploy in Article 102 cases include a requirement to establish different legal entities, the maintenance of separate accounts and full financial transparency of dominant firms' pricing practices.

**(viii) Selective price cutting but not below cost**

One of the most contentious issues under Article 102 is whether it can be unlawful for a dominant firm to cut its prices selectively, but not to below cost, to customers that might desert to a competitor, while leaving prices to other customers at a higher level. Such a policy might amount to unlawful discrimination contrary to Article 102(2)(c) where it involves the application of dissimilar conditions to equivalent transactions, thereby placing other trading parties at a competitive disadvantage<sup>280</sup>. The specific issue under consideration in this section is whether selective price cutting could be held to be abusive irrespective of whether it infringes Article 102(2)(c) and, more specifically, where the undertaking harmed is a competitor operating at the same level of the market as the dominant firm rather than a trading party in a downstream market.

<sup>272</sup> Ibid, para 47; a fine of €24 million was imposed for the separate abuse of offering loyalty rebates: see 'Further case law on loyalty rebates under Article 102', pp 731–732 above.

<sup>279</sup> See ch 23, 'Regulated Industries', pp 977–980.

<sup>280</sup> See 'EU law', pp 760–763 below.

The position can be depicted as follows:

**Fig. 18.2 Article 82(2)(c) discrimination**

A charges B a price of 100 per widget, but charges C 120; B and C need widgets to manufacture blodgets, a market in which they compete. Clearly the discrimination puts C at a competitive disadvantage in the blodget market as against B. It may be, in a case such as this, that B is a subsidiary of A, or closely associated with it; this may help to explain why A practises discrimination in the first place. The detriment to competition occurs downstream from A’s market: that is to say it amounts to vertical foreclosure, or to secondary-line injury, to be contrasted with the horizontal foreclosure, or primary-line injury, in the example that follows<sup>281</sup>:

**Fig. 18.3 Selective price cutting as an abuse**

In this example A charges B 120 and C 100. B requires widgets for blodgets; C requires them for sprockets. Blodgets and sprockets do not compete, so that there is no harm to competition between B and C in the downstream market. The motivation for A’s price cut to C is that A fears that it is going to lose C’s business to X; X is able to supply a different input to C from which C could just as easily produce sprockets. The purpose of the selective price cut is to eliminate competition at A’s level of the market: the case is one of horizontal foreclosure.

The question of whether selective price cutting such as this is abusive is controversial<sup>282</sup>. Provided that the dominant firm is not making a loss, it is not guilty of predatory price cutting; has not offered exclusionary rebates; and for the reasons just given it may

<sup>281</sup> For discussion of this terminology see ch 5, ‘Horizontal and vertical foreclosure’, pp 204–205.

<sup>282</sup> See eg Elhauge ‘Why Above-Cost Price Cuts To Drive Out Entrants Are Not Predatory – and the Implications for Defining Costs and Market Power’ (2003) 112 Yale Law Journal 681; some commentators have written in defence of a rule that prohibits above-cost predatory pricing in certain circumstances: see

not be infringing Article 102(2)(c). It would appear that, in making selective price cuts, the dominant firm is competing ‘on the merits’ with X, and that it has not acted abusively. The EU Courts have often stated that dominant firms are allowed to ‘meet’ competition, which is what A appears to have done<sup>283</sup>; and it is obviously in C’s interest, and in the interest of C’s customers, that it is the beneficiary of lower prices. Despite this, however, it is possible that selective price cuts of this nature may be held to be abusive, albeit only in narrowly defined circumstances.

#### (A) *Eurofix-Bauco/Hilti*

In *Eurofix-Bauco/Hilti*<sup>284</sup> the Commission imposed a fine of €6 million on Hilti for abusing its dominant position in a number of ways. Hilti had taken action to prevent customers from purchasing nails from its competitors. Apart from entering into tie-in agreements with some customers<sup>285</sup>, Hilti singled out competing firms’ main customers and offered them particularly favourable conditions; it removed quantity discounts from long-standing customers who bought from its competitors; and it classified certain customers as ‘unsupported’, which meant that they qualified for lower quantity discounts than ‘supported’ firms: it appeared to the Commission that the ‘unsupported’ firms were ones which had purchased nails and nail cartridges other than from Hilti. Hilti had also given away some products free of charge. The Commission said that the pricing abuses in this case did not hinge on whether the prices were below cost, but on whether Hilti could rely on its dominance to offer discriminatory prices to its competitors’ customers with a view to damaging the competitors’ business; in other words the Commission proceeded not on the basis of predatory pricing contrary to *AKZO v Commission* nor on the basis of a detriment to competition in a downstream market contrary to Article 102(2)(c). The General Court, upholding the decision of the Commission, stated that Hilti’s strategy was not a legitimate mode of competition on the part of an undertaking in a dominant position<sup>286</sup>.

#### (B) *Irish Sugar v Commission*

The Commission considered that Irish Sugar had abused its dominant position contrary to Article 102 by offering selective price cuts in *Irish Sugar*<sup>287</sup>. The General Court annulled the finding that Irish Sugar had applied selectively low prices to potential customers of a competitor, ASI, on factual grounds<sup>288</sup>; however it upheld the finding that Irish Sugar had been guilty of granting selective rebates to particular customers<sup>289</sup>.

#### (C) *Compagnie Maritime Belge v Commission*

In *Compagnie Maritime Belge v Commission*<sup>290</sup> the Commission investigated the policy of ‘fighting ships’, whereby members of a liner conference in the maritime transport sector, Cewal, reduced their charges to the level, or to below the level, of their one competitor, Grimaldi and Cobelfret; they also operated the fighting ships on the same route and at the

<sup>290</sup> OJ [1993] L 34/20, [1995] 5 CMLR 198.

same time as Grimaldi's. The Commission concluded that the policy was one of selective price cutting intended to eliminate the competitor and that Article 102 was infringed. In *Compagnie Maritime Belge v Commission*<sup>291</sup> the Commission's decision was upheld by General Court. The Court of Justice agreed that there was an infringement of Article 102, although the fines were annulled for technical reasons<sup>292</sup>.

Advocate General Fennelly, urging that the application of Article 102 to selective price cutting should be approached with reserve, remarked that:

Price competition is the essence of the free and open competition which it is the objective of [EU] policy to establish on the internal market. It favours more efficient firms and it is for the benefit of consumers both in the short and the long run. Dominant firms not only have the right but should be encouraged to compete on price<sup>293</sup>.

In the Advocate General's view, non-discriminatory price cuts by a dominant undertaking which do not entail below-cost sales should not normally be regarded as being anti-competitive:

In the first place, even if they are only short lived, they benefit consumers and, secondly, if the dominant undertaking's competitors are equally or more efficient, they should be able to compete on the same terms. [EU] competition law should thus not offer less efficient undertakings a safe haven against vigorous competition even from dominant undertakings. Different considerations may, however, apply where an undertaking which enjoys a position of dominance approaching a monopoly, particularly on a market where price cuts can be implemented with relative autonomy from costs, implements a policy of selective price cutting with the demonstrable aim of eliminating all competition. In those circumstances, to accept that all selling above cost was automatically acceptable could enable the undertaking in question to eliminate all competition by pursuing a selective pricing policy which in the long run would permit it to increase prices and deter potential future entrants for fear of receiving the same targeted treatment<sup>294</sup>.

In its judgment the Court of Justice followed the Advocate General, holding that the selective price cutting on the facts of this case was abusive<sup>295</sup>. After noting that the scope of the special responsibility of dominant undertakings must be considered in the light of the specific circumstances of each case<sup>296</sup>, the Court of Justice noted that the maritime transport market is 'a very specialised sector'<sup>297</sup>; it declined to establish a general rule for selective price cutting on the part of liner conferences, but, upholding the Commission's finding of abuse, concluded that:

It is sufficient to recall that the conduct at issue here is that of a conference having a share of over 90% of the market in question and only one competitor. The appellants have, moreover, never seriously disputed, and indeed admitted at the hearing, that the purpose of the conduct complained of was to eliminate [Grimaldi & Cobelfret] from the market<sup>298</sup>.

As a result of this judgment it is clear that selective price cutting is capable of being abusive in its own right. However it is important to point out a number of features of the *Compagnie Maritime Belge* case that restrict the scope of this precedent and which should therefore limit its application in the future. First, maritime transport is, as the Court of Justice remarked, an unusual sector in which an incumbent dominant firm is able to target its

<sup>298</sup> *Ibid*, para 119.

competitors and eliminate them by strategic behaviour with little regard to cost; secondly, the conference had 90 per cent or more of the market: it therefore was ‘super-dominant’, and subject to particularly close scrutiny under Article 102<sup>299</sup>; thirdly, the conference had only one competitor, Grimaldi and Cobelfret; and fourthly, there was a ‘smoking gun’, that is to say evidence of an intention on the part of the conference to eliminate Grimaldi from the market: indeed the smoke was seen by the judges of the Court of Justice, where the appellants admitted that they had this intention. The Court of Justice did not say, but may also have been influenced by the fact, that the liner conference itself was the product of a horizontal agreement amongst its members: there was, in effect, a horizontal collective boycott of Grimaldi, which would be a serious offence under Article 101(1)<sup>300</sup>. The case should be read with these special features in mind; this makes it a less menacing precedent than it might otherwise appear to be, with the consequence that other dominant firms, operating in less unusual circumstances, should be free to respond to competition by price cuts that are not contrary to any of the other pricing abuses under Article 102 described in this chapter.

#### (D) UK law

There have been four cases in which predatory pricing has been established by competition authorities in the UK, *Napp*, *Aberdeen Journals*, *EW&S* and *Cardiff Bus*; allegations of predation have been rejected on a number of occasions.

##### (i) The *Napp Pharmaceutical case*

In *Napp Pharmaceutical Holdings Ltd*<sup>301</sup> the OFT concluded that Napp was guilty of charging predatory prices for sustained release morphine by selling some products to hospitals at less than direct cost, which it considered, on the facts of the case, to be a proxy for AVC<sup>302</sup>. The OFT rejected Napp’s argument that sales below cost to hospitals were objectively justified since Napp would be able to recover the full price from follow-on sales to patients in the community<sup>303</sup>; indeed the very reason that Napp was able to earn high margins on sales to the community was that it had been successful in stifling competition in relation to sales to hospitals<sup>304</sup>. On appeal the CAT held that Napp, as an undertaking which it considered to be ‘super-dominant’<sup>305</sup>, had abused its dominant position by charging prices below cost to hospitals in order to ward off a competitor<sup>306</sup>. The CAT held that, as Napp had offered prices below AVC to hospitals, it was not necessary to determine whether it had a plan to eliminate competition<sup>307</sup>; however the CAT found that such a plan existed in any event<sup>308</sup>.

##### (ii) The *Aberdeen Journals case*

In *Aberdeen Journals Ltd*<sup>309</sup> the OFT imposed a penalty of £1,328,040 on Aberdeen Journals for predatory pricing by failing to cover its AVC from 1 March to 29 March 2000. This decision was set aside by the CAT as it was not satisfied by the way in which the OFT had

<sup>299</sup> See ch 5, ‘The emergence of super-dominance’, pp 187–189.

<sup>300</sup> See ch 13, ‘Anti-Competitive Horizontal Restraints’, pp 550–552.

<sup>301</sup> OFT decision of 30 March 2001 [2001] UKCLR 597. <sup>302</sup> *Ibid*, paras 188–196.

<sup>303</sup> *Ibid*, paras 192–195. <sup>304</sup> *Ibid*, para 195.

<sup>305</sup> Case No 1000/1/1/01 *Napp Pharmaceutical Holdings Ltd v Director General of Fair Trading* [2002] CAT 1, [2002] CompAR 13, paras 219 and 343; for comment on the finding of predatory pricing in this case see Ahlborn and Allan ‘The Napp Case: A Study of Predation’ (2004) 26(2) World Competition 233.

<sup>306</sup> Case No 1000/1/1/01 [2002] CAT 1, [2002] CompAR 13, para 352. <sup>307</sup> *Ibid*, paras 228 and 307.

<sup>308</sup> *Ibid*, paras 310 and 333. <sup>309</sup> OFT decision of 16 July 2001 [2001] UKCLR 856.

defined the relevant market<sup>310</sup>. The OFT adopted a second decision, concluding again that *Aberdeen Journals* was guilty of predatory pricing<sup>311</sup>. On appeal against the second decision the CAT held that *Aberdeen Journals* had sold advertising in one of its newspapers at less than AVC contrary to the Chapter II prohibition<sup>312</sup>. This judgment contains several important points on the cost-based rules relating to predatory pricing. First, the CAT emphasised that the rules are not an end in themselves and ought not to be applied mechanically<sup>313</sup>. Secondly, the CAT drew attention to the significance of the time period over which costs are to be calculated<sup>314</sup>; the reason for this is that, the longer the timescale, the more likely costs will be assessed as variable rather than fixed, with the result that a failure to cover them will give rise to a presumption of predation<sup>315</sup>. Thirdly, the CAT recognised the possibility that a dominant firm could in certain circumstances objectively justify pricing below cost, though this would be particularly difficult when such pricing occurred in response to a new entrant or as part of a strategy to eliminate a competitor<sup>316</sup>. On the issue of intention the CAT said that, in the absence of exceptional circumstances, the longer a dominant firm prices below total costs, the easier it would be to draw an inference of intention to eliminate competition<sup>317</sup>.

### (iii) *EW&S*

In *English Welsh & Scottish Railway Ltd*<sup>318</sup> the Office of Rail Regulation found that *EW&S* had abused its dominant position in a number of ways, including by predatory pricing<sup>319</sup>.

### (iv) *Cardiff Bus*

In *Cardiff Bus*<sup>320</sup> the OFT concluded that *Cardiff Bus* engaged in predatory conduct intended to eliminate 2 Travel, a rival bus company, from the market<sup>321</sup>. The OFT did not impose a fine due to *Cardiff Bus*'s small turnover<sup>322</sup>; subsequently the liquidator of 2 Travel and several of its former shareholders commenced a 'follow-on' action for damages against *Cardiff Bus*<sup>323</sup>.

### (v) Is there a need to prove recoupment of losses?

In *Napp*<sup>324</sup> and the second *Aberdeen Journals* case<sup>325</sup> the CAT held that it was a form of recoupment for a dominant firm to engage in predatory pricing in one market so that it could protect its market share or supra-competitive profits in another market and that, in the circumstances of those cases, further evidence of recoupment was unnecessary.

<sup>310</sup> Case No 1005/1/1/01 *Aberdeen Journals Ltd v Director General of Fair Trading* [2002] CAT 4, [2002] CompAR 167, paras 182–186.

### (vi) Cases where predatory pricing was not established

There have been some cases in which a complaint of predatory pricing was not upheld<sup>326</sup>. In *The Association of British Travel Agents and British Airways plc*<sup>327</sup> the OFT concluded that BA was not guilty of abusing a dominant position by reducing the commission it paid to travel agents for the sale of tickets for its flights with the consequence that it could sell those same flights at lower fees through its own website: the sale of tickets online as opposed to through travel agents was cheaper, and there was an objective justification for this price differential<sup>328</sup>.

In *Complaint against BT's pricing of digital cordless phones*<sup>329</sup> the Office of Communications ('OFCOM') dealt with a complaint that BT was guilty of charging predatory prices for digital cordless telephones. OFCOM concluded that BT was not dominant<sup>330</sup>. However it also conducted an extensive analysis of whether, if BT was dominant, it would have been guilty of predatory pricing and concluded that this was not so<sup>331</sup>.

In *Claymore Dairies Ltd v OFT*<sup>332</sup> the CAT was critical of the OFT's investigation into whether Robert Wiseman Dairies was guilty of predatory pricing in relation to the sale of milk in Scotland: in particular it was not satisfied that the OFT had sufficiently investigated whether Wiseman's prices were above ATC<sup>333</sup>, and it therefore set the finding on this point aside<sup>334</sup>.

The OFT rejected a complaint about predatory prices in *First Edinburgh/Lothian*<sup>335</sup>, as did the ORR in *DB Schenker Rail (UK) Ltd*<sup>336</sup>.

In *Alleged abuse of a dominant position by Flybe Ltd*<sup>337</sup> the OFT concluded that there were no grounds for action against Flybe, which had been accused by Air Southwest of predatory pricing on the air route from Newquay to London Gatwick. The OFT's view was that there was no abuse on that particular route, since Flybe was not in a dominant position on it<sup>338</sup>. The OFT also stated that there was an objective justification for Flybe to expect and to incur initial losses on entering a new route<sup>339</sup>.

## 7. Margin Squeezing<sup>340</sup>

### (A) The economic phenomenon

A margin squeeze can occur where a firm is dominant in an upstream market and supplies a key input to undertakings that compete with it in a downstream market. In such a

<sup>326</sup> In addition to the cases mentioned in the text see the judgment of the High Court in *Chester City Council v Arriva Plc* [2007] EWHC 1373, [2007] UKCLR 1582.

<sup>337</sup> OFT decision of 26 November 2010.

<sup>338</sup> *Ibid*, paras 5.12–5.20.

<sup>339</sup> *Ibid*, paras 6.97–6.99; the OFT referred to para 28 of the Commission's *Guidance on Article 102 Enforcement Priorities* on objective justification in fn 67 of the Decision.

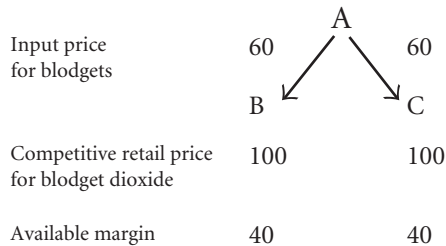

<sup>340</sup> For further reading on margin squeezing see O'Donoghue and Padilla *The Law and Economics of Article 82 EC* (Hart Publishing, 2006), ch 6; Niels, Jenkins and Kavanagh *Economics for Competition Lawyers* (Oxford University Press, 2011), pp 239–250; Kavanagh 'Assessing Margin Squeeze under Competition Law' (2004) 3 *Competition Law Journal* 187; Crocioni 'Price Squeeze and Imputation Test – Recent Developments' (2005) 10 *ECLR* 558; Gérardin and O'Donoghue 'The Concurrent Application of Competition Law and Regulation: The Case of Margin Squeeze Abuses in the Telecommunications Sector' (2005) 1 *Journal of Competition Law and Economics* 355; see Colley and Burnside 'Margin squeeze abuse' (2006) 2 *European Competition Journal* 185; Heimler 'Is a margin squeeze an antitrust or a regulatory violation?' (2010) 6 *Journal of Competition Law and Economics* 879.

situation the dominant firm may have a discretion as to the price it charges for the input, and this could have an effect on the ability of firms to compete with it in the downstream market. Suppose that A supplies widgets, essential for the manufacture of widget dioxide; that B is a subsidiary of A; and that C is an independent downstream competitor.

**Fig. 18.4 Vertical margin squeeze: example 1**

In this example C will be able to compete with B in the downstream market for widget dioxide only if C can transform the widgets into widget dioxide for a price of less than 20: if it cannot do so, it could not charge 100 in the retail market and make a profit. If, on the other hand, A had charged 60 for the widgets, the available margin would be 40, as in the following example:

**Fig. 18.5 Vertical margin squeeze: Example 2**

In each situation the total revenue of the integrated undertaking AB amounts to 100, but A has 'squeezed' the margin available to C in example 1 in a way that makes it more difficult for C to remain in the market for widget dioxide than in example 2. However, it is a complex matter to determine when a squeeze becomes abusive. For example if, in example 1, B can transform widgets into widget dioxide for, say, 15, whereas C is less efficient and can perform the same task only for 25, there is no reason why C should be able to demand a lower input price: the fact is that it is not as efficient as B, and so does not merit protection from it. However if B's own cost of transformation is 25, and C's is 15, the input price is being manipulated to protect B from a more efficient competitor, C, and so there is an abusive margin squeeze, subject to any objective justification.

There may be other ways of addressing the pricing practices of the vertically-integrated entity AB. One is to inquire whether the input price charged by A to C is excessive; another is to determine whether the output price charged by B is predatory. Both of these issues were explored earlier in this chapter. If A were to charge higher prices to C than it charges to B, there might be a case of discrimination contrary to Article 102(2)(c), which is discussed towards the end of this chapter. However the focus of this section is whether A is guilty of manipulating the relationship of its upstream and downstream prices in

order to eliminate its downstream competitor by a margin squeeze. This possibility does not exist in US law<sup>341</sup>. As far as EU law is concerned, the Court of Justice has established that A could be guilty of an independent abuse in its own right<sup>342</sup>. In *Konkurrensverket v TeliaSonera Sverige*<sup>343</sup> the Court said that:

A margin squeeze, in view of the exclusionary effect which it may create for competitors who are at least as efficient as the dominant undertaking, in the absence of any objective justification, is in itself capable of constituting an abuse within the meaning of Article 102 TFEU<sup>344</sup>.

The Court stated that a margin squeeze means that the dominant firm leaves an insufficient margin between its upstream and downstream products; and that it is this difference, rather than the specific level of the wholesale or retail prices, that is the essence of the infringement<sup>345</sup>. The Court rejected the argument that a margin squeeze can be an abuse only if it also amounts to an abusive refusal to supply: such an approach would unduly reduce the effectiveness of Article 102<sup>346</sup>.

## (B) EU law

### (i) *Deutsche Telekom*

In *Deutsche Telekom* the Commission imposed a fine of €12.6 million on Deutsche Telekom ('DT') for imposing a margin squeeze in relation to access to its local networks<sup>347</sup>. DT had a dominant position in relation to the so-called 'local loop', that is to say the final section of the telecommunications network that connects a customer's premises to the local switching point. DT provided retail services over the local loop to its own customers, but also made wholesale capacity available to operators that would themselves like to provide retail services. The Commission said that by charging retail prices which were less than DT's wholesale prices DT was guilty of an abusive margin squeeze<sup>348</sup>. The Commission also objected to DT subsequently leaving an insufficient margin between its upstream and downstream products<sup>349</sup>. The decision was upheld on appeal to the General Court<sup>350</sup> and to the Court of Justice<sup>351</sup>. The Court held that the approval of DT's wholesale prices by a national regulator did not absolve it of responsibility to comply with Article 102 where it had the scope to adjust its retail prices to end the margin squeeze<sup>352</sup>. After stressing that Article 102 applies only to pricing practices which have exclusionary effects on competitors who are at least as efficient as the dominant firm<sup>353</sup>, the Court concluded that such effects existed in this case<sup>354</sup>.

<sup>341</sup> See *Pacific Bell Telephone Co v linkLine Communications Inc* 555 US 438 (2009); for comment, see the series of essays in the CPI Antitrust Chronicle Apr-09(1), available at [www.competitionpolicyinternational.com](http://www.competitionpolicyinternational.com).

<sup>352</sup> *Ibid*, paras 77–96.

<sup>353</sup> *Ibid*, paras 163–184.

<sup>354</sup> *Ibid*, paras 177–178 and 250–259.

(ii) **TeliaSonera**

In *Konkurrensverket v TeliaSonera*<sup>355</sup> the Swedish competition authority had brought proceedings alleging that TeliaSonera was guilty of a margin squeeze in relation to retail broadband services. The Swedish court sought the opinion of the Court of Justice, under Article 267 TFEU, on the criteria for establishing an abusive margin squeeze. The Court repeated its formulation in *Deutsche Telekom* of the test of when a margin squeeze is an abuse<sup>356</sup>. It also emphasised the need to demonstrate anti-competitive effects<sup>357</sup>. The Court continued by saying that the following factors are generally not relevant when establishing whether a margin squeeze infringes Article 102:

- the absence of any regulatory obligation on the dominant firm to supply the upstream product<sup>358</sup>
- the degree of dominance held<sup>359</sup>
- the absence of a dominant position on the downstream market<sup>360</sup>
- whether the customers to whom the pricing practice is applied are new or existing customers<sup>361</sup>
- the inability to recoup losses<sup>362</sup>
- the fact that the markets involve new as opposed to established technology<sup>363</sup>.

(iii) **The Commission's decisional practice**

In its *Guidance on Article 102 Enforcement Priorities* the Commission discusses its approach to margin squeeze alongside refusal to supply; since the *Guidance* was issued, however, the Court of Justice has established that these practices are legally distinct. Paragraph 80 of the *Guidance* says that the Commission will generally rely on the LRAIC of the dominant firm's downstream operations to determine whether it has squeezed the margin available to an equally efficient competitor. The Commission may use the LRAIC of a downstream competitor in cases where it is not possible to allocate the costs of a vertically-integrated dominant firm<sup>364</sup>; something that is envisaged by paragraph 45 of the Court of Justice's judgment in *TeliaSonera*.

The Commission took action in relation to margin squeezing in *Napier Brown–British Sugar*<sup>365</sup>, *Deutsche Telekom* and *Telefónica*<sup>366</sup>. The *Telefónica* decision is notable as the Commission imposed a fine of €151.8 million on Telefónica for engaging in a margin squeeze in relation to residential broadband access in Spain.

(C) **UK law**<sup>367</sup>

There have been a number of complaints about margin squeezing in the UK, two of which were successful.

<sup>355</sup> Case C-52/09 [2011] ECR I-000, [2011] 4 CMLR 982. <sup>356</sup> *Ibid*, paras 31–35. <sup>357</sup> *Ibid*, paras 60–67.

<sup>358</sup> *Ibid*, paras 47–59. <sup>359</sup> *Ibid*, paras 78–82. <sup>360</sup> *Ibid*, paras 83–89.

<sup>361</sup> *Ibid*, paras 90–95. <sup>362</sup> *Ibid*, paras 96–103. <sup>363</sup> *Ibid*, paras 104–111.

<sup>366</sup> Commission decision of 4 July 2007; see Le Meur, Gurpegui and Vierti 'Margin squeeze in the Spanish broadband market: a rational and profitable strategy' (2007) 3 *Competition Policy Newsletter* 22; the decision is on appeal to the General Court, Case T-336/07 *Telefónica and Telefónica España v Commission*, not yet decided and Case T-398/07 *Spain v Commission*, not yet decided.

<sup>367</sup> *The Application of the Competition Act in the Telecommunications Sector*, OFT 417, February 2000, para 7.26.

### (i) Findings of a margin squeeze

In *Genzyme Ltd*<sup>368</sup> the OFT imposed a fine of £6.8 million on that company for abusing its dominant position in two ways, one of which was to have imposed a margin squeeze<sup>369</sup>. The finding of a margin squeeze was upheld on appeal to the CAT<sup>370</sup>. Genzyme was the producer of a drug, Cerezyme, used in the treatment of Gaucher's disease. Genzyme delivered the drug to patients in their homes; a competitor in the downstream market, Healthcare at Home, provided the same service. Genzyme was found guilty of squeezing the margin available to Healthcare at Home. In September 2005, following protracted but unsuccessful negotiations as to the price that Genzyme should charge for Cerezyme in order to avoid a margin squeeze, the CAT handed down a judgment on remedy<sup>371</sup>. Subsequently Healthcare at Home brought a 'follow-on' action for damages in the CAT<sup>372</sup>. An award of interim damages was made<sup>373</sup>, but the case was settled late in 2006 and the action was withdrawn<sup>374</sup>.

In *Albion Water/Dŵr Cymru* the Court of Appeal<sup>375</sup> upheld a judgment of the CAT overturning a non-infringement decision by OFWAT<sup>376</sup>, and finding that Dŵr Cymru was guilty of margin squeezing<sup>377</sup>.

### (ii) Rejections of complaints about margin squeezes

The OFT concluded that there was no margin squeeze in *Companies House*<sup>378</sup>. In *BSkyB*<sup>379</sup> the OFT investigated complaints that BSkyB was guilty of a margin squeeze by setting its wholesale prices for the provision of premium channels at a level that would mean that distributors with the same efficiency as BSkyB would have to operate at a loss<sup>380</sup>. Following an extensive economic analysis, the conclusion was reached that there were insufficient grounds for believing that there was an abusive margin squeeze.

The Office of Telecommunications ('OFTEL'), and its successor OFCOM, have investigated a number of cases of margin squeezing, and have always reached the conclusion that there was no abuse<sup>381</sup>. In these decisions OFCOM has used various methodologies to determine whether there was a margin squeeze. In each case OFCOM concluded that, even if there was a margin squeeze, there was insufficient evidence of an anti-competitive

effect. In *Investigation into BT's residential broadband pricing*<sup>382</sup> OFCOM conducted a detailed analysis of BT's financial performance and concluded that, while certain measures of profitability indicated that BT's margin on residential broadband products was negative during the relevant period, there was insufficient evidence of an abuse.

## 8. Price Discrimination<sup>383</sup>

This section considers the extent to which price discrimination may infringe Article 102 or the Chapter II prohibition of the Competition Act 1998. The extent to which other types of discrimination, in particular on the grounds of nationality, might lead to an infringement of Article 102 is discussed in chapter 17 on non-pricing abuses<sup>384</sup>.

### (A) The meaning of price discrimination

Price discrimination may be defined as the sale or purchase of different units of a good or service at prices not directly corresponding to differences in the cost of supplying them. There can be discrimination both where different, non-cost-related prices are charged for the sale or purchase of goods or services of the same description and also where identical prices are charged in circumstances in which a difference in the cost of supplying them would justify their differentiation.

There are many costs involved in supplying goods or services which may result in the charging of differentiated yet non-discriminatory prices. For example, apart from the cost of transporting goods, a manufacturer may incur heavier costs where it has to handle a series of small orders from a particular customer rather than a single, annual one. Orders for large quantities of goods may mean that a producer can plan long production runs and achieve economies of scale which lead to lower unit costs. The incidence of different contractual terms and conditions, payment of local taxes and duties, the different costs involved in operating distributorship networks from one area to another, may all explain the charging of different prices. However it can be difficult to determine whether differences in the cost of supplying goods or services justify, objectively, the charging of differentiated prices; and even more difficult to calculate the justifiable differentiation.

It is important to appreciate that price discrimination can be positively beneficial in terms of allocative efficiency, since it may result in an *increase* in output<sup>385</sup>: a theatre might be able to sell 80 per cent of its tickets to the public at £40 each, or alternatively 100 per cent of its tickets by charging 70 per cent of its customers £50 and the remaining 30 per cent £10 each (for example to impoverished students). Through such discrimination more theatre tickets will have been sold than would otherwise have been the case: resources have been more efficiently allocated. A specific example of efficient price discrimination is so-called 'Ramsey pricing'. This

<sup>382</sup> OFCOM decision of 2 November 2010, Section 4; an appeal to the CAT in Case No 1026/2/3/04 *Wanadoo UK plc v OFCOM* which had been adjourned pending the adoption of this decision was subsequently withdrawn: see Order of the CAT of 16 December 2010.

<sup>383</sup> For further reading on price discrimination see Scherer and Ross *Industrial Market Structure and Economic Performance* (Houghton Mifflin, 3rd ed, 1990), ch 13; Motta *Competition Policy: Theory and Practice* (Cambridge University Press, 2004), pp 491–511; O'Donoghue and Padilla *The Law and Economics of Article 82 EC* (Hart Publishing, 2006), ch 11; Van den Bergh and Camesasca *European Competition Law and Economics: A Comparative Perspective* (Sweet & Maxwell, 2nd ed, 2006), pp 254–264; Bishop and Walker *The Economics of EC Competition Law* (Sweet & Maxwell, 3rd ed, 2010), paras 6.29–6.36; Niels, Jenkins and Kavanagh *Economics for Competition Lawyers* (Oxford University Press, 2011), pp 215–223.

<sup>384</sup> See ch 17, 'Non-Pricing Abuses That are Harmful to the Internal Market', pp 711–712.

<sup>385</sup> See eg Schmalensee 'Output and Welfare Implications of Third Degree Price Discrimination' (1981) 71 *American Economic Review* 242.

occurs where a company supplies different products which share common costs<sup>386</sup>. It may be that customers for product A are highly price sensitive, but that customers for product B are not; if customers for product B are charged high prices and customers for product A low ones – that is to say if prices are marked up in inverse proportion to customers' respective price sensitivities – output will be increased and economic efficiency will therefore be maximised. The principle of Ramsey pricing has been accepted by regulators and competition authorities in some sectors<sup>387</sup>, although it was rejected by the UK Competition Commission in its investigation of call-termination charges in the mobile telephony sector<sup>388</sup>.

In practice the allocative effects of discrimination will vary from one market situation to another: the question is ultimately an empirical rather than a theoretical one. There is no case for a *per se* prohibition of price discrimination, even on the part of a dominant firm. It may be that preventing discrimination has the effect of redistributing income from poorer consumers to richer ones<sup>389</sup>. This can be illustrated by imagining what might happen if discrimination is prevented. A producer may charge £10 per widget in a prosperous area and £5 per widget in a poorer one. If this discrimination is prevented the producer may sell at a uniform price of, say, £7 in both areas. It is reasonable to assume that as a result fewer people in the poorer area will buy widgets, and that those that do will pay a higher proportion of their income than those in the prosperous one. The net effect therefore is to transfer wealth from poorer consumers with the result that more prosperous ones will be better off.

## (B) EU law

Article 102(2)(c) specifically gives as an example of abuse:

applying dissimilar conditions to equivalent transactions with other trading parties, thereby placing them at a competitive disadvantage.

Clearly therefore price discrimination may infringe Article 102; so too could other types of discrimination, such as refusals to supply and preferential terms and conditions. Price discrimination may be exploitative of customers, for example where higher prices are charged to 'locked-in' customers unable to switch to alternative suppliers; it can also be harmful to the competitive process, where it leads to a distortion of competition in markets downstream of the dominant undertaking. The case law appears to establish that, in determining whether there is an infringement of Article 102(2)(c), five issues must be addressed:

- does the accused undertaking have a dominant position?
- has the dominant undertaking entered into equivalent transactions with other trading parties?
- is the dominant undertaking guilty of applying dissimilar conditions to equivalent transactions?
- could the discrimination place other trading parties at a competitive disadvantage?
- is there an objective justification for the discrimination?

Each of these requirements will be considered in turn.

<sup>386</sup> On the meaning of common costs see 'Avoidable costs', p 717 above.

<sup>387</sup> See Pflanz 'What Price is Right? Lessons from the UK Calls-to-Mobile Inquiry' (2000) 21 ECLR 147.

<sup>388</sup> See *Mobile phone charges inquiry* Report of 18 February 2003, paras 2.213–2.215, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk); the report was unsuccessfully challenged in *R v Competition Commission, Director General of Telecommunications, ex p T-Mobile (UK) Ltd, Vodafone Ltd, Orange Personal Communication Services Ltd* [2003] EWHC 1555.

<sup>389</sup> See Bishop 'Price Discrimination under Article 86: Political Economy in the European Court' (1981) 44 MLR 282.

**(i) Does the accused undertaking have a dominant position?**

Clearly there can be an infringement of Article 102 only if an undertaking has a dominant position, and this would be in the upstream market; there is no need for the firm to be present, still less dominant, in the downstream market.

**(ii) Has the dominant undertaking entered into equivalent transactions with other trading parties?**

Article 102 does not require that all trading partners of a dominant undertaking must have the benefit of the same prices. According to the formulation in Article 102(2)(c) different treatment must be examined only where compared transactions are 'equivalent'. Factors to be considered in determining whether one transaction is equivalent with another include the nature of the product supplied and the costs of supply. In *United Brands v Commission*<sup>390</sup> the Court of Justice recognised that a dominant firm may charge different prices to reflect the different economic and competitive conditions in the different markets on which it operates<sup>391</sup>. In *Irish Sugar*<sup>392</sup> the Commission found that Irish Sugar had infringed Article 102(2)(c) in several ways, in particular by practising discrimination against sugar packers in Ireland. This part of the decision was upheld on appeal<sup>393</sup>: the General Court rejected the argument that Irish Sugar's dealings with sugar packers were not comparable to those with its other customers<sup>394</sup>. In *Clearstream v Commission* the General Court confirmed the Commission's decision that there had been an infringement of Article 102(2)(c)<sup>395</sup>. The General Court considered that Clearstream had provided equivalent primary clearing and settlement services for cross-border transactions to two groups of comparable customers<sup>396</sup>.

**(iii) Is the dominant undertaking guilty of applying dissimilar conditions to equivalent transactions?**

To amount to an abuse of a dominant position the dominant firm must have applied dissimilar conditions. In *Michelin I*<sup>397</sup> the Court of Justice quashed the Commission's finding of an infringement of Article 102(2)(c), as it was not satisfied that Michelin had applied dissimilar conditions<sup>398</sup>. In *Virgin/British Airways*<sup>399</sup> the Commission concluded that BA was not only guilty of abuse by offering travel agents loyalty rebates; there was discrimination contrary to Article 102(2)(c), since travel agents in the same circumstances received different levels of rebates<sup>400</sup>. This finding was upheld on appeal to the General Court<sup>401</sup> and to the Court of Justice<sup>402</sup>. The General Court of Justice noted that BA's reward scheme led to different rates of commission being applied to an identical amount of revenue generated by the sale of BA tickets by two travel agents, and that

<sup>394</sup> *Ibid*, para 164.

<sup>395</sup> Case T-301/04 *Clearstream Banking AG v Commission* [2009] ECR II-3155, [2009] 5 CMLR 2677.

<sup>396</sup> *Ibid*, paras 169–190.

<sup>397</sup> OJ [1981] L 353/33, [1982] 1 CMLR 643.

<sup>398</sup> Case 322/81 [1983] ECR 3461, [1985] 1 CMLR 282, paras 87–91.

<sup>399</sup> OJ [2000] L 30/1, [2000] 4 CMLR 999.

<sup>400</sup> *Ibid*, paras 108–111.

<sup>401</sup> Case T-219/99 *British Airways plc v Commission* [2003] ECR II-5917, [2004] 4 CMLR 1008, paras 233–240.

<sup>402</sup> Case C-95/04 P *British Airways plc v Commission* [2007] ECR I-2331, [2007] 4 CMLR 982, paras 133–141.

this distorted the level of remuneration received by them<sup>403</sup>. In the General Court's view the Commission was right to hold that BA's reward schemes were abusive:

in that they produced discriminatory effects within the network of travel agents established in the UK, thereby inflicting on some of them a competitive disadvantage within the meaning of subparagraph (c) of the second paragraph of Article [102 TFEU]<sup>404</sup>.

In *Portuguese Airports*<sup>405</sup> the Commission adopted a decision establishing that Portugal was in breach of Article 106 read in conjunction with Article 102 in respect of a system of discounts on landing charges at the airports of Lisbon, Oporto, Faro and the Azores. Discounts were offered to airlines according to the number of flights that landed at Portuguese airports. As a result of this discounting structure Portuguese airlines enjoyed the highest discounts on their flights; airlines from beyond the Iberian peninsular received meagre discounts. On appeal the Court of Justice acknowledged that quantity discounts linked solely to the volume of purchases may be permissible, but said that the rules for calculating the discounts must not result in the application of dissimilar conditions to equivalent transactions contrary to Article 102(2)(c)<sup>406</sup>. It went on to say that:

where, as a result of the thresholds of the various discount bands, and the levels of discount offered, discounts (or additional discounts) are enjoyed by only some trading parties, giving them an economic advantage which is not justified by the volume of business they bring or by any economies of scale they allow the supplier to make compared with their competitors, a system of quantity discounts leads to the application of dissimilar conditions to equivalent transactions.

In the absence of any objective justification, having a high threshold in the system which can only be met by a few particularly large partners of the undertaking occupying a dominant position, or the absence of linear progression in the increase of the quantity discounts, may constitute evidence of such discriminatory treatment<sup>407</sup>.

The Court of Justice noted that the highest discount rate was enjoyed only by the two Portuguese airlines, that the discount rate was greatest for the highest band and that the airports concerned enjoyed a natural monopoly; it concluded that in these circumstances the discounts were discriminatory<sup>408</sup>.

#### (iv) Could the discrimination place other trading parties at a competitive disadvantage?

The wording of Article 102(2)(c) specifically requires that one component of the abuse is the infliction of 'competitive disadvantage'<sup>409</sup>. In some cases little attention was given to this issue. In *Corsica Ferries*<sup>410</sup> the Court of Justice said that Article 102(2)(c) applied to 'dissimilar conditions to equivalent transactions with trading partners', without mentioning

<sup>403</sup> Case T-219/99 *British Airways plc v Commission* [2003] ECR II-5971, [2004] 4 CMLR 1008, paras 235–236.

<sup>404</sup> *Ibid*, para 240.

<sup>405</sup> OJ [1999] L 69/31, [1999] 5 CMLR 103, paras 24–40; Article 102(2)(c) has been applied to discriminatory practices at a number of EU airports: see eg *Alpha Flight Services/Aéroports de Paris* OJ [1998] L 230/10, [2001] 4 CMLR 611, upheld on appeal Case T-128/98 [2000] ECR II-3929, [2001] 4 CMLR 1376, upheld on appeal Case C-82/01 P [2002] ECR I-9297, [2003] 4 CMLR 609; *Brussels National Airport (Zaventem)* OJ [1995] L 216/8, [1996] 4 CMLR 232, paras 12–18; *Imailulaitos/Luftfartsverket* OJ [1999] L 69/24, [1999] 5 CMLR 90, paras 38–56; *Spanish Airports* OJ [2000] L 208/36, [2000] 5 CMLR 967, paras 45–56.

<sup>406</sup> Case C-163/99 *Portugal v Commission* [2001] ECR I-2613, [2002] 4 CMLR 1319, para 50.

<sup>407</sup> *Ibid*, paras 52–53.

<sup>408</sup> *Ibid*, paras 54–57.

<sup>409</sup> See Case 85/76 *Hoffmann-La Roche v Commission* [1979] ECR 461, [1979] 3 CMLR 211, paras 122–123 (specifically finding competitive disadvantage).

<sup>410</sup> Case C-18/93 *Corsica Ferries Italia Srl v Corporazione dei Piloti del Porto di Genoa* [1994] ECR I-1783.

the requirement of competitive disadvantage at all<sup>411</sup>. In the Commission's decisions on EU airports<sup>412</sup> scant attention was given to the need for competitive disadvantage. The same was true in *Deutsche Post AG – Interception of cross-border mail*<sup>413</sup>. It may be that this element of the offence will be applied in a particularly liberal manner where, as in those decisions and as in *Corsica Ferries*, the discrimination is practised on national lines, to the detriment (though not the competitive disadvantage) of undertakings in other Member States.

In *British Airways v Commission*<sup>414</sup> the Court of Justice gave some consideration to the requirement of competitive disadvantage in Article 102(2)(c)<sup>415</sup>. The Court of Justice was explicit that it is necessary in a case under this provision to show that competition is distorted: the distortion may be between the suppliers or between the customers of the dominant undertaking<sup>416</sup>. There must be a finding that the discriminatory behaviour in question:

tends to distort that competitive relationship, in other words to hinder the competitive position of some of the business partners of that undertaking in relation to others<sup>417</sup>.

The Court of Justice held that it is sufficient that the behaviour 'tends' to distort competition; there is no need to adduce evidence of an actual quantifiable deterioration in the competitive position of the business partners taken individually<sup>418</sup>. The Court of Justice concluded that the General Court had sufficiently satisfied itself that the test of Article 102(2)(c) was met<sup>419</sup>.

In *Clearstream v Commission*<sup>420</sup> the General Court concluded that the discrimination against a trading partner continuously over a period of five years 'could not fail' to cause that partner a competitive disadvantage<sup>421</sup>.

#### (v) Is there an objective justification for the discrimination?

A dominant firm may be able successfully to argue that discrimination is objectively justified or enhances efficiency. As already noted, differential pricing may increase a dominant firm's output and enable customers to obtain a product which they might not otherwise be able to afford. The Court of Justice concluded in *Portugal v Commission* that Portugal had failed to show any objective justification for its discriminatory discounts<sup>422</sup>.

### (C) UK law

In *BT/BSkyB broadband promotion*<sup>423</sup> OFTEL concluded that any discrimination on BT's part in relation to the promotion of its broadband services did not have a material effect on competition, and in *BT TotalCare*<sup>424</sup> OFTEL rejected an allegation that BT had been guilty of discrimination towards it in relation to the provision of certain broadband services.

In *English Welsh & Scottish Railway*<sup>425</sup> the ORR found that EW&S had abused its dominant position in a number of ways, including by discriminating between customers<sup>426</sup>.

<sup>411</sup> Ibid, para 43. <sup>412</sup> See ch 18 n 405 above.

<sup>413</sup> OJ [2001] L 331/40, [2002] 4 CMLR 598, paras 121–134.

<sup>414</sup> Case C-95/04 P *British Airways plc v Commission* [2007] ECR I-2331, [2007] 4 CMLR 982.

<sup>415</sup> Ibid, paras 142–148. <sup>416</sup> Ibid, para 143. <sup>417</sup> Ibid, para 144.

<sup>418</sup> Ibid, para 145.

<sup>419</sup> Ibid, paras 146–148; see also paras 104–112 of the Opinion of Advocate General Kokott given on 14 April 2011 in Case C-109/10 P *Solvay SA v Commission* which criticises the General Court for failing to analyse the competitive relationships between Solvay's customers.

<sup>420</sup> Case T-301/04 [2009] ECR II-3155, [2009] 5 CMLR 2677. <sup>421</sup> Ibid, para 194.

<sup>422</sup> Case C-163/99 [2001] ECR I-2613, [2002] 4 CMLR 1319, paras 67–78.

<sup>423</sup> OFTEL decision of 19 May 2003. <sup>424</sup> OFTEL decision of 10 June 2003.

<sup>425</sup> ORR decision of 17 November 2006 [2007] UKCLR 937. <sup>426</sup> See Part IIB of the decision.

In *Purple Parking v Heathrow Airport*<sup>427</sup> the High Court concluded that Heathrow Airport was guilty of abusive discrimination in relation to the provision by it of access to the forecourts of Terminals 1, 3 and 5.

## 9. Pricing Practices that are Harmful to the Single Market

The Commission and the EU Courts will condemn pricing practices on the part of dominant firms that are harmful to the single market<sup>428</sup>. High prices that are charged in order to prevent parallel imports will infringe Article 102.

### (A) Excessive pricing that impedes parallel imports and exports

In *BL*<sup>429</sup> the Commission condemned that firm for charging £150 to any importer of BL cars from the continent requiring a type-approval certificate to enable the cars to be driven in the UK. The interest of this case is that the purpose of the excessive pricing was not to exploit a monopoly situation by earning excessive profits, but to impede parallel imports into the UK: the Commission's action was motivated by single-market considerations, and not by a desire to establish itself as a price regulator; the circumstances in the *General Motors* case were the same<sup>430</sup>. The Commission's decision in *BL* was upheld on appeal by the Court of Justice, which accepted that the price charged by BL was disproportionate to the value of the service provided<sup>431</sup>. In *Deutsche Post AG – Interception of cross-border mail*<sup>432</sup> the Commission decided that, by charging an excessive amount for the onward transmission of cross-border mail, Deutsche Post was preventing users of the mail system from taking advantage of the developing single market for postal services.

### (B) Geographic price discrimination

In *United Brands v Commission*<sup>433</sup> the Court of Justice held that UBC had abused its dominant position by charging different prices for its bananas according to the Member State of their destination. It sold bananas to distributors/ripeners at Rotterdam and Bremerhaven, and charged the lowest price for bananas destined for Ireland and the highest for those going to West Germany. The different prices were not based on differences in costs: in fact transport to Ireland, for which UBC itself paid, cost more than to other countries so that, if anything, prices should have been higher there. UBC was also condemned for including clauses in contracts with distributors which had the effect of preventing parallel imports from one country to another by prohibiting the export of unripened bananas<sup>434</sup>.

<sup>427</sup> [2011] EWHC 987, [2011] UKCLR 492.

<sup>428</sup> See eg Case 7/82 *GVL v Commission* [1983] ECR 483, [1983] 3 CMLR 645.

<sup>429</sup> OJ [1984] L 207/11, [1984] 3 CMLR 92.

<sup>430</sup> OJ [1975] L 29/14, [1975] 1 CMLR D20, annulled on appeal for want of evidence Case 26/75 *General Motors v Commission* [1975] ECR 1367, [1976] 1 CMLR 95.

<sup>431</sup> Case 226/84 [1986] ECR 3263, [1987] 1 CMLR 185.

<sup>432</sup> OJ [2001] L 331/40, [2002] 4 CMLR 598.

<sup>433</sup> Case 27/76 [1978] ECR 207, [1978] 1 CMLR 429.

<sup>434</sup> See ch 17, 'Non-Pricing Abuses That are Harmful to the Internal Market', pp 711–712.

The decision is curious<sup>435</sup>. UBC claimed that it was being required to achieve a common market by adopting a uniform pricing policy for all Member States and that this was an unreasonable requirement on the part of the Commission. The Court of Justice retorted that it was permissible for a supplier to charge whatever local conditions of supply and demand dictate, that is to say that there is no obligation to charge a uniform price throughout the EU. However it added that the equation of supply with demand could be taken into account only at the level of the market at which a supplier operates. In *United Brands* this would mean that only a retailer in a given Member State could consider what price the market could bear; UBC could not do so since it did not sell bananas at retail level in Member States: it supplied distributors/ripeners at Rotterdam and Bremerhaven. In the Court of Justice's view, therefore, it was entitled to take into account local market conditions only 'to a limited extent'. The reasoning has been questioned: supply and demand at retail level would inevitably exert a backward influence on UBC, and anyway it, rather than retailers, employed the staff who carried out market research and monitored the level of demand throughout the EU. A different criticism of the case is that the judgment could have undesirable redistributive effects. The logical response of UBC would be to charge a uniform price higher than that in Ireland but lower than that in Germany; it would seem therefore that the judgment would benefit the Germans at the expense of the Irish. It is therefore arguable that the discrimination in *United Brands* should not have been condemned; the practice which was rightly found to be abusive was the prohibition on the export of unripened (green) bananas, since this is what had the effect of harming the single market. In the absence of this practice, bananas could have moved from low- to high-priced parts of the EU.

The Commission also condemned geographical price discrimination in *Tetra Pak II*<sup>436</sup>. The Commission's view was that the relevant geographic market was the EU as a whole, and yet Tetra Pak had charged prices that varied considerably from one Member State to another. The Commission said that the price differences could not be explained in economic terms and lacked objective justification. They were possible because of Tetra Pak's policy of market compartmentalisation which it maintained by virtue of its other abusive practices.

### (C) Rebates that impede imports and exports

The Commission will condemn rebates and similar practices which have the effect of impeding imports and exports. Pricing practices that were intended to dissuade customers from importing from other Member States were held to be abusive in *Plasterboard*<sup>437</sup> and in *Michelin II*<sup>438</sup>. The Commission's decision in *Irish Sugar*<sup>439</sup> was prompted by single market considerations. Irish Sugar had a share of the Irish sugar market in excess of 90 per cent and was found to have acted abusively by seeking to restrict competition from other Member States. In particular Irish Sugar was found to have offered selectively low

<sup>435</sup> For criticism see Bishop 'Price Discrimination under Article 86: Political Economy in the European Court' (1981) 44 MLR 282; Zanon 'Price Discrimination under Article 86 of the EEC Treaty: the *United Brands Case*' (1982) 31 ICLQ 36.

<sup>439</sup> OJ [1997] L 258/1, [1997] 5 CMLR 666.

prices to customers of an importer of French sugar and to have offered 'border rebates' to customers close to the border with Northern Ireland and who were therefore in a position to purchase cheaper sugar from the UK. On appeal to the General Court the Court annulled the former finding<sup>440</sup>, but agreed that the border rebates were unlawful<sup>441</sup>. The General Court stressed the importance in EU competition law of the competitive influence on one national market from neighbouring markets, the very essence of an internal market<sup>442</sup>.

2. Licences of Intellectual Property Rights: Article 101	770	6. UK Law	806
3. Technology Transfer Agreements: Regulation 772/2004	781		
4. The Application of Article 101 to Other Agreements Relating to Intellectual Property Rights	791		

This chapter considers the relationship between intellectual property rights and competition law. After a brief introduction, section 2 will deal in general terms with the application of Article 101 to licences of intellectual property rights; section 3 will examine the provisions of Regulation 772/2004<sup>1</sup>, the block exemption for technology transfer agreements. Section 4 will consider the application of Article 101 to various other agreements concerning intellectual property rights such as technology pools and settlements of litigation. This will be followed by a section on the possible application of Article 102 to the way in which dominant undertakings exercise their intellectual property rights, including an examination of the controversial subject of refusals to license intellectual property rights which are sometimes found to be abusive. Section 6 of this chapter will look at the position in UK law.

### 1. Introduction

#### (A) Definitions

It is not possible to deal with the substantive law of intellectual property here in detail<sup>2</sup>. For present purposes the term ‘intellectual property’ includes patents, registered and

<sup>1</sup> OJ [2004] L 123/11.

<sup>2</sup> For a general account of the law see Bently and Sherman *Intellectual Property Law* (Oxford University Press, 3rd ed, 2008); Torremans and Holyoak *Intellectual Property Law* (Oxford University Press, 6th ed, 2010); Cornish and Llewellyn *Intellectual Property: Patents, Copyrights, Trademarks and Allied Rights* (Sweet & Maxwell, 7th ed, 2010); Cook *EU Intellectual Property Law* (Oxford University Press, 2010); for specific discussion of the relationship between intellectual property rights and EU competition law see Rothnie *Parallel Imports* (Sweet & Maxwell, 1993); Govaere *The Use and Abuse of Intellectual Property Rights in EC Law* (Sweet & Maxwell, 1996); Maher ‘Competition Law and Intellectual Property Rights: Evolving Formalism’ in Craig and de Búrca (eds) *The Evolution of EU Law* (Oxford University Press, 1999); Korah *Intellectual Property Rights and the EC Competition Rules* (Hart Publishing, 2006); *European Competition Law Annual: The Interaction between Competition Law and Intellectual Property Law* (Hart Publishing, 2007, eds Ehlermann and AtanasIU);

unregistered designs, copyrights including computer software, trade marks and analogous rights such as plant breeders' rights. It should also be taken to include know-how, defined for the purpose of the block exemption on technology transfer agreements as 'a package of non-patented practical information, resulting from experience and testing': such information must be secret, substantial and identified in a sufficiently comprehensive manner that it is possible to verify that it is secret and substantial<sup>3</sup>; although not strictly speaking an intellectual property right<sup>4</sup>, know-how may be extremely valuable and may be sold or 'licensed' for considerable amounts of money.

## (B) Intellectual property rights and the single market

Generally speaking intellectual property rights are the product of, and are protected by, national systems of law, although the growth of international commerce has resulted in an increasing measure of international cooperation<sup>5</sup>. The existence of different national laws on intellectual property presents particular difficulties in the European Union in so far as this may be detrimental to the goal of single market integration. The Court of Justice developed the 'exhaustion of rights' doctrine to prevent an undertaking that has consented to the sale of goods on the market within the European Union from using a national intellectual property right to prevent the free movement of those goods around the EU<sup>6</sup>; the exhaustion of rights doctrine does not apply to goods placed on the market outside the EU<sup>7</sup>. Article 118(1) TFEU provides for the creation of European intellectual property rights by the European Parliament and the Council. Various harmonisation measures have been adopted to reduce the differences between different national systems of law; an obvious example is the Trade Mark Directive<sup>8</sup>, implemented in the UK by the Trade Marks Act 1994. The adoption of the 'Community Trade Mark' Regulation<sup>9</sup> takes matters a step further, by creating an intellectual property right that is itself a creature of EU rather than national law; there is also a

'Community Designs' Regulation<sup>10</sup> and there are plans for an enhanced cooperation regime for a unified EU patent<sup>11</sup>. Much of this chapter is concerned with the problem that intellectual property rights may be used in a way that compartmentalises the single market.

### (C) Is there an inevitable tension between intellectual property rights and competition law?

The essential characteristic of intellectual property rights is that they confer upon their owners an exclusive right to behave in a particular way. For example the UK Patents Act 1977 grants the owner of a patent the right to prevent others from producing the patented goods or applying the patented process for a period of 20 years; patents may be granted where a product or process is technically innovative<sup>12</sup>. A patent does not necessarily make the patentee a monopolist in an economic sense: there may be other products that compete with the subject-matter of the patent; however the patent does afford a degree of immunity from the activities of rival firms. The owner of a registered trade mark can prevent anyone else applying that name to goods or services where this would be confusing to consumers.

Because intellectual property rights confer exclusive rights upon their owners on the one hand, whereas competition law strives to keep markets open on the other, it is easy to suppose that there is an inherent tension between these two areas of law and policy<sup>13</sup>. However it has increasingly been recognised that this is simplistic and wrong<sup>14</sup>. As paragraph 7 of the European Commission's *Guidelines on the application of Article [101 TFEU] to technology transfer agreements*<sup>15</sup> ('the *Technology Transfer Guidelines*') says:

Indeed, both bodies of law share the same basic objective of promoting consumer welfare and an efficient allocation of resources. Innovation constitutes an essential and dynamic component of an open and competitive market economy.

Clear statements to the same effect will be found in an invaluable document issued by the Department of Justice and the Federal Trade Commission in the US in April 2007 entitled *Antitrust Enforcement and Intellectual Property Rights: Promoting Innovation and Competition*<sup>16</sup>. It begins with the following very clear statement:

Over the past several decades, antitrust enforcers and the courts have come to recognize that intellectual property laws and antitrust laws share the same fundamental goals of

<sup>10</sup> Regulation 6/2002, OJ [2002] L 3/1.

<sup>11</sup> See the Commission's *Proposal for a Regulation of the European Parliament and of the Council implementing enhanced cooperation in the area of the creation of unitary patent protection*, COM(2011) 215/3, 13 April 2011.

<sup>12</sup> On the law of patents see *Cornish and Llewellyn*, chs 3–7.

<sup>13</sup> For general discussion of the relationship between intellectual property and competition law and policy see the publications cited in ch 19 n 2 above.

<sup>16</sup> This document can be accessed at [www.ftc.gov](http://www.ftc.gov).

enhancing consumer welfare and promoting innovation. This recognition signaled a significant shift from the view that prevailed earlier in the twentieth century, when the goals of antitrust and intellectual property law were viewed as incompatible: intellectual property law's grant of exclusivity was seen as creating monopolies that were in tension with antitrust law's attack on monopoly power. Such generalizations are relegated to the past. Modern understanding of these two disciplines is that intellectual property and antitrust laws work in tandem to bring new and better technologies, products, and services to consumers at lower prices.

Many of the issues discussed in this chapter are analysed in the DoJ/FTC document, which will be cited at various points in the text that follows. In the same spirit as that document, the current block exemption in force in the EU for technology transfer agreements, Regulation 772/2004<sup>17</sup>, and the accompanying *Technology Transfer Guidelines* adopt a much less grudging attitude towards such agreements than used to be the case: indeed recital 5 of the Regulation notes that such agreements 'will usually improve economic efficiency and be pro-competitive'; the same point is made at several points in the *Guidelines*<sup>18</sup>. The complex matter in modern competition policy is to determine at what point, if at all, the exercise of an intellectual property right could be so harmful to consumer welfare that competition law should override the position as it would be on the basis of intellectual property law alone.

## 2. Licences of Intellectual Property Rights: Article 101

### (A) Introduction

A patentee may decide, instead of producing the patented goods or applying the patented process itself, to grant a licence to another firm enabling it to do so. The same may be true of any other intellectual property right. There are many reasons why a firm may choose to grant a licence. A patentee may lack the resources to produce in quantity; it may wish to limit its own production to a particular geographical area and to grant licences for other territories; or it may wish to apply a patented process for one purpose and to allow licensees to use it for others. A patentee may wish to impose various restrictions upon its licensees, for example as to the quantity or quality of goods that may be produced or the price at which they may be sold; these provisions relate to the patentee's own products and so can be restrictive only of intra-technology competition<sup>19</sup>.

The argument for controlling restrictions of intra-technology competition in patent licences is weak. Given that a patentee has an exclusive right to produce and sell the patented goods, it is not obvious why it should not be able to impose whatever restrictions it chooses upon its licensees; the ability to do so is a manifestation of the right conferred by statute. Indeed the grant of a licence can be seen as increasing competition, by introducing a licensee onto the market which, without the licence, would not be there at all; even if the patentee imposes restrictions of intra-technology competition, these are likely to be compensated for by the stimulation of inter-technology competition<sup>20</sup>. However Article 101(1) has been applied to intra-technology restrictions in patent (and other) licences, in particular where they divide the single market: the 'single market imperative' is as influential in this area of EU competition law as it is elsewhere<sup>21</sup>.

<sup>17</sup> OJ [2004] L 123/11.

<sup>18</sup> See eg paras 8, 9, 17 and 146ff.

<sup>19</sup> For discussion of this expression see the *Technology Transfer Guidelines*, paras 11–12.

<sup>20</sup> *Ibid.*

<sup>21</sup> See ch 1, 'The single market imperative', pp 23–24 and ch 2, 'The single market imperative', p 51.

Some terms in patent licences may affect inter-technology competition: examples are tie-in clauses requiring a licensee to acquire particular technology or products solely from the patentee and non-competition clauses forbidding the licensee to compete or to handle technology or products which compete with the patentee's: provisions such as these may foreclose the opportunities of other producers. Objection might be taken to terms which are perceived to be an attempt to extend a patentee's monopoly power beyond the protection afforded to it by the law and/or which might be considered to be oppressive to a person in a weak bargaining position.

## **(B) Typical terms in licences of intellectual property rights**

It will facilitate an understanding of EU law on licensing agreements to have some knowledge of typical clauses that may be found in them. In the absence of legal controls it would be a matter for the parties to the agreement to settle the terms of the licence through the bargaining process. It would be wrong to assume that it is always the patentee that is in the more powerful bargaining position: a patentee may be an individual inventor and his prospective licensee a powerful company, in which case the former's position may be weak.

### **(i) Territorial exclusivity<sup>22</sup>**

In EU law territorial exclusivity is the most critical aspect of licensing agreements because of the overriding determination of the Commission and the EU Courts to prevent the isolation of national markets. A licensee may consider that the risk involved in exploitation of a patent is that the high level of capital investment required is so great that it would not be worth taking a licence at all unless it is given immunity from intra-technology competition from the licensor, other licensees and their customers: these issues have been discussed already in relation to vertical agreements<sup>23</sup>. A licensee will often be taking a greater risk than a 'mere' distributor, since it has to invest in production as well as distribution, and so may require more protection against free riders than a distributor needs. The extent of the exclusivity required will be a calculation for the licensee; the amount actually given, apart from any limiting legal constraints, will be a matter for bargaining between the licensor and licensee.

Often the licensor will grant to the licensee an exclusive right to manufacture and sell the goods in a particular territory and agree to refrain from granting similar rights to anyone else there; in this situation the licensor retains the right to produce the goods in the territory itself: this is known as a 'sole' licence. A sole licence may be distinguished from an 'exclusive' licence, where the licensor also agrees not to produce the goods in the licensee's territory itself; this of course gives the licensee more protection than in the case of a sole licence. The licensee's position may be further reinforced by the licensor agreeing to impose export bans on its other licensees preventing them, or requiring them to prevent their customers, from selling into the licensed territory. Apart from the imposition of export bans, there are indirect ways of achieving the same end: for example a maximum quantities clause can limit the amount that a licensee can produce to the anticipated level of demand on its domestic market. As we shall see, the mere grant of territorial exclusivity in a licence of an intellectual property right does not necessarily infringe Article 101(1); this will depend on the effect that this would have on the market. However, where a licensor grants a licensee absolute territorial protection against any

<sup>22</sup> See further the *Technology Transfer Guidelines*, paras 161–174.

<sup>23</sup> See ch 16, 'Vertical agreements: possible benefits to competition', pp 626–628.

form of intra-technology competition there will almost certainly be an infringement of Article 101(1) and it is unlikely that the terms of Article 101(3) will be satisfied.

**(ii) Royalties<sup>24</sup>**

A licensor will usually require the licensee to pay royalties for use of the patent. The licensee may be required to make lump-sum payments, and in some situations the parties may agree upon a profit-sharing scheme. The licensor may ask for a payment ‘up-front’ before production begins. A licensor may stipulate that the licensee must pay a minimum amount of royalties in a given period in order to encourage it to exploit the patented process.

**(iii) Duration**

A licensor will specify what the duration of the agreement should be. It may decide to grant only a limited licence which will expire before the patent itself, after which it can reconsider its position. On the other hand it may attempt to tie the licensee even after the patent has expired, for example by requiring it to continue to pay royalties or to take licences of newly discovered technology.

**(iv) Field of use restrictions<sup>25</sup>**

A common clause is a ‘field of use’ restriction whereby a licensor limits the licensee’s authority to produce goods to a particular purpose: a chemical protected by a patent may be useful both medicinally and industrially and the licensee could be limited to production for one purpose only. Field of use clauses are normally seen as a reasonable exploitation of the patentee’s position, although the Commission may object where the restriction appears to be partitioning the single market<sup>26</sup>.

**(v) Best endeavours and non-competition clauses<sup>27</sup>**

To ensure that the licensee does exploit the patent (and that the patentee receives adequate royalties) the licensee may be required to produce minimum quantities or to use its best endeavours to do so. A non-competition clause, whereby the licensee is forbidden to compete by using its own or rival technology, may encourage it to concentrate on producing the patented goods, although such a clause may have an anti-competitive foreclosure effect.

**(vi) No-challenge clauses**

The licensor may insist upon a no-challenge clause whereby the licensee agrees not to challenge the validity of the intellectual property right in question. A licensee with intimate knowledge of, say, a patented process may be in the best position to show that it lacks originality, and a licensor may be unwilling to grant a licence at all if it knows that the licensee might undermine its position by successfully applying for the patent to be revoked.

**(vii) Improvements**

A licensor may be fearful that the licensee will build upon the knowledge that becomes available from using the patent and emerge as a strong competitor; it may therefore require

<sup>24</sup> See further the *Technology Transfer Guidelines*, paras 156–160.

<sup>25</sup> *Ibid*, paras 179–185.

<sup>26</sup> See *Windsurfing International* OJ [1983] L 229/1, [1984] 1 CMLR 1, substantially upheld on appeal Case 193/83 *Windsurfing International Inc v Commission* [1986] ECR 611, [1986] 3 CMLR 489.

<sup>27</sup> See *Technology Transfer Guidelines*, paras 196–203.

the licensee to grant back to it any know-how or intellectual property rights acquired and not to grant licences to anyone else. Objection may be taken to this practice if the licensor requires the licensee to grant it exclusive access to such know-how, since this deprives the licensee of the opportunity to pass on the technology to third parties.

**(viii) Tying and bundling<sup>28</sup>**

The licensor may make the licensing of technology conditional upon the licensee taking a licence for another technology or purchasing a product from the licensor or a designated third party; or may bundle two technologies or a technology and a product together. These practices are capable of foreclosing access to the market, but may also lead to economic efficiencies.

**(ix) Prices, terms and conditions**

The licensor may wish to fix the prices at which the licensee sells or the terms and conditions on which it does so. The Commission, however, takes the view that the licensee should be free to determine its own policy when it brings the patented products to the market.

**(C) The application of Article 101(1) to licences of intellectual property rights<sup>29</sup>**

**(i) The Commission's evolving policy in relation to patent licences in the 1960s and 1970s**

In the early 1960s the Commission took the view that most provisions in patent licences did not infringe Article 101(1) at all, since restrictions of intra-brand competition simply emanate from the exclusive right of the patentee. The Commission's *Notice on Patent Licensing Agreements*<sup>30</sup> of 1962 reflected this approach. However the Commission's abstentionist view began to alter towards the end of the decade; the change can be traced back to the judgment of the Court of Justice in *Consten and Grundig v Commission*<sup>31</sup>. There the Court established that vertical agreements could fall within Article 101(1) and, of particular importance in this context, that the use of intellectual property rights could contribute to an infringement where it enabled a distributor to enjoy absolute territorial protection in its allotted territory; in *Consten and Grundig* it was the assignment to Consten of the GINT trade mark for France that enabled Consten to repel parallel imports from other Member States<sup>32</sup>. The distinction drawn by the Court of Justice in this case – between the existence of an intellectual property right on the one hand and its

<sup>28</sup> Ibid, paras 191–195.

<sup>29</sup> See the *Technology Transfer Guidelines*, paras 10–17 and paras 130ff; on the position in the US see the DoJ/FTC *Antitrust Guidelines for the Licensing of Intellectual Property* of 6 April 1995, available at [www.justice.gov](http://www.justice.gov); the *Guidelines* state at para 2.0 that there is no presumption that intellectual property creates market power, a point with which the US Supreme Court agreed in *Illinois Tool Works Inc v Independent Ink Inc* 547 US 28 (2006); the *Guidelines* also say that licences of intellectual property rights are generally pro-competitive; the approach in the *Guidelines*, which suggests that terms in licences should be subject to a 'rule of reason' standard, was endorsed by the DoJ/FTC report on *Antitrust Enforcement and Intellectual Property Rights* of April 2007: see in particular chapter 4 of the report.

<sup>30</sup> JO [1962] 2922; this Notice was withdrawn in 1984, OJ [1984] C 220/14.

<sup>31</sup> Cases 56 and 58/64 [1966] ECR 299, [1966] CMLR 418; for discussion of this case see ch 3, 'Cases in which agreements containing contractual restrictions were found not to have anti-competitive effects', p 128; on the Commission's change of policy see *Anderman*, ch 2.

<sup>32</sup> See ch 3, 'Cases in which agreements containing contractual restrictions were found not to have anti-competitive effects', p 128.

improper exercise on the other – provided the foundation of much of the law in this area including, in particular, the exhaustion of rights doctrine.

In a series of decisions from the early 1970s the Commission applied Article 101(1) to various clauses found in patent licences, and in particular to territorial restrictions, although in some cases it decided<sup>33</sup> that the criteria in Article 101(3) were satisfied<sup>33</sup>. In a series of block exemptions, beginning with Regulation 2349/84 in 1984<sup>34</sup> up until Regulation 240/96 in 1996<sup>35</sup>, the Commission maintained a fairly formalistic approach to the application of Article 101(1), applying that provision to a wide variety of contractual restrictions but then exempting them according to the terms of the relevant Regulation. The latest block exemption, Regulation 772/2004, is noticeably less formalistic and, in conjunction with the *Technology Transfer Guidelines*, provides a more benign treatment of the transfer of technology. The *Technology Transfer Guidelines* explain both the ways in which licences of technology containing restrictive terms may have negative<sup>36</sup> and positive<sup>37</sup> effects on competition.

### (ii) Territorial exclusivity and the *Maize Seeds* case

In many of the decisions referred to above the Commission held that manufacturing and sales licences granting territorial exclusivity to the licensee infringed Article 101(1); it also considered that export bans and provisions having similar effects such as maximum quantities clauses were caught. Having concluded that many patent licences were caught by Article 101(1), the Commission proceeded to grant them block exemption. However, as we have seen in chapter 3, Article 101(1) applies only to agreements ‘which have as their object or effect the prevention, restriction or distortion of competition’<sup>38</sup>. It was explained there that the mere grant of exclusive territorial rights does not have as its object the restriction of competition<sup>39</sup>; such cases infringe Article 101(1), therefore, only where they can be shown to have appreciable effects on competition<sup>40</sup> and on trade between Member States<sup>41</sup>. The reason for the strict treatment of the agreement in *Consten and Grundig v Commission* was that it went beyond the mere grant of exclusive distribution rights in France by conferring upon Consten absolute territorial protection against parallel imports from other Member States. The application of Article 101(1) to territorial exclusivity in licence agreements follows the same contours.

<sup>33</sup> In chronological order the Commission’s decisions on patent licences are *Burroughs AG and Deplanque & Fils Agreement* OJ [1972] L 13/50, [1972] CMLR D67; *Burroughs AG and Geha-Werke GmbH Contract* OJ [1972] L 13/53, [1972] CMLR D72; *Davidson Rubber Co Agreements* OJ [1972] L 143/31, [1972] CMLR D52; *Raymond and Nagoya Rubber Ltd Agreement* OJ [1972] L 143/39, [1972] CMLR D45; *Kabelmetal/Luchaire* OJ [1975] L 222/34, [1975] 2 CMLR D40; *Zuid-Nederlandsche Bronbemaling en Grondboringen BV v Heidemaatschappij Beheer NV* OJ [1975] L 249/27, [1975] 2 CMLR D67; *AOIP v Beyrard* OJ [1976] L 6/8, [1976] 1 CMLR D14; *Vaessen BV v Moris* OJ [1979] L 19/32, [1979] 1 CMLR 511; *IMA AG Windsurfing International Inc* OJ [1983] L 229/1, [1984] 1 CMLR 1, substantially upheld on appeal Case 193/83 *Windsurfing International Inc v Commission* [1986] ECR 611, [1986] 3 CMLR 489; *Velcro/Aplix* OJ [1985] L 233/22, [1989] 4 CMLR 157; the Commission has reached decisions on other types of licences in which it has applied similar principles: see below.

<sup>34</sup> OJ [1984] L 219/15.

<sup>35</sup> OJ [1996] L 31/2, [1996] 4 CMLR 405.

<sup>36</sup> *Technology transfer guidelines*, paras 141–145.

<sup>37</sup> *Ibid*, paras 146–152.

<sup>38</sup> See ch 3, ‘The “object or effect” of preventing, restricting or distorting competition’, pp 117ff.

<sup>39</sup> See ch 3, ‘Cases in which agreements containing contractual restrictions were found not to have anti-competitive effects’, p 128; see in particular the discussion of Case 56/65 *Société Technique Minière v Maschinenbau Ulm* [1966] ECR 235, [1966] CMLR 357.

<sup>40</sup> See ch 3, ‘The *De Minimis* Doctrine’, pp 140–144.

<sup>41</sup> On the requirement for an appreciable effect on trade between Member States see ch 3, ‘The Effect on Trade Between Member States’, pp 144–149.

The first case on the licensing of intellectual property rights to come before the Court of Justice was *Nungesser v Commission*<sup>42</sup> (often referred to as the *Maize Seeds* case). One issue for the Court was whether an exclusive licence of plant breeders' rights<sup>43</sup> by its very nature infringed Article 101(1): in other words, whether such agreements had as their object the restriction of competition<sup>44</sup>. The Court distinguished between an 'open exclusive licence', whereby a licensor agrees not to license anyone else in the licensee's territory, and not to compete there itself; and an exclusive licence which confers absolute territorial protection, so that all competition from third parties is eliminated<sup>45</sup>. This, of course, is the difference between the facts of *Société Technique Minière v Maschinenbau Ulm*<sup>46</sup> and *Consten and Grundig v Commission*. As to the open exclusive licence, the Court of Justice noted that a licensee of new technology might be deterred from accepting the risk of cultivating and marketing a new product unless it knew that it would not encounter intra-technology competition from other licensees in its territory<sup>47</sup>. It followed that an open licence which does not affect the position of third parties such as parallel importers does not have as its object the restriction of competition; a detailed analysis would be required to determine the effects of the agreement<sup>48</sup>. Absolute territorial protection however would be caught by Article 101(1)<sup>49</sup> and did not benefit from Article 101(3)<sup>50</sup>.

The *Maize Seeds* judgment showed some sensitivity to the commercial and economic context of licensing agreements. It means that open exclusivity does not necessarily infringe Article 101(1); in particular where a licensee accepts risk and markets a new product the licence would not be caught.

### (iii) The case law of the EU Courts on territorial exclusivity after *Maize Seeds*

In chapter 3 we have seen that the Court of Justice has, in a number of judgments, refrained from concluding too readily that agreements containing contractual restrictions necessarily restrict competition: these two ideas should not be confused with one another<sup>51</sup>. Some agreements – for example to fix prices or to share markets – are so obviously reprehensible that they are considered to have as their object the restriction of competition<sup>52</sup>; other agreements, however, infringe Article 101(1) only where it can be demonstrated that they will produce appreciable anti-competitive effects on the market<sup>53</sup>. In various judgments since *Maize Seeds* the Court of Justice has concluded that provisions involving territorial exclusivity did not infringe Article 101(1). In *Coditel v Ciné Vog Films*<sup>54</sup> the Court acknowledged that, in the special circumstances of a performance

<sup>42</sup> Case 258/78 [1982] ECR 2015, [1983] 1 CMLR 278.

<sup>43</sup> Plant breeders' rights are analogous to patents.

<sup>53</sup> See ch 3, 'Agreements that have as their effect the prevention, restriction or distortion of competition', pp 121–125.

<sup>54</sup> Case 262/81 [1982] ECR 3381, [1983] 1 CMLR 49.

copyright, a licensee may need absolute territorial protection from re-transmissions of films from neighbouring Member States. In *Louis Erauw-Jacquery Sprl v La Hesbignonne Société*<sup>55</sup> the Court held that a prohibition on the export of so-called ‘basic seeds’ did not infringe Article 101(1), but rather was a manifestation of Erauw-Jacquery’s plant breeders’ rights and necessary for their protection<sup>56</sup>. In *Pronuptia de Paris v Schilligalis*<sup>57</sup> the Court suggested that the grant of exclusive territorial rights to a franchisee for a particular territory might not infringe Article 101(1) where the business name or symbol of the franchise was not well known<sup>58</sup>.

Collectively these cases demonstrate that it is wrong to assume that all territorial exclusivity in licences of intellectual property rights infringes Article 101(1); a more nuanced approach is required than this, and even absolute territorial protection and export bans may not infringe Article 101(1) in particular circumstances.

#### (iv) Non-territorial restrictions caught by Article 101(1)

The Commission’s decisions have sometimes applied Article 101(1) to non-territorial restrictions in licences of intellectual property rights, as have some judgments of the EU Courts, in particular the judgment of the Court of Justice in *Windsurfing International Inc v Commission*<sup>59</sup>. The treatment of non-territorial restrictions will be considered below in the context of Articles 4 and 5 of Regulation 772/2004<sup>60</sup>.

#### (v) Know-how licences

The Commission applied the principles that it had developed in its decisions on patent licences to licences of know-how<sup>61</sup>. This culminated in the adoption of Regulation 556/89<sup>62</sup> granting block exemption to know-how licences. As was noted at the beginning of this chapter, know-how is not an intellectual property right as such: it is protected by the law of obligations. An anxiety for the Commission was that spurious claims to exclusivity might be made for agreements that do not in practice improve economic efficiency; this is why successive block exemption regulations have stipulated that know-how must be secret and substantial<sup>63</sup>. In practice the licensing of know-how is as important and as common as patent licensing, so that the extension of the protection of block exemption to this category of agreements was important for industry.

#### (vi) Copyright licences

There is not a great deal of authority specifically on the application of Article 101(1) or Article 101(3) to copyright licences. As we have seen, the Court of Justice held that

<sup>55</sup> Case 27/87 [1988] ECR 1919, [1988] 4 CMLR 576.

<sup>56</sup> See ‘Licences of plant breeders’ rights’, pp 779–780 below.

<sup>57</sup> Case 161/84 [1986] ECR 353, [1986] 1 CMLR 414.

<sup>58</sup> [1986] ECR 353, [1986] 1 CMLR 414, para 24.

<sup>59</sup> Case 193/83 [1986] ECR 611, [1986] 3 CMLR 489.

<sup>60</sup> See ‘Article 4: hard-core restrictions’, pp 786–789 below.

<sup>61</sup> In chronological order the Commission’s decisions on know-how licences are *Bousois/Interpane* OJ [1987] L 50/30, [1988] 4 CMLR 124; *Mitchell Cotts/Sofitra* OJ [1987] L 41/31, [1988] 4 CMLR 111; *Rich Products/Jus-Rol* OJ [1988] L 69/21, [1988] 4 CMLR 527; *Delta Chemie/DDD Ltd* OJ [1988] L 309/34, [1989] 4 CMLR 535; see also *ICL/Fujitsu XVth Report on Competition Policy* (1986), point 72 (case dealt with by comfort letter).

<sup>62</sup> Corrected version at OJ [1990] L 257/15; this Regulation was replaced by Regulation 240/96, which in turn has been replaced by Regulation 772/2004: see ‘Technology Transfer Agreements: Regulation 772/2004’, pp 781–791 below.

<sup>63</sup> See now Regulation 772/2004, Article 1(1)(i).

absolute territorial protection was not contrary to Article 101(1) in the specific context of a performance copyright in *Coditel v Ciné Vog Films*<sup>64</sup>. However in *Football Association Premier League Ltd v QC Leisure*<sup>65</sup> the Court of Justice concluded that the terms of the English Premier League's licences with foreign broadcasters, which prohibited the import into the UK from Greece of satellite broadcasts of live Premier League soccer games, conferred absolute territorial protection contrary to Article 101(1) and did not benefit from Article 101(3)<sup>66</sup>.

The Commission has taken action in relation to copyright licences on a few occasions and in doing so it has applied the principles developed in relation to patent and know-how licences. In *Neilson-Hordell/Reichmark*<sup>67</sup> the Commission gave details of its objections to clauses in a licence of technical drawings and the products they represent; in particular it required the abandonment of a no-challenge clause, a royalties clause extending to products not protected by any copyright of the licensor, a non-competition clause which was to continue after the agreement and an exclusive grant-back to the licensor of the improvements. In *Ernest Benn Ltd*<sup>68</sup> the Commission took objection to a standard contractual term which prevented the export of books from the UK. In *Knoll/Hille-Form*<sup>69</sup> the Commission intervened in the case of an exclusive licence of a design right relating to furniture and closed its file after the parties agreed to remove export bans and to allow direct sales into each other's territories.

In *Film Purchases by German Television Stations*<sup>70</sup> the Commission investigated exclusive licence agreements entered into between MGM/UA, a major US film production and distribution company, and ARD, an association of public broadcasting organisations in Germany. The agreements granted ARD exclusive television rights to a large number of MGM/UA's feature films in most cases for a period of 15 years. The Commission's view was that the agreements restricted competition, in particular because of the large number of the licensed rights and the duration of the exclusivity<sup>71</sup>. However the Commission decided that the criteria of Article 101(3) were satisfied following modifications to the agreements, for example so that ARD would license the films to third parties at certain periods known as 'windows'.

There is no specific block exemption for copyright licences, although it may be possible to take the benefit of Regulation 330/2010 on vertical agreements or of Regulation 772/2004 on technology transfer agreements where the licensing of copyright is ancillary to an agreement covered by one of those Regulations<sup>72</sup>. The Commission will as a general rule apply the principles set out in Regulation 772/2004 to copyright licences<sup>73</sup>, although not necessarily in the case of performance copyright<sup>74</sup>.

<sup>64</sup> Case 262/81 [1982] ECR 3381, [1983] 1 CMLR 49; see 'The case law of the EU Courts on territorial exclusivity after *Maize Seeds*', pp 775–776 above.

<sup>71</sup> OJ [1989] L 284/36, [1990] 4 CMLR 841, paras 41–46.

<sup>72</sup> See 'Article 1: definitions', p 782 below. <sup>73</sup> *Technology Transfer Guidelines*, para 51.

<sup>74</sup> *Ibid*, para 52.

**(vii) Software licences**<sup>75</sup>

In *Sega and Nintendo*<sup>76</sup> the Commission required the deletion of clauses in licences of computer software with publishers of video games which, in the Commission's view, enabled Sega and Nintendo to control the market for video games<sup>77</sup>. In *Microsoft Internet Explorer*<sup>78</sup> the Commission required Microsoft to remove clauses from its software licences providing for minimum distribution volumes for its Internet Explorer browser technology and imposing a prohibition on advertising competitors' browser technology. A minimum quantities clause is normally considered not to be restrictive of competition at all; the Commission's concern here, however, was that the two clauses in question could have a foreclosure effect on competitors. A comfort letter was sent after these amendments had been made; the Commission did not give a ruling on whether Microsoft's behaviour overall might amount to an abuse of a dominant position<sup>79</sup>. Microsoft's refusal to make interoperability information, assumed to be protected by intellectual property rights, available to third party competitors was found to be an abuse of a dominant position in March 2004<sup>80</sup>.

There are some typical clauses in software licences which have no analogies in the general law, for example prohibiting decompilation of a computer program and restrictions on copying<sup>81</sup>. Software licences are now covered by the Technology Transfer Regulation<sup>82</sup>.

**(viii) Trade mark licences**<sup>83</sup>

The Commission has applied Article 101(1) to exclusive trade mark licences but decided that, where there was no absolute territorial protection, the criteria of Article 101(3) were satisfied. In *Davide CampariMilano SpA Agreement*<sup>84</sup> the Commission considered that Article 101(3) applied in the case of a standard form of agreement whereby firms were licensed to use the Campari trade mark and were given exclusive rights in their own territory to apply that mark and required not to pursue an active sales policy elsewhere.

In *Moosehead/Whitbread*<sup>85</sup> an exclusive licence of a trade mark with associated know-how was investigated by the Commission. The licensee wished to manufacture and to promote the Moosehead brand, a popular Canadian beer, in the UK. The licence prohibited active selling outside the UK. The Commission concluded that the exclusive trade mark and

<sup>75</sup> See Forrester 'Software Licensing in the Light of Current EC Competition Law Considerations' (1992) 13 ECLR 5; Darbyshire 'Computer Programs and Competition Policy: A Block Exemption for Software Licensing?' (1994) 16 EIPR 374.

<sup>77</sup> Cm 2781 (1995).

<sup>78</sup> See the Commission's XXIXth *Report on Competition Policy* (1999), points 55 and 56 and p 162: details of Microsoft's notification in this case can be found at OJ [1998] C 175/3; for a separate investigation of Microsoft's licensing terms, following a complaint by Santa Cruz Operation in relation to the UNIX operating system, see the Commission's XXVIIth *Report on Competition Policy* (1997), point 79 and pp 140–141.

<sup>79</sup> Commission's XXIXth *Report on Competition Policy* (1999), point 56.

<sup>80</sup> See 'The *Microsoft* case', pp 800–802 below.

<sup>81</sup> It may be arguable that, by analogy from the *Erauw-Jacquery* judgment on the propagation of seeds, a restriction on copying software is outside Article 101(1).

<sup>82</sup> See 'Article 1: definitions', p 782 below.

<sup>83</sup> See Joliet 'Territorial and Exclusive Trade Mark Licensing under the EC Law of Competition' [1984] IIC 21.

<sup>84</sup> OJ [1978] L 70/69, [1978] 2 CMLR 397; see similarly *Goodyear Italiana SpA's Application* OJ [1975] L 38/10, [1975] 1 CMLR D31.

<sup>85</sup> OJ [1990] L 100/32, [1991] 4 CMLR 391; see Subiotto '*Moosehead/Whitebread*: Industrial Franchises and No-challenge Clauses Relating to Licensed Trade Marks in the EEC' (1990) 11 ECLR 226.

the restriction on active sales infringed Article 101(1), as did a non-competition clause<sup>86</sup>. The know-how was considered by the Commission to be ancillary to the trade mark, so that the block exemption for know-how licensing in force at that time, Regulation 556/89, was not applicable<sup>87</sup>; presumably the same conclusion would be reached under Regulation 772/2004<sup>88</sup>. However the Commission decided that Article 101(3) applied to the agreement as consumers would have the benefit of another beer from which to choose<sup>89</sup>. The agreement contained a no-challenge clause in respect of the trade mark, but the Commission held this to be outside Article 101(1) because the mark was not well known and its non-availability to competitors was not a barrier to entry<sup>90</sup>.

Where a trade mark is ancillary to a vertical agreement or to a technology transfer agreement, it may benefit from the block exemption conferred by Regulation 330/2010 or Regulation 772/2004<sup>91</sup>.

### (ix) Licences of plant breeders' rights

In *Louis Erauw-Jacquery Sprl v La Hesbignonne Société*<sup>92</sup> the Court of Justice was asked to rule on the application of Article 101(1) to two clauses in a licence for the propagation and sale of certain varieties of cereal seeds. Erauw-Jacquery had licensed La Hesbignonne to propagate 'basic seeds' and to sell seeds reproduced from them ('reproductive seeds'). Clause 2(f) of the licence prohibited the export of basic seeds; clause 2(i) required the licensee not to resell the reproductive seeds below minimum selling prices. The Court's view was that the export ban in relation to basic seeds did not infringe Article 101(1): a plant breeder is entitled to reserve the propagation of basic seeds to institutions approved by him and an export ban is objectively justifiable to protect this right<sup>93</sup>. Basic seeds are not intended for sale to farmers for sowing, but are intended solely for the purpose of propagation; it follows that an export ban of this kind arises from the existence of the plant breeders' rights and is not an improper exercise of it<sup>94</sup>. The Court concluded that the provision on minimum pricing for reproductive seeds had as its object and effect the restriction of competition<sup>95</sup> but that the national court must decide on the facts whether it had an effect on trade between Member States<sup>96</sup>.

In *Sicasov*<sup>97</sup> the Commission applied the Court's judgment in the *Erauw-Jacquery* case to the standard licences of Sicasov, a French cooperative of plant breeders. The Commission explains in more detail than the judgment in *Erauw-Jacquery* the distinction between basic seeds, which are intended only for propagation, and 'certified' seeds, intended for sale to farmers for sowing<sup>98</sup>. The breeder is entitled to control the destination of basic seeds by virtue of its plant breeders' rights<sup>99</sup>, but cannot control certified seeds that have been put onto the market with its consent<sup>100</sup>. It followed that obligations not to entrust basic seeds to a third party, not to export them and related provisions did not infringe Article 101(1)<sup>101</sup>.

<sup>86</sup> OJ [1990] L 100/32, [1991] 4 CMLR 391, para 15(1).

<sup>87</sup> *Ibid.*, para 16(1); a corrected version of Regulation 556/89 will be found at OJ [1990] L 257/15.

<sup>88</sup> See 'Article 1: definitions', p 782 below.

<sup>89</sup> OJ [1990] L 100/32, [1991] 4 CMLR 391, para 15(2). <sup>90</sup> *Ibid.*, para 15(4).

<sup>91</sup> See 'Article 1: definitions', p 782 below.

<sup>92</sup> Case 27/87 [1988] ECR 1919, [1988] 4 CMLR 576.

<sup>93</sup> *Ibid.*, para 10.

<sup>94</sup> This was the view of Advocate General Mischo in this case, and of the Commission: Case 27/87 [1988] ECR 1919, [1988] 4 CMLR 576, para 9.

<sup>95</sup> Case 27/87 [1988] ECR 1919, [1988] 4 CMLR 576, para 15. <sup>96</sup> *Ibid.*, para 19.

<sup>97</sup> OJ [1999] L 4/27, [1999] 4 CMLR 192. <sup>98</sup> *Ibid.*, paras 21–27.

<sup>99</sup> *Ibid.*, para 50, citing *Erauw-Jacquery*.

<sup>100</sup> *Ibid.*, para 51.

<sup>101</sup> *Ibid.*, paras 53–61.

However a restriction on the export of certified seeds did infringe Article 101(1)<sup>102</sup> but was found to satisfy the terms of Article 101(3)<sup>103</sup>.

In *Roses*<sup>104</sup> the Commission condemned two clauses in a standard licence of plant breeders' rights. The first was an exclusive grant-back clause, which effectively removed the sub-licensee from the market for mutations which it discovered. The second was a no-challenge clause: the fact that plant breeders' rights are conferred only after a national authority's involvement does not mean that there might not have been an error of appreciation that could be challenged by a licensee.

#### (x) Sub-contracting agreements

Sub-contracting agreements typically involve a licence from the principal to the sub-contractor. Horizontal sub-contracting agreements have been considered in chapter 15 and vertical ones in chapter 16<sup>105</sup>.

### (D) The application of Article 101(3) to licences of intellectual property rights<sup>106</sup>

Licensing agreements which are not covered by Regulation 772/2004 and which contain provisions which are not ancillary to an agreement covered by that Regulation or by Regulation 330/2010 on vertical agreements<sup>107</sup> may still fulfil the conditions of Article 101(3). When assessing the validity of their licences under the competition rules, firms will derive guidance from the Commission's block exemptions. The Commission has said that the restrictions listed as 'hard core' in Article 4 of the Technology Transfer Regulation would be likely to satisfy the criteria of Article 101(3) only in exceptional circumstances<sup>108</sup>; however it also says that there is no presumption that agreements that fall outside the block exemption are caught by Article 101(1) or fail to satisfy the terms of Article 101(3)<sup>109</sup>.

In *Telenor/Canal+/Canal Digital*<sup>110</sup> the Commission decided that the criteria of Article 101(3) were satisfied and therefore permitted for five years agreements concerning the distribution of pay-TV premium content channels on the satellite platform of Canal Digital in the Nordic region. The agreements involved in this case concerned the licensing of material protected by artistic copyright, and fell outside the block exemption for vertical agreements because the licences were not ancillary to a vertical agreement<sup>111</sup>. Similarly the licences were not ancillary to a technology transfer agreement, as artistic copyright is not regarded as technological. The interesting issue raised by a case such as this is whether a licence is more analogous to a vertical agreement or to a transfer of technology: this will determine whether the principles of Regulation 330/2010 or Regulation 772/2004 provide better guidance for firms having to conduct a self-assessment under Article 101(3). As a general proposition Regulation 772/2004 permits more restrictions than

<sup>102</sup> *Ibid*, paras 62–64.

<sup>103</sup> *Ibid*, paras 73–77; note that the block exemption Regulation on technology transfer agreements at the time did not apply since the standard licence did not correspond with any of the provisions listed in Article 1(1) thereof: *ibid*, para 72.

<sup>104</sup> OJ [1985] L 369/9, [1988] 4 CMLR 193; see Harding 'Commission Decision on Breeders' Rights in Relation to *Roses*: Hard Line on Breeders' Rights Maintained' (1986) 9 EIPR 284.

<sup>105</sup> See ch 15, 'Production Agreements', p 799 and ch 16, 'Sub-Contracting Agreements', pp 676–677.

<sup>106</sup> See the *Technology Transfer Guidelines*, para 18 and paras 130ff.

<sup>107</sup> On ancillary provisions see 'Article 1: definitions', p 782 below.

<sup>108</sup> *Technology Transfer Guidelines*, para 18. <sup>109</sup> *Ibid*, para 37.

<sup>110</sup> Commission decision of 29 December 2003.

<sup>111</sup> On Article 2(3) of the vertical block exemption see ch 16, 'Article 2(3): ancillary provisions in relation to intellectual property rights', p 656.

Regulation 330/2010: for example the former allows (limited) restrictions on passive sales which the latter does not<sup>112</sup>.

### 3. Technology Transfer Agreements: Regulation 772/2004

Acting under powers conferred on it by Council Regulation 19/65<sup>113</sup> the Commission has adopted Regulation 772/2004<sup>114</sup> conferring block exemption on technology transfer agreements pursuant to Article 101(3) of the Treaty. Regulation 772/2004 replaced Regulation 240/96<sup>115</sup>. The adoption of Regulation 772/2004 followed the publication by the Commission in December 2001 of an *Evaluation Report*<sup>116</sup> on the previous block exemption, which was followed by a public debate which was generally in favour of reform of the law. The Commission recognises in the recitals of Regulation 772/2004 that technology transfer agreements usually improve economic efficiency and are pro-competitive, but notes that this depends on the degree of market power that the parties have or, to put the point another way, the extent to which they face competition from undertakings owning substitute technologies or undertakings producing substitute products<sup>117</sup>.

The Commission adopted Regulation 772/2004 on 27 April 2004. It entered into force on 1 May 2004 and will expire on 30 April 2014<sup>118</sup>. Regulation 772/2004, the format of which is similar to Regulation 330/2010 on vertical agreements, consists of 20 recitals and 11 Articles. Article 1 contains a series of definitions. Article 2 confers block exemption on certain technology transfer agreements. Article 3 imposes market share caps, which differ depending on whether an agreement is horizontal or vertical, the former being treated more strictly. Article 4 contains a list of hard-core restrictions, the inclusion of which in an agreement will prevent the block exemption from applying: the list is stricter for horizontal than for vertical agreements. Article 5 sets out certain restrictions that are not block exempted, but which do not prevent the application of the Regulation to the rest of the agreement. Articles 6 and 7 provide for the block exemption to be withdrawn from agreements in certain circumstances. Subsequent provisions deal with matters such as the calculation of market share thresholds and transitional arrangements. Regulation 772/2004 should be read in conjunction with the Commission's *Technology Transfer Guidelines*.

#### (A) Article 1: definitions

Article 1 of the Regulation contains a series of definitions. Some of these will be explained in the text that follows, in the specific context in which they are used in the Regulation.

<sup>112</sup> Note however that paras 60–64 of the Commission's *Guidelines on Vertical Restraints* discuss situations in which hard-core sales restrictions may be objectively necessary for an agreement of a particular type and therefore fall outside Article 101(1) altogether, or fulfil the conditions of Article 101(3); see ch 16, 'Export bans falling outside Article 101(1) or satisfying Article 101(3)', pp 636–637.

<sup>113</sup> JO [1965] 533, OJ Sp Ed [1965–66] 87.

<sup>114</sup> OJ [2004] L 123/11; for detailed commentary on Regulation 772/2004 see Dolmans and Piilola 'The New Technology Transfer Block Exemption: A Welcome Reform After All' (2003) 27(3) *World Competition* 351; Anderman and Kallaughner *Technology and the New EU Competition Rules: Intellectual Property Licensing after Modernisation* (Oxford University Press, 2006); Korah *Intellectual Property Rights and the EC Competition Rules* (Hart Publishing, 2006); Coates, Kyølbye and Peepkorn in Faull and Nikpay *The EC Law of Competition* (Oxford University Press, 2nd ed, 2007), paras 10.58–10.125.

<sup>115</sup> OJ [1996] L 31/2.

<sup>116</sup> COM(2001) 786 final, available at [www.ec.europa.eu](http://www.ec.europa.eu).

<sup>117</sup> Regulation 772/2004, recitals 5 and 6.

<sup>118</sup> *Ibid*, Article 11.

Of particular importance is Article 1(1)(b), which defines what is meant by a technology transfer agreement. This term includes licences<sup>119</sup> of:

- patents<sup>120</sup>
- know-how, meaning a package of non-patented information that is secret, substantial and identified<sup>121</sup>
- software copyright<sup>122</sup>
- a mixture of patents, know-how and software copyright
- provisions in a technology agreement that do not constitute the primary objective of such agreements, but are directly related to the application of the licensed technology (sometimes referred to as ‘ancillary provisions’)<sup>123</sup>.

Recital 7 of the Regulation explains that it applies only to agreements whereby a licensor permits a licensee to exploit the licensed technology for the production of goods or services: it therefore does not apply to an agreement that sub-contracts research and development to another party, since in that case the sub-contractor, to whom some technology may be transferred by the principal, will not exploit the technology itself<sup>124</sup>. Recital 7 also explains that the Regulation does not apply to technology pools<sup>125</sup>.

Article 1(2) of the Regulation explains that the terms ‘undertaking’, ‘licensor’ and ‘licensee’ include ‘connected undertakings’, as defined therein.

## (B) Article 2: exemption

Article 2 of the Regulation confers block exemption on certain technology transfer agreements pursuant to Article 101(3). It provides that, subject to the provisions of the Regulation, Article 101(1) shall not apply:

to technology transfer agreements entered into between two undertakings permitting the production of contract products<sup>126</sup>.

Several points should be noted about Article 2(1).

### (i) Many technology transfer agreements do not infringe Article 101(1)

It is worth recalling that many technology transfer agreements do not infringe Article 101(1) at all, and therefore do not need to be block exempted. It has already been

<sup>119</sup> Regulation 772/2004 can also apply to assignments where part of the risk associated with the exploitation of the technology remains with the assignor: *ibid*, Article 1(1)(b); and the Regulation can apply to sub-licensing whereby a licensee, with authority of the licensor, sub-licenses to a third party for the exploitation of the technology: *Technology Transfer Guidelines*, para 48; the Regulation does not apply to a ‘master licence’ where sub-licensing is the primary object of the agreement: *ibid*, para 42.

<sup>120</sup> The term patents includes numerous rights, including utility models, designs, topographies of semiconductor products, supplementary protection certificates for medicinal products and plant breeder’s rights: *ibid*, Article 1(1)(h).

<sup>121</sup> *Ibid*, Article 1(1)(i); see also the *Technology Transfer Guidelines*, para 47.

<sup>122</sup> Note that copyright, other than software copyright, would not be included in this term; see ‘Copyright licences’, pp 776–777 above on the Commission’s approach to copyright licences in the *Technology Transfer Guidelines*; see also the Commission’s decision in *Telenor/Canal+ Canal Digital* discussed at ‘The application of Article 101(3) to licences of intellectual property rights’, pp 780–781 above.

<sup>123</sup> See further the *Technology Transfer Guidelines*, paras 49–53.

<sup>124</sup> See further *ibid*, paras 44–45; on horizontal sub-contracting agreements see ch 15, ‘Production Agreements’, p 599 and on vertical ones see ch 16, ‘Sub-Contracting Agreements’, pp 676–677.

<sup>125</sup> On pooling agreements see ‘Technology pools’, pp 791–794 below.

<sup>126</sup> On the meaning of ‘product’ and ‘contract products’ see Article 1(1)(e) and (f) of the Regulation.

noted that recital 5 of the Regulation acknowledges that such agreements usually improve economic efficiency and are pro-competitive, a point which is picked up in paragraph 9 of the *Technology Transfer Guidelines*, which states that there is no presumption that licence agreements give rise to competition concerns. Indeed paragraph 17 of the *Guidelines* goes as far as to say that licence agreements ‘have substantial pro-competitive potential’; it continues that ‘the vast majority of licence agreements are pro-competitive’. Recital 12 of the Regulation states that there is no presumption that agreements above the market share thresholds in Article 3 infringe Article 101(1), a point repeated in paragraph 37 of the *Technology Transfer Guidelines*. It is almost unthinkable that the Commission would have said such things in, say, the 1970s and 1980s, and this shows how far the Commission has moved in wanting to take a more economics-oriented, less regulatory approach to the application of the competition rules.

### (ii) If it is not forbidden, it is permitted

The Commission’s less regulatory approach, specifically stated in recital 4 of the Regulation, is reflected in the removal from the Regulation of a ‘white list’, stating what must be in a technology transfer agreement<sup>127</sup>; instead there are market share caps in Article 3, and the ‘black list’ of what must not be included in Article 4. These two are the Articles of key importance. Provisions in an agreement that are not blacklisted in Article 4 are permitted, subject to the ‘excluded restrictions’ of Article 5 and the possibility of withdrawal of the block exemption by the Commission or a Member State (see below). Other than that the maxim ‘If it is not forbidden, it is permitted’, applies under Regulation 772/2004<sup>128</sup>.

### (iii) The exempted agreement must be bilateral

An interesting distinction between the vertical block exemption and the one for technology transfer is that the latter is applicable only in the case of bilateral agreements, whereas the former is capable of application to multilateral ones<sup>129</sup>. Council Regulation 19/65 does not provide a legal basis for block exemption of multilateral technology transfer agreements<sup>130</sup>. However recital 19 of that Regulation explains that the Regulation can apply to an agreement between a licensor and licensee where the licensor makes stipulations for more than one level of trade. For example the licensor may impose conditions and obligations on the licensee not only in relation to its own production and sales; it may also require the licensee to impose conditions and obligations on its own distributors, for example requiring them to maintain a selective distribution system. The agreement between the licensor and licensee is still a bilateral agreement, and so capable of being covered by the block exemption; however the agreement(s) between the licensee and any distributor would not be covered by Regulation 772/2004, but might satisfy the block exemption for vertical agreements<sup>131</sup>.

Where a technology transfer agreement is multilateral, but of the same nature as one covered by Regulation 772/2004, the Commission will analyse the agreement by analogy to the principles contained in the Regulation<sup>132</sup>.

<sup>127</sup> Regulation 772/2004, recital 8.

<sup>128</sup> The same maxim applies under the vertical block exemption: see ch 16, ‘If it is not forbidden, it is permitted’, p 652.

<sup>129</sup> Ch 16, ‘The exempted agreement may be multilateral’, p 653.

<sup>130</sup> Specific provision for the block exemption of multilateral vertical agreements was made by Council Regulation 1215/99, OJ [1999] L 148/1.

<sup>131</sup> See further the *Technology Transfer Guidelines*, para 39 and paras 61–64.

<sup>132</sup> *Ibid*, para 40.

**(iv) Duration**

The block exemption will run until 30 April 2014. However Article 2 contains a further relevant provision as to the duration of block exemption in relation to any particular agreement. It provides that the exemption lasts only as long as the intellectual property right in the licensed technology has not expired, lapsed or been declared invalid; or, in the case of know-how, that the exemption lasts only as long as the know-how remains secret. The block exemption will cease to apply on the date of the last intellectual property right to expire, become invalid or enter the public domain<sup>133</sup>.

**(v) Relationship with other block exemptions**

Paragraphs 56 to 64 of the *Technology Transfer Guidelines* explain how the Technology Transfer Regulation relates to other block exemptions, in particular the Regulations for Research and Developments Agreements<sup>134</sup>, for Specialisation Agreements<sup>135</sup> and Vertical Agreements<sup>136</sup>.

**(C) Article 3: the market share cap**

The Regulation applies only to technology transfer agreements that do not exceed a market share cap. Recital 12 states that there is no presumption that an agreement above the thresholds infringes Article 101(1) or that it is incapable of satisfying the terms of Article 101(3) on an individual basis. Article 3(1) of the Regulation requires that the combined market share of the parties does not exceed 20 per cent of the affected relevant technology and product market for horizontal agreements; Article 3(2) provides that, in the case of vertical agreements, the market share of each of the parties must not exceed 30 per cent.

**(i) Horizontal agreements**

In order to determine whether an agreement is a horizontal agreement it is necessary to ask whether the parties to an agreement are ‘competing undertakings’ as defined in Article 1(1)(j) of the Regulation<sup>137</sup>. Undertakings may compete on a technology market or on a product market.

**(A) Technology markets**

Article 1(1)(j)(i) provides that undertakings compete on the relevant technology market where they license out competing technologies without infringing each others’ intellectual property rights. The relevant technology market includes technologies which are regarded as interchangeable with or substitutable for the licensed technology, by reason of the technologies’ characteristics, their royalties and their intended use. This definition captures only *actual* competitors in the technology market: it does not apply to potential competitors<sup>138</sup>.

**(B) Product markets**

Article 1(1)(j)(ii) provides that undertakings compete on the relevant product market where, even without a technology transfer agreement, they are both active on the relevant product and geographic markets on which the contract products are sold without

<sup>133</sup> Ibid, para 55.

<sup>134</sup> Regulation 1217/2010: see ch 15, ‘The block exemption for research and development agreements: Regulation 1217/2010’, pp 595–599.

<sup>135</sup> Regulation 1218/2010: see ch 15, ‘The application of Article 101(3) to production agreements’, pp 601–603.

<sup>136</sup> See ch 16, ‘Vertical Agreements: Regulation 330/2010’, pp 649–672.

<sup>137</sup> See further the *Technology Transfer Guidelines*, paras 26–33. <sup>138</sup> Ibid, para 66.

infringing each others' intellectual property rights (actual competitors) and where they might realistically be able to enter and compete on the market within 'a period of one to two years'<sup>139</sup> in response to a small but permanent increase in product prices (potential competitors). The relevant product market includes products which are regarded as interchangeable with or substitutable for the contract products by reason of the products' characteristics, their prices and their intended use.

## (ii) Vertical agreements

Where an agreement is not horizontal, because it is not between competing undertakings as defined in Article 1(1)(j), it is vertical, and so the higher market share cap of 30 per cent is applicable. An agreement will not be horizontal where one party can use its intellectual property to prevent the other entering the market, or where both parties need the other's technology to operate on the market: these are referred to as 'one-way' and 'two-way' blocking positions, as to which the Commission will require objective evidence, for example court judgments and the opinions of independent experts<sup>140</sup>. It can be the case that two undertakings compete in relation to existing products, but that a licence by A to B is not between competitors because A's technology is so innovative that B's current products are now obsolete or uncompetitive: such an agreement would be regarded as vertical and therefore subject to the higher market share cap (and the more lenient list of hard-core restrictions)<sup>141</sup>.

Where the parties are not competing undertakings at the time of the agreement, but subsequently become so, they will usually continue to be considered to be non-competing: Article 4(3) of the Regulation provides that this means that the less strict list of hard-core restrictions for vertical agreements will continue to apply<sup>142</sup>.

## (iii) Technology markets

Paragraphs 19 to 25 of the *Technology Transfer Guidelines* discuss market definition for the purpose of analysing technology transfer agreements. In particular they explain that such agreements can have an effect on competition both in the upstream technology market and in the downstream product market<sup>143</sup>. Article 3(3), in conjunction with paragraph 23 of the *Technology Transfer Guidelines*, explains that a licensor's share of a technology market is to be calculated by reference to the value of the licensed technology on the relevant product market; this figure is calculated on the basis of both the licensor's and its licensee's sales<sup>144</sup>. Where a new technology has yet to generate any sales a market share of zero is assigned<sup>145</sup>.

## (iv) Product markets

A licensee's market share of a product market is calculated on the basis of its sales of products incorporating the licensor's technology and competing products, that is to say the total sales of the licensee on the product market in question; sales by other licensees are not taken into account<sup>146</sup>.

<sup>139</sup> Ibid, para 29.                   <sup>140</sup> Ibid, para 32.   <sup>141</sup> Ibid, para 33.

<sup>142</sup> See 'Article 4: hard-core restrictions', pp 786–789 below.

<sup>143</sup> *Technology Transfer Guidelines*, para 20.

<sup>144</sup> See the final sentence of Article 3(3) of Regulation 772/2004 and the *Technology Transfer Guidelines*, para 70.

<sup>145</sup> Ibid.

<sup>146</sup> Ibid, para 71.

**(v) Article 8: calculation of market share and marginal relief**

Article 8(1) of the Regulation deals with the calculation of market share, which should be done by reference to market sales value data. Where such data are not available, estimates based on other reliable information, including sales volumes, may be used to establish the market share of the undertaking concerned. Market shares should be calculated on the basis of data relating to the preceding calendar year.

Article 8(2) provides some marginal relief for up to two years where the market share caps of 20 or 30 per cent are subsequently exceeded.

**(vi) Examples**

The *Technology Transfer Guidelines* provide examples of how the market share figures operate, both in relation to horizontal and vertical licensing agreements<sup>147</sup>.

**(D) Article 4: hard-core restrictions**

Recital 13 of the Regulation states that technology transfer agreements should not enjoy block exemption when they contain ‘severely anti-competitive restraints such as the fixing of prices charged to third parties... irrespective of the market shares of the undertakings concerned’. The block exemption ceases to apply to the entire agreement, not just to the offending provisions<sup>148</sup>. The Commission considers that the hard-core restrictions are restrictions by object in the sense of Article 101<sup>149</sup>. The Regulation contains one set of hard-core restrictions for agreements between competing agreements in Article 4(1) and a different set for agreements between non-competing undertakings in Article 4(2). As one would expect the provisions are stricter in the case of agreements between competing undertakings than between non-competing undertakings<sup>150</sup>. Article 4(3) provides that, where the parties were non-competing at the time that they entered into an agreement, Article 4(2) applies to their agreement throughout its lifetime unless the agreement is subsequently amended in any material respect; in other words the agreement does not metamorphose into a horizontal one, and so become subject to the stricter standard of Article 4(1), simply because the firms subsequently become competitors.

**(i) Agreements between competing undertakings: horizontal agreements<sup>151</sup>**

The concern of the Commission is that a technology transfer agreement between competing agreements might be a cloak for, or have the effect of, a cartel. Article 4(1) therefore provides that block exemption is not available for agreements that, directly or indirectly, in isolation or in combination with other factors, have as their object restrictions concerning prices, output, the allocation of markets or customers, and the exploitation by the licensee of its own technology: such restrictions are regarded as hard-core. The provisions on price and output are simple, but those on markets and customers can be complex. In some cases restrictions are treated as hard-core only where an agreement is reciprocal, that is to say where each undertaking grants a licence to the other and where the licences concern competing technologies or can be used for the production of competing products<sup>152</sup>; the same restriction in a non-reciprocal agreement<sup>153</sup> is not regarded as hard-core<sup>154</sup>. Where a non-reciprocal agreement becomes a reciprocal one due to the conclusion of a second licence

<sup>147</sup> Ibid, para 73.

<sup>148</sup> Ibid, para 75.

<sup>149</sup> Ibid, para 14.

<sup>150</sup> Ibid, para 26.

<sup>151</sup> See generally the *Technology Transfer Guidelines*, paras 77–95.

<sup>152</sup> Regulation 772/2004, Article 1(1)(c).

<sup>153</sup> Ibid, Article 1(1)(d).

<sup>154</sup> See the *Technology Transfer Guidelines*, para 78.

between the same parties, they may have to revise the first licence in order to avoid the inclusion of a hard-core restriction<sup>155</sup>.

#### (A) *Prices*

Article 4(1)(a) provides that the block exemption is not applicable to an agreement between competing undertakings that restricts a party's ability to determine its prices to third parties. It is immaterial whether the agreement concerns fixed, minimum, maximum or recommended prices<sup>156</sup>. Where there are cross licences between two undertakings that have no pro-competitive purpose and where the parties agree to pay running royalties to one another the Commission might treat the case as sham and tantamount to a price-fixing agreement<sup>157</sup>. Article 4(1)(a) (and Article 4(1)(d)) may be infringed where royalties are based on the sales of products irrespective of whether the licensed technology was used in the production of those products<sup>158</sup>.

#### (B) *Output*

Article 4(1)(b) provides that the block exemption is not applicable to an agreement between competing undertakings that has as its object the limitation of output, other than a limitation on the output of contract products imposed on the licensee in a non-reciprocal agreement or imposed on only one of the parties in a reciprocal agreement. Non-reciprocal agreements are treated more favourably than reciprocal ones since they are less likely to lead to a restriction of output and they are more likely to lead to an improvement in economic efficiency<sup>159</sup>.

#### (C) *The allocation of markets and customers*

Article 4(1)(c) provides that the block exemption does not apply to an agreement between competing undertakings that allocates markets or customers<sup>160</sup>. However there are seven exceptions to this:

- an obligation on the licensee(s) to produce with the licensed technology only within one or more technical fields of use or one or more product markets. The field of use restriction must not go beyond the scope of the licensed technology<sup>161</sup>. It does not matter whether, in a reciprocal agreement, the field of use restrictions are symmetrical or asymmetrical<sup>162</sup>
- an obligation on the licensor and/or the licensee in a non-reciprocal agreement not to produce with the licensed technology within one or more technical fields of use or one or more product markets or one or more exclusive territories reserved for the other party
- an obligation on the licensor not to license the technology to another licensee in a particular territory

<sup>155</sup> Ibid; the Commission will take into account the time lapsed between the conclusion of the first and the second licence.

<sup>156</sup> Ibid, para 79.

<sup>157</sup> Ibid, para 80.

<sup>158</sup> Ibid, para 101; see also paras 156–160.

<sup>159</sup> Ibid, para 102; see also paras 175–178.

<sup>160</sup> The terms 'exclusive territory' and 'exclusive customer group' are defined in Articles 1(1)(l) and 1(1)(m) of the Regulation; for further discussion of exclusive licensing and sales restrictions see the *Technology Transfer Guidelines*, paras 161–174.

<sup>161</sup> *Technology Transfer Guidelines*, para 90; see also paras 179–185.

<sup>162</sup> Ibid, para 91.

- the restriction in a non-reciprocal agreement of active and/or passive sales by the licensee and/or the licensor into the exclusive territory or to the exclusive customer group reserved for the other party<sup>163</sup>
- the restriction in a non-reciprocal agreement of active sales by the licensee into the exclusive territory or to the exclusive customer group allocated by the licensor to another licensee provided the latter was not a competing undertaking of the licensor at the time of the conclusion of its own licence. An agreement between licensees not to sell, actively or passively, into each others' territories would be regarded as a cartel agreement between them and would fall outside the scope of the block exemption<sup>164</sup>
- an obligation on the licensee to produce the contract products only for its own use provided that the licensee is not restricted in selling the contract products actively and passively as spare parts for its own products: these are known as 'captive use restrictions'<sup>165</sup>
- an obligation on the licensee in a non-reciprocal agreement to produce the contract products only for a particular customer where the licence was granted in order to create an alternative source of supply for that customer.

#### (D) *Exploitation by the licensee*

Article 4(1)(d) provides that the block exemption does not apply to an agreement between competing undertakings that restricts the licensee's ability to exploit its own technology or that prevents any of the parties to the agreement from carrying out research and development, unless such a provision is indispensable to prevent the disclosure to a third party of the licensed know-how. Where such a restriction is found in an agreement between non-competing undertakings it is not regarded as hard-core but is excluded from the block exemption under Article 5<sup>166</sup>.

#### (ii) **Agreements between non-competing agreements: vertical agreements**<sup>167</sup>

Article 4(2) of the Regulation provides that block exemption is not available for agreements between non-competing undertakings that, directly or indirectly, in isolation or in combination with other factors, have as their object restrictions concerning prices, territories and customer groups or sales within a selective distribution system<sup>168</sup>.

#### (A) *Prices*

Article 4(2)(a) provides that the block exemption does not apply to an agreement between non-competing undertakings that restricts a party's ability to determine its prices when selling products to third parties. However it is permissible to impose a maximum price or to recommend a price provided that this does not amount to a fixed or minimum price as a result of pressure from, or incentives offered by, any of the parties. Paragraph 97 of the *Technology Transfer Guidelines* provides examples of agreements that would be considered to fix prices indirectly, for example fixing a licensee's margin, fixing the maximum

<sup>163</sup> For a definition of active and passive sales see para 51 of the Commission's *Guidelines on Vertical Restraints*; see further ch 16, 'Article 4(b): territorial and customer restrictions', pp 665–668.

<sup>164</sup> *Guidelines on Vertical Restraints*, para 89.

<sup>165</sup> *Ibid*, para 92; see also paras 186–190.

<sup>166</sup> See 'Article 5: excluded restrictions', pp 789–790 below.

<sup>167</sup> See generally the *Technology Transfer Guidelines*, paras 96–106.

<sup>168</sup> This term is defined in Article 1(1)(k) of the Regulation.

level of discounts and making threats or intimidating a licensee as to a particular price level.

**(B) Territories and customer groups**<sup>169</sup>

Article 4(2)(b) provides that the block exemption does not apply to an agreement between non-competing undertakings that restricts the territory into which, or the customer group to whom, the licensee may passively sell the contract goods. Paragraph 98 of the *Technology Transfer Guidelines* provides examples of indirect methods of preventing passive sales, such as financial incentives, monitoring mechanisms to identify the final destination of the contract products and, in some cases, quantity limitations. Article 4(2)(b) provides six exceptions to the prohibition on restrictions on passive sales by the licensee:

- a restriction of passive sales into an exclusive territory or to an exclusive customer group reserved for the licensor
- a restriction of passive sales into an exclusive territory or to an exclusive customer group allocated by the licensor to another licensee during the first two years that the other licensee is selling the contract products in that territory or to that group
- an obligation to produce the contract goods only for its own use provided that the licensee is not restricted in selling the contract products actively and passively as spare parts for its own products
- an obligation to produce the contract products only for a particular customer where the licence was granted in order to create an alternative source of supply for that customer
- a restriction of sales to end users by a licensee operating at the wholesale level of trade
- a restriction of sales to unauthorised distributors by the members of a selective distribution system.

It should be noted that Article 4(2)(b) does not prohibit sales restrictions on the licensor; nor restrictions on active sales by the licensee, except in the case of selective distribution systems (see below)<sup>170</sup>. Furthermore there is no restriction on active or passive sales by licensees to territories or customer groups reserved to the licensor<sup>171</sup>.

**(C) Restrictions in selective distribution systems**

Article 4(2)(c) provides that the block exemption does not apply where an agreement between non-competing undertakings restricts active or passive sales to end users by a licensee which is a member of a selective distribution system and which operates at the retail level, without prejudice to the possibility of prohibiting a member of the system from operating out of an unauthorised place of establishment.

**(E) Article 5: excluded restrictions**<sup>172</sup>

Recital 14 of the Regulation states that, in order to protect incentives to innovate, certain restrictions should be excluded from the block exemption, in particular exclusive grant-back obligations for severable improvements; however the inclusion of an Article 5

<sup>169</sup> The terms 'exclusive territory' and 'exclusive customer group' are defined in Articles 1(1)(l) and 1(1)(m) of the Regulation.

<sup>170</sup> See the *Technology Transfer Guidelines*, para 99.

<sup>171</sup> *Ibid*, para 100.

<sup>172</sup> *Ibid*, paras 107–116.

restriction does not prevent the application of the block exemption to the remaining parts of the agreement if they are ‘severable’ from the excluded restriction<sup>173</sup>.

Article 5(1) lists three excluded restrictions:

- **exclusive grant back:** an obligation on the licensee to grant an exclusive licence to the licensor or a third party designated by the licensor in respect of its own severable improvements<sup>174</sup> to or its own new applications of the licensed technology
- **assignments back:** an obligation to assign back such technology
- **no-challenge clauses:** an obligation on the licensee not to challenge the validity of intellectual property rights held by the licensor in the internal market, without prejudice to the right of the licensor to terminate the licence in the event of such a challenge.

Article 5(2) also excludes a restriction, in an agreement between non-competing undertakings, that imposes an obligation limiting the licensee’s ability to exploit its own technology or limiting either of the party’s ability to carry out research and development, unless the latter restriction is indispensable to prevent the disclosure of the licensed technology to third parties.

#### (F) **Article 6: withdrawal in individual cases**<sup>175</sup>

Recital 16 of the Regulation states that the provisions of Articles 3 to 5 mean that agreements to which the block exemption applies normally will not eliminate competition in respect of a substantial part of the products in question, with the result that the fourth requirement of Article 101(3) will be satisfied. However, as a safety net, the possibility exists of either the Commission or the national competition authorities (‘the NCAs’), in certain circumstances, withdrawing the benefit of the block exemption. The authority doing so bears the burden of proving that an agreement falls within the scope of Article 101(1) and that the terms of Article 101(3) are not satisfied<sup>176</sup>. It is worth noting in passing that this power has never been used.

##### (i) **Article 6(1): withdrawal by the Commission in individual cases**

Article 6(1) provides that the Commission may withdraw the benefit of the block exemption in an individual case where an agreement has effects that are incompatible with Article 101(3). Recital 16 states that this may happen in particular where incentives to innovate are reduced or where access to markets is hindered, and Article 6(1) gives examples of when this could be so.

##### (ii) **Article 6(2): withdrawal by an NCA of a Member State**

Article 6(2) provides that an NCA may withdraw the benefit of the block exemption under the same circumstances specified in Article 6(1) where a technology transfer agreement has effects incompatible with Article 101(3) in the territory of a Member State or a part thereof that has all the characteristics of a distinct geographic market. Recital 17 states that, in exercising this power, ‘Member States must ensure that they do not prejudice the uniform application of the [EU] competition rules throughout the common market or the full effect of the measures adopted in implementation of those rules’.

<sup>173</sup> Ibid, para 107.

<sup>174</sup> This term is defined in Article 1(1)(n) of the Regulation.

<sup>175</sup> See generally the *Technology Transfer Guidelines*, paras 117–122.

<sup>176</sup> Ibid, para 119.

**(G) Article 7: non-application of the Regulation**<sup>177</sup>

Article 7(1) of the Regulation provides that the Commission may by regulation declare that the block exemption does not apply to technology transfer agreements containing specific restraints relating to a market where parallel networks of similar technology transfer agreements cover more than 50 per cent of the relevant market. Article 7(2) adds that a regulation adopted pursuant to Article 7(1) will not become applicable earlier than six months following its adoption. Where the Commission exercises the power conferred on it by Article 7 it may make a decision in an individual case to provide guidance on the application of Article 101 to the agreements that will have lost the benefit of the block exemption<sup>178</sup>.

**(H) Article 8: application of the market share thresholds**

This provision was dealt with in the context of Article 3 above<sup>179</sup>.

**(I) Articles 9 to 11: repeal, transitional period and period of validity**

Article 9 repealed Regulation 240/96, the previous technology transfer regulation. Article 10 granted transitional relief to agreements that satisfied Regulation 240/96 until 31 March 2006. Article 11 provides that Regulation 772/2004 will expire on 30 April 2014.

## 4. The Application of Article 101 to Other Agreements Relating to Intellectual Property Rights

The previous two sections of this chapter considered the application of Article 101 to agreements to license intellectual property rights, with particular reference to technology transfer agreements and the block exemption conferred by Regulation 772/2004. In this section the application of Article 101 to other agreements relating to intellectual property rights will be examined.

**(A) Technology pools**<sup>180</sup>

It is not uncommon for two or more undertakings to ‘pool’ their technology. Regulation 772/2004 explicitly states that it does not apply to technology pools, that is to say to:

agreements for the pooling of technologies with the purpose of licensing the created package to third parties<sup>181</sup>.

However the licences granted by the pool to a third party may not infringe Article 101(1) at all<sup>182</sup>; or they may be block exempted, provided that the conditions of Regulation 772/2004 are satisfied<sup>183</sup>.

<sup>177</sup> See generally the *Technology Transfer Guidelines*, paras 123–129.

<sup>178</sup> *Ibid*, para 124.

<sup>179</sup> See ‘Article 8: calculation of market share and marginal relief’, p 786 above.

<sup>180</sup> See generally the report prepared for the European Commission on *Multi-Party Licensing* (Charles River Associates, April 2003).

<sup>181</sup> Regulation 772/2004, recital 7; see also the *Technology Transfer Guidelines*, para 210.

<sup>182</sup> See *Philips/Sony CD Licensing program*, Commission Press Release IP/03/1152, 7 August 2003.

<sup>183</sup> *Technology Transfer Guidelines*, para 212.

Sometimes a pooling arrangement is fairly simple and informal; however it is not unknown for the pool to have an elaborate structure, the management of which may be entrusted to a separate entity. In some cases a technology pool may be linked to an industry standard. Industry standards are sometimes established by law (*'de jure'*); in others they may become a standard as a matter of fact (*'de facto'*). It may be that, in order to comply with a standard, access is needed to intellectual property rights, and these rights might be managed through a technology pool. It follows that, just as agreements to establish standards might sometimes infringe Article 101<sup>184</sup>, so too might the creation and operation of a pool where it is the product of an agreement between undertakings and where it could have the effect of foreclosing access to the market<sup>185</sup>. A related point is that undertakings that participate in the setting of a standard may own essential patents, a licence of which is needed by anyone wishing to comply with the standard. A deliberate concealment of this fact by a dominant undertaking during the standard-setting procedure, or a refusal to license the patents on reasonable, non-discriminatory terms, might infringe Article 102<sup>186</sup>.

It may also be the case that, within a particular industry, there may be more than one technology pool, and that the different pools may compete with one another. There may be considerable benefits for a firm or firms which control a standard or a technology pool if the industry 'tips' towards that standard or technology as the industry norm. Obvious industries in which one witnesses this phenomenon are mobile telephony<sup>187</sup>, high-density television and digital broadcasting, where the 'battle of the standards' may be fierce. The example of the video cassette industry tipping to the VHS standard, away from Betamax, 20 years ago was matched, in 2008, by the market opting for Sony's Blu-Ray technology for the next generation of DVD players rather than Toshiba's HD DVD platform.

Technology pools may have both pro-competitive and anti-competitive effects<sup>188</sup>. The Commission's *Technology Transfer Guidelines* provide guidance on the application of Article 101 to technology pools<sup>189</sup>. The Commission explains that pools may be restrictive of competition in two ways. First, the pooling of technology implies joint selling: if the pooled technologies are substitutes for one another this amounts to a price-fixing cartel<sup>190</sup>. Secondly, technology pools may, in particular when they support an industry standard or establish a *de facto* industry standard, reduce innovation by foreclosing alternative technologies from obtaining access to the market<sup>191</sup>. However the Commission also notes that technology pools may be pro-competitive; for example firms that need access to the technology in the pool will get the benefit of a 'one-stop shop', dealing only with the pool, instead of having to negotiate individually with a number of different owners; this can lead to a reduction in costs<sup>192</sup>. The Commission authorised a technology

<sup>191</sup> *Ibid*.

<sup>192</sup> *Ibid*, para 214.

pool in the case of *MPEG-2*<sup>193</sup>. MPEG-2 is a technology that improves the quality of video signals; to apply the technology it is necessary to have access to a number of patents. These were pooled by their respective owners, who agreed that access to the pool would be permitted on a non-exclusive and non-discriminatory basis. This meant that the pool, far from foreclosing the market to third parties, would enable them to gain access to the technology with a beneficial effect on technical and economic progress.

The *Technology Transfer Guidelines* examine three issues: the nature of the pooled technologies; the assessment of individual restraints; and the institutional framework governing the pool.

### (i) The nature of the pooled technologies

The Commission makes a distinction between the situation where the pooled technologies are substitutes for one another and where they are complements to each other<sup>194</sup>.

#### (A) Substitute technologies

Where the pooled technologies are substitutes for one another the Commission's prime concern is that the royalties payable will be higher than they would otherwise be<sup>195</sup> and that this amounts to price fixing between competitors; this would violate Article 101(1) and be unlikely to satisfy the criteria of Article 101(3)<sup>196</sup>.

#### (B) Complementary technologies

Where the pooled technologies are complements the arrangement is likely to reduce transaction costs and to lead to lower overall royalties<sup>197</sup>; this means that the creation of the pool is likely to fall outside Article 101, irrespective of the market position of the parties<sup>198</sup>. However the conditions on which any licence is granted may be caught by Article 101<sup>199</sup>. In particular the Commission has a concern where a licensee is required to take a licence of 'non-essential' technology as a condition of gaining access to 'essential' technology<sup>200</sup>, as this amounts to a bundling practice, and may have a foreclosure effect depending on the market power of the pool<sup>201</sup>. The Commission will be less concerned about pools where, for example, technologies which, over time, become non-essential are excluded from the pool; where licensors remain free to license their technologies independently of the pool, so that a licensee could put together its own technology package; and where it is possible to take a licence of part only of the pooled technology at a lower royalty rate<sup>202</sup>.

### (ii) Assessment of individual restraints

Where a technology pool has a dominant position on the market, the royalties and other licensing terms that it offers should be fair and non-discriminatory and the licences granted should be non-exclusive; this is to ensure that there is no anti-competitive foreclosure effect<sup>203</sup>. However it is permissible to charge different royalty rates for different uses and in different product markets<sup>204</sup>. The Commission is also concerned to ensure that a technology pool does not foreclose third party technologies from the market: licensors

<sup>201</sup> *Ibid*, para 221.

<sup>202</sup> *Ibid*, para 222.

<sup>203</sup> *Ibid*, para 226.

<sup>204</sup> *Ibid*, para 227.

and licensees must therefore be free to develop competing products and standards and must be free to grant and obtain licences outside the pool<sup>205</sup>. Any grant-back obligations towards the pool should be non-exclusive and limited to developments that are essential or important to the use of the pooled technology<sup>206</sup>. In the event that a licensee challenges the validity of a patent, the pool's right to terminate the licensee's licence is limited to the patent in question, and cannot apply to the licence of other (non-challenged) technology: this is to prevent the 'shielding' of invalid patents<sup>207</sup>.

### (iii) The institutional framework governing the pool

The Commission considers that the way in which a pool is created, organised and operated can reduce the risk of it restricting competition<sup>208</sup>. A restriction of competition is less likely when the process of setting a standard and creating a pool is open to all interested parties representing different interests<sup>209</sup>; and the involvement of independent experts may be a helpful factor, for example where they help to ensure that only essential technologies are included in the pool<sup>210</sup>. The Commission is anxious that the operation of a pool does not lead to the exchange of sensitive commercial information that could lead to parallel behaviour, particularly in oligopolistic markets, and will look to see what safeguards have been put in place to prevent this<sup>211</sup>. The Commission also has a preference for there to be dispute resolution mechanisms that are independent of the pool and its members<sup>212</sup>.

## (B) Copyright pools

Closely related to technology pools are copyright pools. In *IFPI 'Simulcasting'*<sup>213</sup> the Commission authorised an agreement under Article 101(3) whereby two collecting societies, acting on behalf of record companies, established a 'one-stop shop' whereby an international licence could be granted to radio and television broadcasters wishing to 'simulcast' programmes to the public both by conventional radio and television and also, at the same time, via the Internet. The Commission required the deletion of territorial restrictions<sup>214</sup>. The Commission concluded that the joint fixing by the societies of the simulcasting royalty fee infringed Article 101(1)<sup>215</sup>. However, it considered that the agreement met the requirements of Article 101(3) as it would enable a collecting society to grant a 'one-stop shop' licence for simulcasting across the EU which would give consumers a wider access to audio and video music programmes through the Internet<sup>216</sup>. The Commission required the parties to charge for their administrative costs separately from the royalties<sup>217</sup>, which were the subject of the horizontal agreement: this meant that broadcasters could exercise a competitive choice on the basis of different societies' costs.

<sup>217</sup> Ibid, paras 99–107.

## (C) Settlements of litigation<sup>218</sup>

### (i) Patent settlements

The Commission has been concerned for many years about the possibility that settlements of patent disputes might have resulted in producers of generic drugs being delayed from entering, or even being excluded from, markets for pharmaceuticals. Essentially the concern is that the owner of a patent (known as the ‘originator’) might enter into an agreement with a would-be entrant to the market once the patent has expired (the ‘generic’ company) that encourages or induces the generic firm not to enter the market: direct payments or other commercial advantages might be offered by the originator that lead to an agreement that violates Article 101(1). In its inquiry into the pharmaceutical sector the Commission identified this as a possible problem<sup>219</sup>; it subsequently opened investigations against *Les Laboratoires Servier*<sup>220</sup> and *Lundbeck*<sup>221</sup>: these investigations were continuing as at 20 June 2011.

As a separate initiative the Commission announced that it would keep patent settlements under review, and launched a monitoring exercise in January 2010. In July 2010 the Commission published a *Report on the monitoring of patent settlements in the pharmaceutical sector*<sup>222</sup>. The Commission’s view was that the number of ‘potentially problematic’ patent settlements during this period had declined; it is possible that this decline was due to a greater awareness within the pharmaceutical sector that patent settlements might give rise to competition law scrutiny as a consequence of the Commission’s sectoral inquiry. The Commission is continuing to monitor patent settlements in the sector<sup>223</sup>.

### (ii) Trade mark settlements

The Commission will carefully scrutinise trade mark delimitation agreements whereby owners of independent trade marks accept restrictions on the exercise and use of their respective marks<sup>224</sup>. This means that legal advisers must be careful when advising clients as to the terms on which they should settle a trade mark dispute, since it may be that the settlement itself will contravene Article 101(1)<sup>225</sup>. In *BAT v Commission*<sup>226</sup> the Court of

<sup>225</sup> See generally Singleton ‘IP Disputes: Settlement Agreements and Ancillary Licences’ (1993) 15 EIPR 48.

<sup>226</sup> Case 35/83 [1985] ECR 363, [1985] 2 CMLR 470; see Alexander (1985) 22 CML Rev 709.

Justice established that trade mark delimitation agreements are permissible and fall outside Article 101(1) where they serve to avoid confusion or conflict; however there must be a genuine dispute between the parties and the agreement must be no more restrictive than necessary to overcome the problem of confusion.

The Commission's *Technology Transfer Guidelines* discuss licensing as a means of settling disputes. Where the parties to a dispute agree, as part of a settlement, to license, or to cross-license, the terms of the licence(s) may be covered by Regulation 772/2004 subject, of course, to compliance with its terms. The Commission makes the point that where the undertakings agree to license one another in circumstances where their technologies do not block one another<sup>227</sup> – in other words where they are actual competitors – an agreement between them would be a hard-core restriction contrary to Article 4(1) of the Regulation<sup>228</sup>. On the other hand if one party had the ability to exclude the other from the market by virtue of its technology, a licence would be likely to be pro-competitive<sup>229</sup>. Cross-licences that impose restrictions on the parties' use of their technologies, including restrictions on licensing to third parties, may infringe Article 101, in particular where the parties have significant market power and where the agreement imposes restrictions that clearly go beyond what is required to give access to the disputed technology<sup>230</sup>. The Commission will be concerned to ensure that any settlement between the parties does not inhibit their future opportunity to innovate and thereby gain a competitive advantage over each other<sup>231</sup>. No-challenge agreements in a settlement would generally be regarded as falling outside Article 101, since this is regarded as an inherent aspect of any such agreement<sup>232</sup>.

In *Chiquita/Fyffes plc*<sup>233</sup> the Commission took the view that an agreement between Chiquita and Fyffes whereby Fyffes agreed not to use the Fyffes trade mark in continental Europe for a period of 20 years infringed both Articles 101 and 102. The alleged infringement of Article 102 lay in the fact that the inability of Fyffes to use that mark diminished its ability to compete vigorously with Chiquita in Europe. Following the Commission's intervention, Chiquita abandoned the agreement.

## 5. Article 102 and Intellectual Property Rights

The law of intellectual property confers exclusive rights; Article 102 prohibits the abuse of a dominant position. The question arises of whether Article 102 can be applied in such a way as to limit the exclusive rights given by intellectual property law<sup>234</sup>. The Court of Justice has made clear that mere ownership of intellectual property rights cannot be attacked under Article 102<sup>235</sup>; however Article 102 may apply to an improper exercise of

<sup>227</sup> See 'Vertical agreements', p 785 above on one-way and two-way blocking positions.

(2009) 32(2) World Competition 163; Vickers 'Competition Policy and Property Rights' (2010) 120 Economic Journal 375.

<sup>235</sup> Article 345 TFEU provides that the TFEU and TEU 'shall in no way prejudice the rules in Member States governing the system of property ownership'.

the right in question<sup>236</sup>. Article 8(2) of the WTO agreement on Trade-Related Aspects of Intellectual Property Rights (the so-called ‘TRIPS Agreement’) says much the same:

Appropriate measures, provided that they are consistent with the provisions of this Agreement, may be needed to prevent the abuse of intellectual property rights by holders or the resort to practices which unreasonably restrain trade or adversely affect the international transfer of technology.

## (A) Compulsory licences

A question that has been much debated is the extent to which the owner of an intellectual property right can be compelled to grant a licence of it to a third party under Article 102. As a general proposition the owner of an intellectual property right is entitled to determine how it should be exploited and a compulsory licence should be imposed only in exceptional circumstances.

### (i) The *Renault* and *Volvo* judgments

In *Renault*<sup>237</sup> and in *Volvo v Erik Veng*<sup>238</sup> third parties wished to be granted licences of the car manufacturers’ intellectual property rights in order to produce spare parts, and claimed that a refusal to grant such licences was an abuse of a dominant position under Article 102. The Court of Justice adopted an orthodox approach to the application of Article 102 to compulsory licensing and held that, in the absence of EU harmonisation of laws on designs and models, it was a matter for national law to determine the nature and extent of protection for such matters. In *Volvo* the Court stated at paragraph 8 that:

the right of the proprietor of a protected design to prevent third parties from manufacturing and selling or importing, without its consent, products incorporating the design constitutes the very subject-matter of its exclusive rights. It follows that an obligation imposed upon the proprietor of a protected design to grant to third parties, even in return for a reasonable royalty, a licence for the supply of products incorporating the design would lead to the proprietor thereof being deprived of the substance of its exclusive right, and that a refusal to grant such a licence cannot in itself constitute an abuse of a dominant position.

The Court added, however, that a car manufacturer might be guilty of abusing its dominant position where it refused to supply spare parts to independent repairers in an arbitrary manner, charged unfair prices for spare parts<sup>239</sup> or decided no longer to produce spare parts for models still in circulation.

<sup>236</sup> See Case 24/67 *Parke, Davis & Co v Probel* [1968] ECR 55, [1968] CMLR 47 where the Court of Justice said that ownership of a patent is not an abuse in itself although ‘the utilisation of the patent could degenerate into an improper exploitation of the protection’; the ownership of intellectual property is a factor to be taken into account in assessing whether a firm has a dominant position: see ch 5, ‘Legal barriers’, p 184.

<sup>237</sup> Case 53/87 *Conzorzio Italiano della Componentistica di Ricambio per Autoveicoli and Maxicar v Regie National des Usines Renault* [1988] ECR 6039, [1990] 4 CMLR 265.

<sup>238</sup> Case 238/87 [1988] ECR 6211, [1989] 4 CMLR 122; see Korah ‘No Duty to Licence Independent Repairers to Make Spare Parts: the *Renault*, *Volvo* and *Bayer* Cases’ (1988) 12 EIPR 381; Groves ‘The Use of Registered Designs to Protect Car Body Panels’ (1989) 10 BLR 117.

<sup>239</sup> In Case T-198/98 *Micro Leader Business v Commission* [1999] ECR II-3989, [2000] 4 CMLR 886 the General Court held that the Commission, before rejecting a complaint against Microsoft concerning the exercise of its copyright protection, should have investigated whether its prices were discriminatory contrary to Article 102(2)(c): *ibid.*, paras 49–59.

## (ii) *The Magill case*

A less orthodox approach was taken by the Commission in *Magill TV Guide/ITP, BBC and RTE*<sup>240</sup>, variously known as the *Magill* case or the *TV Listings* case. Mr Magill wished to publish the listings of three television companies broadcasting in the UK and Ireland in a single weekly publication. At the time there was no publication which contained the details of all three companies' programmes for a week in advance; this information was available only in daily newspapers for the day in question, or on a Saturday for the weekend. There was an obvious public demand for listings magazines, which were widely available in continental countries. Copyright protection was available for TV listings under UK and Irish law, which is why Magill required a licence. The Commission concluded that the three television companies had abused their individual dominant positions in relation to their own TV listings by refusing to make them available to Magill and required that advance information be supplied in order to enable comprehensive weekly TV guides to be published. The Commission's decision was appealed to the General Court and the Court of Justice, each of which upheld it<sup>241</sup>. The Court of Justice stated that the abuse consisted of the refusal to provide basic information by relying on national copyright provisions, thereby preventing the appearance of a new product, a comprehensive guide to television programmes, which the television companies did not offer and for which there was a potential consumer demand<sup>242</sup>; the Court also noted that there was no objective justification for the refusal<sup>243</sup> and that the result of the refusal was to reserve to the television companies the downstream market for television guides<sup>244</sup>.

The case was immensely controversial and led to numerous comments and articles, mainly adverse<sup>245</sup>. It appeared to sit oddly with the earlier judgments of the Court of Justice in *Renault* and *Volvo*; it meant that the possibility of compulsory licensing had been introduced under Article 102; and it could be seen to be an application of the so-called 'essential facilities doctrine' to intellectual property rights<sup>246</sup>. A particular anxiety was that the precedent might be applied to intellectual property rights that were the consequence of substantial risk-taking and investment – for example patents and computer software – as opposed to a mere list of television programmes, though this did not happen in practice. There is little doubt that the Commission and the EU Courts were influenced in *Magill* by the fact that information as prosaic as TV listings was entitled to copyright protection: most systems of law in the Member States would not have conferred intellectual property protection at all in such circumstances<sup>247</sup>. However this was not an explicit part of the reasoning in the Commission's decision or the Courts' judgments.

<sup>246</sup> See ch 17, 'Is the product to which access is sought indispensable to someone wishing to compete in the downstream market?', pp 701–707; see generally Cotter 'Intellectual Property and the Essential Facilities Doctrine' (1999) 44 Antitrust Bulletin 211 on the question of whether intellectual property rights can be regarded as essential facilities.

<sup>247</sup> Directive 96/9 on the legal protection of databases, OJ [1996] L 77/20 adopts criteria for originality which differ from UK and Irish copyright laws at the time of the *Magill* case.

(iii) *Oscar Bronner*

In *Oscar Bronner v Mediaprint*<sup>248</sup> the Court of Justice stressed the exceptional circumstances in *Magill*: in paragraph 40 of its judgment it referred to four factors in particular: the information sought by *Magill* was indispensable to the publication of a comprehensive listings guide; there was a demonstrable potential consumer demand for the would-be product; there were no objective justifications for the refusal to supply; and the refusal would eliminate all competition in the secondary market for TV guides.

(iv) *IMS Health*

In the next case to deal with this matter, *IMS Health GmbH & Co v NDC Health GmbH & Co*<sup>249</sup>, the Court of Justice repeated the formulation of the Court in *Bronner*. The *IMS* case was an Article 267 reference from a German court<sup>250</sup>. *NDC Health* was seeking a licence from *IMS*, the world leader in data collection on pharmaceutical sales and prescriptions, that would give it access to *IMS*'s copyrighted format for processing regional sales data in Germany, the so-called '1,860 brick structure'. After considering whether the brick structure might be an indispensable requirement for *NDC*, as required by the *Bronner* judgment<sup>251</sup>, the Court went on to consider the questions of whether a refusal to license *NDC* might exclude all competition in a secondary market<sup>252</sup>, and whether it might prevent the emergence of a new product<sup>253</sup>. On the latter point the Court agreed with Advocate General Tizzano that, in achieving a balance between the need to protect the economic freedom of the owner of an intellectual property right on the one hand and the protection of competition on the other:

the latter can prevail *only where refusal to grant a licence prevents the development of the secondary market to the detriment of consumers*<sup>254</sup> (emphasis added).

In seeking some limitation to what might be meant by 'exceptional circumstances', this last statement of the Court of Justice in *IMS* was helpful: even if one acknowledges that there is room for debate as to what is meant by 'the development of the secondary market' – what, for example, is a 'new' product – nevertheless the Court establishes clearly that there is no

<sup>248</sup> Case C-7/97 [1998] ECR I-7791, [1999] 4 CMLR 112.

<sup>249</sup> Case C-418/01 [2004] ECR I-5039, [2004] 4 CMLR 1543; for comment see Sufrin 'The *IMS* Case' (2004) 3 Competition Law Journal 18; Brinker 'Essential Facility Doctrine and Intellectual Property Law: Where does Europe Stand in the Aftermath of the *IMS Health* Case?' [2004] Fordham Corporate Law Institute (ed Hawk), 137; Eilmansberger 'The Essential Facilities Doctrine under Art. 82: What is the State of Affairs after *IMS Health* and *Microsoft*?' <sup>250</sup> Note that the Commission had adopted interim measures against *IMS* in *NDC Health/IMS: (Interim Measures)* OJ [2002] L 59/18, [2002] 4 CMLR 111; for comment see Korah 'The Interface between IP and Antitrust: The European Experience' (2001–02) 69 Antitrust Law Journal 801; Fine 'NDC/IMS: In Response to Professor Korah' (2002) 70 Antitrust Law Journal 247; the Presidents of the General Court and the Court of Justice suspended the Commission's decision pending the General Court's final judgment; both noted that there was a serious dispute as to whether the circumstances in *IMS* were exceptional: Case T-184/01 R [2001] ECR II-3193, [2002] 4 CMLR 58 (President of General Court Order), upheld on appeal Case C-481/01 P (R) [2002] ECR I-3401, [2002] 5 CMLR 44 (President of the Court of Justice Order); in due course the Commission withdrew the interim measures decision, so that the appeal to the General Court was itself withdrawn: see Commission Press Release IP/03/1159, 13 August 2003.

<sup>251</sup> See ch 17, 'Is the product to which access is sought indispensable to someone wishing to compete in the downstream market?', pp 701–707 on the meaning of indispensability in this context.

<sup>252</sup> Case C-418/01 [2004] ECR I-5039, [2004] 4 CMLR 1543, paras 40–47.

<sup>253</sup> *Ibid*, paras 48–50. <sup>254</sup> *Ibid*, para 48.

right to a licence simply to duplicate what the owner of the intellectual property right in question is already doing<sup>255</sup>.

#### (v) *The Microsoft case*

The *Magill* and the *IMS* cases established the possibility of a claim to a licence under Article 102 in exceptional circumstances, in particular where the licensee intended to produce a new product for which there was a potential consumer demand. The potential significance of this approach was dramatically revealed in the Commission's decision in the *Microsoft* case of 24 March 2004<sup>256</sup>. The Commission held that Microsoft was dominant in two markets, one for personal computer operating systems and the other for work group server operating systems. The Commission held that Microsoft had abused its dominant position by refusing to supply competitors with interoperability information to enable them to develop and distribute products that would compete with Microsoft's on the market for servers. The Commission also found Microsoft guilty of an abuse by tying its operating system with its Windows Media Player<sup>257</sup>. For the two abuses Microsoft was fined €497 million. The Commission's findings of abuse, and the fine, were upheld on appeal to the General Court in *Microsoft v Commission*<sup>258</sup>. A number of points should be noted about the abusive refusal to supply.

#### (A) *The Commission and the General Court assumed that Microsoft enjoyed intellectual property protection*

The first point is that the Commission and the General Court proceeded on the assumption that Microsoft's interoperability information was protected by the law of intellectual property, without actually reaching a conclusion on the point<sup>259</sup>. The Court noted that, in making this assumption, the Commission had imposed upon itself the strictest legal test, that is to say the one most favourable to Microsoft<sup>260</sup>.

#### (B) *The General Court's summary of the applicable law*

The General Court then proceeded to analyse the relevant case law, referring in particular to *Magill*, *Bronner* and *IMS Health*, from which it drew the following conclusion:

331 It follows from the case law cited above that the refusal by an undertaking holding a dominant position to license a third party to use a product covered by an intellectual property right cannot in itself constitute an abuse of a dominant position within the meaning of Article [102 TFEU]. It is only in exceptional circumstances that the exercise

<sup>255</sup> Ibid, para 239.

<sup>257</sup> See ch 17, 'Tying', pp 688–696 for discussion of the tying infringement; see also McMahon 'Interoperability: "Indispensability" and "Special Responsibility" in High Technology Markets' (2007) 9 *Tulane Journal of Technology and Intellectual Property* 123.

<sup>258</sup> Case T-201/04 [2007] ECR II-3601, [2007] 5 CMLR 846; for discussion of the case by Commission officials see Kramler, Buhr and Wynn 'The judgment of the Court of First Instance in the Microsoft case' (2007) 3 *Competition Policy Newsletter* 39; see also Howarth and McMahon "'Windows has Performed an Illegal Operation": The Court of First Instance's Judgment in Microsoft v Commission' (2008) 29 *ECLR* 117.

<sup>259</sup> Case T-201/04 [2007] ECR II-3601, [2007] 5 CMLR 846, paras 283–290.

<sup>260</sup> Ibid, para 284.

of the exclusive right by the owner of the intellectual property right may give rise to such an abuse.

332 It also follows from that case law that the following circumstances, in particular, must be considered to be exceptional:

- in the first place, the refusal relates to a product or service indispensable to the exercise of a particular activity on a neighbouring market;
- in the second place, the refusal is of such a kind as to exclude any effective competition on that neighbouring market;
- in the third place, the refusal prevents the appearance of a new product for which there is potential consumer demand.

333 Once it is established that such circumstances are present, the refusal by the holder of a dominant position to grant a licence may infringe Article [102 TFEU] unless the refusal is objectively justified.

334 The Court notes that the circumstance that the refusal prevents the appearance of a new product for which there is potential demand is found only in the case law on the exercise of an intellectual property right.

### (C) *The General Court's benign application of the 'new product' requirement*

The Court concluded that the requirement of indispensability was satisfied<sup>261</sup> and that all effective competition would be eliminated on a secondary market<sup>262</sup>. A notable feature of the General Court's judgment is its treatment of the 'new product' requirement<sup>263</sup>. The Court began by noting that this consideration was one that should be understood in the context of Article 102(2)(b) which prohibits abusive conduct which consists of 'limiting production, markets or technical development to the prejudice of consumers'<sup>264</sup>. However the Court did not make a finding, nor did it require the Commission to have made a finding, that any specific new product – such as the composite TV listings magazine in *Magill* – would have resulted from the provision of interoperability information; rather the Court said that the new product criterion should be read to include a restriction of technical development<sup>265</sup>, and that the Commission's emphasis on this factor was not manifestly incorrect<sup>266</sup>. In the Court's view Microsoft's refusal meant that consumers were increasingly locked into Microsoft's platform at the work group server level<sup>267</sup>; and that competitors were prevented from developing operating systems distinguishable from the Windows systems already on the market<sup>268</sup>. The Court concluded with the rather bizarre statement that Microsoft had 'impaired the effective competitive structure on the work group server operating systems market by acquiring a significant market share on that market'<sup>269</sup>. The General Court rejected Microsoft's claim that its behaviour was objectively justified<sup>270</sup>.

The Court seems to have taken a somewhat benign approach to the 'new product' rule in this judgment<sup>271</sup>. It can be anticipated that future cases will have to examine further the scope of the new product rule, both as to the 'newness' of the product and the possibility that a restriction of technical development may suffice<sup>272</sup>.

<sup>269</sup> Ibid, para 664.

<sup>270</sup> Ibid, paras 688–712.

<sup>271</sup> See Vickers 'A Tale of Two EC Cases: *IBM and Microsoft*' (2008) 4 Competition Policy International 3.

<sup>272</sup> On this point see para 62 of the Advocate General's Opinion in Case C-418/01 *IMS Health GmbH & Co OHG v NDC Health GmbH & Co KG* [2004] ECR I-5039, [2004] 4 CMLR 1543; see also O'Donoghue and Padilla *The Law and Economics of Article 82 EC* (Hart Publishing, 2006), pp 445–450.

**(D) Remedy**

An obvious difficulty with a case such as *Microsoft* is to determine an appropriate remedy, and to ensure that there is proper compliance. Courts in the US are reluctant to make positive orders that require supervision<sup>273</sup>. After the Commission's decision in *Microsoft* in March 2004 there were protracted negotiations between the Commission and Microsoft as to whether the latter was making the necessary interoperability information available to the market on 'RAND' terms (reasonable and non-discriminatory). The Commission appointed a Trustee to provide technical advice on compliance<sup>274</sup>, although the General Court subsequently ruled that the Commission lacked the legal power to have done so<sup>275</sup>. The Commission decided in July 2006 that Microsoft had been guilty of failing to provide interoperability information, as required by its decision, from 16 December 2005 to 20 June 2006, and therefore imposed a daily periodical payment penalty of €1.5 million on Microsoft which totalled €280.5 million<sup>276</sup>. In February 2008 the Commission imposed a further penalty of €899 million for charging unreasonable prices for the information from 21 June 2006 until 21 October 2007<sup>277</sup>. In October 2007 the Commission announced that it had finally reached agreement with Microsoft on compliance with its decision<sup>278</sup>.

**(B) The Commission's Guidance on Article 102 Enforcement Priorities**

The Commission provides some insights into its thinking on refusal to license intellectual property or to provide proprietary information in paragraphs 75 to 90 of its *Guidance on Article 102 Enforcement Priorities*<sup>279</sup>. The *Guidance* does not purport to state the law under Article 102; rather it explains the factors that inform the Commission's enforcement activity. Refusals to supply will be an enforcement priority if the Commission is satisfied that:

- the refusal relates to a product or service that is objectively necessary to be able to compete effectively on a downstream market
- the refusal is likely to lead to the elimination of effective competition on the downstream market<sup>280</sup> and
- the refusal is likely to lead to consumer harm.

It is noticeable that the Commission applies the same factors to a refusal to license intellectual property rights as to other types of refusal to supply, although it may well be more difficult to establish them in such cases. In deciding whether a refusal is likely to lead to consumer harm the Commission specifically says that it would look to see whether a refusal would result in innovative products not being brought to the market or follow-on

<sup>273</sup> See ch 17, 'Is the product to which access is sought indispensable to someone wishing to compete in the downstream market?', pp 701–707, discussing the *Trinko* case.

<sup>274</sup> See eg Commission Press Release IP/05/1215, 5 October 2005.

<sup>275</sup> Case T-201/04 *Microsoft Corp v Commission* [2007] ECR II-3601, [2007] 5 CMLR 846, paras 1251–1279.

<sup>276</sup> Commission decision of 12 July 2006.

<sup>277</sup> Commission decision of 27 February 2008, on appeal Case T-167/08 *Microsoft Corp v Commission*, not yet decided.

<sup>278</sup> Commission Press Release IP/07/1567, 22 October 2007; see also Commission MEMO/08/106, 21 February 2008.

<sup>279</sup> OJ [2009] C 45/7; for a general discussion see ch 5, 'The Commission's *Guidance on Article 102 Enforcement Priorities*', pp 174–177.

<sup>280</sup> On this point the *Guidance on Article 102 Enforcement Priorities* does not refer to, but is consistent with, paras 332 and 563 of the General Court's judgment in Case T-201/04 *Microsoft Corp v Commission* [2007] ECR II-3601, [2007] 5 CMLR 846.

innovation being stifled<sup>281</sup>. The onus is on the dominant firm to demonstrate any negative impact which an obligation to supply is likely to have on its own level of innovation<sup>282</sup>.

### (C) Collecting societies

Article 102 may be applied to the activities of collecting societies, that is to say organisations that manage copyright on behalf of authors and publishers; in particular they collect royalties from the media, nightclubs and other users on behalf of their members and distribute them in return for a fee. Article 102 has been invoked both by the Commission<sup>283</sup> and before domestic courts, several of which have referred matters to the Court of Justice under Article 267 TFEU<sup>284</sup>.

The Court of Justice has indicated that there is nothing intrinsically objectionable about the establishment of collecting societies, which may be necessary in order that individual artists can obtain a reasonable return for their endeavours<sup>285</sup>. However the activities of a society may amount to a breach of Article 102 in various ways. Of particular significance in EU law terms will be the tendency of national societies to discriminate against undertakings from other Member States<sup>286</sup>. In *CISAC* the Commission prohibited the International Confederation of Authors and Composers and 24 collecting societies from restricting competition by limiting their ability to offer services outside the domestic territory of each collecting society<sup>287</sup>. The Commission rejected arguments that the restrictive practices were justified by the territorial nature of copyright<sup>288</sup> or by a need for geographical proximity between the collecting society which grants the licence and the commercial user<sup>289</sup>; it concluded that the practices did not satisfy Article 101(3)<sup>290</sup>.

Other aspects of collecting societies' activities have been condemned, such as clauses in the constitution which unreasonably restrict an author's right to act unilaterally and

<sup>281</sup> *Guidance on Article 102 Enforcement Priorities*, para 87, which specifically cites the judgments of the Court of Justice and General Court in respectively *IMS* and *Microsoft* in support of this approach.

<sup>289</sup> *Ibid*, paras 171–199, note that the Commission's finding was confined to exploitations by satellite, Internet and cable transmission, for which local presence was not necessary to monitor the use of a licence; 'offline' forms of exploitation (concerts, radio, discotheques, bars, etc) were not the subject of that part of the decision.

<sup>290</sup> *Ibid*, paras 233–255.

provisions which are unreasonable vis-à-vis the media or which attempt to extend the protection of copyright to non-copyrighted works<sup>291</sup>.

## (D) Miscellaneous cases concerning intellectual property rights

### (i) Unlawful acquisition of technology

In *Tetra Pak Rausing v Commission*<sup>292</sup> the General Court upheld the Commission's decision<sup>293</sup> that it was an abuse of Tetra Pak's dominant position in the market for cartons and machines for packaging milk to acquire Liquipak and thereby obtain the benefit of an exclusive licence relating to technology for a new method of sterilising cartons suitable for long-life milk. This finding was despite the fact that the licence complied with the provisions of the block exemption in force at the time on patent licensing agreements.

### (ii) Demanding excessive royalties

In *Eurofix-Bauco v Hilti*<sup>294</sup> the Commission held that it was an abuse to demand an 'excessive' royalty with the sole object of blocking, or at any rate unreasonably delaying, a licence of right which was available under UK patent law. This was seen as part of Hilti's strategy of preventing competition in respect of its nail cartridges.

In *Duales System Deutschland*<sup>295</sup> the Commission concluded that it was an abuse of a dominant position for DSD, an undertaking that operated a comprehensive system for the collection and recycling of waste in Germany, to contain a provision in its trade mark agreement that its clients would pay a royalty for sales packaging bearing its 'Green Dot' trade mark, irrespective of whether the client actually used the services of DSD. This could dissuade those clients from using the services of competitors. The Commission's decision was upheld on appeal to the General Court<sup>296</sup> and again on appeal to the Court of Justice<sup>297</sup>.

In *Qualcomm* the Commission investigated complaints that Qualcomm, the owner of patents in the European standard for third generation (3G) mobile telephony technology, had failed to license its technology on FRAND (fair, reasonable, and non-discriminatory) terms<sup>298</sup>, but decided that the case was no longer an administrative priority<sup>299</sup>.

<sup>291</sup> The most thorough decision on these issues remains the Commission's decision in *Re GEMA* JO [1971] L 134/15, [1971] 1 CMLR D35; on the lawfulness of 'supplementary mechanical reproduction fees' see Case 402/85 *Basset v SACEM* [1987] ECR 1747, [1987] 3 CMLR 173.

<sup>292</sup> Case T-51/89 [1990] ECR II-309, [1991] 4 CMLR 334.

<sup>293</sup> *Tetra Pak I (BTG Licence)* OJ [1988] L 272/27, [1990] 4 CMLR 47.

<sup>294</sup> OJ [1988] L 65/19, [1989] 4 CMLR 677, para 78, upheld on appeal Case T-30/89 *Hilti AG v Commission* [1991] ECR II-1439, [1992] 4 CMLR 16, para 99.

<sup>295</sup> OJ [2001] L 166/1, [2001] 5 CMLR 609, paras 111–113.

<sup>297</sup> Case C-385/07 P *Duales System Deutschland GmbH v Commission* [2009] ECR I-6155, [2009] 5 CMLR 2215.

<sup>298</sup> See Commission MEMO/07/389, 1 October 2007; see also Piesiewicz and Schellingerhout on the issue of setting standards in 'Intellectual property rights in standard setting from a competition law perspective' (2007) (Summer) *Competition Policy Newsletter* 36; and Commission MEMO/09/549, 10 December 2009: following its acquisition of Robert Bosch's mobile telephony patent portfolio and discussions with the Commission, ICom agreed to take over Bosch's commitment to grant irrevocable patent licences on FRAND terms.

<sup>299</sup> See Commission MEMO/09/516, 24 November 2009.

### (iii) Vexatious behaviour and abuse of process

In *BBI/Boosey and Hawkes: Interim Measures*<sup>300</sup> the Commission seems to have regarded it as an aspect of Boosey and Hawkes' abusive behaviour to have brought vexatious litigation against an undertaking for 'slavish imitation' of its products<sup>301</sup>. On one occasion the Commission intimated that it might be an abuse for a firm in a dominant position to register a trade mark knowing that a competitor already uses that mark<sup>302</sup>.

In *AstraZeneca*<sup>303</sup> the Commission imposed a fine of €60 million on AstraZeneca for misuse of regulatory procedures. AstraZeneca had a patent for a highly successful drug, Losec. When a patent expires, it is normal for so-called 'generic' manufacturers to enter the market and to sell the drugs in question at considerably lower prices than were charged during the period of patent protection. AstraZeneca was found by the Commission to have abused regulatory procedures in two ways. First, it had succeeded in persuading various patent authorities to grant it 'supplementary protection certificates', extending the period of patent protection, on the basis of misleading information. Secondly, AstraZeneca held a market authorisation that allowed the drug to be sold in a capsule form. AstraZeneca withdrew the capsules from the market, selling them in tablet form instead. This meant that the generics companies could no longer market their capsules. On appeal the General Court largely upheld the Commission's decision<sup>304</sup>.

A fundamental disagreement between AstraZeneca and the Commission concerned the concept of abuse. AstraZeneca argued that an abuse can exist only when a dominant undertaking has wilfully acquired or enforced the patent knowing that it is invalid. The General Court rejected this<sup>305</sup>. In paragraph 355 of its judgment the General Court held:

the submission to the public authorities of misleading information liable to lead them into error and therefore to make possible the grant of an exclusive right to which an undertaking is not entitled, or to which it is entitled for a shorter period, constitutes a practice falling outside the scope of competition on the merits which may be particularly restrictive of competition.

The Court stated that a dominant firm has a 'special responsibility' not to impair undistorted competition that requires it, at the very least, to inform the public authorities of any errors in information it provides to them<sup>306</sup>. Further disagreements between AstraZeneca and the Commission arose as to whether the misleading representations were capable of restricting competition; and as to whether the Commission had based its findings upon adequate evidence and drawn correct conclusions from that evidence. The judgment of the General Court went against AstraZeneca on all these points.

<sup>300</sup> OJ [1987] L 286/36, [1988] 4 CMLR 67, para 19.

<sup>301</sup> See further ch 17, 'Vexatious litigation', p 713.

<sup>302</sup> *Osram/Airam*, XIth Report on Competition Policy (1981), point 97.

<sup>303</sup> Commission decision of 15 June 2005; see De Souza 'Competition in Pharmaceuticals: the challenges ahead post AstraZeneca' (2007) (Spring) *Competition Policy Newsletter* 39; Gunther and Breuvert 'Misuse of Patent and Drug Regulatory Approval Systems in the Pharmaceutical Industry: an Analysis of US and EU Converging Approaches' (2005) 26 ECLR 669; Murphy 'Abuse of regulatory procedures – the AstraZeneca case: Parts 1, 2 and 3' (2009) 30 ECLR 223, 289 and 314.

<sup>304</sup> Case T-321/05 *AstraZeneca AB v Commission* [2010] ECR I-000, [2010] 5 CMLR 1585, paras 239–294 (dominance), paras 352–381 (legal analysis of the first abuse) and paras 474–613 (proof of the first abuse) and paras 666–696 (legal analysis of the second abuse) and paras 757–865 (proof of the second abuse).

<sup>305</sup> *Ibid*, para 356: 'proof of the deliberate nature of the conduct and of the bad faith of the undertaking in a dominant position is not required for the purposes of identifying an abuse of a dominant position'; see also paras 493 and 814; the Commission may, nevertheless, take into account evidence of anti-competitive intention: *ibid*, para 359.

<sup>306</sup> *Ibid*, para 358.

The Court overturned some of the findings of the second abuse for lack of evidence<sup>307</sup>, but it did not question the principle that such behaviour can be abusive<sup>308</sup>. The General Court rejected a claim by AstraZeneca that it was being made subject to an obligation to protect the interests of generics manufacturers or parallel importers by maintaining the marketing authorisations<sup>309</sup>. The case has been appealed to the Court of Justice<sup>310</sup>.

In *Rambus* the Commission sent a statement of objections alleging that Rambus had infringed Article 102 by conducting a so-called 'patent ambush'. This refers to the phenomenon of an undertaking participating in the setting of an industry standard, but doing so in a deliberately deceptive manner by not disclosing the existence of patents that would be necessary for anyone making use of the standard. This means that, once the standard is set, the owner of the patents will be able to demand unreasonable royalties from licensees that need access to the technology in question<sup>311</sup>. The Commission subsequently focused on whether Rambus was charging too much for its technology. In the end the Commission accepted commitments from Rambus to bring an end to the Article 102 proceedings against it: Rambus agreed to a worldwide cap on its royalty rates for five years<sup>312</sup>. The commitments therefore addressed a symptom of the patent ambush rather than the alleged ambush itself. The Commission's intervention in this case followed an earlier action in the US, where the Federal Trade Commission required Rambus to license its technology for computer memory subject to maximum royalty rates<sup>313</sup>.

## 6. UK Law

### (A) Licences of intellectual property rights: the Chapter I prohibition

The Chapter I prohibition in the Competition Act 1998 applies to agreements that have as their object or effect the prevention, restriction or distortion of competition<sup>314</sup>. There are no specific provisions in the legislation on licences of intellectual property rights, and

<sup>307</sup> Ibid, paras 824–861; the fine on AstraZeneca was reduced to €52.5 million for this reason.

<sup>308</sup> Ibid, para 672. <sup>309</sup> Ibid, paras 815–817.

<sup>310</sup> Case C-457/10 P *AstraZeneca AB v Commission*, not yet decided.

<sup>311</sup> See Commission MEMO/07/330, 23 August 2007; the Commission closed an investigation of whether Boehringer, a pharmaceutical company, had infringed Article 102 by exclusionary 'misuse of the patent system': see Commission Press Release 1P/11/842, 6 July 2011.

<sup>312</sup> Commission decision of 9 December 2009, on appeal in Case T-148/10 *Hynix Semiconductor v Commission*, not yet decided; for comment see Schellinghouth and Cavicchi 'Patent ambush in standard-setting: the Commission accepts commitments from Rambus to lower memory chip royalty rates' (2010) 1 *Competition Policy Newsletter* 32.

<sup>314</sup> For a general account see ch 9, 'The Chapter I Prohibition', pp 333–360.

the Office of Fair Trading ('the OFT') has not published a guideline on the subject<sup>315</sup>. As a general proposition it can be anticipated that the Chapter I prohibition will be applied to agreements in the same way as Article 101 TFEU<sup>316</sup>. The possibility exists that some of the jurisprudence of the EU Courts might not be applied to a purely domestic agreement in so far as that jurisprudence reflects single market considerations that need not be applied within the UK<sup>317</sup>.

Perhaps the most important provision of the Competition Act as far as licences of intellectual property rights are concerned is section 10, which provides for so-called parallel exemption<sup>318</sup>. This section means that any agreement that is exempt under Regulation 772/2004, or that would be if the agreement in question were to have an effect on trade between Member States, is also exempt from the Chapter I prohibition. This means that many agreements are exempt from both EU and UK law, and that there is no need for the UK to adopt a block exemption of its own for technology transfer agreements.

### **(B) Other agreements relating to intellectual property rights**

It is reasonable to assume that domestic law will, subject to the point about single market considerations, be interpreted consistently with the jurisprudence and decisional practice under Article 101; and that the UK institutions will have regard to the Commission's *Technology Transfer Guidelines*<sup>319</sup>.

### **(C) Anti-monopoly control of intellectual property rights: the Chapter II prohibition and market investigations**

The Chapter II prohibition could apply to abusive behaviour in relation to intellectual property rights; the decisional practice of the Commission and the judgments of the EU Courts would of course be relevant to the application of this prohibition<sup>320</sup>. The OFT has said that a firm's conduct is not immune from the Chapter II prohibition purely on the basis that its market power stems from the holding of intellectual property rights<sup>321</sup>. In the case of *Capita Business Services Ltd and Bromcom Computers plc*<sup>322</sup> Capita gave the OFT voluntary assurances that it would provide 'interface information' to a third party to enable it to have access to data on Capita's server; the case was therefore closed.

The market investigation provisions of the Enterprise Act 2002 may also be relevant where features of a market have an adverse effect on competition as a result of intellectual property rights. These provisions have been described in chapter 11. The Competition Commission has published some reports under the now-repealed

<sup>315</sup> A draft Guideline was published in November 2001, OFT 418, but it was not published in final form.

## Mergers (1) – introduction

### CHAPTER CONTENTS

1. Introduction	809	5. Why Do Firms Merge?	813
2. Terminology	809	6. What is the Purpose of Merger Control?	816
3. Merger Activity	811	7. Designing a System of Merger Control	826
4. The Proliferation of Systems of Merger Control	812		

### 1. Introduction

This chapter briefly introduces the subject of merger control. This book so far has been concerned essentially with two issues: anti-competitive agreements and abusive conduct. Merger control is an important third component of most, though not all, systems of competition law. The EU Merger Regulation ('the EUMR') will be described in chapter 21 and the merger provisions in the UK Enterprise Act 2002 in chapter 22. Before doing so it may be useful to make some brief preliminary observations about the subject of mergers generally and about systems of merger control in particular. The issues introduced in this chapter will be discussed in more depth in the two that follow.

### 2. Terminology

#### (A) The meaning of 'merger' and 'concentration'

A true merger involves two separate undertakings merging entirely into a new entity: a high-profile example of this was the fusion in 1996 of Ciba-Geigy and Sandoz to form the major pharmaceutical and chemical company Novartis<sup>1</sup>; a further example in 2000 was the creation of GlaxoSmithKline as a result of the merger of Glaxo Wellcome and SmithKline Beecham<sup>2</sup>. However it is important to understand that the expression 'merger' as used in competition policy includes a far broader range of corporate transactions than full mergers of this kind. Where A acquires all, or a majority of, the shares in B, this would be described as a merger if it results in A being able to control the strategic business decisions of B; even the acquisition of a minority shareholding may be sufficient, in particular circumstances, to qualify as a merger: under the EUMR the question

<sup>1</sup> Case M 737, decision of 17 July 1996, OJ [1997] L 201/1; the Commission's decisions are available on DG COMP's website at [www.ec.europa.eu/competition/mergers/cases](http://www.ec.europa.eu/competition/mergers/cases).

<sup>2</sup> Case M 1846, decision of 8 May 2000.

is whether A will acquire ‘the possibility of exercising decisive influence’ over B<sup>3</sup>; under the Enterprise Act the question is whether A would at least have ‘material influence’ over B<sup>4</sup>. The acquisition of assets – for example a well-known brand name – can amount to a merger<sup>5</sup>. Two or more undertakings which merge part of their businesses into a newly-established joint venture company, ‘Newco’, may be found to be parties to a merger<sup>6</sup>. In each case the essential question is whether previously independent businesses have come or will come under common control with the consequence that, in the future, the market will function less competitively than it did prior to the merger. For the sake of convenience the term ‘merger’ will be used in this and the following chapters to encompass all these phenomena unless the context requires a different usage. When discussing the EU system an alternative expression, ‘concentration’ will also sometimes be used, since that is the word used in the EUMR itself.

## (B) The horizontal, vertical and conglomerate effects of mergers

Competition law is concerned about the possibility that a merger will lead to the market being less competitive in the future than it currently is, leading to adverse effects for consumers. The main concern of competition authorities when assessing a merger is whether it will have adverse *horizontal* effects; there may also be concerns about *vertical* and *conglomerate* effects, but these concerns are much rarer. It is possible that the same case can give rise to horizontal, vertical and conglomerate concerns<sup>7</sup>.

### (i) Horizontal effects

Horizontal effects occur where a merger takes place between actual or potential competitors in the same product and geographic markets and at the same level of the production or distribution cycle. As a general proposition the horizontal effects of mergers present a much greater danger to competition than vertical (or conglomerate) ones, in the same way that horizontal agreements are treated more strictly than vertical agreements. Horizontal mergers may be scrutinised both for their ‘unilateral’ or ‘non-coordinated’ effects and for their ‘coordinated’ effects<sup>8</sup>.

### (ii) Vertical effects

Vertical effects may be experienced where a merger occurs between firms that operate at different, but complementary, levels of the market for the same final product: for example A might produce a raw material (an ‘upstream’ product) for a product produced by B (a ‘downstream’ product). Often such mergers will enhance, or be neutral, in terms of economic efficiency, but there is a possibility that vertical integration may have a harmful effect on competition, either because it gives rise to a risk of the market becoming

<sup>3</sup> See ch 21, ‘The concept of control’, pp 834–836.

<sup>4</sup> See ch 22, ‘Enterprises ceasing to be distinct’, pp 919–920.

<sup>5</sup> See eg Case M 890 *Blokker/Toys ‘R’ Us*, decision of 26 June 1997, OJ [1998] L 316/1.

<sup>6</sup> See in particular ch 21, ‘Joint ventures – the concept of full-functionality’, pp 837–838 on the application of the EUMR to so-called ‘full-function’ joint ventures.

<sup>7</sup> See eg the European Commission’s decision in Case M 2220, *General Electric/Honeywell*, decision of 3 July 2001, OJ [2004] L 48/1; on appeal to the General Court the Commission’s finding on horizontal effects was upheld but the findings of vertical and conglomerate effects were annulled: see Case T-210/01 *General Electric v Commission* [2005] ECR II-5575, [2006] 4 CMLR 686.

<sup>8</sup> See further ‘Unilateral or non-coordinated effects’, pp 818–819 below; on horizontal effects under the EUMR see ch 21, ‘Horizontal mergers’, pp 868–876; for their treatment under UK law see ch 22, ‘Horizontal mergers’, pp 935–937.

foreclosed to third parties or because it could lead to collusion between the merged entity and third parties<sup>9</sup>.

### (iii) Conglomerate effects

There have been a few occasions on which competition authorities have had concerns about mergers not on the basis of horizontal or vertical effects, but because of possible conglomerate effects: for example that a merger between A and B who are neither horizontal competitors, nor functionally related vertically, might enable the merged entity AB to use its market power in two different but related, or even unrelated, markets to foreclose competitors. Whether conglomerate mergers should be controlled at all is a matter of controversy: the Department of Justice and the Federal Trade Commission in the US long ago abandoned any interest in the conglomerate effects of mergers<sup>10</sup>; however the European Commission has expressed concern about the ‘portfolio’ or ‘range’ or ‘conglomerate’ effects of mergers on various occasions, though its adverse findings on conglomeracy in both *Tetra Laval/Sidel*<sup>11</sup> and in *General Electric/Honeywell International*<sup>12</sup> were annulled on appeal by the General Court<sup>13</sup>.

## 3. Merger Activity

In the corporate world there are frequent bouts of ‘merger mania’ when the level of merger activity is very high<sup>14</sup>; enormous fees are earned by financial and legal (including competition law) advisers during these periods. For example there was a very high degree of merger activity in the second half of the 1980s<sup>15</sup>, and again in the mid-1990s<sup>16</sup>. From 1998 to 2001 there was a period of frenetic merger activity, although this then declined markedly as the global economy slowed. Another upswing commenced in 2005 and continued through to 2007, not least as private equity firms became involved in ever-larger acquisitions of well-established firms. In a speech in June 2007 Commissioner Kroes spoke of a ‘tsunami’ of mergers which she welcomed since it involved the cross-border restructuring of markets in many sectors from energy to banking and from air transport to telecommunications<sup>17</sup>. The financial crisis that erupted in 2008 led to a sharply reduced amount of merger activity in the following years. The European Commission’s Table of Statistics, reproduced in chapter 21<sup>18</sup>, shows clearly the peaks and troughs of merger notifications under the EUMR: from 211 in 2003 up to 402 in 2007 and down to 259 in 2009.

<sup>9</sup> See further ‘Vertical effects’, pp 819–820 below; on vertical effects under the EUMR see ch 21, ‘Vertical mergers’, pp 878–879; for their treatment under UK law see ch 22, ‘Non-horizontal mergers’, pp 937–939.

<sup>15</sup> See eg the 1986 *Annual Report of the Director General of Fair Trading*, pp 27–28.

<sup>16</sup> See eg the 1995 *Annual Report of the Director General of Fair Trading*, p 13.

<sup>17</sup> Neelie Kroes speech of 5 June 2007, available at [www.ec.europa.eu/competition/speeches](http://www.ec.europa.eu/competition/speeches).

<sup>18</sup> See ch 21, ‘Table of EUMR statistics’, p 899.

A notable feature of mergers in recent years has been their increasing complexity, size and geographical reach. Very large mergers have taken place in many sectors as companies have sought to restructure and consolidate their place in an increasingly global market. For example in the pharmaceuticals industry Pfizer and Warner-Lambert merged to become the largest pharmaceutical company in the world<sup>19</sup>. Major mergers have taken place in the car industry, for example between Daimler-Benz and Chrysler<sup>20</sup>, between Ford and Volvo<sup>21</sup>, between Renault and Nissan<sup>22</sup>, between General Motors and Saab<sup>23</sup> and between Fiat and Chrysler<sup>24</sup>. In the oil industry Exxon merged with Mobil to become the largest oil company in the world<sup>25</sup>, and BP Amoco merged with Arco<sup>26</sup>. Many other industries have seen a high degree of merger activity, not least the legal profession. Several times in 1999 the *Financial Times* announced ‘the biggest deal in corporate history’. For example the merger of America Online and Time-Warner<sup>27</sup>, announced in January 1999, enjoyed ‘biggest deal’ status until the VodaphoneAirTouch/Mannesmann merger was announced in February<sup>28</sup>; the latter case was also of interest in that it was the first successful hostile bid for a German company.

#### 4. The Proliferation of Systems of Merger Control

A particularly noticeable feature of competition policy in the last 20 years or so has been the proliferation of systems of competition law around the world. More than 110 countries now have competition law, and at least 100 of these laws include merger control<sup>29</sup>. The profusion of systems of merger control has a greater impact on most firms than rules against cartels and abusive behaviour, not because these firms disregard the latter but because their transactions are often subject to mandatory pre-notification under the former. This means that any sizable transaction with an international dimension – of which there are many – may have to be notified to 10, 20 or even more competition authorities. Law firms advising on international transactions must be able to obtain access to all the relevant merger laws and guidelines in order to determine where filings must be made<sup>30</sup>. Many competition lawyers in firms handling such cases will spend a substantial amount of time overseeing and coordinating a number of national filings; the initial enthusiasm of junior competition lawyers for such work often fades when it becomes apparent that the coordination of filings in Australia, Europe and the US entails an 18-hour working day or longer. It is important for lawyers to manage the expectations

<sup>19</sup> Case M 1878, decision of 22 May 2000.

<sup>28</sup> Case M 1795, decision of 12 April 2000.

<sup>29</sup> Online access to information about countries with competition (including merger) laws can be obtained through the *Competition Law Toolkit* of the Asian Development Bank, available at [www.adb.org/Documents/Others/OGC-Toolkits/Competition-Law/default.asp](http://www.adb.org/Documents/Others/OGC-Toolkits/Competition-Law/default.asp).

<sup>30</sup> Some helpful sources are Rowley and Baker *Merger Control: International Mergers* (Sweet & Maxwell looseleaf); Dabbah and Lasok *Merger Control Worldwide* (Cambridge University Press, 2005); White and Case *2009 Survey of Worldwide Antitrust Merger Notification Requirements* which can be ordered on the Internet at [www.whitecase.com](http://www.whitecase.com); *Worldwide Competition Filing Requirements* (Howrey, 2010); *The Global Merger Control Manual* (Cameron May, 9th ed, 2010, eds Laing and Gómez); *Merger Control 2011* (Global Legal Group, 2011); *Merger Control: The International Regulation of Mergers and Joint Ventures* (Global Competition Review, 2011).

<sup>21</sup> Case M 1452, decision of 26 March 1999.

<sup>23</sup> Case M 1847, decision of 28 February 2000.

of clients who may not fully appreciate how long and tortuous the regulatory road may be ahead of them before the transaction is able to proceed.

The problems that multiple notification can cause to the merging firms themselves – for example the cost of multiple filing, the workload involved in generating the data necessary for each filing, the delay involved in obtaining clearances from numerous jurisdictions, the differing procedural and substantive laws from one jurisdiction to another – are obvious. One of the major issues facing the ‘world’ of competition law – using this term both in its physical sense and to refer to the constituency of interested parties affected by merger control consisting of competition authorities, legal and business advisers, politicians, economists and the merging firms themselves – is to devise a sensible mechanism for investigating and adjudicating upon mergers having an international dimension in a way that minimises the administrative burden on businesses and competition authorities while at the same time ensuring that mergers do not escape scrutiny which could have detrimental effects upon competition<sup>31</sup>. These issues are under active consideration within various international fora, notably the International Competition Network (‘the ICN’)<sup>32</sup>: the subject of international cooperation has been discussed in chapter 12<sup>33</sup>, while attempts in the EU to avoid multiple filing in the Member States by introducing the idea of the ‘one-stop shop’ of notifying the European Commission will be discussed in chapter 21<sup>34</sup>.

## 5. Why Do Firms Merge?<sup>35</sup>

There are many reasons why firms merge, most of which are beneficial to, or at least not harmful to, the economy; there are others that are more problematic.

### (A) Economies of scale and scope

An obvious explanation for some mergers is the achievement of economies of scale and scope<sup>36</sup>. A firm will produce goods at the lowest marginal cost where it is able to operate at the minimum efficient scale. If it operates on a smaller scale than this, marginal cost will increase and there will be a consequent loss of allocative efficiency. Economies of scale may be *product-specific*, where they enable a product to be produced more cheaply; *plant-specific*, where they mean that the overall use of a multi-product plant is made more rational; or *firm-specific*, where they result in lower overall costs. The globalisation of markets in recent years, as tariff and other barriers to trade have come down and as astonishingly rapid technological changes have altered the nature and structure of markets, has given opportunities to firms to grow into larger geographical markets. It may be that a firm can achieve economies of scale by internal growth; equally, however, it may be that this can most easily be achieved by external growth, that is by merging with other firms.

<sup>31</sup> See Hamner ‘The Globalisation of Law: International Merger Control and competition law in the United States, the European Union, Latin America and China’ (2002) 11(2) *Journal of Transnational Law and Policy* 385, accessible at [www.law.fsu.edu/journals/transnational](http://www.law.fsu.edu/journals/transnational).

<sup>32</sup> The ICN website is [www.internationalcompetitionnetwork.org](http://www.internationalcompetitionnetwork.org).

<sup>33</sup> See in particular ch 12, ‘The Internationalisation of Competition Law’, pp 506–511.

<sup>34</sup> See ch 21, ‘Article 21: one-stop merger control’, pp 844–846.

<sup>35</sup> See further Scherer and Ross *Industrial Market Structure and Economic Performance* (Houghton Mifflin, 3rd ed, 1990), pp 159–167; Andrade, Mitchell and Stafford ‘New Evidence and Perspectives on Mergers’ (2001) 15(2) *Journal of Economic Perspectives* 103.

<sup>36</sup> These concepts are discussed in ch 1, ‘Questioning competition itself’, pp 9–15.

Whereas economies of scale arise from carrying on more of the same activity, economies of scope are the economic benefits generated from carrying on related activities; an obvious example would be lowering overall administrative expenditure through the operation of different lines of production.

Whether mergers actually lead to the achievement of the economies of scale and scope expected of them is another matter: some commentators have argued that in practice the gains anticipated tend to prove illusory<sup>37</sup>.

### **(B) Other efficiencies**

Apart from economies of scale and scope a merger may lead to efficiencies in other ways. For example it may be cheaper to take over a distributor than to set up a distribution network on a contractual basis; backward integration may guarantee supplies to a firm concerned about the availability of raw materials; a merger might mean that a firm will have improved access to loan and equity capital than it had when operating alone. A merger may result in a firm that is better able to carry out research and development and with access to a greater pool of industrial technology; quite often a merger is motivated by a desire to acquire the patents and know-how of a particular firm. Another possibility is that a merged firm may be able to make better use of the management skills of its constituent parts.

### **(C) National champions**

Firms within one nation state – or within one political grouping such as the European Union – may wish to merge in order to become a ‘national champion’ (or a ‘European champion’). Governments may positively encourage mergers that will create larger domestic firms more capable of competing on international markets, although ‘national champions’ free from the disciplining effect of competition on their domestic markets may lack the skills necessary to succeed in the wider world<sup>38</sup>.

### **(D) Management efficiency and the market for corporate control**

An explanation for some mergers is that one firm competes to run another. The threat of a successful takeover bid acts as an important influence upon the existing management of a firm to ensure that it functions as efficiently as possible. Where shareholders are satisfied with the current management’s performance they will not sell their shares to another bidder, unless it is overbidding; the new regime would not be capable of generating greater profits than the existing one. If shareholders are dissatisfied, they may prefer to sell at the price offered and to reinvest the proceeds elsewhere; the result is likely to be that the old management will be replaced by the bidder. According to this argument the ‘market for corporate control’ is a crucial element in the promotion of economic

<sup>37</sup> See Scherer and Ross *Industrial Market Structure and Economic Performance* (Houghton Mifflin, 3rd ed, 1990), pp 167–174; Meeks *Disappointing Marriage: A Study of the Gains from Merger* (Cambridge University Press, 1977); see also the speech by Monti ‘Review of the EC Merger Regulation—Roadmap for the Reform Project’ 4 June 2002, available at [www.europa.eu/competition/speeches](http://www.europa.eu/competition/speeches), and the empirical studies referred to therein; Röller, Stenek and Verboven ‘Efficiency Gains from Mergers’, The Research Institute of Industrial Economics, Working Paper 543 (2000), available at [www.ec.europa.eu/competition/speeches](http://www.ec.europa.eu/competition/speeches).

<sup>38</sup> The European Commission is resolutely opposed to the creation by Member States of ‘national champions’: see ch 21, ‘Outright prohibitions’, p 902; for interesting discussion of the issue see OECD Roundtable *Competition Policy, Industrial Policy and National Champions* 19 October 2009, available at [www.oecd.org/competition](http://www.oecd.org/competition).

efficiency<sup>39</sup>. It is particularly attractive if one agrees with the view that shareholders' influence over directors through the Annual General Meeting has been seriously diminished in listed companies with dispersed share ownership; at least the ability to sell to a bidder exercises some influence on the management of the company's affairs. If the threat of takeovers is considered to have this significant role, this has implications for merger policy: an interventionist approach to mergers on the part of a public authority in itself distorts the market for corporate control and thus weakens its disciplining effect on management.

### (E) Exiting an industry

Mergers present firms that wish to do so with an opportunity of exiting an industry. In a free market it is important to encourage entrepreneurs to invest their money and skills in setting up new businesses and in entering new markets. Just as it is desirable to prevent the erection of barriers to entry and expansion that prevent new firms from competing on the market, so too it is necessary to avoid barriers to exit that make it difficult to leave the market. The incentive to set up a firm, invest risk capital and develop new products may be diminished if it is not possible to sell the enterprise in question as a valuable going concern. It is quite common, for example, for firms to acquire small undertakings which possess useful know-how or intellectual property rights and, from the perspective of the innovator of such technology, the freedom to sell may be an important element in the reward for the risks taken. A strict approach to mergers could have an undesirable effect if it were to make exit unduly difficult.

### (F) Greed, vanity, fear and drugs

Having rehearsed some of the arguments in favour of mergers, and therefore against too strict a system of merger control, some opposing views should be mentioned. A sceptical view is that many mergers cannot be explained in the rational economic terms outlined above, but that instead they are fuelled by the speculative greed of individuals or companies or the personal vanity of a particularly swash-buckling senior executive; it will not take a great deal of imagination to think of certain high-profile entrepreneurs that might answer this description. Some mergers seem to be motivated by simple fear: if every other undertaking in a particular sector appears to be involved in mergers, it may be considered important not to be left behind in the process of industry consolidation. For some individuals 'deal-making' has the same stimulating effect as mood-changing drugs, altogether more exciting than the mundane task of managing a firm well. Even if one shares these sceptical explanations of why firms merge, however, it does not follow that merger control is the appropriate tool to deal with the 'problem'.

<sup>39</sup> See eg Manne 'Mergers and the Market for Corporate Control' (1965) 73 *Journal of Political Economy* 110; Easterbrook and Fischel 'The Proper Role of a Target's Management in Responding to a Tender Offer' (1981) 94 *Harvard Law Review* 1161; Coffee 'Regulating the Market for Corporate Control: a Critical Assessment of the Tender Offer's Role in Corporate Governance' (1984) 84 *Columbia Law Review* 1145; Rock 'Antitrust and the Market for Corporate Control' (1989) 77 *California Law Review* 1367; Bradley 'Corporate Control: Markets and Rules' (1990) 53 *MLR* 170; Wright, Wong and Thompson 'The Market for Corporate Control: an Economic Perspective' in Miller (ed) *The Monopolies and Mergers Yearbook* (Blackwell Business, 1992), pp 32–42.

### (G) Increasing market power

Of course it might be that the real reason why firms wish to merge is that this will eliminate competition between them, increase their market power and give them the ability to restrict output and raise price. It would be very foolish in today's world of vigorous merger control for merging firms to make such a claim for their merger, although it is sometimes surprising what firms do say in press releases, intended to impress shareholders, as to the expected economic benefits of a merger: for example a claim that a merger will 'eliminate wasteful capacity' and return an industry to greater profitability is unlikely to charm a competition authority into submission; even less charming is a press release that announces that 'this merger will create the dominant world player in the market for widgets'<sup>40</sup>. Competition authorities routinely ask for copies of firms' documents (both internal and from external advisers) setting out the business rationale for a particular transaction, and these sometimes contain statements and data that are unhelpful to the prospect of unconditional clearance. The systems of merger control in place in the EU, the UK and elsewhere presumably inhibit the incidence of cases in which firms nakedly seek to achieve market power, but it is important to bear in mind that, in the absence of a system of merger control, firms would be able to do precisely this.

## 6. What is the Purpose of Merger Control?

This brings us to the central question: what is the purpose of merger control? There are many reasons why Governments, firms, shareholders, and individuals might object to mergers. A Government may object to a merger on a number of grounds: for example it might disapprove of a foreign firm taking over a native one, or of a merger that does not fit with its own industrial policy, or of a transaction that would lead to production facilities being closed down leading to unemployment. A firm might object to being the target of a hostile bid, or to a merger between two rivals that might give them a competitive edge. Shareholders (whether legal or natural persons) might be concerned that corporate transactions will have an adverse effect on the value or effectiveness of their shares. Company law is concerned with issues such as the oppression of minority shareholders, and complex regulatory systems also exist to protect shareholders generally. Reference should be made to standard works on the laws and regulations that deal with these matters; in particular in the UK the City Code on Takeovers and Mergers<sup>41</sup> provides an important system of protection. An individual might have qualms about foreign ownership of indigenous firms or the possibility that a takeover might lead to redundancy. These are perfectly understandable concerns, but they are not issues with which competition policy is concerned. Competition policy and competition authorities are predominantly concerned with maintaining the process of competition in the marketplace, not as an end in itself, but as a way of maximising consumer welfare<sup>42</sup>.

Some systems of merger control do allow broader 'public interest' criteria to be taken into account in the overall assessment of a merger, a matter that will be discussed below. However for the most part competition authorities are concerned with just one issue, namely the assessment of the competitive effects of mergers.

<sup>40</sup> See ch 5, 'Evidence of managers', pp 186–187 on the probative value of statements made by an undertaking.

<sup>41</sup> For further information see [www.takeoverpanel.org.uk](http://www.takeoverpanel.org.uk).

<sup>42</sup> See ch 1, 'Consumer protection', pp 20ff.

### (A) Is merger control necessary?

Competition law forbids the abuse of market power: Article 102 TFEU is an obvious example of this. It can reasonably be asked, therefore, why there needs to be a power to prevent the creation or strengthening of market power before it occurs (*ex ante* control) given that there are legal controls to prevent the abuse of market power when it happens (*ex post* control). One answer to this is that merger control is not simply about preventing future abuses: it is also about maintaining competitive market structures which lead to better outcomes for consumers<sup>43</sup>. Another is that Article 102 investigations (and their domestic equivalents) are lengthy, complex and cumbersome, and that competition authorities lack the resources to police every alleged infringement; exclusive reliance on Article 102 would be unlikely to be effective. In the UK both the Office of Fair Trading ('the OFT') and the Competition Commission have attempted in recent times to evaluate the gains to consumers from merger control in specific cases and have found them to be significant<sup>44</sup>.

### (B) Assessing the competitive effects of mergers

Assessing the competitive effects of mergers is far from simple. A very helpful starting point when considering this issue is the *ICN Merger Guidelines Workbook* produced by a Subgroup of the ICN ('the *Workbook*')<sup>45</sup>. This was produced as a tool for countries that are new to or in the early years of merger control; however it is commended to anyone interested in the subject. In particular the *Workbook* contains a series of eight 'Worksheets' on key matters that are of importance when conducting a substantive assessment of mergers, for example market definition, market structure and concentration, unilateral and coordinated effects, and market entry and expansion; these Worksheets set out the economic principles that are relevant to each subject and provide illustrative case studies. Some of the issues dealt with in the Worksheets, such as market definition and market structure, are relevant to all competition analysis, and have been discussed in chapter 1 of this book. Others, such as unilateral and coordinated effects, are specific to merger control and are considered further below.

A complicated feature of merger control is that it is necessarily forward-looking: a competition authority is called upon to consider whether a merger will lead to harmful effects on competition in the future<sup>46</sup>. Most mergers must be notified to the competition authority and cleared before they are put into effect, in which case the substantive analysis is entirely forward-looking. Even in those few jurisdictions, such as the UK and Australia, where a merger can be implemented prior to approval by the competition authority, because there is no duty to pre-notify<sup>47</sup>, the assessment is still essentially about predicting the future effects of the merger on the market. The predictive nature of merger

<sup>43</sup> On this point see Case T-102/96 *Gencor v Commission* [1999] ECR II-753, [1999] 4 CMLR 971, para 106.

<sup>44</sup> See ch 22, 'Evaluation of the value of the CC's actions', pp 955–956; see further Nelson and Sun Su 'Consumer Savings from Merger Enforcement: A Review of the Antitrust Agencies' Estimates' (2002) 69 *Antitrust Law Journal* 921.

<sup>45</sup> The *Workbook* is available at [www.internationalcompetitionnetwork.org](http://www.internationalcompetitionnetwork.org); see also OECD *Substantive Criteria used for Assessment of Mergers* (2003), available at [www.oecd.org](http://www.oecd.org).

<sup>46</sup> See Case C-12/03 P *Commission v Tetra Laval BV* [2005] ECR I-987, [2005] 4 CMLR 573, at para 42: 'A prospective analysis of the kind necessary in merger control must be carried out with great care since it does not entail the examination of past events... or of current events, but rather a prediction of events which are more or less likely to occur in future if a decision prohibiting the planned concentration or laying down the conditions for it is not adopted.'

<sup>47</sup> On the voluntary nature of pre-notification in UK law see ch 22, 'OFT procedure', pp 912–914.

control is different from the assessment of agreements and conduct under Articles 101 and 102 TFEU and the Competition Act 1998, where the competition authority will usually be investigating behaviour that has already taken place and trying to verify, for example, whether and when the members of an alleged cartel met or whether the pricing practices of a dominant firm amounted to a margin squeeze.

The fact that merger control is about predicting future behaviour means, necessarily, that it must be in part theoretical: a competition authority that decides to challenge a merger must have a *theory of competitive harm* as to why the market will work less well for consumers in the future than it does at the moment. However it would not be acceptable for the authority to be able to proceed against a merger purely on the basis of theory. There is nothing unlawful about merger activity, and the market for corporate control, in which firms compete for the right to acquire and manage businesses, is an important feature of a free-market economy. Intervention on the part of public authorities should not be permissible on the basis of mere speculation. It follows that the competition authority should be required to produce *evidence* that supports its theory of competitive harm. Furthermore the competition authority should also have to demonstrate that the market, after the merger has been consummated, will be less competitive than if there had been no merger: in other words the authority will need not only to predict the likely outcome of the merger, but also to consider the *counterfactual*, that is to say the position if the merger were not to occur.

### (i) Theories of competitive harm

Most mergers cause no harm to competition. However there may be cases where it can be predicted that the changed structure of the market will provide the merged entity with the incentive and the ability to exercise market power in a way that will be harmful to consumer welfare. A competition authority concerned about a particular merger will need to articulate its theory as to how competition will be harmed. Various theories of competitive harm have been developed.

#### (A) *Unilateral or non-coordinated effects*<sup>48</sup>

Unilateral effects occur where A merges with B and the merged entity, AB, will be able, as a result of the merger, to exercise market power. The most obvious manifestation of the exercise of market power is the ability to increase price, but there are other possibilities: for example a reduction of output, quality, variety or innovation. It is helpful to think of the expression ‘price increase’ as shorthand which includes all these different manifestations of the exercise of market power. The ability to exercise market power is particularly likely if, prior to the merger, an increase in price on the part of A would have been likely to cause a substantial number of customers to divert their purchases to B: post-merger AB would not lose any profits as a result of such a shift, since AB would benefit from the increased sales of B’s products.

It may even be that, after the merger, C, a competitor of AB, will also be able to exercise market power because, if AB was to raise its prices, some customers would divert to C, which in turn could raise its own prices. C may be able to do this without coordinating its behaviour with that of AB, in which case C’s behaviour can itself be characterised

<sup>48</sup> See the *Workbook*, Worksheet C; unilateral effects are sometimes referred to as non-coordinated effects, in order to differentiate them from the coordinated effects discussed in the next section.

as unilateral or non-coordinated. This is the phenomenon sometimes known as ‘non-collusive oligopoly’<sup>49</sup>.

**(B) Coordinated effects**<sup>50</sup>

Coordinated effects occur where A merges with B and this results in a situation where AB will be able, or more able than when A and B were independent, to coordinate their competitive behaviour on the market with other firms, for example with C and D, and thereby exercise collective market power. As the *Workbook* suggests, three conditions must be met for coordination to be successful<sup>51</sup>. First it must be possible for AB, C and D to coordinate their behaviour in some way, for example by charging the same prices or, perhaps, by aligning their behaviour on output and capacity expansion. Secondly, it must be costly for those firms to deviate from coordination, for example because ‘cheats’ will be punished. Third, AB, C and D must be free from competitive constraint from other participants in the market, for example E and F.

**(C) Vertical effects**<sup>52</sup>

As a general proposition it is unlikely that a merger will produce adverse vertical effects. Indeed a merger between an upstream firm, A, with a downstream firm, B, is likely to be neutral in terms of economic efficiency or even highly beneficial. For example if A and B are independent each will need to earn a margin on its operation – perhaps A as a producer and B as a distributor. The merged AB will need to earn only one margin: the elimination of ‘double marginalisation’ may lead to lower costs, and therefore to lower prices for the customers of AB. However there may be circumstances in which a vertical merger could produce adverse effects, first, where the possibility of foreclosure of a third party arises and, secondly, where the vertical integration of AB makes it more likely that there will be coordinated effects on the market.

An example of foreclosure could arise where A, a firm in an upstream market, acquires access through a merger with B, a firm in a downstream market, to an important downstream product, for example a distribution system such as a gas pipeline that is difficult to duplicate. The merged entity AB may have the incentive to deny competitors in the upstream market access to the distribution system, thereby foreclosing them from the downstream market. Similarly where B, a firm in a downstream market, merges with A, a firm that has substantial market power in relation to an important raw material or input in an upstream market, the merged entity AB may have the incentive to deny competitors in the downstream market access to that input. The concern here is that competitors in the downstream market will be unable to obtain supplies of the raw material or input, or that they will be able to do so only on discriminatory terms, with the result that they will be unable to compete effectively. These two examples of foreclosure can be depicted diagrammatically as follows, where the diagonal lines represent the foreclosure effect that arises from the merger of A and B:

<sup>49</sup> On the treatment of non-collusive oligopoly under the EUMR see ch 21, ‘The non-collusive oligopoly gap’, pp 864–866 and under UK law see ch 22, ‘Unilateral effects’, pp 935–936; an example of such a case in the US is *FTC v HJ Heinz Company and Milnot Corp*n 246 F 3d 708 (DC Cir 2001).

<sup>50</sup> See the *Workbook*, Worksheet D.

<sup>51</sup> *Ibid*, para D.6.

<sup>52</sup> *Ibid*, Worksheet H.

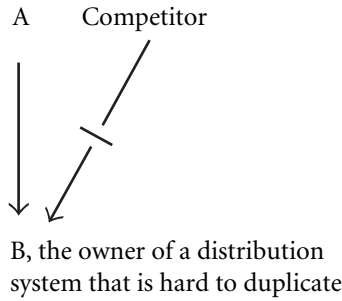

Fig. 20.1 Foreclosure of access to a downstream distribution system

Fig. 20.2 Foreclosure of access to an important input

A merger of vertically-related firms might also increase the possibility of the merged entity, AB, being able to coordinate its behaviour with other competitors if, for example, it will lead to increased price transparency or if it will make it easier to detect firms that deviate from the coordinated behaviour.

In considering whether a merger could give rise to adverse vertical effects a competition authority should not only consider whether the merged entity would have the ability and the incentive to exercise market power; it should also consider carefully whether this would lead to harm to consumers, taking into account in particular the possibility that the merger may give rise to significant economic efficiencies that might be passed on to them in lower prices.

#### (D) *Conglomerate effects*<sup>53</sup>

As a general proposition conglomerate mergers are unlikely to give rise to adverse competitive effects. They do not involve the removal of actual or potential competitors from the market as in the case of horizontal mergers; nor do they bring together firms that have a vertical relationship in relation to the same final product, where there may be incentives

<sup>53</sup> Ibid, Worksheet H; see also OECD *Portfolio Effects in Conglomerate Mergers* (2002), available at [www.oecd.org](http://www.oecd.org).

to foreclose competitors from the upstream or downstream market. Furthermore, as in the case of vertical mergers, conglomerate mergers often result in efficiency gains, for example where the merged entity AB is able to offer complementary products that do not compete with one another to a customer desiring both: if A produces widgets and B blodgets, a 'one-stop shop' may be highly beneficial to a customer that requires both products. The theory of harm in the case of conglomerate effects is particularly speculative – for example that AB might decide to 'tie' the two complementary products together in a way that will foreclose competitors, or to price a bundled package of both of them to similar effect. It is possible that tie-in transactions and bundling practices would violate laws that forbid the abuse of a dominant position or, in the case of US law, monopolization, although the law on this subject is controversial in itself<sup>54</sup>. It is even more controversial that a merger should be prohibited on this ground, and the US authorities do not normally challenge mergers on this basis. Intervention on conglomerate grounds is a possibility in EU and UK law, but would require very convincing evidence in support of the theory of harm<sup>55</sup>.

## (ii) Evidence

Having identified a theory (or theories) of competitive harm, a competition authority must then search for evidence in support of that theory: its case must be based on empirical facts. The ICN produced, in 2005, a helpful *Investigative Techniques Handbook*<sup>56</sup>, chapter 3 of which identifies five types of evidence that may be of use in merger reviews: evidence that was produced before the merger was contemplated, such as corporate strategy documents, planning documents and sales reports; documents produced for the purpose of the merger, such as surveys, reports and economic analyses; descriptive evidence from participants in the market, such as customers, suppliers and competitors; written responses to requests for information from the competition authority; and expert and quantitative evidence, for example from industry experts and economists. Chapter 4 of the *Investigative Techniques Handbook* discusses various types of quantitative analyses, such as the measurement of critical loss<sup>57</sup> and price correlations, that may be helpful when predicting whether a merger might lead to anti-competitive effects. The Worksheets already referred to in the ICN's *Merger Guidelines Workbook* also provide summaries of evidence of value when assessing, for example, whether a merger might lead to adverse unilateral<sup>58</sup> or coordinated<sup>59</sup> effects<sup>60</sup>.

An emerging development, in unilateral effects cases, is the use of so-called 'merger simulation models' which attempt to predict, using a set of quantitative techniques, the effect that a merger will have on the post-merger level of prices<sup>61</sup>. If such an exercise could produce entirely reliable evidence the traditional analysis of defining the relevant market, assessing market power and then considering unilateral effects could be considerably abbreviated, perhaps with no need for market definition at all. However the science of

<sup>54</sup> See ch 17, 'Tying', pp 688–696 and ch 18, 'Bundling', pp 737–739.

<sup>55</sup> On the position under the EUMR see ch 21, 'Recent cases on non-horizontal mergers', pp 879–880 and under UK law see ch 22, 'Non-horizontal mergers', pp 937–938.

<sup>56</sup> The *Handbook* is available at [www.internationalcompetitionnetwork.org](http://www.internationalcompetitionnetwork.org).

<sup>57</sup> See also Langenfeld and Li 'Critical loss analysis in evaluating mergers' (2001) 46 Antitrust Bulletin 299.

<sup>58</sup> See Worksheet C – *Unilateral Effects*, para C.10.

<sup>59</sup> See Worksheet D – *Coordinated Effects*, paras D.9–D.16.

<sup>60</sup> See also the OECD Roundtable *Managing Complex Mergers*, 29 October 2008, available at [www.oecd.org](http://www.oecd.org).

<sup>61</sup> A well-known case in the US in which merger simulation was used is the *Staples/Office Depot* case, *FTC v Staples Inc* 970 F Supp 1066, District of Columbia, as to which see Baker 'Econometric Analysis in *FTC v Staples*' (1999) 18 *Journal of Public Policy & Marketing* 11.

merger simulation is not yet sufficiently robust for this, and the technique, at most, can form only part of the overall body of evidence in a particular case<sup>62</sup>.

The Court of Justice has made clear that, where a merger is challenged on conglomerate grounds, the evidence on which the Commission relies must be particularly convincing, given that the chains of cause and effect between the merger and the predicted adverse effects ‘are dimly discernible, uncertain and difficult to establish’<sup>63</sup>.

An important issue in relation to evidence is to decide what standard of proof a competition authority should have to attain before it can take action to block or require the modification of a merger: should it have to prove its case that a merger would be harmful to competition ‘on the balance of probabilities’, or should it have to go further and show ‘beyond reasonable doubt’ that the merger would have detrimental effects? If a competition authority can intervene too easily, on the basis of weak evidence, the possibility exists that ‘false positives’ might arise: that is to say that some innocuous mergers might be blocked; however, if the criteria for intervention are too demanding, or if the standard of proof is set at a very high level, ‘false negatives’ might occur: some harmful mergers might be cleared<sup>64</sup>. Being realistic, it is inevitable that some errors of both kinds will be made by competition authorities: it is a matter of public policy to decide which of the two types of error is the more troubling.

### (iii) The counterfactual

Merger assessment involves predicting the effect on competition in the market if a particular transaction is consummated. This necessarily involves a comparison between the situation if the merger goes ahead and the position if it did not happen: the competitive situation without the merger is often referred to as the counterfactual<sup>65</sup>. The counterfactual will usually be the prevailing conditions before the merger, although there may be cases in which it is necessary to take into account conditions as they would be in the near future if, for example, it is known that other firms are about to enter or exit the market or to expand capacity; another example would be that one of the merging firms was on the point of failing, so that it would not be present on the market in the future anyway. The Competition Commission in the UK explicitly states the counterfactual in each of its merger inquiry reports<sup>66</sup>.

## (C) The substantive test: SLC, dominance, SIEC

Any system of merger control must set a substantive test against which to determine whether a particular merger should be modified or prohibited. When the EUMR was in

<sup>62</sup> On merger simulation see Werden and Froeb ‘Simulation as an Alternative to Structural Policy in Differentiated Products Industries’ in *The Economics of the Antitrust Process* (Kluwer, 1996, eds Coate and Kleit); Epstein and Rubinfeld ‘Merger Simulation: A Simplified Approach with New Applications’ (2002) 69 *Antitrust Law Journal* 883; Werden, Froeb and Scheffman ‘A Daulbert Discipline for Merger Simulation’ February 2004, available at [www.ftc.gov/be/daubertdiscipline.pdf](http://www.ftc.gov/be/daubertdiscipline.pdf); Walker ‘The Potential for Significant Inaccuracies in Merger Simulation Models’ (2005) 1 *Journal of Competition Law and Economics* 473.

<sup>63</sup> Case C-12/03 P *Commission v Tetra Laval BV* [2005] ECR I-987, [2005] 4 CMLR 573, para 44.

<sup>64</sup> These phenomena are also referred to as Type I and Type II errors: see *Black Oxford Dictionary of Economics* (Oxford University Press, 3rd ed, 2003), and ch 5, ‘False positives and false negatives’, pp 193–194.

<sup>65</sup> See the *Workbook*, paras 2.9 and 2.10.

<sup>66</sup> See eg *Deutsche Börse AG, Euronext NV and London Stock Exchange plc*, paras 5.125–5.130, available at [www.competition-commission.org.uk/rep\\_pub/reports/2005](http://www.competition-commission.org.uk/rep_pub/reports/2005).

the process of being reformed in the years leading up to 2004 there was an interesting and important debate as to the most appropriate formulation<sup>67</sup>. Many systems, such as the US and the UK, permit the prohibition of a merger which will ‘substantially lessen competition’ (‘SLC’)<sup>68</sup>; the original Merger Regulation of 1989 required intervention where a merger would ‘create or strengthen a dominant position as a result of which effective competition would be significantly impeded’<sup>69</sup>. Many Member States of the EU use the same formulation; some, for example France and Greece, have both substantial lessening of competition and dominance tests. The test in the EUMR was changed in 2004: the question now to be asked is whether the merger would ‘significantly impede effective competition’ (‘SIEC’), in particular (but not exclusively) as a result of the creation or strengthening of a dominant position<sup>70</sup>.

## (D) Guidelines

There are abundant guidelines on the substantive assessment of mergers. Reference has already been made to the ICN’s *Merger Guidelines Workbook* and *Investigative Techniques Handbook*<sup>71</sup>. Many competition authorities have also published guidelines on substantive assessment. Of particular importance are the 2010 *Horizontal Merger Guidelines* in the US<sup>72</sup> and the joint guidelines of the OFT and Competition Commission in the UK<sup>73</sup>. The European Commission has published *Guidelines on the assessment of horizontal mergers*<sup>74</sup> and *Guidelines on the assessment of non-horizontal mergers*<sup>75</sup>. Guidelines must strike an appropriate balance between providing guidance for firms and their advisers as to what might be expected of a system of merger control and avoiding too much speculation, which can lead to a loss of certainty.

A specific problem in systems of merger control is whether a merger which reduces competition but which would lead to gains in efficiency should be permitted: the US Guidelines address this issue specifically in paragraph 4 and do, in very limited circumstances, recognise efficiency arguments<sup>76</sup>. In the UK section 30 of the Enterprise Act 2002 allows the OFT and the Competition Commission to take into account ‘relevant customer benefits’

<sup>67</sup> See eg OECD Roundtables *Substantive Criteria used for the Assessment of Mergers* 11 February 2003, and *Standard of Merger Review*, 10 May 2010, available at [www.oecd.org](http://www.oecd.org); the European Commission’s *Green Paper on the Review of Council Regulation (EEC) No 4064/89* COM(2001) 745/6 final, paras 159–169.

<sup>68</sup> See, eg, s 7 Clayton Act 1914 in the US; s 50 Trade Practices Act 1974 in Australia; s 92 Competition Act 1985 in Canada; s 12A Competition Act 1998 in South Africa.

<sup>69</sup> EUMR, Articles 2(2) and 2(3).

<sup>70</sup> For further discussion of this issue see ch 21, ‘Adoption of the “significant impediment to effective competition” test’, pp 863–867.

<sup>71</sup> The ICN has also published ‘Recommended Practices’ on matters such as remedies, notifications and merger procedures; these are all available at [www.internationalcompetitionnetwork.org](http://www.internationalcompetitionnetwork.org).

<sup>72</sup> These are available at [www.justice.gov.atr/public/guidelines](http://www.justice.gov.atr/public/guidelines), on which see Shaprio ‘The 2010 Horizontal Merger Guidelines: From Hedgehog to Fox in Forty Years’ (2010) 77 *Antitrust Law Journal* 701.

<sup>73</sup> *Merger Assessment Guidelines*, CC2 (revised) and OFT 1254, September 2010, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>74</sup> OJ [2004] C 31/5. <sup>75</sup> OJ [2008] C 265/6.

<sup>76</sup> The complexity of allowing efficiencies as a defence in a merger case is vividly illustrated by the *Superior Propane* case in Canada: see *The Commissioner of Competition v Superior Propane Inc* [2003] 3 FC 529, judgment of 31 January 2003 (Federal Court of Appeal), available at [www.fca-caf.gc.ca/index\\_e.shtml](http://www.fca-caf.gc.ca/index_e.shtml); see also the European Commission’s (2003) (Summer) *Competition Policy Newsletter* 43–49; Williamson ‘Economies as an Antitrust Defense: The Welfare Trade-off’ (1968) 58 *American Economic Review* 158; Kolasky and Dick ‘The Merger Guidelines and the Integration of Efficiencies into Antitrust Review of Horizontal Mergers’ (2003) 71 *Antitrust Law Journal* 207; Gerard ‘Merger Control Policy: How to Give Meaningful Consideration to Efficiency Claims?’ (2003) 40 *CML Rev* 1367.

in certain circumstances<sup>77</sup>; while the European Commission's *Horizontal Guidelines* take efficiencies into account within the overall assessment of a merger<sup>78</sup>. Another issue that sometimes arises is whether a merger should be allowed in order to save a 'failing firm', even though there will be less competition in the market after the merger than before. A failing firm defence does exist in US law<sup>79</sup>, has been applied under the EUMR<sup>80</sup> and is recognised in an appropriate case under the guidelines of the UK competition authorities<sup>81</sup>.

## (E) Remedies

It is quite often the case that most aspects of a particular merger give rise to no competition concerns. However it may be, for example, that there are certain parts of the businesses of A and B that overlap horizontally, in which case a competition authority, rather than prohibiting the entire transaction, may look for a remedy whereby its competition concern is assuaged and the rest of the deal is allowed to proceed. The most obvious remedy is the divestiture of one or other of the overlapping businesses so that there will be no accretion of market power. Some cases may require more complex remedies, for example a right of access to an essential facility or the licensing of technology to competitors on reasonable and non-discriminatory terms. Devising and implementing satisfactory remedies is often a complex matter. The OECD published *Merger Remedies* in 2004 following roundtable discussions in which a number of recommendations as to best practice were made<sup>82</sup>. In 2005 the ICN published a *Merger Remedies Review Project*<sup>83</sup> that provides a practical guide as to the key principles and range of tools available in the establishment of suitable remedies. In 2005 the European Commission published a *Merger Remedies Study*<sup>84</sup> in which it reviewed the effectiveness of 96 remedies accepted in 40 cases in the five-year period from 1996 to 2000. This *Study* had an important bearing on the Commission's revised *Notice on remedies acceptable under the EUMR*<sup>85</sup> of 2007. In the UK the OFT and the Competition Commission have given careful attention to remedies when deciding cases under the Enterprise Act 2002, and conduct a rolling programme for the review of the success of past remedies<sup>86</sup>.

## (F) Merger control and the public interest<sup>87</sup>

As noted at the start of this chapter, numerous arguments may be made against mergers that have nothing to do with the maintenance of competitive markets. It would be possible to devise a system of merger control that allows intervention for non-competition reasons;

<sup>77</sup> See ch 22, 'Efficiencies', p 939; note in particular *Merger Assessment Guidelines*, CC2 (revised) and OFT 1254, September 2010, section 5.7.

<sup>78</sup> See the *Horizontal Guidelines*, paras 76–88; see further ch 21, 'Efficiencies', pp 874–876.

<sup>79</sup> See the *Horizontal Merger Guidelines*, section 11.

<sup>80</sup> See ch 21, 'The "failing firm" defence', p 876 and the Commission's *Horizontal Merger Guidelines*, paras 76–88.

<sup>85</sup> See ch 21, 'Remedies', pp 884–890.

<sup>86</sup> OJ [2008] C 267/1; see ch 22, 'Undertakings in lieu of a reference', pp 927–928 and '“Final powers” or “remedies”', pp 944–948.

<sup>87</sup> For useful discussion of mergers and the public interest see Chiaplín and Wright *The Logic of Mergers* (Hobart Paper 107, 1987); Fairburn and Kay (eds) *Mergers and Mergers Policy* (Oxford University Press, 1989); *Merger & Competition Policy in the European Community* (Blackwell, 1990, ed Jacquemain); Neven, Nuttall and Seabright *Mergers in Daylight: The Economics and Politics of European Merger Control* (CEPR, 1993); Lewis 'The Political Economy of Antitrust' [2001] Fordham Corporate Law Institute, ed Hawk, pp 617ff; Bishop and

in so far as it does so the law in question can hardly be called ‘competition’ law; indeed prohibiting mergers on social grounds or for reasons of industrial policy may be directly antagonistic to the process of competition. Some of the arguments sometimes heard are listed below.

**(i) Loss of efficiency and ‘short-termism’**

Some commentators would argue that mergers, far from promoting economic efficiency, have a disruptive effect upon the management of one or both of the merged firms and may be detrimental to their long-term prospects. This claim is made in particular of contested takeover bids, where it is possible that the management of the target company will either be removed by the new shareholders or will resign rather than stay on in the new conditions. Sceptics of the way in which the market for corporate control functions would argue that it is not inevitable that the decisions of shareholders will produce the best result in the public interest, although it may yield the best financial deal for the shareholders themselves. In particular many would argue that a problem with takeovers is that they are motivated more by short-term profit-taking on the stock exchange than by serious analysis of the long-term prospects of companies. This may be particularly true of institutional investors in the market which are in the habit of regularly turning over their investments in pursuit of short-term gains.

**(ii) Concentration of wealth**

Mergers may be objected to on the ground that they lead to firms of such size and with such power as to be antithetical to a balanced distribution of wealth. This of course is a socio-political argument, but one which has become more widely accepted as aggregate industrial concentration has increased. In the US the merger control provisions laws were strengthened at a time when this problem was a dominant concern<sup>88</sup>.

**(iii) Unemployment and regional policy**

Another objection to mergers is that they may lead to the closure of factories and result in serious unemployment. Mergers that savour of ‘asset-stripping’ and which appear to have no regard for the social problems that may follow attract particular opprobrium from sceptics of the free market. Opposition to acquisitions by private equity funds in the course of 2007 was partly inspired by this concern. Similarly the market operating in its unfettered form may not attach much weight to the desirability of maintaining a balanced distribution of wealth and job opportunities; the market has no reason to be sentimental about such matters. Governments can choose to adopt a regional policy, however, and it is possible to give expression to this issue in mergers policy as well as in laws on tax, planning and state aids.

**(iv) Overseas control**

Mergers may result in the control of indigenous firms passing to overseas companies, in which case any economic advantages of the merger may be thought to be outweighed by the desirability of maintaining the decision-making process and profits at home. Strong opposition was expressed in the US in 2006 when the possibility of sea ports there coming under the control of Dubai Ports became known. Many UK firms have expanded

Walker *The Economics of EC Competition Law* (Sweet & Maxwell, 3rd ed, 2010), chs 7 and 8; speech by Lewis at the sixth Annual ICN Conference in Moscow, 2006 available at [www.internationalcompetitionnetwork.org](http://www.internationalcompetitionnetwork.org).

<sup>88</sup> See eg *Brown Shoe Co v United States* 370 US 294, 344 (1962).

abroad, in particular into the US, and this makes it somewhat difficult to argue that UK firms should themselves be shielded from hostile foreign takeover bids. However the case for intervention may be more compelling where there is a lack of reciprocity<sup>89</sup> between the laws of the two countries: if the law of country A prevents inward investment, whereas country B permits it, there may be a case for blocking a takeover by a firm from A of a firm in B.

#### (v) Special sectors

Some sectors of the economy – for example the electronic and print media – are especially sensitive and this may mean that concentration of ownership within them requires special consideration. In the UK, as in several other countries, media mergers are subject to special provisions<sup>90</sup> and mergers in industries such as oil, banking<sup>91</sup> and defence may be particularly closely scrutinised; the UK also has a special regime for mergers in the water industry<sup>92</sup> and the Communications Act 2003 contains special provisions on change of control<sup>93</sup>. Article 21(4) of the EUMR specifically recognises that Member States may have a ‘legitimate interest’ in investigating a merger other than on grounds of harm to competition<sup>94</sup>.

## 7. Designing a System of Merger Control

Where a country decides, as a matter of policy, to adopt a system of merger control, a number of issues have to be addressed. In chapters 21 and 22 the EU and UK systems will be described; most cases would probably result in the same outcome, irrespective of which of these two laws is applied: the dominant consideration in each jurisdiction is the impact of a merger on competition, and the analysis will be conducted in much the same way in each of them. Despite this, however, it will be seen that the provisions themselves – for example on jurisdiction, notification and substantive analysis – are actually quite different.

The following are some of the issues that must be confronted in designing a system of merger control.

- Which transactions should be characterised as mergers? How should the acquisition of minority shareholdings and of assets be dealt with? Will joint ventures be considered as a matter of merger control or under the legal provisions that prohibit cartels and other anti-competitive agreements?
- How should the jurisdictional test be framed for determining those mergers that can be investigated? Should the test be based on turnover, the value of assets acquired, market share or some other criterion?
- To what extent should a system of merger control apply to transactions consummated outside a country but which have effects within it?
- Should mergers be subject to a system of mandatory pre-notification, or should it be a matter for the parties to decide whether to notify? In the latter case, in what

<sup>89</sup> Or, to put the matter more colloquially, where the ‘playing fields’ are not even.

<sup>90</sup> See ch 22, ‘Public interest cases’, pp 956–961.

<sup>91</sup> See the discussion of the *Lloyds TSB/HBOS* merger in ch 22, ‘Public interest cases’, pp 956–961.

<sup>92</sup> See ch 22, ‘Mergers in the water industry’, pp 960–961.

<sup>93</sup> Communications Act 2003, ss 351–354.

<sup>94</sup> See ch 21, ‘Article 21(4): legitimate interest clause’, pp 851–854.

circumstances and for how long after a merger has been completed should a competition authority be allowed to review a case?

- What should be the time period within which a merger investigation must be completed?
- What should be the substantive test for reviewing mergers? Should it be based solely on competition criteria, or should any or all of the other issues discussed above (for example unemployment, regional policy and overseas control) also be taken into account?
- How should the specific issues of (a) efficiency and (b) failing firms be dealt with?
- What mechanism should be put in place for the negotiation of remedies that would overcome any problems identified by the competition authority?
- Who should make decisions in merger cases? A Commission, in which case who should appoint the Commissioners? A court? A Minister in the Government?
- What checks and balances should there be to guarantee due process within merger control? What system of judicial review or appeals should be put in place to test the findings of the decision-maker in merger cases? How quickly will any judicial review or appeal be completed?

These are just some of the many interesting and important issues that arise in relation to the control of mergers. With these preliminary observations in mind, this book will now describe the systems in force in the EU and UK.

## Mergers (2) – EU law<sup>1</sup>

1. Introduction	828	6. Remedies	884
2. Overview of EU Merger Control	829	7. Powers of Investigation and Enforcement	890
3. Jurisdiction	833	8. Judicial Review	891
4. Notification, Suspension of Concentrations, Procedural Timetable and Powers of Decision	855	9. International Cooperation	897
5. Substantive Analysis	861	10. The EUMR in Practice	898

### 1. Introduction

The EU rules on the control of mergers or, to use an alternative term often used in the parlance of EU law, ‘concentrations’, are contained in the EU Merger Regulation, Regulation 139/2004<sup>2</sup> (‘the EUMR’). The terms ‘merger’ and ‘concentration’ are used interchangeably throughout this chapter. The EUMR has been applicable since 1 May 2004; prior to that date Regulation 4064/89<sup>3</sup> had been in effect since 21 September 1990. Regulation 139/2004 amended the rules of merger control in a number of respects, in particular by making the allocation of jurisdiction as between Member States and the European Commission more flexible and by amending the substantive test for the analysis of mergers. Section 2 of this chapter provides an overview of EU merger control. Section 3 sets out the jurisdictional rules which determine whether a particular merger should be investigated by the European Commission in Brussels or by the national competition authorities (‘the NCAs’) of the Member States. Section 4 deals with a number of procedural matters such as the mandatory pre-notification to the Commission of mergers that have a Community dimension and

<sup>1</sup> For further reading on the EU Merger Regulation readers are referred to Levy *European Merger Control Law: A Guide to the Merger Regulation* (LexisNexis, 2003); Navarro, Font, Folguera and Briones *Merger Control in the EU* (Oxford University Press, 2nd ed, 2005); Lindsay *The EC Merger Regulation: Substantive Issues* (Sweet & Maxwell, 3rd ed, 2009); Faull and Nikpay *The EC Law of Competition* (Oxford University Press, 2nd ed, 2007), ch 5; Bellamy and Child *European Community Law of Competition* (Oxford University Press, 6th ed, 2008, eds Roth and Rose), ch 8; Cook and Kerse *EC Merger Control* (Sweet & Maxwell, 5th ed, 2009); Schwalbe and Zimmer *Law and Economics in European Merger Control* (Oxford University Press, 2009); as to mergers under the EEA Agreement see ch 2, ‘European Economic Area’, pp 57–58 and Broberg *The European Commission’s Jurisdiction to Scrutinise Mergers* (Kluwer International, 3rd ed, 2006), ch 7; on international merger control see *Merger Control: The International Regulation of Mergers and Joint Ventures in 65 Jurisdictions Worldwide* (GCR, 2011, ed Davies).

<sup>2</sup> OJ [2004] L 24/1.

<sup>3</sup> OJ [1989] L 395/1; Regulation 4064/89 was repealed by Article 25 of Regulation 139/2004. Note that the TFEU does not contain any specific provisions on merger control, and that the legal basis for the EUMR is Article 103 and Article 353 TFEU. Mergers in the coal and steel sectors that would once have been investigated under Article 66(7) of the ECSC Treaty are now dealt with under the EUMR.

the procedural timetable within which the Commission must operate. Section 5 discusses the substantive analysis of mergers under the EUMR and section 6 explains the procedure whereby the Commission may authorise a merger on the basis of commitments, often referred to as remedies, offered by the parties to address its competition concerns. The chapter then contains sections on the Commission's powers of investigation and enforcement, on judicial review of Commission decisions by the EU Courts and on international cooperation, both within the EU and with the competition authorities in third countries. Section 10 considers how the merger control provisions work in practice.

## 2. Overview of EU Merger Control

### (A) Brief description of the EU system of merger control

The Commission first proposed a merger control regulation as early as 1973<sup>4</sup>. The issue was controversial as opinions differed substantially between Member States on the extent to which mergers should be controlled at the EU level as opposed to domestically. It was not until 21 December 1989 that the Council of Ministers adopted Regulation 4064/1989; it entered into force on 21 September 1990. Regulation 4064/1989 was amended quite significantly by Regulation 1310/97<sup>5</sup>, and was repealed and replaced by the current EUMR in 2004<sup>6</sup>.

In essence the EU system of merger control is as follows. Mergers that have a Community dimension must be pre-notified to the Commission; it is an offence to consummate a merger without a prior clearance from the Commission (there are some minor exceptions to this proposition). Whether or not a merger has a Community dimension is determined by reference to the turnover of the undertakings concerned in a transaction. Where a merger has a Community dimension the Commission has sole jurisdiction in relation to it: this is the principle of 'one-stop merger control'. However there are some circumstances in which the Commission might allow jurisdiction (wholly or in part) over a merger having a Community dimension to be ceded to one or more Member States; and in certain situations it is obliged to do this. There are also some circumstances in which Member States may transfer jurisdiction to the Commission over mergers that do not have a Community dimension. Once the Commission has jurisdiction it is required, within fixed time limits, to determine whether a merger could significantly impede effective competition in the common market or a substantial part of it; in conducting this assessment the Commission asks, in particular, whether the merger could create or strengthen a dominant position. Most cases are completed within 25 working days of the notification, known as a Phase I investigation. In approximately 3 per cent of cases the Commission finds, at the end of its Phase I investigation, that it has serious doubts as to the compatibility of the merger with the common market and so it proceeds to an in-depth Phase II investigation; this may take an additional 90 working days, and there are provisions for this period to be extended for up to an additional 35 working days.

<sup>4</sup> *Commission Proposal for a Regulation of the Council of Ministers on the Control of Concentrations between Undertakings* OJ [1973] C 92/1; for successive drafts see OJ [1982] C 36/3; OJ [1984] C 51/8; OJ [1986] C 324/5; OJ [1988] C 130/4.

<sup>5</sup> OJ [1997] L 180/1.

<sup>6</sup> For discussion of the changes introduced by Regulation 139/2004 see González Díaz 'The Reform of European Merger Control: *Quid Novi Sub Sole?*' (2004) 27(2) *World Competition* 177.

The Commission has wide-ranging powers under the EUMR, including the power to prohibit a merger in its entirety. This is rare – there have been only 21 prohibitions in the entire lifetime of EU merger control, four of which were overturned by the General Court on appeal<sup>7</sup>. However there have been numerous occasions on which the Commission has authorised a merger only after the parties had offered commitments to remedy its competition concerns: this has happened in roughly 5 per cent of cases. When the parties offer commitments in this way they become legally binding upon them<sup>8</sup>. The Commission works closely both with the NCAs of the Member States and with competition authorities in other jurisdictions – for example the US, Canada and Japan – when exercising its powers under the EUMR<sup>9</sup>.

## (B) Institutional arrangements

The full College of Commissioners takes the most important decisions under the EUMR, for example to prohibit a merger or to clear it subject to commitments at the end of a Phase II investigation. The fact that the full Commission is sometimes involved in decisions of considerable economic and political importance means that there may be a degree of lobbying of individual Commissioners, not just of the Commissioner for competition<sup>10</sup>.

Some powers are delegated by the Commission to the Commissioner for competition. For example decisions at the end of a Phase I investigation can be taken by the Commissioner for competition, who in turn may delegate certain functions to the Director General of the Directorate General for Competition ('DG COMP'). Within DG COMP there is a Deputy Director General with special responsibility for mergers. Unit 2 of Directorate A of DG COMP deals with policy and scrutiny in relation to mergers and antitrust. Case work is handled by merger units within Directorates B to F, each of which has specific sectoral responsibilities<sup>11</sup>. DG COMP has a Chief Competition Economist who reports directly to the Director General to provide independent economic advice on cases and policy<sup>12</sup>. The Commission also has two Hearing Officers with a range of functions including overseeing the fairness of the Commission's proceedings and arranging and conducting oral hearings<sup>13</sup>.

The Advisory Committee on Concentrations<sup>14</sup> has an important role in EU merger control: it provides the Member States with the opportunity of input into the decision-making process. Appeals against decisions of the Commission are taken to the General Court<sup>15</sup>. Provision has been made for appeals to the General Court in merger cases to be handled under the so-called 'expedited procedure' where appropriate<sup>16</sup>.

<sup>7</sup> See 'Comment', pp 902–906 below.

<sup>8</sup> On commitments, or 'remedies' as they are often referred to, see 'Remedies', pp 884–890 below.

<sup>9</sup> See 'International Cooperation', pp 897–898 below.

<sup>14</sup> See 'International Cooperation', pp 897–898 below.

<sup>15</sup> Prior to the Nice Treaty applications by a Member State were made to the Court of Justice, as in Cases C-68/94 etc *France v Commission* [1998] ECR I-1375, [1998] 4 CMLR 829.

<sup>16</sup> On judicial review under the EUMR and the expedited procedure see 'Judicial Review', pp 891–897 below.

## (C) The Implementing Regulation and the Commission's Notices and Guidelines

In addition to the EUMR anyone interested in EU merger control will require a number of other texts, in particular the Implementing Regulation and a series of Commission Notices and Guidelines, including the Guidelines on Best Practices. The General Court has stated that the Commission is bound by the notices it issues in the area of the supervision of mergers, provided that they do not depart from the rules in the Treaty or from the EUMR<sup>17</sup>; however the Commission retains 'great freedom of action' where a notice allows it to choose the types of evidence or the economic approach most appropriate to a particular case<sup>18</sup>. All of the materials set out below can be accessed on DG COMP's website<sup>19</sup>; the Commission has also published a helpful compendium of materials, *EU Competition Law: Rules Applicable to Merger Control*, available electronically on the same website.

### (i) The Implementing Regulation

The Implementing Regulation, Regulation 802/2004 (which replaced earlier legislation), contains rules on notifications to the Commission, time limits, the right to be heard and hearings, access to the file and the treatment of confidential information and remedies<sup>20</sup>. Regulation 802/2004 has been amended<sup>21</sup> in order to provide the format for Form RM, a form that has to be used when undertakings offer commitments to the Commission in order to remedy competition concerns that it may have identified<sup>22</sup>.

### (ii) Commission Notices and Guidelines

The Commission has published numerous Notices and Guidelines on matters both of procedural and substantive concern, each of which will be referred to where appropriate in the text that follows:

- *Notice on the definition of the relevant market*<sup>23</sup>
- *Guidelines on the assessment of horizontal mergers*<sup>24</sup>
- *Notice on a simplified procedure for treatment of certain concentrations*<sup>25</sup>
- *Notice on restrictions directly related and necessary to concentrations*<sup>26</sup>
- *Notice on Case Referral in respect of concentrations*<sup>27</sup>
- *Notice on access to the file*<sup>28</sup>
- *Consolidated Jurisdictional Notice*<sup>29</sup>
- *Guidelines on the assessment of non-horizontal mergers*<sup>30</sup>
- *Notice on remedies acceptable under the EUMR*<sup>31</sup>.

<sup>17</sup> See Case T-282/06 *Sun Chemical Group BV v Commission* [2007] ECR II-2149, [2007] 5 CMLR 483, para 55 and the judgments referred to therein.

<sup>18</sup> See Case T-210/01 *General Electric v Commission* [2005] ECR II-5575, [2006] 4 CMLR 686, para 519.

<sup>19</sup> See [www.ec.europa.eu/competition/index\\_en.html](http://www.ec.europa.eu/competition/index_en.html). <sup>20</sup> OJ [2004] L 133/1.

<sup>21</sup> See Commission Regulation 1033/2008, OJ [2008] L 279/3.

<sup>22</sup> See 'Remedies', pp 884–896 below. <sup>23</sup> OJ [1997] C 372/5. <sup>24</sup> OJ [2004] C 31/5.

<sup>25</sup> OJ [2005] C 56/32. <sup>26</sup> OJ [2005] C 56/24. <sup>27</sup> OJ [2005] C 56/2.

<sup>28</sup> OJ [2005] C 325/7.

<sup>29</sup> OJ [2008] C 95/1; this Notice replaces four previous Notices adopted by the Commission in 1998 dealing with each of full-function joint ventures (OJ [1998] C 66/1), the concept of a concentration (OJ [1998] C 66/5), undertakings concerned (OJ [1998] C 66/14) and the calculation of turnover (OJ [1998] C 66/25).

<sup>30</sup> OJ [2008] C 265/6.

<sup>31</sup> OJ [2008] C 267/1.

### (iii) Best Practice Guidelines

The Commission has also published Guidelines setting out ‘Best Practices’ on various aspects of merger control:

- *DG Competition Best Practices on the conduct of EC merger control proceedings*
- *Best Practice Guidelines: the Commission’s model texts for divestiture commitments and the trustee mandate*
- *Market Share Ranges in Non-confidential Versions of Merger Decisions*
- *Best practices for the submission of economic evidence and data collection concerning the application of Articles 101 and 102 TFEU and in merger cases.*

### (D) Access to the Commission’s decisions

DG COMP’s website is an important source of material about the operation of the EUMR. As well as the legislation and guidance just referred to, the website also carries a large amount of information about both completed cases and current investigations; these can be searched for by reference to the case number, a company’s name, decision type or by industry sector. The website also contains interesting statistical information, regularly updated, about the EUMR in practice (for example the number of notifications each year and the number of conditional clearances or prohibitions) and useful studies and reports on matters such as unilateral effects, tacit coordination and the impact of vertical and conglomerate mergers on competition<sup>32</sup>.

Each notification received by the Commission is given a case number, which will be prefixed with an ‘M’ (as in Case M 4600 *TUI/First Choice*). The practice of giving full-function joint ventures a prefix of ‘JV’ was abandoned in 2002; cases that occurred under the now-expired European Coal and Steel Community Treaty were prefixed ‘ECSC’. When a merger is notified a summary of it will appear on DG COMP’s website and a provisional deadline for the decision will be given; the website is updated as the investigation progresses.

The Commission’s decisions can be accessed in various ways. A press release summarising the Commission’s finding in cases other than those for which the simplified procedure is available<sup>33</sup> will usually be published in English, French, German and in the language of the notification. The press release is normally issued at noon on the day following adoption of the decision. It can be obtained on the Rapid database of the Commission’s website<sup>34</sup>. Phase I decisions – that is to say cases that do not require ‘in-depth’ investigation – are not themselves published in the Official Journal, other than a brief statement of the outcome. Phase I decisions are published on DG COMP’s website, but only in the language in which the parties notified. Decisions following an in-depth, Phase II investigation are more widely available. Summaries of Phase II decisions are published in the Official Journal together with the final report of the Hearing Officer and the opinion of the Advisory Committee on Concentrations. The non-confidential version of the full decisions are published on the Commission’s website; there may be a lengthy delay between the adoption of a decision and its appearance on the website while

<sup>32</sup> See [www.ec.europa.eu/competition/mergers/studies\\_reports/studies\\_reports.html](http://www.ec.europa.eu/competition/mergers/studies_reports/studies_reports.html).

<sup>33</sup> On this procedure see ‘Notifications’, p 857 below.

<sup>34</sup> The website of the Rapid database is [www.europa.eu/rapid](http://www.europa.eu/rapid).

agreement is reached between the parties and the Commission as to what confidential information should be omitted from the published version.

### 3. Jurisdiction

This section will deal with the following matters:

(A) **Article 3: meaning of a concentration:** the EUMR applies to mergers or, more precisely, to ‘concentrations’, a term defined in Article 3 and further explained in the case law of the EU Courts and in the Commission’s *Consolidated Jurisdictional Notice*<sup>35</sup> (‘the *Jurisdictional Notice*’).

(B) **Articles 1 and 5: concentrations having a Community dimension:** the EUMR applies to concentrations that have a ‘Community dimension’. The meaning of this term is found in Article 1, and is further explained in the *Jurisdictional Notice*. It is determined by reference to the turnover of the ‘undertakings concerned’, including their affiliated undertakings as set out in Article 5.

(C) **One-stop merger control:** as a general proposition concentrations that have a Community dimension should be investigated only by the Commission and not by the Member States; this is the principle of ‘one-stop merger control’.

(D) **Article 4(4) and Article 9: referral of concentrations having a Community dimension to the competent authorities of the Member States:** in certain cases Article 4(4) and Article 9 provide a mechanism whereby concentrations that have a Community dimension can be reviewed by the competent authorities of the Member States, either because the undertakings concerned or a Member State make a request to that effect. The Commission’s *Notice on Case Referral in respect of concentrations* (‘the *Case Referral Notice*’) provides important guidance on this topic.

(E) **Article 4(5) and Article 22: referral of concentrations not having a Community dimension by Member States to the Commission:** in certain cases Article 4(5) and Article 22 provide a mechanism whereby concentrations that do not have a Community dimension can be investigated by the Commission, either because the undertakings concerned or a Member State make a request to that effect. Again the *Case Referral Notice* provides important guidance.

(F) **Article 21(4): legitimate interest clause:** Member States are not allowed to apply their domestic competition law to concentrations that have a Community dimension except in the circumstances in which Article 4(4) or Article 9 are applicable. However provision is made by Article 21(4) for Member States to investigate a concentration having a Community dimension where it threatens to harm some ‘legitimate interest’ of the State other than the maintenance of competition.

(G) **Defence:** Member States retain jurisdiction to examine the national security aspects of mergers as a result of Article 346 TFEU.

Each of these propositions will be examined in turn.

<sup>35</sup> For an overview of the *Jurisdictional Notice* see Lübking ‘Commission adopts Jurisdictional Notice under the Merger Regulation’ (2007) 3 *Competition Policy Newsletter* 1.

### (A) Article 3: meaning of a concentration

Part B of the *Jurisdictional Notice* deals with the meaning of a concentration. The footnotes in the *Jurisdictional Notice* contain many references to the decisional practice of the Commission and the judgments of the EU Courts, and the reader should be aware of these useful reference points. Article 3(1) of the EUMR provides that:

A concentration shall be deemed to arise where a change of control on a lasting basis results from:

- (a) the merger of two or more previously independent undertakings or parts of undertakings, or
- (b) the acquisition, by one or more persons already controlling at least one undertaking, or by one or more undertakings, whether by purchase of securities or assets, by contract or by any other means, of direct or indirect control of the whole or parts of one or more other undertakings.

#### (i) Article 3(1)(a): mergers

Mergers in the sense of Article 3(1)(a) are dealt with in paragraphs 9 and 10 of the *Jurisdictional Notice*, which provides examples of cases covered by it such as *AstraZeneca/Novartis*<sup>36</sup> and *Chevron/Texaco*<sup>37</sup>. Paragraph 10 explains that there can be factual (*de facto*) mergers where, in the absence of a legal merger, activities of previously independent entities are combined with the result that a single economic unit is created under a permanent, single economic management; examples given are *Price Waterhouse/Coopers&Lybrand*<sup>38</sup> and *Ernst & Young/Andersen Germany*<sup>39</sup>.

#### (ii) Article 3(1)(b): acquisition of control

In practice most cases are concerned with the acquisition of control in the sense of Article 3(1)(b) of the EUMR: the *Jurisdictional Notice* deals with this concept from paragraphs 11 to 123. It begins by discussing the concept of control; it then deals in turn with the acquisition of sole control and of joint control.

#### (A) The concept of control

Article 3(2) of the EUMR defines control for the purpose of determining whether there is a concentration<sup>40</sup>:

Control shall be constituted by rights, contracts or any other means which, either separately or in combination and having regard to the considerations of fact or law involved, confer the possibility of exercising decisive influence on an undertaking, in particular by:

- (a) ownership or the right to use all or part of the assets of an undertaking;
- (b) rights or contracts which confer decisive influence on the composition, voting or decisions of the organs of an undertaking.

<sup>36</sup> Case M 1806, decision of 26 July 2000.

<sup>37</sup> Case M 2208, decision of 26 January 2001.

<sup>38</sup> Case M 1016, decision of 20 May 1998.

<sup>39</sup> Case M 2824, decision of 27 August 2002.

<sup>40</sup> It would seem that the notion of control in Article 3(2) of the EUMR is broader than the one used when applying the single economic entity doctrine under Article 101 TFEU: see ch 3, 'The test of control', pp 94–95.

Clearly this is a very broad concept<sup>41</sup>, and control can exist on a legal (*'de jure'*) or a factual (*'de facto'*) basis<sup>42</sup>. The most common means for the acquisition of control is the acquisition of shares, sometimes in conjunction with a shareholders' agreement, in the case of joint control, or the acquisition of assets<sup>43</sup>. However it is also possible for control to be acquired on a contractual basis<sup>44</sup>. A franchise agreement is not normally sufficient to establish control<sup>45</sup>. In exceptional cases a situation of economic dependence resulting from, for example, long-term supply agreements, could give rise to control<sup>46</sup>. It is important to understand that the concept of control as used in the EUMR may be different from the one used in other EU or national laws on matters such as taxation or the media<sup>47</sup>. It should be added that, when deciding under Article 5(4) whether the turnover of affiliated companies should be included within group turnover, a stricter notion of control is applied than in the case of Article 3.

The acquisition of control of assets – for example the transfer of the client base of a business or of intangible assets such as brands, patents or copyrights – will be considered a concentration only if they amount to a business with a market presence to which a market turnover can be clearly attributed<sup>48</sup>. To amount to a concentration the acquisition of control must be on a lasting basis, resulting, as recital 20 of the EUMR notes, in a change in the structure of the market<sup>49</sup>. Where several undertakings acquire a company, with the intention of dividing up the assets at a later stage, the first acquisition may be regarded as purely transitory with the result that it would not amount to a concentration: the subsequent division of the assets in question would however have to be investigated, and could give rise to more than one concentration<sup>50</sup>. The same analysis could be applied where an operation envisages the joint control of a new operation for a start-up period followed by a conversion to sole control: where the joint control does not exceed a year there would not be a concentration during that period<sup>51</sup>.

Where an interim buyer, such as a bank, acquires an undertaking on the basis of an agreement in the future to sell it on to an ultimate buyer, the Commission will examine the case as one of acquisition by the ultimate buyer<sup>52</sup>: this is sometimes referred to in practice as a 'warehousing' arrangement. Several transactions may be regarded as a single concentration in the sense of Article 3 where they are unitary in nature, that is to say where they are interdependent in such a way that one transaction would not have

<sup>41</sup> Note however that, under the UK Enterprise Act 2002, the concept of 'material influence' is broader than 'the possibility of exercising decisive influence' under Article 3(2) EUMR with the result that some transactions that might not be caught under EU merger control could be under the UK system: see ch 22, 'Enterprises ceasing to be distinct', pp 919–921, and paras 21, 49 and 64 of the General Court's judgment in Case T-411/07 *Aer Lingus Group plc v Commission* [2010] ECR-000, [2011] 4 CMLR 358. Note also that it is possible that the acquisition by A of a shareholding in B, although insufficient to provide the possibility of exercising decisive influence in the sense of Article 3(2) of the EUMR, may give rise to the possibility of coordinated behaviour between A and B and so require consideration under Article 101 TFEU: see Cases 142 and 156/84 *BAT v Commission* [1987] ECR 4487, [1988] 4 CMLR 24, in particular paras 37–39; see also *Warner-Lambert/Gillette* OJ [1993] L 116/21, [1993] 5 CMLR 559, paras 33–39; *BT-MCI* OJ [1994] L 223/36, [1995] 5 CMLR 285; *BiB* OJ [1999] L 312/1, [2000] 4 CMLR 901; see further Struijla 'Minority Share Acquisitions Below the Control Threshold of the EC Merger Regulation: An Economic and Legal Analysis' (2002) 25 *World Competition* 173; Caronna 'Article 81 as a tool for controlling minority cross-shareholdings between competitors' (2004) 29 *EL Rev* 485; Ezrachi and Gilo 'EC Competition Law and the Regulation of Passive Investments Among Competitors' (2006) 26(2) *OJLS* 327.

<sup>50</sup> *Ibid*, paras 29–33.

<sup>51</sup> *Ibid*, para 34.

<sup>52</sup> *Ibid*, para 35.

been carried out without the other and if they ultimately lead to control by the same undertaking(s)<sup>53</sup>.

Article 5(2) of the EUMR establishes a rule that allows the Commission to consider successive transactions occurring within a two-year period to be treated as a single concentration: this is an ‘anti-avoidance’ rule to ensure that the same persons do not break a transaction down into a series of sales of assets over a period of time with the aim of avoiding the application of the EUMR<sup>54</sup>. The internal restructuring of an undertaking that does not result in a change of control is not covered by the EUMR<sup>55</sup>.

### (B) *Sole control*

Sole control may be enjoyed on a legal or a factual basis. Legal control is normally acquired where an undertaking acquires a majority of the voting rights of a company, but could also occur, for example, where a minority shareholder owns shares that confer special rights to determine the strategic direction of the company to be acquired<sup>56</sup>. Factual control can occur where a minority shareholder is able to veto the strategic decisions of an undertaking: although it cannot impose decisions, the fact that it can block decisions means that it has the possibility of exercising decisive influence in the sense of Article 3(2) of the EUMR. This is often referred to as negative control<sup>57</sup>. Factual control can also exist where a minority shareholder is likely to be able at shareholders’ meetings to achieve a majority: the Commission will look at past voting behaviour to try to predict what the position is likely to be in the future<sup>58</sup>. In *Electrabel/Compagnie Nationale du Rhone*<sup>59</sup> the Commission concluded that Electrabel had acquired sole control over CNR, despite being a minority shareholder, on the basis of a number of different considerations, including that it was assured of a *de facto* majority at CNR’s General Meeting; as the concentration had not been implemented, but sole control had been acquired, Electrabel was fined €20 million for ‘gun jumping’<sup>60</sup>. Depending on the facts of the case, a shareholding of less than 25 per cent can be found to provide the possibility of exercising decisive influence: for example in *CCIE/GTE*<sup>61</sup> CCIE acquired 19 per cent of the voting rights in EDIL and was found to have acquired control, the remaining shares being held by an independent investment bank whose approval was not needed for important commercial decisions.

An option to purchase or convert shares does not in itself confer control unless the option will be exercised in the near future according to legally binding agreements<sup>62</sup>.

### (C) *Joint control*

Joint control occurs where two or more undertakings have the possibility of exercising decisive influence over another undertaking. Joint control typically arises from the fact that the undertakings in question enjoy negative control, that is to say the power to reject strategic decisions, which means that they have to act in common in order to determine the joint venture’s commercial policy<sup>63</sup>. Joint control can be established both on a legal and a factual basis<sup>64</sup>. The simplest form of joint control arises where there are only two

<sup>56</sup> *Ibid.*, paras 56–58.

<sup>57</sup> *Ibid.*, para 54.

<sup>58</sup> *Ibid.*, para 59.

<sup>59</sup> Case M 4994, decision of 10 June 2009.

<sup>60</sup> On gun-jumping see ‘Suspension of concentrations’, p 858 below; the case is on appeal to the General Court, Case T-332/09 *Electrabel v Commission*, not yet decided.

<sup>61</sup> Case M 258, decision of 25 September 1992; similarly in *Mannesmann/Vallourec*, Case M 906, decision of 3 June 1997, a shareholding of 21 per cent was found sufficient to confer sole control; see further ch 22, ‘Enterprises ceasing to be distinct’, p 920 on *BSkyB/ITV* where BSkyB was to have found to have ‘material influence’, the test in the Enterprise Act 2002, over ITV with a shareholding of 17.9 per cent.

<sup>62</sup> *Jurisdictional Notice*, para 60.

<sup>63</sup> *Ibid.*, para 62.

<sup>64</sup> *Ibid.*, para 63.

parent companies each with the same number of voting rights<sup>65</sup>. Joint control can also occur where, despite inequality of voting rights, parent companies enjoy veto rights, either by virtue of the statute of the joint venture or a shareholders' agreement between the parents<sup>66</sup>. The veto rights must be related to strategic decisions of the joint venture that go beyond the protection accorded to minority shareholders to protect their investment: examples of veto rights giving rise to joint control would be decisions on issues such as the budget, business plan, major investments or the appointment of senior management<sup>67</sup>. Joint control can also arise even where there are no veto rights if it is likely, in fact or in law, that the parents will act jointly in the exercise of their voting rights, whether as a result of a legally binding agreement<sup>68</sup> or as a matter of fact, because of 'strong common interests'<sup>69</sup>.

### (iii) Changes in the quality of control

A concentration can occur where there is a change in the quality of control of an undertaking: there may be a change from sole to joint control; a change in the identity of the parent companies so that there is a change in the nature of the joint control; and a change from joint to sole control<sup>70</sup>. However a change from negative to positive control is not regarded as a concentration<sup>71</sup>. A short-form notification may be made in the case of a change from joint to sole control<sup>72</sup>.

### (iv) Joint ventures – the concept of full-functionality

Article 3(4) of the EUMR provides that:

The creation of a joint venture performing on a lasting basis all the functions of an autonomous economic entity shall constitute a concentration within the meaning of Article 3(1)(b).

Concentrations in the sense of Article 3(4) are known as 'full-function joint ventures'. It is important to know whether a joint venture is full-function or not since this determines whether the EUMR is capable of application; if the joint venture is not full-function the possibility remains that it might be subject to Article 101 TFEU and/or national merger control. A full-function joint venture having a Community dimension is subject to mandatory pre-notification to the Commission; a partial-function joint venture would not be notifiable under Article 101, the process of notification of agreements under Article 101 having been abolished by Regulation 1/2003<sup>73</sup>. In the case of *BHP Billiton/Rio Tinto* the parties abandoned a full-function joint venture in relation to which the Commission had opened a Phase II investigation<sup>74</sup>; a subsequent partial-function joint venture between the same parties became the subject of a Commission investigation under Article 101 TFEU, and it was also abandoned<sup>75</sup>.

The *Jurisdictional Notice* provides considerable detail on the concept of full-functionality. It begins by explaining that the requirement of autonomy in Article 3(4) refers to operational autonomy: its parents will be responsible for its strategic decisions, which is precisely why they will be considered to be in joint control in the first place<sup>76</sup>. To be operationally autonomous the joint venture must have sufficient resources to operate independently on a market: this means that it must have a management dedicated to its

<sup>75</sup> See Commission Press Release IP/10/45, 25 January 2010.

<sup>76</sup> *Jurisdictional Notice*, para 93.

day-to-day operations and access to sufficient resources including finance, staff and assets to carry on the business activities provided for in the joint-venture agreement<sup>77</sup>. A joint venture will not be full-function where it takes over one specific function of its parents' activities, such as R&D or production; similarly a joint sales company would not be full-function<sup>78</sup>. An example of a joint venture found not to be full-function will be found in *Electrabel/Energia Italia/Interpower*<sup>79</sup>. Such cases would need to be analysed under Article 101 and/or national merger control.

A joint venture may not be sufficiently autonomous where its parents have a strong presence as suppliers to or purchasers from it; however the Commission recognises that the joint venture might be dependent on sales to or purchases from its parents during its 'start-up' period, which should normally not exceed three years<sup>80</sup>. Where sales are made to the parents on a lasting basis the Commission will consider whether the joint venture is geared to play an active role on the market independently of its parents: the proportion of sales made to the market will be an important consideration, and if the joint venture sells more than 50 per cent of its output to the market it would normally be considered to be full-function<sup>81</sup>. The Commission is more sceptical about long-term purchases from the parents, which might mean that the joint venture is closer to being a sales agency<sup>82</sup>; however it recognises that, where the joint venture operates on a 'trade market', it may be full-function even though it purchases from its parents<sup>83</sup>. A trade market is one where undertakings specialise in the selling and distribution of products without being vertically integrated and where different sources of supply are available for the products in question. In such a case a joint venture could be considered to be full-function provided that it has the necessary facilities and is likely to obtain a substantial proportion of its supplies not only from its parents but also from competing sources.

To be full-function a joint venture must be established on a lasting basis; the fact that the parents provide for dissolution of the joint venture, for example in the event of its failure or fundamental disagreement between them, does not mean that it is not established on a lasting basis<sup>84</sup>. If the joint venture is established for a short, finite period – for example in order to construct a specific project such as a power plant – it would not be considered to be long-lasting<sup>85</sup>. An enlargement of the activities of a full-function joint venture may amount to a new concentration, as will a change from being partial-function to being full-function<sup>86</sup>.

As a matter of substantive analysis, agreements between the parents of a full-function joint venture and the joint venture itself may amount to ancillary restraints; or they may require independent assessment under Article 101 TFEU<sup>87</sup>.

#### (v) Exceptions

Article 3(5) of the EUMR provides that certain operations will not amount to a concentration: the acquisition of securities by credit or other financial institutions on an investment basis where the voting rights are not exercised other than to protect the investment; the acquisition of control according to the law of a Member State relating to liquidation, winding up and similar matters; and acquisition by financial holding companies in relation to such matters. The *Jurisdictional Notice* explains that these provisions are

<sup>87</sup> See further 'Contractual restrictions directly related to and necessary for a merger: "ancillary restraints"', pp 882–884 below.

construed narrowly, and they have rarely been applied in practice<sup>88</sup>. They did apply, however, in *Lagardère/Natexis/VUP*<sup>89</sup>; this finding by the Commission was unsuccessfully challenged before the General Court by a third party<sup>90</sup>.

## (B) Article 1: concentrations having a Community dimension

Part C of the Commission's *Jurisdictional Notice* deals with the notion of Community dimension. As a general proposition concentrations having a Community dimension are investigated exclusively by the Commission; concentrations that do not do so are subject to the merger laws of the Member States<sup>91</sup>. Given that 26 of the 27 Member States have a system of merger control<sup>92</sup>, and that one transaction might be subject to investigation under a number of them, there may be significant regulatory advantages in being subject to EU rather than Member State law: this is discussed further below in the context of one-stop merger control<sup>93</sup>.

### (i) Thresholds

Turnover is used as a proxy for the economic resources that would be combined as a result of a concentration, and it is allocated geographically in order to reflect the geographical distribution of those resources<sup>94</sup>. Turnover thresholds are used in order to provide a relatively simple and objective mechanism for determining the allocation of jurisdiction; they are not intended in any sense to act as a way of predicting the market power of the undertakings concerned: that is a matter of substantive assessment, to be conducted by the competition authority (or authorities) that have jurisdiction<sup>95</sup>. Article 1 of the EUMR sets out the numerical thresholds to establish Community jurisdiction: it should be noted that the EUMR does not require that the undertakings concerned should be domiciled within the EU, nor that the transaction in question should take place there<sup>96</sup>. The method of calculating turnover is set out in Article 5.

Article 1(1) provides that the EUMR shall apply to all concentrations having a Community dimension as defined in Article 1(2) or Article 1(3). The criteria set out in Articles 1(2) and 1(3) of the EUMR are *alternative* grounds on which a concentration may have a Community dimension.

### (A) Article 1(2)

Article 1(2) provides that a concentration has a Community dimension where:

- (a) the combined aggregate worldwide turnover of all the undertakings concerned is more than €5,000 million; and
- (b) the aggregate Community-wide turnover of each of at least two of the undertakings concerned is more than €250 million,

unless each of the undertakings concerned achieves more than two-thirds of its aggregate Community-wide turnover within one and the same Member State.

<sup>88</sup> *Jurisdictional Notice*, paras 110–116      <sup>89</sup> Case M 2978, decision of 7 January 2004.

<sup>90</sup> Case T-279/04 *Éditions Odile Jacob SAS v Commission* [2010] ECR II-000.

<sup>91</sup> See Case C-170/02 P *Schlüsselverlag JS Moser GmbH v Commission* [2003] ECR I-9889, [2004] 4 CMLR 1522, at para 34: 'the [EU] legislature intended to lay down a clear division between the activities of the national authorities and those of the Community authorities, by avoiding successive definitions of positions by those different authorities on the same transaction...'

<sup>92</sup> Luxembourg is the only Member State not to do so.

<sup>93</sup> See 'Article 21: one-stop merger control', p 844–845 below.

<sup>94</sup> *Jurisdictional Notice*, para 124.

<sup>95</sup> *Ibid*, para 127.

<sup>96</sup> On the territorial scope of the EUMR see ch 12, 'The jurisdictional criteria in the EUMR', p 499.

Article 1(2) is intended to reflect the overall size of the undertakings concerned on a worldwide basis; to establish that there is a minimum level of activities within the EU; and to exclude purely domestic transactions. It is not unusual for very substantial transactions to fall outside the EUMR as a result of the two-thirds rule where two undertakings from the same Member State are involved: this is particularly likely to happen in the case, for example, of banks, insurance companies and undertakings in the energy sector that operate predominantly in their domestic market. For example the *Lloyds TSB Group plc/Abbey National plc* case in 2001 was not subject to the EUMR, since at least two-thirds of the turnover of each of those banks arose in the UK; however the case was investigated, and prohibited, under the UK's domestic system of merger control<sup>97</sup>. In the later case of *Lloyds TSB plc/HBOS plc* the merger again fell outside the jurisdiction of the Commission because of the two-thirds rule, but on this occasion the merger was permitted by the UK Government on the ground of 'exceptional public interest' due to the financial crisis, and in particular the perilous state at that time of the banking system<sup>98</sup>.

A controversial case arose in 2005 when Gas Natural, a Spanish company active in the energy sector, notified its intention to make a hostile public bid for Endesa, another Spanish company primarily active in the electricity sector, to the Spanish Competition Authority; Gas Natural claimed that the two-thirds rule was applicable with the consequence that the Commission lacked jurisdiction. Endesa lodged a complaint with the Commission, arguing that the two-thirds rule did not apply. The Commission rejected Endesa's argument<sup>99</sup>; Endesa appealed to the General Court but its appeal was dismissed<sup>100</sup>.

In June of 2009 the Commission published a *Report on the functioning of Regulation No 139/2004* in which it concluded that 'the present form of the two-thirds rule merits further consideration'<sup>101</sup>, noting that some mergers that fell outside its jurisdiction because of this rule gave rise to competition concerns and yet were permitted under national law on 'public interest' grounds. The Commission invited the Council to 'take note' of this information; as at 20 June 2011 the Council had not indicated whether it intends to pursue this matter.

### (B) Article 1(3)

Article 1(3) provides an alternative basis of jurisdiction to Article 1(2). A concentration that does not meet the Article 1(2) thresholds nevertheless has a Community dimension where:

- (a) the combined aggregate worldwide turnover of all the undertakings concerned is more than €2,500 million; and
- (b) in each of at least three Member States, the combined aggregate turnover of all the undertakings concerned is more than €100 million;
- (c) in each of the three Member States included for the purpose of (b), the aggregate turnover of each of at least two of the undertakings concerned is more than €25 million; and
- (d) the aggregate Community-wide turnover of each of at least two of the undertakings concerned is more than EUR €100 million;

unless each of the undertakings concerned achieves more than two-thirds of its aggregate Community-wide turnover within one and the same Member State.

<sup>97</sup> Cm 5208 (2001).

<sup>98</sup> See ch 22, 'Public interest cases', p 958.

<sup>99</sup> See Press Release IP/05/1425, 15 November 2005.

<sup>100</sup> Case T-417/05 *Endesa v Commission* [2006] ECR II-2533, [2008] 4 CMLR 1472.

<sup>101</sup> *Communication from the Commission to the Council: Report on the functioning of Regulation No 139/2004* COM(2009) 2101 final; the Report should be read in conjunction with the accompanying Commission Staff Working Paper containing a more detailed review.

The purpose of Article 1(3) is to give jurisdiction to the Commission in cases where a concentration does not have a Community dimension in the sense of Article 1(2), but nevertheless could be expected to have a substantial impact in at least three Member States<sup>102</sup>. In practice there have not been a large number of concentrations filed under Article 1(3), although it is interesting to note that jurisdiction in the *Ryanair/Aer Lingus* case, which the Commission prohibited in 2007, was based on Article 1(3)<sup>103</sup>. What is more common in practice is that parties to a concentration that does not have a Community dimension make use of the procedure provided by Article 4(5) of the EUMR to request that their transaction be reviewed by the Commission on a one-stop shop basis<sup>104</sup>. In the Commission's *Report on the functioning of Regulation No 139/2004* of June 2009 it noted that, despite the addition of Article 1(3) to the EUMR, there continue to be a number of transactions with significant cross-border effects which remain outside its jurisdiction, concluding that 'there is further scope for "one-stop-shop" review'<sup>105</sup>. As noted above, the Council has yet to indicate whether it intends to take any action in pursuance of the Commission's *Report*.

## (ii) Notion of undertaking concerned

The first step in determining whether a concentration has a Community dimension is to identify the 'undertakings concerned', an expression that is used in Article 1 of the EUMR. Having done so, turnover is calculated in the manner set out in Article 5; Article 5(4) identifies those other entities that form part of the same group as the undertakings concerned and whose turnover should therefore be included in the calculation. Where the concentration is a merger in the sense of Article 3(1)(a) of the EUMR the undertakings concerned are the merging entities<sup>106</sup>. In cases of the acquisition of control under Article 3(1)(b) it can be a complicated matter to determine who are the undertakings concerned. The *Jurisdictional Notice* gives extensive guidance on this:

- where A acquires sole control of B, the undertakings concerned will be A and B<sup>107</sup>
- however if A acquires part of B, the undertakings concerned will be A and the part of B to be acquired, in accordance with Article 5(2) of the EUMR: after the concentration has been effected the economic strength of the rest of B would be irrelevant to the position of the merged entity<sup>108</sup>
- where A and B jointly control C and A acquires B's interest in C, the undertakings concerned are A and C: as in the previous example, once the transaction has been put into effect the position of B is irrelevant to the economic strength of A and C<sup>109</sup>
- where A and B establish a new entity, C, the undertakings concerned are A and B<sup>110</sup>
- however if A and B acquire joint control of an existing entity, C, each of A, B and C is an undertaking concerned<sup>111</sup>.

If a joint venture, C, acquires D, the question arises of whether C, or its parents A and B, should be regarded as the undertakings concerned. The answer to this question may have a decisive effect on jurisdiction: if A and B are undertakings concerned and their group

<sup>102</sup> *Jurisdictional Notice*, para 126.

<sup>103</sup> Case M 4439 *Ryanair/Aer Lingus*, decision of 27 June 2007, upheld on appeal Case T-342/07 *Ryanair v Commission* [2010] ECR II-000, [2011] 4 CMLR 245.

<sup>104</sup> See 'Pre-notification referrals: Article 4(5)', p 849 below.

<sup>105</sup> *Communication from the Commission to the Council: Report on the functioning of Regulation No 139/2004* COM(2009) 2101 final, para 13.

<sup>106</sup> *Jurisdictional Notice*, para 132.

<sup>107</sup> *Ibid*, para 134.

<sup>108</sup> *Ibid*, para 136.

<sup>109</sup> *Ibid*, para 138.

<sup>110</sup> *Ibid*, para 139.

<sup>111</sup> *Ibid*, para 140.

turnover is added into the calculation of turnover, it is more likely that the transaction will be found to have a Community dimension:

- if C is a full-function joint venture and is already operating on the market, it will be regarded as an undertaking concerned, along with D<sup>112</sup>
- if C is a mere vehicle for the acquisition by A and B of D the Commission will consider each of A and B to be undertakings concerned, along with D<sup>113</sup>.

### (iii) Relevant date for establishing jurisdiction

The relevant date for determining whether a concentration has a Community dimension is the date when a final agreement was concluded or a public bid was announced or a controlling interest was acquired, whichever date is earlier<sup>114</sup>.

### (iv) Turnover<sup>115</sup>

Article 5(1) of the EUMR defines turnover as the amounts derived by undertakings in the preceding financial year ‘from the sale of products and the provision of services falling within the undertakings’ ordinary activities’. Sales rebates, VAT and other taxes directly related to turnover (for example taxes on alcoholic drinks and cigarettes) are deducted from any turnover figure, as is internal turnover within a group of companies. Article 5(5)(a) of the EUMR provides that turnover between a joint venture and its parents should be excluded from the calculation of turnover; but Article 5(5)(b) provides that turnover between a joint venture and third parties should be apportioned equally between its parents.

The *Jurisdictional Notice* explains that the Commission will usually base its findings on turnover on the most recent audited accounts of the undertakings concerned; it will rely on management or other provisional accounts only in exceptional circumstances<sup>116</sup>. Where there are major differences between the EU’s accounting standards and those of a non-Member State the Commission may consider it necessary to ask for the accounts to be restated according to EU standards<sup>117</sup>. The *Notice* explains the circumstances in which the Commission will accept an adjustment to the figures in the audited accounts, for example where there has since been a divestiture of part of the business of an undertaking concerned<sup>118</sup>.

In determining jurisdiction it is necessary not only to take into account the turnover of the undertakings concerned but also that of other undertakings within the same group. This can be problematic where undertakings such as private equity funds do not have consolidated accounts: care must be taken to ensure that all relevant turnover is brought into the calculation. Article 5(4) of the EUMR provides that the aggregate turnover of an undertaking concerned shall be calculated by adding together the respective turnovers of the following, where (b) refers to subsidiaries, (c) to parents and (d) to affiliates:

- (a) the undertaking concerned;
- (b) those undertakings in which the undertaking concerned directly or indirectly:
  - (i) owns more than half the capital or business assets, or
  - (ii) has the power to exercise more than half the voting rights, or
  - (iii) has the power to appoint more than half the members of the supervisory board, the administrative board or bodies legally representing the undertakings, or

<sup>115</sup> Several points relating to the calculation of turnover are referred to in the General Court’s judgment in Case T-417/05 *Endesa SA v Commission* [2006] ECR II-2533, [2008] 4 CMLR 1472.

<sup>116</sup> *Jurisdictional Notice*, paras 169–170.

<sup>117</sup> *Ibid*, para 171.

<sup>118</sup> *Ibid*, paras 172–174.

- (iv) has the right to manage the undertaking's affairs;
- (c) those undertakings which have in an undertaking concerned the rights or powers listed in (b);
- (d) those undertakings in which an undertaking as referred to in (c) has the rights or powers listed in (b);
- (e) those undertakings in which two or more undertakings as referred to in (a) to (d) jointly have the rights or powers listed in (b).

The *Jurisdictional Notice* provides fairly extensive guidance on these provisions<sup>119</sup>. An important point is that the criteria in Article 5(4), such as 'the power to exercise more than half the voting rights' or 'the right to manage the undertakings' affairs', are considerably stricter than the concept of 'control' set out in Article 3(2); Article 5(4) provides 'bright-line' criteria for determining which group turnover should be added to that of the individual undertakings concerned in a transaction<sup>120</sup>. The Commission's decision in *SoFFin/Hypo Real Estate* considers the application of the EUMR, and in particular the calculation of group turnover, where a state-owned body (in that case the German Special Fund Financial Market Stabilisation) acquires a distressed financial institution<sup>121</sup>.

#### (v) Geographic allocation of turnover

It is important to be able to determine where turnover arises, since Article 1(2) and (3) of the EUMR refer to global, Community and Member State turnover. The general rule is that turnover should be attributed to the place where the customer is located<sup>122</sup>; the *Jurisdictional Notice* explains how this principle is applied in practice to the sale of goods<sup>123</sup> and the provision of services<sup>124</sup>.

#### (vi) Conversion of turnover into Euros

For the purposes of the EUMR turnover must be calculated in Euros: for many undertakings this will require conversion from another currency. The annual turnover should be converted at the average European Central Bank rate for the 12 months concerned; and this average can be obtained from DG COMP's website<sup>125</sup>.

#### (vii) Provisions for credit and other financial institutions and insurance undertakings

Article 5(3) of the EUMR provides specific rules for the calculation of turnover of credit and other financial institutions. Their operation is explained in the Commission's *Jurisdictional Notice*<sup>126</sup>.

#### (viii) Illustrations

A few examples may help to illustrate how the jurisdictional rules just outlined operate in practice. See Fig. 21.1.

<sup>123</sup> *Ibid*, paras 197–198.

<sup>124</sup> *Ibid*, paras 199–202; for an example of a case in which the geographical allocation of turnover was crucial to jurisdiction see Case M 4439 *Ryanair/Aer Lingus*, decision of 27 June 2007, upheld on appeal Case T-342/07 *Ryanair v Commission* [2010] ECR II-000, [2011] 4 CMLR 245.

<sup>125</sup> *Jurisdictional Notice*, para 204; the website is [www.ec.europa.eu/comm/competition/mergers/exchange\\_rates.html](http://www.ec.europa.eu/comm/competition/mergers/exchange_rates.html).

<sup>126</sup> *Jurisdictional Notice*, paras 206–220.

**Example 1**

---

A acquires B: A is the wholly-owned subsidiary of X

Undertakings concerned: A and B (Article 5(1))

Turnover to be taken into account: A and B (undertakings concerned) and X (X's turnover is included as a result of Article 5(4)(c)).

---

**Example 2**

---

A acquires B, a division of Y; A is a part of X, and has a wholly-owned subsidiary, Z

Undertakings concerned: A and B (Article 5(1))

Turnover to be taken into account: A and B (undertakings concerned: disregard the turnover of Y, as A is acquiring B only, a part of Y: Article 5(2)); X (Article 5(4)(c)) and Z (Article 5(4)(b)).

---

**Example 3**

---

A acquires B. A is jointly controlled by X, Y and Z.

Undertakings concerned: A and B

Turnover to be taken into account: A and B (undertakings concerned); X, Y and Z (this is based on the language of Article 5(4)(c) of the EUMR and is supported by paragraph 182 of the Commission's *Consolidated Jurisdictional Notice*).

---

**Example 4**

---

A acquires B; A has joint control of X with Y

Undertakings concerned: A and B

Turnover to be taken into account: A and B (undertakings concerned); but is the turnover of X relevant? The answer to this question could determine whether the concentration has a Community dimension if A and B's combined turnover falls below the Community dimension thresholds. The Commission states at paragraph 187 of its *Consolidated Jurisdictional Notice* that it would allocate a 50% share of the joint venture's turnover to A in these circumstances.

---

Fig. 21.1 Illustrative examples.

## (C) Article 21: one-stop merger control

### (i) The benefits of one-stop merger control

As a general proposition it is undesirable, both for businesses and for competition authorities, if a particular concentration has to be investigated under two or more systems of law. Multiple investigation leads to administrative inefficiency, duplication, delay, expense, uncertainty and the possibility of conflicting decisions. A central principle of the EUMR is the idea of one-stop merger control: that is to say that concentrations having a Community dimension should be investigated within the EU only by the Commission. This policy is given expression in Article 21 of the EUMR. Article 21(2) provides that,

subject to review by the EU Courts, only the Commission may take decisions in respect of concentrations having a Community dimension; Article 21(3) adds that no Member State shall apply its national legislation on competition to such concentrations<sup>127</sup>. However, as explained below, there are some circumstances in which cases can be ‘reattributed’ from and to the Commission. A different point is that Article 21(4) of the EUMR provides that, in defined circumstances, a Member State may be able to apply non-competition legislation to a concentration where this is necessary to protect a ‘legitimate interest’; this provision is discussed in section F below.

Article 21(1) of the EUMR adds that Regulation 1/2003, the Regulation that gives the Commission the power to enforce Articles 101 and 102 TFEU, shall have no application to concentrations as defined in the EUMR<sup>128</sup>. However Article 21(1) makes clear that the Commission retains the right to use its powers under Regulation 1/2003 in relation to joint ventures that do not have a Community dimension and which have as their object or effect the coordination of the competitive behaviour of undertakings that remain independent.

## (ii) The benefits of more flexible jurisdictional rules

Notwithstanding the principle of one-stop merger control the EUMR makes provision for ‘case referral’, that is to say for the reattribution, in defined circumstances, of cases to and from the Commission. The Commission’s *Notice on Case Referral in respect of concentrations* (‘the *Case Referral Notice*’)<sup>129</sup> provides detailed guidance on the reattribution of jurisdiction under the EUMR, both on the guiding principles<sup>130</sup> and on the mechanics of the system<sup>131</sup>. It also contains helpful flow charts<sup>132</sup>. The case referral rules were ‘flexibilised’ by the 2004 Regulation to make reattribution easier than under the original Merger Regulation; it was felt that more flexibility was desirable in order to enable the more appropriate competition authority or authorities to conduct the investigation of cases<sup>133</sup>.

In certain cases a concentration that has a Community dimension can be referred by the Commission to Member States under the provisions of Article 4(4) and Article 9: this is described in section D below; and a concentration that does not have a Community dimension can be referred under Article 4(5) and Article 22 by Member States to the

<sup>127</sup> It is arguable that a national court could apply Articles 101 and 102 to concentrations having a Community dimension, in so far as those provisions are capable of applying to concentrations, on the basis that they are directly effective, though there would appear to be no example of this having happened since the entry into force of the original Merger Regulation in September 1990: for discussion of the point see Cook and Kerse *EC Merger Control* (Sweet & Maxwell, 5th ed, 2009), pp 19–22; Levy *European Merger Control Law: A Guide to the Merger Regulation* (LexisNexis, 2003), ch 21.

<sup>128</sup> Theoretically the Commission may be able to proceed under Articles 101 and 102, in so far as they are capable of application to a concentration, under Article 105 TFEU; at the time of the adoption of the original Merger Regulation the Commission said that it would do so only rarely, and in practice it has never done so; see the Commission’s statement entered in the minutes of the Council [1990] 4 CMLR 314; see also Cook and Kerse *EC Merger Control* (Sweet & Maxwell, 5th ed, 2009), pp 21–22; Levy *European Merger Control Law: A Guide to the Merger Regulation* (LexisNexis, 2003), ch 21.

<sup>129</sup> OJ [2005] C 56/2; see also *Joint Statement of the Council and the Commission on the functioning of the network of Competition Authorities* available at [www.ec.europa.eu/competition/ecn/documents.html](http://www.ec.europa.eu/competition/ecn/documents.html); for discussion of the referral system see Rakovsky, Godhino de Matos, Kopke, Ohrlander and Shiels ‘EC Merger Regulation contributes to more efficient merger control in EU’ (2009) 2 *Competition Policy Newsletter* 19.

<sup>130</sup> *Case Referral Notice*, Section II (paras 8–45).

<sup>131</sup> *Ibid*, Section III (paras 46–82).

<sup>132</sup> *Ibid*, pp 20–23.

<sup>133</sup> *Ibid*, paras 4–7.

Commission: this is dealt with in section E below. The idea of reattribution is consistent with the principle of subsidiarity<sup>134</sup>. The case referral procedures in the EUMR are carried out by the Commission in close and constant liaison with the national competition authorities<sup>135</sup>. A notable feature of the 2004 changes is that the parties themselves can now attempt to precipitate a reallocation of jurisdiction before a formal filing has been made either to the Commission or to the national competition authority or authorities: this is a result of Articles 4(4) and 4(5) of the EUMR, described below. The Commission notes that in applying the rules on reattribution of jurisdiction due account should be taken of the need for legal certainty, so that case referral should normally be made only where there is a compelling reason for departing from the ‘original jurisdiction’<sup>136</sup>.

#### **(D) Article 4(4) and Article 9: referral of concentrations having a Community dimension to the competent authorities of the Member States**

The starting point is that concentrations that have a Community dimension benefit from a one-stop shop; the Commission acknowledges that the fragmentation of such cases, that is to say the partial referral of aspects of a concentration having a Community dimension to one or more Member States, is undesirable in principle even though possible as a matter of law<sup>137</sup>.

Case referrals of concentrations having a Community dimension may be made following a request from the parties to a concentration prior to a notification having been made (‘pre-notification referrals’) or following a request from a Member State (or Member States) after a notification (‘post-notification referrals’). The Commission’s decision to refer a case to a Member State is capable of being challenged by a third party that would prefer the Commission to investigate the case<sup>138</sup>; the reverse may not be true<sup>139</sup>.

##### **(i) Pre-notification referrals: Article 4(4)**<sup>140</sup>

Article 4(4) was an innovation in the 2004 Regulation. It allows the parties to a transaction to make a ‘reasoned submission’ to the Commission that a concentration will significantly affect competition in a market within a Member State which presents all the characteristics of a distinct market and therefore that it should be examined, in whole or in part, by that Member State. The parties do not have to demonstrate that the effect on competition is likely to be adverse<sup>141</sup>. The submission must be made on Form RS, the format of which is set out in Annex III of the Implementing Regulation<sup>142</sup>.

Having made a request the Commission will transmit it to all Member States without delay. The Member State referred to in the Form RS must express its agreement or disagreement with the request within 15 working days; if it does not do so it is deemed to have agreed. Unless the Member State disagrees with the request the Commission has a discretion to refer whole or part of the case to the Member State in question for it to be investigated under that State’s national competition law; this decision must be made within

<sup>134</sup> Ibid, para 8.

<sup>135</sup> Ibid, paras 53–58.

<sup>139</sup> See Case T-224/10 *Association belges des consommateurs test-achats ASBL v Commission* [2011] ECR II-000, paras 74–85.

<sup>140</sup> *Case Referral Notice*, paras 16–23.

<sup>141</sup> Ibid, para 17.

<sup>142</sup> Regulation 802/2004, OJ [2004] L 133/1, available at [www.ec.europa.eu/competition/mergers/legislation/regulations.html#impl\\_reg](http://www.ec.europa.eu/competition/mergers/legislation/regulations.html#impl_reg); as to Form RS see the *Case Referral Notice*, paras 59–64.

25 working days of receipt of the Form RS. If the Commission does not take a decision within this period it is deemed to have referred the case. The Commission is most likely to make a referral where the effects of a concentration are likely to be felt within a national market, or a market that is narrower than national, and where the markets are likely to be within one and the same Member State<sup>143</sup>. Where a concentration might affect competition in a number of national markets the Commission might consider it appropriate to retain jurisdiction: this would avoid the need for coordinated investigations by a number of competition authorities and the danger of conflicting outcomes. However referral to a number of Member States might occur, especially where competitive conditions vary from one State to another; fragmentation of jurisdiction is less of a concern where the parties themselves have made a request under Article 4(4)<sup>144</sup>. The final paragraph of Article 4(4) provides that, where the whole of the case is referred to a Member State, the duty to notify the case to the Commission ceases to apply.

(ii) **Post-notification referrals: Article 9**<sup>145</sup>

Article 9 of the EUMR provides a mechanism whereby Member States may make a request that a concentration having a Community dimension should be referred to them. The powers of the Office of Fair Trading ('the OFT') in the UK in relation to such cases are set out in a statutory instrument<sup>146</sup>. Article 9(2) establishes two situations in which a Member State may make such a request.

(A) **Article 9(2)(a)**

The first is where a concentration threatens to affect significantly competition in a market within a Member State which presents all the characteristics of a distinct market. Where the Commission considers that these criteria are fulfilled it has a discretion to refer the whole or part of the case to the Member State that made the request<sup>147</sup>.

(B) **Article 9(2)(b)**

The second is where a concentration affects competition within a Member State which presents all the characteristics of a distinct market and which does not constitute a substantial part of the common market: the latter expression is likely to refer to a geographical market that is narrow in scope and within a single Member State<sup>148</sup>. Where the Commission considers that these criteria are fulfilled it has an obligation to refer the whole or part of the case relating to the distinct market concerned<sup>149</sup>: the Commission would not be able to take action against a concentration that does not impede competition in a substantial part of the common market anyway<sup>150</sup>.

As a general rule the decision to refer must be taken within 35 working days of the working day following receipt of the notification<sup>151</sup>. Once a referral has been made the competent authority of the Member State must decide upon the case 'without undue delay'. Within 45 working days of the referral the Member State must inform the undertakings concerned of the preliminary competition assessment and what further action, if any, it proposes to take<sup>152</sup>; other than this the only time constraints on the Member State are those imposed by national law. Member States may take only the measures strictly

<sup>152</sup> Ibid, Article 9(6).

necessary to safeguard or restore effective competition on the market concerned<sup>153</sup>. Where the Commission refuses a request a Member State may appeal to the General Court<sup>154</sup>.

### (iii) Statistics

The statistics on Article 4(4) and Article 9 are of interest<sup>155</sup>. In the years immediately preceding 1 May 2004, when the current EUMR became applicable, Member States were making quite a large number of Article 9 requests – in 2003 the figure was ten. Refusals are rare: out of a total of 98 Article 9 requests to have been made by 30 September 2011 only six were refused, and the only refusals in the last three years were in the cases of *EDF/Segebel*, where the Commission considered that commitments offered by EDF would address the competition concerns that it had identified in the Belgian electricity market<sup>156</sup>, and *Crédit Agricole/Cassa di Risparmio Della Spezia/Agences Intesa Sanpaolo*<sup>157</sup>, where the Commission refused an Article 9 request from Italy in relation to Crédit Agricole's purchase of bank branches in Italy. Since 1 May 2004 the number of Member State requests under Article 9 has tended to be fewer than it had been, from ten in 2003 to just three in 2009; however that tendency was reversed in 2010, when seven cases were referred to Member States, and several of those were to two Member States rather than one. Undertakings have made use of the Article 4(4) procedure on quite a number of occasions: by 30 September 2011 there had been 65 requests under Article 4(4), and none had been refused.

### (iv) Article 4(4) and Article 9 in practice

Referrals to a Member State can give rise to problems for the undertakings concerned. In *Interbrew/Bass* the European Commission referred part of the case to the UK<sup>158</sup>. The Competition Commission in the UK recommended that the transaction should be prohibited in its entirety<sup>159</sup>, a particularly unfortunate outcome given that the sale agreement had been entered into without a condition that approval from the UK authorities was required. Following a judicial review the transaction was permitted to go ahead in an amended form<sup>160</sup>. In *Tesco/Carrefour*<sup>161</sup> the concentration was approved by the European Commission in December 2005; however the intended acquisitions in Slovakia were prohibited following an Article 9(2)(b) referral of that part of the transaction<sup>162</sup>. In *Foster Yeoman/Aggregate Industries*<sup>163</sup> the UK requested a referral which led to the OFT accepting undertakings in lieu of a reference to the Competition Commission to overcome concerns about both unilateral and coordinated effects that would arise from the transaction there<sup>164</sup>. It is possible for a third party to appeal against a Commission decision to make a referral under Article 9<sup>165</sup>.

<sup>153</sup> Ibid, Article 9(8).      <sup>154</sup> Ibid, Article 9(9).

<sup>155</sup> See 'Table of EUMR statistics', p 899 below for a statistical table of merger notifications.

<sup>165</sup> See 'Appeals against Article 9 references', pp 895–896 below.

In its *Report on the functioning of Regulation No 139/2004* of June 2009<sup>166</sup> the Commission concluded that the Article 4(4) (and Article 4(5)) pre-notification referral mechanisms had considerably enhanced the efficiency and jurisdictional flexibility of merger control in the EU, although it noted that some stakeholders had expressed concern about the overall timing and cumbersomeness of the referral process; the same comment was made in relation to the Article 9 and Article 22 procedures<sup>167</sup>.

### **(E) Article 4(5) and Article 22: referral of concentrations not having a Community dimension by Member States to the Commission**

The starting point in the case of concentrations not having a Community dimension is that they are subject to the national systems of merger control of the Member States. With the exception of Luxembourg every Member State has provisions on merger control, and it can happen that one transaction may be reviewable in numerous jurisdictions: in its *Report on the functioning of Regulation No 139/2004* of June 2009<sup>168</sup> the Commission noted that in 2007 there were at least 100 transactions that were notifiable in three or more Member States. As noted already multiple filings can be undesirable both for businesses and for competition authorities. The EUMR makes provision for concentrations not having a Community dimension to be referred to the Commission, in which case they may benefit from the principle of one-stop merger control. As the statistics in the text that follows show these provisions, and in particular Article 4(5), are used quite often.

#### **(i) Pre-notification referrals: Article 4(5)<sup>169</sup>**

Article 4(5), like Article 4(4), was an innovation in the 2004 Regulation. Article 4(5) allows the parties to a concentration that is capable of being reviewed under the national competition laws of at least three Member States to make a reasoned submission that it should be examined by the Commission. They must do so on Form RS, and the Commission must transmit the submission to the Member States without delay.

Member States competent to examine the concentration must disagree with the request within 15 working days. If one Member State expresses disagreement, the case will not be referred (in other words the case referral process under Article 4(5) can be vetoed by a single Member State, although this is not the case under Article 22). However if there is no disagreement within the stipulated period the concentration is deemed to have a Community dimension<sup>170</sup> and falls to be dealt with under the provisions of the EUMR; Member States can no longer apply their national competition law to the case, which proceeds on the basis of one-stop merger control. In the Commission's view the most appropriate cases for referral under Article 4(5) are those where the potential impact on competition will be felt in markets that are wider than national in geographic scope; the Commission is likely to be in the best position to investigate such cases<sup>171</sup>. It might also be best-placed to investigate where the markets affected are national or narrower, but competition concerns arise in a number of Member States; this may lead to a more coherent and consistent outcome<sup>172</sup>. It might also be appropriate for a referral to the Commission to take place under Article 4(5) even where there are no competition concerns at all, simply to avoid the burden of multiple Member State filings<sup>173</sup>.

<sup>166</sup> *Communication from the Commission to the Council* COM(2009) 2101 final.

<sup>167</sup> *Ibid*, paras 17–21.

<sup>168</sup> *Ibid*, para 12.

<sup>169</sup> *Case Referral Notice*, paras 24–32.

<sup>170</sup> Note that under Article 22 the Commission has a discretion whether to accept a request, whereas under Article 4(5), in the absence of a veto by a Member State, the Commission must accept jurisdiction.

<sup>171</sup> *Case Referral Notice*, para 28.

<sup>172</sup> *Ibid*, para 29.

<sup>173</sup> *Ibid*, para 32.

(ii) **Post-notification referrals: Article 22**<sup>174</sup>

Article 22 of the EUMR provides a mechanism whereby Member States may refer concentrations that do not have a Community dimension to the Commission for it to investigate: the concentration in question must affect trade between Member States<sup>175</sup> and must threaten to affect competition significantly within the territory of the Member State or States making the request<sup>176</sup>. In 2010 the Commission accepted a request from six Member States to investigate the acquisition by Procter & Gamble of Sara Lee's 'Ambi Pur' air-freshener: the interesting point about this is that the transaction was not notifiable under the merger control provisions of five of the six referring Member States, and yet the Commission still accepted the referral. There is nothing in the wording of the EUMR to prevent a request in such circumstances, and when the original Merger Regulation was introduced in 1989 one of the justifications for the Article 22 procedure was that some Member States did not have a system of merger control: it seemed sensible in those circumstances to allow references to the Commission of mergers that could be harmful to competition and that would have an effect on trade between Member States<sup>177</sup>. However the interesting point about the *Sara Lee* case is that the referring Member States *did* have systems of merger control, but the transaction in question was below the national jurisdictional thresholds.

When the Commission receives an Article 22 request it must inform the competent authorities of the Member States without delay; other Member States may join the request within 15 working days of being informed of the initial request, and national time limits as to merger control are suspended until the jurisdictional question has been decided<sup>178</sup>. Silence on the part of a Member State does not mean that it is deemed to have joined the request. If a Member State decides not to join the request its national time limits revive<sup>179</sup>. That Member State can then apply its own law, even if the Commission accepts the request from other Member States: to put the point another way, the principle of one-stop merger control does not necessarily apply in an Article 22 case, since Member States retain the right to disagree with a request and to apply their own law. The Commission must decide, within a further ten working days from the end of the period given to Member States to decide whether to join the request, whether to examine the concentration<sup>180</sup>. If the Commission does not take a decision it is deemed to have accepted the request<sup>181</sup>. If the Commission does decide to examine the case it may request the parties to make a formal notification<sup>182</sup>. Once the Commission has taken jurisdiction the case proceeds in accord-

<sup>174</sup> Ibid, paras 42–45.

<sup>175</sup> The Commission's *Notice on the notion of effect on trade concept contained in Articles [101] and [102] of the Treaty* OJ [2004] C 101/81, may, by analogy, provide helpful guidance on the application of this expression; see the *Case Referral Notice*, fn 36.

<sup>176</sup> EUMR, Article 22(1).

<sup>177</sup> Three prohibitions under the EUMR were of mergers referred by Member States that had no merger control provisions: see Case M 553 *RTL/Veronica/Endemol*, decision of 17 July 1996, upheld on appeal Case T-221/95 *Endemol Entertainment Holding BV v Commission* [1999] ECR II-1299, [1999] 5 CMLR 611; Case M 784 *Kesko/Tuko*, decision of 20 November 1996, OJ [1997] L 110/53, upheld on appeal Case T-22/97 *Kesko Oy v Commission* [1999] ECR II-3775, [2000] 4 CMLR 335; Case M 890 *Blokker/Toys 'R' Us*, decision of 26 June 1997, OJ [1998] L 316/1.

<sup>179</sup> Ibid.

<sup>180</sup> For an example of a decision not to examine a concentration following an Article 22 request see *Gas Natural/Endesa*, Commission Press Release IP/05/1356, 27 October 2005.

<sup>181</sup> EUMR, Article 22(3).

<sup>182</sup> Ibid; the parties in an Article 22 case will already have made a notification to the national competition authority or authorities, and it is possible that the Commission will be able to glean the information it requires from those notifications.

ance with the provisions of the EUMR<sup>183</sup>. The Commission may invite Member States to make a request under Article 22<sup>184</sup>.

### (iii) Statistics

The statistics on Article 4(5) and Article 22 are of interest, and demonstrate in particular that undertakings have found the Article 4(5) procedure to be a useful provision<sup>185</sup>. In the early years of EU merger control Article 22 requests were rare; three were made by Member States that had no system of merger control at all at the relevant time, and each of them led to an outright prohibition by the Commission<sup>186</sup>. All the Member States now have a system of merger control, with the exception of Luxembourg, so that cases such as these would no longer happen except in relation to that one Member State. More recently Article 22 requests have become a little more common, usually where a number of Member States were willing to transfer jurisdiction to the Commission. Article 4(5) requests have become common: 23 requests were made in 2008 and the same number in 2009; none was refused. In 2010 there were 26 requests and one refusal.

### (iv) Article 4(5) and Article 22 in practice

As already noted, three early Article 22 requests led to outright prohibitions of the concentrations in question. More recently Article 4(5) and Article 22 requests have continued to lead to problems for the undertakings concerned. For example an Article 4(5) request in the case of *Metso/Aker Kvaerner* led to a Phase II investigation and was cleared only subject to commitments<sup>187</sup>. Commitments were required following Article 22 requests in *Promatech/Sulzer Textil*<sup>188</sup>, *GE/AGFANDT*<sup>189</sup>, *AREVA/Urenco/ETC*<sup>190</sup>, *Omya/J.M.Huber*<sup>191</sup>, *ABF/GBI Business*<sup>192</sup> and *Syngenta/Monsanto*<sup>193</sup>. The case of *Glatfelter/Crompton Assets*<sup>194</sup> was taken into a Phase II investigation, but was cleared unconditionally. As noted above, the Commission's *Report on the functioning of Regulation No 139/2004* of June 2009<sup>195</sup> reported that Article 4(5) and Article 22 have worked well in practice, albeit that they are sometimes perceived to be slow and cumbersome<sup>196</sup>.

## (F) Article 21(4): legitimate interest clause

The principle of one-stop merger control means that a Member State cannot apply its competition law to a concentration having a Community dimension except where Article 4(4) or Article 9 apply. However there may be circumstances in which a Member State wishes to investigate and perhaps to prohibit a concentration for some other reason: for example because it objects to a domestic undertaking being acquired by a foreign one; because the concentration might lead to unemployment and social disruption; or because the sector in question is a sensitive one in which the Member State wishes to maintain a strong influence which might be undermined by wider participation. Some interventions by a Member

<sup>183</sup> EUMR, Article 22(4).

<sup>184</sup> *Ibid*, Article 22(5).

<sup>185</sup> See 'Table of EUMR statistics', p 899 below for a statistical table of merger notifications.

<sup>186</sup> See ch 21 n 177 above.

<sup>187</sup> Case M 4187, decision of 12 December 2006; see similarly Case M 4209 *Thule/Schneekten*, subsequently abandoned by the parties.

<sup>188</sup> Case M 2698, decision of 24 July 2002.

<sup>189</sup> Case M 3136, decision of 5 December 2005.

<sup>190</sup> Case M 3099, decision of 6 October 2004.

<sup>191</sup> Case M 3796, decision of 19 July 2006, OJ [2007] L 72/24.

<sup>192</sup> Case M 4980, decision of 23 September 2008.

<sup>193</sup> Case M 5675, decision of 17 November 2010.

<sup>194</sup> Case M 4215, decision of 20 December 2006, OJ [2007] L 151/41.

<sup>195</sup> *Communication from the Commission to the Council* COM(2009) 2101 final.

<sup>196</sup> *Ibid*, paras 17–21.

State to prevent a concentration involving an undertaking from another Member State might infringe primary provisions of the Treaty, for example Article 49 TFEU on the right of establishment or Article 63 TFEU on the free movement of capital; in such a situation the Commission may proceed against the Member State in question by bringing proceedings before the Court of Justice under Article 258 TFEU. In other cases the Commission might bring proceedings against a Member State that tries to block a concentration having a Community dimension on the basis that this involves a violation of the EUMR itself since Article 21 confers exclusive competence on the Commission in relation to concentrations having a Community dimension (see below). The Commission made a declaration to the European Parliament in March 2006 stressing its determination to use these legal provisions to ensure that the principles of the single market are upheld<sup>197</sup>, and the former Commissioner for Competition, Neelie Kroes, expressed her strong opposition to national protectionist measures contrary to the principles of the internal market in a speech in St Gallen in May 2007<sup>198</sup>. The Commission does not believe that the creation of ‘national champions’ justifies non-compliance with, or exemption from, competition law<sup>199</sup>.

Article 21(4) of the EUMR provides that Member States may take appropriate measures to protect legitimate interests other than those taken into consideration by the EUMR that are compatible with the general principles and other provisions of EU law. Public security, plurality of the media and prudential rules – that is to say rules designed to ensure the stability and financial adequacy of banks, insurance companies and similar undertakings – are regarded as legitimate interests for this purpose. Any other legitimate interest must be communicated to the Commission which must inform the Member State in question of its decision within 25 working days of the communication.

### (i) Authorised applications of Article 21(4)

Decisions to allow a Member State to proceed on the basis of Article 21(4) are rare: by 31 May 2011 only eight had been granted<sup>200</sup>. As Article 21(4) involves a derogation from the general principles of the EUMR, that concentrations having a Community dimension should be subject to a one-stop shop, the Commission will apply it strictly.

In *Lyonnaise des Eaux SA/Northumbrian Water Group*<sup>201</sup> the Commission accepted that the UK was entitled to investigate the regulatory aspects of a transaction whereby Lyonnaise des Eaux acquired a UK water undertaking, while the Commission considered the competition issues. The UK also investigated the *Independent Newspaper* case under the (now-repealed) newspaper merger provisions of the Fair Trading Act 1973<sup>202</sup>. In *Sun Alliance/Royal Insurance*<sup>203</sup> the Commission acknowledged that the UK could consider whether the merger would be in accordance with the Insurance Companies Act 1982,

<sup>197</sup> Commission Declaration of 15 March 2006, available at [www.europarl.europa.eu/](http://www.europarl.europa.eu/).

<sup>199</sup> See the Commission’s contribution to the OECD Best Practices Roundtable on *Competition Policy, Industrial Policy and National Champions* (2009), pp 145–147, available at [www.oecd.org](http://www.oecd.org).

<sup>200</sup> See ‘Table of EUMR statistics’, p 899 below for a statistical table of merger notifications.

<sup>201</sup> Case M 567, decision of 21 December 1995, OJ [1995] C 11/3; the Monopolies and Mergers Commission, as it was then called, subsequently published a report *Lyonnaise des Eaux SA and Northumbrian Water Group plc* Cm 2936 (1995) identifying possible public interest detriments: see 1999 *Annual Report of the DGFT*, p 35.

<sup>202</sup> Case M 423, decision of 14 March 1994, OJ [1994] C 85/6.

<sup>203</sup> Case M 759, decision of 18 June 1996, OJ [1996] C 225/12.

but said that this would be done in close liaison with it. In *Electricité de France/London Electricity*<sup>204</sup> the UK requested a referral under Article 9 of the EUMR and claimed a legitimate interest under Article 21(4); the Commission did not accept either request: the regulatory concerns of the Director General of Electricity Supply were not with the concentration itself but with the conduct of the merged undertakings after it would have taken place, to which the regulatory authority could apply national regulatory provisions. In *Thomson-CSF/Racal* the UK investigated the public security aspects of the proposed transaction under the merger provisions of the now-repealed Fair Trading Act 1973<sup>205</sup>. In *MBDA/SNPE/JV* the European Commission cleared the concentration under the EUMR, and the UK accepted behavioural undertakings in lieu of a reference to the Competition Commission to alleviate public security concerns<sup>206</sup>. In *News Corp/BSkyB*<sup>207</sup> the Commission cleared the concentration, but acknowledged the right of the UK to consider its potential effects on the plurality of the media in the UK<sup>208</sup>.

#### (ii) Prohibited applications of Article 21(4)

In *Banco Santander Central Hispano/A Champalimand*<sup>209</sup> a concentration in the financial services sector having a Community dimension was notified to the Commission. The Portuguese Minister of Finance opposed the concentration, claiming to have anxieties about the prudential supervision of Mundial Confianga, an insurance undertaking, and also because he considered that the concentration would interfere with Portuguese national interests; further it would prejudice an integral sector of the Portuguese economy and financial system. The concerns of the Minister were increased by the parties' procedural impropriety in failing to notify the Minister of Finance. The Commission rejected these arguments and required the Minister to suspend his opposition to the transaction<sup>210</sup>.

The Commission took a similar view in *Secil/Holderbank/Cimpor*. The Portuguese Minister of Finance objected to the proposed acquisition of a Portuguese cement company, Cimpor, which the Portuguese Government was in the process of privatising. The proposed acquisition had a Community dimension and therefore fell within the Commission's exclusive jurisdiction<sup>211</sup>. The Commission adopted a decision requiring Portugal to withdraw the decisions it had taken opposing the acquisition on the ground that Portugal had failed to show that it had a legitimate interest in the sense of Article 21(4) of the EUMR<sup>212</sup>. The Government of Portugal challenged the Commission's decision, but in *Portugal v Commission*<sup>213</sup> the Court of Justice held that the Commission was entitled to adopt an Article 21 decision to preserve the 'effet utile' of that provision;

<sup>204</sup> See the Commission's XXIXth *Report on Competition Policy* (1999), paras 193 and 197–198.

<sup>205</sup> Commission Press Release IP/00/628, 16 June 2000.

<sup>206</sup> See DTI Press Release P/2002/754, 27 November 2002 and DTI Press Release P/2002/802, 17 December 2002.

<sup>207</sup> Case M 5932, decision of 21 December 2010. <sup>208</sup> See ch 22, 'European mergers', pp 959–960.

<sup>209</sup> Case M 1616, decision of 3 August 1999, OJ [1999] C 306/37; see Mohamed 'National Interests Limiting EU Cross-border Mergers' (2000) 21 ECLR 248.

<sup>210</sup> Commission decisions of 20 July 1999 and 20 October 2000: see the Commission's XXIXth *Report on Competition Policy* (1999), paras 194–196.

<sup>211</sup> The notification in this case was withdrawn by the parties before the Commission had reached a decision: Case M 2054.

<sup>212</sup> See Commission Press Release IP/00/1338, 22 November 2000; in Case C-367/98 *Commission v Portugal* [2002] ECR I-4731, [2002] 2 CMLR 1213 the Court of Justice ruled that the law under which the Portuguese Government had proceeded was itself in violation of Article 63 TFEU.

<sup>213</sup> Case C-42/01 [2004] ECR I-6079, [2004] 5 CMLR 363; see Mäkel 'The Court of Justice rules for the first time on Article 21(3) of the merger regulation in Case C-42/01 *Portuguese Republic v Commission*' (2005) (Spring) *Competition Policy Newsletter* 19.

that the Commission can conclude that a decision of a Member State on the public interest is incompatible with EU law even where that interest has not been communicated to it by the Government asserting it; and that the Commission is entitled to require by an Article 21 decision that the state measure in question should be withdrawn.

In *UniCredito/HVB*<sup>214</sup> the Commission cleared the proposed acquisition by UniCredito of Italy of HVB. However Poland required UniCredito to divest itself of shares in a Polish bank, BPH, which was indirectly controlled by HVB; it considered that the retention by UniCredito of these shares would violate the terms of an earlier agreement, in 1999, whereby UniCredito had purchased another bank, Pekao, as part of the process of bank privatisation in Poland. The Commission subsequently notified the Polish Government that it considered that the Government had violated both Article 21 of the EUMR<sup>215</sup> and Articles 49 and 63 TFEU<sup>216</sup>, on the right of establishment and the free movement of capital respectively; however these cases were subsequently closed.

In *E.ON/Endesa*<sup>217</sup> the Commission approved the proposed acquisition by E.ON of Germany of a Spanish undertaking in the energy sector, Endesa. Spain took steps to impede the acquisition leading to two decisions of the Commission finding violations of Article 21 of the EUMR<sup>218</sup>. In March 2007 the Commission made a formal request to Spain to comply with these decisions<sup>219</sup>. Spain failed to satisfy the Commission with the result that the Commission referred the matter to the Court of Justice; the Court ruled in March 2008 that Spain had acted in breach of its obligations under EU law<sup>220</sup>. The Commission also came to a preliminary conclusion that Italy was in breach of Article 21 of the EUMR in *Abertis/Autostrade*<sup>221</sup>, a transaction which the Commission cleared<sup>222</sup> but which Italy objected to on the basis that it was concerned that Abertis, of Spain, would not be able to carry out the investment required to maintain and improve the motorway network in Italy. In November 2006 Italy withdrew the obstacles to the merger and offered to cooperate fully with the Commission<sup>223</sup>. In January 2007 Italy made a submission to the Commission fully explaining the public interest criteria that were relevant to the case<sup>224</sup>. The Commission, after expressing its frustration at the late reply on the part of Italy, sent a new preliminary assessment again finding Italy in breach of Article 21 of the EUMR<sup>225</sup>. In July 2007 Italy took steps towards addressing the Commission's concerns<sup>226</sup>, and the Commission closed the infringement proceedings in October 2008<sup>227</sup>.

## (G) Defence

Article 346(1)(b) TFEU provides that a Member State ‘may take such measures as it considers necessary’ in matters of security connected with its defence industry; such measures must not adversely affect the conditions of competition in the internal market regarding products which are not intended for specifically military purposes. This means that a Member State may investigate the military aspects of a concentration and the Commission the civilian aspects; this distinction in itself inevitably raises the problem of how to deal with products that have a ‘dual-use’, that is to say that can be used both for military and for civilian purposes. The UK Government successfully invoked Article 346(1)(b) in relation to the proposed takeover of VSEL by British Aerospace<sup>228</sup>, where both companies produced military equipment for the British defence forces; it required British Aerospace not to notify the military element of the takeover to the Commission. Subsequent to this the *GEC/Thomson-CSF(II)*<sup>229</sup>, *British Aerospace/Lagardère*<sup>230</sup> and *British Aerospace/GEC Marconi*<sup>231</sup> cases all involved the exercise of Article 346 by the UK. In the case of *GEC/Marconi* it was reported that the Competition Commissioner at the time, Karel van Miert, was concerned that the Commission in the past had been too generous in allowing the UK to assert jurisdiction in defence matters: at the least the Commission would wish to look at the civilian aspects of the case and might in future be more sceptical on how ‘dual-use’ products should be investigated. More recently it seems that the Commission has been taking a stricter view in relation to the application of Article 346; since late 1999 several mergers involving the defence industry in Europe have been fully notified to the Commission<sup>232</sup>.

## 4. Notification, Suspension of Concentrations, Procedural Timetable and Powers of Decision

This section will deal with the following matters:

(A) **Notification:** concentrations that have a Community dimension are required by Article 4 to be notified on Form CO to the Commission.

(B) **Suspension of concentrations:** Article 7 provides that concentrations that have a Community dimension are automatically suspended until they are declared compatible with the common market; this period may be waived in appropriate cases.

(C) **Procedural timetables and powers of decision of the Commission:** strict time limits are imposed on the Commission’s decision-making in order to disturb the operation of the market as little as possible: the EU Courts have stressed the importance of speedy procedures under the EUMR on several occasions<sup>233</sup>. The Commission can make a range of decisions when reviewing concentrations.

<sup>228</sup> DTI Press Notice P/94/623 of 19 October 1994: see Case M 528, Commission decision of 24 November 1994; see also Case M 529 *VSEL/GEC*, decision of 7 December 1994.

<sup>229</sup> Case M 724, decision of 15 May 1996.

<sup>230</sup> Case M 820, decision of 23 September 1996.

<sup>231</sup> Case M 1438, decision of 25 June 1999.

<sup>232</sup> These cases can be accessed at [www.ec.europa.eu/competition/mergers/cases](http://www.ec.europa.eu/competition/mergers/cases).

<sup>233</sup> See eg Case C-170/02 P *Schülsserverlag JS Moser and others v Commission* [2003] ECR I-9889, [2004] 4 CMLR 1522, paras 33 and 34; Case C-42/01 *Portuguese Republic v Commission* [2004] ECR I-6079, [2004] 5 CMLR 363, paras 51 and 53.

## (A) Notification

Article 4(1) of the EUMR provides that concentrations with a Community dimension must be notified to the Commission following the conclusion of the agreement, the announcement of the public bid, or the acquisition of a controlling interest but prior to their implementation. Notification may also be made where undertakings demonstrate to the Commission a good faith intention to conclude an agreement or to make a public bid: this means that they can begin the investigative procedure, with the benefit of the fixed time limits, before the formal legalities of the transaction have been completed. The Commission publishes a notice of concentrations having a Community dimension in the Official Journal. Articles 4(4) and 4(5) make provision for the parties to make reasoned submissions for the reallocation of cases to or from the Commission: this has already been discussed in the section on jurisdiction<sup>234</sup>. Fines can be imposed for providing incorrect or misleading information in a notification or in response to a Commission request for information and for implementing a concentration without prior approval<sup>235</sup>.

The Commission may declare a notification to be incomplete – for example because it omits information which ought to have been included – in which case the time limits for reaching a decision will not have begun to run. Rejection of a notification may have serious consequences for the undertakings concerned which, for a variety of reasons, may wish to conclude the transaction by a certain date. DG COMP has published *Best Practices on the conduct of EC merger control proceedings*<sup>236</sup> which seek to clarify the day-to-day conduct of proceedings under the EUMR; compliance will make it less likely that a notification is rejected as incomplete. The *Best Practices Guideline* suggests that, even in the simplest of cases, there should be pre-notification contact with DG COMP: the discussions should be commenced at least two weeks prior to notification and will be held in strict confidence<sup>237</sup>. Pre-notification discussions can cover a range of matters from jurisdictional questions and waivers of informational requirements to substantive analysis and possible remedies. The Commission prefers there to be business representatives present at meetings who have knowledge of the relevant markets as well as legal advisers<sup>238</sup>. The *Guideline* goes on to explain that a memorandum should be submitted to DG COMP to facilitate its initial contact with the parties, followed by more detailed submissions or a draft Form CO<sup>239</sup>. The *Guideline* explains that there may be ‘state-of-play’ meetings between the notifying parties and officials from DG COMP at key stages of the investigation; DG COMP may also meet with interested third parties, and it may even hold ‘triangular meetings’ if it would be helpful to hear everyone concerned in a single forum<sup>240</sup>. The *Guideline* also discusses access to the Commission’s file following the opening of a Phase II investigation<sup>241</sup>, the review of ‘key documents’ and issues of confidentiality<sup>242</sup>. Officials from DG COMP meet on Mondays to allocate new cases to a particular case team.

The Commission has adopted Regulation 802/2004<sup>243</sup> which sets out the format in which a notification (or a reasoned submission) is to be made.

<sup>234</sup> See ‘Pre-notification referrals: Article 4(4)’, pp 846–847 and ‘Pre-notification referrals: Article 4(5)’, p 849 above.

<sup>235</sup> See ‘Powers of Investigation and Enforcement’, pp 890–891 below.

<sup>236</sup> Available at [www.ec.europa.eu/competition/mergers/legislation/html](http://www.ec.europa.eu/competition/mergers/legislation/html).

<sup>237</sup> *Best Practices Guideline*, paras 5–8. <sup>238</sup> *Ibid*, para 9. <sup>239</sup> *Ibid*, paras 10–23.

<sup>240</sup> *Ibid*, paras 30–39.

<sup>241</sup> See also the Commission’s *Notice on access to the file* OJ [2005] C 325/7.

<sup>242</sup> *Ibid*, paras 42–47.

<sup>243</sup> OJ [2004] L 133/1; this Regulation replaces the earlier Regulation 447/98, OJ [1998] L 61/1.

**(i) Notifications**

Notifications are made in the format known as Form CO. An original, signed version of the Form CO, on paper, must be submitted to the Commission together with a further five paper copies with annexes and 32 copies of the notification in CD- or DVD-ROM format<sup>244</sup>; the notification is sent to a registry (known as the Greffe) which registers its time of arrival, at which point the merger review timetable begins to run. Form CO requires the notifying firms to provide substantial information: Annex I of Regulation 802/2004 explains the information that must be provided. The pre-notification meetings required by DG COMP's *Best Practices Guideline* provide an opportunity for the parties, their advisers and the officials from DG COMP dealing with the case to satisfy themselves that the Form CO, when it is eventually submitted, contains all the information needed for the Commission to commence its investigation.

In certain circumstances a 'Short Form' notification may be made, relieving the parties from some of the informational burden that they would otherwise bear. The circumstances in which this procedure can be used, and the information required in the short-form notification, are set out in Annex II of Regulation 802/2004. The procedure is available for:

- joint ventures that have no, or negligible, activities in the EEA
- concentrations where the parties are not engaged in business activities in the same product and geographical markets or in markets that are vertically related to one another
- transactions where the parties' combined market shares are below 15 per cent in the case of a horizontal concentration or, in the case of a vertical concentration, where the parties do not have an individual or combined market share in excess of 25 per cent at any level of the market
- cases where a party is to acquire sole control of an undertaking over which it already has joint control.

When a short-form notification is permitted the Commission will usually adopt a short-form clearance decision within 25 working days from the date of notification: this procedure is described in the Commission's *Notice on a simplified procedure for treatment of certain concentrations under Council Regulation 139/2004*<sup>245</sup>. A significant proportion of cases are dealt with under the simplified procedure. For example of 274 merger notifications in 2010, 143 were dealt with under the simplified procedure<sup>246</sup>. Cases dealt with under the short-form procedure are still subject to the suspension rule contained in Article 7 of the EUMR, but the undertakings concerned could apply for a derogation under Article 7(3)<sup>247</sup>.

**(ii) Reasoned submissions**

Annex III of Regulation 802/2004 sets out the requirements for a Form RS where the parties seek a reallocation of jurisdiction to or from the Commission.

<sup>244</sup> See the Commission's *Communication pursuant to Regulation 802/2004 on the format in which notifications should be delivered to the Commission* OJ [2006] C 251/2, updated to take into account the accession of Bulgaria and Romania.

<sup>245</sup> OJ [2005] C 56/32.

<sup>246</sup> See 'Table of EUMR statistics', p 899 below for a statistical table of merger notifications.

<sup>247</sup> See below.

## (B) Suspension of concentrations

Article 7(1) of the EUMR requires automatic suspension of a concentration that the Commission has jurisdiction to investigate before notification and before it has been declared compatible with the common market: this provision has been described by the General Court as one of the ‘founding principles’ of the EUMR in *Aer Lingus v Commission*<sup>248</sup>. Article 7(2) provides that, in the case of a public bid, the bid may be implemented provided that the concentration is notified to the Commission without delay and that the acquirer does not exercise the voting rights attached to the shares in question<sup>249</sup>. Article 14 provides penalties for ‘gun-jumping’ – that is to say implementing the transaction before receiving the Commission’s approval – in breach of Article 7(1): infringement of Article 7 could lead to a fine of as much as 10 per cent of the worldwide turnover of the undertakings concerned. There have been three fines imposed for gun-jumping<sup>250</sup>.

Article 7(3) provides that the Commission may grant a derogation from the provisions on suspension, subject to conditions where appropriate. A request for derogation from the automatic suspension must be reasoned, and the Commission will take into account the effects of the suspension on the undertakings concerned by a concentration or on a third party, and the threat to competition that the concentration poses. A few Article 7(3) derogations are allowed each year, as the Table of EUMR Statistics demonstrates<sup>251</sup>.

## (C) Procedural timetable and powers of decision of the Commission

### (i) Phase I investigations

#### (A) Possible decisions at the end of Phase I

The Commission is required by Article 6 to examine a concentration that has been notified by the parties in accordance with the EUMR as soon as the notification is received. It must then make a decision either that the concentration:

- is outside the EUMR (Article 6(1)(a)) or
- is compatible with the common market (Article 6(1)(b)): this finding extends to any restrictions directly related and necessary to the concentration (‘ancillary restraints’)<sup>252</sup> or
- as modified by the parties no longer raises serious doubts and so may be declared compatible with the common market: such a decision may be subject to conditions and obligations (‘commitments’)<sup>253</sup> (Article 6(1)(b) in conjunction with Article 6(2)) or
- raises serious doubts as to its compatibility with the common market (Article 6(1)(c)); in this situation the Commission must initiate a Phase II investigation<sup>254</sup>.

A decision under Article 6(1)(a) or (b) can be revoked where it is based on incorrect information for which one of the undertakings is responsible or where it has been obtained by

<sup>248</sup> Case T-411/07 [2010] ECR II-000, [2011] 4 CMLR 358, para 80.

<sup>249</sup> This was the position in Case M 2283 *Schneider/Legrand*, decision of 10 October 2001, OJ [2004] L 101/1 and Case M 2416 *Tetra Laval/Sidel*, decision of 30 October 2001, OJ [2004] L 43/13 where unconditional bids for shares on the Paris Stock Exchange had been made.

<sup>250</sup> See ‘Powers of Investigation and Enforcement’, pp 890–891 below.

<sup>251</sup> See ‘Table of EUMR statistics’, p 899 below.

<sup>252</sup> On ancillary restraints see ‘Contractual restrictions directly related and necessary to a merger: “ancillary restraints”’, pp 882–884 below.

<sup>253</sup> See ‘Remedies’, pp 884–890 below.

<sup>254</sup> An Article 6(1)(c) decision cannot be challenged before the General Court: Case T-48/03 *Schneider Electric v Commission* Order of 31 January 2006; an appeal to the Court of Justice was dismissed by Order, Case C-188/06 P [2007] ECR I-35.

deceit<sup>255</sup>, where there has been a breach of an obligation attached to a decision<sup>256</sup>, or where the decision is illegal in accordance with general principles of EU law<sup>257</sup>.

### (B) *Timetable*

In general Phase I decisions must, in accordance with Article 10(1) of the EUMR, be made within 25 working days at most of the day following notification; if the notification is incomplete the period begins on the day following receipt of complete information. The Phase I period may, in accordance with the second indent of Article 10(1), be extended to 35 working days where a Member State makes a request for a reference under Article 9, or where the undertakings concerned offer commitments pursuant to Article 6(2).

The Phase I timetable of 25, sometimes extended to 35, working days can place great strain on all the relevant parties – the business people, the professional advisers and the staff at DG COMP – which is why pre-notification meetings are so important. The overwhelming majority of cases are dealt with within the Phase I time limit, a not inconsiderable achievement given the complexity and size of many of the transactions notified.

### (ii) *Phase II investigations*

#### (A) *Possible decisions at the end of Phase II*

Where a concentration raises serious doubts about compatibility with the common market the Commission will commence proceedings in accordance with Article 6(1)(c) of the EUMR. An Article 6(1)(c) decision inaugurates an in-depth Phase II investigation.

The decisions the Commission may make at the end of Phase II are set out in Article 8. It may decide that the concentration:

- is compatible with the common market, having regard to the provisions of Article 2(2) and, in some cases, Articles 2(4) and 2(5)<sup>258</sup> (Article 8(1)): this finding extends to any ancillary restraints or
- is compatible with the common market, subject to commitments to ensure compliance with modifications proposed by the parties (Article 8(2)): again this extends to any ancillary restraints or
- is incompatible with the common market (Article 8(3)) or
- in so far as it has already been implemented, or implemented in breach of a condition attached to an Article 8(2) decision, must be reversed, or modified in an appropriate way (Article 8(4))<sup>259</sup>.

<sup>255</sup> EUMR, Article 6(3)(a): see Case M 1397 *Sanofi/Synthelabo*, Commission Press Release IP(99)255, 23 April 1999, [1999] 4 CMLR 1178 where the Commission revoked its decision as the notifying parties had failed to produce information about activities in a particular market; the Commission reopened its examination of the case, but allowed a partial exemption from the Article 7(3) suspension that would otherwise have automatically occurred, since the parties were preparing to offer suitable undertakings to overcome any competition concerns and because of the significant prejudice that a delay could have caused to the parties and their shareholders.

<sup>256</sup> Article 6(3)(b): see Case M 1069 *World Com/MCI*, decision of 8 July 1998, OJ [1999] L 116/1.

<sup>257</sup> Case T-251/00 *Lagardère SCA and Canal SA v Commission* [2002] ECR II-4825, [2003] 4 CMLR 965, paras 130 and 138–141.

<sup>258</sup> See ‘Articles 2(4) and 2(5) of the EUMR: full-function joint ventures and “spillover effects”’, pp 880–882 below.

<sup>259</sup> Note that the power in Article 8(4) cannot be used to order the divestiture of shares in a company that do *not* confer control: Case T-411/07 *Aer Lingus Group plc v Commission* [2010] ECR II-000, [2011] 4 CMLR 358, para 66.

Further the Commission may order such interim measures as may be appropriate (Article 8(5)) or revoke a decision taken under Article 8(2) where the Commission based its decision of compatibility on incorrect information or where the undertakings concerned have acted in breach of an obligation attached to the Commission's decision (Article 8(6)).

### (B) *Timetable*

Article 10 lays down the timetable within which the Commission must reach any of the decisions provided for in Article 8. The basic rule contained in Article 10(3) is that decisions under Articles 8(1) to 8(3) must be taken within 90 working days of the date on which proceedings were initiated; the second sentence of Article 10(3) provides that this period may be extended to 105 working days where the undertakings concerned offer commitments pursuant to Article 8(2) provided that they are offered within 55 working days of the commencement of Phase II. The second indent of Article 10(3) makes further provision for an extension of the Phase II time limit, at the request of the parties, for a period of up to 20 further working days.

Article 10(4) provides that the Phase II time limits may exceptionally be suspended where the Commission has had to obtain additional information owing to circumstances for which one of the undertakings involved is responsible. This provision is not invoked very often; in the case of *Oracle/PeopleSoft*<sup>260</sup> the Commission did 'stop the clock' pursuant to this provision in circumstances where it may have suited all the parties concerned, given that it meant that the decision under the EUMR could be taken after the proceedings instituted by the Department of Justice in the US had been concluded<sup>261</sup>. However in the case of *Omya/J.M.Huber*<sup>262</sup> the Commission stopped the clock to the annoyance of Omya; Omya's appeal against the Commission's decision was rejected by the General Court<sup>263</sup>.

Where the Commission fails to reach a decision within the prescribed time scale, whether in Phase I or Phase II, the concentration will be deemed to be compatible with the common market<sup>264</sup>.

### (C) *Phase II procedure*

A Phase II investigation is usually an exhausting and exhaustive exercise for all concerned. The timetables are tight, given that the investigation is 'in depth'. During the 90 working day period there will normally<sup>265</sup> be:

- a detailed market investigation by the Commission, including the sending of questionnaires to the parties, competitors and customers
- a peer review panel within DG COMP, to test the strength of the case
- a statement of objections sent by the Commission to the undertakings concerned

<sup>260</sup> Case M 3216, decision of 26 October 2004, OJ [2005] L 218/6.

<sup>261</sup> *US and Plaintiff States v Oracle Corporation*, available at [www.justice.gov/atr/cases/oracle.htm](http://www.justice.gov/atr/cases/oracle.htm).

<sup>262</sup> Case M 3796, decision of 19 July 2006, OJ [2007] L 72/24.

<sup>263</sup> Case T-145/06 *Omya v Commission* [2009] ECR II-145, [2009] 4 CMLR 826; see Gatti, (2009) 2 *Competition Policy Newsletter* 59.

<sup>264</sup> EUMR, Article 10(6).

<sup>265</sup> It is not inevitable that the full procedure will be followed: for example it may be that the parties offer suitable commitments during the beginning of the Phase II procedure, thereby obviating the need for a statement of objections and/or the completion of the in-depth investigation; sometimes the parties choose not to have an oral hearing, not least because this can provide an occasion for third parties that object to the transaction to address their concerns orally to the Commission and the national competition authorities that attend the hearing.

- a period for them to reply
- access for the parties to the files of the Commission<sup>266</sup>
- an oral hearing which may last for one or two days
- a meeting (or meetings) of the Advisory Committee on Concentrations
- a period within which commitments can be discussed and an opportunity for interested third parties to comment on any such commitments<sup>267</sup>
- consultation of other Directorates General
- the preparation of a draft decision for the College of Commissioners to consider the adoption by the full Commission of the final decision.

Achieving all these steps within the Phase II time limits can be extremely difficult, especially since many of the cases that come to the Commission are immensely complex. The Chief Competition Economist and his team may play an important part in Phase II cases where in-depth economic analysis is called for<sup>268</sup>.

### (iii) 'Phase III'

Even when a final decision, whether under Phase I or II, has been made there may be a further period of uncertainty and delay for the undertakings concerned. Where the parties have offered commitments as a condition of clearance it may take a considerable period of time to implement them: practitioners sometimes use the expression 'Phase III' to describe this phase of some merger investigations<sup>269</sup>. Further delay may occur where there are appeals to the EU Courts, either by the undertakings concerned, or by third parties dissatisfied with the outcome of the Commission's investigation<sup>270</sup>.

## 5. Substantive Analysis

Once the Commission has jurisdiction in relation to a concentration its task is to determine whether it is 'compatible with the common market'. The burden of proof is on the Commission which must produce convincing evidence that a merger is incompatible with the common market<sup>271</sup>. In *Bertelsmann AG v Independent Music Publishers and Labels Association*<sup>272</sup> the Court of Justice held that there is no presumption that a

<sup>266</sup> On access to the file see Case T-221/95 *Endemol Entertainment Holding BV v Commission* [1999] ECR II-1299, [1999] 5 CMLR 611, para 68 and Durande and Williams 'The practical impact of the exercise of the right to be heard: A special focus on the effect on Oral Hearings and the role of the Hearing Officers' (2005) (Summer) *Competition Policy Newsletter* 22.

<sup>267</sup> See 'Remedies', pp 884–890 below.

<sup>269</sup> On commitments see 'Remedies', pp 884–890 below.

<sup>270</sup> On judicial review of Commission decisions see 'Judicial Review', pp 891–897 below.

<sup>271</sup> See eg Case T-342/99 *Airtours v Commission* [2002] ECR II-2585, [2002] 5 CMLR 317, para 63; Case T-5/02 *Tetra Laval v Commission* [2002] ECR II-4381, [2002] 5 CMLR 1182, para 155, upheld on appeal Case C-12/03 P *Commission v Tetra Laval BV* [2005] ECR I-987, [2005] 4 CMLR 573, paras 37–51; Case T-210/01 *General Electric Company v Commission* [2005] ECR II-5575, [2006] 4 CMLR 686, paras 60–64; for discussion of issues concerning evidence generally see Levy 'Evidentiary Issues in EU Merger Control' in [2008] *Fordham Corporate Law Institute* (ed Hawk), ch 5.

<sup>272</sup> Case C-413/06 P [2008] I-4951, [2008] 5 CMLR 1073.

merger is compatible with, or incompatible with, the internal market<sup>273</sup>. The Commission is required to adopt a decision in accordance with its assessment of the economic outcome attributable to the merger which is most likely to ensue<sup>274</sup>.

Article 2(1) sets out certain criteria which the Commission must take into account when making its appraisal: these criteria are described and explained below<sup>275</sup>. Compatibility with the common market turns on the issue of whether the concentration will significantly impede effective competition. Article 2(2) provides that:

A concentration which would not significantly impede effective competition in the common market or in a substantial part of it, in particular as a result of the creation or strengthening of a dominant position, shall be declared compatible with the common market.

Article 2(3) provides that:

A concentration which would significantly impede effective competition in the common market or in a substantial part of it, in particular as a result of the creation or strengthening of a dominant position, shall be declared incompatible with the common market.

The Commission has published three texts of particular importance to the substantive assessment of mergers, the *Notice on the definition of the relevant market*<sup>276</sup>, the *Guidelines on the assessment of horizontal mergers*<sup>277</sup> and the *Guidelines on the assessment of non-horizontal mergers*<sup>278</sup>.

## (A) Market definition

The substantive assessment of mergers under the EUMR begins with a definition of the relevant product and geographic markets, the main purpose of which, as the Commission's *Notice on Market Definition*<sup>279</sup> says, is 'to identify in a systematic way the competitive constraints that the undertakings involved face'<sup>280</sup>. Some commentators believe that too much emphasis is placed on market definition in EU merger control, not least because techniques are being developed that make it possible to predict whether a particular merger would lead to an increase in prices without a formal determination of the relevant market or of market power<sup>281</sup>. Whatever the merits of this opinion may be, current practice assigns an important role to market definition: indeed notifying parties are required to identify any 'affected markets' in their Form CO (see below), and the Court of Justice held in *France v Commission*<sup>282</sup> that a proper definition of the relevant market is a necessary precondition for any assessment of the effect of a concentration on competition under the EUMR<sup>283</sup>. Market definition, including the Commission's *Notice on Market Definition*, has been discussed in detail in chapter 1 to which the reader is referred<sup>284</sup>. A few specific points about market definition under the EUMR follow.

<sup>273</sup> Ibid, para 48; see similarly Case T-210/01 *General Electric v Commission* [2005] ECR II-5575, [2006] 4 CMLR 686, para 61.

<sup>274</sup> Ibid, para 52; see also Advocate General Kokott's Opinion, para 208.

<sup>275</sup> See 'Article 2(1): the appraisal criteria', p 867 below.

<sup>276</sup> OJ [1997] C 372/5. <sup>277</sup> OJ [2004] C 31/5.

<sup>278</sup> OJ [2008] C 265/6.

<sup>279</sup> OJ [1997] C 372/5. <sup>280</sup> Ibid, para 2.

<sup>281</sup> See ch 20, 'Evidence', pp 821–822, on merger simulation.

<sup>282</sup> Cases C-68/94 and C-30/95 etc [1998] ECR I-1375, [1998] 4 CMLR 829, para 143.

<sup>283</sup> Ibid, para 55; subsequent judgments have regularly repeated this point: see eg Case T-151/05 *Nederlandse Vakbond Varkenshouders (NVV) etc v Commission* [2009] ECR II-1219, [2009] 5 CMLR 1613, para 51.

<sup>284</sup> See ch 1, 'Market definition', pp 27–42.

**(i) Form CO: 'affected markets'**

Sections 6 to 8 of Form CO require the notifying parties to provide information in relation to 'affected markets'. Affected markets are defined to mean, in the case of horizontal relationships, relevant markets where two or more parties to a concentration have a combined market share of 15 per cent or more at the national or EU level; and, in the case of vertical relationships, where their individual or combined market share is more than 25 per cent at one or more levels of the market. The information required in relation to these affected markets is substantial, including an estimate of the total size of the market, the parties' market shares for each of the last three financial years, the Herfindahl-Hirschman Index ('HHI') before and after the merger<sup>285</sup>, the structure of supply and demand and details of barriers to entry. The *quid pro quo* for the supply of such extensive information is that the Commission should be able to make a speedy assessment of the case. As noted earlier the information contained in Form CO must be accurate and complete<sup>286</sup>; if it is not the notification may be declared incomplete, in which case the time within which a decision must be made will not have begun to run. This is why extensive preparation in advance of notification, including contact with DG COMP, is so crucial<sup>287</sup>. It is important to understand that one merger might involve a number of affected markets: multi-product firms may have many overlapping products. For example in the case of *Bayer/Aventis Crop Science*<sup>288</sup> the Commission considered that there were in the region of 130 affected markets for crop protection, professional pest control and animal health products.

**(ii) Commission decisions**

In the period up to 20 June 2011 the Commission had adopted more than 4,000 decisions under the EUMR, and these contain many useful insights into its likely definition of the relevant market. Practitioners therefore, quite apart from conducting SSNIP (and other) tests to define the relevant market, will have recourse to the decisional practice of the Commission for guidance. The point should perhaps be added that in many clearance decisions the Commission does not reach a finding on market definition, since it is clear that to do so would not materially affect its assessment; the Commission will say that, however the market is defined, it is satisfied that the concentration would not be incompatible with the common market.

**(iii) Effect of decisions on market definition**

In *Coca-Cola Co v Commission*<sup>289</sup> the General Court stated clearly that a market definition in an earlier decision of the Commission could not be binding in the case of a subsequent investigation, either by the Commission itself or a national court or competition authority: each case must turn on the particular facts and circumstances prevailing at the time.

**(B) Adoption of the 'significant impediment to effective competition' test**

The Commission will declare a merger to be incompatible with the common market where it would significantly impede effective competition, in particular as a result of the

<sup>285</sup> See 'Concentration levels', p 869 below on the HHI.

<sup>286</sup> See 'Notification', p 856 above. <sup>287</sup> *Ibid.*

<sup>288</sup> Case M 2547, decision of 17 April 2002, OJ [2004] L 107/1; see similarly Case M 3465 *Syngenta CP/Advanta*, decision of 17 August 2004.

<sup>289</sup> Cases T-125/97 and T-127/97 [2000] ECR II-1733, [2000] 5 CMLR 467; it follows that notifying parties should not expect that the Commission will define a relevant market in the way it did in a previous decision: see Case T-151/05 *Nederlandse Varkbond Varkenshouders v Commission* [2009] ECR II-1219, [2009] 5 CMLR 1613, paras 136–140.

creation or strengthening of a dominant position. This formulation is subtly different from the test in the original Merger Regulation of 1989, which asked whether the merger would create or strengthen a dominant position as a result of which effective competition would be significantly impeded. The change in the substantive test was made in 2004 following a protracted debate which focused, in particular, on the respective merits of a test based on dominance, on the one hand, and on a substantial lessening of competition ('SLC'), on the other; and on the specific question of whether the dominance test left a 'gap' which meant that some mergers that could be harmful to competition could not be challenged under the EUMR. The compromise that emerged from this debate was the significant impediment to effective competition ('SIEC') test.

### (i) The dominance/SLC debate

By the time that the original Merger Regulation was adopted there was a reasonable amount of jurisprudence on the meaning of dominance under Article 102, in particular in cases such as *Continental Can v Commission*<sup>290</sup> and *United Brands v Commission*<sup>291</sup>; it was obviously attractive to deploy that jurisprudence for the purpose of merger control. In the years that followed the adoption of the Merger Regulation the Commission was able to adapt the dominance test and to apply it successfully to cases on single-firm dominance<sup>292</sup> and to collective dominance<sup>293</sup>; it also prohibited some vertical mergers under the dominance test<sup>294</sup>. For the most part the EU system of merger control developed very successfully, with one exception: the possibility that it could not be used to deal with problems of 'non-collusive oligopoly'.

### (ii) The non-collusive oligopoly gap<sup>295</sup>

The perception that there could be a 'gap' in the coverage of the Merger Regulation arose as a result of the *Airtours/First Choice* decision<sup>296</sup>. *Airtours'* proposed acquisition of First Choice would reduce the number of major tour operators in the UK from four to three. No firm would be individually dominant after the merger. The Commission prohibited the transaction on the basis that it would create a collective dominant position: however the language it used, in particular in paragraph 54 of its decision, suggested that each firm remaining on the market would be able *unilaterally* to exercise market power, without any need to act in a *coordinated* manner. The General Court, on appeal, handed down a judgment that clearly associated collective dominance with coordinated effects and annulled the Commission's decision<sup>297</sup>. It followed that, if the Commission did think that the

<sup>293</sup> See eg Case M 308 *Kali und Salz* OJ [1994] L 186/38, on appeal Cases C-68/94 and C-30/95 *France v Commission* [1998] ECR I-1375, [1998] 4 CMLR 829; Case M.619 *Gencor/Lonrho*, decision of 24 April 1996, OJ [1997] L 11/30, [1999] 4 CMLR 1076, upheld on appeal Case T-102/96 *Gencor v Commission* [1999] ECR II-753, [1999] 4 CMLR 971: this was the first prohibition decision based on collective dominance.

<sup>294</sup> See eg Case M 490 *Nordic Satellite Distribution*, decision of 19 July 1995, OJ [1996] L 53/20.

<sup>295</sup> See generally Kokkoris *Merger Control in Europe: The Gap in the ECMR and National Merger Legislations* (Routledge, 2011).

<sup>296</sup> Case M 1524, decision of 22 September 1999, OJ [2000] L 93/1.

<sup>297</sup> Case T-342/99 *Airtours plc v Commission* [2002] ECR II-5761, [2002] 5 CMLR 317: see 'Coordinated effects', pp 871–873 below; or comment on the *Airtours* case see eg O'Donoghue and Feddersen (2002) 39 CML Rev 1171; Stroux 'Collective Dominance under the Merger Regulation: a Serious Evidentiary Reprimand for the Commission' (2002) 27 EL Rev 736; Overd 'After the *Airtours* Appeal' (2002) 23 ECLR 375; Haupt 'Collective Dominance under Article 82 EC and EC Merger Control in the Light of the *Airtours*

problem in *Airtours/First Choice* was one of unilateral as opposed to coordinated effects, there appeared to be a gap in the Merger Regulation's coverage; if such a gap did exist it was because of the word 'dominance' which was not applicable in some situations.

A few examples may shed some light on the conundrum. In the following we assume that A, B and C produce high-quality products that are differentiated from one another; in other words the market is not one that is particularly conducive to coordinated behaviour<sup>298</sup>. In each case the proposal is that A will merge with B.

### Example 1

#### Before the merger

A	B	C
50	30	20

#### After the merger

AB	C
80	20

After the merger AB will probably be individually dominant. The merger can be challenged under the dominance test.

### Example 2

#### Before the merger

A	B	C
20	25	55

#### After the merger

AB	C
45	55

After the merger AB will certainly not be individually dominant since its market share will be less than C's; if the market is not conducive to coordination AB and C will not be collectively dominant either. The merger cannot be challenged under the dominance test.

### Example 3

#### Before the merger

A	B	C
35	20	45

#### After the merger

AB	C
55	45

judgment' (2002) 23 ECLR 434; Nikpay and Houwen 'Tour de Force or a Little Local Turbulence? A Heretical View on the Airtours Judgment' (2003) 24 ECLR 193.

<sup>298</sup> See 'Coordinated effects', pp 871–873 below.

After the merger AB will be larger than C, but it is unlikely that, with these market shares, it would be found to be individually dominant; as in Example 2 if the market is not conducive to coordination AB and C will not be collectively dominant either. The merger cannot be challenged under the dominance test.

The key question is whether, in Examples 2 and 3, AB and C might be more able, on an individual basis, to exercise market power after the merger than they were before it; if so there is clearly a case for intervention, but intervention is not possible on the basis of individual or collective dominance.

### (iii) The solution: ‘SIEC’

Given the uncertainty raised by *Airtours*, some commentators raised the question of whether the dominance test was really an appropriate one to use: an alternative would be to adopt the test used in several Anglo-Saxon countries and to ask whether a merger would ‘substantially lessen competition’<sup>299</sup>: this is the test in the UK<sup>300</sup>. However other commentators were far from convinced that a move to a substantial lessening of competition test was necessary or desirable: the dominance test was firmly established, had worked well in practice, and it was unclear that there really was a non-collusive oligopoly gap or that dominance could not be adapted to deal with it<sup>301</sup>.

The solution adopted by the Council in the EUMR of 2004 was disarmingly simple: it retains the vocabulary of the old Regulation but rearranges it in a way that retains the existing law of dominance while at the same time endeavouring to close the gap. The wording within each of Articles 2(2) and 2(3) was simply reversed. The test is now whether a merger would lead to an SIEC, in particular by creating or strengthening a dominant position; it used to be whether the merger would create or strengthen a dominant position thereby leading to an SIEC<sup>302</sup>. The revised formulation envisages that most cases will be dealt with under the dominance standard as a result of the inclusion of the words ‘*in particular*’: this responds to the concern that a repeal of the dominance test would lead to uncertainty and ‘undo’ 13 years of know-how and decisional practice of the Commission: recital 26 of the EUMR specifically refers to the desirability of preserving the existing jurisprudence of the EU Courts and the decisional practice of the Commission under the old Regulation, as does paragraph 4 of the Commission’s *Guidelines on the assessment of*

<sup>299</sup> See eg Whish ‘Substantive analysis under the EC Merger Regulation: should the dominance test be replaced by “substantial lessening of competition”?’ in *EC Competition Law & Policy Developments & Priorities* (Hellenic Competition Commission, 2002), pp 45–62; speech by Whish ‘Substantial lessening of competition/creation or strengthening of dominance’ 28 September 2002, available at [www.internationalcompetitionnetwork.org](http://www.internationalcompetitionnetwork.org); speech by Vickers ‘How to reform the EC merger test?’ 8 November 2002, available at [www.ofg.gov.uk](http://www.ofg.gov.uk); Fingleton ‘Does Collective Dominance Provide Suitable Housing for All Anti-competitive Oligopolistic Mergers’ [2002] *Fordham Corporate Law Institute* (ed Hawk), pp 181–199; Biro and Parker ‘A New EC Merger Test? Dominance v Substantial Lessening of Competition’ (2002) 1 *Competition Law Journal* 157.

<sup>300</sup> See ch 22, ‘The “Substantial Lessening of Competition” Test’, pp 932–946.

<sup>301</sup> See eg Böge and Muller ‘From the Market Dominance Test to the SLC Test: Are there any reasons for a change?’ (2002) 23 *ECLR* 495; speech by Ulf Böge ‘Analytical Framework of Merger Review’ 28 September 2002, available at [www.internationalcompetitionnetwork.org](http://www.internationalcompetitionnetwork.org); Levy ‘Dominance vs SLC: A Subtle Distinction’ 8 November 2002, available at [www.ibanet.org](http://www.ibanet.org).

<sup>302</sup> See Schmidt ‘The new EUMR: “Significant impediment or significant improvement?”’ (2004) 41 *CML Rev* 1555; Fountoukakos and Ryan ‘A New Substantive Test for EC Merger Control’ (2005) 26 *ECLR* 277; Röller and de la Mano ‘The Impact of the New Substantive Test in European Merger Control’ (2006) 2 *European Competition Journal* 8; Maier-Rigaud and Parplies ‘Five Years After The Introduction Of The SIEC Test: What Explains the Drop in Enforcement Activity?’ (2009) *ECLR* 565; Levy ‘The SIEC Test Five Years On: Has it Made a Difference?’ (2010) 6 *European Competition Journal* 211.

*horizontal mergers*<sup>303</sup>. However the new test does not make dominance the exclusive test, and would enable the Commission to prohibit or require the modification of a merger that would not create or strengthen a dominant position but would ‘significantly impede effective competition’. Recital 25 of the Regulation makes clear that this formulation is intended to provide jurisdiction to deal with the ‘gap’, that is to say the problem of non-collusive oligopoly. The application of the substantive test to cases of non-collusive oligopoly since 2004 will be considered below, in particular the Commission’s decision in *T-Mobile/tele.ring*<sup>304</sup>.

#### (iv) The need for a causal link between the concentration and the SIEC

The judgment of the Court of Justice in *France v Commission*<sup>305</sup> established that there must be a causal link between the concentration and the deterioration of the competitive structure of the market for the EUMR to apply. In that case the Court of Justice was considering whether a ‘failing firm’ defence existed under the EUMR<sup>306</sup>. It held that a concentration should not be blocked where the firm would have failed anyway and its market share would have accrued to the acquirer, since the concentration did not cause the harm to competition. In *De Beers/LVMH*<sup>307</sup> the Commission’s clearance was specifically based on the absence of any causal link between the creation of the joint venture and the strengthening of De Beer’s dominant position in the market for rough diamonds.

#### (v) Article 2(1): the appraisal criteria

Article 2(1) of the EUMR sets out a list of ‘appraisal criteria’ which the Commission must take into account when investigating concentrations. It provides that:

In making this appraisal, the Commission shall take into account:-

- (a) the need to maintain and develop effective competition within the common market in view of, among other things, the structure of all the markets concerned and the actual or potential competition from undertakings located either within or outwith the Community;
- (b) the market position of the undertakings concerned and their economic and financial power, the alternatives available to suppliers and users, their access to supplies or markets, any legal or other barriers to entry, supply and demand trends for the relevant goods and services, the interests of the intermediate and ultimate consumers, and the development of technical and economic progress provided that it is to consumers’ advantage and does not form an obstacle to competition.

The information required in relation to affected markets by Form CO reflects the appraisal criteria set out in Article 2(1). The list of factors in Article 2(1) is not exhaustive: the Commission must consider all matters relevant to the assessment of a merger. Article 2(1) does not establish a hierarchy, giving greater weight to one assessment factor than another; the impact that the different appraisal criteria have on the Commission’s determination will vary from case to case.

<sup>303</sup> OJ [2004] C 31/5.

<sup>304</sup> See ‘Non-coordinated effects’, pp 870–871 below.

<sup>305</sup> Cases C-68/94 and C-30/95 [1998] ECR I-1375, [1998] 4 CMLR 829; this case was decided under the original Merger Regulation: there is no reason to suppose that the requirement of a causal link would not apply in the case of the reformulated substantive test.

<sup>306</sup> See ‘The “failing firm” defence’, p 876 below.

<sup>307</sup> Case M 2333, decision of 25 July 2001, paras 112–114; see similarly Case M 2816 *Ernst & Young France/ Andersen France*, decision of 5 September 2002, paras 75 and 90; Case M 4381 *JCI/VB/FIAMM*, decision of 5 October 2007, paras 708ff.

### (C) Horizontal mergers

The Commission's *Guidelines on the assessment of horizontal mergers*<sup>308</sup> ('the *Horizontal merger guidelines*' or 'the *Guidelines*') provide guidance as to how the Commission assesses concentrations when the undertakings concerned are actual or potential competitors on the same relevant market<sup>309</sup>. The *Guidelines* deal in turn with market shares and concentration thresholds; the likelihood that a merger would have anti-competitive effects; countervailing buyer power; the possibility of entry into the market as a competitive constraint; efficiencies; and failing firms. This sequence will be retained in the text that follows. Paragraph 13 stresses that the *Guidelines* are not to be applied in a mechanical manner in each and every case; rather the competitive analysis in a particular case will be based on an overall assessment of the foreseeable impact of the merger in the light of the relevant factors and conditions. The judgment of the General Court in *Sun Chemical Group BV and others v Commission*<sup>310</sup> endorses this approach by the Commission, noting that the Commission enjoys a discretion enabling it to take into account or not to take into account particular factors<sup>311</sup>.

#### (i) Market shares and concentration levels

The *Horizontal merger guidelines* note that market shares and concentration levels provide useful first indications of the market structure and of the competitive importance of the merging parties and their competitors<sup>312</sup>. The reference to 'useful first indications' is important: market shares and concentration levels are simply a device for conducting a first screening of a merger: they could never be determinative in themselves of the outcome of a case.

#### (A) Market shares

The Commission usually looks at current market shares, although it may adjust them if it is certain that changes are about to occur because of exit, entry or expansion<sup>313</sup>; and in some industries, for example where there are 'large, lumpy' orders – for example irregular purchases of major capital equipment – it may be necessary to look at historical data<sup>314</sup>. Very large market shares of 50 per cent or more may in themselves be evidence of the existence of a dominant position, although they are not conclusive<sup>315</sup>; and the Commission may find a dominant position in the case of market shares between 40 and 50 per cent,

<sup>308</sup> OJ [2004] C 31/5; note that prior to the adoption of the *Horizontal merger guidelines* the Commission had published two reports on the topic, *The Economics of Unilateral Effects* and *The Economics of Tacit Collusion*, each prepared by Ivaldi, Julien, Seabright and Tirole: the reports can be accessed on DG COMP's website; for discussion of the *Guidelines* see Voight and Schmidt 'The Commission's guidelines on horizontal mergers: Improvement or deterioration?' (2004) 41 CML Rev 1583.

<sup>309</sup> *Horizontal merger guidelines*, para 5.

<sup>310</sup> Case T-282/06 [2007] ECR II-2149, [2007] 5 CMLR 438.

<sup>311</sup> *Ibid*, para 57.

<sup>312</sup> *Horizontal merger guidelines*, para 14.

<sup>313</sup> *Ibid*, para 15; a point not made in the *Horizontal merger guidelines* is that sometimes the Commission will, when investigating one merger, take into account the fact that a subsequent notification has been received in relation to a different merger in the same sector that will have an impact on the future competitive structure of the market: see eg Case M 938 *Price Waterhouse/Coopers & Lybrand*, decision of 15 October 1997, OJ [1997] L 50/27, [1999] 4 CMLR 665, paras 108–111 and Case M 2389 *Shell/DEA*, decision of 20 December 2001, para 21; see also Schmidt 'Spotting the Elephant in Parallel Mergers: First Past the Post, or Combined Assessment?' (2003) 24 ECLR 183.

<sup>314</sup> *Horizontal merger guidelines*, para 15.

<sup>315</sup> On this point see Case T-342/07 *Ryanair Holdings plc v Commission* [2010] ECR II-000, [2011] 4 CMLR 245, para 41 and the judgments cited therein.

and even sometimes of less than 40 per cent, depending on the other factors relevant to the case<sup>316</sup>. In *Ryanair Holdings plc v Commission*<sup>317</sup> the General Court rejected Ryanair's argument that the Commission had placed 'excessive weight' on the market shares that the merged entity would have had on some air routes<sup>318</sup>. The *Horizontal merger guidelines* state that a merger may be presumed to be compatible with the common market where the market share of the undertakings concerned does not exceed 25 per cent<sup>319</sup>.

### (B) Concentration levels

The *Horizontal merger guidelines* state that the overall concentration level in a market may provide useful information about the competitive situation, and that it may use the HHI in order to measure it<sup>320</sup>. The Commission is unlikely to be concerned about a market with a post-merger HHI of less than 1,000<sup>321</sup>. The Commission is also unlikely to be concerned where there would be a post-merger HHI between 1,000 and 2,000 and a delta<sup>322</sup> below 250, or a post-merger HHI above 2,000 and a delta below 150, unless there were special circumstances such as:

- the merger involves a potential entrant or a recent entrant with a small market share
- one or more of the parties are important innovators in ways not reflected in market shares
- there are significant cross-shareholdings among the market participants
- one of the merging firms is a maverick firm with a high likelihood of disrupting coordinated conduct
- indications of past or ongoing coordination or facilitating practices are present
- one or more of the merging parties had a pre-merger market share of 50 per cent or more<sup>323</sup>.

The *Horizontal merger guidelines* say that HHIs below the thresholds set out above may be used as an indicator of the absence of competition concerns, but that they do not give rise to a presumption either of the existence or the absence of such concerns<sup>324</sup>. The General Court in *Sun Chemical Group BV and others v Commission*<sup>325</sup> has added, however, that 'the greater the margin by which those thresholds are exceeded, the more the HHI values will be indicative of competition concerns'<sup>326</sup>.

### (ii) Possible anti-competitive effects of horizontal mergers

The *Horizontal merger guidelines* discuss the possible anti-competitive effects of horizontal mergers from paragraphs 22 to 63, dealing in turn with non-coordinated effects<sup>327</sup> and

<sup>316</sup> *Horizontal merger guidelines*, para 17.

<sup>317</sup> Case T-342/07 [2010] ECR II-000, [2011] 4 CMLR 245.

<sup>318</sup> *Ibid*, paras 41–60.

<sup>319</sup> *Ibid*, para 18, referring to recital 32 of the EUMR; note however that this 'safe harbour' does not exist in the case of a collective dominant position involving the undertakings concerned and other third parties.

<sup>320</sup> *Horizontal merger guidelines*, para 16; the HHI is explained in ch 1, 'Market concentration and the Herfindahl-Hirschman Index', pp 43–44.

<sup>321</sup> *Horizontal merger guidelines*, para 19.

<sup>322</sup> The delta refers to the change in the HHI as a result of the merger.

<sup>323</sup> *Horizontal merger guidelines*, para 20.

<sup>324</sup> *Ibid*, para 21.

<sup>325</sup> Case T-282/06 [2007] ECR II-2149, [2007] 5 CMLR 438.

<sup>326</sup> *Ibid*, para 138.

<sup>327</sup> Note that the expression 'unilateral' effects is sometimes used as an alternative for non-coordinated effects: see fn 27 of the *Horizontal merger guidelines*.

coordinated effects; there is also a brief discussion of mergers with potential competitors. The footnotes in the *Guidelines* contain many references to the case law of the EU Courts and the decisional practice of the Commission: due to constraints of space these judgments and decisions are not reproduced in the text that follows, but the reader should be aware of this useful reference point.

#### (A) *Non-coordinated effects*

Paragraph 24 of the *Horizontal merger guidelines* explains that a horizontal merger may remove important competitive constraints on one or more firms in the market, thereby enhancing their market power and leading to significant price increases. Paragraph 25 notes that generally this will happen as a result of the creation or strengthening of a dominant position on the part of one firm whose market share, after the merger, will be appreciably larger than its next competitor. However the same paragraph also refers to the possibility of non-collusive oligopoly, that is to say a situation in which the firms remaining in the market after the merger will be able to exercise market power, and therefore increase prices, even though there is little likelihood of coordination among them and even though they are not individually dominant.

Paragraph 26 explains that a number of factors are relevant to a determination of whether non-coordinated effects might occur, but explains that not all of them must be present in a particular case and that the factors set out in the *Guidelines* are not an exhaustive list. The following factors are listed:

- **the merging firms will have large market shares:** the larger the addition of market share, the more likely it is that the merger will produce an SIEC<sup>328</sup>
- **the merging firms are close competitors:** the higher the degree of substitutability between the merging firms' products, the more likely it is that the merger will produce an SIEC<sup>329</sup>
- **customers of the merging parties will have limited possibilities of switching to other suppliers**<sup>330</sup>
- **competitors are unlikely to increase supply if prices increase:** in this case the merging parties will have an incentive to reduce output to less than the levels prior to the merger, thereby increasing price<sup>331</sup>
- **the merging firms will be able to hinder expansion by competitors:** for example they may control patents or other types of intellectual property that would make expansion or entry by rivals more difficult<sup>332</sup>
- **the merger would remove an important competitive force:** for example the removal of a particularly innovative firm as a competitor<sup>333</sup>, or a merger between two particularly innovative firms, may change the competitive dynamics of the market considerably<sup>334</sup>.

The most common ground for intervention on the part of the Commission is the possibility of non-coordinated effects arising from horizontal mergers. The most recent prohibition

<sup>328</sup> Ibid, para 27.

<sup>329</sup> Ibid, paras 28–30; paragraph 29 discusses various methods of evaluating cross-substitutability eg through customer preference surveys, estimating cross-price elasticities and diversion ratios.

<sup>330</sup> Ibid, para 31.

<sup>331</sup> Ibid, paras 32–35.

<sup>332</sup> Ibid, para 36.

<sup>333</sup> Ibid, para 37; see eg Case M 5650 *T-Mobile/Orange*, decision of 1 March 2010, where the Commission's concerns included the possible elimination of the mobile operator H3G from the market.

<sup>334</sup> *Horizontal merger guidelines*, para 38; see eg Case M 5675 *Syngenta/Monsanto sunflower seed business*, decision of 17 November 2010, where the Commission's concerns included the elimination of one of the most important innovators in the market for sunflower seeds.

decisions, *Ryanair/Aer Lingus*<sup>335</sup> and *Olympic Airways/Aegean Airlines*<sup>336</sup>, were adopted on this basis. The Commission has required remedies because of non-coordinated effects in several Phase II cases in recent years<sup>337</sup>. The case of *T-Mobile/tele.ring*<sup>338</sup> was of interest since the Commission required a remedy as a result of non-coordinated effects in an oligopolistic market where the number of mobile telephony operators in Austria would be reduced from five to four, and the merging parties would not become the market leader: in other words this was a case of non-collusive oligopoly that the adoption of the SIEC test was designed to address<sup>339</sup>. A further example of a ‘gap’ case is *BASF/CIBA*<sup>340</sup> where the Commission accepted commitments within a Phase I investigation.

### (B) Coordinated effects

Paragraph 39 of the *Horizontal merger guidelines* explains that in some markets the structure may be such that firms will consider it possible, economically rational, and hence preferable, to adopt on a sustainable basis a course of action aimed at selling at increased prices. Some mergers might lead to an SIEC by increasing the likelihood that firms will be able to behave in a coordinated manner without entering into an agreement or resorting to a concerted practice contrary to Article 101 TFEU. Such coordination might concern prices, but it could also occur in relation to levels of production, the expansion of capacity, the allocation of markets or contracts in bidding markets<sup>341</sup>.

Paragraph 41 says that coordination is more likely to occur where it is fairly simple to reach a common understanding on the terms of coordination. It adds that three further conditions must be satisfied for coordination to be sustainable: these are taken from paragraph 62 of the General Court’s judgment in *Airtours v Commission*<sup>342</sup>. First it must be possible for the coordinating firms to monitor whether the terms of coordination are being adhered to; secondly, there must be some credible deterrent mechanism to maintain the discipline of the coordinating firms and to keep it internally stable; and thirdly there must be no constraint from outsiders that could jeopardise the results expected from coordination and make it externally unstable. The Court of Justice has said that these three conditions should not be applied in a mechanical way: they should be looked at taking into account ‘the overall economic mechanism of a hypothetical tacit coordination’<sup>343</sup>. The conditions for coordination are then explored in succeeding paragraphs of the *Guidelines*. They point out that a reduction in the number of firms in the market may be a factor that facilitates coordination; but also that other factors, such as the removal of a ‘maverick’ firm likely to disrupt an oligopoly, need to be examined<sup>344</sup>. In deciding

<sup>335</sup> Case M 4439 *Ryanair/Aer Lingus*, decision of 27 June 2007, upheld on appeal Case T-342/07 *Ryanair Holdings plc v Commission* [2010] ECR II-000, [2011] 4 CMLR 245.

<sup>336</sup> Case M 5830, decision of 26 January 2011, an appeal Case T-202/11 *Aeroporía Aigaiou Aeroporik: AE v Commission*, not yet decided.

<sup>337</sup> See ‘Clearances subject to commitments’, pp 905–906 below.

<sup>338</sup> Case M 3916, decision of 26 April 2006; see Lübking ‘*T-Mobile Austria/tele.ring*: Remediating the loss of a maverick’ (2006) (Summer) *Competition Policy Newsletter* 46.

<sup>339</sup> See ‘The non-collusive oligopoly gap’, pp 864–866 above; findings of non-collusive oligopoly are rare: another one is Case M 3687 *Johnson & Johnson/Guidant*, decision of 25 August 2005, paras 312–325 in relation to endovascular stents.

<sup>340</sup> Case M 5355, decision of 12 March 2009.

<sup>341</sup> *Horizontal merger guidelines*, para 40.

<sup>342</sup> Case T-342/99 [2002] ECR II-2585, [2002] 5 CMLR 317.

<sup>343</sup> Case C-413/06 P *Bertelsmann AG v Independent Music Publishers and Labels Association* [2008] ECR I-4951, [2008] 5 CMLR 1073, para 125.

<sup>344</sup> *Horizontal merger guidelines*, para 42.

whether coordination is likely to result from the merger the Commission will look at evidence of past coordination or evidence of coordination in similar markets<sup>345</sup>.

The *Guidelines* discuss the following factors:

- **reaching terms of coordination:** this is more likely to occur if it is easy to arrive at a common perception as to how the coordination should occur<sup>346</sup>. A number of matters are relevant when determining whether coordination would be easy, though these should not be applied in a mechanistic way<sup>347</sup>:
  - is the economic environment simple and stable?
  - are there a few, rather than many, firms in the market?
  - are the products homogeneous rather than complex?
  - are price and demand conditions stable rather than constantly changing?
  - is the market one in which there is little innovation?
  - in the case of coordination by way of market division would it be easy to allocate customers, for example on the basis of geography?
  - do other factors in the market increase transparency and so make it easier to coordinate prices?
  - are the firms symmetric in terms of cost structures, market shares, capacity levels and levels of vertical integration?
- **monitoring deviations:** coordination will work only if the coordinating firms are able to monitor one another to ensure that no one is cheating, for example by lowering price, expanding output or improving quality. Markets must be sufficiently transparent to prevent this happening<sup>348</sup>. Paragraphs 50 and 51 of the *Guidelines* discuss factors relevant to a determination of transparency: for example transparency is higher where transactions take place on a public exchange than where they are negotiated privately on a bilateral basis
- **deterrent mechanisms:** coordination will work only if there is a sufficient threat that there will be retaliation against a firm that deviates<sup>349</sup>. Paragraphs 53 to 55 of the *Guidelines* discuss the credibility of deterrent mechanisms: the coordinating firms must have an economic incentive to retaliate against any firms that deviate; and the deviation does not necessarily have to be in the same market as the coordination
- **reactions of outsiders:** coordination will work only if there is no competitive constraint from non-coordinating actual or potential competitors<sup>350</sup>.

In *Impala v Commission*<sup>351</sup> the Commission originally had concerns about a merger that it thought might lead to coordinated effects, but, during its Phase II investigation, reached

<sup>345</sup> Ibid, para 43; in Case T-464/04 *Impala v Commission* [2006] ECR II-2289, [2006] 5 CMLR 1049 the General Court said that the close alignment of prices over a significant period of time might, together with other factors, be sufficient to prove evidence of past coordination: *ibid*, paras 252–254.

<sup>346</sup> *Horizontal merger guidelines*, para 44.

<sup>347</sup> *Ibid*, paras 45–48.

<sup>348</sup> *Ibid*, para 49.

<sup>349</sup> *Ibid*, para 52. <sup>350</sup> *Ibid*, paras 56–57.

<sup>351</sup> Case T-464/04 [2006] ECR II-2289, [2006] 5 CMLR 1049; for comment see Völcker and O'Daly 'The Court of First Instance's *Impala* Judgment: a Judicial Counter-reformation in EC Merger Control?' (2006) 27 ECLR 589; Brandenburger and Janssens 'The *Impala* Judgment: Does EC Merger Control Need to be Fixed or Fine-Tuned?' (2007) 3(1) Competition Policy International 301; Ysewyn and Tajana 'The *Sony/BMG* Judgment of the Court of First Instance: Its Main Legal Implications and Impact on the Merger Control Process' (2007) 2 European Business Law Journal 233.

the conclusion that the merger should be cleared unconditionally. A third party successfully challenged the Commission's clearance decision before the General Court, which considered that the market was a transparent one in which coordination was possible<sup>352</sup>. However the merging parties successfully appealed to the Court of Justice against the General Court's judgment<sup>353</sup>; the Court of Justice considered that the General Court had committed a number of errors of law and that, specifically in relation to tacit coordination, it had failed to consider the transparency of the recorded music market 'by reference to a postulated monitoring mechanism forming part of a plausible theory of tacit co-ordination'<sup>354</sup>. The Court therefore set aside the judgment of the General Court and referred the matter back to it; because of a subsequent alteration in the market the appeal was eventually dropped as it had become devoid of purpose<sup>355</sup>.

The Commission was concerned about coordinated effects in *Areva/Urenco/ETC*<sup>356</sup>, where it required various commitments, including a cessation of the flow of commercially sensitive information between a joint venture and its parents, as a condition of clearance. Commitments were also required as a condition of clearance in *Linde/BOC*<sup>357</sup>, including the divestment of various wholesale supply contracts for helium and the termination of structural links, through a series of Asian joint ventures, between the merged entity and a competitor, Air Liquide. In *Travelport/Worldspan*<sup>358</sup> the Commission concluded, following a Phase II investigation, that a 'four to three' merger in the market for global distribution services would not give rise to coordinated effects since the complexity of the pricing structure and product offerings in that case limited the transparency of the market and therefore the possibility of successfully monitoring coordinated behaviour. In *ABF/GBI Business*<sup>359</sup> remedies were required to address the reduction from three to two competitors on the Spanish and Portuguese markets for yeast.

### (C) Mergers with a potential competitor

Paragraphs 58 to 60 of the *Horizontal merger guidelines* discuss mergers with potential competitors. Such a merger could lead to non-coordinated, or coordinated, effects where the potential competitor significantly constrains the behaviour of the firms active on the market. This is the case if the potential competitor possesses assets that could easily be used to enter the market without incurring significant sunk costs. Paragraph 60 states that for a merger with a potential competitor to give rise to significant anti-competitive effects two conditions must be satisfied: first, the potential competitors must already exert a significant constraining influence; and second, there must be a lack of other potential competitors which could maintain competitive pressure after the merger.

<sup>352</sup> *Ibid*, paras 288–294.

<sup>353</sup> Case C-413/06 P *Bertelsmann AG and Sony Corporation of America v Impala* [2008] ECR I-4951, [2008] 5 CMLR 1073.

<sup>354</sup> *Ibid*, paras 117–134; for comment on this case see Golding 'The Impala case: a quiet conclusion but a lasting legacy' (2010) 31(7) ECLR 261 and Luebking and Ohrlander 'The Joint Venture Sony/BMG: final ruling by the European Court of Justice' (2009) 2 *Competition Policy Newsletter* 68.

<sup>355</sup> Case T-464/04 *Impala v Commission*, order of 30 June 2009; note that, while the litigation in the EU Courts was proceeding, the Commission adopted a second decision clearing the *Sony/Bertelsmann* merger, Case M 3333, decision of 3 October 2007: see Luebking, Kijewski, Dupont, Jehanno and Eberl (2007) 3 *Competition Policy Newsletter* 85; that decision was also appealed to the General Court, Case T-229/08 *Impala v Commission*, but the Court declared that the action had become devoid of purpose; order of 30 September 2009.

<sup>356</sup> Case M 3099, decision of 6 October 2004.

<sup>357</sup> Case M 4141, decision of 6 June 2006.

<sup>358</sup> Case M 4523, decision of 21 August 2007.

<sup>359</sup> Case M 4980, decision of 23 September 2008; for comment see Amelio, de la Mano, Maximiano and Porubsky 'ABF/GBI Business: coordinated effects baked again' (2009) 1 *Competition Policy Newsletter* 91.

### (iii) Countervailing buyer power

Paragraph 64 of the *Horizontal merger guidelines* explains that the competitive pressure on a supplier can come not only from competitors but also from a customer if it has countervailing buyer power, that is to say bargaining strength vis-à-vis a seller due to its size, commercial significance and its ability to switch to alternative suppliers. The Commission will consider to what extent a buyer could immediately switch to other suppliers, credibly threaten to integrate vertically (and therefore self-supply) or sponsor upstream expansion or entry; it is more likely that large and sophisticated customers will have this kind of countervailing buyer power than smaller firms in a fragmented industry<sup>360</sup>. In *Sun Chemical Group BV and others v Commission*<sup>361</sup> the General Court rejected an argument by a third party objecting to the clearance of a merger that the Commission had failed to apply the *Guidelines* on countervailing power correctly<sup>362</sup>.

### (iv) Entry

Paragraph 68 of the *Horizontal merger guidelines* explains that if entry into a market is sufficiently easy a merger is unlikely to lead to an SIEC: for entry to amount to a sufficient competitive constraint it must be shown to be likely, timely and sufficient:

- **likelihood of entry:** entry must be sufficiently profitable taking into account the price effects of injecting additional output into the market and the potential responses of the incumbents on the market; the amount of sunk costs will be relevant to the analysis<sup>363</sup>. Barriers to entry include:
  - legal advantages such as regulatory rules limiting the number of market participants or tariff and non-tariff trade barriers
  - technical advantages such as access to essential facilities, natural resources, R&D and intellectual property rights
  - incumbency advantages such as brand loyalty, established relationships with customers and other reputational advantages<sup>364</sup>
- **timeliness:** entry will be regarded as a competitive constraint only where it would be sufficiently swift and sustained to deter or defeat the exercise of market power; what constitutes an appropriate time period for entry will depend on the characteristics and dynamics of the market, but it should normally occur within two years<sup>365</sup>
- **sufficiency:** entry must be of sufficient scope and magnitude to deter or defeat the anti-competitive effects of the merger<sup>366</sup>.

### (v) Efficiencies<sup>367</sup>

Recital 29 of the EUMR says that, when determining the impact of a merger on competition, it is appropriate to take account of any substantiated and likely efficiencies put

<sup>360</sup> Ibid, para 65.

<sup>361</sup> Case T-282/06 [2007] ECR II-2149, [2007] 5 CMLR 438, para 57.

<sup>362</sup> Ibid, paras 209–217; the merger in question was Case M 4071 *Apollo/Akzo Nobel IAR*, decision of 29 May 2006.

<sup>363</sup> *Horizontal merger guidelines*, para 69.

<sup>364</sup> Ibid, para 71.

<sup>365</sup> Ibid, para 74.

<sup>366</sup> Ibid, para 75.

<sup>367</sup> Compare the *Horizontal merger guidelines* on efficiencies with the Commission's *Guidelines on the application of Article [101(3)] of the Treaty* OJ [2004] C 101/97, paras 48–72, which are clearly motivated by

forward by the undertakings concerned; the recital adds that the Commission should publish guidance on the conditions under which it may take efficiencies into account. This it has done in paragraphs 76 to 88 of the *Horizontal merger guidelines*. In *Ryanair Holdings plc v Commission*<sup>368</sup> Ryanair complained to the General Court that the Commission had made a manifest error in assessing Ryanair's claim that the concentration would lead to efficiencies; the Court rejected the claim, and was content to cite the Commission's *Horizontal merger guidelines* and to determine whether it had applied them correctly<sup>369</sup>. The Commission explains in paragraph 76 that efficiencies brought about by a merger may counteract the effects on competition and the potential harm to consumers that would otherwise have occurred. In making its appraisal of a merger the Commission takes all relevant factors into account including the development of technical and economic progress, as set out in the appraisal criteria in Article 2(1) of the EUMR. It is important to understand that this approach means that there is no 'efficiency defence' – if the merger will lead to an SIEC it cannot be saved by a finding of efficiency: rather the Commission will factor any possible efficiencies into its overall assessment of whether the merger will lead to an SIEC. Paragraph 78 explains that, for efficiencies to be taken into account, they must produce a benefit to consumers, be merger-specific and be verifiable; these conditions are cumulative:

- **benefit to consumers:** efficiencies should be substantial and timely and should benefit consumers in the relevant markets where it is likely that competition problems might occur<sup>370</sup>. The efficiency gain might be lower prices, though cost reductions that simply follow from a reduction in output would not qualify<sup>371</sup>; new or improved products or services could also amount to an efficiency gain<sup>372</sup>. Efficiency gains may enable a firm in an oligopolistic market to increase output and reduce prices, thereby reducing the incentive to act in a coordinated manner<sup>373</sup>. There must be an incentive to pass efficiency gains on to consumers, and the Commission will be more sceptical where the merger will lead to a monopoly or a very high degree of market power<sup>374</sup>
- **merger specificity:** the efficiencies must be a direct result of the notified merger and must not be capable of being achieved by less anti-competitive alternatives; the burden of proof is on the notifying parties<sup>375</sup>
- **verifiability:** the efficiencies must be verifiable such that the Commission can be reasonably certain that they are likely to materialise, and it is incumbent on the parties to produce the relevant information in due time to demonstrate that the efficiencies are merger-specific and likely to be realised<sup>376</sup>.

In *Inco/Falconbridge*<sup>377</sup> the Commission considered, but rejected, arguments that the merger would generate efficiencies; in the Commission's view the parties had failed to demonstrate that the efficiencies were not attainable by less anti-competitive means and

similar considerations; the *Article [101(3)] Guidelines* are discussed in ch 4, 'The Commission's approach to the Article [101(3)] Guidelines', pp 160ff; see further Gerard 'Merger control policy: How to give meaningful consideration to efficiency claims?' (2003) 40 CML Rev 1367; Colley 'From "Defence" to "Attack"? Quantifying Efficiency Arguments in Mergers' (2004) 25 ECLR 342; Kocmut 'Efficiency Considerations and Merger Control – Quo Vadis, Commission?' that consumers would benefit<sup>378</sup>. The parties were more successful in advancing efficiency arguments in *Korsnäs/Assidomän Cartonboard*<sup>379</sup>, albeit in a case which it seems the Commission would have cleared unconditionally anyway.

#### (vi) The ‘failing firm’ defence<sup>380</sup>

Paragraph 89 of the *Horizontal merger guidelines* explains that the Commission may decide that an otherwise problematic merger is nevertheless capable of being found compatible with the common market where one of the parties is a failing firm. Three criteria are relevant:

- the allegedly failing firm would in the near future be forced out of the market because of financial difficulties if not taken over by another firm
- there is no less anti-competitive alternative than the notified merger
- in the absence of the merger the assets of the failing firm would inevitably exit the market<sup>381</sup>.

It is for the notifying parties to provide in due time the relevant information to support a failing firm defence<sup>382</sup>. The Commission rejected a failing firm defence in *JCI/VB/FIAMM*<sup>383</sup>.

### (D) Non-horizontal mergers

The Commission also investigates whether a merger could have vertical or conglomerate effects: its particular concerns are the possibilities of foreclosure and tacit collusion. These concerns were introduced in chapter 20<sup>384</sup>. For many years there was a lack of clarity about the Commission’s practice in relation to vertical and conglomerate cases, and its findings in *Tetra Laval/Sidel*<sup>385</sup> and in *GE/Honeywell*<sup>386</sup> were reversed on appeal. In 2003 DG COMP commissioned a report on the competitive effect of vertical and conglomerate mergers which was published on its website in 2005<sup>387</sup>. In 2007 the Commission published

<sup>378</sup> *Ibid*, paras 529–550.

<sup>387</sup> See Church *Impact of Vertical and Conglomerate Mergers* (2004), available at [www.ec.europa.eu](http://www.ec.europa.eu); for discussion see Cooper, Froeb, O’Brien and Vita ‘A Critique of Professor Church’s Report’ (2005) 1(4) *Journal of Competition Law and Economics* 785; Church ‘A Reply to Cooper, Froeb, O’Brien and Vita’ (2005) 1(4) *Journal of Competition Law and Economics* 797.

*Guidelines on the assessment of non-horizontal mergers*<sup>388</sup> (‘the *Non-horizontal guidelines*’ or ‘the *Guidelines*’) which provide valuable guidance as to how the Commission assesses concentrations where the undertakings concerned are active on different relevant markets. The *Guidelines* deal in turn with vertical mergers and with conglomerate mergers<sup>389</sup>. The *Guidelines* draw on the decisional practice of the Commission and the jurisprudence of the EU Courts since the EUMR entered into force in 1990. The text below does not cite this case law, but the reader should be aware that the *Guidelines* contain many useful references to relevant precedents. The *Guidelines* begin with an overview; they then discuss the significance of market shares and concentration levels; thereafter the specific issues arising in relation to vertical and conglomerate mergers are dealt with in turn. This sequence will be retained in the text that follows.

### (i) Overview

The *Guidelines* acknowledge that non-horizontal mergers are less likely to significantly impede effective competition than horizontal ones<sup>390</sup>. First, they do not entail the loss of direct competition between the merging firms in the same relevant market<sup>391</sup>. Secondly, they provide substantial scope for efficiencies, for example by integrating complementary activities which may lead to lower prices and higher output<sup>392</sup> or by enabling a broader portfolio of products to be offered to customers, thereby giving them the benefit of ‘one-stop-shopping’<sup>393</sup>. However the *Guidelines* point out that non-horizontal mergers may harm competition where they would alter the ability and incentive of the merged entity and its competitors in a way that could be harmful to consumers<sup>394</sup>. The Commission considers that (as in the case of horizontal mergers) non-horizontal mergers should be scrutinised for possible non-coordinated and possible coordinated effects<sup>395</sup>. Non-coordinated effects could accrue where a merger could lead to foreclosure of competitors<sup>396</sup>; coordinated effects if the merger would make it possible, or make it easier, for firms to act in a coordinated manner<sup>397</sup>. The Commission takes into account possible efficiencies that would arise from a merger as part of its assessment<sup>398</sup>.

### (ii) Market shares and concentration levels

The *Guidelines* state that the Commission is unlikely to have competition concerns where the market share of the new entity after the merger would be below 30 per cent and where the post-merger HHI would be below 2,000<sup>399</sup>. However it does say that there may be some cases where ‘special circumstances’ might lead it to investigate a merger below these thresholds, for example where a merger involves a company that is likely to expand significantly in the near future, for example because of a recent innovation: in this case its market share would not reflect its likely competitive impact on the market in the future; or where there are factors at play that suggest that the merger could facilitate coordination, for example the removal of a firm ‘with a high likelihood of disrupting coordinated conduct’ (often referred to as a ‘maverick’)<sup>400</sup>. There is no presumption *against* a merger above the 30 per cent and 2,000 thresholds<sup>401</sup>.

<sup>401</sup> *Ibid*, para 27.

### (iii) Vertical mergers

#### (A) *Non-coordinated effects: foreclosure*

The *Guidelines* distinguish two types of foreclosure: **input foreclosure** and **customer foreclosure**.

**Input foreclosure** occurs where the merged entity would be likely to restrict access to products or services by competitors in a downstream market, thereby raising their costs and making it harder for them to compete in that market. The *Guidelines* say that it is not necessary to show that any competitor would be forced to leave the market, only that the higher input cost would lead to higher prices for consumers<sup>402</sup>. The assessment requires an analysis of whether the merged entity would have:

- the **ability to foreclose** access to inputs, which requires a ‘significant degree of market power’<sup>403</sup>
- an **incentive to foreclose**, which requires an analysis of whether the foreclosure would be profitable<sup>404</sup>
- an **overall likely impact on effective competition**, because it would lead to increased prices in the downstream market, for example by raising rivals’ costs or raising barriers to entry<sup>405</sup>.

Likely efficiencies will be taken into account as part of the assessment<sup>406</sup>.

**Customer foreclosure** occurs where a supplier integrates with an important customer in a downstream market: this may mean that potential rivals in the upstream market no longer have access to a sufficient customer base downstream<sup>407</sup>. As in the case of input foreclosure, the *Guidelines* require an analysis of:

- the **ability to foreclose** access to downstream markets<sup>408</sup>
- whether there is an **incentive to foreclose** access to downstream markets<sup>409</sup>
- whether there is an **overall likely impact on competition**<sup>410</sup>.

#### (B) *Other non-coordinated effects*

The *Guidelines* briefly suggest other possible non-coordinated effects that might be problematic, for example obtaining access to commercially sensitive information about the activities of rivals in upstream or downstream markets leading to less aggressive pricing in the downstream market<sup>411</sup>.

#### (C) *Coordinated effects*

The *Guidelines* discuss the possibility that a non-horizontal merger might lead to a situation in which coordination becomes possible, or more possible, than it previously was: as in the case of horizontal mergers, discussed above, the *Guidelines* explain that it is necessary to consider four issues:

- **reaching terms of coordination**
- **monitoring deviations**
- **deterrent mechanisms**
- **reactions of outsiders**<sup>412</sup>.

<sup>402</sup> Ibid, para 31.

<sup>405</sup> Ibid, paras 47–51.

<sup>408</sup> Ibid, paras 60–67.

<sup>411</sup> Ibid, para 78.

<sup>403</sup> Ibid, paras 33–39.

<sup>406</sup> Ibid, paras 52–57.

<sup>409</sup> Ibid, paras 68–71.

<sup>412</sup> Ibid, paras 79–90.

<sup>404</sup> Ibid, paras 40–46.

<sup>407</sup> Ibid, para 58.

<sup>410</sup> Ibid, paras 72–77.

**(iv) Conglomerate mergers**<sup>413</sup>

The *Non-horizontal guidelines* also discuss the possibility that a conglomerate merger could cause competitive harm, although they note that usually there will be no problem<sup>414</sup>; as in the case of vertical mergers they consider first non-coordinated effects and then coordinated effects.

**(A) Non-coordinated effects**

The *Guidelines* explain that the primary concern is that a conglomerate merger could lead to a foreclosure effect, for example by enabling the merged entity to indulge in tying, bundling or other exclusionary practices<sup>415</sup>. As in the case of vertical mergers, the *Guidelines* explain that it is necessary to consider:

- the ability to foreclose<sup>416</sup>
- the incentive to foreclose<sup>417</sup>
- the overall likely impact on prices and choice<sup>418</sup>.

**(B) Coordinated effects**

The *Guidelines* also explain that the possibility exists of coordinated effects arising from conglomerate mergers, for example by reducing the number of effective competitors<sup>419</sup>.

**(v) Recent cases on non-horizontal mergers**<sup>420</sup>

In *Thales/Finmeccanica/AAS/Telespazio*<sup>421</sup> the Commission went into a Phase II investigation because of vertical concerns, but concluded that the merged entity would not have the ability or incentive to restrict access to a critical component for the production of telecommunications satellites. In *SFR/Télé 2*<sup>422</sup> the Commission had vertical concerns about a merger that would bring together SFR, part of the Vivendi group that has a strong position in attractive television content, and Télé 2 with a presence in the downstream pay-TV distribution market. A number of commitments were given, including the provision of access to other pay-TV operators to the Vivendi group's content on non-discriminatory terms. In *Google/DoubleClick*<sup>423</sup> the Commission considered that the existence of strong competitors, such as Microsoft, meant that the merged firm would have neither the ability nor incentive to foreclose them and therefore concluded that the transaction did not give

<sup>418</sup> *Ibid*, paras 111–118. <sup>419</sup> *Ibid*, paras 119–121.

<sup>420</sup> See also Lahbabi and Moonen 'A closer look at vertical mergers' (2007) 2 Competition Policy Newsletter 11.

<sup>421</sup> Case M 4403, decision of 4 April 2007.

<sup>422</sup> Case M 4504, decision of 18 July 2007.

<sup>423</sup> Case M 4731, decision of 11 March 2008; see Brockhoff, Jehano, Pozzato, Buhr, Eberl and Papandropoulos 'Google/DoubleClick: The first test for the Commission's non-horizontal merger guidelines' (2008) 2 Competition Policy Newsletter 53.

rise to vertical concerns. In *Tom-Tom/Tele-Atlas*<sup>424</sup> and *Navteq/Nokia*<sup>425</sup> the Commission concluded that foreclosure of the input market for navigable digital maps would not be profitable to the merged firms; both mergers were cleared without conditions. Remedies were required to address vertical concerns in *Thomson/Reuters*<sup>426</sup>.

In *Pepsico/The Pepsico Bottling Group*<sup>427</sup> the Commission rejected concerns about conglomeracy, concluding that the merged entity would not have the ability to foreclose competitors by bundling its soft drinks with its savoury snacks<sup>428</sup>. Conglomerate concerns were also rejected in *Proctor & Gamble*<sup>429</sup>, *Pernod Ricard/Allied Domecq*<sup>430</sup> and *News Corp/BSkyB*<sup>431</sup>. However the Commission did have concerns about conglomerate effects in *Intel/McAfee* which led to Phase I commitments<sup>432</sup>.

### (E) Articles 2(4) and 2(5) of the EUMR: full-function joint ventures and ‘spillover effects’

Where a full-function joint venture has a Community dimension it falls to be analysed within the procedural framework of the EUMR. In so far as it would bring about a change in the structure of the market it will be investigated in accordance with the provisions of Article 2(1) to (3) that have just been discussed. However there is a further possibility that needs to be considered in relation to full-function joint ventures, which is whether the creation of the joint venture could lead to a coordination of the behaviour of undertakings that remain independent of one another: this is sometimes referred to as a ‘spillover effect’. This is tested according to the provisions of Articles 2(4) and 2(5) of the EUMR which are based upon Article 101 TFEU and the decisional practice of the Commission.

Article 2(4) provides that:

To the extent that the creation of a joint venture constituting a concentration pursuant to Article 3 has as its object or effect the coordination of the competitive behaviour of undertakings that remain independent, such coordination shall be appraised in accordance with the criteria of [Article 101(1) and (3)] of the Treaty, with a view to establishing whether or not the operation is compatible with the common market.

Article 2(5) provides that:

In making this appraisal, the Commission shall take into account in particular:

- whether two or more parent companies retain, to a significant extent, activities in the same market as the joint venture or in a market which is downstream or upstream from that of the joint venture or in a neighbouring market closely related to this market,
- whether the coordination which is the direct consequence of the creation of the joint venture affords the undertakings concerned the possibility of eliminating competition in respect of a substantial part of the products or services in question.

<sup>424</sup> Case M 4854, decision of 14 May 2008.

<sup>425</sup> Case M 4942, decision of 2 July 2008; on the *TomTom* and *Navteq* decisions see Esteva Mosso, Mottl, De Coninck and Dupont ‘Digital maps go vertical: TomTom/Tele Atlas and Nokia/NAVTEQ’ (2008) 3 *Competition Policy Newsletter* 70; De Coninck ‘Economic analysis in vertical mergers’ (2008) 3 *Competition Policy Newsletter* 48.

<sup>426</sup> Case M 4726, decision of 19 February 2008.

<sup>427</sup> Case M 5633, decision of 26 October 2009.

<sup>428</sup> *Ibid.*, paras 29–40.

<sup>429</sup> Case M 3732, decision of 15 July 2005.

<sup>430</sup> Case M 3779, decision of 24 June 2005.

<sup>431</sup> Case M 5932, decision of 21 December 2010.

<sup>432</sup> Case M 5984, decision of 26 January 2011.

**(i) A practical example**

The operation of these provisions is best understood with the benefit of an example.

**Example of a full-function joint venture**

Suppose that two producers of widgets, A and B, decide to merge their widget production into a joint venture, 'Newco'. Suppose further that both A and B will continue to produce widget dioxide, a raw material essential for the production of widgets, and that they will supply this raw material to Newco. In this case A and B will retain a presence in the 'upstream' market for widget dioxide<sup>433</sup>.

The merger of the two widget businesses will be tested according to the criteria in Article 2(1) to (3) of the EUMR and the *Horizontal merger guidelines*:

- what will Newco's market share and market power be?
- will there be countervailing buyer power?
- would the merger lead to merger-specific efficiency gains?

However the additional question that has to be asked of this joint venture is whether the participation of A and B in the affairs of Newco will lead to them acting in a coordinated manner in the upstream market, for example because they will get to know about one another's pricing policy or capacity-expansion plans in relation to widget dioxide. This is the question that will be appraised in accordance with the criteria of Articles 2(4) and 2(5) of the EUMR.

**(ii) Articles 2(4) and 2(5) in practice**

In practice Articles 2(4) and 2(5) have not given rise to many difficult cases. The first Phase II investigation where possible spillover effects were considered was in the case of a joint venture between the telecommunications operators BT and AT&T<sup>434</sup>. The Commission identified certain 'candidate markets' in which coordination was a possibility and then considered, first, whether that coordination would happen as a result of the joint venture and, secondly, whether any restriction of competition would be appreciable. The joint venture was approved subject to commitments to eliminate the risk of parental coordination, including a divestiture of ACC, a wholly-owned subsidiary of AT&T<sup>435</sup>. In another

<sup>433</sup> It is equally possible that the spillover effects might occur in a downstream or a horizontally neighbouring market.

<sup>434</sup> Case JV 15 *BT/AT&T*, decision of 30 March 1999; a Phase II investigation into spillover effects was ended when the concentration in Case JV 27 *Microsoft/Liberty Media/Telewest* was abandoned; the first decision in a Phase I case was Case JV 1 *Schibsted Multimedia AS/Telenor AS/Telia AB*, decision of 27 May 1996 [1999] 4 CMLR 216; commitments have been accepted in some Phase I cases, eg Case M 1327 *NC/Canal+/CDPQ/Bank America*, decision of 3 December 1998; Case JV 37 *BSkyB/KirchPay TV*, decision of 21 March 2000.

<sup>435</sup> See the Commission's XXIXth *Report on Competition Policy* (1999), para 185.

Phase II investigation, *Areva/Urenco/ETC JV*<sup>436</sup>, the Commission was concerned that a joint venture would lead to coordination between Areva and Urenco as a result of the increased scope for the exchange of information through the joint venture in relation to uranium enrichment. Commitments were given to reinforce firewalls between the parties and the joint venture and between the parties themselves<sup>437</sup>. The Commission investigated possible spillover effects in *Sony/BMG* but decided that they were not a concern<sup>438</sup>.

## (F) Contractual restrictions directly related and necessary to a merger: ‘ancillary restraints’

### (i) Introduction

Recital 21 and Articles 6(1)(b), 8(1) and 8(2) of the EUMR recognise that certain contractual restrictions may be directly related to and necessary for the successful implementation of a merger; a decision that clears a merger is deemed also to clear such restrictions. An obvious example would be where two undertakings merge their widget businesses into a joint venture ‘Newco’ and agree not to compete with the widget business of Newco since to do so would undermine the very purpose of the transaction. The question is whether clauses of this kind, often referred to for the sake of simplicity as ‘ancillary restraints’, are cleared at the same time as the merger. The Commission has published a series of notices on this subject, the most recent of which is the 2005 *Notice on restrictions directly related and necessary to concentrations* (the ‘*Notice on ancillary restraints*’)<sup>439</sup>. Although the EUMR provides that a clearance decision will clear any ancillary restraints, it is for the undertakings concerned to conduct a self-assessment of which restrictions are ancillary (as in the case of Article 101 TFEU generally since the adoption of Regulation 1/2003). The Commission will not state in a clearance decision which restraints are ancillary: it will provide guidance only in the case of specific novel or unresolved issues giving rise to genuine uncertainty, other disputes having to be resolved before national courts<sup>440</sup>. Where a restriction is not ancillary this is not in itself prejudicial to it: rather it is then subject to independent examination under Articles 101 and 102 TFEU and national competition law<sup>441</sup>.

### (ii) General principles

Paragraph 11 of the *Notice* explains that the criteria of direct relation and necessity are objective in nature: it is not sufficient simply that the parties regard them as such. A restriction will be ‘necessary’ only where, without it, the merger could not be implemented or could be implemented only under considerably more uncertain conditions, at substantially higher cost, over an appreciably longer period or with considerably greater difficulty<sup>442</sup>. Examples given are restrictions necessary to protect the value of the business transferred, to maintain the continuity of supply after the break-up of a former economic entity or enabling the start-up of a new entity, regard being had to the duration, subject-matter and geographical field of application of the restriction in question<sup>443</sup>.

<sup>436</sup> Case M 3099, decision of 6 October 2004.

<sup>437</sup> *Ibid.*, paras 222–225 and 231–232.

<sup>438</sup> Case M 3333, decision of 19 July 2004, OJ [2005] L 62/30, paras 176–182.

<sup>439</sup> OJ [2005] C 56/24, replacing the previous *Notice*, OJ [2001] C 188/5.

<sup>440</sup> *Notice on ancillary restraints*, paras 2–6; in practice disputes as to whether a restriction is ancillary are quite often dealt with in arbitration proceedings: on the arbitration of competition law see ch 8, ‘Arbitration’, pp 325–326.

<sup>441</sup> *Notice on ancillary restraints*, para 7.

<sup>442</sup> *Ibid.*, para 13.

<sup>443</sup> *Ibid.*

### (iii) Principles applicable in cases of the acquisition of an undertaking

Paragraph 17 of the *Notice on ancillary restraints* explains that, as a general proposition, it is the acquirer that may need protection, for example to ensure that it acquires the full value of the business it has paid for; greater scepticism is shown to restrictions providing protection to the vendor. The *Notice* examines three types of restriction, non-compete clauses, licence agreements and purchase and supply obligations:

- **non-compete clauses:** these may be necessary to guarantee the transfer to the acquirer of the full value of the assets transferred including both the physical assets and the intangible ones such as goodwill and know-how<sup>444</sup>. Their duration, geographical field of application and subject-matter and personal scope must be limited to what is needed to implement the concentration<sup>445</sup>. As a general proposition a period of up to three years is justifiable where goodwill and know-how are transferred, and two years where only goodwill is included<sup>446</sup>. The geographical scope of the clause should be limited to the area in which the vendor has offered the relevant products or services prior to the transfer<sup>447</sup>, and the clause should similarly be limited to the products or services forming the economic activity of the undertaking transferred<sup>448</sup>. Non-solicitation and confidentiality clauses have a comparable effect and are therefore evaluated in the same way<sup>449</sup>.
- **licence agreements:** it may be that the vendor retains intellectual property rights in order to exploit them for activities other than those transferred to the acquirer, but licenses them to the acquirer for its purposes. Such licences – for example of patents or know-how – can be ancillary, but territorial limitations on the buyer as to the place of manufacture will not be; nor will restrictions protecting the licensor rather than the licensee<sup>450</sup>.
- **purchase and supply agreements:** these may be needed in order to avoid the disruption of traditional lines of purchase and supply within the business transferred, in favour of both the acquirer and the purchaser, for up to five years; however exclusivity provisions and similar clauses would not be regarded as ancillary<sup>451</sup>.

### (iv) Principles applicable in cases of full-function joint ventures

Paragraphs 36 to 44 examine the same types of restriction in the case of full-function joint ventures:

- **non-compete obligations:** in the case of joint ventures an obligation not to compete with the joint venture is necessary to ensure good faith during negotiations, to fully utilize the joint venture's assets and to enable the joint venture to assimilate the know-how and goodwill transferred to it; obligations of this kind can be regarded as ancillary for the entire lifetime of the joint venture, not just for the period of two or three years envisaged in the case of the acquisition of a business from another

<sup>444</sup> Ibid, para 18.

<sup>445</sup> Ibid, para 19.

<sup>446</sup> Ibid, para 20; longer periods may exceptionally be permitted: see fn 21 of the *Notice*.

<sup>447</sup> Ibid, para 22.

<sup>448</sup> Ibid, para 23.

<sup>449</sup> Ibid, para 26.

<sup>450</sup> Ibid, paras 27–31; note however that licences that go beyond ancillarity in the terms of the *Notice* may be block exempted under Regulation 772/2004 on technology transfer agreements: see ch 19, 'Technology Transfer Agreements: Regulation 772/2004', pp 781–791.

<sup>451</sup> *Notice on ancillary restraints*, paras 32–35; note however that vertical agreements that go beyond ancillarity in terms of the *Notice* might be block exempted under Regulation 330/2010 on vertical agreements: see ch 16, 'Vertical Agreements: Regulation 330/2010', pp 649–672.

undertaking<sup>452</sup>. Non-solicitation and confidentiality clauses are evaluated in the same way<sup>453</sup>

- **licence agreements:** the principles are the same as for the acquisition of an undertaking<sup>454</sup>
- **purchase and supply obligations:** again the same principles apply as in the case of the acquisition of an undertaking<sup>455</sup>.

## 6. Remedies

It is rare for the Commission to prohibit a merger in its entirety: by 20 June 2011 this had happened in only 21 cases, and four of those prohibitions were annulled on appeal. However there have been many cases in which the Commission permitted mergers to go ahead only after the parties had offered commitments to modify notified transactions that addressed competition concerns that it had identified: the Commission refers to such modifications as ‘remedies’<sup>456</sup>. By 31 May 2011 the Commission had accepted commitments in 207 Phase I cases and 93 Phase II cases. This means that something in the region of 5 per cent of notifications of mergers having a Community dimension required modification before approval was forthcoming from the Commission<sup>457</sup>. The Commission calculated that in 2008 savings to customers as a result of merger remedies may have amounted to €3,100 million<sup>458</sup>.

The Commission published a revised *Notice on remedies* in October 2008<sup>459</sup>, replacing an earlier one of 2001<sup>460</sup>. The Commission has also published *Best Practice Guidelines: the Commission’s model texts for divestiture commitments and the trustee mandate*<sup>461</sup> setting out model texts for divestiture commitments and for the trustee mandate.

### (A) The legal basis for commitments

The legal basis for commitments as a way of settling merger cases is provided by Article 6(2) of the EUMR in the case of Phase I investigations and Article 8(2) for Phase II investigations. Each of Articles 6 and 8 provides that the Commission may attach conditions and obligations to a decision to clear a merger; such conditions and obligations are intended to ensure that the undertakings concerned comply with the commitments that they make to the Commission to modify their transaction. Recital 30 of the EUMR states that Phase I commitments are appropriate where the competition problem is easily identifiable and can easily be remedied: it adds that transparency and effective consultation of Member States and interested third parties should be ensured throughout the procedure<sup>462</sup>. Recital

<sup>459</sup> OJ [2008] C 267/1.

<sup>460</sup> OJ [2001] C 68/3.

<sup>461</sup> Available at [www.ec.europa.eu/competition/mergers/legislation/best\\_practice.html](http://www.ec.europa.eu/competition/mergers/legislation/best_practice.html).

<sup>462</sup> See also para 81 of the *Notice on remedies*.

31 explains the various consequences of failure to comply with conditions and obligations. These include:

- the possibility of the Commission ordering that a merger that has already been carried into effect, but in breach of a condition given in Phase I (Article 6(3)) or Phase II (Article 8(4)), should be dissolved
- the power to take interim measures to restore or maintain conditions of effective competition in the event of a breach of a Phase I or Phase II condition (Article 8(5))
- the power to revoke a decision where undertakings commit a breach of an obligation attached to a decision (Article 8(6)).

Article 14(2) of the EUMR provides for fines of up to 10 per cent of the aggregate turnover of the undertakings concerned to be imposed in the event of failure to comply with a condition or obligation attached to a decision; Article 15(1)(c) provides for periodic penalty payments to be imposed in the event of a failure to comply with an obligation.

## (B) The Commission's Notice on remedies

The Commission published its revised *Notice on remedies* in October of 2008. The Commission also adopted Regulation 1033/2008<sup>463</sup> which amended the Implementing Regulation in order to provide the format for a new form, Form RM, which undertakings must submit to the Commission when offering remedies; Regulation 1033/2008 also clarifies that an independent trustee or trustees may be appointed to assist the Commission in overseeing the parties' compliance with the commitments that they give. The revised *Notice* reflects the insights resulting from DG COMP's 2005 *Merger Remedies Study*<sup>464</sup> in which it looked at the design, implementation and effectiveness of 96 remedies that it had accepted in 40 cases under the EUMR from 1996 to 2000. The study concluded that care is needed to define the right scope of a divested business; to ensure its interim preservation until divestiture; to approve adequate purchasers; and to ensure effective monitoring of the implementation of the remedies.

### (i) General principles

Section II of the *Notice on remedies* discusses the general principles relevant to remedies. Most of the discussion is about the need for remedies to address the possibility that a merger might significantly impede effective competition in the sense of Article 2(3) of the EUMR, but paragraph 4 states that the *Notice* is also relevant to remedies required to address possible spillover effects under Article 2(4). Paragraph 6 of the *Notice* acknowledges that the Commission is not in a position to impose unilaterally conditions on the clearance of a merger: it can do so only pursuant to commitments offered by the parties<sup>465</sup>. Paragraph 7 explains the Commission's need to introduce Form RM. Only the parties to a transaction have the relevant information necessary to demonstrate that a remedy would address the Commission's competition concerns: they therefore must provide that information to the Commission so that it can conduct an assessment. However paragraph 8 of the *Notice* notes that the Commission retains the burden of proving that

<sup>463</sup> OJ [2008] L 279/3.

<sup>464</sup> Available at [www.ec.europa.eu/competition/mergers/studies\\_reports/studies\\_reports.html](http://www.ec.europa.eu/competition/mergers/studies_reports/studies_reports.html); see also Davies and Lyons *Mergers and Merger Remedies in the EU* (Edward Elgar, 2008).

<sup>465</sup> See Case T-210/01 *General Electric v Commission* [2005] ECR II-5575, [2006] 4 CMLR 686, para 52; Case T-87/05 *EDP v Commission* [2005] ECR II-3745, [2005] 5 CMLR 1436, para 105.

a merger, as modified by the commitments proposed, would nevertheless significantly impede effective competition<sup>466</sup>.

The amended Implementing Regulation established a new Annex, Annex IV, which sets out the information that must be contained in Form RM. It requires the notifying parties to submit detailed information concerning the commitments offered and, in particular, to provide specific information if the commitments offered consist of the divestiture of a business. The Commission may waive the provision of certain information if it considers that it is not necessary in a particular case. Form RM is divided into five sections dealing respectively with:

- a description of the commitment
- its suitability to remove competition concerns
- an explanation of any deviation from the Commission's Model Texts for divestiture commitments and the trustee mandate
- a summary of the commitments
- information on any business to be divested.

The last of these five sections requires a considerable amount of information about the nature of the business to be divested including:

- the assets (including IP rights and brands) to be transferred
- an organisational chart identifying the personnel currently working for the business concerned
- the customers of the business
- financial data including turnover for the last two years of the business involved and a prediction for the next two years
- an explanation of why the business will be acquired by a suitable purchaser within the time-frame proposed in the commitments offered.

The collection and presentation of this information will sometimes be a complex task and yet it will have to be supplied to the Commission within the tight timetables of the EUMR, whether the case is a Phase I or a Phase II one. The parties and their professional advisers will therefore need to begin the process of designing possible remedies and preparing a draft Form RM at quite an early stage of the investigation, very probably at a time when they are still arguing that the case is not one that gives rise to a significant impediment to effective competition or a spillover effect.

The *Notice* places considerable emphasis on the need for commitments to be effectively implemented and monitored. Paragraph 14 states that where the parties submit remedies that are extensive and complex it is unlikely that they will be acceptable, citing the cases of *ENI/EDP/GDP*<sup>467</sup> and *Volvo/Scania*<sup>468</sup> as examples. The Commission has a wide discretion as to the form that the commitments in question may take<sup>469</sup>. Paragraphs 15 to 17 make clear that there is a strong preference for structural remedies, such as divestitures and granting access to key infrastructure, over behavioural ones, although the use of the lat-

<sup>466</sup> See Case T-87/05 *EDP v Commission* [2005] ECR II-3745, [2005] 5 CMLR 1436, paras 62ff.

<sup>467</sup> Case M 3440, decision of 9 December 2004, OJ [2005] L 302/69, upheld on appeal Case T-87/05 *EDP v Commission* [2005] ECR II-3745, [2005] 5 CMLR 1436, para 102.

<sup>468</sup> Case M 1672, 15 March 2000, OJ [2001] L 143/74.

ter cannot automatically be ruled out<sup>470</sup>. There are various disadvantages to behavioural remedies: pre-merger competition is preferable to post-merger regulation; remedies may increase transparency in the market, making tacit coordination easier; and they require monitoring and enforcement. In the Commission's view a commitment as to future behaviour would be acceptable 'only exceptionally in very specific circumstances'.

## (ii) Different types of remedies

Section III of the *Notice* discusses different types of remedies. Paragraphs 22 to 57 deal with divestiture of a business to a suitable purchaser; paragraphs 58 to 60 discuss the removal of links with competitors; and paragraphs 61 to 69 consider 'other remedies'. The final part of Section III is concerned with review clauses.

### (A) *Divestiture of a business to a suitable purchaser*

Paragraph 23 of the *Notice* explains that divested activities must consist of a viable business that, if operated by a suitable purchaser, can compete effectively with the merged entity on a lasting basis; the business should be divested as a going concern. Paragraphs 25 to 31 discuss the importance of determining the correct scope of the business to be divested. Paragraph 30 states that the business to be divested must be viable as such, so that the resources of a possible purchaser will not be taken into account at the stage of assessing the remedy. An exception to this is discussed at paragraphs 56 and 57 of the *Notice*: where a specific purchaser is identified during the investigation itself and the parties enter into a legally-binding agreement to sell, the Commission will decide in its final decision whether the purchaser is suitable; if it is there will be no need for commitments. The Commission welcomes 'fix it first' remedies of this kind, in particular where the identity of the purchaser is crucial for the effectiveness of the proposed remedy.

Paragraphs 32 and 33 of the *Notice* say that the Commission has a clear preference for the divestiture of an existing business that can operate on a standalone basis, that is to say independently of inputs from or cooperation with the merged entity. Paragraphs 35 and 36 discuss the situation where it is necessary to 'carve-out' a business from the merged entity's other businesses, that is to say to put a set of assets together capable of being divested that did not previously exist as a separate entity<sup>471</sup>; the Commission is not in favour of carve-outs, although it recognises that it would be disproportionate to rule them out altogether. The Commission would be more sympathetic to the sale of a standalone business with a 'reverse carve-out' of any business to be retained by the merged entity. Paragraph 37 expresses scepticism about the divestiture of assets such as brands that have not been a uniform and viable business in the past. Paragraph 43 states that, when the parties commit to a divestiture, they would normally be expected to agree not to reacquire influence over the divested business for a period of ten years.

Paragraphs 47 to 57 contain a detailed discussion of the need to transfer the business to a suitable purchaser, that is to say a purchaser who is independent of the parties, who has the financial resources, expertise, incentive and ability to maintain and develop the divested business, and who will be in a position to acquire the business without regulatory problems. The *Notice* deals in turn with cases where the Commission requires the business to be divested within a fixed time-limit (paragraph 52), or requires the identification of an 'up-front' buyer before the transaction can be completed (paragraphs 53

<sup>470</sup> The possibility of behavioural remedies has been confirmed by the EU Courts in a number of judgments, eg Case C-12/03 P *Commission v Tetra Laval* [2005] ECR I-987, [2005] 4 CMLR 573, paras 85–89; for further discussion see Ezrachi 'Behavioural Remedies in EC Merger Control – Scope and Limitations' (2006) 29(3) *World Competition* 459.

<sup>471</sup> On carve-out remedies see DG COMP's 2005 *Merger Remedies Study*, pp 74–80.

to 55), or accepts a ‘fix-it-first’ solution (see above). Paragraphs 44 to 46 explain that in some cases it may be possible to offer alternative commitments consisting of a preferred option but also a second one in case the first is not achieved. Sometimes this is referred to as a ‘Crown Jewel’ commitment: examples can be found in *Nestlé/Ralston Purina*<sup>472</sup> and *Johnson & Johnson/Guidant*<sup>473</sup>.

#### **(B) Removal of links with competitors**

The removal of links with competitors – for example by divesting a minority shareholding in a joint venture or by terminating a distribution agreement – is discussed in paragraphs 58 to 60. Paragraph 59 explains that, in exceptional cases, it may be sufficient to agree to waive voting rights attached to shares rather than actually to sell them.

#### **(C) Other remedies**

Paragraphs 61 to 69 deal with other remedies, in particular commitments to grant access to key infrastructure, networks and key technology such as patents. Remedies of this kind have been accepted in many cases, which are helpfully cited in footnotes to the main text. Considerable emphasis is placed, in paragraph 66, on the need for there to be effective monitoring of remedies of this kind; this may include separation of accounting so that the cost of operating a key infrastructure can be ascertained and a fast-track dispute resolution mechanism to determine disputes about access. Paragraph 69 repeats the point made earlier that the Commission considers that behavioural remedies as to future behaviour will be acceptable only in exceptional circumstances. Paragraph 70 states that there may be cases in which a non-divestiture remedy is acceptable for a limited period of time.

#### **(D) Review clauses**

Commitments should normally contain a review clause that allows the Commission to grant an extension of time or to waive, modify or substitute the commitments. This issue is discussed in paragraphs 71 to 76.

#### **(iii) Procedural issues**

Section IV of the *Notice* is concerned with procedure, dealing in turn with Phase I and Phase II commitments. Article 19(1) of the Implementing Regulation requires that Phase I commitments be submitted within 20 working days of the date of receipt of the notification; Article 10(1), second sub-paragraph of the EUMR provides that the deadline for the Commission to make a Phase I decision is extended from 25 to 35 working days where commitments are offered. Paragraph 82 emphasises the need for Phase I commitments to be offered in a timely manner, given the tight timetables involved. Article 19(2) of the Implementing Regulation requires that Phase II commitments be submitted within 65 working days of the date on which the Commission decided to conduct a Phase II investigation; this deadline can be extended by a further 15 working days. Paragraphs 88 to 94 discuss timing issues, including the ‘exceptional circumstances’ in which it may be possible to offer commitments after the deadline has expired.

#### **(iv) Implementation of commitments**

Section V of the *Notice* discusses the implementation of commitments. It deals in turn with the divestiture process, the approval of purchasers, the obligations of the parties during the interim period, the role of the monitoring and divestiture trustees, and the

<sup>472</sup> Case M 2337, decision of 27 July 2001.

<sup>473</sup> Case M 3687, decision of 25 August 2005.

obligations of the parties following implementation of the divestiture. Paragraph 97 explains that the divestiture process can be divided into two periods. In the ‘first divestiture period’ the parties look for a suitable purchaser. If they are unsuccessful there follows the ‘trustee divestiture period’ when a divestiture trustee is appointed to divest the business. Paragraph 98 states that the Commission’s experience is that short divestiture periods contribute to the success of the divestiture, and that it would normally expect the first divestiture period to last around six months and the trustee divestiture period around three months. A further period of three months is foreseen for closing the transaction.

As paragraphs 101 to 106 explain, the Commission will require to be satisfied that the purchaser is a suitable one, and if it thinks that this is not the case it will adopt a decision to that effect: such a decision could be challenged before the General Court, for example by a potential purchaser rejected by the Commission<sup>474</sup>. In *Éditions Odile Jacob SAS v Commission*<sup>475</sup> a monitoring trustee had approved a prospective purchaser, Wendel Investissement, for various publishing assets owned by Editis: the sale was a condition of the clearance of the *Lagardère/Natexis/VUP* transaction<sup>476</sup>; a competing purchaser of the assets, Editions Odile, successfully challenged the approval of Wendel as the trustee, who sat on the Board of Directors of Editis, the vendor, was insufficiently independent<sup>477</sup>. It is not unknown for the sale to a purchaser itself to amount to a merger having a Community dimension, with the result that it has to be notified to the Commission under the EUMR<sup>478</sup>.

Paragraphs 107 to 116 discuss the obligations of the parties pending the divestiture of the business, dealing in turn with three points: safeguards for the interim preservation of the viability of the business; the necessary steps for a carve-out process if relevant; and the necessary steps to prepare the divestiture of the business. The parties will be required to hold the business separate from any retained business and a ‘hold separate manager’ will normally be required to be appointed.

Paragraphs 117 to 127 contain a helpful discussion of the respective roles of the monitoring and divestiture trustees. Five main tasks of the monitoring trustee are:

- to ensure that the business to be divested is not degraded during the interim period
- in carve-out cases to monitor the splitting of assets and the allocation of personnel between the divested and retained businesses
- to oversee the parties’ efforts to find a potential purchaser and to transfer the business
- to act as a contact point for any requests by third parties
- to report on these issues to the Commission in periodic compliance reports.

The divestiture trustee – described in paragraph 118 of the *Notice* as the ‘eyes and ears’ of the Commission – will be given an irrevocable and exclusive mandate to dispose of the business within a specific deadline to a suitable purchaser; a minimum price will not be specified. The monitoring and divestiture trustees may be, but do not have to be, the same person or institution. In the Commission’s experience auditing firms and other

<sup>474</sup> See the (unsuccessful) appeal by a potential purchaser in Case T-342/00 *Petrolescence v Commission* [2003] ECR II-1161, [2003] 5 CMLR 498; cf, under UK law, Case No 1081/4/1/07 *Co-operative Group Ltd v OFT* [2007] CAT 24, [2007] CompAR 899: see ch 22, ‘Undertakings in lieu of a reference’, pp 927–928.

<sup>475</sup> Case T-452/04 [2010] ECR II-000, on appeal Cases C-553/10 *Commission v Éditions Jacob* and C-554/10 *P Lagardère v Éditions Jacob*, not yet decided.

<sup>476</sup> Case M 2978, decision of 7 January 2004.

<sup>477</sup> Case T-452/04 [2010] ECR II-000.

<sup>478</sup> See para 104 of the *Notice* and the example given in fn 2 thereof.

consulting firms may be particularly well placed to act as a monitoring trustee; investment banks seem to be particularly suitable for the role of divestiture trustee.

Paragraph 128 states that the Commission will wish to be able to monitor compliance with commitments for a period of ten years after the adoption of its decision and will reserve the right to request information from the parties for that period.

### (C) Remedies in practice

Remedy-setting sometimes involves extensive cooperation with competition authorities in other jurisdictions such as the US<sup>479</sup>. In several cases third parties have appealed to the General Court in relation to cases in which (in their opinion) the Commission had been too generous to the parties to a merger in accepting commitments<sup>480</sup>. Some cases in which the Commission has accepted commitments in recent Phase II cases are discussed in the final section of this chapter<sup>481</sup>.

## 7. Powers of Investigation and Enforcement

The Commission is given wide powers of investigation and the ability to impose fines for transgression of the EUMR; these powers are broadly in alignment with the rules contained in Regulation 1/2003<sup>482</sup>, although there is no power to conduct a ‘dawn raid’ on the homes of natural persons under the EUMR. To enable the Commission to carry out its functions the EUMR gives it powers to request information (Article 11), to carry out on-the-spot investigations (Article 13)<sup>483</sup> and to impose fines and periodic penalties (Articles 14 and 15) for breach of the Regulation’s provisions. Article 11 requests for information are a standard feature of almost all investigations, and may be sent both to the notifying parties and to other undertakings – for example competitors, suppliers and customers – which might be able to supply DG COMP with relevant information. Fines for providing incorrect or misleading information or for breaking seals affixed to premises, books or records during an inspection can be up to one per cent of the aggregate group worldwide turnover of the undertakings concerned in the preceding financial year<sup>484</sup>. Fines for implementing a merger without notifying it and without the Commission’s authority pursuant to Article 7 of the EUMR, for implementing a merger in breach of an Article 8 decision or for failing to comply with a condition or obligation attached to a decision can be as much as ten per cent of the aggregate group worldwide turnover in the preceding financial year<sup>485</sup>. In determining the amount of a fine the Commission is required by Article 14(3) to bear in mind the nature and gravity of the infringement. Article 15 provides the Commission with the power to impose periodic penalty payments of up to five per cent of average daily turnover where firms continue, for example, to fail to supply correct information or to submit to an inspection. Clearly the possibility of a heavy fine, in association with the power under Article 8(4) to require the reversal of a concentration

<sup>479</sup> See ch 12, ‘The cooperation agreements in practice’, pp 511.

<sup>480</sup> See ‘Appeals against conditional clearances’, p 896 below.

<sup>481</sup> See ‘The EUMR in Practice’, pp 905–906 below.

<sup>482</sup> OJ [2003] L 1/1.

<sup>483</sup> See Case M 1157 *Skanska/Scancem*, decision of 19 December 1997, OJ [1999] L 183/1, [2000] 5 CMLR 686, para 11; see also the Commission’s MEMO/07/573 of 13 December 2007.

<sup>484</sup> EUMR, Article 14(1); under the original Merger Regulation the maximum fine for such infringements was much smaller, €50,000.

<sup>485</sup> EUMR, Article 14(2).

already effected, means that it is highly unwise to proceed without complying with the requirements of the EUMR. The EU Courts are given unlimited jurisdiction by Article 16 to review decisions imposing fines or periodic penalty payments.

The first fine (of €33,000), for failure to notify and for carrying out an operation without the prior approval of the Commission, was imposed in 1998 in *Samsung*<sup>486</sup>; in the US this phenomenon is often referred to as ‘gun-jumping’<sup>487</sup>. In *AP Møller*<sup>488</sup> a larger fine, of €219,000, was imposed for failure to notify and for putting into effect three concentrations which were discovered in the course of an investigation of a notified concentration. In setting the level of the fine the Commission noted that the failure to notify was not intentional but that there had been ‘qualified negligence’. *AP Møller* was a large European undertaking that could be expected to have a good knowledge of the EUMR, and the concentrations had been operated for a considerable time before they were brought to the Commission’s attention. A mitigating factor was that there had been no damage to the competitive process. A much larger fine of €20 million was imposed in the case of *Electrabel/Compagnie Nationale du Rhone*<sup>489</sup> in June of 2009: the Commission concluded that Electrabel had acquired *de facto* control of CNR several years earlier, in December 2003, without having received prior approval from the Commission.

Fines were also imposed for the provision of incorrect information in 1999 in the cases of *Sanofi/Synthélabo*, *KLM/Martinair* and *Deutsche Post*<sup>490</sup>. In the case of *Mitsubishi*<sup>491</sup> the Commission for the first time imposed a fine on a third party, rather than the parties to the notified concentration; Mitsubishi had failed to provide information in response to requests from the Commission under Article 11 of the EUMR. The fines imposed in this case totalled €950,000. In *BP/Erdölchemie* the Commission imposed a fine of €35,000 for the provision of misleading information in a Form CO<sup>492</sup>; and a fine of €90,000 in the case of *Tetra Laval/Sidel*<sup>493</sup> for supplying incorrect or misleading information about its technology in the Form CO and for providing incorrect information in reply to a request for information.

## 8. Judicial Review

Decisions of the Commission under the EUMR are subject to judicial review by the EU Courts on the grounds set out in Article 263 TFEU, that is to say lack of competence, infringement of an essential procedural requirement, infringement of the Treaty or of any rule of law or misuse of powers<sup>494</sup>. Fines and periodic penalty payments are also subject to review, by virtue of Article 261 TFEU and Article 16 of the EUMR. In the early days of EU merger control appeals were relatively few, although there were some

<sup>486</sup> Case M 920, decision of 18 February 1998, OJ [1999] L 225/12.

<sup>487</sup> On gun-jumping see Modrall and Ciullo ‘Gun-Jumping and EU Merger Control’ (2003) 24 ECLR 424; Alomar, Moonen, Navea and Redondo ‘Electrabel/CNR: the importance of the standstill obligation in merger proceedings’ (2009) 3 *Competition Policy Newsletter* 58.

<sup>488</sup> Case M 969, decision of 10 February 1999, OJ [1999] L 183/29.

<sup>489</sup> Case M 4994, decision of 10 June 2009; the decision is on appeal to the General Court, Case T-332/09 *Electrabel v Commission*, not yet decided.

<sup>490</sup> See the Commission’s XXIXth *Report on Competition Policy* (1999), Box 9, pp 73–74; the *Deutsche Post* decision will be found at OJ [2001] L 97/1.

<sup>491</sup> Case M 1634, decision of 14 July 2000, OJ [2001] L 4/31; see the Commission’s (2000) (October) *Competition Policy Newsletter* 62–63.

<sup>492</sup> Case M 2624, decision of 19 June 2002, OJ [2004] L 91/40.

<sup>493</sup> Case M 3255, decision of 7 July 2004.

<sup>494</sup> See generally ch 7, ‘Judicial Review’, pp 290–294.

landmark judgments, for example on the meaning of collective dominance<sup>495</sup>. However in the second half of the 1990s anxiety grew that the Commission, acting as prosecutor, judge and jury in merger cases (as in cases under Articles 101 and 102 TFEU) possessed too much power; or, to put the matter another way, that there was insufficient judicial control of the Commission by the EU Courts. It was during this period that prohibition decisions under the EUMR began to increase in number, culminating in a record number of five prohibitions in 2001<sup>496</sup>. As in response to this criticism there followed a dramatic series of annulments by the General Court of Commission prohibition decisions in June and October 2002: *Airtours v Commission*<sup>497</sup>, *Schneider Electric v Commission*<sup>498</sup> and *Tetra Laval v Commission*<sup>499</sup>. In these judgments the General Court, while acknowledging that the Commission enjoys a considerable margin of appreciation when dealing with complex economic matters, nevertheless demonstrated that it was prepared to look quite deeply into both the Commission's findings on primary facts and into the inferences drawn from them when determining whether its analysis was vitiated by manifest errors of assessment. While each of these three judgments necessarily turned on its own facts, collectively they sent a strong signal to the Commission that it needed to be more rigorous in its investigations, and they succeeded in assuaging some of the concerns about the excessive power of the Commission and weak supervision by the General Court.

A different complaint about judicial review has been that, even if the General Court is prepared to exercise effective judicial control over the Commission, the time taken to obtain a judgment from the General Court is so long that the process is essentially without purpose. This has been addressed, to some extent, by the introduction of the so-called 'expedited procedure', discussed below. More radical solutions, such as the introduction of a specialist competition court at a lower level than the General Court<sup>500</sup>, or even changing the role of the Commission to that of a prosecutor only, the actual decision to be taken by the General Court, seem, for the time being, to be in abeyance.

Appeals against decisions of the Commission have, in recent years, become more common, both on the part of the parties to the merger under scrutiny and on the part of third parties with objections to the way in which the Commission has handled a case. Advisers therefore need to explain to clients not only the time limits of Phase I and Phase II investigations under the EUMR, but also that a real possibility exists of protracted litigation in the EU Courts after the Commission has reached its final decision. The *Sony/Bertelsmann* case discussed below is particularly instructive in this respect<sup>501</sup>.

## (A) Acts

Only acts that produce binding legal effects may be appealed under Article 263 TFEU<sup>502</sup>. In the context of the EUMR the General Court has ruled that a decision under Article 6(1)

<sup>495</sup> See Cases C-68/94 etc *France v Commission* [1998] ECR I-1375, [1998] 4 CMLR 829, paras 169–178; Case T-102/96 *Gencor v Commission* [1999] ECR II-753, [1999] 4 CMLR 971, paras 148–158.

<sup>496</sup> See the statistical table of notifications at 'Table of EUMR statistics', p 899 below.

<sup>497</sup> Case T-342/99 *Airtours v Commission* [2002] ECR II-2585, [2002] 5 CMLR 317.

<sup>498</sup> Case T-310/01 *Schneider Electric v Commission* [2002] ECR II-4071, [2003] 4 CMLR 768.

<sup>499</sup> Case T-5/02 *Tetra Laval v Commission* [2002] ECR II-4381, [2002] 5 CMLR 1182, upheld on appeal Case C-12/03 P *Commission v Tetra Laval* [2005] ECR I-987, [2005] 4 CMLR 573; for comment on *Schneider* and *Tetra Laval* see Temple Lang 'Two Important Merger Regulation Judgments: The Implications of *Schneider-Legrand* and *Tetra Laval-Sidel*' (2003) 28 EL Rev 259.

<sup>500</sup> See ch 2, 'Court of Justice', pp 55–56.

<sup>501</sup> See 'The standard of review', p 894 below.

<sup>502</sup> See ch 7, 'Acts', pp 291–292.

(c) to take a case into a Phase II investigation is not an appealable act<sup>503</sup>; nor was a letter from the Commission expressing an opinion about the nature of commitments offered in an earlier case<sup>504</sup> and a decision not to take proceedings against Italy in relation to the *Abertis/Autostrade* case<sup>505</sup>.

## (B) Standing

Article 263 TFEU allows any natural or legal person to institute proceedings against a decision which is addressed to it or which is addressed to another person but which is of direct and individual concern to it.

### (i) The parties to the transaction

It is obvious that the parties to the transaction have standing, for example where a merger is prohibited: examples of successful appeals were given above; there have also been several unsuccessful appeals against prohibition decisions<sup>506</sup>. An interesting question is whether parties that offer commitments to the Commission as a condition of being allowed to proceed with a transaction can then appeal to the General Court that the Commission had no right to insist on remedies. On the one hand it can be argued that offering commitments is a voluntary act on the part of the parties, so that they ought not to be able to challenge the Commission<sup>507</sup>; on the other hand the parties can argue that they were effectively ‘forced’ into offering a commitment in order to save what they could from the transaction, not least because the time limits imposed by the EUMR were soon to be reached. The General Court rejected an appeal of this kind in *Cementbouw Handel Industrie BV v Commission*<sup>508</sup>.

### (ii) Third parties

Third parties also have the right to appeal against merger decisions of the Commission provided that they can demonstrate that the decision is of direct and individual concern to them. Article 18(4) of the EUMR provides that natural or legal persons showing a sufficient interest have a right to be heard during the Commission’s administrative procedure, and the General Court has held that such persons have standing to appeal<sup>509</sup>. In some cases third parties that were not involved in the administrative procedure have also been found to have standing to appeal<sup>510</sup>. However a third party that is in liquidation has been held not to have an interest in the final judgment of the court<sup>511</sup>. Many third

<sup>503</sup> Case T-48/03 *Schneider Electric v Commission*, order of 31 January 2006, appeal dismissed by order of the Court of Justice of 9 March 2007, Case C-188/06 P [2007] ECR I-35.

<sup>504</sup> Case T-57/07 *E.ON Ruhrgas International AG v Commission*, order of 2 September 2009.

<sup>505</sup> Case T-58/09 *Schemaventotto SpA v Commission*, order of 2 September 2010.

<sup>506</sup> See eg Case T-102/96 *Gencor Ltd v Commission* [1999] ECR II-753, [1999] 4 CMLR 971; Case T-87/05 *EDP v Commission* [2005] ECR II-3745, [2005] 5 CMLR 1436; Case T-210/01 *General Electric v Commission* [2005] ECR II-5575, [2006] 4 CMLR 686; Case T-342/07 *Ryanair Holdings plc v Commission* [2010] ECR II-000, [2011] 4 CMLR 245.

<sup>507</sup> See the Opinion of Advocate General Kokott in Case C-202/06 P *Cementbouw Handel Industrie BV v Commission*, [2007] ECR I-12129, [2008] 4 CMLR 1324, para 69.

<sup>508</sup> Case T-282/02 [2006] ECR II-319, [2006] 4 CMLR 1561, paras 293–321, upheld on appeal Case C-202/06 P [2007] ECR I-12129, [2008] 4 CMLR 1324.

<sup>509</sup> See Case T-2/93 *Air France v Commission* [1994] ECR II-323, paras 42–47; the General Court has held that the appellants lacked standing in Case T-350/03 *Wirtschaftskammer Kärnten v Commission*, order of 18 September 2006, [2006] ECR II-68 and in Case T-224/10 *Association belges des consommateurs test-achats ASBL v Commission* [2011] ECR II-000, paras 74–85.

<sup>510</sup> Case T-342/00 *Petrolescence SA v Commission* [2003] ECR II-1161, [2003] 5 CMLR 498, paras 36–42.

<sup>511</sup> Case T-269/03 *Socratec v Commission* [2009] ECR II-88; see similarly Case T-145/03 *Festival Crociere v Commission*, order of 31 March 2006.

party appeals have been unsuccessful, but this may be of little comfort to undertakings that have received a clearance from the Commission but then have to undergo a period of further uncertainty while the appeal process plays out. It is arguable that the rules on standing should be somewhat stricter in relation to third parties, at least where the appellant is a competitor of the merging parties whose objection to the transaction has nothing to do with consumer welfare considerations; objections from customers and consumers are likely to be much more meritorious<sup>512</sup>. Further discussion of third party appeals will be found below.

### (C) The standard of review<sup>513</sup>

It is well established that the Commission enjoys a margin of appreciation when assessing mergers and that the EU Courts should not substitute their own views for those of the Commission. The standard of review to be applied was succinctly stated by the General Court in *Sun Chemical Group BV and others v Commission*<sup>514</sup>:

[A]ccording to settled case law, review by the [EU] judicature of complex economic assessments made by the Commission in the exercise of the power of assessment conferred on it by the Merger Regulation is limited to ascertaining compliance with the rules governing procedure and the statement of reasons, the substantive accuracy of the facts and the absence of manifest errors of assessment or misuse of powers... In that respect, it should be borne in mind that not only must the [EU] judicature ascertain whether the evidence relied on is factually accurate, reliable and consistent but also whether that evidence contains all the information which must be taken into account in order to assess a complex situation and whether it is capable of substantiating the conclusions drawn from it.

In *Bertelsmann AG and Sony Corporation of America v Impala*<sup>515</sup> the Court of Justice ruled that the General Court had erred in law by expecting the Commission to apply ‘particularly demanding requirements’ to the notifying parties’ evidence and arguments in response to the statement of objections<sup>516</sup>.

### (D) The expedited procedure

The expedited procedure entered into force on 1 February 2001<sup>517</sup>. Under this procedure certain cases can be dealt with by the General Court more quickly than is usual; this is particularly important in the case of a decision prohibiting a merger, since a prolonged appeal may mean that market conditions change so substantially between the

<sup>512</sup> Third parties in the US have standing only where they can show that they would suffer direct antitrust injury: see *Cargill Inc v Monfort of Colorado Inc* 479 US 104 (1986); in a case on state aids the Court of Justice took a stricter view on the rights of third parties to appeal in *Case C-260/05 P Sniace SA v Commission* [2007] ECR I-10005, [2008] 1 CMLR 1035, paras 49–61.

<sup>513</sup> See Bailey ‘Standard of Proof in EC Merger Proceedings: a Common Law Perspective’ (2003) 40 CML Rev 845; Reeves and Dodoo ‘Standards of Proof and Standards of Judicial Review in EC Merger Law’ [2005] *Fordham Corporate Law Review* (ed Hawk), ch 6; Vesterdorf ‘Standard of Proof in Merger Cases: Reflections in the Light of Recent Case law in the Community Courts’ (2005) 1(1) *European Competition Journal* 3.

<sup>514</sup> *Case T-282/06* [2007] ECR II-2149, [2007] 5 CMLR 438, para 60.

<sup>515</sup> *Case C-413/06 P* [2008] ECR I-4951, [2008] 5 CMLR 1073.

<sup>516</sup> *Ibid*, paras 87–96.

<sup>517</sup> OJ [2000] L 322/4; on this procedure see Fountoukakos ‘Judicial Review and Merger Control: The General Court’s Expedited Procedure’ (2002) (October) *Competition Policy Newsletter* 7; Chibnall ‘Expedited Treatment of Appeals against EC Competition Decision under the EC Merger Control Regulation’ (2002) 1 *Competition Law Journal* 327.

Commission's prohibition decision and the General Court's eventual judgment that, even after a successful appeal, it is no longer possible to proceed with the deal. The pleadings in a case under the expedited procedure are simplified and greater emphasis is placed on the oral hearing; this procedure is not suitable for a case involving a substantial number of points of appeal. Requests for an expedited procedure have sometimes been refused<sup>518</sup>.

By 20 June 2011 the General Court had given judgments in ten merger cases in which the expedited procedure had been used<sup>519</sup>.

The shortest period between the lodging of an appeal and the judgment in an expedited procedure case was seven months in the case of *EDP v Commission*<sup>520</sup> and the longest was 21 months in the case of *Impala v Commission*<sup>521</sup>. Judgments in cases under the expedited procedure are likely to be shorter than in a 'normal' appeal<sup>522</sup>. In the *Impala* case the General Court was critical of the fact that Impala, having asked for the expedited procedure to be used, was itself responsible for slowing the progress of the case; as a result, although Impala was successful in persuading the General Court to annul the Commission's decision clearing the merger, it was awarded only three-quarters of its costs against the Commission<sup>523</sup>.

## (E) Examples of third party appeals

### (i) Appeals against the Commission's refusal to take jurisdiction

In *Schlüsselverlag JS Moser GmbH v Commission*<sup>524</sup> a merger was cleared by the relevant competition authority in Austria. Schlüsselverlag complained to the Commission that the merger in question had a Community dimension, and that therefore the Commission should have investigated it, not the domestic authority in Austria. The Court of Justice rejected the Commission's argument that it was not obliged to define its position when asked to do so by the appellant: the Court of Justice considered that it was vital, given that the Commission has sole jurisdiction in relation to concentrations having a Community dimension, that it should be required to take a decision if asked to do so<sup>525</sup>. However the appeal was rejected as the appellant had unduly delayed the making of its complaint to the Commission<sup>526</sup>. In *Endesa v Commission*<sup>527</sup> the General Court rejected Endesa's argument that a hostile bid for it by Gas Natural had a Community dimension and therefore fell within the jurisdiction of the Commission.

### (ii) Appeals against Article 9 references

In *Cableuropa SA v Commission*<sup>528</sup> the General Court held that a third party that objected to the Commission's decision to refer a merger to the Spanish competition authorities

<sup>518</sup> An example is Case T-145/06 *Omya AG v Commission* [2009] ECR II-145, [2009] 4 CMLR 826, para 12.

<sup>519</sup> A Table of Expedited Procedure cases will be found at the website that accompanies this book: see [www.oxfordtextbooks.co.uk/orc/whishandbailey7e](http://www.oxfordtextbooks.co.uk/orc/whishandbailey7e).

<sup>520</sup> Case T-87/05 [2005] II-3745, [2005] 5 CMLR 1436.

<sup>521</sup> Case T-464/04 [2006] ECR II-2289, [2006] 5 CMLR 1049.

<sup>522</sup> Case T-87/05 *EDP v Commission* [2005] ECR II-3745, [2005] 5 CMLR 1436, para 39.

<sup>523</sup> *Ibid*, paras 544–554.

<sup>524</sup> Case C-170/02 P [2003] ECR I-9889, [2004] 4 CMLR 1522.

<sup>525</sup> *Ibid*, paras 25–30.

<sup>526</sup> *Ibid*, paras 31–40.

<sup>527</sup> Case T-417/05 [2006] ECR II-2533, [2008] 4 CMLR 1472

<sup>528</sup> Cases T-346/02 and T-347/02 [2003] ECR II-4251, [2004] 5 CMLR 1216; see similarly Case T-119/02 *Royal Philips Electronics v Commission* [2003] ECR II-1433, [2003] 5 CMLR 53, paras 254–300.

under Article 9 of the EUMR had the standing to challenge that decision<sup>529</sup>, but upheld the Commission's decision on the merits.

### (iii) Appeals against unconditional clearances

There have been several unsuccessful appeals by third parties against unconditional clearance decisions of the Commission<sup>530</sup>. However in one particularly striking case, *Impala v Commission*<sup>531</sup>, a third party successfully persuaded the General Court that the Commission had wrongly cleared a merger with the result that the clearance decision in *Sony/Bertelsmann* was annulled<sup>532</sup>. This meant that the Commission had to re-investigate the case, leading to a second clearance decision in September 2007, more than three years after the original decision<sup>533</sup>.

### (iv) Appeals against conditional clearances

There have been several appeals by third parties against conditional clearance decisions, usually unsuccessful<sup>534</sup>. A successful case was *BaByliss v Commission*<sup>535</sup> where the Commission required commitments in relation to certain national markets, for example Germany and Austria, but not in relation to others, for example Spain and Italy, in order to clear a merger<sup>536</sup>. BaByliss appealed to the General Court claiming among other things that the Commission should not have authorised the concentration without commitments in relation to markets with serious competition problems. The General Court accepted the argument and annulled the Commission's decision in so far as it concerned the markets in the countries not covered by the commitments<sup>537</sup>. This led to a second decision again clearing the merger subject to conditions<sup>538</sup>.

A different point arose in *Petrolessence SA v Commission*<sup>539</sup> where the Commission required certain assets to be divested as a condition of approving a merger<sup>540</sup>. A potential purchaser of the assets was rejected by the Commission on the basis that it would not be an effective competitor and was therefore an unsuitable purchaser. The General Court held that Petrolessence had standing to appeal<sup>541</sup>, but it was unsuccessful on the merits<sup>542</sup>.

<sup>529</sup> *Ibid*, paras 47–82.

<sup>530</sup> See eg Case T-2/93 *Air France v Commission* [1994] ECR II-323; Case T-290/94 *Kaysberg v Commission* [1997] ECR II-2137, [1998] 4 CMLR 336; Case T-282/06 *Sun Chemical Group BV and others v Commission* [2007] ECR II-2149, [2007] 5 CMLR 438; Case T-151/05 *Nederlandse Vakbond Varkenshouders and others v Commission* [2009] ECR II-1219, [2009] 5 CMLR 1613.

<sup>531</sup> Case T-464/04 [2006] ECR II-2289, [2006] 5 CMLR 1049.

<sup>542</sup> *Ibid*, paras 100–123; see similarly in the UK Case No 1081/4/1/07 *Co-operative Group Ltd v OFT* [2007] CAT 24, [2011] CompAR 899, discussed in ch 22, 'Undertakings in lieu of a reference', pp 927–928.

**(v) Appeals seeking access to information**

In various cases applicants have successfully appealed to the General Court seeking access to information in the Commission's possession<sup>543</sup>.

**(F) Damages claims against the Commission<sup>544</sup>**

Two (unsuccessful) applications for damages have been made to the General Court for harm suffered as a result of a prohibition decision of the Commission which had been annulled on appeal. In *Commission v Schneider Electric SA*<sup>545</sup> the Commission's prohibition of the *Schneider/Legrand* merger had been annulled on appeal to the General Court<sup>546</sup>. Schneider sued the Commission for damages, and was successful before the General Court<sup>547</sup>; however the Court of Justice reversed the General Court's judgment since it considered that Schneider's financial loss was not actually caused by the Commission's prohibition decision<sup>548</sup>.

In *MyTravel Group plc v Commission*<sup>549</sup> MyTravel, formerly Airtours, sued the Commission for damages arising from its decision in *Airtours/First Choice*<sup>550</sup> which was annulled on appeal by the General Court<sup>551</sup>. The Court held that it cannot be ruled out in principle that manifest and grave defects underlying the Commission's substantive analysis could constitute breaches that are sufficiently serious to give rise to a claim for damages. However, taking into account the complexity of merger control and the Commission's margin of appreciation, the Court concluded that the Commission had not committed a sufficiently serious error in either its assessment of collective dominance or of the remedies offered by MyTravel to justify the award of damages against it.

**9. International Cooperation****(A) Close and constant liaison with Member States**

Article 4(3) TEU establishes the principle of cooperation between Member States and the institutions of the EU. In the context of the EUMR Article 19 sets out detailed provisions to establish liaison between the Commission and the Member States. Notifications under the EUMR must be transmitted to the competent authorities of Member States, which must be able to express their views on the Commission's treatment of cases; and the Advisory Committee on Concentrations must be consulted before important

<sup>543</sup> See Case T-111/07 *Agrofert Holding v Commission* [2010] ECR II-000, on appeal to the Court of Justice Case C-477/10 P *Commission v Agrofert Holdings*, not yet decided; Case T-237/05 *Éditions Jacob v Commission* [2010] ECR II-000, on appeal to the Court of Justice Case C-404/10 P *Commission v Editions Odile SAS*, not yet decided; Case T-403/05 *MyTravel v Commission* [2008] ECR II-2027, [2008] 3 CMLR 1517, annulled on appeal to the Court of Justice Case C-506/08 P *Sweden v Commission*, [2011] ECR I-000, [2011] 5 CMLR 575, paras 72–103 and 109–119.

<sup>544</sup> See generally Bailey 'Damages Actions under the EC Merger Regulation' (2007) 44 CML Rev 101.

<sup>545</sup> Case C-440/07 P *Commission v Schneider Electric SA* [2009] ECR I-6413, [2009] 5 CMLR 2051.

<sup>546</sup> Case T-310/01 *Schneider Electric SA v Commission* [2002] ECR II-4071, [2003] 4 CMLR 768.

<sup>547</sup> Case T-351/03 *Schneider Electric SA v Commission* [2007] ECR II-2237, [2008] 4 CMLR 1533.

<sup>548</sup> Case C-440/07 P *Commission v Schneider Electric SA* [2009] ECR I-6413, [2009] 5 CMLR 2051, paras 205 and 218–223; Schneider was awarded damages for the cost of having to undergo a second investigation of its transaction as a result of the annulment of the first Commission decision.

<sup>549</sup> Case T-212/03 [2008] ECR II-1967, [2008] 5 CMLR 1429.

<sup>550</sup> Case M 1524, decision of 22 September 1999, OJ [2000] L 93/1.

<sup>551</sup> Case T-342/99 *Airtours v Commission* [2002] ECR II-2585, [2002] 5 CMLR 317.

decisions – for example at the end of Phase II, or imposing fines – are taken. The Advisory Committee’s opinion is not binding on the Commission, but considerable importance is attached to it. The General Court in *Kayserberg SA v Commission*<sup>552</sup> rejected a claim by a third party objecting to the Commission’s clearance of the *Procter & Gamble/VP Schickedanz* transaction<sup>553</sup>; the third party was arguing that the Advisory Committee had not been properly consulted.

The Commission also cooperates with the EFTA Surveillance Authority pursuant to the provisions of the EEA Agreement<sup>554</sup>. This cooperation is provided for by Articles 57 and 58 of the EEA Agreement and Protocol 24.

## (B) Relations with non-EU countries

### (i) Reciprocity

Article 24 addresses the issue of reciprocity of treatment of mergers by non-EU countries. Some systems of law make it difficult, if not impossible, for foreign firms to take over local ones. Not surprisingly resentment is felt where, for example, a British firm is prevented from taking over a foreign one in circumstances in which, were the roles reversed, there would be no obstacle to the merger under UK law. Article 24(1) of the EUMR requires Member States to inform the Commission of any difficulties encountered by their undertakings in the case of concentrations in non-EU countries. Where it appears that a non-EU country is not affording reciprocal treatment to that granted by a Member State, the Commission may seek a mandate from the Council of Ministers to negotiate comparable treatment.

### (ii) The international dimension

It is possible that a transaction might fall within the merger control systems of the EU, the US, Canada and many other countries. The problems associated with the international dimension – the burden on companies of multiple filings, the need for cooperation between competition authorities and the desirability of an expeditious and harmonious outcome – are considerable. These have been discussed in chapter 12, including the territorial reach of the EUMR and cooperation agreements between the EU, the US, Canada, Japan and Korea<sup>555</sup>.

## 10. The EUMR in Practice

### (A) Statistics

From 21 September 1990, when the original EUMR entered into force, until 31 May 2011 the number of notifications received and decisions reached by the Commission were as follows:

<sup>552</sup> Case T-290/94 [1997] ECR II-2137, [1998] 4 CMLR 336, paras 57–58.

<sup>553</sup> Case M 430 OJ [1994] L 354/32.

<sup>554</sup> See ch 2, ‘European Economic Area’, pp 57–58.

<sup>555</sup> See ch 12, ‘EU Merger Regulation’, pp 499–500 and ‘The EU’s dedicated cooperation agreements on competition policy’, pp 509–511.

Case No COMP/M.5907 <i>Votorantim/Fischer/JV</i>	Yes		

## (C) Comment

### (i) Outright prohibitions

Outright prohibitions are rare: by 20 June 2011 there had been only 21 examples, of which four were annulled on appeal to the General Court<sup>557</sup>. Since 2001 there have been only three prohibitions<sup>558</sup>.

The first concentration to be blocked, in 1991, was *Aerospatiale-Alenia/de Havilland*<sup>559</sup>. Aerospatiale and Alenia intended to purchase the De Havilland division of Boeing. The Commissioner responsible for Industry disagreed violently over the decision with Sir Leon Brittan, the Competition Commissioner, in particular as industrial policy considerations were not taken on board. However the language of Article 2(3) of the EUMR does not provide for industrial policy to be taken into account, and the decision set an important precedent in demonstrating that the test of the compatibility of a concentration with the common market was its impact on competition<sup>560</sup>.

The second concentration to be blocked, in 1994, was *MSG Media Service*<sup>561</sup>. Three companies intended to establish a German pay-TV joint venture, MSG. In the Commission's view the joint venture would give MSG a lasting dominant position on the pay-TV market for administrative and technical services; it would give Bertelsmann and Kirch a dominant position on the German-speaking pay-TV market; and it would protect and strengthen the dominant position of Deutsche Telekom for cable infrastructure. It is of interest that this was the first of several concentrations in the media sector to be prohibited outright: the very rapid changes in technology in this sector, and the possibility that concentrations could have serious foreclosure effects on third parties, particularly through vertical integration, help to explain the Commission's cautious approach<sup>562</sup>.

Three of the outright prohibitions – *RTL/Veronica/Endemol*<sup>563</sup>, *Kesko/Tuko*<sup>564</sup> and *Blokker/Toys 'R' Us*<sup>565</sup> – were requests from Member States under Article 22 of the EUMR. That these requests led to prohibitions is perhaps not surprising: at the time the Member States making the requests (the Netherlands and Finland) had no domestic system of merger control and had obviously concluded that there was a very serious threat to competition, so that the cases were always likely, at the very least, to raise serious doubts.

<sup>557</sup> See 'Prohibition decisions annulled on appeal', p 904 below.

<sup>558</sup> Case M 3440, *ENI/EDP/GDP*, decision of 9 December 2004, OJ [2005] L 302/69, upheld on appeal Case T-87/05 *EDP v Commission* [2005] ECR II-3745, [2005] 5 CMLR 1436; Case M 4439 *Ryanair/Aer Lingus*, decision of 27 June 2007, upheld on appeal Case T-342/07 *Ryanair v Commission* [2010] ECR II-000, [2011] 4 CMLR 245; for comment on the latter case by DG COMP officials see Gadas, Koch, Parplies and Beuve-Méry 'Ryanair/Aer Lingus: Even "low-cost" monopolies can harm consumers' (2007) *Competition Policy Newsletter* 65; DeLa Mano, Pesaresi and Stehman 'Econometric and survey evidence in the competitive assessment of the Ryanair-Aer Lingus merger' (2007) *Competition Policy Newsletter* 73.

<sup>562</sup> See also Case M 490 *Nordic Satellite Distribution*, decision of 19 July 1995, OJ [1996] L 53/20; Case M 553 *RTL/Veronica/Endemol*, decision of 17 July 1996, OJ [1996] L 134/32 (this concentration was subsequently cleared in an amended form: OJ [1996] L 294/14); Case M 993 *Bertelsmann/Kirch/Premiere*, decision of 27 May 1998, OJ [1999] L 53/1; Case M 1027 *Deutsche Telekom/BetaResearch* OJ [1999] L 53/31.

<sup>563</sup> Case M 553 *RTL/Veronica/Endemol*, decision of 17 July 1996, OJ [1996] L 134/32, upheld on appeal Case T-221/95 *Endemol Entertainment Holding BV v Commission* [1999] ECR II-1299, [1999] 5 CMLR 611.

<sup>564</sup> Case M 784 *Kesko/Tuko*, decision of 20 November 1996, OJ [1997] L 174/47, upheld on appeal Case T-22/97 *Kesko v Commission* [1999] ECR II-3775, [2000] 4 CMLR 335.

<sup>565</sup> Case M 890 *Blokker/Toys 'R' Us*, decision of 26 June 1997, OJ [1998] L 316/1.

Of the other outright prohibitions *Gencor/Lonrho*<sup>566</sup> was an important case on the meaning of collective dominance or, to use more modern language, coordinated effects<sup>567</sup>. In *Saint-Gobain/Wacker-Chemie/NOM*<sup>568</sup> the Commission found that the merged entity would enjoy very high market shares in relation to silicon carbide, substantially higher than its competitors, that potential competition and countervailing power were weak and that the case could not be ‘saved’ by an efficiency or a failing firm defence. In *Volvo/Scania*<sup>569</sup> the Commission prohibited a merger that would lead to high market shares for buses and trucks in a series of national markets, Sweden, Finland, Denmark, Norway and Ireland: the delimitation of national markets, rather than a European-wide one, was a crucial feature of this case. In the countries where the Commission identified a problem the evidence showed that Volvo and Scania were each other’s closest competitors. The concentration in *SCA/Metsä Tissue*<sup>570</sup> was prohibited as it would have led to very high market shares in hygienic tissue products in Scandinavia and Finland. The Commission blocked the concentration in *CVC/Lenzing*<sup>571</sup> as a result of the high market shares that the merged entity would enjoy in the man-made fibre sector and because CVC already controlled Lenzing’s main rival.

The prohibition decision in *GE/Honeywell*<sup>572</sup> was particularly controversial. This was an agreed merger between two US undertakings which had been cleared by the US authorities. The Commission prohibited it, predominantly because of its vertical and conglomerate effects, on grounds that were anathema to the Department of Justice in the US. On appeal to the General Court the Commission’s reasoning on both vertical and conglomerate effects was severely criticised; nevertheless GE’s appeal was unsuccessful, because the General Court accepted that there were some horizontal effects that justified the prohibition of the merger<sup>573</sup>.

In *ENI/EDP/GDP*<sup>574</sup> the Commission prohibited a proposed acquisition by EDP, the incumbent electricity company in Portugal, of GDP, the incumbent gas company. The Commission was concerned both at the horizontal and vertical implications of the transaction, and resisted suggestions that a Portuguese ‘national champion’ should be created. An expedited appeal was made to the General Court which upheld the Commission’s decision<sup>575</sup>. The most recent prohibitions occurred in *Ryanair/Aer Lingus*<sup>576</sup>, where the Commission was particularly concerned that the merged airline would have accounted for around 80 per cent of intra-European air traffic from and to Dublin airport: an appeal by Ryanair to the General Court was unsuccessful<sup>577</sup>; and in *Olympic Airways/Aegean*

<sup>566</sup> Case M 619, decision of 24 April 1996, OJ [1997] L 11/30, upheld on appeal Case T-102/96 *Gencor v Commission* [1999] ECR II-753, [1999] 4 CMLR 971.

<sup>567</sup> See ‘Coordinated effects’, pp 871–873 above.

<sup>576</sup> Case M 4439, decision of 27 June 2007.

<sup>577</sup> Case T-342/07 *Ryanair v Commission* [2010] ECR II-000, [2011] 4 CMLR 245; Aer Lingus failed in a separate appeal against the Commission’s decision not to require Ryanair to divest itself of all its shares in Aer Lingus, Case T-411/07 *Aer Lingus Group v Commission* [2010] ECR II-000, [2011] 4 CMLR 358, see further ch 22, ‘Time limits and prior notice’, p 923 on this issue.

*Airlines*<sup>578</sup> where there would have been very high market shares (and in some cases a monopoly) on various air routes within Greece.

### (ii) Prohibition decisions annulled on appeal

Four of the Commission's prohibition decisions were annulled on appeal. In *Airtours/First Choice*<sup>579</sup> the Commission had prohibited the proposed hostile acquisition by Airtours of First Choice on the basis of collective dominance<sup>580</sup>. The General Court, in an excoriating judgment, annulled the decision on the basis of manifest error of assessment: it was particularly critical of the Commission's assessment of the evidence and of its reasoning<sup>581</sup>. The mergers in *Schneider Electric/Legrand*<sup>582</sup> and *Tetra Laval/Sidel*<sup>583</sup> were both prohibited by the Commission, but each decision (together with additional decisions requiring the mergers to be reversed) was annulled on appeal to the General Court<sup>584</sup>, an appeal by the Commission in the case of the *Tetra Laval/Sidel* case was unsuccessful<sup>585</sup>. In the case of *Schneider/Legrand* the General Court subsequently awarded Schneider damages for some of the economic loss it had suffered<sup>586</sup>. The Commission's prohibition decision in *MCI WorldCom/Sprint*<sup>587</sup> was annulled by the General Court in *MCI Inc v Commission*<sup>588</sup> since the parties had terminated their agreement by the time of the Commission's decision; the mere fact that they were continuing to negotiate an agreement in a modified form did not entitle the Commission to adopt a decision<sup>589</sup>.

### (iii) Unconditional clearances

It is not inevitable that a case that is taken to a Phase II investigation will lead to a prohibition or require a remedy. Some Phase II cases culminate in an unconditional clearance: indeed the merger in *Sony/Bertelsmann* was cleared by the Commission twice<sup>590</sup>. This contradicts the view sometimes expressed that, by the time a case reaches Phase II, the Commission has already made up its mind about the outcome; it is possible at the 'in-depth' phase of an investigation to demonstrate to the Commission that a merger will not significantly impede effective competition. By 31 May 2011 this had happened in 48

<sup>578</sup> Case M 5830, decision of 26 January 2011; on appeal to the General Court Case T-202/11 *Aeroporiki Aigaiou Aeroporiki and Marfin Investment Group Symmetochon v Commission*, not yet decided.

<sup>579</sup> Case M 1524 *Airtours/First Choice*, decision of 22 September 1999, OJ [2000] L 93/1.

<sup>580</sup> See 'The non-collusive oligopoly gap'; pp 864–865.

<sup>581</sup> Case T-342/99 [2002] ECR II-2585, [2002] 5 CMLR 317.

<sup>582</sup> Case M 2283, decision of 10 October 2001, OJ [2004] L 101/1.

<sup>583</sup> Case M 2416, decision of 30 October 2001, OJ [2004] L 43/13.

<sup>584</sup> Case T-310/01 *Schneider Electric v Commission* [2002] ECR II-4071, [2003] 4 CMLR 768 (annulment of prohibition decision); Case T-77/02 *Schneider Electric v Commission* [2002] ECR II-4201, (annulment of divestiture decision); Case T-5/02 *Tetra Laval v Commission* [2002] ECR II-4381, [2002] 5 CMLR 1182 (annulment of prohibition decision); Case T-80/02 *Tetra Laval v Commission* [2002] ECR II-4519, [2002] 4 CMLR 1271 (annulment of divestiture decision).

<sup>585</sup> Case C-12/03 P *Commission v Tetra Laval* [2005] ECR I-1113, [2005] 4 CMLR 573 (appeal seeking annulment of the General Court's prohibition decision); Case C-13/03 P *Commission v Tetra Laval* [2005] ECR I-987, [2005] CMLR 667 (appeal seeking annulment of the General Court's divestiture decision).

<sup>587</sup> Case M 1741, decision of 28 June 2000, OJ [2003] L 300/1; see the Commission's XXXth *Report on Competition Policy* (2000), point 249 and Box 6.

<sup>588</sup> Case T-310/00 [2004] ECR II-3253, [2004] 5 CMLR 1274.

<sup>589</sup> See further 'Withdrawal of notifications', p 906 below.

<sup>590</sup> See 'Coordinated effects', pp 871–873 above.

cases out of a total of 162, and it is noticeable that it has occurred on a number of occasions in recent years<sup>591</sup>.

In *Oracle Corporation/Sun Microsystems Inc*<sup>592</sup> the Commission was concerned about the possible elimination from the market of Sun's MySQL open-source database, given that Oracle was the owner of the leading proprietary brand. The Commission decided to give the concentration unconditional clearance, and in doing so it took into account public pledges by Oracle to continue to release new versions of MySQL<sup>593</sup>. It is unusual for the Commission to proceed on the basis of such pledges without incorporating them as a legally binding commitment as a condition of clearance: the General Court has been asked to rule on the lawfulness of the Commission's approach in the appeal against the clearance decision<sup>594</sup>.

#### (iv) Clearances subject to commitments

A notable feature of the EUMR is that a majority of Phase II decisions have resulted in clearances subject to commitments. This is shown both in the statistical Table and in the Table of Phase II investigations above. The Commission's approach to remedies in merger cases was discussed above, and its preference for structural rather than behavioural commitments was noted<sup>595</sup>. There are several recent examples of structural remedies at the end of Phase II. In *Sonoco/Ahlstrom*<sup>596</sup> the parties agreed to divest themselves of a plant in Norway that manufactured paper core to an 'up-front' buyer. In *Inco/Falconbridge*<sup>597</sup> the parties agreed to the divestment of a nickel refinery in Norway to an up-front buyer; interestingly in this case the Commission required that the merged entity should agree to provide important input materials to the buyer on a long-term basis. In *Gaz de France/Suez*<sup>598</sup> the parties agreed to divest various assets in order to overcome the Commission's concerns about horizontal overlaps at both the wholesale and retail levels of the gas and electricity markets in France and Belgium; the remedy included a termination of the link between the operator of gas network infrastructure and the supply of gas, effectively an unbundling remedy, as well as an agreement to invest in enhancing the capacity and functioning of the gas network<sup>599</sup>. In *Kronospan Group/Constantia*<sup>600</sup> the Commission was concerned that Kronospan's acquisition of three companies owned by Constantia that produced raw particle board used in the manufacture of furniture would lead to a significant impediment to effective competition; the simple remedy in this case was that Kronospan would acquire only two of the three companies: the third one, Fundermax of Austria, would remain with Constantia. In *Lufthansa/SN Holding (Brussels Airlines)*<sup>601</sup> and *Lufthansa/Austrian Airlines*<sup>602</sup> the Commission accepted commitments that would

<sup>598</sup> Case M 4180, decision of 14 November 2006.

<sup>599</sup> See Bachour and others 'Gaz de France/Suez: Keeping energy markets in Belgium and France open and contestable through far-reaching remedies' (2007) (Spring) *Competition Policy Newsletter* 83.

<sup>600</sup> Case M 4525, decision of 19 September 2007.

<sup>601</sup> Case M 5335, decision of 22 June 2009.

<sup>602</sup> Case M 5440, decision of 28 August 2009, on appeal to the General Court Case T-162/10 *Niki Luftfahrt GmbH v Commission*, not yet decided.

lead to take-off and landing slots becoming available at various European airports: this would enable competitors to compete with the merged entities on routes such as Brussels to Munich and Brussels to Vienna; ancillary remedies, on matters such as participation in Lufthansa's Frequent Flyer Programme, were also accepted. Structural remedies were also given in *Unilever/Sara Lee Body Care*<sup>603</sup> and *Syngenta/Monsanto's sunflower seed business*<sup>604</sup>.

There have also been some cases in which behavioural commitments have been accepted. For example in *Deutsche Bahn/English Welsh & Scottish Railway Holdings*<sup>605</sup> (a Phase I case) the Commission accepted commitments by Deutsche Bahn to fulfil EW&S's expansion plans for rail freight transport in France by investing in locomotives and personnel and to provide fair and non-discriminatory access to EW&S's driver training schools. In *SFR/Télé 2*<sup>606</sup> a series of remedies was offered to ensure that Vivendi, the owner of valuable television content, would not discriminate against competitors in the downstream pay-TV market; nor that it would weaken competitors in the upstream market for the acquisition of television content.

It is a notable feature of some cases, particularly in the energy and telecommunications sectors, that the package of remedies may be very complex: obvious examples of this are *E.ON/MOL*<sup>607</sup>, a merger impacting on the gas sector in Hungary, where the Commission required a divestment on the part of MOL, a release of gas to the wholesale market and access to storage facilities for customers that succeeded in buying the gas; *Gaz de France/Suez*, referred to above; *T-Mobile/tele.ring*, a case that was discussed in the context of non-collusive oligopoly<sup>608</sup>; and *Friesland Foods/Campina*<sup>609</sup> where, apart from structural remedies, a complex set of commitments were accepted to ensure that competitors downstream from the merged entity would have access to raw milk in the Netherlands and that, over a period of time, a competitor to the merged entity might emerge.

#### (v) Withdrawal of notifications

It is important to note that there have been many cases in which the parties to a merger subject to a Phase II investigation have chosen to withdraw the notification. Out of 201 cases to have gone to a Phase II investigation by the end of September 2011 36 were then withdrawn. It would be reasonable to assume that at least some of these withdrawals were made because it seemed inevitable that the Commission would otherwise have prohibited the merger outright. In this sense the total of 21 prohibitions referred to above may understate the number of cases that might, but for withdrawal, have led to an outright prohibition.

Article 6(1)(c) of the EUMR provides that the Commission shall conclude a Phase II investigation with a decision, unless it is satisfied that the parties have abandoned the merger. The Commission's *Consolidated Jurisdictional Notice* explains, at paragraphs 117 to 121, the procedure to be followed in such circumstances.

5. The 'Substantial Lessening of Competition' Test	932		

### 1. Introduction

UK law on the control of mergers is contained in Part 3 of the Enterprise Act 2002, which entered into force on 20 June 2003. This legislation involved a major overhaul of the domestic system of merger control. Merger control was first introduced in the UK by the Monopolies and Mergers Act 1965 which was replaced by the Fair Trading Act 1973. In July 2001 Government proposed a number of changes to the system of merger control in its White Paper *Productivity and Enterprise – A World Class Competition Regime*<sup>2</sup>. A central feature of the Government's proposed reform was that responsibility for making decisions in merger cases should be given to the Office of Fair Trading ('the OFT')<sup>3</sup> and the Competition Commission ('the CC')<sup>4</sup>, and that the Secretary of State should become involved only in cases which raise exceptional public interest issues<sup>5</sup>; the decisions to be adopted by the OFT and CC would be made against a 'substantial lessening of competition' ('SLC') test, rather than the public interest test set out in the Fair Trading Act. These changes were put into effect by Part 3 of the Enterprise Act 2002, with which this chapter is predominantly concerned. However there are some specific rules for 'public interest cases', including media mergers, for 'other special cases' and for certain mergers between water companies; these will be briefly described at the end of the chapter.

In reading this chapter it should be recalled that, as a general proposition, a 'concentration' that has a 'Community dimension' under the EU Merger Regulation (the 'EUMR')

<sup>1</sup> For more detailed texts on the merger control provisions of the Enterprise Act 2002 readers are referred to Parr, Finbow and Hughes *UK Merger Control: Law and Practice* (Sweet & Maxwell, 2nd ed, 2005); Bankes and Hadden *UK Merger Control: Law and Practice* (LexisNexis Butterworths, 2006); Scott, Hviid, Lyons and Bright *Merger Control in the United Kingdom* (Oxford University Press, 2006); Parker and Majumdar *UK Merger Control* (Hart Publishing, 2011).

cannot be investigated under domestic law<sup>6</sup>, although exceptions to this are to be found in Article 4(4)<sup>7</sup>, Article 9<sup>8</sup> and in Article 21(4)<sup>9</sup> of that Regulation.

## 2. Overview of UK Merger Control

### (A) Part 3 of the Enterprise Act 2002

Part 3 of the Enterprise Act 2002 consists of five chapters; the Government's *Explanatory Notes* to the Bill as introduced into Parliament on 26 March 2002 are a helpful adjunct to the Act itself; the Competition Appeal Tribunal ('the CAT') has noted that they may be used as an aid to ascertaining the intention of Parliament<sup>10</sup>. Chapter 1 of Part 3 of the Act is entitled 'Duty to make references': it deals both with jurisdictional matters, such as the meaning of 'relevant merger situations', and with the substantive assessment of mergers under the SLC test. The overwhelming majority of mergers will be considered under Chapter 1. However Chapter 2 contains provisions on 'public interest' cases and Chapter 3 addresses 'other special cases': these provisions will be invoked only rarely, except perhaps in relation to media mergers following amendments made by the Communications Act 2003; the provisions on public interest and other special cases, and on water mergers, are described briefly in section 9 of this chapter<sup>11</sup>. Chapter 4 of Part 3 of the Enterprise Act contains rules on enforcement, which set out the various undertakings that can be accepted by the OFT and the CC in the course of merger investigations and the orders that they may make, as well as certain automatic restrictions on the integration of firms during the currency of an investigation. Chapter 5 deals with numerous supplementary matters such as merger notices, investigatory powers, review by the CAT and the payment of fees.

Section 3 of this chapter explains the procedures of the OFT when determining whether a merger should be referred to the CC and when deciding to accept undertakings in lieu of a reference. Section 4 describes the procedures of the CC and section 5 discusses the way in which the OFT and the CC apply the SLC test in practice. Section 6 explains the enforcement powers in the Act, including the remedies that the CC can impose in merger cases. Various supplementary matters are dealt with in section 7 and section 8 considers how the merger control provisions work in practice. Section 9 contains a brief account of the provisions on public interest cases, other special cases and mergers in the water industry.

### (B) Brief description of the system of merger control in the UK

In essence the system of control for 'ordinary' mergers (as opposed to public interest or other special cases) in the Enterprise Act is as follows. The OFT has a duty to refer certain mergers to the CC; in some circumstances it has a discretion not to refer, and some mergers cannot be referred at all. There is no obligation on firms to pre-notify mergers to the OFT, although provision is made for them to do so on a voluntary basis either by making

<sup>6</sup> See ch 21, 'Article 21: one-stop merger control', pp 844–845.

<sup>7</sup> See ch 21, 'Pre-notification referrals: Article 4(4)', pp 846–847.

<sup>8</sup> See ch 21, 'Post-notification referrals: Article 9', pp 847–848.

<sup>9</sup> See ch 21, 'Article 21(4): legitimate interest clause', pp 851–854.

<sup>10</sup> See para 222 of the final judgment in Case No 1023/4/1/03 *IBA Health Ltd v OFT* [2003] CAT 27, [2004] CompAR 235; the *Explanatory Notes* are available at [www.legislation.gov.uk](http://www.legislation.gov.uk).

<sup>11</sup> See "Public Interest Cases", "Other Special Cases" and Mergers in the Water Industry', pp 956–961 below.

an informal submission or by submitting a more formal ‘merger notice’ for which there is a legislative basis: the difference between the two lies in the timetable that each triggers. In practice many firms voluntarily have pre-merger discussions with the OFT, not least because power exists to refer a merger to the CC after it has been consummated and, where appropriate, to require a merger to be reversed: a highly undesirable outcome for the firms concerned. Provision is made for the OFT to accept legally binding undertakings to modify a merger in lieu of a reference to the CC.

In cases where the OFT is concerned that there is a realistic prospect of an SLC and where it is not possible to agree a remedy the matter will be referred to the CC: there is an obvious analogy here with the procedure under the EUMR, where cases that raise ‘serious doubts’ as to the compatibility of a merger with the common market are taken to an in-depth Phase II investigation; however a significant difference is that, in the UK system, Phase II is conducted by a separate body from Phase I. The CC, when conducting an investigation under the Act, must determine whether there is a ‘relevant merger situation’ which qualifies for investigation and, if so, whether that merger would lead to an SLC within any market or markets in the UK for goods or services; it must also decide on appropriate remedies. The CC has available to it a number of final powers following its investigation including, where necessary, the power to prohibit a merger outright and to require the reversal of a merger that has already been consummated.

### (C) Institutional arrangements

An important feature of the merger provisions in the Enterprise Act is that the Secretary of State is not involved at all, unless there is a public interest consideration: such cases are rare. In the overwhelming majority of cases decisions are taken by the OFT<sup>12</sup>; a relatively small number of mergers are referred to the CC, and in those cases the CC will be responsible for the final decision. Decisions of the OFT and the CC are subject to review by the CAT. Sectoral regulators do not have concurrent powers in relation to mergers in the way that they do under the Competition Act 1998 and the market investigation provisions in the Enterprise Act<sup>13</sup>; however they are asked to provide input into the deliberations of the OFT and the CC where appropriate<sup>14</sup>.

Within the OFT the Mergers Group has specific responsibility for mergers. It has a director and two deputy directors for casework, and three assistant directors – two for economics and one for law. The Group also has more than 30 case officers to enable the OFT to perform its functions under the Act. The case officers are divided into a number of teams, each of which has responsibility for particular industry sectors; there is also a Head of EU Merger Regulation post which deals with policy and the coordination of OFT input into cases arising from the EUMR. The OFT’s website<sup>15</sup> contains a considerable amount of information about mergers under the Enterprise Act such as decisions, case lists and a register of undertakings; it also discusses procedures, facilitates consultation on undertakings in lieu of a reference to the CC and gives details of people to contact and of speeches and OFT publications.

The CC has about 40 part-time members. In each case referred to it a group will be appointed to carry out the investigation, usually consisting of four or five members; legal and economics staff as well as accountants and business advisers support the work of the groups.

<sup>12</sup> The reference of *BSkyB/ITV* was made by the Secretary of State under the public interest provisions in the Enterprise Act: see ‘Public interest cases’, pp 956–958 below.

<sup>13</sup> See ch 10, ‘Concurrency’, pp 437–439.

<sup>15</sup> See [www.of.gov.uk](http://www.of.gov.uk).

## (D) Guidelines, rules of procedure and other relevant publications

In addition to Part 3 of the Enterprise Act various guidelines, rules and other publications seek to explain the operation of the UK system of merger control. Section 106 of the Act requires the OFT and the CC to prepare and publish general advice and information about the making of merger references and, in the case of the CC, about the way in which relevant customer benefits may affect the taking of enforcement action. Section 107 of the Act imposes additional publicity requirements on the OFT, the CC and the Secretary of State: for example references, undertakings and orders must all be published.

### (i) OFT publications

The OFT has published the following guidance in relation to mergers under the Enterprise Act:

- *Mergers – Jurisdictional and procedural guidance*<sup>16</sup>
- *Mergers – Exceptions to the duty to refer and undertakings in lieu of reference guidance*<sup>17</sup>
- *Merger fees*<sup>18</sup>
- *Merger notice*<sup>19</sup>
- *Prior notice of publicly proposed mergers*<sup>20</sup>
- *Enquiry letter template*<sup>21</sup>

The OFT has also published two reports, prepared for it, the CC and the Secretary of State, on *Ex post evaluation of mergers*<sup>22</sup> and *Review of merger decisions under the Enterprise Act 2002*<sup>23</sup>.

### (ii) CC publications

Acting under Schedule 7A to the Competition Act the CC has adopted the *Competition Commission Rules of Procedure 2006* which superseded the earlier rules of 20 June 2003<sup>24</sup>. The CC has published four sets of guidelines under section 106(3) of the Enterprise Act of relevance to merger investigations<sup>25</sup>:

- *General Advice and Information*<sup>26</sup>
- *Statement of Policy on Penalties*<sup>27</sup>
- *Merger Remedies: Competition Commission Guidelines*<sup>28</sup>
- *Water Merger References: Competition Commission Guidelines*<sup>29</sup>.

The Chairman of the CC has published three further documents of relevance:

- *Guidance to Groups*<sup>30</sup>
- *Disclosure of Information in Merger and Market Inquiries*<sup>31</sup>
- *Disclosure of Information by the Competition Commission to Other Public Authorities*<sup>32</sup>.

<sup>16</sup> OFT 527, June 2009.

<sup>17</sup> OFT 1122, December 2010.

<sup>18</sup> September 2009.

<sup>19</sup> June 2003.

<sup>20</sup> June 2003.

<sup>21</sup> Available at [www.oft.gov.uk/OFTwork/mergers/publications](http://www.oft.gov.uk/OFTwork/mergers/publications).

<sup>22</sup> OFT 767, March 2005.

<sup>23</sup> OFT 1073, March 2009.

<sup>24</sup> Available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>25</sup> *Ibid.*

<sup>26</sup> CC4, March 2006.

<sup>27</sup> CC5, June 2003.

<sup>28</sup> CC8, November 2008.

<sup>29</sup> CC9, December 2004.

<sup>30</sup> CC6, March 2006.

<sup>31</sup> CC7, July 2003.

<sup>32</sup> CC12, April 2006.

The CC has also published some other guidance documents<sup>33</sup>:

- *Template Interim Undertakings for Completed Mergers*
- *Suggested Best Practice for Submissions of Technical Economic Analysis from Parties to the CC*
- *Notice of Variation of Procedure – Adoption of Undertakings.*

### (iii) Joint OFT and CC publications

When the Enterprise Act first entered into force the OFT and CC each published their own guidance on how they assess the competitive impact of mergers<sup>34</sup>. A joint review of their respective guidelines was launched by the OFT and the CC in 2008<sup>35</sup>: this led to the publication in September 2010 of their joint *Merger Assessment Guidelines*<sup>36</sup>. The OFT and CC have also published *A Quick Guide to UK Merger Assessment*<sup>37</sup>.

### (iv) Department for Business, Innovation and Skills delegated legislation<sup>38</sup>

The Secretary of State has made the following orders under the Enterprise Act of relevance to merger investigations:

- The Enterprise Act 2002 (Merger Fees and Determination of Turnover) Order 2003<sup>39</sup>: this establishes how turnover is to be calculated when determining whether a merger qualifies as a ‘relevant merger situation’ for jurisdictional purposes<sup>40</sup> and the amount of any merger fee that may be payable to the OFT<sup>41</sup>. The level of fees has been raised by the Enterprise Act (Merger Fees) (Amendment) Orders 2005<sup>42</sup> and 2009<sup>43</sup>
- The Competition Commission (Penalties) Order 2003<sup>44</sup>: this establishes the maximum levels of penalties that the CC can impose for offences under section 110 of the Act<sup>45</sup>
- The Enterprise Act (Merger Pre-notification) Regulations 2003<sup>46</sup>: this makes provision for the serving of merger notices by parties who pre-notify a merger to the OFT
- The Competition Appeal Tribunal Rules 2003<sup>47</sup>: this governs the way in which the CAT deals with applications for review of decisions under Part 3 of the Act
- The OFT Registers of Undertakings and Orders (Available Hours) Order 2003<sup>48</sup>
- The Enterprise Act (Protection of Legitimate Interests) Order 2003<sup>49</sup>: this enables the Secretary of State to issue a ‘European intervention notice’ and to take appropriate measures to protect legitimate interests which may be adversely affected by a merger
- The Enterprise Act (Supply of Services) Order 2003<sup>50</sup>: this sets out the situations in which permission to use land will be regarded as a supply of services

<sup>33</sup> The documents referred to in the text that follows are available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>34</sup> *Mergers: substantive assessment guidance* OFT 516, May 2003 and *Merger References: Competition Commission Guidelines* CC 2, June 2003.

<sup>35</sup> Details of the joint review are available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

- The Enterprise Act 2002 (Specification of Additional Section 58 Consideration) Order 2008<sup>60</sup>.

### 3. The OFT's Duty to Make References

Chapter 1 of Part 3 of the Enterprise Act is entitled 'Duty to make references', and is central to the domestic system of merger control. Chapter 1 contains both jurisdictional rules, explaining what is meant by a merger and which mergers can be investigated under the Act, and substantive rules, setting out the test to be applied by the OFT and the CC when investigating mergers. Chapter 1 also defines the respective roles of the OFT and the CC in relation to merger investigations: the OFT conducts the preliminary analysis of mergers, analogous to a Phase I investigation under the EUMR; cases that raise serious competition concerns and that cannot be resolved at the stage of the OFT's investigation are referred to the CC for an in-depth analysis, analogous to a Phase II investigation under the EUMR. The procedures of the OFT and the CC in merger investigations will be explained in the text that follows<sup>61</sup>.

Sections 22 to 32 of the Enterprise Act deal with the position of the OFT in relation to mergers that have already been consummated ('completed mergers') and sections 33 to 34 set out the relevant provisions in relation to mergers that have yet to be completed ('anticipated mergers'). Unlike the position under the EUMR, there is no duty under UK law to pre-notify mergers to the OFT. In practice many firms bring their transactions to the attention of the OFT on a voluntary basis prior to completion, although in recent years there has been a noticeable increase in the number of completed mergers that have been investigated by the OFT and CC, sometimes leading to the forced divestiture of assets already acquired<sup>62</sup>. There is evidence to suggest that quite a few mergers that might

<sup>62</sup> See 'Completed mergers', p 954 below.

be harmful to competition escape the scrutiny of the OFT and CC<sup>63</sup>. To deal with this problem the OFT has a Mergers Intelligence Officer who monitors merger activity which has not been brought to its attention<sup>64</sup>.

Sections 35 to 41 of the Act are concerned with the determination of references by the CC.

## (A) Duty to make references: completed mergers

### (i) Duty to refer

Section 22(1) of the Enterprise Act provides that the OFT has a duty to make a reference to the CC if it believes that it is or may be the case that a 'relevant merger situation'<sup>65</sup> has been created and that the creation of that situation has resulted, or may be expected to result, in an SLC within any market or markets in the UK, or a part of the UK, for goods or services<sup>66</sup>. It is important to note that the Act imposes a duty, rather than conferring a discretion, on the OFT to refer mergers of the kind set out in section 22(1): this means that it is possible for a firm that is opposed to a particular merger, for example the victim of a hostile bid, a customer or a competitor, to apply to the CAT for a review of the decision of the OFT not to refer that merger to the CC<sup>67</sup>. The fact that a decision not to refer a merger can be challenged, as well as a decision to refer one, has resource implications for the OFT, which has to take care to ensure that it publishes a decision setting out the primary evidence and the reasoning that led to its decision in a manner which is clear to all interested parties.

### (A) *The IBA Health case*

The first application by a third party for a review concerned a proposed acquisition by iSOFT Group plc of Torex plc, two direct competitors in the supply of software applications to hospitals; the merger would result in the merged entity having a significant market share. This case led to an important judgment of the Court of Appeal which examined the nature of the duty of the OFT under the Act to make a reference. The OFT decided that it would not refer the iSOFT/Torex merger to the CC. IBA Health, a competitor, challenged the decision not to make a reference before the CAT; the CAT concluded that the OFT's decision should be quashed and that the matter should be reconsidered<sup>68</sup>. In reaching this conclusion the CAT considered the scheme of the merger control provisions in the Act and noted that the OFT's role is to act as a 'first screen' in relation to mergers, but not to be a decision-maker: that is the function of the CC. Section 33<sup>69</sup> imposes a duty on the OFT to refer a merger where it believes that 'it is or *may be*' the case that a merger '*may be* expected to result' in an SLC (emphasis added). In the CAT's view this formulation (and in particular the appearance in section 33(1) of the word 'may' in two places (the so-called 'double may')) meant that if the OFT itself did not consider that a merger would result in an SLC, but if it was possible that the CC might credibly have that view, the OFT was obliged to refer:

If there is room for two views, the statutory duty of the OFT is to refer the matter<sup>70</sup>.

<sup>63</sup> See *The deterrent effect on competition enforcement by the OFT: a report prepared for the OFT by Deloitte* OFT 962, November 2007, paras 4.48–4.61.

<sup>64</sup> *Mergers – Jurisdictional and procedural guidance* OFT 527, June 2009, para 4.9.

<sup>65</sup> This term is defined in s 23 of the Act: see 'Relevant merger situations', pp 918–923 below.

<sup>66</sup> On the meaning of 'markets in the UK for goods and services' see Enterprise Act 2002, s 22(6).

<sup>67</sup> See 'Review of decisions under Part 3 of the Enterprise Act', pp 950–951 below.

<sup>68</sup> Case No 1023/4/1/03 *IBA Health Ltd v OFT* [2003] CAT 27, [2004] CompAR 235.

<sup>69</sup> Because the *iSOFT/Torex* merger was anticipated rather than completed, the relevant section was s 33(1) rather than s 22(1); the wording under consideration in the case is identical in each section.

<sup>70</sup> Case No 1023/4/1/03 *IBA Health Ltd v OFT* [2003] CAT 27, [2004] CompAR 235, para 192.

The CAT considered that, as the OFT had not asked whether there was a significant prospect that the CC might consider that the merger would give rise to an SLC, it had failed to ask itself the correct question and so had erred in law<sup>71</sup>; the CAT also held that the OFT's decision was defective because it was not based on sufficient evidence and was insufficiently reasoned<sup>72</sup>. In the OFT's view the CAT's formulation of the duty upon it would significantly lower the threshold for referring mergers to the CC and might lead to many more mergers being referred: this raised important policy questions, as a result of which the OFT appealed to the Court of Appeal. The Court of Appeal upheld the decision of the CAT to quash the decision and refer the matter back to the OFT on the facts of the case, but concluded that the CAT's formulation of the duty on the OFT was incorrect<sup>73</sup>. The Vice-Chancellor (as he then was) was of the opinion that the CAT's 'two part' test was wrong and that it would make various provisions in the Act unworkable:

the relevant belief is that the merger may be expected to result in a substantial lessening of competition, not that the Commission may in due course decide that the merger may be expected to result in a substantial lessening of competition. Further, the body which is to hold that belief is OFT not the Commission<sup>74</sup>.

The Vice-Chancellor went on to say that the words in section 33 should be applied in accordance with their ordinary meaning.

### (B) *Guidance*

Part 2 of the OFT/CC *Merger Assessment Guidelines*<sup>75</sup> provides guidance on the OFT's duty to refer in the light of this judgment and of some specific guidance that the Vice-Chancellor provided on the proper application of section 33(1) in paragraphs 44 to 49 of his judgment. The OFT must form a reasonable belief, objectively justified by relevant facts, as to whether a merger will lessen competition substantially. The OFT must make a reference to the CC where it believes that a merger is more likely than not to result in an SLC, that is to say, that it believes there is more than a 50 per cent chance that an SLC will occur. The *Guidelines* go on to say that a reference to the CC can be made at lower ranges of probability than 50 per cent: if the OFT believes that the degree of likelihood is not fanciful, but has less than a 50 per cent chance of occurring, the OFT has a wide margin within which to exercise its judgment as to whether it may be the case that the merger would result in an SLC<sup>76</sup>. In such cases the OFT will have a duty to refer when it believes there to be a 'realistic prospect' that the merger will result in an SLC.

### (C) *The UniChem case*

In *UniChem v OFT* UniChem objected to the fact that the OFT had not referred a proposed acquisition by Phoenix Healthcare Distribution Ltd of East Anglian Pharmaceuticals Ltd to the CC. The CAT considered that much of the OFT's decision was soundly based, but nevertheless quashed it since the OFT had made primary findings of fact about

<sup>71</sup> *Ibid*, para 232.

<sup>72</sup> When the OFT reconsidered the case it found that there could be an SLC in relation to the supply of laboratory information management systems to NHS hospitals, but did not refer the merger to the CC as iSOFT offered undertakings in lieu: see OFT Press Release 56/04, 24 March 2004.

<sup>73</sup> *OFT v IBA Health Ltd* [2004] EWCA Civ 142, [2004] UKCLR 683; for comment see Parr 'Merger Control in the Wake of *IBA Health*' (2007) 6 *Competition Law Journal* 282.

<sup>74</sup> *OFT v IBA Health Ltd* [2004] EWCA Civ 142, [2004] UKCLR 683, para 38.

<sup>75</sup> CC2 (Revised), OFT 1254, September 2010, paras 2.2–2.7; this replaces the OFT's *Guidance note revising Mergers – substantive assessment guidance* OFT 516a.

<sup>76</sup> Case No 1049/4/1/05 *UniChem v OFT* [2005] CAT 8, [2005] CompAR 907, para 172 (distinguishing the term 'margin of judgment' from the broader concept of discretion).

UniChem's position on the market on the basis of information provided by the merging parties but without any reference to UniChem itself. In the CAT's view a 'balanced and fair procedure' would have been for the OFT to have checked these important facts with UniChem<sup>77</sup>. On reconsideration of the matter the OFT again cleared the merger without a reference to the CC<sup>78</sup>.

**(D) The Celesio case**

In *Celesio AG v OFT*<sup>79</sup> Celesio unsuccessfully challenged the decision of the OFT not to refer a proposed acquisition by the Boots Group plc of Alliance UniChem plc; the CAT rejected a submission by Celesio that the OFT is always under a duty to refer a merger where the prospect of there being an SLC is greater than fanciful<sup>80</sup>.

**(E) Other points about the duty to refer**

The OFT may by notice under section 31 require information from the merging parties for the purpose of deciding whether to make a reference under section 22. The OFT is likely to proceed in this manner in cases where a completed merger has not been pre-notified to it<sup>81</sup>. However it has no powers to force the parties to provide this information, nor to require information from third parties<sup>82</sup>. The lack of such powers can be a handicap to the OFT, and might even mean that, in some cases, it has to make a reference to the CC since it cannot satisfy itself that a merger would not result in an SLC. It would be a criminal offence for notifying parties or third parties to provide the OFT with false or misleading information<sup>83</sup>.

The duty imposed on the OFT by section 22(1) must be read subject to the provisions of section 22(2) and (3), which provide a discretion not to refer certain mergers and which prevent the reference of some others.

**(ii) Discretion not to refer**

Section 22(2) provides the OFT with a discretion not to make a reference in two situations.

**(A) Markets of insufficient importance**

The first is where the OFT believes that the market or markets concerned are not of sufficient importance to justify the making of a reference to the CC<sup>84</sup>. The primary purpose of this provision is to avoid references where the costs involved would be disproportionate to the size of the market concerned. The OFT's original guidance on this issue had been taken to suggest that this '*de minimis*' exception would apply only rarely, where the value of the market affected was less than £400,000, and in practice quite a few 'small' mergers were referred to the CC. The OFT therefore launched a consultation in June 2007 which led to the publication of revised guidance in November 2007<sup>85</sup> that raised the threshold

<sup>77</sup> *Ibid*, paras 268–269.

<sup>78</sup> [www.of.gov.uk/advice\\_and\\_resources/resource\\_base/Mergers\\_home/decisions/2005/phoenix-healthcare](http://www.of.gov.uk/advice_and_resources/resource_base/Mergers_home/decisions/2005/phoenix-healthcare).

<sup>79</sup> Case No 1059/4/1/06 [2006] CAT 9, [2006] CompAR 515. <sup>80</sup> *Ibid*, para 74.

<sup>81</sup> See *Mergers – Jurisdictional and procedural guidance*, para 4.17.

<sup>82</sup> Enterprise Act 2002, s 31; see further *Mergers – Jurisdictional and procedural guidance*, para 6.3.

<sup>83</sup> Enterprise Act 2002, s 117.

<sup>84</sup> *Ibid*, s 22(2)(a), on which see Christian 'The OFT's Discretion Not to Refer – Where do We Stand?' (2010) 9(1) Competition Law Journal 29 and Mackenzie 'The OFT's De Minimis Exception – When Size Really Doesn't Matter' (2010) 31(8) ECLR 331.

<sup>85</sup> *Exception to the duty to refer: markets of insufficient importance* OFT 516b.

from £400,000 to £10 million, albeit subject to certain qualifications<sup>86</sup>. The 2007 guidance was itself amended in 2010 to reflect the OFT's experience of applying the exception in practice, and will now be found in *Mergers – Exceptions to the duty to refer and undertakings in lieu of reference guidance* ('the *Exceptions guidance*')<sup>87</sup>. Chapter 2 of the OFT's *Exceptions guidance* stresses that the OFT will apply the *de minimis* exception by carrying out a 'broad cost-benefit analysis' in the light of all relevant factors<sup>88</sup>. The *Exceptions guidance* does not provide a mechanical 'safe harbour' below which the *de minimis* exception will always be applied<sup>89</sup>; however it does provide guidance on when the OFT is likely to consider that the exception does, or does not, apply:

- where the annual value of the market(s) concerned is, in aggregate, more than £10 million, the OFT will generally consider the case to be of sufficient importance to justify a reference<sup>90</sup>
- where the annual value of the market(s) concerned is, in aggregate, less than £3 million, the OFT will generally consider that a reference is not justified<sup>91</sup>.

In cases where the annual value of the market(s) concerned is between £3 million and £10 million the OFT will typically consider three points:

- whether clear-cut undertakings in lieu of a reference could, in principle, be offered by the parties<sup>92</sup>
- whether the expected customer harm resulting from the merger is materially greater than the cost of a reference to the public purse (currently around £400,000)<sup>93</sup>
- the wider implications of the OFT's decisions for its treatment of future cases<sup>94</sup>.

Separately, the OFT's *Exceptions guidance* also explains how the exception is used to reduce the costs of a first phase review<sup>95</sup>. The OFT has cleared several mergers on *de minimis* grounds since its guidance was first revised in 2007<sup>96</sup>, including one that it considered might lead to a monopoly<sup>97</sup>.

### (B) *Customer benefits*

The second situation in which there is a discretion not to make a reference is where any 'relevant customer benefits' in relation to the creation of the merger concerned outweigh the expected SLC and any adverse effects of it<sup>98</sup>. The meaning of relevant customer benefits for this purpose is set out in section 30 of the Act: there must be a benefit for 'relevant customers'<sup>99</sup> in the form of lower prices, higher quality or greater choice of goods

<sup>86</sup> *Ibid*, para 7.6.                      <sup>87</sup> OFT 1122, December 2010.

<sup>88</sup> *Exceptions guidance*, paras 2.21–2.27.                      <sup>89</sup> *Ibid*, fn 3.                      <sup>90</sup> *Ibid*, para 2.14.

<sup>91</sup> *Ibid*, para 2.15 (assuming that a clear-cut undertaking in lieu of a reference is not available).

<sup>92</sup> *Ibid*, paras 2.18–2.27; see also *Dunfermline Press Ltd/Trinity Mirror plc*, 4 February 2008.

<sup>93</sup> *Exceptions guidance*, paras 2.9–2.12, 2.16, and 2.28–2.29.

<sup>94</sup> *Ibid*, paras 2.40–2.43; this point is specifically based on the findings in *The deterrent effect on competition enforcement by the OFT: a report prepared for the OFT by Deloitte* OFT 962, November 2007.

<sup>95</sup> *Exceptions guidance*, paras 2.44–2.53.

<sup>96</sup> See eg three mergers arising from the award of railway franchises: OFT Press Release 180/07, 20 December 2007, *Exceptions guidance*, OFT Press Release 15/08, 4 February 2008 and OFT Press Release 16/08, 4 February 2008; see also *FMC/ISP Holdings*, 30 July 2008, paras 63–76; *Stagecoach/Cavalier Contracts*, 18 September 2008, paras 93–111; *Ocean Park/Orbital Marketing Services Group*, 14 November 2008; paras 68–86; and *Lochard/Spectris*, 29 January 2009, paras 114–131.

<sup>97</sup> *Ordinance Survey/Local Government Improvement and Development*, 23 February 2011, paras 102–118.

<sup>98</sup> Enterprise Act 2002, s 22(2)(b).

<sup>99</sup> On the meaning of relevant customers see Enterprise Act 2002, s 30(4); the term includes customers in a chain of customers beginning with the immediate customers of the merging parties, and includes future customers.

or services in any market in the UK (which need not be the market in which the SLC has occurred or would occur) or greater innovation in relation to such goods or services<sup>100</sup>; and the benefit must have accrued, or be expected to accrue within a reasonable period, as a result of the merger, and be unlikely to have accrued without the merger or a similar lessening of competition<sup>101</sup>. The notion of relevant customer benefits occurs elsewhere in the Act, in particular in relation to the CC's investigations<sup>102</sup>. However, whereas the OFT is asked by section 22 to consider whether any relevant customer benefits would outweigh an SLC and any adverse effects of the SLC arising from the merger as a whole<sup>103</sup>, the CC is asked to consider the effect that any remedial action it might take would have on any relevant customer benefits<sup>104</sup>.

The OFT's *Exceptions guidance* cautions that cases in which relevant customer benefits are established are likely to be rare<sup>105</sup>. The parties must adduce detailed and verifiable evidence of anticipated relevant customer benefits<sup>106</sup>. The parties must also demonstrate that they will have the incentive to pass on these benefits to customers and that the merger will leave customers better off than they would otherwise have been<sup>107</sup>. It is important to appreciate that the OFT (and the CC) is asked to consider only whether there will be a *customer* benefit rather than a benefit to consumers generally, which would be a very difficult thing to demonstrate. It would presumably be a matter for the judgment of the OFT (or the CC) to determine how to proceed in circumstances where some customers would benefit from a merger but others would not<sup>108</sup>. Even where such benefits can be established the OFT has a discretion whether to refer a merger; in exercising its discretion the OFT will have regard to the benefits of a CC investigation, including the possibility of remedies that could preserve any relevant customer benefits<sup>109</sup>.

A separate point is that there may be cases in which predicted customer benefits would increase the rivalry in a market, in which case this fact could be taken into account as part of the SLC test, rather than as a subsequent counterweight to a possible SLC<sup>110</sup>.

### (iii) Circumstances in which a reference cannot be made

Section 22(3) sets out various circumstances in which a reference cannot be made: for example where the OFT is considering whether to accept an undertaking in lieu of a reference<sup>111</sup>; where the merger has been, or is being, considered under the provisions on anticipated mergers<sup>112</sup>; in certain public interest cases<sup>113</sup>; and where the European

<sup>100</sup> Enterprise Act 2002, s 30(1)(a); these benefits are not limited to efficiencies affecting rivalry: see *Exceptions guidance*, para 4.3.

<sup>101</sup> Enterprise Act 2002, s 30(2) and (3): note that these subsections set out the test for completed mergers and for anticipated mergers respectively.

<sup>102</sup> See 'Efficiencies', p 939 below. <sup>103</sup> *Exceptions guidance*, para 4.4.

<sup>104</sup> The CC considered the effect of possible remedial action on relevant customer benefits in *Mid Kent Water/South East Water*, paras 8.108–8.152, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk) and *Macquarie UK Broadcast Ventures/National Grid Wireless Group*, paras 10.8–10.19, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>105</sup> *Ibid.* <sup>106</sup> *Exceptions guidance*, para 4.9.

<sup>107</sup> *Ibid.*, para 4.12.

<sup>108</sup> This may be the case where a merger gives rise to relevant customer benefits in one market but causes an SLC in another market: see *Exceptions guidance*, paras 4.3 and 4.13.

<sup>109</sup> *Ibid.*, para 4.5.

<sup>110</sup> *Exceptions guidance*, para 4.2 and fn 36; see also section 5.7 of the *OFT/CC Merger Assessment Guidelines*.

<sup>111</sup> Enterprise Act 2002, s 22(3)(b): see 'Undertakings in lieu of a reference', pp 927–928 below.

<sup>112</sup> *Ibid.*, s 22(3)(c): see below on anticipated mergers.

<sup>113</sup> *Ibid.*, s 22(3)(d): see 'Public interest cases', pp 956–958 below.

Commission is deciding whether to exercise jurisdiction under Article 4(5) or Article 22 of the EUMR<sup>114</sup>.

### (B) Duty to make references: anticipated mergers

In practice most mergers are brought to the attention of the OFT on a voluntary basis prior to their consummation; there is a statutory basis for pre-notification, though its use is not obligatory<sup>115</sup>. Section 33(1) of the Enterprise Act imposes a duty on the OFT to make a reference of anticipated mergers where it believes that it is or may be the case that arrangements are in progress or in contemplation which, if carried into effect, would result in the creation of a relevant merger situation and the creation of that situation may be expected to result in an SLC within any market or markets in the UK for goods or services<sup>116</sup>. The OFT will generally consider that ‘arrangements are in progress or in contemplation’ where the merger has been publicly announced<sup>117</sup>. A merger may be ‘in contemplation’ without there being a binding agreement: in the *London Stock Exchange* case the CC said that there must be ‘genuine consideration’ on the part of the acquirer to enter into the transaction; its interest in the transaction must be real; there must be an intention to enter into the transaction within a reasonable time; and the acquirer must be capable of bringing the transaction about<sup>118</sup>.

As in the case of section 22 for completed mergers the OFT has a duty, rather than a discretion, to refer anticipated mergers. However, as in the case of completed mergers, the OFT has a discretion not to refer markets of insufficient importance or mergers where relevant customer benefits would outweigh the SLC concerned<sup>119</sup>. An additional discretionary ground for non-reference exists for anticipated mergers, where the arrangements are not sufficiently advanced, or are not sufficiently likely to proceed, to justify the making of a reference to the CC<sup>120</sup>. Section 33(3) sets out circumstances in which a reference cannot be made, which mirror the provisions of section 22(3)<sup>121</sup>. Pursuant to section 34, provision has been made for the aggregation of two or more transactions which take place between the same parties within a two-year period<sup>122</sup>.

### (C) Relevant merger situations

Section 23 of the Enterprise Act defines what is meant by ‘relevant merger situations’. For there to be a relevant merger situation, two or more enterprises must have ceased to be distinct, and the merger must satisfy either the turnover or the share of supply test.

<sup>114</sup> Ibid, ss 22(3)(e) and 22(3)(f): on the Article 4(5) and Article 22 procedure in the EUMR see ch 21, ‘Article 4(5) and Article 22: referral of concentrations not having a Community dimension by Member States to the Commission’, pp 849–851.

<sup>115</sup> See ‘Notifying mergers to the OFT’, pp 924–925 below.

<sup>116</sup> Enterprise Act 2002, s 33(1).

<sup>117</sup> *Mergers – Jurisdictional and procedural guidance*, para 3.6.

<sup>119</sup> Enterprise Act 2002, s 33(2)(a) and (c).

<sup>120</sup> Ibid, s 33(2)(b); see *Exceptions guidance*, paras 3.1–3.5.

<sup>121</sup> See ‘Duty to make references: completed mergers’, pp 913–918 above.

<sup>122</sup> The Enterprise Act 2002 (Anticipated Mergers) Order 2003, SI 2003/1595.

### (i) Enterprises ceasing to be distinct

A merger occurs where two or more enterprises 'have ceased to be distinct'<sup>123</sup>. For this purpose enterprise means the activities, or part of the activities, of a business<sup>124</sup>. There is no requirement that the activities transferred should generate a profit<sup>125</sup>. The question whether the activities transferred constitute an enterprise is one of substance, not form, taking into account all the circumstances of the case<sup>126</sup>. The transfer of physical assets could amount to an enterprise where this enables a business activity to be continued<sup>127</sup>; and intellectual property rights could be considered to be an enterprise where a turnover can be attributed to them that could be transferred to a buyer<sup>128</sup>. Paragraph 3.10 of the OFT's *Jurisdictional and procedural guidance* states that the transfer of customer records, the application of the Transfer of Undertakings (Protection of Employment) Regulations 2006<sup>129</sup> and a payment for goodwill relating to a transferred business are likely to be important factors in assessing whether an enterprise has been transferred<sup>130</sup>. The fact that a business is no longer trading does not prevent it from being treated as an enterprise<sup>131</sup>. An outsourcing agreement will not normally result in enterprises ceasing to be distinct<sup>132</sup>. In *Project Canvas* the OFT concluded that the contribution of know-how and temporary staff, in particular from the BBC, and finance to a joint venture in the Internet protocol television sector did not amount to an enterprise<sup>133</sup>.

Enterprises cease to be distinct if they are brought under common ownership or control<sup>134</sup>. Control for this purpose is defined broadly in section 26 of the Act: it includes legal control<sup>135</sup>; however the definition also covers a situation in which one person is able to control the policy of another, though without having legal control ('*de facto* control'), or has the ability to influence the policy of another ('material influence')<sup>136</sup>. The 'policy' of a company means the management of its business, in particular in relation to its competitive conduct<sup>137</sup>. The expression 'material' influence is wider than 'decisive' influence in Article 3(2) of the EUMR, with the result that some transactions that would not amount to mergers under EU law would do under UK law<sup>138</sup>. The effect of the provisions in section 26 of the Enterprise

<sup>123</sup> Enterprise Act 2002, s 23(1)(a) and (2)(a); see Parker and Pritchard 'Jurisdictional Frontiers in UK Merger Control: "Enterprises Ceasing to be Distinct"' (2010) 9(1) Competition Law Journal 90.

<sup>124</sup> Enterprise Act 2002, s 129(1); the reference to 'part of the activities' of a business means that the sale of a division of a company may be investigated, provided that the other requirements of s 23 are satisfied.

<sup>134</sup> Enterprise Act 2002, s 26(1). <sup>135</sup> *Ibid*, s 26(2) and s 129(1) and (2).

<sup>136</sup> *Ibid*, s 26(3).

<sup>137</sup> *Mergers – Jurisdictional and procedural guidance*, para 3.15 and OFT/CC *Mergers Assessment Guidelines*, para 3.2.8.

<sup>138</sup> On Article 3(2) of the EUMR see ch 21 'Article 3: meaning of a concentration', pp 834–839; for an example of a transaction that the OFT considered gave rise to material influence under the Enterprise Act, though not to decisive influence under the EUMR, see *Centrica plc/Lake Acquisitions Ltd*, OFT decision of 25 August 2009.

Act is that a person who acquires a shareholding in a company of much less than 51 per cent may have control for the purpose of UK merger control. There can be material influence where the shareholding is less than 25 per cent, and the OFT has said that it will examine any shareholding greater than 15 per cent to determine whether this is the case; even a shareholding of less than 15 per cent might attract scrutiny in exceptional cases<sup>139</sup>. The OFT's *Guidance* states that an assessment of material influence will require a case-by-case analysis and sets out various factors which may be relevant, such as the ownership and distribution of other shareholdings in a company, the pattern of attendance at recent shareholder meetings, the power to appoint members of the board of directors and any agreements that may have been made between the shareholders<sup>140</sup>. The key question for the OFT is not whether the acquiring party has the right to block special resolutions, but whether, given these other factors, it is able to do so as a practical matter<sup>141</sup>.

In *BSkyB Group plc/ITV plc* the OFT considered that BSKyB's acquisition of a 17.9 per cent stake in ITV gave it the ability materially to influence the policy of ITV and that the test for making a reference to the CC was met<sup>142</sup>; the CC agreed with this finding<sup>143</sup>. The CC noted that BSKyB's holding of 17.9 per cent of the shares in ITV made it the largest shareholder by some margin; the CC also looked at the voting behaviour at past general meetings of ITV, and considered that a holding of 17.9 per cent would have enabled BSKyB to block any special resolutions<sup>144</sup>. The CC also considered that BSKyB's industry knowledge and standing were of relevance and concluded that, in combination with its shareholding of 17.9 per cent, it did have material influence over ITV<sup>145</sup>. An appeal against this finding by BSKyB to the CAT was unsuccessful<sup>146</sup>. The CAT held that once the CC finds that there is material influence over a company's policy there will be little scope for the exercise of any discretion under section 26(3) to decline to treat that influence as giving rise to common control<sup>147</sup>.

The OFT's *Jurisdictional and procedural guidance* says that, since a shareholding of 25 per cent or more generally enables the shareholder to block special resolutions, it is likely to be seen as presumptively conferring the ability materially to influence policy<sup>148</sup>. It is possible that one person may have the ability materially to influence the policy of a company even though another has a controlling interest<sup>149</sup>.

A transition from one level of control to another (for example from material influence to *de facto* control) would itself amount to a merger for the purposes of the Act<sup>150</sup>. As a result, if Company A acquires Company B in stages, this could give rise to several different mergers: first when A acquires material influence over B; secondly when A acquires *de facto* control; and finally when it achieves *de jure* (or legal) control<sup>151</sup>. The OFT has

<sup>139</sup> *Mergers – Jurisdictional and procedural guidance*, para 3.20; the OFT is likely to investigate such cases only where they concern one business taking a stake in a direct competitor: *ibid*.

<sup>140</sup> *Mergers – Jurisdictional and procedural guidance*, paras 3.17–3.28; see similarly paras 3.2.8–3.2.12 of the OFT/CC *Merger Assessment Guidelines*.

<sup>141</sup> *Mergers – Jurisdictional and procedural guidance*, para 3.21.

<sup>142</sup> See the OFT's Report to the Secretary of State for Trade and Industry *Acquisition by British Sky Broadcasting Group plc of a 17.9 per cent stake in ITV plc* of 27 April 2007, available at [www.ofg.gov.uk](http://www.ofg.gov.uk).

<sup>143</sup> See the Final Report, paras 3.29–3.67, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>144</sup> *Ibid*, paras 3.39–3.57. <sup>145</sup> *Ibid*, paras 3.58–3.62.

<sup>146</sup> Case No 1095/4/8/08 *British Sky Broadcasting Group plc v Competition Commission* [2008] CAT 25, [2008] CompAR 223, paras 110–145.

<sup>147</sup> *Ibid*, paras 97–105. <sup>148</sup> *Mergers – Jurisdictional and procedural guidance*, para 3.19.

<sup>149</sup> *Ibid*, para 3.32.

<sup>150</sup> Enterprise Act 2002, s 26(4); for an example of the OFT finding no change of control when a company increased its minority shareholding to 50–60 per cent see *Fresh Trading Ltd/Coca-Cola Company*, decision of 11 May 2010.

<sup>151</sup> *Mergers – Jurisdictional and procedural guidance*, paras 3.33–3.36.

recognised that, in its substantive assessment of a merger, it should not treat the acquisition of material influence in the same way that it would treat *de facto* or *de jure* control<sup>152</sup>. Section 29 of the Act provides that, where a person acquires control in stages within a two-year period, those stages can be regarded as having occurred simultaneously on the date when the last of them occurred.

The Act does not define the period of time that a merger should last in order for it to qualify as a relevant merger situation. The OFT's *Jurisdictional and procedural guidance* provides guidance on temporary merger situations, such as 'break-up bids' and cases where a person incrementally builds up a stake in a target company<sup>153</sup>.

When deciding whether enterprises have come under common control or ownership, 'associated persons' and any companies which they control will be treated as one person; section 127(4) defines associated persons broadly and includes any individual, their partners, trustees and business partners<sup>154</sup>. Shareholders of a new joint venture are not necessarily treated as 'associated persons'; for this to be the case there must be evidence that they acted together to secure or exercise control of an enterprise<sup>155</sup>.

The award of a rail franchise under the provisions of the Railways Act 1993 qualifies as the acquisition of control for the purposes of section 23 of the Enterprise Act<sup>156</sup>.

## (ii) The turnover test

A merger can be investigated under the Enterprise Act only where it satisfies either the turnover test or the share of supply test. Section 23(1)(b) of the Act provides that a relevant merger situation has been created where the value of the turnover in the UK of the enterprise being taken over exceeds £70 million: the requirement that there must be turnover in the UK provides the jurisdictional nexus for the application of the Act. The OFT will keep the turnover threshold under review and advise the Secretary of State from time to time whether it is still appropriate<sup>157</sup>; the Secretary of State has power to amend the figure<sup>158</sup>. Section 28(2) provides that an enterprise's turnover shall be determined in accordance with an order to be made by the Secretary of State: the Enterprise Act 2002 (Merger Fees and Determination of Turnover) Order 2003<sup>159</sup> explains how turnover is to be calculated for the purpose both of the turnover test and the calculation of any merger fees payable<sup>160</sup>. The OFT has published specific guidance on the application of the turnover test<sup>161</sup>. Turnover is calculated by adding together the turnover of the enterprise being taken over and that of any associated enterprises. The period by reference to which turnover is calculated is the business year preceding the date of completion of a merger or, in the case of anticipated mergers, the date of the OFT's decision whether to make a reference to the CC<sup>162</sup>.

<sup>152</sup> See paras 63 and 64 of the OFT's Report to the Secretary of State on *Acquisition by British Sky Broadcasting Group plc of a 17.9 per cent stake in ITV plc* of 27 April 2007; see further OFT/CC Merger Assessment Guidelines, fn 34.

<sup>156</sup> See the Final Report in *Firstgroup plc/Scotrail*, para 3.12, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk); several instances of the award of rail franchises have led to CC references: see 'Table of merger references to the Competition Commission' at pp 952–953 below.

<sup>157</sup> Enterprise Act 2002, s 28(5).

<sup>158</sup> *Ibid*, s 28(6).

<sup>159</sup> SI 2003/1370.

<sup>160</sup> On merger fees see 'Fees', pp 928–929 below.

<sup>161</sup> See Annexe B to the OFT's *Mergers – Jurisdictional and procedural guidance*.

<sup>162</sup> *Mergers – Jurisdictional and procedural guidance*, Annexe B, paras B.7–B.10.

### (iii) The share of supply test

Section 23(2)(b) of the Enterprise Act provides that a relevant merger situation has been created where the merged enterprises supply or acquire 25 per cent or more of a particular description of goods<sup>163</sup> or services<sup>164</sup> in the UK or a substantial part of it; the supply of services includes permitting or making arrangements to permit the use of land for various purposes such as caravan sites or car parks<sup>165</sup>. The share of supply test requires an *increment* in the share of supply, no matter how small that increment may be<sup>166</sup>. An obvious corollary of this is that the share of supply test does not apply to non-horizontal mergers<sup>167</sup>. The share of supply test enables a merger to be investigated which could give rise to competition problems even though the turnover threshold of £70 million is not achieved: this may be necessary in the case of narrowly-defined product markets or small geographic markets. The OFT (and the CC) has a discretion in determining whether goods or services are of the same description and whether the 25 per cent threshold is achieved<sup>168</sup>, in relation to which it can use value, cost, price, quantity, capacity, number of workers or any other criteria considered appropriate<sup>169</sup>.

To determine whether the share of supply test is met the OFT will have regard to any reasonable description of a set of goods or services<sup>170</sup>; this will often be a standard recognised by the industry in question, although this will not always be the case. The OFT may also consider different forms of supply, for example the wholesale or resale of goods<sup>171</sup>. When deciding whether the share of supply test is satisfied the OFT is not required to define the relevant product or geographic markets in accordance with the small but significant non-transitory increase in price ('SSNIP') test<sup>172</sup>: the share of supply test is jurisdictional, and does not require a full market analysis. The OFT has stated that it does not believe that it is necessary to show a nexus between the area in which an SLC is identified and the area in which the share of supply test is satisfied<sup>173</sup>. A review of the OFT's case lists of merger decisions on its website reveals that there are quite a large number of cases in which jurisdiction over a particular merger arises from the parties' share of supply<sup>174</sup>.

In determining whether the share of supply test is satisfied in relation to a substantial part of the UK the OFT (and the CC) will be guided by the judgment of the House of Lords (now the Supreme Court) in *South Yorkshire Transport v Monopolies and Mergers Commission*<sup>175</sup> which held (under analogous provisions in the Fair Trading Act 1973) that the part must be of such size, character and importance as to make it worth consideration for the purpose of merger control. According to the OFT, among the factors to be taken into account in deciding whether the merger is 'worth' consideration and can therefore be referred are the size of the specified area, its population, its social, political, economic, financial and geographic significance, and whether it has any particular characteristics that might render it special or significant<sup>176</sup>. The CC applied the *South Yorkshire* test in

*Archant/Independent News and Media* in determining that the acquisition of some local newspapers, in different localities that were not contiguous, occurred in a substantial part of the UK<sup>177</sup>, and in *Arriva/Sovereign Bus and Coach Company*<sup>178</sup> when reaching the same conclusion in relation to bus services in Hertfordshire.

#### (iv) Time limits and prior notice

A reference of a completed merger cannot be made if the enterprises ceased to be distinct more than four months prior to the reference to the CC<sup>179</sup> or, if later, more than four months before notice was given to the OFT of the merger or the fact of the merger became publicly known<sup>180</sup>. In certain circumstances these time limits can be extended<sup>181</sup>. In January 2011 the OFT considered that the time limits for reaching a decision on the acquisition of Ryanair's minority shareholding in Aer Lingus during 2006 did not begin to run until appeals against the European Commission's decisions relating to Ryanair's bid for Aer Lingus had been concluded<sup>182</sup>. The CAT dismissed an appeal by Ryanair against this finding<sup>183</sup>.

Section 27 deals with the question of when enterprises cease to be distinct, in particular where ownership or control is obtained over a period of time. Section 27(2) provides that mergers are treated as having been completed when all the parties to a transaction became contractually bound to proceed: the existence of options or other conditions are irrelevant until the option is exercised or the condition satisfied<sup>184</sup>. Where ownership or control has been acquired incrementally over a period of time through a series of transactions they can be treated as having occurred on the date of the last transaction, subject to a two-year cut-off period<sup>185</sup>. In *Archant/Independent News and Media* the CC rejected Archant's argument that the reference had been made outside the four-month statutory period; it also concluded that two successive transactions should be regarded as having occurred on the date of the later of the two<sup>186</sup>.

### (D) OFT procedure

Having explained the OFT's functions in relation to completed and anticipated mergers, it is important to consider how it exercises its functions up to the point of making a reference to the CC. There is no duty to pre-notify mergers under UK law, although there is a legal basis for making a notification using a 'statutory merger notice'<sup>187</sup>; alternatively the parties may make an 'informal submission' to the OFT. In practice many firms do approach the OFT prior to a transaction in order to discuss the application of the Act to it. If the parties to a transaction go ahead without discussing the matter with the OFT

<sup>177</sup> See the Final Report, Appendix C, paras 23–31, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>178</sup> See the Final Report, paras 3.10–3.14, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk); see similarly the Final Report in *Tesco/Co-Op store acquisition in Slough*, para 4.6, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>183</sup> Case No 1174/4/1/11 *Ryanair Holdings plc v OFT* [2011] CAT 23; Ryanair has appealed to the Court of Appeal.

<sup>184</sup> Enterprise Act 2002, s 27(3).

<sup>185</sup> *Ibid*, ss 27(5) and 27(6); on this point see *Mergers – Jurisdictional and procedural guidance*, para 3.47 and the decisional practice cited therein.

<sup>186</sup> See the Final Report, Appendix C, paras 17–22, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>187</sup> Enterprise Act 2002, s 96; see 'Notification using a statutory merger notice', pp 924–925 below.

they run the risk that their completed merger might be detected by the OFT and referred to the CC; this does happen fairly frequently, and on some occasions the CC has required a divestiture of assets that had already been acquired<sup>188</sup>. Useful guidance on the OFT's procedures will be found in its *Jurisdictional and procedural guidance*<sup>189</sup>.

**(i) Notifying mergers to the OFT**

**(A) *The OFT's market intelligence function***<sup>190</sup>

The OFT gathers intelligence about merger activity from monitoring the press, liaising with other public bodies and listening to third party complainants. In cases where a merger is not notified, but the OFT learns about it by other means, it will send an 'enquiry letter' if there is a reasonable prospect that it is under a duty to make a reference. A copy of a standard enquiry letter is available on the OFT's website<sup>191</sup>.

**(B) *Informal advice***<sup>192</sup>

The OFT will provide informal advice only where the parties can demonstrate a good faith intention of proceeding with a transaction: hypothetical advice will not be given; nor will informal advice be given in the case of a transaction that is already in the public domain. Informal advice will be given only where there is a genuine competition issue that could give rise to a reference to the CC: the OFT cannot be used to endorse the advice of professional advisers that a transaction gives rise to no competition problem. Parties seeking informal advice should submit an application to the OFT explaining why the transaction qualifies for such advice, the theory of harm and the issues on which advice is sought. When the OFT provides informal advice in relation to a genuine competition issue it may provide advice on jurisdictional issues as well.

**(C) *Pre-notification discussions***<sup>193</sup>

The OFT encourages pre-notification discussions, which it considers to be beneficial both to the parties and to the OFT. Among the benefits are that the OFT team can be educated where markets are complex and/or unfamiliar and that the discussions can help to identify the information needed by the OFT. A draft notification document should be submitted to the OFT to facilitate pre-notification discussions, which are held in confidence.

**(D) *Notification using a statutory merger notice***<sup>194</sup>

Sections 96 to 100 of the Enterprise Act make provision for mergers that qualify for investigation under the Act to be pre-notified to the OFT: the advantage to the parties of a 'statutory merger notice' is that the OFT must make a decision whether to refer the case to the CC within 20 working days, with a maximum extension of a further ten working days if the filing is incomplete or a request for information is not complied with. There are no statutory time limits where the parties make an 'informal submission': in a case where time is of the essence, therefore, it may be attractive to invoke the statutory procedure. The OFT gives priority to dealing with cases notified under the statutory procedure because of its obligation to comply with the deadlines: in the case of a merger notice a merger is cleared if the OFT has not referred it to the CC within the statutory period. The procedure

<sup>188</sup> See 'Completed mergers', p 954 below.

<sup>189</sup> OFT 527, June 2009.

<sup>190</sup> *Mergers – Jurisdictional and procedural guidance*, paras 4.6–4.24.

<sup>191</sup> [www.of.gov.uk/shared\\_of/business\\_leaflets/general/enquiriesampleletter.pdf](http://www.of.gov.uk/shared_of/business_leaflets/general/enquiriesampleletter.pdf).

<sup>192</sup> *Mergers – Jurisdictional and procedural guidance*, paras 4.28–4.41.

<sup>193</sup> *Ibid*, paras 4.42–4.48.

<sup>194</sup> *Ibid*, paras 4.52–4.62.

may be used only to notify anticipated mergers in the public domain<sup>195</sup>. The OFT has the power to request a person who gives a merger notice to provide it with information<sup>196</sup>. A fee must be paid in advance when using this procedure, and the clock does not start until this has occurred<sup>197</sup>. Statutory merger notices must be made in the prescribed form<sup>198</sup>. The Enterprise Act 2002 (Merger Pre-notification) Regulations 2003<sup>199</sup> make further provision in relation to merger notices, and the procedure is explained in Annexe A of the OFT's *Jurisdictional and procedural guidance* and in an OFT leaflet *Prior notice of publicly proposed mergers*.

**(E) Informal submissions**<sup>200</sup>

Notwithstanding the fact that there is a system of statutory merger notices, companies and their professional advisers tend to make so-called informal submissions in relation to transactions that may give rise to competition concerns; unless time is of the essence, there is no particular advantage in the statutory procedure which, in practice, the OFT regards as best suited to straightforward cases. The OFT considers that informal submissions are equally acceptable as statutory ones. Although there is no statutory time limit for dealing with informal submissions<sup>201</sup>, in practice the OFT has an administrative timetable of 40 working days which it meets in most cases. In more complex cases the parties prefer the OFT to extend its administrative timetable beyond the 40-day period if this makes it possible to avoid a reference to the CC. The OFT will stop the administrative timetable where important information is not provided or is provided late<sup>202</sup>. The *Jurisdictional and procedural guidance* provides for an extension of time, at the request of the parties, for a period of up to ten working days. There is no prescribed form for making an informal submission; however the OFT's *Jurisdictional and procedural guidance* contains advice on the kind of information that should be submitted (below).

**(F) Fast track reference cases**<sup>203</sup>

Under a 'fast track' procedure certain cases can be dealt with by the OFT more quickly than is usual. The OFT may, at the request of the parties, accelerate the making of a reference to the CC in cases where it is satisfied that a reference must be made. This was done for the first time in 2011 in the case of *Thomas Cook/Cooperative Group/Midlands Cooperative Society*, a joint venture that the European Commission had referred back to the UK under Article 9(3)(b) of the EUMR<sup>204</sup>.

**(ii) Content of submissions**

Chapter 5 of the OFT's *Jurisdictional and procedural guidance* discusses the type of information that an informal submission should contain. This information falls broadly into three categories: general background information; jurisdictional information; and information that is necessary for a substantive assessment of the merger.

<sup>195</sup> Completed mergers can be notified only by filing an informal submission.

<sup>196</sup> Enterprise Act 2002, s 99(2). <sup>197</sup> See 'Fees', pp 928–909 below on the payment of fees.

<sup>200</sup> *Mergers – Jurisdictional and procedural guidance*, paras 4.63–4.70.

<sup>201</sup> There is a statutory time limit for the reference of completed mergers to the CC: Enterprise Act 2002, s 24; see 'Time limits and prior notice', p 923 above.

<sup>202</sup> *Mergers – Jurisdictional and procedural guidance*, paras 4.76–4.77.

<sup>203</sup> *Ibid*, paras 4.71–4.75.

<sup>204</sup> See OFT Press Release 28/11, 2 March 2011, the joint venture was cleared by the CC: see CC News Release 44/11, 16 August 2011.

### (iii) The assessment process

Chapter 6 of the OFT's *Jurisdictional and procedural guidance* explains how it goes about its assessment of mergers. The *Guidance* begins by discussing the gathering of supplementary information and the verification of it, which involves consultation with third parties<sup>205</sup>. The OFT's website lists the cases on which the OFT is inviting third party comments and names the responsible case officer<sup>206</sup>. Paragraphs 6.17 to 6.22 of the *Jurisdictional and procedural guidance* explain the OFT's rights and obligations as regards confidentiality. The circumstances in which the OFT may seek an initial undertaking or make an order to prevent pre-emptive action that might prejudice a reference to the CC are also explained<sup>207</sup>.

The *Jurisdictional and procedural guidance*<sup>208</sup> explains that in all cases there may be 'state-of-play' meetings between the parties and officials from the OFT; the purpose of these meetings is to inform the parties about the OFT's possible competition concerns. Cases that do not raise serious concerns are usually decided within the Mergers Group, although a clearance decision paper is prepared and circulated to other staff of the OFT. In complex or more problematic cases, where a reference might be made to the CC, the parties are sent an 'issues letter' setting out the relevant evidence and the core arguments for a reference; an issues letter is not a provisional decision or a statement of objections<sup>209</sup>. The parties are given an opportunity to respond, in writing or at an 'issues meeting', and in practice usually do both. It is not the OFT's practice to provide third parties with an opportunity to comment on the issues letter given time constraints and confidentiality. Thereafter a case review meeting ('CRM') will take place within the OFT: it is usually chaired by the Director of Mergers, and will be attended by those officials present at the issues meeting, potentially also with a representative from the Office of the Chief Economist, and, where appropriate, individuals in the Market Group with relevant expertise in a particular sector. An individual within the review group will be charged specifically with acting as a 'devil's advocate' at the CRM, to test the soundness of the case team's assessment and to argue the contrary position. After the CRM there is a separate decision meeting: the person who chaired the CRM will act as a rapporteur when briefing the person responsible for making the final decision: this is generally the Chief Executive of the OFT or a Senior Director. A provisional decision is taken at this meeting; the decision is then drafted, and becomes final when signed by the decision-maker. Notifying parties are contacted one hour before the public announcement of the decision and are informed of the timing and the nature of the decision. The decision is then publicly announced.

If an issues letter has been sent, but the OFT then decides not to make a reference to the CC, the Court of Appeal has said that it must be shown that the likelihood of an SLC has been removed and that the material relied on by the OFT can reasonably be regarded as dispelling the uncertainties highlighted by the issues letter<sup>210</sup>.

All decisions on public merger cases must be published; the text of the decision, once any business secrets have been removed, is placed on the OFT's website. The OFT informs the CC of cases that might be referred so that the CC is aware of potential work that is 'in the pipeline' and can prepare accordingly. Once a decision to refer is made the CC

<sup>205</sup> *Mergers – Jurisdictional and procedural guidance*, paras 5.2–5.11.

receives relevant documentation from the OFT; the staff of the two institutions meet at an early stage to discuss the handing-over of the case.

#### (iv) Ancillary restraints<sup>211</sup>

Mergers and 'any provision directly related and necessary to the implementation of the merger provisions' are excluded from the Competition Act 1998<sup>212</sup>. The OFT's treatment of ancillary restrictions generally follows the approach of the European Commission under the EUMR. It is for the parties to conduct a self-assessment of which restraints are ancillary. The OFT will not normally state in a clearance decision which restraints are ancillary: it will provide guidance only on novel or unresolved questions giving rise to genuine uncertainty.

#### (v) Undertakings in lieu of a reference

Section 73 of the Act gives power to the OFT to accept an undertaking in lieu of making a reference to the CC<sup>213</sup>. In doing so the OFT must have regard to the need to achieve as comprehensive a solution as is reasonable and practicable to the SLC and any adverse effects resulting from it<sup>214</sup>, taking into account any relevant customer benefits<sup>215</sup>. The OFT's *Guidance on undertakings in lieu*<sup>216</sup> contains a number of important insights on the law and practice of undertakings in lieu of a reference and is much more detailed than the previous guidance. The OFT considers that undertakings in lieu of a reference are appropriate only where 'the competition concerns raised by the merger and the proposed remedies to address them are clear cut'<sup>217</sup>. In *Co-operative Group (CWS) Ltd v OFT* the CAT held that the OFT cannot be expected to conduct a detailed investigation when exercising its power to accept undertakings in lieu of a reference<sup>218</sup>. The OFT's starting point is to seek undertakings that restore competition to the level that would have existed without the merger, although there may be cases in which it accepts a different outcome<sup>219</sup>. The *Guidance on undertakings in lieu* makes clear that the OFT has a strong preference for structural remedies<sup>220</sup>, such as divestitures, over behavioural ones, although the latter may be acceptable where a divestiture is clearly impractical or in mergers raising vertical concerns<sup>221</sup>. In some cases the OFT may insist on the parties securing a purchaser who has agreed to acquire the business to be divested before it accepts undertakings in lieu<sup>222</sup>; the OFT has required 'up-front buyers' in several cases<sup>223</sup>. The OFT will always bear in mind the proportionality of remedies<sup>224</sup>.

Useful guidance on the OFT's procedures for considering, accepting and implementing undertakings in lieu of a reference can be found in its *Jurisdictional and procedural guidance*. In many cases undertakings in lieu will be offered before or immediately after the issues meeting; the OFT may invite undertakings at this meeting<sup>225</sup>. In 'near miss'

<sup>220</sup> *Ibid*, paras 5.20 and 8.2.

<sup>221</sup> *Ibid*, para 5.43.

<sup>222</sup> *Ibid*, paras 5.31–5.37.

<sup>223</sup> See eg *Home Retail Group plc/Focus (DIY) Ltd*, OFT decision of 15 April 2008; *Global Radio UK/GCap Media plc*, OFT decision of 8 August 2008; and *Co-operative Group Ltd/Somerfield Ltd*, OFT decision of 20 October 2008.

<sup>224</sup> *Guidance on undertakings in lieu*, paras 5.14–5.19.

<sup>225</sup> *Mergers – Jurisdictional and procedural guidance*, para 8.10.

cases the OFT may ask the parties to reconsider their proposed remedies<sup>226</sup>. Where the OFT considers that undertakings are suitable, there will normally be a period of consultation of at least 15 days; a further period of consultation may take place in the event that the undertakings are modified<sup>227</sup>. If an undertaking in lieu is not accepted it is still possible for the OFT to refer the merger to the CC; the OFT did this for the first time in *Tesco/Slough Co-op store*<sup>228</sup>. If an undertaking in lieu has been accepted, it is not possible to make a reference to the CC, although the position is different if the OFT was not in possession of material facts at the time the undertaking was accepted. The OFT has power to make an order where the undertaking in lieu is not being fulfilled or where false or misleading information was given prior to the acceptance of the undertaking. There is also a power to make a supplementary interim order while the main section 75 order is being prepared; the same power is available to the CC.

Undertakings in lieu of a reference have been accepted by the OFT on a number of occasions: details of cases dealt with in this way are available on the OFT's website<sup>229</sup>. In most cases the undertaking was structural, typically to divest assets<sup>230</sup>. In *Aggregate Industries Ltd/Foster Yeoman Ltd* the OFT accepted undertakings in lieu that were intended to address not only non-coordinated but also coordinated effects, the first case of this kind<sup>231</sup>. The OFT accepted its largest ever remedies package in *Co-operative Group Ltd/Somerfield Ltd*, consisting of divestitures in 133 local areas in which the OFT had identified competition concerns<sup>232</sup>. There has been one occasion on which the OFT has accepted a quasi-structural remedy: in *Tetra Laval Group/Carlisle Process Systems* an undertaking was given to grant an irrevocable EEA-wide licence of a package of intellectual property rights to a third party, approved 'up-front' by the OFT, that would enable it to compete on the market for equipment used in the industrial manufacture of cheddar cheese<sup>233</sup>. An unusual remedy was accepted in *IVAX International GmbH/3M*, where the OFT was given a behavioural undertaking to limit the price of asthma inhalers until such time as competitive products emerged onto the market<sup>234</sup>.

#### (vi) Fees

Pursuant to section 121 of the Enterprise Act provision is made by the Enterprise Act 2002 (Merger Fees and Determination of Turnover) Order 2003<sup>235</sup> for the payment of fees in connection with the exercise of the functions of the OFT (and, exceptionally, the Secretary of State) in relation to mergers. Article 3 sets out the circumstances in which fees are payable, and Article 4 specifies certain cases in which fees are not payable. The level of fees – from £30,000 to £90,000, depending on the turnover of the enterprise taken over or to be

<sup>226</sup> *Ibid*, paras 8.18–8.23.

<sup>227</sup> *Ibid*, paras 8.24–8.30; the procedure varies in cases involving 'up-front buyers': see paras 8.31–8.35.

<sup>228</sup> OFT decision of 19 April 2007.

<sup>229</sup> See [www.of.gov.uk](http://www.of.gov.uk).

<sup>230</sup> See eg *Boots plc/Alliance UniChem plc*, OFT decision of 7 February 2006; note that the OFT's decision not to refer this case to the CC was the subject of an unsuccessful judicial review: Case No 1059/4/1/06 *Celesio AG v OFT* [2006] CAT 9, [2006] CompAR 515.

<sup>231</sup> OFT decision of 3 January 2007.

<sup>232</sup> OFT decision of 15 January 2009.

<sup>233</sup> OFT decision of 20 November 2006.

<sup>234</sup> OFT decision of 9 January 2004.

<sup>235</sup> SI 2003/1370.

taken over<sup>236</sup> – is set out in Article 5. Article 6 explains who must pay the fee<sup>237</sup>, and Article 7 provides an exemption for small and medium-sized enterprises. Article 8 provides that the fees are payable to the OFT and Article 9 establishes when the fees are payable. Provision is made for the repayment of fees in certain cases. Part 3 of the Order explains how turnover is to be calculated for the purpose of determining the appropriate level of the fee<sup>238</sup>. Further guidance on merger fees can be found in chapter 7 of the OFT's *Jurisdictional and procedural guidance*.

## 4. Determination of References by the CC

Once a reference has been made by the OFT to the CC section 35 of the Enterprise Act sets out the questions to be decided in relation to completed mergers and section 36 the questions in relation to anticipated mergers. Sections 38 and 39 deal with the reports of the CC and the time limits within which they must be produced. Section 41 requires the CC to take action to remedy any loss of competition.

### (A) Questions to be decided in relation to completed mergers

Section 35(1) of the Enterprise Act requires the CC to decide, first, whether a merger situation has been created<sup>239</sup> and secondly, whether, if so, the creation of that situation has resulted, or may be expected to result, in an SLC within any market or markets in the UK for goods or services<sup>240</sup>. The CC will always try to identify how the market would look if the merger were not to happen: in other words it will attempt to establish the 'counterfactual' in order to determine the extent of any SLC<sup>241</sup>. The CAT has endorsed the use of a 'counterfactual' as an analytical tool used to assist in answering the statutory questions<sup>242</sup>. The way in which the CC is likely to apply the SLC test is considered in section 5 below<sup>243</sup>. If the CC considers that there is an 'anti-competitive outcome'<sup>244</sup>, it must decide three additional questions: first, whether it should take remedial action<sup>245</sup>; secondly, whether it should recommend that anyone else should take remedial action<sup>246</sup>; and thirdly, if remedial action should be taken, what that action should be<sup>247</sup>. When considering remedial action the CC must have regard to the need to achieve as comprehensive a solution as is reasonable and practical to the SLC and any adverse effects resulting from it<sup>248</sup>, and may in particular have

<sup>236</sup> Note that the figures in the 2003 Order were increased by the Enterprise Act 2002 (Merger Fees) (Amendment) Order 2005, SI 2005/3558 and again by the Enterprise Act 2002 (Merger Fees) (Amendment) Order 2009, SI 2009/2396; in September 2009 the OFT published a leaflet, *Merger fee information*, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>237</sup> Note that Article 6(5) of the 2003 Order was repealed by Article 2(8) of the Enterprise Act 2002 (Merger Fees) (Amendment) Order 2005, SI 2005/3558.

<sup>238</sup> See 'The turnover test', p 921 above.

<sup>239</sup> Enterprise Act 2002, s 35(1)(a).

<sup>240</sup> *Ibid*, s 35(1)(b).

<sup>241</sup> See eg *Ticketmaster/Live Nation*, paras 6.1–6.102, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>243</sup> See 'The "Substantial Lessening of Competition" Test', pp 932–940 below.

<sup>244</sup> This term is defined in Enterprise Act 2002, s 35(2).

<sup>245</sup> *Ibid*, s 35(3)(a).

<sup>246</sup> *Ibid*, s 35(3)(b).

<sup>247</sup> *Ibid*, s 35(3)(c).

<sup>248</sup> *Ibid*, s 35(4).

regard to the effect of any action on any relevant customer benefits<sup>249</sup>. If the CC finds that there is no anti-competitive outcome, no question of considering remedies arises.

## (B) Questions to be decided in relation to anticipated mergers

Section 36 requires the CC to decide similar questions in relation to anticipated mergers, with the necessary linguistic adjustments to address the fact that such mergers are yet to be completed.

## (C) Investigations and reports

Section 37 of the Enterprise Act contains provisions for the cancellation and variation of references by the OFT or the CC, for example where a referred merger has been abandoned: as will be seen from the Table of merger references later in this chapter, a significant number of mergers are abandoned following reference to the CC<sup>250</sup>. Section 38(1) of the Act requires the CC to prepare and publish a report within the period permitted by section 39. Section 39(1) requires the CC to do so within 24 weeks of the date of the reference, a longer period than the 90 working days available to the European Commission in a Phase II case under the EUMR<sup>251</sup>. The 24-week period may be shorter where this is necessary to comply with Article 9(6) of the EUMR<sup>252</sup>; and may be extended by no more than eight weeks where there are ‘special reasons’ for doing so<sup>253</sup>, or where there has been a failure to comply with a requirement of a notice under section 109<sup>254</sup>. The CC has extended the inquiry period on several occasions<sup>255</sup>; for example it extended the period in the case of two bids for the London Stock Exchange in 2005 due to the ‘exceptional complexity’ of the inquiry<sup>256</sup>.

The time limits in section 39 may be reduced by the Secretary of State<sup>257</sup>. The report must contain the decisions of the CC on the questions to be decided under section 35 or 36, its reasons for those decisions and such information as the CC considers appropriate for facilitating a proper understanding of those questions and its reasons for its decisions<sup>258</sup>. In the CAT’s view the duty to give reasons has three main purposes: to allow interested persons to know the justification for the decision; to enhance public confidence in the decision-making process; and to concentrate the mind of the decision-maker<sup>259</sup>.

The implementation of remedies following the CC’s report does not have to be completed within the statutory period for the investigation, and may be quite protracted; the

group of CC members conducting an inquiry will be discharged only when the remedies have been finally accepted.

#### **(D) Duty to remedy the anti-competitive effects of completed or anticipated mergers**

Where the CC has prepared and published a report under section 38 within the time limits established by section 39 and has concluded that there is an anti-competitive outcome section 41(2) requires it to take such action as it considers to be reasonable and practicable to remedy, mitigate or prevent the SLC and any adverse effects of it<sup>260</sup>. In doing so the CC must be consistent with the decisions in its report on the questions it is required to answer, unless there has been a material change of circumstances since the preparation of the report or the CC has a special reason for deciding differently<sup>261</sup>. In making its decision under section 41(2) the CC must have regard to the need to achieve as comprehensive a solution as is reasonable and practicable to the SLC and any resulting adverse effects<sup>262</sup>.

#### **(E) CC procedure**

The procedures of the CC during merger references are set out in its *Rules of Procedure*<sup>263</sup> and the *Chairman's Guidance to Groups*<sup>264</sup>. When a reference is made the Chairman will appoint members of the CC to a group, consisting of a minimum of three, though usually four or five, who will carry out the inquiry. Rule 6 of the *Rules of Procedure* requires the CC to draw up an administrative timetable for its investigation. The CC has wide-ranging investigatory powers to enable it to carry out its investigation effectively<sup>265</sup>, and can impose penalties for non-compliance<sup>266</sup>. The major stages of an investigation include the gathering and verification of evidence; providing a statement of issues; notifying provisional findings<sup>267</sup>; notifying and considering possible remedies; the publication of the final report; and deciding on remedies. Hearings will be held with third parties and with the main parties to the proceedings; where appropriate there will also be hearings on remedies. Often the CC visits appropriate facilities of the merging parties in order better to understand the context of the merger. Each investigation has its own home page on the CC's website, and it is a simple matter to follow the progress of the investigation in this way. This accords with the CC's aim to be open and transparent in its working<sup>268</sup>. The home page sets out the core documents of the inquiry; contains the CC's announcements, for example on its provisional findings, possible remedies and its final report; and makes available the parties' responses to the CC's questionnaires, third party submissions, consumer reports and comments on draft remedies.

## 5. The 'Substantial Lessening of Competition' Test

The Enterprise Act subjects mergers to an SLC test. This section considers how the OFT and the CC apply the SLC test in practice.

### (A) Publication of merger guidelines

Section 106(1) of the Enterprise Act requires the OFT and the CC to publish general advice and information about the making and assessment of merger references. When the Act entered into force in June 2003 the OFT and CC each published their own guidance on the substantive assessment of mergers<sup>269</sup>; these were replaced in September 2010 by a single publication, *Merger Assessment Guidelines*<sup>270</sup> ('the *Assessment Guidelines*'): a welcome development. The *Assessment Guidelines* discuss the approach of the OFT and the CC to the SLC test, including an explanation of the concepts of 'theories of harm' and the 'counterfactual'<sup>271</sup>. The *Guidelines* then deal in turn with market definition; measures of concentration; unilateral and coordinated effects of horizontal mergers; non-horizontal mergers; efficiencies; barriers to entry and expansion; and countervailing buyer power. This section will follow the same sequence. The OFT and CC say that they will have regard to the *Assessment Guidelines* but will apply them flexibly, departing from them where appropriate.

### (B) A substantial lessening of competition

#### (i) What is an SLC?

The Act does not define an SLC. The *Assessment Guidelines* explain that a merger gives rise to an SLC when it has a significant effect on rivalry over time, thereby reducing the competitive pressure on firms to improve their offer to customers or become more efficient or innovative<sup>272</sup>. There are three main reasons why mergers may lead to an SLC: unilateral effects; coordinated effects; and vertical or conglomerate effects: these theories of harm were explained in chapter 20<sup>273</sup>. A merger that gives rise to an SLC will be expected to lead to an adverse effect for customers<sup>274</sup>.

#### (ii) Theories of harm

The OFT and CC devise a theory or theories of harm in order to provide a framework for assessing the effects of a merger<sup>275</sup>. A theory of harm describes possible changes arising from the merger and compares any impact on rivalry and expected harm to customers as compared with the situation likely to arise without the merger<sup>276</sup>. The CC's assessment of the effects of a merger is not limited by the OFT's conclusions on a theory (or theories) of harm<sup>277</sup>.

<sup>269</sup> *Mergers – Substantive assessment guidance* OFT 516, May 2003 and *Merger References: Competition Commission Guidelines* CC2, June 2003.

<sup>270</sup> CC2 Revised, OFT 1254, September 2010.

<sup>271</sup> Part 3 of the *Guidelines* also briefly discuss the concept of a relevant merger situation.

<sup>272</sup> *Assessment Guidelines*, para 4.1.3.

<sup>273</sup> See ch 20, 'Theories of competitive harm', pp 818–821.

<sup>274</sup> *Assessment Guidelines*, para 4.1.3.

<sup>275</sup> *Ibid*, para 4.2.1.

<sup>276</sup> *Ibid*.

<sup>277</sup> *Ibid*, para 4.2.6.

**(iii) The counterfactual****(A) The approach to the counterfactual**

The application of the SLC test involves a comparison of the prospects for competition with the merger against the situation without the merger: the 'counterfactual'<sup>278</sup>. The counterfactual is affected by the extent to which events and their consequences are foreseeable, but does not suppose infringements of competition law will occur. The OFT generally adopts the prevailing conditions of competition as the counterfactual, whereas the CC selects the most likely future situation in the absence of the merger<sup>279</sup>. The need to examine the counterfactual was emphasised by the CAT in *Stagecoach Group v Competition Commission*<sup>280</sup>, where it held that a CC decision finding that a merger would create a monopoly for local buses in Preston as the CC's choice of counterfactual was not supported by the evidence<sup>281</sup>. Paragraph 4.3.6 of the *Assessment Guidelines* describes three situations in which the OFT and the CC may use a counterfactual other than the prevailing conditions of competition; they are 'the exiting firm scenario', commonly referred to as the so-called 'failing firm defence'; 'the loss of potential entrant scenario'; and the situation where there are competing bids and parallel transactions<sup>282</sup>.

**(B) The exiting firm scenario**

If a firm were to exit the market, irrespective of the merger under consideration, that merger would not be the cause of any SLC. Paragraph 4.3.8 of the *Assessment Guidelines* says that three considerations are relevant to an assessment of the exiting firm scenario:

- first, whether the firm would have exited the market either because of financial difficulties or for another reason, such as, for example, a change in the corporate strategy of the selling firm
- secondly, whether there would have been an alternative purchaser for the firm or its assets and
- thirdly, what would have happened to the sales of the firm in the event of it leaving the market?

The exiting firm scenario has been accepted by the OFT in a small number of cases<sup>283</sup>; the OFT requires compelling evidence that the acquired firm would leave the market and that there is no less anti-competitive purchaser for the firm or its assets<sup>284</sup>.

The CC will generally consider the three 'exiting firm' considerations as part of its SLC analysis<sup>285</sup>: in *British Salt Ltd/New Cheshire Salt Works* the CC concluded that British Salt's acquisition of New Cheshire Salt Works would not result in an SLC since the latter would have closed in the foreseeable future due to large increases in actual and projected

<sup>278</sup> Ibid, paras 4.3.1–4.3.29; for further discussion see Davis and Cooper 'On the Use of Counterfactuals in Merger Inquiries', 28 April 2010, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>279</sup> *Assessment Guidelines*, paras 4.3.5–4.3.6.

<sup>280</sup> Case No 1145/4/8/09 [2010] CAT 14, [2010] CompAR 267. <sup>281</sup> Ibid, paras 37–133.

<sup>282</sup> See further *Assessment Guidelines*, paras 4.3.8–4.3.27; the award of rail franchise awards is a further example: *ibid*, para 4.3.28–4.3.29.

<sup>283</sup> See eg the OFT decisions in *First West Yorkshire/Black Prince Buses*, 26 May 2005; *Tesco/Kwik Save stores*, 11 December 2007; *CDMG/Ferryways and Searoad Stevedores*, of 24 January 2008; *Home Retail Group plc/Focus DIY stores (one store only)*, 15 April 2008; *HMV plc/Zavvi*, 28 April 2009; for comment see Broadhurst 'Succeeding to Fail: HMV/Zavvi and Other Stories' (2010) 9(1) *Competition Law Journal* 65.

<sup>284</sup> *Assessment Guidelines*, para 4.3.10.

<sup>285</sup> See eg *Stagecoach/Scottish Citylink*, paras 5.9–5.56; *Thermo Electron Manufacturing Ltd/GV Instruments Ltd*, paras 6.1–6.25; *Holland & Barrett/Julian Graves*, paras 4.4–4.14, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

energy prices: an interesting point about this case is that the CC changed its position between its provisional and its final determination<sup>286</sup>. Similarly, in *Long Clawson Dairy Ltd/Millway* the CC found that Millway was a failing firm and that if Long Clawson had not purchased the business, Dairy Crest would have closed it down<sup>287</sup>. In *STS/Butlers* the CC accepted arguments that the merger would not result in an SLC because the vendor would have closed the acquired business in any event for commercial and strategic reasons (rather than financial difficulties)<sup>287a</sup>.

### (C) Market definition

The *Assessment Guidelines* explain that market definition, though not an end in itself, provides a framework for the analysis of the competitive effects of the merger<sup>288</sup>. Market definition and the assessment of effects should not be viewed as distinct analyses and may overlap in practice<sup>289</sup>. The *Guidelines* say that in defining markets the OFT will usually make an initial assessment but may not reach a conclusion; whereas the CC will usually reach a conclusion: this difference reflects their respective roles under the Act<sup>290</sup>. The *Guidelines* explain that the relevant market contains the most significant competitive alternatives available to the customers of the merged firms and includes the sources of competition to the merging firms that are the immediate determinants of the effects of the merger<sup>291</sup>. The *Guidelines* explain the methodology for market definition and in particular the ‘hypothetical monopolist test’<sup>292</sup>; among the factors that will be considered are the ‘closeness’ of substitution, that is to say the intensity of competition between products, the variable profit margins of the products and the sensitivity of customers to changes in price.

### (D) Measures of concentration

The *Assessment Guidelines* explain that, as part of their assessment of the effects of a merger, the OFT and the CC may use measures of concentration<sup>293</sup>. There are several ways in which concentration can be measured: market shares; number of firms; concentration ratios; and the Herfindahl-Hirschman Index (‘HHI’)<sup>294</sup>. When interpreting these measures the OFT and the CC may have regard to the extent to which products are differentiated; changes in concentration over time; how widely the market is defined; and the level of variable profit margins<sup>295</sup>. The OFT says that it may have regard to the following market share and concentration thresholds<sup>296</sup>:

- it is unlikely to be concerned about unilateral effects in a market where products are undifferentiated and where the post-merger market share is less than 40 per cent

<sup>286</sup> See the Final Report, paras 5.28 and 6.1, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>287</sup> See the Final Report, paras 6.26–6.76, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>287a</sup> See the Final Report, paras 5.8–5.45, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>288</sup> *Assessment Guidelines*, paras 5.2.1–5.2.2. <sup>289</sup> *Ibid*, para 5.1.1.

<sup>290</sup> *Ibid*, para 5.2.4; the term ‘definition of the relevant market’ should be understood with this difference in mind.

<sup>291</sup> *Assessment Guidelines*, para 5.2.1.

<sup>292</sup> *Ibid*, paras 5.2.9–5.2.20; on the tests for defining the relevant market see ch 1, ‘Market definition’, pp 27–42.

<sup>293</sup> *Ibid*, paras 5.3.1–5.3.6.

<sup>294</sup> *Ibid*, para 5.3.4; for further discussion see ch 1, ‘Market concentration and the Herfindahl-Hirschman Index’, pp 43–44.

<sup>295</sup> *Assessment Guidelines*, para 5.3.2. <sup>296</sup> *Ibid*, para 5.3.5.

- it is unlikely to be concerned about mergers that reduce the number of firms from five to four (or above)
- a market with a post-merger HHI of more than 2,000 may be regarded as highly concentrated; however horizontal mergers that result in a change of the concentration level of less than 150 are unlikely to give rise to competition concerns
- a market with a post-merger HHI of more than 1,000 may be regarded as concentrated; horizontal mergers that result in a change of less than 250 are unlikely to be problematic.

The OFT adds that the HHI thresholds may be most informative for mergers in a market where the product is undifferentiated and where firms compete on output; this is based on the insights of an economic model of oligopolistic markets<sup>297</sup>. The OFT also says that it may have regard to the thresholds used by the European Commission in its *Guidelines on the assessment of non-horizontal mergers*<sup>298</sup>.

## (E) Horizontal mergers

### (i) Unilateral effects

The *Assessment Guidelines* discuss the problem of unilateral effects arising from mergers<sup>299</sup>. Unilateral effects may arise where a merged firm finds it profitable to increase prices (or reduce output or quality) as a result of the loss of competition between the merged parties<sup>300</sup>. The *Guidelines* deal in turn with four theories of harm giving rise to unilateral effects: loss of existing competition<sup>301</sup>; the elimination of potential competition<sup>302</sup>; increased buyer power<sup>303</sup>; and the vertical effects arising from horizontal mergers<sup>304</sup>.

The *Guidelines* explain the theory of harm relating to the loss of existing competition separately for mergers with undifferentiated products and differentiated products<sup>305</sup>; this distinction is based on economics and reflects the importance of product differentiation – for example by brand or quality – for the way in which competition concerns may arise<sup>306</sup>. There is an extensive literature on this subject<sup>307</sup> and a common criticism has been that market shares are an imperfect proxy for competition concerns in markets where products are highly differentiated. The more important issue in such markets is the ‘closeness of substitution’ between products: the higher the degree of substitutability between the merging firm’s products, the closer the competition between them would

<sup>297</sup> Ibid, para 5.3.5, third indent.

<sup>298</sup> *Assessment Guidelines*, para 5.3.5, first indent; on the Commission’s *Non-horizontal guidelines* see chapter 21, ‘Commission Notices and Guidelines’, p 831.

<sup>299</sup> *Assessment Guidelines*, paras 5.4.1–5.4.21; the expression ‘non-coordinated effects’ is sometimes used as an alternative for unilateral effects.

<sup>300</sup> *Assessment Guidelines*, para 5.4.1.

<sup>301</sup> Ibid, paras 5.4.4–5.4.12.

<sup>302</sup> Ibid, paras 5.4.13–5.4.18.

<sup>303</sup> Ibid, paras 5.4.19–5.4.21.

<sup>304</sup> Ibid, paras 5.4.22–5.4.23.

<sup>305</sup> The distinction between differentiated and undifferentiated products is one of degree and ought not to be treated too literally.

<sup>306</sup> See similarly the *US Horizontal Merger Guidelines*, August 2010, section 6.1, available at [www.justice.gov](http://www.justice.gov); for further discussion see Bishop and Walker *The Economics of EC Competition Law* (Sweet & Maxwell, 3rd ed, 2010), paras 7-017–7-036.

<sup>307</sup> See eg Chamberlin ‘Product Heterogeneity and Public Policy’ (1950) *American Economic Review* 86; Farrell and Shapiro ‘Horizontal Mergers: An Equilibrium Analysis’ (1990) *American Economic Review* 107; Werden ‘A Robust Test for Consumer Welfare Enhancing Mergers Among Sellers of Differentiated Products’ (1996) *Journal of Industrial Economics* 409; Werden and Froeb ‘Unilateral Competitive Effects of Horizontal Mergers’ in Buccirosi (ed) *Handbook Of Antitrust Economics* (MIT Press, 2008) and Shapiro ‘The 2010 Horizontal Merger Guidelines: From Hedgehog to Fox in Forty Years’ (2011) *77 Antitrust Law Journal* 701.

have been without the merger and the more likely it will be that the merger will give rise to unilateral effects<sup>308</sup>. It may be necessary for the OFT and the CC to analyse the change in the pricing incentives of the merged firms resulting from bringing their products under common control<sup>309</sup>. The potential response of other suppliers to any attempt by the merged firm to increase price can also have an effect on pricing incentives. In some cases not only the merging parties, but also their rivals, may be able to share the benefit of greater post-merger profitability: this is a reference to the ‘problem’ of non-collusive oligopoly referred to in chapter 21<sup>310</sup>.

The *Assessment Guidelines* adopt a different approach to mergers involving undifferentiated or homogenous products and set out a series of factors which make unilateral effects more likely in such cases<sup>311</sup>:

- the market is concentrated
- there are a few firms in the affected market after the merger
- the merged firm has a large market share
- there are weak competitive constraints from rivals
- the merger eliminates a significant competitive force in the market and
- customers have little choice of alternative supplier perhaps as a result of switching costs or network effects.

Most of the CC’s investigations have been concerned with the unilateral effects of horizontal mergers. In *Game Group plc/Games Station Ltd* the CC concluded that the merged firm would not be able unilaterally to raise prices profitably as it would face competition from a number of alternative retailers; two of the four CC members entered a dissenting opinion in this case<sup>312</sup>. The CC required remedies because of unilateral effects in several cases in 2009 and 2010<sup>313</sup>.

## (ii) Coordinated effects

The *Assessment Guidelines* discuss the problem of coordinated effects arising from mergers<sup>314</sup>. They begin by explaining the differences between explicit and tacit coordination, both of which can be germane to the substantive analysis<sup>315</sup>. It is necessary to consider evidence of pre-existing coordination and the characteristics of the market<sup>316</sup>. Paragraph 5.5.9 of the *Assessment Guidelines* says that there are three necessary conditions for coordination to be possible:

- first, firms must be able to reach and monitor the terms of coordination
- secondly, coordination needs to be ‘internally sustainable’: firms must have the incentive to coordinate and the existence of an effective mechanism to punish and deter cheating and

<sup>308</sup> *Assessment Guidelines*, para 5.4.6.

<sup>309</sup> *Ibid*.

<sup>310</sup> *Ibid*, para 5.4.11; see further ch 21, ‘The non-collusive oligopoly gap’, pp 864–866.

<sup>311</sup> *Assessment Guidelines*, paras 5.4.4–5.4.5; the importance of these factors will depend on the particular facts of each case.

<sup>312</sup> [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>313</sup> See ‘Table of merger references to the Competition Commission’, pp 952–953 below.

<sup>314</sup> *Assessment Guidelines*, paras 5.5.1–5.5.19.

<sup>315</sup> *Ibid*, para 5.5.3; the problem of tacit coordination in oligopolistic markets was discussed in detail in chapter 14, to which the reader is referred.

<sup>316</sup> *Assessment Guidelines*, paras 5.5.5–5.5.9.

- thirdly, coordination needs to be 'externally sustainable', implying the absence of effective competitive constraints.

Each of these conditions is explored further in succeeding paragraphs of the *Guidelines*<sup>317</sup>. The OFT and the CC will consider the impact of the merger on the likelihood and effectiveness of coordination<sup>318</sup>. There have not been many cases under the Enterprise Act in which the OFT and/or the CC have considered coordinated effects in detail. As already noted, the OFT accepted undertakings in lieu of a reference to the CC in *Aggregate Industries Ltd/Foster Yeoman Ltd*, partly because of concerns about coordinated effects<sup>319</sup>; it did so for the same reason in *Lloyds Pharmacy Ltd/Independent Pharmacy Care Centres plc*<sup>320</sup>. The CC was primarily concerned with the possibility that the merger in *DS Smith/LINPAC Containers* might lead to coordinated effects but concluded that, even though the conditions for achieving coordination might be present on the market, smaller suppliers would have the incentive to respond to any increase in the price of corrugated cardboard sheet by expanding output through existing and new capacity; the CC also rejected the suggestion that the acquisition of LINPAC would remove a maverick from the market<sup>321</sup>. The CC found in *Napier Brown Foods plc/James Budgett Sugars Ltd* that coordinated effects probably were occurring in the market for industrial sugar in Great Britain prior to the merger, but that the merger would not make any coordinated effects more sustainable or effective<sup>322</sup>. In *Wienerberger Finance Service BV/Baggeridge Brick plc* the OFT was concerned about a merger in the market for the supply of clay bricks that would reduce the number of major firms from four to three, but the CC decided that the conditions for coordination were not met and that the merger would not make coordination more likely<sup>323</sup>. The OFT was worried about a three to two merger in the wholesale supply of books to independent book retailers in *Woolworths Group plc/Bertram Group Ltd*; the CC decided to give the merger unconditional clearance<sup>324</sup>. In *BOC/Ineos* the OFT considered that the merger could facilitate tacit coordination between the merged firm and its only remaining competitor<sup>325</sup>; the CC blocked the merger on other grounds<sup>326</sup>.

## (F) Non-horizontal mergers

Section 5.6 of the *Assessment Guidelines* discusses vertical and conglomerate mergers. The *Guidelines* acknowledge that non-horizontal mergers can lead to efficiencies which may result in the merged firm competing more vigorously<sup>327</sup>. They state that it is a 'well-established principle' that most non-horizontal mergers do not raise competition concerns<sup>328</sup>, although they may weaken rivalry and result in an SLC under certain conditions.

<sup>317</sup> Ibid, paras 5.5.10–5.5.18.

<sup>318</sup> Ibid, para 5.5.19.

<sup>322</sup> See the Final Report, paras 5.44–5.63, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>323</sup> See the Final Report, paras 7.9–7.114, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>324</sup> See the Final Report, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>325</sup> OFT decision of 29 May 2008.

<sup>326</sup> [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>327</sup> *Assessment Guidelines*, para 5.6.4.

<sup>328</sup> Ibid, para 5.6.1.

The theories of how rivalry may be weakened by non-horizontal mergers typically involve the merged firm harming the ability of its competitors to compete<sup>329</sup>. Paragraph 5.6.6 of the *Guidelines* provides that the OFT and the CC will typically frame their analysis by asking:

- Would the merged firm have the ability to harm its rivals, for example through raising prices or refusing to supply them?
- Would the merged firm find it profitable to behave in this manner?
- Would the overall effect of the merged firm's behaviour give rise to an SLC?

The analysis of the above questions may overlap in practice as relevant factors may affect the answer to more than one question. The *Guidelines* explain, by way of illustration, how these questions might be answered in relation to a vertical merger where the theory of harm relates to partial input foreclosure<sup>330</sup>.

The *Assessment Guidelines* briefly discuss other possible theories of harm arising from total foreclosure, customer foreclosure, conglomerate mergers, diagonal mergers<sup>331</sup> and coordinated effects. In particular they explain that a conglomerate merger could raise concerns if the merged entity were to sell complementary products at a price which, owing to the discounts that apply across the product range, is lower than the price charged when they are sold separately, thereby foreclosing competitors<sup>332</sup>. As in the case of vertical mergers, the OFT and the CC would consider the merged firm's ability and incentive to foreclose access to a market. In practice conglomeracy does not appear to have been a significant concern either for the OFT or the CC in cases under the Enterprise Act<sup>333</sup>.

The CC identified possible vertical issues in the case of *Deutsche Börse AG/London Stock Exchange plc*<sup>334</sup> and concluded that the acquisition of LSE by either Deutsche Börse or Euronext may be expected to lead to an SLC in the market for the provision of on-book trading services within the UK because of the ability and incentive to foreclose entry or expansion to other providers of trading services. Vertical problems were identified in *Railway Investments Ltd/Marcroft Holdings Ltd* which were remedied by a divestiture of some of Marcroft's freight wagon maintenance business<sup>335</sup>. In the case of *Ticketmaster/Live Nation* the CC investigated a merger between Ticketmaster, the largest ticket agent in the UK, and Live Nation, one of the largest promoters of live music events. The CC provisionally found that the merger would result in the loss of a new entrant, CTS Eventim, as an effective competitor in the ticketing market, but changed its mind in light of new evidence and arguments<sup>336</sup>. Eventim was dissatisfied with the clearance decision and applied to the CAT for a review; however the CC decided that it would reconsider the matter and asked the CAT to quash the final report

<sup>329</sup> *Ibid*, para 5.6.5.

<sup>330</sup> *Ibid*, paras 5.6.9–5.6.12.

<sup>333</sup> On the question of whether a merger might lead to behaviour that might be abusive under Article 102 TFEU and/or the Chapter II prohibition of the Competition Act 1998, see 'Relationship with Article 102', p 955 below.

<sup>334</sup> See the Final Report, paras 5.136–5.170, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>335</sup> See the Final Report paras 7.74–7.133, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>336</sup> [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

and refer the matter back to the CC<sup>337</sup>. The CC subsequently cleared the merger unconditionally<sup>338</sup>.

### (G) Efficiencies

Efficiencies may be relevant to merger analysis in two distinct ways: first, as part of the assessment of whether a merger gives rise to an SLC; secondly, in determining whether a merger generates 'relevant customer benefits' for the purpose of section 30 of the Act sufficient to offset any SLC. The *Assessment Guidelines* discuss the former<sup>339</sup> but not the latter<sup>340</sup>. For efficiencies to be considered as part of the competitive assessment the OFT and the CC consider that they must increase rivalry among the remaining firms in the market so that the merger does not result in an SLC<sup>341</sup>. The OFT requires the parties to prove, on the basis of compelling evidence, that the efficiencies are timely, likely and sufficient to prevent an SLC from arising and are merger-specific<sup>342</sup>. The CC expects the parties to demonstrate that the same criteria are met on the balance of probabilities. The *Guidelines* describe different types of supply-side efficiencies, such as cost savings, and demand-side efficiencies, such as pricing effects which arise when lowering the price of one product increases demand for it and other products that are used with it.

In *Global Radio UK Ltd/GCap Media plc*<sup>343</sup> the OFT took into account efficiency arguments in considering a merger between two radio stations and relied, for the first time, on evidence of efficiencies to conclude that there would not be an SLC in London advertising markets<sup>344</sup>. The OFT noted in particular that the evidential burden for demonstrating efficiencies should not be so high that it is impossible to meet, nor be so rigid and immutable as to be incapable of variation according to the context<sup>345</sup>. The OFT incorporated purchasing efficiencies into its analysis of unilateral effects in *Asda Stores Ltd/Netto Foodstores Ltd*, although this did not alter the number of markets in which an SLC was identified<sup>346</sup>. The CC concluded in *Ardagh International Holdings Ltd/Redfearn Glass Ltd* that the positive effect of the merger on rivalry would not offset the loss of a competitor<sup>347</sup>.

### (H) Barriers to entry and expansion<sup>1</sup>

The *Assessment Guidelines* point out that an important part of the analysis of a merger is a consideration of any barriers to entry or expansion faced by competitors<sup>348</sup>. Market power is unlikely to exist where there are low barriers to entry into and exit from the market<sup>349</sup>. In deciding whether entry or expansion might prevent an SLC the OFT and the CC will consider whether it would be likely, timely and sufficient<sup>350</sup>. Barriers to entry and expansion include<sup>351</sup>:

<sup>337</sup> Case 1150/4/8/10 *CTS Eventim AG v Competition Commission* [2010] CAT 7, [2010] CompAR 22.

<sup>339</sup> *Assessment Guidelines*, paras 5.7.1–5.7.18.

<sup>340</sup> See 'Customer benefits', pp 916–917 above.

<sup>341</sup> *Assessment Guidelines*, para 5.7.4.

<sup>342</sup> *Ibid.*

<sup>343</sup> OFT decision 8 August 2008; for comment see Didierlaurent and Stephanou 'UK Merger Control: Tuning into Efficiencies' (2010) 9(1) *Competition Law Journal* 55.

<sup>344</sup> OFT decision of 8 August 2008, paras 139–189; the OFT specifically relied on demand-side efficiencies as it was not satisfied that the cost savings were sufficient.

<sup>345</sup> *Ibid.*, para 145.

<sup>346</sup> OFT decision of 23 September 2010, paras 65–76.

<sup>347</sup> See the Final Report, paras 8.59–8.63, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>348</sup> *Assessment Guidelines*, para 5.8.1.

<sup>349</sup> See further ch 1, 'Market power', pp 42–45.

<sup>350</sup> *Assessment Guidelines*, para 5.8.3.

<sup>351</sup> *Ibid.*, para 5.8.5.

- **absolute advantages:** these exist where an incumbent firm owns or has access to important assets or resources which are not accessible to another firm: this could be the case, for example, where a system of regulation limits the number of firms that can operate on a market or where an existing firm has preferential access to essential facilities or owns intellectual property rights
- **intrinsic or structural advantages:** these arise from the technology, production or other factors required to establish an effective presence in the market
- **economies of scale:** the fact that a firm may need to enter or expand on a large scale can constitute a barrier to entry; even large-scale entry or expansion will generally be successful only if that firm expands the total market significantly or replaces an existing firm
- **strategic advantages:** these arise from being first into the market and may be a particular problem in markets which exhibit network effects.

The *Guidelines* provide insights into the way in which the OFT and the CC will assess the likelihood, timeliness and sufficiency of entry or expansion<sup>352</sup>. The OFT and the CC may consider entry or expansion within two years as timely, although they regard this issue as one that must be assessed on a case-by-case basis. In *Zipcar/Streetcar* the CC acknowledged that the merger would enable the merged firm to increase prices in the short term, but concluded that entry and expansion would be likely, timely and sufficient to prevent the merged firm from exercising market power in the medium to longer term and thus prevent an SLC<sup>353</sup>.

### (l) Countervailing buyer power

The *Assessment Guidelines* consider that countervailing buyer power could exist where a customer is able to use its negotiating strength to constrain the ability of a merged firm to increase prices; this is a factor that makes an SLC finding less likely<sup>354</sup>. An SLC is unlikely to arise where all the customers of the merged firm possess countervailing buyer power after the merger. In cases where only some customers have countervailing power, the OFT and the CC will look at the extent to which that power can be relied on to protect all customers<sup>355</sup>. The *Guidelines* set out various factors that affect the ability of buyers to constrain the power of a supplier, such as their ability to switch, the existence of alternative suppliers and the ability of buyers to either sponsor new entry or enter the supplier's market itself<sup>356</sup>. Any buyer power must remain effective following the merger<sup>357</sup>.

The buyer power of major retailers of carbonated soft drinks was a significant factor in the CC's clearance of the merger in *Cott Beverages Ltd/Macaw (Holdings) Ltd*<sup>358</sup>. However this argument did not succeed in the case of a merger between the UK's two principal suppliers of eggs in *Stonegate Farmers Ltd/Deans Food Group Ltd*<sup>359</sup>; rather, the CC was concerned that the merger would result in an SLC between the merging parties in the procurement of shell eggs<sup>360</sup>.

<sup>352</sup> *Ibid*, paras 5.8.8–5.8.13.

<sup>360</sup> *Ibid*, paras 6.93–6.102.

## 6. Enforcement

Chapter 4 of Part 3 of the Enterprise Act deals with the issue of enforcement. It begins by describing the initial undertakings and orders that the OFT may accept or impose and undertakings in lieu of a reference to the CC; it then sets out certain interim restrictions on dealings during the course of a merger inquiry, and concludes with the powers of the CC. Undertakings and orders are legally binding and enforceable in the courts<sup>361</sup>; section 89 of the Act makes clear that undertakings<sup>362</sup> may contain provisions that go beyond the order-making powers in Schedule 8.

Section 90 of the Act provides that Schedule 10 shall have effect when accepting 'enforcement' undertakings or making orders other than initial and interim orders. Schedule 10 establishes the procedural requirements that the OFT and CC must satisfy when they intend to accept, vary or release an undertaking or, as the case may be, make, vary or revoke an order; paragraphs 1 to 5 of the Schedule deal with the acceptance of undertakings and the making of orders; paragraphs 6 to 8 with their termination. The purpose of Schedule 10 is to require the OFT or the CC to set out clearly what they are proposing to do and the reasons for it<sup>363</sup>.

The OFT is required to maintain a register of undertakings and orders made under the merger provisions in the Enterprise Act; it is accessible to the public on the OFT's website<sup>364</sup>.

### (A) Initial undertakings and orders

#### (i) Initial undertakings and orders to prevent pre-emptive action

Under section 71 of the Act the OFT may accept an initial undertaking from the parties to a completed merger for the purpose of preventing 'pre-emptive action', that is to say action which might prejudice a merger reference or impede the taking of any action which may be justified by the CC's decision on the reference<sup>365</sup>. Such an undertaking can be accepted only where the OFT has reasonable grounds for suspecting that a 'relevant merger situation' has been, or may be, created<sup>366</sup>. There are provisions for such undertakings to cease to be in force<sup>367</sup>, and for their variation and release<sup>368</sup>. Provision also exists for the OFT to make an initial enforcement order where it has reasonable grounds for suspecting that a relevant merger situation has been created and that pre-emptive action is in progress or in contemplation<sup>369</sup>. An initial enforcement order may prohibit the doing of things that the OFT considers would constitute pre-emptive action; may impose obligations as to the carrying on of any activities or the safeguarding of assets; may appoint a trustee to conduct or supervise matters; and may require the provision of information<sup>370</sup>.

The OFT's *Mergers – Jurisdictional and procedural guidance*<sup>371</sup> explains its approach to initial undertakings and orders. The OFT will seek undertakings where the merger raises or is likely to raise competition concerns and where the circumstances of the case mean that initial undertakings are appropriate to prevent pre-emptive action<sup>372</sup>. Among the

<sup>361</sup> See 'Enforcement functions of the OFT', pp 948–949 below.

<sup>362</sup> 'Undertakings' includes undertakings in lieu of a reference, initial undertakings, interim undertakings and final undertakings.

<sup>363</sup> See further the CC's *General Advice and Information* CC4, March 2006, paras 7.23–7.31.

<sup>364</sup> Enterprise Act 2002, s 91; the OFT's website is [www.of.gov.uk](http://www.of.gov.uk). <sup>365</sup> *Ibid*, s 71(8). <sup>366</sup> *Ibid*, s 71(3).

<sup>367</sup> *Ibid*, s 71(5) and (6). <sup>368</sup> *Ibid*, s 71(4) and (7). <sup>369</sup> *Ibid*, s 72.

<sup>370</sup> *Ibid*, s 72(2) and para 9 of Sch 18. <sup>371</sup> OFT 527, June 2009, paras 6.23–6.45.

<sup>372</sup> *Ibid*, para 6.30.

matters which the OFT will consider when determining the risk of pre-emptive action are the risk of loss of critical know-how and key staff, the risk that key assets will be rendered inoperable and the risk of exchange of sensitive information<sup>373</sup>. The OFT has made clear that the fact that it considers initial undertakings are necessary does not preclude unconditional clearance of a merger<sup>374</sup>.

The OFT will seek initial undertakings as soon as the statutory test in section 71(3) is met, which may be at the time that an enquiry letter is sent out or immediately following notification<sup>375</sup>. The OFT has a standard form for initial undertakings and will not generally engage in lengthy discussions about them<sup>376</sup>. The OFT will consider imposing an initial order only where it has already given the merging parties a reasonable opportunity to provide initial undertakings, but they have not been forthcoming<sup>377</sup>.

## (ii) Undertakings in lieu of a reference to the CC

The ability of the OFT to accept undertakings in lieu of a reference to the CC has already been discussed<sup>378</sup>.

## (B) Interim restrictions and powers<sup>379</sup>

### (i) Statutory restrictions on dealings

Sections 77 and 78 of the Enterprise Act impose automatic restrictions on certain dealings in relation to completed and anticipated mergers when a reference has been made to the CC; these are imposed in order to prevent any further integration of the businesses concerned. Section 77 provides that, when a reference has been made of a completed merger and no undertaking has been given in relation to it, no one may, without the consent of the CC, complete any outstanding matters in relation to that merger or transfer the ownership or control of any enterprises to which the reference relates<sup>380</sup>; any consent of the CC may be general or special, and may be revoked<sup>381</sup>. Section 78 provides that, when a reference is made of an anticipated merger, no one may, without the consent of the CC, directly or indirectly acquire an interest in shares in a company if any enterprise to which the reference relates is carried on by or under the control of that company<sup>382</sup>; again any consent of the CC may be general or special, and may be revoked<sup>383</sup>. These provisions are quite technical and section 79 deals with numerous points of interpretation, in particular to make clear what is meant by a share acquisition for the purposes of section 78. The CC gave consent to Heinz for the disposal of its ethnic foods business during the course of its investigation in *Heinz/HP Foods Group* which otherwise would not have been possible due to the statutory restriction on share dealings and due to the subsequent interim undertakings that had been given to the CC under the provisions described in the following paragraph<sup>384</sup>. Section 78 does not apply to the transfer of assets; the CC may therefore put in place interim measures to deal with this issue<sup>385</sup>.

<sup>373</sup> Ibid, para 6.32.

<sup>374</sup> Ibid, para 6.29.

<sup>375</sup> Ibid, para 6.29.

<sup>376</sup> Ibid, paras 6.37–6.39; the template is available on the OFT's website, [www.of.gov.uk](http://www.of.gov.uk); the OFT will consider subsequent waiver requests: *ibid*, para 6.39.

<sup>380</sup> Enterprise Act 2002, s 77(2).

<sup>381</sup> Ibid, s 77(5).

<sup>382</sup> Ibid, s 78(3).

<sup>383</sup> Ibid, s 78(3).

<sup>384</sup> See the Final Report, paras 3.17–3.21, available at [www.competition-commission.org.uk/inquiries/ref2005/heinz/index.htm](http://www.competition-commission.org.uk/inquiries/ref2005/heinz/index.htm).

<sup>385</sup> See *Remedies Guidelines*, Appendix A, para 16.

## (ii) Interim undertakings and orders to prevent pre-emptive action

Just as the OFT can accept initial undertakings and make final orders to prevent pre-emptive action, section 80 (dealing with undertakings) and section 81 (dealing with orders) of the Act give the CC the same powers<sup>386</sup>; pre-emptive action means action which might prejudice the reference or impede the taking of any action that the CC might consider to be justified as a result of its decision on the reference<sup>387</sup>. Section 80(3) enables the CC to adopt an undertaking that has already been given to the OFT within seven days of the reference to it; section 80(4) provides that the OFT undertaking may be continued in force, varied, released or superseded by a new undertaking. Section 81(3) provides that the CC<sup>388</sup> may adopt an order of the OFT. It is common practice for the CC to adopt OFT undertakings on the basis of section 80(3), although it may then go on to accept undertakings directly from the parties concerned: an example of this can be found in the case of *Greif Inc/Blagden Packaging Group*<sup>389</sup>. Undertakings and orders may be varied<sup>390</sup>. In *Bucher Industries AG/Johnstone Sweepers Ltd* the CC was concerned that Bucher appeared not to be complying with its interim undertaking to prevent the integration of the Bucher and Johnstone businesses pending the completion of the investigation and required both an apology from Bucher and the appointment of a monitoring trustee to ensure compliance with the undertaking<sup>391</sup>. A monitoring trustee was also appointed in relation to a completed joint venture in the case of *Stagecoach/Scottish Citylink*<sup>392</sup>. Interim orders had been made in three cases by 20 June 2011. The *Stericycle* case<sup>393</sup> is discussed below. In the case of *Tesco/Co-op Store*<sup>394</sup> the CC gave directions to prevent Tesco from carrying out any further work on a store in Slough that could impede any remedial action. In *Sports Direct/JJB Sports*<sup>395</sup> the CC made an interim order to ensure both that the stores purchased by Sports Direct remained viable and that it had options for divestment after it had completed its investigation.

There is no duty to pre-notify mergers to the OFT under UK law, and quite a large percentage of the cases referred by the OFT to the CC are of completed mergers<sup>396</sup>. This gives rise to a concern that the CC might investigate a case in which it considers that there is an SLC, only to find that the merging businesses have become so intermingled that it is very difficult in practice to reverse the process and to restore conditions of

<sup>386</sup> See the CC's *General Advice and Information*, paras 7.1–7.8 and 7.11–7.13.

<sup>387</sup> Enterprise Act 2002, s 80(10).

<sup>388</sup> The Chairman, or a Deputy Chairman, of the CC may perform this function: see *Notice of Variation of Procedure*, 16 March 2010, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>389</sup> See [www.competition-commission.org.uk](http://www.competition-commission.org.uk); more recent examples are *Holland & Barrett/Julian Graves* (2009) and *Brightsolid/Friends Reunited* (2010).

<sup>390</sup> See eg the consent given to Deans to process liquid egg on behalf of Stonegate in *Stonegate Farmers Ltd/Deans Food Group Ltd*, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>391</sup> See the Final Report, para 9.3, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>392</sup> See the Final Report, para 8.56, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk); see similarly *Capita/IBS*, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>393</sup> See below.

<sup>394</sup> See the Final Report, paras 3.44–3.49, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>395</sup> See the Final Report, para 3.6, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>396</sup> For statistics on this point see 'Completed mergers' and following sections pp 954–956 below; see French and Scola 'How Risky is Buying in the UK without Merger Clearance?' (2007) 1 *European Business Law Journal* 196.

effective competition<sup>397</sup>. Obviously it is important for the OFT, which will have reviewed the merger prior to the CC, also to consider what measures should be put in place during its (the OFT's) period of investigation so that the CC's position will not be prejudiced. In 2008 the CC issued *Merger Remedies: Competition Commission Guidelines*<sup>398</sup> ('*Remedies Guidelines*'), replacing earlier guidance of 2006. The CC will normally expect to receive interim undertakings from the acquirer in the case of a completed merger to clarify or supplement the statutory restrictions on dealing<sup>399</sup>; the CC may also seek to restrict the flow of commercially valuable information between the parties pending the outcome. The CC explains that it might find it necessary to appoint a 'hold separate' manager to operate the business separately from that of the acquirer, and that a monitoring trustee might have to be appointed as well<sup>400</sup>. The CC has published a template set of interim undertakings for completed mergers<sup>401</sup>.

In *Stericycle International LLC/Sterile Technologies Group Ltd* Stericycle had purchased STG's clinical waste management business at auction; no notification had been made to the OFT. The OFT referred the case to the CC, which made an order to prevent any further integration of the two businesses, and issued directions for the appointment of a monitoring trustee; subsequently further directions were issued for the appointment of a hold separate manager<sup>402</sup>. Stericycle challenged the CC before the CAT<sup>403</sup>; the CAT upheld the action of the CC, holding that it was 'well within the CC's margin of appreciation to propose the appointment of a [hold separate manager] in this case'<sup>404</sup>, and that Stericycle was well aware of the risk it was taking by completing the transaction without approval from the competition authorities<sup>405</sup>. The CC's view was that the fact that substantial integration of the two businesses had already taken place made it more, not less, important to appoint a hold separate manager<sup>406</sup>. The final outcome of this case was that Stericycle was required to sell off part of the business that it had acquired to a suitable purchaser<sup>407</sup>.

### (C) 'Final powers' or 'remedies'<sup>408</sup>

Sections 82 to 84 of the Enterprise Act deal with 'final powers', that is to say the remedial action that the CC may take after it has completed its inquiry and reached its conclusion. Section 82 provides for the acceptance of final undertakings and section 83 for the

<sup>397</sup> The CC has raised the question of whether pre-notification of mergers should become compulsory: see its *Annual Report and Accounts 2006/2007*, p 6, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>398</sup> See Appendix A of CC8, November 2008, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>399</sup> *Remedies Guidelines*, para 1.32 and Appendix A, para 7; on s 77 of the Act see 'Statutory restrictions on dealings', p 942 above.

<sup>400</sup> *Remedies Guidelines*, paras 12–15; the risk factors making the appointment of a hold separate manager more likely are listed in para 14.

<sup>401</sup> See [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>402</sup> The order and directions will be found at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>403</sup> Case No 1070/4/8/06 *Stericycle International LLC v Competition Commission* [2006] CAT 21, [2007] CompAR 281; for comment see Freeman 'Stericycle: A Lifeline for the UK's Voluntary Merger Control Regime' (2007) 6 *Competition Law Journal* 298.

<sup>404</sup> Case No 1070/4/8/06, [2006] CAT 21, [2007] CompAR 281 para 140.

<sup>405</sup> *Ibid*, para 137.

<sup>406</sup> *Ibid*, para 158.

<sup>407</sup> For the final undertakings in this case see [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>408</sup> See the CC's *General Advice and Information*, paras 7.1–7.8 and 7.14–7.16 and *Remedies Guidelines*, CC8, November 2008.

making of an order where an undertaking is not being fulfilled or where false or misleading information was given to the OFT or CC prior to the acceptance of an undertaking. Section 84 gives the power to the CC to make a final order. As a general rule the CC prefers to proceed by accepting undertakings rather than by making final orders: the CC had made only one final order in a merger (as opposed to a market investigation) reference as at 20 June 2011: *Tesco/Co-op Store*<sup>409</sup>. Nevertheless the CC has pointed out that, in the event of undue delay in obtaining suitable undertakings after the completion of an investigation, it could proceed to the making of an order<sup>410</sup>. Undertakings may contain provisions that go beyond the order-making powers in the Act<sup>411</sup>. Provision is made for the variation of remedies<sup>412</sup>.

### (i) Schedule 8 to the Enterprise Act

The orders that can be made are set out in Schedule 8 to the Act, and are extensive. They include 'general restrictions on conduct' (paragraphs 2 to 9); 'general obligations to be performed' (paragraphs 10 and 11); 'acquisitions and divisions' (paragraphs 12 to 14); and 'supply and publication of information' (paragraphs 15 to 19); supplementary provisions as to the making of orders are to be found in paragraphs 21 and 22 of Schedule 8. An order may not interfere with conditions in patent licences or licences of registered designs<sup>413</sup>. It is specifically provided that an order may prohibit the performance of an agreement already in existence<sup>414</sup>. An order may provide for the revocation or modification of conditions in the licences of regulated undertakings under legislation such as the Telecommunications Act 1984, the Airports Act 1986 and the Gas Act 1986<sup>415</sup>. Section 87 of the Act allows the person making an order to give directions to an individual or to an office-holder in a company or association to take action or to refrain from action for the purpose of carrying out or ensuring compliance with the order; failure to comply with such directions may lead to court action<sup>416</sup>. Section 88 sets out the minimum contents of any final order or order to replace an undertaking in lieu of a reference.

### (ii) General restrictions on conduct

Paragraphs 2 to 9 of Schedule 8 provide for orders to impose restrictions on conduct. An order may prohibit the making or performance of an agreement or require the termination of one (paragraph 2)<sup>417</sup>; and may forbid refusals to supply (paragraph 3), tie-ins (paragraph 4), discrimination (paragraph 5), preferential treatment (paragraph 6) and deviation from published price lists (paragraph 7). Price regulation is also a possibility (paragraph 8). An order may prohibit the exercise of voting rights attached to shares, stocks or securities (paragraph 9).

<sup>409</sup> The CC published its Final Report on 28 November 2007 and made a Final Order on 23 April 2009, [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>410</sup> See CC's *General Advice and Information*, para 7.6 and the Final Report in *Firstgroup plc/Scotrail*, para 14, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>411</sup> Enterprise Act 2002, s 89.

<sup>412</sup> *Ibid*, s 82(2)(b) (variation of undertakings) and s 83(5)(c) (variation of orders); for an example of several variations of a remedy see *Firstgroup plc/Scotrail*, [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>413</sup> Enterprise Act 2002, s 86(2).

<sup>414</sup> *Ibid*, s 86(3).

<sup>415</sup> *Ibid*, s 86(5) and Sch 9, Part 1.

<sup>416</sup> *Ibid*, s 87(4)–(8).

<sup>417</sup> Such an order may not deal with terms and conditions in contracts of employment or the physical conditions in which workers work: Enterprise Act 2002, Sch 8, para 2(2).

### (iii) General obligations to be performed

Paragraph 10 of Schedule 8 provides that an order may require a person to supply goods or services, and it can be specified that they should be of a particular standard or that they should be applied in a particular manner: for example a bus company could be required to maintain a certain frequency of service<sup>418</sup>. Paragraph 11 of the Schedule enables an order to require that certain activities should be carried on separately from other activities.

### (iv) Acquisitions and divisions

Paragraph 12 of Schedule 8 provides that an order may prohibit or restrict the acquisition of the whole or part of an undertaking or the assets of another person's business. Paragraph 13 provides for the division of any business, whether by sale of any part of an undertaking or assets or otherwise; paragraph 13(3) deals with associated issues such as the transfer or creation of property, rights, liabilities and obligations, the adjustment of contracts, share ownership and other matters. Provision is made for the buyer of a business to be approved by the OFT<sup>419</sup>, and for the appointment of a trustee to oversee the divestment of a business<sup>420</sup>.

In *Somerfield plc/Wm Morrison* the CC required Somerfield to divest four grocery stores that it had acquired from Morrison<sup>421</sup>. Somerfield appealed to the CAT arguing that the CC's remedy was unreasonable, and that it (Somerfield) should be given the option of selling either the stores that it had acquired or the stores that it already owned: since it was the common ownership of the stores that was responsible for the SLC, the situation could be remedied by divesting either the new or the original stores. The CAT upheld the finding of the CC in *Somerfield plc v Competition Commission*<sup>422</sup>. In the CAT's view the CC was entitled to take as its starting point that the '*status quo ante*' would normally involve reversing the acquisition, which would represent a simple, direct and easily understandable approach; the onus was therefore on Somerfield to show why divestment of its original stores would be an equally effective remedy<sup>423</sup>. The CAT considered that Somerfield had failed to show that this was the case, in particular because the CC had been correct to think that Somerfield's existing stores were less attractive to a potential purchaser than the ones that it had acquired from Morrison, meaning that it was less likely that selling the existing stores would be an effective remedy.

### (v) Supply and publication of information

Paragraph 15 of Schedule 8 provides that an order may require a person to publish price lists. Paragraph 16 allows a prohibition on the practice of recommending prices to dealers. Paragraph 17 enables an order to require a person to publish accounting information. Paragraph 18 provides that orders can specify the manner in which information is to be published. There is a general power in paragraph 19 to require a person to provide the competition authorities with information, and for that information to be published.

<sup>418</sup> See *Explanatory Notes* to the Enterprise Bill, para 225.

<sup>423</sup> Case No 1051/4/8/05 [2006] CAT 4, [2006] CompAR 390, paras 99–105.

### (vi) National security, media and financial stability mergers

Paragraphs 20, 20A and 20B make provision for orders to be made in relation to ‘public interest cases’ under Chapter 2 of Part 3 of the Act<sup>424</sup>.

### (vii) The CC’s approach to remedies

The CC has established a Remedies Standing Group whose functions include the adoption of interim undertakings from the OFT; enforcing undertakings and orders; varying or releasing undertakings; and overseeing the implementation of undertakings and orders in relation to divestiture. Details of the work of the Group and of its membership are available on the website of the CC<sup>425</sup>. The CC also has a rolling programme of reviewing past remedies in merger cases in order to capture important learning points and to feed them into current remedies policy and practice<sup>426</sup>. The CC’s approach to remedies is described in its *Remedies Guidelines* which expand and clarify the guidance provided by the CC previously<sup>427</sup>. Part 1 of the *Remedies Guidelines* explains the objectives of remedial action: the CC will seek the least costly and intrusive remedies that it considers will be effective to address any SLC and its adverse effects<sup>428</sup>. Part 2 provides an overview of the types of remedies. The CC generally prefers structural remedies to behavioural ones<sup>429</sup>, although the use of the latter cannot be ruled out<sup>430</sup>. Part 3 of the *Remedies Guidelines* explains the principles relevant to divestiture remedies, including the criteria for identifying a suitable purchaser. Part 4 discusses behavioural remedies and emphasises the need for there to be effective and adequately resourced arrangements for monitoring and enforcement. The use of trustees and third party monitors to assist in the monitoring and implementation of undertaking or orders is discussed in Part 5.

### (viii) Examples of remedies

The CC has opted for structural remedies in the majority of cases that gave rise to an SLC under the Act<sup>431</sup>. In both *Hamsard 2786 Ltd/Academy Music Holdings Ltd*<sup>432</sup> and *SvitzerWijsmuller A/S/Adsteam Marine Ltd*<sup>433</sup> the CC was offered behavioural remedies, including price controls, but rejected them in favour of partial divestitures. In rare cases an outright prohibition of an anticipated merger may be preferable, as occurred in *Serviced Dispense Equipment Ltd (SDEL)/Coors Brewers Ltd*<sup>434</sup>. However behavioural remedies are possible: the CC accepted a retail price cap and other behavioural remedies in *Dräger Medical A&G Co KGaA/Hillebrand Industries Inc*<sup>435</sup> and undertakings on both fares and the level of service, frequency and configuration of bus routes in Scotland, in

<sup>424</sup> See ‘Public interest cases’, pp 956–958 below.

<sup>425</sup> [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>426</sup> See *Understanding past merger remedies: report on case study research*, January 2007, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>427</sup> See *Merger References: Competition Commission Guidelines* CC2, June 2003, part 4 and *Guidelines on the application of divestiture remedies in merger inquiries* CC8, December 2004.

<sup>428</sup> *Remedies Guidelines*, para 1.8.

<sup>429</sup> *Ibid*, para 2.14.

<sup>430</sup> See the three situations described in *ibid*, para 2.16.

<sup>431</sup> See ‘The Merger Provisions in Practice’, pp 951–956 below.

<sup>432</sup> See the Final Report, paras 6.47–6.67, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>433</sup> See the Final Report, paras 9.13–9.17, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>434</sup> See the Final Report, paras 6.42–6.48, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk); see also *BOC Ltd/Ineos Chlor Ltd*, paras 11.14–11.85, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>435</sup> See the Final Report, paras 10.26–10.40, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

particular in the Glasgow and Edinburgh areas, in *Firstgroup plc/Scotrail*<sup>436</sup>. In *Nufarm/AH Marks* the CC found that, while divestiture would not be disproportionate, a package of behavioural remedies would be more targeted in addressing its competition concerns. The CC may exceptionally accept behavioural remedies even though it considers divestiture would be more effective, as it did in *Macquarie UK Broadcast Ventures/National Grid Wireless*<sup>437</sup> given the unique circumstances of the digital switchover process in the broadcasting sector.

The CC will also consider whether it should recommend action by persons other than the merging parties<sup>438</sup>. For example it might suggest to the Government that it should amend legislation or regulations that inhibit entry into a particular market; the Government has given a commitment to give a public response to any such recommendation; this happened in *Dräger Medical A&G Co KGaA/Hillenbrand Industries Inc*<sup>439</sup>.

#### (D) Enforcement functions of the OFT

The lead role in monitoring OFT and CC undertakings and orders is given to the OFT. Section 92(1) of the Act requires it to keep enforcement undertakings and enforcement orders under review and to ensure compliance with sections 77 and 78, which restrict certain dealings; in particular the OFT must consider whether undertakings or orders are being complied with and whether, by reason of a change of circumstances, there is a case for release, variation or supersession<sup>440</sup>. The CC may ask the OFT to assist in the negotiation of undertakings<sup>441</sup>. The OFT also has a responsibility to keep under review undertakings and orders arising from merger cases conducted under the now-repealed Fair Trading Act 1973<sup>442</sup>. The OFT has agreed a *Memorandum of Understanding*<sup>443</sup> with the CC which records the basis on which they will cooperate on the variation and termination of merger, monopoly and market undertakings and orders under the Fair Trading Act and the Enterprise Act.

Section 94 of the Enterprise Act provides that orders and undertakings can be enforced through the courts. There is a duty to comply with orders and undertakings, and that duty is owed to anyone who may be affected by a contravention of it<sup>444</sup>; any breach of the duty is actionable if such a person sustains loss or damage<sup>445</sup>, though a defence exists if the person in question took all reasonable steps and exercised all due diligence to avoid a contravention of the order or undertaking<sup>446</sup>. The OFT maintains a register of undertakings and orders on its website; it is open to physical inspection between 10.00 and 16.30

<sup>436</sup> See the Final Report, paras 6.8–6.36, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>439</sup> See the Final Report, paras 10.16–10.25, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>440</sup> Enterprise Act 2002, s 92(2); further information on cases in which undertakings or orders are being reviewed can be found on the CC website, [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>441</sup> Enterprise Act 2002, s 93.

<sup>442</sup> See *ibid*, Sch 24 and the Enterprise Act 2002 (Enforcement Undertakings) Order 2006, SI 2006/354 and the Enterprise Act 2002 (Enforcement Undertakings and Orders) Order 2006, SI 2006/355.

<sup>443</sup> 17 February 2009, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>444</sup> Enterprise Act 2002, s 94(2) and (3).

<sup>445</sup> *Ibid*, s 94(4); as to whether a person injured by breach of an undertaking or order could bring an action for damages, see *MidKent Holdings v General Utilities plc* [1996] 3 All ER 132, [1997] 1 WLR 14, brought under s 93 of the (now-repealed) Fair Trading Act 1973.

<sup>446</sup> Enterprise Act 2002, s 94(5).

on working days. Compliance with an order or undertaking is enforceable by civil proceedings brought by the OFT<sup>447</sup> or the CC<sup>448</sup> for an injunction (or interdict in Scotland). Similar provisions apply in relation to breaches of the statutory restrictions on certain dealings provided for in sections 77 and 78<sup>449</sup>.

## 7. Supplementary Provisions

Chapter 5 of Part 3 of the Enterprise Act contains a number of supplementary provisions. Some of these, such as the statutory merger notice procedure and the payment of fees, have already been considered<sup>450</sup>. Two issues of particular importance remain to be considered: the information powers of the CC and its ability to impose penalties, and the review of decisions on mergers by the CAT.

### (A) Investigation powers and penalties

Sections 109 to 117 of the Enterprise Act deal with the CC's powers of investigation and with penalties. Section 109 gives the CC powers to require, by notice, the attendance of witnesses<sup>451</sup>, the production of documents<sup>452</sup> and the supply of various information<sup>453</sup>. A notice given under this section must explain the consequences of non-compliance<sup>454</sup>. The CC can impose a penalty on a person who, without reasonable excuse, fails to comply with a notice given under section 109<sup>455</sup> or who obstructs or delays a person who is trying to copy documents required to be produced<sup>456</sup>. The maximum amounts that the CC may impose as a penalty under section 110(1) and (3) are specified in the Competition Commission (Penalties) Order 2003<sup>457</sup>. It is a criminal offence for a person intentionally to alter, suppress or destroy any document that he has been required to produce under section 109<sup>458</sup>; a person guilty of this offence could be fined or imprisoned for a maximum of two years<sup>459</sup>.

Sections 111 to 116 set out the main procedural requirements which the CC must observe when imposing a monetary penalty; the factors which it will have regard to when determining the amount of a penalty are set out in the CC's *Statement of Policy on Penalties*<sup>460</sup>. There is a full right of appeal to the CAT against decisions of the CC to impose monetary penalties: the CAT may quash the penalty or substitute a different amount or different dates for payment<sup>461</sup>. On several occasions the CC has used or threatened to use its section 109 powers, both on parties to the transaction under consideration and third parties: these powers can avoid delays in the provision of information and ensure that the information provided is full and accurate.

<sup>461</sup> Enterprise Act 2002, s 114.

## (B) Review of decisions under Part 3 of the Enterprise Act

Section 120 of the Enterprise Act makes provision for review of decisions under Part 3 of the Act. Section 120(1) provides that any person aggrieved by a decision of the OFT, the Secretary of State or the CC may apply to the CAT for a review of that decision. The CAT considered it difficult to conceive of a situation where the merging parties objecting to the CC's finding of an SLC would not be persons aggrieved by that decision, even if they were prepared to comply with it<sup>462</sup>. An aggrieved person could also be a third party with sufficient interest<sup>463</sup>.

The application must be made within four weeks of the date on which the applicant was notified of the disputed decision or of its date of publication, whichever is earlier<sup>464</sup>; the date of publication is the date when the parties receive the reasons for the OFT's decision, rather than an earlier Press Release stating the content of the decision but without its reasoning<sup>465</sup>. The CAT's view is that, as a general proposition, a main hearing in merger cases should be held within three months of the report of the CC<sup>466</sup>; the CAT has succeeded in dealing with reviews of merger decisions within a short time period, considerably shorter than the General Court when reviewing decisions under the EUMR.

When dealing with cases under section 120(1) the CAT must apply the same principles as would be applied by a court on an application for review<sup>467</sup>. The fact that the CAT is a specialist competition tribunal does not mean that it should apply different principles<sup>468</sup>; this point was put beyond doubt by the Court of Appeal in *BSkyB Group plc v Competition Commission*<sup>469</sup>. The CAT may dismiss the application or quash the whole or part of the decision to which it relates<sup>470</sup>; and, in the latter situation, it may refer the matter back to the original decision-maker for further consideration<sup>471</sup>. An appeal may be brought before the Court of Appeal, with permission, against the CAT's decision on a point of law<sup>472</sup>. Part 3 of the Competition Appeal Tribunal Rules<sup>473</sup> makes provision for appeals under section 120 of the Act.

There have been several applications for review to the CAT in relation to merger cases<sup>474</sup>. The challenges by third parties to the OFT's decisions not to refer the *iSOFT/Torex*, *Phoenix Healthcare/East Anglian Pharmaceuticals* and *Boots/Alliance UniChem* mergers have already been discussed in the context of the OFT's duty to refer mergers to the CC that may be expected to result in an SLC<sup>475</sup>. A third party successfully appealed against the CC's clearance decision in *Ticketmaster/Live Nation*<sup>476</sup>, leading to a re-investigation

<sup>469</sup> [2010] EWCA Civ 2, [2010] UKCLR 351, paras 28–41.

<sup>470</sup> Enterprise Act 2002, s 120(5)(a).

<sup>471</sup> *Ibid*, s 120(5)(b).

<sup>472</sup> *Ibid*, s 120(6) and (7).

<sup>473</sup> SI 2003/1372.

<sup>474</sup> For comment see Burrows 'Review of Merger Decisions by the CAT: A Question of Evidence' (2006) 5 Competition Law Journal 169.

<sup>475</sup> See 'Duty to make references: completed mergers', pp 913–918 above.

<sup>476</sup> Case No 1150/4/8/10 *CTS Eventim AG v Competition Commission* [2010] CAT 7, [2010] CompAR 221; the CAT also gave a ruling on costs in this case: [2010] CAT 8, [2010] CompAR 224.

and a second clearance decision in May 2010<sup>477</sup>. The CAT accepted the argument that the CC's choice of counterfactual was unreasonable and unsupported by the evidence in the case of *Stagecoach/Preston Bus*<sup>478</sup>.

The OFT's decision in *Cooperative Group/Fairways Group* has been dealt with in the discussion of undertakings in lieu of a reference<sup>479</sup> and the CC's suggested remedy in *Somerfield/Morrisons* was discussed in the section on divestiture remedies<sup>480</sup>. The appeals by BSKyB and Virgin Media against the decisions of the CC and the Secretary of State in *BSkyB plc/ITV plc* will be discussed in the section on public interest cases<sup>481</sup>, as will the challenge to the Secretary of State's decision not to refer *LloydsTSB/HBOS*. Two further cases, *Federation of Wholesale Distributors v OFT*<sup>482</sup> and *Stericycle v Competition Commission*<sup>483</sup>, did not proceed to final judgment. The CAT rejected an application by Morrisons for interim relief against the CC's decision to approve Sainsbury's as the purchaser of a site that Tesco was required to divest by the decision in *Tesco/Co-op Store*<sup>484</sup>.

When the OFT asked for costs against the unsuccessful applicant in *Celesio v OFT* the OFT suggested that where a horizontal competitor (as opposed, for example, to a customer) brings a challenge to the non-referral of a merger, that applicant should bear the risk of failure in costs; however the CAT declined to accept this suggestion, saying only that each case depends on its own circumstances<sup>485</sup>. In the *Celesio* case itself the CAT did not award costs against the unsuccessful applicant since it had not been able to understand the OFT's decision without the witness statement by the OFT's director of mergers produced for the purposes of the appeal<sup>486</sup>.

## 8. The Merger Provisions in Practice

The merger provisions of the Enterprise Act entered into force on 20 June 2003. The following Table contains a list of mergers referred by the OFT to the CC since the sixth edition of this book was published in 2008 in which the investigations were completed by 20 June 2011. A list of all cases referred to the CC since the Enterprise Act entered into force in 2003 will be found at the Online Resource Centre that accompanies this book<sup>487</sup>.

A number of interesting points that emerge from the cases referred by the OFT to the CC will be discussed in the text that follows.

<sup>477</sup> [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

Table 22.1 Merger references to the Competition Commission under the Enterprise Act 2002

Title	Date of reference	Date of publication	Finding of substantial lessening of competition?	Remedy
<i>BOC Ltd/Ineos Chlor ltd</i>	29 May 2008	18 December 2008	Yes	Prohibition
<i>Project 'Kangaroo'</i>	30 June 2008	4 February 2009	Yes	Behavioural remedies
<i>Nufarm/AH Marks</i> <b>NB: completed merger</b>	29 August 08	10 February 2009	Yes	Behavioural remedies to facilitate entry
<i>Hospedia/Premier</i> <b>NB: abandoned by the parties</b>	7 October 2008			
<i>Long Clawson/Millway</i> <b>NB: completed merger</b>	8 October 2008	14 January 2009	No	
<i>Capita/IBS</i> <b>NB: completed merger</b>	19 November 2008	4 June 2009	Yes	Divestiture required
<i>Holland &amp; Barrett/Julian Graves</i> <b>NB: completed merger</b>	20 March 2009	20 August 2009	No	
<i>Stagecoach/Eastbourne Buses Ltd</i> <b>NB: completed merger</b>	13 May 2009	22 October 2009	No	
<i>Stagecoach Bus Holdings Ltd/Preston Bus Ltd</i> <b>NB: completed merger</b>	28 May 2009	11 November 2009	Yes	Divestiture required <b>NB: CAT judgment of 21 May 2010<sup>1</sup> finding irrationality on the part of the CC</b>
<i>Ticketmaster/Live Nation</i>	10 June 2009	22 December 2009 Second decision of 7 May 2010	No No	<b>NB: CAT judgment of 11 February 2010 setting the decision aside<sup>2</sup></b>

<b>Title</b>	<b>Date of reference</b>	<b>Date of publication</b>	<b>Finding of substantial lessening of competition?</b>	<b>Remedy</b>
<i>Sport Direct/JJB Stores</i> <b>NB: completed merger</b>	7 August 2009	16 March 2010	No	<b>On appeal to the CAT by a third party<sup>3</sup>; the CC then withdrew the procedural decision under appeal</b>
<i>Contract Rights Renewal</i>	29 May 2009	Consultation on possible amendments to the undertakings given following the Carlton/Granada investigation	Final decision 12 May 2010 Final undertakings accepted 17 September 2010	
<i>RMIG Ltd/Ash &amp; Lacy Perforators Ltd</i> <b>NB: abandoned by the parties</b>	26 August 2009			
<i>Brightsolid Group Ltd/Friends Reunited Holdings Ltd</i>	2 November 2009	18 March 2010	No	
<i>Getty Images Inc/Rex Features Ltd</i> <b>NB: abandoned by the parties</b>	8 July 2010			
<i>Zipcar Inc/Streetcar Ltd</i> <b>NB: completed merger</b>	10 August 2010	22 December 2010	No	
<i>Dorf Ketal Chemicals AG (Dorf)Johnson Matthey plc</i> <b>NB: abandoned by the parties</b>	19 November 2010			
<i>MBL/Trigold Crystal</i> <b>NB: abandoned by the parties</b>	17 March 2011			

<sup>1</sup> Case No 1145/4/8/09 *Stagecoach Group Plc v Competition Commission* [2010] CAT 14, [2010] CompAR 276.

<sup>2</sup> Case No 1150/4/8/10 *CTS Eventim AG v Competition Commission* [2010] CAT 7, [2010] CompAR 221.

<sup>3</sup> Note Case No 1116/4/8/09 *Sports Direct International Plc v Competition Commission* [2009] CAT 32, [2010] CompAR 175.

### (A) Basic statistical analysis

Eighty mergers had been referred by the OFT to the CC by 20 June 2011. The largest number of references in one complete year was 17 in 2005; the smallest was five in 2010.

### (B) Abandoned mergers

As the Table above demonstrates, quite a few mergers that are referred to the CC are then abandoned by the parties. This occurred in 22 cases out of the total of 80. There are various possible explanations for this. One is that the parties may consider that it is too expensive, in terms of professional fees, to undergo an in-depth investigation by the CC, especially where the value of the business acquired is fairly small. The concern that too many 'small' mergers could be referred to the CC led to the OFT revising its *de minimis* guidance<sup>488</sup>.

Another explanation for the abandonment of a merger might be that the parties realise that there is such a strong likelihood that the outcome of the investigation will be substantial remedies, or even an outright prohibition, that it is not worth continuing with the transaction. A third explanation for some abandonments is that an acquisition agreement may have been conditional on the merger not being referred to the CC.

### (C) Completed mergers

It is noticeable that a significant percentage of mergers referred to the CC were completed ones: a total of 35 out of 80 or, in percentage terms, 43.75 per cent. The UK system does not require pre-notification of mergers, and the parties are perfectly entitled to complete a transaction without prior clearance, although they need to be aware of the risks of doing so. The OFT and the CC will take care, in the case of a completed merger, to ensure that there is no further intermingling of assets once the matter has come to their attention and become the subject of an investigation<sup>489</sup>.

It is important to note that in several cases of completed mergers the CC required substantial remedies, including, in some, the total reversal of a transaction.

#### (i) Full unscrambling

In *Emap/ABI*, *Stonegate/Deans*, *Thermo/GVI*, *Tesco/Co-op Store* and *Stagecoach/Preston Bus* the transactions had to be fully unscrambled.

#### (ii) Substantial unscrambling

In *EWS/Marcroft*, *Stagecoach/Scottish Citylink*, *Somerfield/Morrisons*, *Stericycle/STG* and *Capita/IBS* the CC required significant unscrambling of the transaction.

#### (iii) Slight unscrambling

In some cases the remedy required was quite limited: for example in *Vue Entertainment Holdings (UK) Ltd/A3 Cinema Ltd* the CC required Vue Entertainment Holdings to divest itself of one of the two cinemas that it operated in the town of Basingstoke to a cinema operator with the resources, expertise, incentive and business plan to operate it as a multiplex cinema showing mainstream films<sup>490</sup>.

<sup>488</sup> See 'Markets of insufficient importance', pp 915–916 above.

<sup>489</sup> See 'Initial undertakings and orders', pp 941–942 above.

<sup>490</sup> See the Final Report, paras 7.19–7.72, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

#### (D) The number of findings of an SLC

The CC found an SLC in 26 out of the 80 mergers to have been investigated by 20 June 2011.

#### (E) The number of outright prohibitions

There have been some cases in which a merger was prohibited in its entirety. The completed mergers in section A have already been referred to. The first occasion on which the CC prohibited an anticipated merger in its entirety was in *Knauf Insulation Ltd/Superglass Insulation Ltd*; the CC rejected various remedies suggested by Knauf to address concerns over its ability, after the merger, to raise prices, including a proposal for a system of price control or for the monitoring of prices by the OFT<sup>491</sup>. The second merger to be blocked was *BOC/Ineos Chlor* as it would have led to higher prices and/or lower service levels than would otherwise be the case in the markets for the distribution of packaged chlorine<sup>492</sup>. In *BBC Worldwide/Channel 4/ITV* the CC blocked a joint venture that would lead to an SLC in the supply of UK TV video on demand content at both the wholesale and retail levels; the CC consulted on a number of remedy options but concluded that prohibition would be the only effective and proportionate remedy<sup>493</sup>.

#### (F) Relationship with Article 102

In *Railway Investments Ltd/Marcroft Holdings Ltd*<sup>494</sup> the CC was concerned that English Welsh & Scottish Railways, the owner of Railway Investments, would be able either to reduce service quality or raise prices in the market for rail freight haulage services. EW&S argued that the behaviour that the CC feared might occur would entail an infringement of Article 102 TFEU and/or the Chapter II prohibition of the Competition Act, and that the sanctions associated with those provisions would deter it from behaving in that way. The CC concluded that the deterrent effect of the prohibitions was too uncertain to counteract the incentives to indulge in the behaviour predicted<sup>495</sup>.

#### (G) Evaluation of the value of the CC's actions<sup>496</sup>

Every year since 2006 the CC has published a document on its website in which it estimates the value to UK consumers of its work<sup>497</sup>. The CC reviews the mergers in which it took remedial action in the previous year and then estimates the total costs to consumers if it had not taken action. In 2009 the CC revised its methodology in order to quantify the benefits it expects to flow to consumers rather than the detriment that has been identified as resulting from the SLC. The CC estimated that a three-year rolling average of consumer benefits from its remedies for merger inquiries that resulted in an SLC finding between 2007/08 and 2009/10 was £205 million. The OFT estimated that, over the same period, the OFT had avoided detriment to consumers of £106 million by accepting undertakings in lieu of a reference, so that the merger system as a whole had saved consumers £310 million.

## 9. ‘Public Interest Cases’, ‘Other Special Cases’ and Mergers in the Water Industry

### (A) Public interest cases<sup>498</sup>

A key feature of the merger provisions in the Enterprise Act is that the Secretary of State should not be involved in individual cases, and that decisions should be taken by the OFT and the CC: competition analysis in normal merger cases should be carried out by specialist competition authorities<sup>499</sup>. However there may be situations in which the investigation of a merger may be justifiable on grounds of a wider public interest than its detrimental effect on competition: Article 21(4) of the EUMR recognises that Member States may have a ‘legitimate interest’ in investigating a merger other than for reasons of competition<sup>500</sup>, and the Act makes provision for the issue of a European intervention notice in such cases. Chapters 2 and 3 of Part 3 of the Enterprise Act provide for the investigation of mergers in ‘public interest cases’ and ‘other special cases’ respectively. Such cases will be rare, and the provisions are deliberately drafted narrowly; they will be described here only briefly.

Chapter 2 of Part 3 of the Act consists of sections 42 to 58, which deal with public interest cases. The Secretary of State may give an ‘intervention notice’ to the OFT if he believes that one or more public interest considerations are relevant to a consideration of a relevant merger situation<sup>501</sup>. Section 58(1) of the Enterprise Act specifies national security as a public interest consideration: it is given the same meaning as in Article 21(4) of the EUMR<sup>502</sup>. Section 375 of the Communications Act 2003<sup>503</sup> adds several additional ‘media public interest considerations’ to section 58 of the Enterprise Act: the need for accurate presentation of news and free expression of opinion in newspapers<sup>504</sup>; the need for a sufficient plurality of views in newspapers in each market for newspapers in the UK<sup>505</sup>; the need for plurality of media ownership<sup>506</sup>; the need for a wide range of high-quality broadcasting, appealing to a wide variety of tastes and interests<sup>507</sup>; and the need for media owners to be committed to the objectives set out in section 319 of the Communications Act. In May 2004 the Department of Trade and Industry published a helpful Guidance document, *Enterprise Act 2002, Public Interest Intervention in Media Mergers*<sup>508</sup>. The Secretary of State is given power to add a new

<sup>498</sup> See the OFT’s *Mergers: Jurisdictional and procedural guidance*, ch 9 and the OFT/CC *Merger Assessment Guidelines*, Part 6; see further McElwee ‘Politics and the UK Merger Control Process: The Public Interest Exceptions and Other Collision Points’ (2010) 9(1) *Competition Law Journal* 77.

<sup>500</sup> See ch 21, ‘Article 21(4): legitimate interest clause’, pp 851–854.

<sup>501</sup> Enterprise Act 2002, s 42(2).

<sup>502</sup> *Ibid*, s 58(1) and (2).

<sup>503</sup> Note that s 373 of the Communications Act 2003 repeals the provisions in the Fair Trading Act 1973 that subjected newspaper mergers to a special regime; on the current law see Pryor ‘The New Regime for the Regulation of Newspaper Mergers’ (2003) 4 *Competition Law Journal* 63.

<sup>504</sup> Enterprise Act 2002, s 58(2A), as added by s 375 of the Communications Act 2003.

<sup>505</sup> *Ibid*, s 58(2B).

<sup>506</sup> *Ibid*, s 58(2C)(a).

<sup>507</sup> *Ibid*, s 58(2C)(b).

<sup>508</sup> Available at [www.culture.gov.uk](http://www.culture.gov.uk).

public interest consideration to section 58 of the Enterprise Act by statutory instrument, but this would require the approval of Parliament<sup>509</sup>. This was exercised by the Enterprise Act 2002 (Specification of Additional Section 58 Consideration) Order 2008<sup>510</sup> in order to add 'the interest of maintaining the stability of the UK financial system'.

Where an intervention notice has been given the OFT will give a report to the Secretary of State dealing with both the competition and the public interest considerations; in the case of a media merger the Office of Communications ('OFCOM') will also report on the media public interest considerations<sup>511</sup>. Following a review of the local and regional media regime<sup>512</sup> the OFT agreed a *Memorandum of Understanding* with OFCOM on the use of local media assessments in local media mergers<sup>513</sup>. The Secretary of State then has power to make a reference to the CC<sup>514</sup>; in exercising this discretion the Secretary of State is bound by the OFT's findings as to competition: his intervention is permitted only on public interest grounds<sup>515</sup>.

The CC must decide whether a relevant merger situation has been created<sup>516</sup>; it must also report on any competition issues and on admissible public interest considerations, as well as possible remedies<sup>517</sup>. The CC's report must be given to the Secretary of State<sup>518</sup>, and must contain its decisions on the questions it is required to answer together with reasons for those decisions<sup>519</sup>. As a general proposition the CC must report to the Secretary of State within 24 weeks of the reference, although in certain circumstances the period may be shorter or longer<sup>520</sup>. Where a 'new' public interest consideration is raised, requiring the approval of Parliament, there are restrictions on the action that can be taken if the public interest is not 'finalised' within 24 weeks of the serving of the intervention notice<sup>521</sup>. At the end of an investigation of a merger under the public interest provisions section 54 gives the Secretary of State power to make an 'adverse public interest finding'<sup>522</sup> within 30 days of receipt of the report from the CC<sup>523</sup>. The Secretary of State is not entitled to diverge from the finding of the CC on the competition issues<sup>524</sup>. Enforcement powers are conferred upon the Secretary of State to accept undertakings or to make orders to remedy, mitigate or prevent any of the effects adverse to the public interest which have resulted from, or may result from, the creation of any relevant merger situation. The powers available are set out in Schedule 7 to the Act<sup>525</sup>, and include the ability to order anything permitted by Schedule 8<sup>526</sup>; paragraph 20 of Schedule 8 enables action to be taken in the interests of national security, and paragraphs 20A<sup>527</sup> and 20B<sup>528</sup> enable appropriate action to be taken following investigations of media mergers and mergers affecting the stability of the UK financial system respectively. Provision is made for cases to revert to the competition authorities where an intervention notice ceases to have effect, either because the Secretary of State decides that a public interest consideration should not be

taken into account, or because parliamentary approval for a public interest consideration is not given<sup>529</sup>. The OFT has a function of advising the Secretary of State on mergers that might raise public interest considerations<sup>530</sup>, and the OFT and CC must bring to his attention any representations about the exercise of his powers as to what constitutes a public interest consideration<sup>531</sup>.

By 20 June 2011 two intervention notices have been issued under the public interest provisions (as opposed to the ‘special’ public interest provisions discussed below), *BSkyB/ITV* and *LloydsTSB/HBOS*. In the case of the acquisition by BSkyB of 17.9 per cent of the shares of ITV plc the Secretary of State issued an intervention notice on 26 February 2007<sup>532</sup>. A reference was made to the CC which considered that the acquisition would give rise to an SLC; however it did not consider that the acquisition endangered the plurality of the media<sup>533</sup>. The Secretary of State decided in January 2008 that BSkyB should reduce its shareholding in ITV to below 7.5 per cent<sup>534</sup>. On appeal the CAT dismissed BSkyB’s application for review of the CC’s assessment of the acquisition and its finding of an SLC, but upheld Virgin Media’s challenge to the CC’s interpretation of the media plurality provisions<sup>535</sup>. The Court of Appeal rejected a further appeal by BSkyB on the competition points, but allowed its appeal, and that of the Commission and the Secretary of State, on the media plurality point<sup>536</sup>. The Court of Appeal judgment contains valuable guidance on the media plurality provisions<sup>537</sup>. On 8 February 2010 the Secretary of State accepted final undertakings from BSkyB.

The second case, *LloydsTSB/HBOS*, arose against the background of exceptional instability in global financial markets. The Secretary of State issued an intervention notice in September 2008<sup>538</sup>; he subsequently decided not to refer the merger to the CC<sup>539</sup>. The CAT dismissed an application for review of the Secretary of State’s decision<sup>540</sup>.

## (B) Other special cases

Chapter 3 of Part 3 of the Act consists of sections 59 to 70, which deal with ‘other special cases’.

### (i) ‘Special public interest cases’

Sections 59 to 66 are concerned with an exceptional category of mergers that may be referred for investigation on public interest grounds, even though they do not meet either the turnover or the share of supply thresholds for reference contained in section 23 of the Act<sup>541</sup>. Two types of merger may be considered under the ‘special public interest’ provisions.

<sup>529</sup> Enterprise Act 2002, s 56.

<sup>530</sup> *Ibid*, s 57(1). <sup>531</sup> *Ibid*, s 57(2).

<sup>532</sup> [www.culture.gov.uk](http://www.culture.gov.uk).

<sup>533</sup> See [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>534</sup> See [www.culture.gov.uk](http://www.culture.gov.uk).

<sup>535</sup> Case Nos 1095/4/8/08 and 1096/4/8/08 *British Sky Broadcasting Group plc v Competition Commission and the Secretary of State for Business, Enterprise and Regulatory Reform* [2008] CAT 25, [2008] CompAR 223; the CAT also dismissed the appellants’ mirror image challenges to the partial divestiture remedy.

<sup>536</sup> *British Sky Broadcasting Group plc v Competition Commission* [2010] EWCA Civ 2, [2010] UKCLR 351.

<sup>537</sup> *Ibid*, paras 78–123.

<sup>538</sup> The relevant public interest consideration, the stability of the UK financial system, was created by the Enterprise Act 2002 (Specification of Additional Section 58 Consideration) Order 2008, SI 2008/2645.

<sup>539</sup> See [www.bis.gov.uk](http://www.bis.gov.uk); see also the OFT’s *Report to the Secretary of State on anticipated acquisition by Lloyds TSB plc of HBOS plc*, 24 October 2008, available at [www.of.gov.uk](http://www.of.gov.uk).

<sup>540</sup> Case No 1107/4/10/08 *Merger Action Group v Secretary of State for Business, Enterprise and Regulatory Reform* [2008] CAT 36, [2009] CompAR 133.

<sup>541</sup> See ‘The turnover test’, p 921 above.

The first is mergers involving certain government contractors or sub-contractors who may hold or receive confidential information or material relating to defence; the second type is certain mergers in the newspaper and broadcasting sectors that do not qualify for investigation under the general merger rules because they fall below the turnover or share of supply tests<sup>542</sup>. Such cases are not scrutinised on competition grounds, but against public interest considerations only. In such cases the Secretary of State serves a 'special intervention notice'<sup>543</sup>. The OFT will then conduct an initial investigation and give a report to the Secretary of State<sup>544</sup>; in media cases OFCOM will report on the media public interest considerations. The Secretary of State has power to refer the matter to the CC<sup>545</sup>, but must accept the OFT's decision as to whether a special merger situation has been created<sup>546</sup>. The CC will then investigate the matter and report to the Secretary of State<sup>547</sup>; he has power to take enforcement action<sup>548</sup>, but must accept the view of the CC as to whether a special merger situation has been created or may be expected<sup>549</sup>. The Secretary of State has similar enforcement powers to those in public interest cases<sup>550</sup>.

There have been two cases under these provisions. In the first, *Insys Group Ltd/ Lockheed Martin UK Ltd*, the Secretary of State issued a special intervention notice in August 2005; he subsequently accepted undertakings in lieu of a reference to the CC<sup>551</sup>. The Secretary of State also issued, in May 2009, a special intervention notice in the case of *Altas Elektronik UK Ltd/QinetiQ*; that case was also settled by undertakings in lieu of a reference<sup>552</sup>.

## (ii) European mergers

Where a merger has been completed or is in contemplation which has a Community dimension under the EUMR but which gives rise to a public interest consideration the Secretary of State may give a 'European intervention notice' to the OFT<sup>553</sup>, and has power to make an order to provide for the taking of action to remedy, mitigate or prevent effects adverse to the public interest which have resulted from, or may be expected to result from, the creation of the merger<sup>554</sup>. This provides a legal basis to proceed against mergers in relation to which the UK asserts a 'legitimate interest' under Article 21(4) of the EUMR<sup>555</sup>. Further provision is made in relation to European merger cases by the Enterprise Act (Protection of Legitimate Interests) Order 2003<sup>556</sup>.

European intervention notices have been issued on five occasions. The first four cases were settled on the basis of undertakings accepted by the Secretary of State to safeguard UK national security<sup>557</sup>. The fifth European intervention notice was issued by the Secretary of State on 4 November 2010 in relation to News Corp's proposed acquisition

of the shares in BSkyB that it does not already own<sup>558</sup>; however, following considerable controversy, News Corp abandoned its proposal in July 2011<sup>559</sup>.

### (C) Mergers in the water industry<sup>560</sup>

The Water Industry Act 1991, as amended by section 70 of the Enterprise Act 2002, contains special rules for mergers between water enterprises in England and Wales. The relevant provisions are sections 32 to 35 of the Water Industry Act, as substituted by section 70 of the Enterprise Act 2002; these provisions must be read in conjunction with Schedule 4ZA to the 1991 Act, as inserted by Schedule 6 to the 2002 Act. The purpose behind this special regime is to ensure that mergers do not adversely affect the ability of the Water Services Regulation Authority (OFWAT) to carry out its regulatory functions effectively by reducing the number of companies whose performances can be compared: OFWAT should be able to make use of ‘comparative’ or ‘yardstick’ competition. The provisions inserted by the Enterprise Act align the special arrangements for assessing water mergers with the general mergers regime. Two changes in particular should be noted. First, a turnover test is used to determine whether a reference should be made: the threshold was formerly based on the value of the assets acquired. Secondly, the OFT and the CC are responsible for water mergers; the Secretary of State is not involved.

Under the Water Industry Act, as amended, mergers between water enterprises in England and Wales are subject to a mandatory reference by the OFT to the CC<sup>561</sup>, unless the turnover of one or both of the enterprises is less than £10 million<sup>562</sup>. The CC must determine whether a water merger would prejudice the ability of OFWAT to make comparisons between water enterprises<sup>563</sup>. Part 3 of the Enterprise Act applies to water mergers, subject to any modifications that the Secretary of State might make by regulation: thus the powers that the OFT and the CC have in relation to mergers generally also apply in the case of water mergers<sup>564</sup>. The CC has published *Water Merger References: Competition Commission Guidelines* explaining its approach to mergers subject to these provisions<sup>565</sup>.

There had been one reference to the CC of a water merger under these provisions by 20 June 2011, *Mid-Kent Water/South-East Water*<sup>566</sup>. The CC concluded that there was a possibility that OFWAT’s ability to carry out comparisons might be prejudiced, but only to a limited degree; and the CC was satisfied in this case that the merger would generate customer benefits<sup>567</sup>. The CC required the merging parties to make a one-off price reduction to their customers totalling £4 million<sup>568</sup>.

<sup>558</sup> See [www.culture.gov.uk](http://www.culture.gov.uk); on 21 December 2010 the European Commission had cleared the merger unconditionally under the EUMR: Case COMP/M.5932.

<sup>559</sup> See Competition Commission News Release 41/11, 25 July 2011.

<sup>560</sup> See further Weir ‘Comparative Competition and the Regulation of Mergers in the Water Industry of England and Wales’ (2000) XLV *Antitrust Bulletin* 811; Barnes ‘Holding Back the Flow: Do the UK Water Merger Control Rules Risk Dampening Investment in the Sector?’ (2007) 1 *European Business Law Journal*, 205.

<sup>561</sup> Water Industry Act 1991, s 32. <sup>562</sup> *Ibid*, s 33(1).

<sup>563</sup> *Ibid*, Sch 4ZA, as inserted by Enterprise Act 2002, Sch 6; these provisions must be read in conjunction with the Water Mergers (Modification of Enactments) Regulations 2004, SI 2004/3202 and the Water Mergers (Determination of Turnover) Regulations 2004, SI 2004/3206.

<sup>564</sup> *Ibid*, Sch 4ZA, paras 1, 2 and 4(3).

<sup>565</sup> CC9, December 2004; see further OFT’s *Mergers – Jurisdictional and procedural guidance*, paras 10.1–10.3.

<sup>566</sup> See [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>567</sup> See the Final Report, paras 8.108–8.160.

<sup>568</sup> Note that the CC investigated eight mergers under the Water Industry Act 1991 prior to its amendment by the Enterprise Act 2002, three of which were prohibited outright: see *General Utilities plc/Colne Valley Water Company/Rickmansworth Water Co Cm 1929* (1990); *General Utilities plc/Mid Kent Water Co Cm 1125* (1990); *Southern Water plc/Mid Sussex Water Co Cm 1126* (1990); *Lyonnaise des Eaux SA/*

Where a merger does not involve one water company acquiring another it will be subject to the general merger rules. In such a case the OFT will look to OFWAT for advice on those aspects of the offer which will impact upon its ability to regulate the water undertakings or which might impact upon its wider ability to regulate other licensed providers of water and sewerage services.

In April 2009 the Government published a report, *Independent Review of Competition and Innovation in Water Markets*<sup>569</sup>; among its recommendations were changes to the special regime for water mergers. It is expected that a Government White Paper on these (and other) matters will be published in late 2011.

*Northumbrian Water Group plc* Cm 2936 (1995); *Wessex Water plc/South West Water* Cm 3430 (1996) (prohibited outright); *Severn Trent plc/South West Water* Cm 3429 (1996) (prohibited outright); *Mid Kent Holdings and General Utilities/SAUR Water Services* Cm 3514 (1997) (prohibited outright); *Vivendi Water UL plc/First Aqua (JVCo) Ltd* Cm 5681 (2002).

## Particular sectors

1. Introduction	962	7. Regulated Industries	977
2. Nuclear Energy	962	8. Electronic Communications	980
3. Military Equipment	963	9. Post	984
4. Agriculture	963	10. Energy	989
5. Coal and Steel	967	11. Water	991
6. Transport	967		

### 1. Introduction

The final chapter of this book will deal with three issues. First it will examine those sectors of the economy that are wholly or partly excluded from EU competition law, namely nuclear energy, military equipment and agriculture; the special regime for coal and steel products under the ECSC Treaty, now expired, is briefly referred to. Secondly, it will describe how the EU competition rules apply to the transport sector. Finally the chapter will look at the specific circumstances of so-called 'regulated industries' such as electronic communications, post and energy markets and the way in which EU and UK competition law apply to them. Constraints of space mean that these matters can be described only in outline; references to specialised literature on the application of competition law to particular sectors will be provided where appropriate.

### 2. Nuclear Energy<sup>1</sup>

The Treaty establishing the European Atomic Energy Community ('Euratom') deals with agreements regulating the supply and price of various nuclear materials. Articles 101 and 102 are capable of application to agreements and to the abuse of a dominant position to the extent that the Euratom Treaty is not applicable<sup>2</sup>. In its decisions under Article 101(3)

<sup>1</sup> See further Faull and Nikpay *The EC Law of Competition* (Oxford University Press, 2nd ed, 2007), paras 12.12–12.16; Bellamy and Child *European Community Law of Competition* (Oxford University Press, 6th ed, 2008, eds Roth and Rose), ch 12, Part 3; Cusack 'A Tale of Two Treaties: An Assessment of the Euratom Treaty in Relation to the EC Treaty' (2003) 40 CML Rev 117.

<sup>2</sup> For example the Commission opened an investigation in June 2010 into whether non-compete clauses in agreements between Areva and Siemens in respect of civil nuclear technology infringe Article 101: see Commission Press Release IP/10/655, 2 June 2010.

the Commission has tended to adopt a sympathetic attitude towards cooperation agreements in the nuclear industry<sup>3</sup>.

### 3. Military Equipment<sup>4</sup>

Article 346(1)(b) TFEU provides that a Member State may take such measures as it thinks necessary for the protection of the essential interests of its security which are connected with the production of or trade in arms, ammunitions and war materials; however these measures must not adversely affect the conditions of competition in the internal market regarding products which are not intended specifically for military purposes. The Council of Ministers has drawn up a list of the products to which Article 346(1) applies, although it has not been published; Article 346(2) provides that the Council may, acting unanimously on a proposal from the Commission, amend this list. There have been some concentrations in which the Commission's jurisdiction to apply the EU Merger Regulation ('the EUMR') was limited as a result of the operation of Article 346<sup>5</sup>.

### 4. Agriculture<sup>6</sup>

Articles 38 to 44 TFEU subject agriculture to a special regime with its own philosophy<sup>7</sup>. Article 42 provides that 'the rules on competition shall apply to production of and trade in agricultural products only to the extent determined by the European Parliament and the Council'. The Commission has published a number of policy documents on competition policy and agriculture which are available on its website<sup>8</sup>.

#### (A) Council Regulations 1184/2006 and 1234/2007

Article 1 of Regulation 1184/2006<sup>9</sup>, which replaced Regulation 26 of 1962, provides that Articles 101 and 102 shall apply to the production of or trade in the products listed in Annex I to the TFEU except for those covered by Regulation 1234/2007<sup>10</sup>, subject to the derogations set

<sup>3</sup> See eg *United Reprocessors GmbH* OJ [1976] L 51/7, [1976] 2 CMLR D1; *KEWA* OJ [1976] L 51/15, [1976] 2 CMLR D15; *GEC/Weir* OJ [1977] L 327/26, [1978] 1 CMLR D42; *Amersham International and Buchler GmbH Venture* OJ [1982] L 314/34, [1983] 1 CMLR 619; *Scottish Nuclear, Nuclear Energy Agreement* OJ [1991] L 178/31.

<sup>9</sup> OJ [2006] L 214/7.

<sup>10</sup> OJ [2007] L 299/1.

out in Article 2. Article 2 provides that Article 101(1) shall *not* apply to agreements that form an integral part of a national market organisation or that are necessary for the attainment of the objectives set out in Article 39 TFEU<sup>11</sup>. These derogations are strictly construed, and the Commission must give adequate reasons in the event that it allows such a derogation<sup>12</sup>. The derogations provided for in Article 2 of Regulation 1184/2006 relate only to the application of Article 101; the Chapter I prohibition of the UK Competition Act 1998 does not apply where there is a derogation from Article 101 in relation to agricultural products<sup>13</sup>. There is no derogation from the application of Article 102 to the agricultural sector.

Regulation 1234/2007 establishes a common organisation of agricultural markets for a number of sectors included in Annex I to the TFEU; it adopts the same approach as Regulation 1184/2006 to the application of the competition rules in those sectors<sup>14</sup>.

The monopoly powers of the Milk Marketing Board in the UK were the subject of various proceedings in the civil courts under Article 102<sup>15</sup>. Subsequently the Monopolies and Mergers Commission (now the Competition Commission) conducted an investigation under the now-repealed monopoly provisions of the Fair Trading Act 1973<sup>16</sup> which led to Milk Marque, a successor to some of the assets of the Milk Marketing Board, being voluntarily split into three separate companies; the Secretary of State asked the Office of Fair Trading (“the OFT”) to continue to monitor the situation<sup>17</sup>. Following the Commission’s report an Article 267 reference was made by the High Court to the Court of Justice on the relationship between national competition law and the EU rules on the agricultural sector<sup>18</sup>. The Court concluded that the existence of specific EU rules did not deprive national competition authorities of their right to apply national law to a milk producers’ cooperative in a powerful position on the market; however they should refrain from any measure which might undermine or create exceptions to the common organisation of the market in milk or compromise the objectives of the common agricultural policy.

## (B) Annex I products

If a product is *not* mentioned in Annex I of the TFEU, it cannot benefit from the derogations provided by Article 2 of Regulation 1184/2006. In *Coöperative Stremsel-en Kleurselfabriek v Commission*<sup>19</sup> the Court of Justice held that, as rennet was not specifically mentioned in Annex I, it was fully subject to the competition rules; the fact that rennet was used in the production of cheese, which is itself listed in the Annex, did not provide it with immunity from the application of Article 101(1). In *Pabst and Ricbarz/*

<sup>11</sup> On Article 39 see “The second derogation: common market organisations”, pp 966–967 below. Article 2 contains a sentence dealing with the activities of farmers’ associations; this is not a further exception, but rather an embellishment of the policy expressed in that provision: see *Milchförderungsfonds* OJ [1985] L 35/35, [1985] 3 CMLR 101, paras 21–22; *Bloemenveilingen Aalsmeer* OJ [1988] L 262/27, [1989] 4 CMLR 500, paras 150–152.

<sup>12</sup> See Cases T-70/92 and T-71/92 *Florimex v Commission* [1997] ECR II-697, [1997] 5 CMLR 769, upheld on appeal Case C-265/97 P *VBA and Florimex v Commission* [2000] ECR I-2061, [2001] 5 CMLR 1343; see also Case T-77/94 *Vereniging van Groothandelaren v Commission* [1997] ECR II-759, [1997] 5 CMLR 812, upheld on appeal Case C-266/97 P *VBA and Florimex v Commission* [2000] ECR I-2135.

<sup>18</sup> Case C-137/00 *R v Monopolies and Mergers Commission and the Secretary of State for Trade and Industry, ex p Milk Marque Ltd* [2003] ECR I-7975, [2004] 4 CMLR 293.

<sup>19</sup> Case 61/80 [1981] ECR 851, [1982] 1 CMLR 240.

*BNIA*<sup>20</sup> the Commission applied Article 101 to the French trade association responsible for armagnac, pointing out that, as this product did not appear in Annex I, it was to be treated as an industrial product. In *BNIC v Clair*<sup>21</sup> the Court of Justice held, for the same reason, that cognac was an industrial product and rejected an argument that it should be treated in a special way because of its importance to the economic welfare of a particular region of France.

In *BNIC v Yves Aubert*<sup>22</sup> the Court of Justice had to deal with the application of the competition rules to a demand by BNIC for a levy claimed against a wine grower for having exceeded a marketing quota. One issue was whether the competition rules could be applied to brandy. The Court, having observed that brandies are not listed in Annex I and so are industrial rather than agricultural products, added that the fact that some of the proceeds of levies raised by BNIC were intended for measures on wine and must, which do appear in Annex I, did not affect the application of Article 101(1). In *Dansk Pelsdyravlerforening v Commission*<sup>23</sup> the General Court rejected a claim that animal furs should be treated as an agricultural product; in *Göttrup-Klim Grovvarforeninger v Dansk Landburgs Grovvareselskab AmbA*<sup>24</sup> the Court of Justice held that fertiliser and plant protection products were not agricultural products. In *Sicasov* the Commission acknowledged that seeds fell within Annex I, but concluded that neither of the derogations in Regulation 26 (now Regulation 1184/2006) was applicable<sup>25</sup>.

### (C) The first derogation: national market organisations

Article 2 of Regulation 1184/2006 and Article 176(1) of Regulation 1234/2007 provide that Article 101 shall not apply to agreements which form an integral part of a national market organisation. However Regulation 1234/2007 (and its predecessors) established a common organisation for many agricultural products, so that the majority of national marketing organisations have ceased to exist. The Commission has construed this derogation from the application of Article 101(1) strictly<sup>26</sup>. In *FRUBO v Commission*<sup>27</sup> the Court of Justice upheld the Commission's decision<sup>28</sup> that a Dutch fruit marketing organisation did not benefit from the immunity contained in Article 2(1) since it was not a national marketing organisation. In *Scottish Salmon Board*<sup>29</sup> the Commission found that, as there was a common organisation of the market in fishery products<sup>30</sup>, the Scottish Salmon Board could not rely on the national market organisation defence.

In *New Potatoes*<sup>31</sup> rules were laid down by seven economic committees in France, acting under a French law of 1962, to organise and regulate the production and marketing of new potatoes. The rules were intended to deal with the problem of a slump in the market at a time

<sup>28</sup> *Geeves and Zonen v FRUBO* OJ [1974] L 237/16, [1974] 2 CMLR D89.

<sup>29</sup> OJ [1992] L 246/37, [1993] 5 CMLR 602, para 22.

<sup>30</sup> See Council Regulation 3796/81, OJ [1981] L 379/1.

<sup>31</sup> OJ [1988] L 59/25, [1988] 4 CMLR 790.

of over-production. The Commission was asked to declare that Article 101(1) was not applicable: as there was no common organisation of the market in question, the Commission had to decide whether the system qualified as a national market organisation. It held that this term must be defined in a way that would be consistent with the objectives of a common organisation under the second exception of Article 2 of Regulation 26: thus the objectives of the common agricultural policy, contained in Article 39 TFEU and referred to below, were read into the first exception of Article 2. The Commission went on to hold that the decisions and agreements of various producer groups did form an integral part of the national market organisation in question and concluded that Article 101(1) was not infringed.

#### (D) The second derogation: common market organisations

Article 2 of Regulation 1184/2006 also permits agreements which are necessary for the attainment of the objectives of the common agricultural policy. Article 39 sets out these objectives under five heads:

- to increase agricultural productivity
- to ensure a fair standard of living for the agricultural community
- to stabilise markets
- to ensure the availability of supplies
- to ensure supplies to consumers at reasonable prices.

Article 39(2) provides that, in implementing the common agricultural policy, account shall be taken, *inter alia*, of:

the particular nature of agricultural activity, which results from the social structure of agriculture and from structural and natural disparities between the various agricultural regions.

The aims expressed in Article 39 are not necessarily consistent with the normal forces of competition.

In *FRUBO v Commission*<sup>32</sup> the Court of Justice rejected a defence based on the second derogation in Article 2. A noticeable feature of the judgment is that, although some of the heads of Article 39 may have been satisfied, not all of them were: to put the matter another way, in order to come within this derogation it is necessary to satisfy all five heads of Article 39<sup>33</sup>. In practice it is likely that the Commission and the EU Courts will hold that the objectives of Article 39 are expressly or impliedly advanced by the provisions of any particular regulation establishing a common organisation of an agricultural sector, with the result that there is no remaining latitude for the parties to an agreement to argue that their agreement will have this effect<sup>34</sup>.

In *Bloemenveilingen Aalsmeer*<sup>35</sup> the Commission rejected an argument that exclusive dealing agreements between auctioneers and flower traders in respect of live plants and floricultural products could advance the objectives of Article 39. It published a decision to this effect, not only as the rules in question were the subject of litigation in the Dutch

<sup>32</sup> Case 71/74 [1975] ECR 563, [1975] 2 CMLR 123, paras 22–27.

<sup>33</sup> See similarly Cases T-70/92 etc *Florimex v Commission* [1997] ECR II-697, [1997] 5 CMLR 769, para 153 and Case T-217/03 *FNCBV v Commission* [2006] ECR II-4987, [2008] 5 CMLR 406, para 206.

<sup>34</sup> See eg *Cauliflowers* OJ [1978] L 21/23, [1978] 1 CMLR D66; *Milchförderungsfonds* OJ [1985] L 35/35, [1985] 3 CMLR 101.

<sup>35</sup> OJ [1988] L 262/27, [1989] 4 CMLR 500.

courts, but also as similar rules were being applied by other auction houses<sup>36</sup>. In *Scottish Salmon Board*<sup>37</sup> the Commission rejected an argument that the Board's conduct was permissible as the industry was in economic difficulties; the Commission's view was that, if this was so, EU initiatives should be taken to deal with the problem: it was not for the parties themselves to take action which was unlawful under Article 101. In *Sicasov*<sup>38</sup> the Commission held that an agreement for the licensing of seeds was not necessary for the attainment of the objectives in Article 39 TFEU<sup>39</sup>.

The Commission rejected defences based on the second derogation in *French beef*<sup>40</sup>, *Raw Tobacco Spain*<sup>41</sup>, *Raw Tobacco Italy*<sup>42</sup> and *Bananas*<sup>43</sup>.

## 5. Coal and Steel

Coal and steel were originally dealt with by the Treaty of Paris of 1951 establishing the European Coal and Steel Community. The ECSC Treaty contained rules on competition that were similar in many respects to Articles 101 and 102 TFEU, although there were some material differences. The ECSC Treaty expired on 23 July 2002 which means that the coal and steel sectors are now subject to Articles 101 and 102 TFEU and the EUMR. The Commission has published a Communication explaining the consequences of the expiry of the ECSC Treaty<sup>44</sup>.

## 6. Transport<sup>45</sup>

The TFEU contains special provisions on transport in Articles 90 to 100. Article 90(1) provides that these provisions are applicable to road, rail and inland waterway transport; Article 90(2) provides that the European Parliament and the Council of Ministers may lay down appropriate provisions for sea and air transport. Thus the Treaty itself recognises a distinction between these two categories, the difficulty being that the latter are subject to numerous international arrangements and are of particular political sensitivity.

<sup>38</sup> OJ [1999] L 14/27, [1999] 4 CMLR 192.

<sup>39</sup> *Ibid*, para 68.

<sup>40</sup> OJ [2003] L 209/12, [2003] 5 CMLR 891, paras 135–149, upheld on appeal Cases T-217/03 etc *FNCBV v Commission* [2006] ECR II-4987, [2008] 5 CMLR 406, paras 197–209.

<sup>41</sup> Decision of 20 October 2004, paras 337–348, upheld on appeal Case T-33/05 *Compañía española de tabaco en rama, SA v Commission* [2011] ECR II-000, paras 153–164.

<sup>42</sup> Decision of 20 October 2005, paras 306–311.

<sup>43</sup> Decision of 15 October 2008, paras 344–349.

<sup>44</sup> Communication from the Commission concerning certain aspects of the treatment of competition cases resulting from the expiry of the ECSC Treaty, OJ [2002] C 152/5, [2002] 5 CMLR 1036, section 2; the General Court held in Case T-24/07 *ThyssenKrupp Stainless AG v Commission* [2009] ECR II-2309, [2009] 5 CMLR 1773, that, after the ECSC Treaty expired, the Commission was able to adopt a decision that Article 65 ECSC had been infringed in the 1990s on the legal basis of Regulation 1/2003: *ibid*, paras 63–90; upheld on appeal Case C-352/09 P *ThyssenKrupp Nirosta v Commission* [2011] ECR I-000.

<sup>45</sup> See further Ortiz Blanco and Van Houtte *EC Competition Law in the Transport Sector* (Clarendon Press, 1996); Faull and Nikpay *The EC Law of Competition* (Oxford University Press, 2nd ed, 2007), ch 14; Bellamy and Child *European Community Law of Competition* (Oxford University Press, 6th ed, 2008, eds Roth and Rose), paras 12.004–12.051.

Articles 101 and 102 do apply to the transport sector (including air transport<sup>46</sup>), but in 1962 Council Regulation 141<sup>47</sup> provided that Regulation 17, which gave the Commission the necessary powers to implement the competition rules, did not apply to transport. The procedural lacuna left by Regulation 141 was filled in three stages: first, Council Regulation 1017/68<sup>48</sup> adopted specific provisions on the application of the competition rules to transport by road, rail and inland waterway (that is to say inland transport); secondly, Council Regulation 4056/86<sup>49</sup> provided the Commission with powers in the maritime transport sector; last came Council Regulation 3975/87<sup>50</sup> to deal with air transport. Since 1 May 2004 the procedural rules for the enforcement of Articles 101 and 102 in the transport sector are contained in Regulation 1/2003<sup>51</sup>; this means that the jurisdictional problem exposed in *Union Internationale des Chemins de Fer v Commission*<sup>52</sup>, where the General Court concluded that the Commission had proceeded under the wrong procedural regulation when applying Article 101 to arrangements for the sale of railway tickets by travel agents, would no longer occur.

## (A) Inland transport

### (i) Legislative regime

Council Regulation 1017/68 provided that certain technical agreements do not infringe Article 101, and that some cooperation agreements between small and medium-sized undertakings benefit from block exemption. That Regulation was repealed in 2009 by Council Regulation 169/2009<sup>53</sup> which entered into force in April of that year. The exception for technical agreements will now be found in Article 2 of Regulation 169/2009, and the block exemption for certain cooperation agreements in Article 3.

Several Council Directives were adopted in the first railway package of 1991 with the intention of opening up the rail sector to competition<sup>54</sup>, although the development of a single market in rail transport has been slow to develop<sup>55</sup>. A second package was adopted

in 2004<sup>56</sup> and a third in 2007<sup>57</sup>. In September 2010 the Commission published its proposal for a Directive establishing a single European railway area which, if adopted, will amend and consolidate the three railway packages<sup>58</sup>. The rail sector is subject to a complex regulatory regime under UK law, and the Office of Rail Regulation ('ORR') enjoys concurrent powers to apply the provisions of the Competition Act 1998 and market investigation provisions of the Enterprise Act 2002 to this sector<sup>59</sup>.

## (ii) Practical application of the competition rules to inland transport

The Commission has adopted several decisions in relation to inland transport. In *EATE Levy*<sup>60</sup> it condemned an agreement between French waterway carriers and French forwarding agents imposing a levy of ten per cent on freight charges for boat charters to destinations outside France, as it discriminated in favour of French carriers; the Court of Justice upheld the Commission on appeal<sup>61</sup>. In *Tariff Structures in the Combined Transport of Goods*<sup>62</sup> the Commission considered that the criteria in Article 101(3) were satisfied in the case of a tariff structure agreement between the rail companies of the EU on the sale of rail haulage in the international combined transport of goods.

In *European Night Services*<sup>63</sup> the Commission concluded that a joint venture established by five rail operators to provide night sleeper services through the Channel Tunnel between a variety of cities in the UK and continental Europe satisfied the criteria of Article 101(3). Under the system of granting individual exemptions then in force, the Commission made its decision subject to conditions and obligations to which the parents of the joint venture objected; the Commission limited the exemption to a period of time, ten years, which the parties considered to be too short, given the level of risk that they were undertaking. On appeal against the decision the General Court held in *European Night Services v Commission*<sup>64</sup> that the Commission had abjectly failed to demonstrate that the agreement between the rail operators had the effect of restricting actual and/or potential competition, with the consequence that its decision should be annulled; the General Court went further, holding that, even if there was an appreciable effect on

<sup>61</sup> Case 272/85 *ANTIB v Commission* [1987] ECR 2201, [1988] 4 CMLR 677.

<sup>62</sup> OJ [1993] L 73/38.

<sup>63</sup> OJ [1994] L 259/21, [1995] 5 CMLR 76.

<sup>64</sup> Cases T-374/94 etc [1998] ECR II-3141, [1998] 5 CMLR 718; see similarly the Commission's decision in *Eurotunnel* OJ [1994] L 354/66, [1995] 4 CMLR 801: the Commission had granted exemption to the operating agreement for the Channel Tunnel, but its decision was annulled on appeal by the General Court in Cases T-79/95 etc *SNCF v Commission* [1996] ECR II-1491, [1997] 4 CMLR 334 since the Commission had failed to demonstrate that the agreement would be restrictive of competition; for the eventual outcome of this case see the Commission's XXIXth *Report on Competition Policy* (1999), p 163.

competition, the Commission had failed to demonstrate that the exemption should be subject to the conditions and obligations imposed or should be granted for such a short period<sup>65</sup>. In another case relating to the Channel Tunnel, *ACT*<sup>66</sup>, the Commission authorised, subject to conditions, the creation of a joint venture company to market intermodal rail services through the tunnel<sup>67</sup>.

In *HOV SVZ/MCN*<sup>68</sup> the Commission imposed a fine on Deutsche Bahn of €11 million for imposing discriminatory rail transport tariffs for the inland carriage of sea-borne containers to and from Germany, depending on whether they were shipped through German ports on the one hand or Belgian and Dutch ones on the other. The decision was upheld on appeal to the General Court<sup>69</sup>, and the Court of Justice ruled that Deutsche Bahn's appeal to it was inadmissible<sup>70</sup>. In *GVG/FS* the Commission concluded that the Italian rail operator, Ferrovie dello Stato, had abused a dominant position by refusing to provide access to the Italian rail infrastructure, to enter into negotiations for the formation of an international grouping and to provide traction<sup>71</sup>.

In the UK the ORR imposed a fine of £4.1 million on a rail freight operator, EW&S, for abusing its dominant position in the market for the haulage of coal by rail, in particular by acting in a discriminatory and a predatory manner<sup>72</sup>. The ORR has adopted a number of non-infringement decisions in relation to the rail sector<sup>73</sup>. Under the market investigation provisions of the Enterprise Act 2002 the Competition Commission ('the CC') recommended that the Government should reform the rail passenger franchise process to address its concerns about the rolling stock leasing market<sup>74</sup>.

## (B) Maritime transport<sup>75</sup>

### (i) Legislative regime

For many years maritime transport was subject to a special procedural and substantive regime of its own, set out in Council Regulation 4056/86<sup>76</sup>. The cumulative effect of the Regulation 1/2003 and of Council Regulation 1419/2006<sup>77</sup>, which entered into force in October 2006, is that the special regime has been terminated and the sector is now subject to the same procedural and substantive rules as the rest of the economy.

**(A) Procedural rules**

Regulation 17 of 1962<sup>78</sup>, which gave the Commission power to enforce Articles 101 and 102, did not apply to the maritime transport sector. Council Regulation 4056/86<sup>79</sup> provided the Commission with power to enforce Articles 101 and 102 in relation to international maritime transport services from or to one or more [EU] ports with effect from 1987. Regulation 1/2003<sup>80</sup> repealed these special procedural rules with effect from 1 May 2004, since when maritime transport has been subject to the same procedural regime as the rest of the economy. Regulation 4056/86 did not empower the Commission to enforce the competition rules in the case of so-called ‘cabotage’, that is to say services between ports within the same Member State; also excluded were international tramp vessel services, that is to say the transport of goods in bulk where freight rates are negotiated on a case-by-case basis<sup>81</sup>. These exclusions were maintained by Article 32 of Regulation 1/2003 until October 2006, from when Article 2 of Regulation 1419/2006 repealed them: recital 12 of that Regulation described the exclusion of cabotage and tramp vessel services as a ‘regulatory anomaly’<sup>82</sup>. These changes mean that the Commission now has the power to apply Articles 101 and 102 to the entire maritime transport sector.

**(B) Substantive rules**

Article 2 of Regulation 4056/86 excluded ‘technical agreements’ from the scope of Article 101. More controversially, Articles 3 and 4 of Regulation 4056/86 provided block exemption for ‘liner conferences’, that is to say agreements between carriers concerning the operation of scheduled maritime transport services, allowing them to fix prices and regulate capacity. Following a consultation these substantive rules have been abolished<sup>83</sup>: Regulation 1419/2006 repealed Regulation 4056/86 in its entirety; however Article 1 provided transitional relief until 18 October 2008 for liner conferences that benefitted from the block exemption. In order to provide guidance to interested stakeholders affected by the demise of the block exemption the Commission published *Guidelines on the application of Article [101 TFEU] to maritime transport services*<sup>84</sup>; in particular they discuss the extent to which the exchange of information between competitors may infringe Article 101.

**(C) Block exemption for shipping consortia**

The Commission was given power by Council Regulation 479/92<sup>85</sup> to grant block exemption to some shipping consortia, and the first block exemption to be adopted was Regulation 870/95<sup>86</sup>. Over the years the enabling legislation was amended a number of times, as was the block exemption. In 2009 the Council decided to codify the enabling legislation in the interests of clarity and rationality, and it therefore adopted

<sup>78</sup> JO [1962] 13/204.

<sup>79</sup> OJ [1986] L 378/4.

<sup>80</sup> OJ [2003] L 1/1.

<sup>81</sup> See Regulation 4056/86, Article 1(3)(a).

<sup>82</sup> The Commission closed an investigation into the transport of bulk liquids by sea in 2008, after having sent statements of objections to a number of undertakings, as it concluded that the services in question may have been tramp vessel services and therefore excluded from the scope of Regulation 4056/86; following the repeal of Regulation 4056/86 agreements in the tramp vessel sector would be subject to investigation: see Commission MEMO/08/297, 8 May 2008.

<sup>83</sup> See *Review of Council Regulation 4056/86 and the responses to the Consultation*, available at [www.ec.europa.eu/competition/sectors/transport/legislation\\_maritime\\_archive.html](http://www.ec.europa.eu/competition/sectors/transport/legislation_maritime_archive.html).

<sup>84</sup> OJ [2008] C 245/2.

<sup>85</sup> OJ [1992] L 55/3.

<sup>86</sup> OJ [1995] L 89/7.

Regulation 246/2009 which repeals and replaces earlier legislation<sup>87</sup>. Under the powers conferred upon it the Commission adopted Regulation 906/2009<sup>88</sup> which confers block exemption on shipping consortia in so far as they provide international liner shipping services from or to one or more EU ports<sup>89</sup>; the block exemption does not apply in the event that the consortium involves certain ‘hard-core restrictions’ such as price fixing to third parties<sup>90</sup>, and there is a 30 per cent market share threshold above which a consortium would not benefit from the block exemption<sup>91</sup>.

## (ii) Practical application of the competition rules to maritime transport

The relationship between the Commission and certain operators in the maritime transport sector has not been particularly harmonious. There have been a number of decisions in which the Commission has found infringements of Articles 101 and 102. The first fine in this sector was imposed in *Secretama*<sup>92</sup>, for supplying incorrect information in response to a request for information by the Commission under Article 16(3) of Regulation 4056/86. The Commission also imposed fines of €5,000 on *Ukwal*<sup>93</sup> and €4,000 on *Mewac*<sup>94</sup> for failing to submit to investigations under Article 18 of Regulation 4056/86.

The first decision of the Commission imposing a fine for a substantive infringement of Articles 101 and 102 in the maritime transport sector was *French-West African Shipowners’ Committees*<sup>95</sup>. The Commission considered that the Committees had cartelised the entire trade in liner cargo between France and various West African ports; quotas had been established and procedures established to ensure compliance. The offences arose both under Article 101 and under the concept of collective dominance in Article 102. The result of the practices was to exclude third parties from the trade. Various defences (for example that the agreements were ‘technical’ under Article 2 of Regulation 4056/86, that the block exemption under Article 3 was applicable and that the Committees were subject to ‘state compulsion’<sup>96</sup>), were rejected. In fixing the level of the fines, which exceeded €15 million, the Commission noted that usually when it applies the competition rules in new circumstances it proceeds with moderation; on this occasion however it saw no reason for moderation, since the parties were well aware of the illegality of their conduct and that the block exemption in Regulation 4056/86 was unavailable<sup>97</sup>. In *Cewal*<sup>98</sup> the Commission imposed fines totalling €10.1 million on members of a liner conference, Cewal, for abusing their collective dominant position by taking action designed to eliminate their principal independent competitors, for example by offering lower freight rates and by offering loyalty rebates. The Commission’s finding of collective dominance and its condemnation of the abusive practices were upheld both by the General Court<sup>99</sup> and

<sup>98</sup> OJ [1993] L 34/20, [1995] 5 CMLR 198; the treatment of collective dominance in this case is discussed in ch 14, ‘The judgment of the Court of Justice in *Compagnie Maritime Belge Transports v Commission*’, pp 577–579, and the condemnation of the lower freight rates is discussed in ch 18, ‘*Compagnie Maritime Belge v Commission*’, pp 750–752.

<sup>99</sup> Cases T-24/93 etc *Compagnie Maritime Belge NV v Commission* [1996] ECR II-1201, [1997] 4 CMLR 273.

the Court of Justice<sup>100</sup>; however the fines on the appellants were annulled by the Court of Justice because the Commission's statement of objections had been addressed directly only to the conference, Cewal, and not to its individual members, who had merely received a copy. Thirty-seven months after the judgment of the Court of Justice, the Commission served a new statement of objections on *Compagnie Maritime Belge*, one of the members of the conference, informing it that the Commission intended to impose a fine upon it for the infringements that it had found in the original decision and that had been upheld on appeal; this led to the imposition of a fine of €3.4 million on CMB<sup>101</sup>. CMB's appeal to the General Court, which included pleas that the Commission's second decision was unreasonably delayed and infringed the limitation rules, was unsuccessful<sup>102</sup>.

In *TAA*<sup>103</sup> and in *FEFC*<sup>104</sup> the Commission prohibited price fixing in relation to the land-leg of combined transport operations; even though Council Regulation 4056/86 conferred block exemption on price fixing in relation to the maritime element of the transportation of containers, the Commission did not consider that this should extend to the non-maritime part of a journey; the Commission's approach was upheld by the General Court on appeal<sup>105</sup>. The Commission imposed a fine in *Ferry Operators*<sup>106</sup> on five ferry operators who colluded with one another in order to overcome difficulties experienced in currency fluctuations following the devaluation of the pound sterling in September 1992. In *Europe Asia Trades Agreement*<sup>107</sup> the Commission held that agreements not to use capacity and to exchange information infringed Article 101(1) and failed to satisfy the criteria of Article 101(3). In *Trans-Atlantic Conference Agreement*<sup>108</sup> the Commission imposed fines totalling €273 million for infringement of Article 101 and for abusing a collective dominant position contrary to Article 102 by altering the competitive structure of the market and by placing restrictions on the availability and contents of service contracts. This decision was partially annulled on appeal: in particular the General Court disagreed with most of the findings of abuse contrary to Article 102; the fines in this case were annulled<sup>109</sup>. In *Greek Ferries*<sup>110</sup> the Commission imposed fines of €9.12 million for fixing ferry prices between Italy and Greece. In *Far East Trade and Tariff and Surcharges Agreement* it imposed fines totalling €6.932 million where the parties to the agreement in question had agreed not to discount from their published tariffs; however these fines were quashed on appeal to the General Court on the ground that the Commission had failed to give good reasons for their belated imposition<sup>111</sup>.

<sup>110</sup> OJ [1999] L 109/24, [1999] 5 CMLR 47, upheld on appeal to the General Court Cases T-56/99 etc *Marlines v Commission* [2003] ECR II-5225, [2005] 5 CMLR 1761; *Marlines'* appeal to the Court of Justice was dismissed in Case C-112/04 P *Marlines v Commission*, order of 15 September 2005.

<sup>111</sup> Case T-213/00 *CMA CGM v Commission* [2003] ECR II-913, [2003] 5 CMLR 268.

On a less hostile note, in *P&O Stena Line*<sup>112</sup> the Commission authorised, for three years, a joint venture to provide short cross-channel ferry services between the UK and France and Belgium. In 2001 the Commission renewed this authorisation for a period of six years<sup>113</sup>. The Commission was aware that there were some anxieties about price rises, but considered that they were understandable as the market adjusted to more normal competitive conditions following the abolition of duty-free sales on ferry crossings, as new capacity was absorbed and as fuel prices rose.

## (C) Air transport

### (i) Legislative regime<sup>114</sup>

A number of measures have been adopted in order to liberalise air transport in the EU. In the first liberalisation package of 1987<sup>115</sup> the Council of Ministers adopted a Directive on fares for scheduled air services between Member States<sup>116</sup> and a Decision on the sharing of passenger capacity between Member States<sup>117</sup>. The 1987 package was regarded as a first step towards the completion of the internal market in air transport. In 1990 Regulation 2343/90<sup>118</sup> on access for air carriers to scheduled intra-EU routes was adopted. In 1991 the Council adopted Regulation 249/91<sup>119</sup> on air cargo services between Member States and Regulation 295/91 on compensation to passengers denied boarding ('bumped') in air transport; the latter was replaced by Regulation 261/2004<sup>120</sup>.

In 1992 a further liberalisation package was adopted. Regulation 2407/92<sup>121</sup> dealt with the licensing of air carriers. Regulation 2408/92<sup>122</sup> provides that all EU carriers should have access to intra-EU routes (cabotage). Regulation 2409/92<sup>123</sup> provides that EU air carriers shall freely set their own fares. In March 2003 the Commission proposed several revisions in the third liberalisation package<sup>124</sup>. Regulation 95/93<sup>125</sup> establishes common rules for the allocation of slots at EU airports in order to ensure that they are made available on a neutral, transparent and non-discriminatory basis. Council Regulation 2299/89 established a

<sup>125</sup> OJ [1993] L 14/1, as amended by Regulation 894/2000, OJ [2002] L 142/3.

*Code of Conduct for Computerised Reservation Systems*<sup>126</sup>. The ground-handling sector was liberalised to allow greater access to the market by Directive 96/67<sup>127</sup>.

Despite these liberalisation measures there remain impediments to free competition in air transport markets. The lack of slots at premier airports distorts the market, as do bilateral agreements between individual Member States and third countries governing access to air space and which discriminate in favour of national carriers: some of these agreements were successfully challenged by the Commission before the Court of Justice under Article 43 TFEU in the so-called ‘*Open Skies*’ judgment<sup>128</sup>. Following that judgment Regulation 847/2004<sup>129</sup> requires Member States to notify the Commission of negotiations with third countries and to ensure that their agreements comply with EU law. An important step forward was the signature of the *Air Transport Agreement* between the US, the EU and the Member States on 30 April 2007<sup>130</sup> which authorises US and EU airlines to fly between any city in the US and any city in the EU; this agreement took effect on 30 March 2008 and was amended in June 2010<sup>131</sup>.

For many years air transport was subject to a special competition law regime contained in Council Regulation 3975/87<sup>132</sup>. It conferred power on the Commission to enforce the competition rules in the air transport sector to air transport services *between EU airports*; air transport between EU airports and third countries could be investigated only under the procedure provided for in Articles 104 and 105 TFEU<sup>133</sup>. The position is now much simpler: the applicable procedural regime is that of Regulation 1/2003<sup>134</sup>, and Council Regulation 411/2004<sup>135</sup> provides that the Commission’s powers under that Regulation apply to *all* routes, not only those within the EU.

Council Regulation 3976/87<sup>136</sup>, as subsequently amended, gave the Commission power to publish block exemptions in the air transport sector. For many years there were block exemptions for consultations between carriers on passenger tariffs on routes within the EU and for arrangements on slot allocation and airport scheduling; however these have

now lapsed<sup>137</sup>. Council Regulation 3976/87 was replaced, in 2009, by Council Regulation 487/2009<sup>138</sup>; however there are currently no block exemptions in the air transport sector.

The UK Civil Aviation Authority enjoys concurrent powers to apply the provisions of the Competition Act 1998 to the supply of air traffic services<sup>139</sup>.

## (ii) Practical application of the competition rules to air transport

The Commission has reviewed several cooperation agreements in the air transport sector under Article 101, for example *Lufthansa/SAS*<sup>140</sup>, *Austrian Airlines/Lufthansa*<sup>141</sup>, *Société Air France/Alitalia Linee Aeree Italiane SpA*<sup>142</sup> and *Austrian Airlines/SAS*<sup>143</sup>. In cases that arose prior to Regulation 1/2003 the Commission sometimes granted individual exemptions to cooperation agreements, subject to conditions and obligations: that was true of the first three cases cited above. Since Regulation 1/2003 the Commission contemplated closing the *Austrian Airlines/SAS* case on the basis of commitments offered by the parties under Article 9<sup>144</sup>; however that case did not reach a final decision. The Commission is considering the possibility of accepting commitments in the case of the *SkyTeam* airline alliance<sup>145</sup>. In the case of *British Airways/American Airlines/Iberia* the Commission accepted commitments under Article 9 of Regulation 1/2003 that would lead to the divestment of slots at London Heathrow and Gatwick airports and associated remedies that would facilitate entry and/or expansion on air routes between London and various US cities such as New York, Boston, Dallas and Miami; as a consequence the Commission closed its investigation. The Commission worked closely with the US authorities in this case, in particular with the Department of Transportation<sup>146</sup>.

In some cases an alliance between two airlines may fall to be considered under the EUMR rather than Article 101. This happened for example in *Alitalia/KLM* where the Commission regarded the alliance as a full-function joint venture, even though the parties did not create a corporate vehicle for the cooperation; the Commission cleared the merger after the parties agreed to modify the transaction to address its competition concerns<sup>147</sup>. The Commission cleared a merger subject to conditions in the case of *Air France/KLM*<sup>148</sup>; the clearance was unsuccessfully challenged in the General Court by a third party, *easyJet*<sup>149</sup>. In the case of *Ryanair/Aer Lingus* the Commission prohibited the proposed acquisition of *Aer Lingus* by *Ryanair*<sup>150</sup>, a decision that was upheld on appeal to

<sup>143</sup> See the Commission's *Market Test Notice*, OJ [2005] C 233/18.

<sup>144</sup> See ch 7, 'Article 9: commitments', pp 255–261 on the Article 9 procedure.

<sup>145</sup> See the Commission's *Market Test Notice* OJ [2007] C 245/46; see also Commission Press Release IP/07/1558, 19 October 2007.

<sup>146</sup> See Commission Press Release IP/10/936, 14 July 2010.

<sup>147</sup> Case JV 19, decision of 11 August 1999.

<sup>148</sup> See Case M 3280, Commission decision of 11 February 2004.

<sup>149</sup> Case T-177/04 *easyJet Co Ltd v Commission* [2006] ECR II-1931, [2006] 5 CMLR 663.

<sup>150</sup> Case M 4439, Commission decision of 27 June 2007.

the General Court<sup>151</sup>. The Commission also blocked the proposed acquisition by Olympic Airlines of Aegean Airlines which would have led to a quasi-monopoly on the Greek air transport market<sup>152</sup>. Mergers were cleared after Phase II investigations in the cases of *Lufthansa/SN Holding (Brussels Airlines)*<sup>153</sup> and *Lufthansa/Austrian Airlines*<sup>154</sup> on the basis of remedies offered to address the concerns about a reduction of competition on various routes: the remedies, centred on the divestment of slots at certain airports, resemble those in the *British Airways/American Airlines/Iberia* case. Another Phase II investigation, of *KLM/Martinair*<sup>155</sup>, culminated in an unconditional clearance. There have been several other mergers between airlines that have been reviewed, and cleared, by the Commission<sup>156</sup>.

Quite apart from the cooperation agreements and mergers in the air transport sector just referred to, the Commission has also proceeded against cartels (or alleged cartels) in this sector. In the case of *SAS/Maersk Air*<sup>157</sup> the Commission imposed fines of €39.4 million on SAS and €13.1 million on Maersk for market sharing, in particular with the consequence that SAS acquired a *de facto* quasi-monopoly on the Stockholm to Copenhagen route. The Commission's decision was upheld on appeal<sup>158</sup>. In November 2010 the Commission imposed fines of €799 million on 11 airlines for participation in a cartel in the provision of air cargo services<sup>159</sup>, and has carried out dawn raids in the international airline passenger sector<sup>160</sup>.

In the UK the CC considered that BAA's ownership of seven UK airports was detrimental to competition and, using its powers under the Enterprise Act 2002, required BAA to divest itself of three airports<sup>161</sup>.

## 7. Regulated Industries

### (A) Demonopolisation, liberalisation and privatisation

One of the most dramatic economic developments in the final two decades of the twentieth century was the demonopolisation and liberalisation of industries which for many years had been the preserve of state-owned monopolies; in many cases this process was coupled with privatisation or partial privatisation of state-owned undertakings<sup>162</sup>.

<sup>151</sup> Case T-342/07 *Ryanair Holdings plc v Commission* [2010] ECR II-000, [2011] 4 CMLR 245.

<sup>152</sup> Case M 5830, Commission decision of 26 January 2011; the decision is on appeal Case T-202/11 *Aeroporja Aigaiou Aeroporiki and Marfin Investment Group Symmetochon v Commission*, not yet decided.

<sup>153</sup> Case COMP/M.5335, Commission decision of 22 June 2009.

<sup>154</sup> Case M 5440, decision of 28 August 2009.

<sup>155</sup> Case M 5141, decision of 17 December 2008.

<sup>156</sup> See eg Case M 5889 *United/Continental* decision of 27 July 2010 and Case M 5403 *BMI/Lufthansa* decision of 14 May 2009.

<sup>157</sup> OJ [2001] L 265/15, [2001] 5 CMLR 1119.

<sup>158</sup> Case T-241/01 *SAS v Commission* [2005] ECR II-2917, [2005] 5 CMLR 922.

<sup>159</sup> Commission Press Release IP/10/1487, 9 November 2010; note that this decision has now been appealed to the General Court, Cases T-9/11 etc *Air Canada v Commission*, not yet decided, and there are several pending damages actions arising from this case both in England and Wales (see ch 8, 'Group litigation orders and representative actions', p 314) and in other jurisdictions.

<sup>160</sup> Commission MEMO/08/158 of 11 March 2008.

<sup>161</sup> Final Report, 19 March 2009, available at [www.competition-commission.org.uk](http://www.competition-commission.org.uk); BAA successfully challenged the CC decision in Case No 1110/6/8/09 *BAA v Competition Commission* [2009] CAT 35, [2009] CompAR 23; the CC's appeal against this judgment was partially upheld in *Competition Commission v BAA Ltd* [2010] EWCA Civ 1097. BBA subsequently appealed the CC decision that there were no material changes in circumstances since the 2009 Report: Case No 1185/618/11, not yet decided.

<sup>162</sup> On privatisation see Vickers and Yarrow *Privatisation and Economic Analysis* (MIT Press, 1987); Veljanowski *Selling the State – Privatisation in Britain* (Weidenfeld and Nicolson, 1987); *Privatisation and*

Obvious examples are the so-called ‘utilities’ such as telecommunications, gas, electricity and water. The problems for competition policy that arise where former monopolists are ‘released’ into the free market are obvious: in so far as there is no effective competition, which is particularly likely to be the case in the early years, they may be able to charge excessive prices; and they may also be able to adopt tactics intended to foreclose new competitors from entering the market. At the same time it is necessary to ensure that former monopolists provide adequate services of an appropriate standard. A complicating factor is that utilities are often subject to a requirement that they comply with a ‘universal service obligation’, for example a duty to undertake the daily delivery of letters or to maintain an electricity or water supply to business and residential premises. Undertakings that are subject to a universal service obligation of this kind may need some immunity from competition so that they can make sufficient profits to enable them to perform it, which is why, for example, postal operators historically enjoyed a legal monopoly over the delivery of letters of less than a certain weight and size<sup>163</sup>.

### (B) EU law and the liberalisation of markets

In the EU considerable steps have been taken towards the liberalisation of utilities and the development of a single market, albeit with greater success in some sectors than in others. Directives have been adopted in the case of electronic communications, post and energy markets with a view to creating conditions in which competitive markets develop. At the same time the European Commission has been adapting the principles of competition law and applying them to these sectors; in particular the so-called ‘essential facilities doctrine’ may play an important role in enabling third parties to gain access to physical infrastructures where this is necessary for the provision of competitive services<sup>164</sup>.

### (C) Regulatory systems in the UK for utilities

In the UK detailed regulatory regimes were established for the industries that were privatised in the 1980s and 1990s, namely telecommunications, gas, electricity, water, aviation and rail transport; these regimes provide, *inter alia*, for price control where persistent market power means that the normal process of competition will not deliver competitive prices to consumers<sup>165</sup>. The sectoral regulators<sup>166</sup>, such as the Office of Communications, act as a surrogate for competition, at least until effective competition develops, by imposing constraints on what the regulated undertakings can do; the regulators are charged with the responsibility of protecting consumers, promoting competition where possible and controlling prices. In a sense, regulators ‘hold the fort’ until competition arrives. Regulated undertakings operate subject to licences that impose obligations upon them

*Competition: A Market Prospectus* (Hobart Paperback 28, 1988, ed Veljanowski); Graham and Prosser *Privatising Public Enterprises* (Oxford University Press, 1991).

<sup>163</sup> On the permitted ‘reserved area’ for letters under EU law, see ‘Legislation’, pp 984–985 below.

<sup>164</sup> See ch 17, ‘Is the product to which access is sought indispensable to someone wishing to compete in the downstream market?’, pp 701–707 on the essential facilities doctrine, noting the need, discussed there, to impose constraints upon it; these constraints are not so important where a facility was developed by a state-owned monopolist as opposed to an undertaking operating in the private sector: see the Opinion of Advocate General Mazák given on 2 September 2010 in Case C-52/09 *Konkurrensverket v TeliaSonera AB*, paras 24–28.

<sup>165</sup> See generally Armstrong, Cowan and Vickers *Regulatory Reform: Economic Analysis and British Experience* (MIT Press, 1994); *Competition in Regulated Industries* (Oxford University Press, 1998, eds Helm and Jenkinson); Baldwin and Cave *Understanding Regulation: Theory, Strategy and Practice* (Oxford University Press, 1999), in particular chs 14–18.

<sup>166</sup> See ch 2, ‘Sectoral regulators’, pp 68–69.

and that attempt to prevent conduct, *inter alia*, that will be anti-competitive, discriminatory or exploitative. The regulators monitor these licences and have powers to enforce compliance with them; in the event of disputes with regulated undertakings as to the appropriate terms for inclusion in a licence, the regulators can make a so-called 'modification reference' to the CC which will decide whether the matters referred operate, or may be expected to operate, against the public interest, and, if so, whether the effects adverse to the public interest could be remedied by modifications to the licences<sup>167</sup>. The sectoral regulators also have concurrent powers, with the OFT, to apply Articles 101 and 102 TFEU and the Chapter I and Chapter II prohibitions in the Competition Act 1998 in the sectors for which they are responsible<sup>168</sup>.

#### (D) Price caps

A particular problem in the regulated industries is the control of prices. A central proposition of competition policy is that price should be determined by the market, and not by the state or an agency of the state. Competition authorities take action against excessive prices only rarely<sup>169</sup>. However where there is monopoly or near-monopoly, in particular in relation to essential services such as voice telephony or the supply of electricity, price control may be necessary; where this is the case, various techniques can be deployed to determine what the price should be. One method of capping prices is to fix an upper limit on the rate of return permissible on the capital invested in an industry: this, however, may encourage regulated bodies to over-invest, in order to expand the base on which profit can be earned; furthermore this technique does nothing to encourage efficiency. In the UK the price control function has therefore been exercised through the 'RPI minus X' formula: regulated undertakings are allowed to increase their prices only by the increase in the Resale Prices Index, less a particular percentage as fixed by the relevant regulator<sup>170</sup>. Over a period of time this formula leads to a reduction in prices in real terms, thereby benefitting the consumer and forcing the privatised industries to increase efficiency in order to continue in profit. The 'RPI minus X' formula encourages firms to become more efficient since, if they can cut their costs, they will make a higher profit. A further benefit of the 'RPI minus X' formula is that it is relatively simple to apply: the regulator simply sets the figure, after which all that is necessary is to check that the price is not being exceeded. When deciding the value of X for the purpose of 'RPI minus X', the regulator is asked, in effect, to determine the extent to which added efficiency is possible within the industry in question<sup>171</sup>.

In the text that follows relevant provisions of EU and UK law will be briefly discussed, so that the reader has an idea of the regulatory environment of the electronic communications, post, energy and water markets and of the possible application of competition law to them. However the text is intended as a mere introduction to subject-matter that

<sup>167</sup> For an example of a modification reference see *Stansted price control review*, 4 November 2008; summaries of these reports can be found at [www.competition-commission.org.uk](http://www.competition-commission.org.uk).

<sup>168</sup> On concurrency under the Competition Act 1998 see ch 10, 'Concurrency', pp 437–439.

<sup>169</sup> See ch 18, 'Exploitative Pricing Practices', pp 718–728.

<sup>170</sup> See generally *Incentive Regulation: Reviewing RPI-X and Promoting Competition* (Centre for the Study of Regulated Industries, 1992); Spring 'An Investigation of RPI-X Price Cap Regulation using British Gas as a Case-study' (CRI, 1992); Cave and Mill 'Cost Allocation in Regulated Industries' (CRI, 1992).

<sup>171</sup> For a review of the 'RPI minus X' in the energy sector see OFGEM document 13/09 'Regulating energy networks for the future: RPI-X@20 Principles, Process and Issues', 27 February 2009, available at [www.ofgem.gov.uk](http://www.ofgem.gov.uk).

is substantial and complex; references to more detailed literature will be provided where appropriate.

## 8. Electronic Communications<sup>172</sup>

### (A) EU law

#### (i) Legislation

There are two ‘streams’ of Directives of relevance to the electronic communications sector. The first consists of Directives adopted by the Council of Ministers and the European Parliament under Article 114 TFEU to bring about harmonisation necessary for the establishment of an internal market. A series of Directives, dating back to 1990, had been adopted under Article 114; by the end of that decade<sup>173</sup> the convergence of the telecommunications, media and information technology sectors meant it was desirable that a single regulatory framework for electronic communications should cover all transmission networks and services. This led to the adoption of a package of five Directives and one Decision in 2002<sup>174</sup>. The package was amended in December 2009 by two further Directives<sup>175</sup>. Under this regulatory framework national regulatory authorities are required to impose regulatory obligations on undertakings in the electronic communications sector that have significant market power, which for this purpose is given the same meaning as ‘dominance’ in Article 102, in any relevant markets. The Commission published a Recommendation on *Relevant Product and Service Markets* to be regulated in accordance with the rules set out in the package<sup>176</sup>: a new Recommendation was published in November 2007<sup>177</sup>; and in July 2002 the Commission published its guidelines

<sup>172</sup> See further Gillies and Marshall *Telecommunications Law* (Butterworths, 2nd ed, 2003), ch 3; Geradin and Kerf *Controlling Market Power in Telecommunications* (Oxford University Press, 2003); Nihoul and Rodford *EU Electronic Communications Law* (Oxford University Press, 2004); Nikolinakos *EU Competition Law and Regulation in the Converging Telecommunications, Media and IT Sectors* (Kluwer Law International, 2006); Farr and Oakley *EU Communications Law* (Sweet & Maxwell, 2nd ed, 2006); Faull and Nikpay *The EC Law of Competition* (Oxford University Press, 2nd ed, 2007), ch 13; Bellamy and Child *European Community Law of Competition* (Oxford University Press, 6th ed, 2008, eds Roth and Rose), paras 12.087–12.168; Garzaniti *Telecommunications, Broadcasting and the Internet: EU Competition Law and Regulation* (Sweet & Maxwell, 3rd ed, 2010).

<sup>173</sup> Commission Working Document *Proposed New Regulatory Framework for Electronic Communications Networks and Services* COM(2001) 175 final, 28 March 2001.

<sup>174</sup> See Directive of the European Parliament and of the Council on a common regulatory framework for electronic communications networks and services, OJ [2002] L 108/33 (the ‘Framework Directive’); Directive of the European Parliament and of the Council on the authorisation of electronic communications networks and services, OJ [2002] L 108/22 (the ‘Authorisation Directive’); Directive of the European Parliament and of the Council on access to, and interconnection of, electronic communications networks and associated facilities, OJ [2002] L 108/7 (the ‘Access Directive’); Directive of the European Parliament and of the Council on universal service and users’ rights relating to electronic communications networks and services, OJ [2002] L 108/51 (the ‘Universal Service Directive’); Directive of the European Parliament and of the Council concerning the processing of personal data and the protection of privacy in the electronic communications sector, OJ [2002] L 201/37 (the ‘Data Protection Directive’); and the Radio Spectrum Decision, OJ [2002] L 108/1; see Bavasso ‘Electronic Communications: A New Paradigm for European Regulation’ (2004) 41 CML Rev 87.

<sup>175</sup> Directive 2009/136/EC of the European Parliament and of the Council of 25 November 2009 amending the Universal Service Directive and the Data Protection Directive, OJ [2009] L 337/11; Directive 2009/140/EC of the European Parliament and of the Council amending the Framework Directive, the Access Directive and the Authorisation Directive, OJ [2009] L 337/37.

<sup>176</sup> OJ [2003] L 114/45.

<sup>177</sup> Available at [www.ec.europa.eu/information\\_society](http://www.ec.europa.eu/information_society).

on *Market Analysis and the Calculation of Significant Market Power* to be followed by national authorities in reaching their conclusions<sup>178</sup>. A 'Body of European Regulators for Electronic Communications' has been established to ensure the consistent application of the regulatory package<sup>179</sup>. There is also a Council and Parliament Regulation of 2000 on *Unbundled Access to the Local Loop*<sup>180</sup>. The Commission reports each year to the Council, the Parliament, ECOSOC and the Committee of the Regions on progress achieved in implementing the EU's electronic communications policy.

The second stream of EU legislation consists of Directives adopted by the Commission pursuant to Article 106(3) TFEU<sup>181</sup>. The first of these was the Telecommunications Terminal Equipment Directive of 1988<sup>182</sup>, which required Member States to withdraw special or exclusive rights granted to undertakings with respect to the importation, marketing, connection and bringing into service of telecommunications terminal equipment and the maintenance of such equipment. The Commission subsequently adopted the Telecommunications Services Directive of 1990<sup>183</sup>, which began the process of opening up telecommunications markets themselves to competition. The Services Directive has been amended several times in order to expand its scope; it was successively extended to apply to the satellite<sup>184</sup>, cable<sup>185</sup> and mobile telephony<sup>186</sup> sectors, and ultimately required full competition in telecommunications markets<sup>187</sup>. The Commission has also amended the original Services Directive to require that, where a single operator owns both a telecommunications and a cable network, they must be established as separate legal entities<sup>188</sup>. A consolidating Directive, bringing all these pieces of legislation into a single legal instrument, was adopted in September 2002<sup>189</sup>.

In May 2010 the Commission launched its *Digital Agenda for Europe*<sup>190</sup>, suggesting various ways in which to create a digital single market. As part of this *Agenda* the Commission adopted a Recommendation on regulated access to 'Next Generation Access Networks'<sup>191</sup> and two other measures<sup>192</sup> in order to facilitate the delivery of fast and ultra-fast broadband.

## (ii) Application of EU competition law

The Commission has been active in applying the competition rules to the telecommunications sector for many years. In 1991 it published *Guidelines on the Application of EEC Competition Rules in the Telecommunications Sector*<sup>193</sup>, and in 1998 it adopted the *Notice on the Application of the Competition Rules to Access Agreements in the Telecommunications Sector*<sup>194</sup>. The latter of these two instruments is of particular interest. Part I is entitled 'Framework', and discusses the relationship between the competition rules and sector-specific regulation. Part II deals with market definition, and Part III provides detailed analysis of the application of the principles of competition law to access agreements; the most extensive discussion is of the 'essential facilities doctrine' under Article 102, but the Notice also contains useful guidance on other types of abuse.

The Commission has adopted numerous favourable decisions on strategic alliances in the electronic communications sector, such as *BT/MCI*<sup>195</sup>, *Atlas*<sup>196</sup>, *Iridium*<sup>197</sup>, *Phoenix/GlobalOne*<sup>198</sup>, *Uniworld*<sup>199</sup>, *Unisource*<sup>200</sup>, *Cégétel+4*<sup>201</sup> and *Télécom Développement*<sup>202</sup>. It also approved the *GSM MoU Standard International Roaming Agreement*, which enables GSM mobile telephone users in one country to use the network in another country<sup>203</sup>. In *T-Mobile Deutschland/O2 Germany* the Commission authorised an agreement that would enable the parties to roam on one another's 3G networks<sup>204</sup>. On appeal the General Court was critical of the Commission's analysis and partially annulled the decision<sup>205</sup>.

Acting under Article 102 in conjunction with Article 106 the Commission took action against Italy and Spain as a result of their discriminatory treatment of the second operators of mobile telephony in those countries<sup>206</sup>; however it declined to take similar action against Austria, which had not discriminated in favour of the incumbent operator<sup>207</sup>.

In 1998 the Commission initiated action in relation to possible excessive or discriminatory prices for calls to mobile telephones<sup>208</sup>, which ended in May 1999 following significant price reductions<sup>209</sup>. In 1999 the Commission launched a sector inquiry into three issues, leased lines, mobile roaming services and the local loop<sup>210</sup>. The leased line investigation

<sup>209</sup> See Commission Press Release IP/99/298, 4 May 1999 and Commission's XXIXth *Annual Report on Competition Policy* (1999), pp 375–380.

<sup>210</sup> See the Commission's XXIXth *Report on Competition Policy* (1999), points 74–76; see further the XXXth *Report* (2000), points 157–160 and XXXIst *Report* (2001), points 125–131; speech by Sauter 'The Sector Inquiries into Leased Lines and Mobile Roaming: Findings and follow-up of the competition law investigations' 17 September 2001, available at [www.ec.europa.eu/competition/speeches/](http://www.ec.europa.eu/competition/speeches/).

ended in December 2002, as a result of substantial price decreases<sup>211</sup>. In September 2007 a Regulation of the Council and European Parliament was adopted with the intention of dealing with the problem of excessive prices for international mobile calls<sup>212</sup>.

The Commission has taken action on four occasions against incumbent operators for impeding access to the market for the provision of residential broadband internet access: it concluded that Wanadoo of France<sup>213</sup> was guilty of predatory pricing contrary to Article 102; that Deutsche Telekom of Germany<sup>214</sup> and Telefónica of Spain<sup>215</sup> were guilty of margin squeezes; and that Telekomunikacja Polska of Poland<sup>215a</sup> had imposed unfair trading conditions. The Commission is investigating similar misconduct by the incumbent operator in the Slovak Republic<sup>216</sup>.

The Commission has investigated many concentrations in the telecommunications sector under the EUMR. Of particular interest was *Telia/Telenor*<sup>217</sup>, where the Commission granted conditional clearance, following a Phase II investigation, to a concentration between the public telecommunications operators of Sweden and Norway; having received the clearance, the parties decided not to proceed with the transaction. Subsequently, the Commission gave conditional clearance in *Telia/Sonera*<sup>218</sup>, the incumbent operators of Sweden and Finland: this merger was consummated in December 2002. The Commission also granted conditional clearance, following a Phase II investigation, to *WorldCom/MCI*<sup>219</sup>; in 2000, however, it prohibited the concentration in *MCI WorldCom/Sprint*<sup>220</sup> which, in its view, would have created a dominant firm in the market for 'top-level' Internet interconnectivity. In *T-Mobile/tele.ring*<sup>221</sup> the Commission required remedies to approve a merger that it considered would otherwise lead to a non-collusive oligopoly in the Austrian mobile telephony sector. The Commission approved the joint venture in *T-Mobile/Orange*<sup>222</sup>, following a Phase I investigation, on condition that the parties amend a network sharing agreement with a competitor and agree to divest spectrum.

## (B) UK law

The Telecommunications Act 1984 established the office of Director General of Telecommunications and the regulatory framework for the telecommunications sector;

<sup>217</sup> Case M 1439 OJ [2001] L 40/1, [2001] 4 CMLR 1226.

<sup>218</sup> Case M 2803 [2002] C 201/19.

<sup>219</sup> Case M 1069, OJ [1999] L 116/1, [1999] 5 CMLR 876.

<sup>220</sup> Case M 1741, annulled on appeal for technical reasons Case T-310/00 *MCI Inc v Commission* [2004] ECR II-3253, [2004] 5 CMLR 1274.

<sup>221</sup> Case M 3916, decision of 26 April 2006; on non-collusive oligopoly see ch 21, 'The non-collusive oligopoly gap', pp 864–866.

<sup>222</sup> Case M 5650, decision of 1 March 2010; the Commission cooperated closely with the OFT and OFCOM during its investigation.

the position of the Director General of Telecommunications has now been abolished, and his powers have been transferred to the Office of Communications ('OFCOM')<sup>223</sup>. OFCOM is a single regulator for the media and communications industries and has considerable regulatory powers under the Communications Act 2003. OFCOM is required by the EU regulatory framework to review certain markets to determine whether the market is 'effectively competitive'<sup>224</sup>. If OFCOM determines that a market is not effectively competitive, it must identify undertakings with significant market power on that market and impose on such undertakings appropriate specific regulatory obligations or maintain or amend such obligations where they already exist<sup>225</sup>.

OFCOM has concurrent powers with the OFT to apply Articles 101 and 102 TFEU and the Chapter I and Chapter II prohibitions<sup>226</sup>. A Guideline has been adopted, *Competition Act 1998: The Application in the Telecommunications Sector*<sup>227</sup>, to explain the application of the competition rules in this sector; in particular it discusses the approach that will be taken to determining costs in a network industry such as telecommunications<sup>228</sup>.

OFCOM has adopted numerous decisions in which it concluded that there had been no infringement of the EU or the UK competition rules: these can be found in the Table of published decisions in chapter 9 and the accompanying website for this book<sup>229</sup>. Many disputes in the electronic communications sector are now being dealt with, not under competition law, but under sector-specific legislation<sup>230</sup>. In practical terms this may be a simpler and quicker way to address problems of market failure, with an obvious knock-on effect on the number of infringement decisions.

OFCOM also has concurrent powers with the OFT in relation to market investigation references under the Enterprise Act 2002<sup>231</sup>. OFCOM accepted extensive undertakings in lieu of a reference in *BT*<sup>232</sup> but made a reference to the CC in *Premium pay TV movies* in August 2010<sup>233</sup>.

## 9. Post<sup>234</sup>

### (A) EU law

#### (i) Legislation

Development of EU law and policy in the postal sector has come about partly through initiatives of the Council of Ministers and the Commission, and partly as a result of the very

<sup>223</sup> Office of Communications Act 2002, s 1.

<sup>224</sup> In identifying such markets, OFCOM is required to take the utmost account of recommendations and guidelines published by the Commission as to what product and service markets should be analysed: Article 16(1) of the Framework Directive.

<sup>225</sup> Communications Act 2003, s 45.

<sup>226</sup> *Ibid*, s 371.

<sup>227</sup> OFT 417 (2000).

<sup>228</sup> *Ibid*, paras 7.5–7.12.

<sup>229</sup> See ch 9, 'Table of published decisions', pp 374–389.

<sup>230</sup> See eg Communications Act 2003, ss 185–191 which contain OFCOM's duties and powers in relation to resolving certain regulatory disputes.

<sup>231</sup> Communications Act 2003, s 370; on market investigations see ch 11, 'Market Investigation References', pp 466ff.

<sup>232</sup> OFCOM, 22 September 2005, available at [www.ofcom.org.uk](http://www.ofcom.org.uk).

<sup>233</sup> OFCOM, 4 August 2010, available at [www.ofcom.org.uk](http://www.ofcom.org.uk).

<sup>234</sup> See further Bellamy and Child *European Community Law of Competition* (Oxford University Press, 6th ed, 2008, eds Roth and Rose), paras 12.004–12.051.

important judgment of the Court of Justice in the *Corbeau* case<sup>235</sup>. The Commission first began to take an interest in the postal sector, and the possibility of applying the competition rules to it, in the late 1980s. This culminated in the adoption of the Commission's Green Paper on *The Development of the Single Market for Postal Services*<sup>236</sup>. It proposed that all postal services, except ordinary internal letter deliveries, should be liberalised. In 1993 the Commission issued a communication setting out *Guidelines for the Development of [EU] Postal Services*<sup>237</sup>. The Council of Ministers asked the Commission to draft a proposal for a legislative framework; there are now two legislative instruments, the Directive of the European Parliament and of the Council on *Common Rules for the Development of the Internal Market of [EU] Postal Services and the Improvement of Quality of Service*<sup>238</sup> and the Commission *Notice on the Application of the Competition Rules to the Postal Sector*<sup>239</sup>. The Directive entered into force on 10 February 1998<sup>240</sup>. The Notice was adopted by the Commission on 17 December 1997. These two measures should be seen as part of a single package, the Directive intended to liberalise access to certain postal activities in the EU and the Notice to ensure that it is understood how the competition rules impact upon the sector.

The Directive establishes common rules throughout the EU on six matters:

- the provision of a universal service
- the extent of the permissible monopoly and the conditions governing the provision of non-monopolised services
- tariff principles and transparency of accounts for universal service provision
- the setting of quality standards for universal service provision
- the harmonisation of technical standards
- the creation of independent national regulatory authorities.

As regards the first two matters the Directive establishes *minimum* standards as to the universal standards and *maximum* limits to the permissible monopoly. Member States are entitled to confer lesser, but not broader, monopoly rights than those set out in the Directive. Article 7(1) provides essentially that the services 'which may be reserved' (that is which may remain a monopoly) shall be 'the clearance, sorting, transport and delivery of items of domestic correspondence, provided they weigh less than 350 grams'. The monopoly was reduced to letters weighing less than 50 grams by Directive 2002/39/EC<sup>241</sup>. A third postal directive, Directive 2008/06/EC, provides that all postal services in the EU should be opened to competition by 31 December 2010<sup>242</sup>. Directive 2008/06 also contains provisions relating to the universal service and the powers and role of independent national regulatory authorities.

<sup>235</sup> Case C-320/91 *Corbeau* [1993] ECR I-2533, [1995] 4 CMLR 621; see 'The *Corbeau* case and the universal service obligation', pp 986–987 below.

<sup>236</sup> COM(91) 476, June 1991.

<sup>237</sup> COM(93) 247.

<sup>238</sup> Directive 97/67/EC, OJ [1998] L 15/14.

<sup>239</sup> OJ [1998] C 39/2, [1998] 5 CMLR 108.

<sup>240</sup> The Directive was implemented in the UK by the Postal Services Regulations 1999, SI 1999/2107.

<sup>241</sup> Article 1 of Directive 2002/39/EC, OJ [2002] L 176/21, amending Article 7 of Directive 97/67/EC.

<sup>242</sup> OJ [2008] L 52/3, substantially amending Directive 97/96/EC; certain Member States (those which joined the EU in 2004 or which are very small) have the option to extend this deadline by a further two years.

(ii) **Application of EU competition law**(A) *The Corbeau case and the universal service obligation*<sup>243</sup>

There is general agreement among Member States that there are societal benefits in the maintenance of a universal postal service, that is to say a right of access to a minimum range of postal services, of a specified quality, which must be provided in all Member States at affordable prices for the benefit of all users, irrespective of their geographical location. People living in remote rural areas should have access to these services on no less favourable terms than those living in major conurbations; there is an obvious benefit, in terms of social cohesion, if all members of society can communicate with one another through the postal system, no matter where they live. A complex policy issue is to determine whether, and if so how extensive, a legal monopoly needs to be granted to the undertaking charged with performing this universal service in order to enable it to perform its duties; this question turns in part on how costly the universal service obligation is to the undertaking that has to perform it. Clearly the maintenance of a universal service is likely to be expensive, and the relevant provider will need to be assured of sufficient profits to pay for it; competitors should not be able to ‘pick the cherries’ or, depending on taste, ‘skim the cream’ and earn profits from lucrative services, while leaving the unprofitable services to the undertaking charged with the universal service obligation.

These issues came before the Court of Justice in the *Corbeau case*<sup>244</sup>. Corbeau had been charged with infringing a Belgian criminal law which conferred a monopoly on the Régie des Postes to collect, carry and distribute post in Belgium. Corbeau offered local courier services, but not a basic postal service. The Belgian court sought a preliminary ruling on the compatibility of the monopoly conferred by Belgian law with Articles 102 and 106 TFEU. The task for the Court of Justice was to determine whether Belgium was in breach of Article 106(1) in maintaining in force a measure contrary to Article 102, or whether the rights conferred on Régie des Postes satisfied the terms of Article 106(2). This provision does permit a restriction of competition – or even the elimination of all competition – where this is necessary to enable an undertaking to carry on the task entrusted to it<sup>245</sup>. At paragraph 15 of its judgment the Court noted that it could not be disputed that Régie des Postes was entrusted with a service of general economic interest<sup>246</sup>; the question was the extent to which a restriction of competition was necessary to enable it to carry on that function<sup>247</sup>. The Court continued at paragraph 17:

The starting point of such an examination must be the premise that the obligation on the part of the undertaking entrusted with that task to perform its services in conditions of economic equilibrium presupposes that it will be possible to offset less profitable sectors against the profitable sectors and hence justifies a restriction of competition from individual undertakings where the economically profitable sectors are concerned.

In the following paragraph the Court of Justice notes that, in the absence of a monopoly, it would be possible for individual undertakings ‘to concentrate on the economically profitable operations’ (in other words, to ‘cherry pick’). But the Court went on, at paragraph 19:

However, the exclusion of competition is not justified as regards specific services dissociable from the service of general interest which meet special needs of economic operators

<sup>243</sup> See also Case C-340/99 *TNT Traco SpA v Poste Italiane SpA* [2001] ECR I-4109.

<sup>244</sup> See ch 23, n 235 above.

<sup>245</sup> See ch 6, ‘Article 106(2)’, pp 235–242.

<sup>246</sup> *Corbeau* (ch 23 n 235 above), para 15.

<sup>247</sup> *Ibid*, para 16.

and which call for certain additional services not offered by the traditional postal service, such as collection from the senders' address, greater speed or reliability of distribution or the possibility of changing the destination in the course of transit in so far as such specific services, by their nature and the conditions in which they are offered, such as the geographical area in which they are provided, do not compromise the economic equilibrium of the service of general economic interest performed by the holder of the exclusive right.

At paragraph 20, the Court said that the application of the foregoing tests would be a task for the national court dealing with the case.

The importance of this carefully crafted judgment is clear: postal monopolies may be consistent with EU competition law, but subject to the important tests set out in paragraph 19. That paragraph makes clear that it is possible, as a matter of law, that a Member State may have conferred a monopoly that is wider than is legitimate for the purpose of maintaining the universal service, and that, where this is the case, the monopoly rights in question may be unenforceable. The first package of measures in the postal sector attempts on the one hand, in Directive 97/67, to determine the permissible limits of the legal monopoly and on the other, in the *Commission's Notice*, to explain the circumstances in which a legitimate monopolist might nonetheless be found guilty of infringing the competition rules. The Commission has itself taken action to strike down monopolies that go beyond what is justifiable under the *Corbeau* judgment<sup>248</sup>.

### **(B) *The Commission's Notice on competition in the postal sector***<sup>249</sup>

This *Notice* sets out in some detail how the Commission expects to apply the competition rules in the postal sector. It is divided into nine parts. After a preface and a discussion of terminology, the *Notice* considers market definition in the postal sector. Part 3 considers the issue of cross-subsidisation in some detail; the position of public undertakings and the freedom to provide services are then looked at, followed by state measures and state aid. Part 8 discusses what are meant by services of general economic interest in Article 106(2) TFEU.

### **(C) *Cases and decisions***<sup>250</sup>

In *Spanish International Courier Services*<sup>251</sup> the Commission held that it was unlawful for Spain to reserve to the Spanish Post Office, which already had a monopoly of the basic postal service, the ancillary activity of international courier services. In practice the Spanish Post Office was unable to meet the demand for international courier services (for example it did not cover the whole territory of Spain, nor did it extend to all countries in the world), so that there was a limitation of supply and technical development in the sense of Article 102(2)(b) TFEU. A similar decision in *Dutch Express Delivery Services*<sup>252</sup> was annulled on appeal by the Court of Justice as the Commission had not followed the correct procedure in adopting its decision<sup>253</sup>. In *Slovakian postal legislation*<sup>254</sup> the Commission concluded that Slovakia had infringed Article 101 by extending

<sup>248</sup> On the Commission's infringement proceedings see below.

<sup>249</sup> OJ [1998] C 39/2, [1998] 5 CMLR 108.

<sup>250</sup> See Flynn and Rizza 'Postal Services and Competition Law – A Review and Analysis of the EC Case Law' (2002) 25 World Competition 475.

<sup>251</sup> OJ [1990] L 233/19, [1991] 4 CMLR 560.

<sup>252</sup> OJ [1990] L 10/47, [1990] 4 CMLR 947.

<sup>253</sup> Cases C-48/90 and 66/90 *Netherlands v Commission* [1992] ECR I-565, [1993] 5 CMLR 316.

<sup>254</sup> Commission decision of 7 October 2008; the decision is on appeal Case T-556/08 *Slovenská pošta v Commission*, not yet decided.

the Slovakian Post Office's monopoly over the basic letter service to hybrid mail services. In *Deutsche Post*<sup>255</sup> the Commission imposed a fine of €24 million on the incumbent operator in Germany for offering loyalty rebates to customers of its business parcels service, and it also concluded that it was guilty of predatory pricing<sup>256</sup>. In *New Postal Services with a Guaranteed Day- or Time-Certain Delivery in Italy*<sup>257</sup> the Commission concluded that an Italian Decree excluding competition for a specific type of hybridised electronic mail service was contrary to Article 106(1) in conjunction with Article 102. In *Reims II*<sup>258</sup> the Commission decided that the criteria of Article 101(3) were satisfied in the case of an agreement between the postal operators of the EU as to the amount that one operator would pay to another when a letter posted in the former's country had to be delivered in the territory of the latter, so-called 'terminal dues'. There has been a long-running battle between the Union Francaise de l'Express, La Poste of France and the Commission, in relation to international express mail<sup>259</sup>. In *De Post/La Poste*<sup>260</sup> the Commission imposed a fine of €2.5 million on the Belgian postal operator for giving a more favourable tariff for its general letter mail service to those customers who also used its new business-to-business mail service. In *UPS v Commission*<sup>261</sup> the General Court upheld the Commission's rejection of a complaint by UPS that Deutsche Post was guilty of an abuse of a dominant position by using income from its reserved letter market to finance the acquisition of a shareholding in the express parcels operator DHL.

A number of concentrations in the postal sector have been notified to the Commission under the EUMR. In the first case, *TNT/Canada Post*<sup>262</sup>, the establishment of a joint venture between TNT and five postal administrations for the purpose of offering worldwide international express delivery services was cleared, subject to the offering of commitments by the four European postal administrations concerned that they would not discriminate in favour of the joint venture (the Canadian Post Office was not asked to give such a commitment). Similar commitments have been offered in subsequent cases<sup>263</sup>. The Commission granted conditional clearance in the cases of *Post Office/TPG/SPPL*<sup>264</sup> and *Posten/Post Danmark*<sup>265</sup>.

<sup>265</sup> Case M 5152, decision of 21 April 2009.

**(B) UK law**

The Postal Services Act 2011 establishes the regulatory framework for the postal sector. The Postal Service Act Swept away much of the system that had been established over the preceding 11 years. In particular it abolished the Postal Services Commission; its functions were transferred to OFCOM on 1 October 2011. OFCOM has concurrent powers with the OFT to apply Articles 101 and 102 TFEU and the Chapter I and Chapter II prohibitions in the Competition Act 1998<sup>266</sup>. OFCOM has proposed a number of changes to the domestic regulatory framework that seek to ensure Royal Mail satisfies its universal service obligations and becomes more efficient<sup>267</sup>. In June 2001 the OFT decided that the UK Post Office had not abused its dominant position in the postal services market by refusing to license its Royal Mail trade mark to an operator in the market for consumer lifestyle surveys<sup>268</sup>.

**10. ENERGY<sup>269</sup>****(A) EU law****(i) Legislation**

Article 194 TFEU provides that EU policy on energy shall aim, in a spirit of solidarity between Member States, to ensure the functioning of the energy market; ensure security of energy supply in the EU; promote energy efficiency; and promote the interconnection of energy networks. However the accomplishment of an internal energy market has been a gradual process. The Council took the initiative in the 1990s by adopting Directives which established a procedure to improve the transparency of prices for gas and electricity in the EU<sup>270</sup>; which required Member States to take steps to ensure the possibility of transit of gas and electricity between Member States;<sup>271</sup> and which established common rules for the internal market in gas and electricity<sup>272</sup>. This was followed by a second wave of reform in 2003 when the Council adopted Directives establishing a new set of common rules for the internal market in gas and in electricity<sup>273</sup>.

In 2007 the Commission conducted a sectoral inquiry under Article 17 of Regulation 1/2003 and concluded that energy markets in the EU were not functioning well: in particular many energy markets were highly concentrated; there is an absence of cross-border integration and cross-border competition; and there is insufficient unbundling of

<sup>266</sup> OFCOM's website is [www.ofcom.org.uk](http://www.ofcom.org.uk).

<sup>271</sup> Council Directive 91/296/EEC, OJ [1991] L 147/37 (gas), as amended by Council Directive 95/49/EC, OJ [1995] L 233/86 and Council Directive 90/547/EEC, OJ [1990] L 313/30 (electricity).

<sup>272</sup> Council Directive 98/30/EC, OJ [1998] L 204/1, as amended by Council Directive 95/49/EC, OJ [1995] L 233/86 (gas) and Council Directive 96/92/EC, OJ [1997] L 27/20 (electricity).

<sup>273</sup> Council Directive 2003/55/EC, OJ [2003] L 176/57 (gas) and Council Directive 2003/54, OJ [2003] L 176/37 (electricity).

network and supply activities<sup>274</sup>. The Council and the European Parliament subsequently adopted a third package of legislative measures<sup>275</sup> which have as their objective a single EU gas and electricity market.

## (ii) Application of EU competition law

The Commission has investigated a number of agreements in the energy sector. The privatisation of the electricity industry in Great Britain led to a decision that the criteria of Article 101(3) were satisfied in *Scottish Nuclear, Nuclear Energy Agreement*<sup>276</sup> and to two notices in the Official Journal dealing with numerous agreements that had been notified to the Commission under the system of notification for individual exemption in force at that time<sup>277</sup>. In 1995 the Commission gave its approval to a joint venture established by nine gas companies to construct and operate a gas interconnector between the UK and Belgium<sup>278</sup>. The Commission has also approved a number of long-term agreements for the supply of gas<sup>279</sup> and electricity<sup>280</sup>. However it has taken action (or is taking action) in a number of cases involving territorial restrictions and profit-sharing mechanisms in gas supply agreements<sup>281</sup>. In *IJsselcentrale*<sup>282</sup> the Commission held that an agreement between all the generators of electricity in the Netherlands and a joint subsidiary that only the latter could import and export electricity to and from that country entailed a restriction of competition that infringed Article 101(1).

Following the Commission's sectoral inquiry<sup>283</sup>, it brought a number of cases under Article 102 in the energy sector. This enforcement action has led to a striking number of decisions under Article 9 of Regulation 1/2003, in which structural commitments were offered to, and accepted by, the Commission to address its concerns about exclusionary practices by vertically-integrated undertakings<sup>284</sup>.

<sup>282</sup> OJ [1991] L 28/32, [1992] 5 CMLR 154; the decision was (eventually) partly annulled on appeal in Case T-16/91 *RV Rendo v Commission* [1996] ECR II-1827, [1997] 4 CMLR 453.

<sup>283</sup> See 'legislation', p 989 above.

<sup>284</sup> For a table of these and other decisions under Article 9 of Regulation 1/2003 see ch 7, 'Table of Article 9 Commitment Decisions', pp 259–260.

The Commission has investigated several mergers involving undertakings in the energy sector<sup>285</sup>.

## (B) UK law<sup>286</sup>

The regulatory regimes for the gas and electricity sectors are respectively contained in the Gas Act 1986 and Electricity Act 1989. Both sectors are regulated by the Gas and Electricity Markets Authority ('GEMA')<sup>287</sup>, which is assisted by the Office of Gas and Electricity Markets ('OFGEM'). GEMA has concurrent powers with the OFT to apply Articles 101 and 102 TFEU and the Chapter I and Chapter II prohibitions in the Competition Act 1998. A *Guideline* has been adopted under the Act, *Competition Act 1998: Application in the Energy Sector*<sup>288</sup>, and a *Guideline* on its application to the energy sector in Northern Ireland<sup>289</sup>. GEMA has adopted one infringement decision under its concurrent powers, imposing a fine of £46.1 million on National Grid plc for abusing its dominant position in the market for the supply of domestic gas meters<sup>290</sup>. On appeal GEMA's finding of abuse was upheld by the Competition Appeal Tribunal ('the CAT') and Court of Appeal, but the fine it had imposed was reduced to £15 million<sup>291</sup>.

Concerns about energy prices led GEMA to launch an 'Energy Supply Probe' into the markets in gas and electricity for households and small businesses in February 2008<sup>292</sup>. GEMA concluded that in important respects the market worked well, but identified some areas of concern, such as unjustified price differentials. GEMA subsequently changed the energy companies' operating licences to address its concerns<sup>293</sup>.

## 11. Water

The Water Industry Act 1991 provides a regulatory regime for water in the UK: the regulator is the Water Services Regulation Authority ('WSRA')<sup>294</sup>, assisted by the Office of Water Services ('OFWAT')<sup>295</sup>. WSRA has concurrent powers with the OFT to apply Articles 101 and 102 TFEU and the Chapter I and Chapter II prohibitions in the Competition Act 1998. A *Guideline* has been adopted under the Act, *Competition Act 1998: Application in the Water and Sewerage Sectors*<sup>296</sup>. WSRA regulates prices for the provision of water to households; there is no competition in the UK for the supply of

<sup>285</sup> See Faull and Nikpay *The EC Law of Competition* (Oxford University Press, 2nd ed, 2007), paras 12.428–12.469.

<sup>286</sup> See Harker and Waddams 'Introducing Competition and Deregulating the British Domestic Energy Markets: a Legal and Economic Discussion' [2007] *Journal of Business Law* 244.

<sup>287</sup> Utilities Act 2000, s 1; the principal objective and general duties of the GEMA are contained in s 4AA of the Gas Act 1986 and s 3A of the Electricity Act 1989, as amended respectively by ss 16 and 17 of the Energy Act 2010.

<sup>288</sup> OFT 428, January 2005.

<sup>289</sup> OFT 437, July 2001.

<sup>290</sup> Decision of 25 February 2008.

<sup>291</sup> Case No 1097/1/2/08 *National Grid plc v Gas and Electricity Markets Authority* [2009] CAT 14, [2009] CompAR 282, on appeal in [2010] EWCA Civ 114, [2009] UKCLR 386; permission to appeal to the Supreme Court was rejected: see OFGEM Statement of 5 August 2010.

<sup>292</sup> See OFGEM Press Release of 21 February 2008, for details of this investigation see [www.ofgem.gov.uk](http://www.ofgem.gov.uk).

<sup>293</sup> See OFGEM Press Release of 23 March 2009 and OFGEM Information Note of 21 September 2009.

<sup>294</sup> Water Act 2003, s 34.

<sup>295</sup> OFWAT's website is [www.ofwat.gov.uk](http://www.ofwat.gov.uk).

<sup>296</sup> OFT 422, March 2010; see also Bailey 'The Emerging Co-existence of Regulation and Competition Law in the UK Water Industry' (2002) 25 *World Competition* 127.

residential customers. Theoretically it is possible for undertakings to compete for large industrial customers that use at least 50 megalitres of water a year, but competition has been slow to emerge<sup>297</sup>. There have been several complaints about exclusionary behaviour by incumbents in the water sector, but the WSRAs has always concluded either that there was no infringement<sup>298</sup> or that the complaint was not one that it wished to pursue under competition law<sup>299</sup>. One case is particularly striking, *Albion Water v WSRAs*<sup>300</sup>, where the Authority had rejected two complaints against an incumbent water undertaking, Dŵr Cymru. On appeal the CAT concluded that Dŵr Cymru was guilty of a margin squeeze and annulled the Authority's decision to the contrary<sup>301</sup>. The judgment of the CAT was upheld on appeal to the Court of Appeal<sup>302</sup>. The CAT subsequently found Dŵr Cymru had proposed to charge Albion Water an excessive and unfair price for the transmission of water through its pipelines<sup>303</sup>.

There are special rules requiring certain mergers between water companies to be referred to the CC; these have been amended, to bring the system more closely into alignment with the law on 'normal' mergers under the Enterprise Act 2002<sup>304</sup>.

In April 2009 the Government published an *Independent Review of Competition and Innovation in Water Markets*, setting out various recommendations to increase competition in the upstream and retail levels of the 'value chain'<sup>305</sup>. A White Paper suggesting proposals for reform is expected in late 2011.
